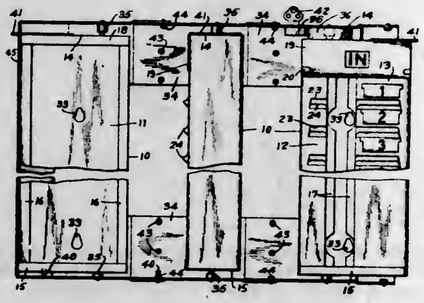
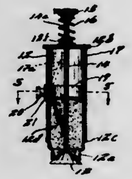
1,902,154. MECHANICAL TOY. RUSSELL D. BEEABOWER, Fort Wayne, Ind. Filed June 27, 1932. Serial No. 619,414. 5 Claims. (Cl. 46—14.)



1. A toy consisting of a torsion wheel and its complemental operating cord, an elastic rim on said wheel provided with axially extending slit flanges adapted to create sound upon operation of the wheel, an actuating spiral having an open coil portion and a stop operatively disposed upon said cord so as to be revolved thereby upon its axis when the wheel is actuated, and a miniature configuration of an aeroplane engaged by said spiral so as to be moved to and fro thereby upon rotation of the spiral alternately in opposite directions and its movement limited by said stop.

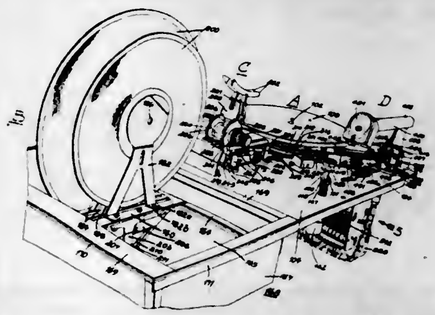
1,902,155. INTERLOCKING SHINGLE. JESSE E. BERKHEIMER, Tacoma, Wash. Filed Aug. 3, 1931. Serial No. 554,692. 2 Claims. (Cl. 108—7.)



1. A shingle of the class described, said shingle rectangular in form, and means for interlocking said shingle with others of its kind, said means being a diagonal slit extending inwardly and upwardly from each side and from near the butt end of said shingle.

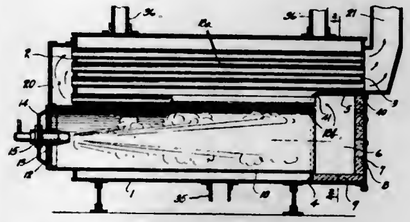
1,902,156. CARD RACK. LEON CRAIN BISHOP, Binghamton, and SEWARD EUGENE SWICK, Endicott, N. Y., assignors to International Time Recording Company of New York, Endicott, N. Y., a Corporation of New York. Filed Sept. 5, 1931. Serial No. 561,368. 16 Claims. (Cl. 40—124.)

1. A card rack unit, comprising an integral sheet metal structure including a base member, a pair of hollow box-like members integrally secured to said base member in spaced relation so as to form a channel, the walls of said members forming the channel being provided with parallel inclined straight slots adapted to freely removably support the cards in overlapping relation, said channel being arranged to permit manual removal of all cards at one operation by a vertical sweeping movement of the fingers of the operator inserted in said channel.



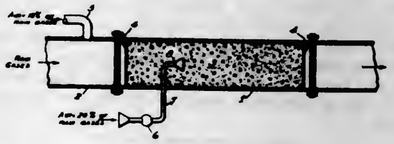
1,902,157. MEASURING AND DISPENSING DEVICE FOR RECEPTACLES. CHARLES BLOMSTROM, Minneapolis, Minn. Filed Oct. 3, 1931. Serial No. 566,608. 5 Claims. (Cl. 221—95.)

5. A measuring device having in combination, a casing providing a mouth, a valve for controlling the mouth of said casing, means for manipulating said valve, a partition slidable along the casing intermediate the ends thereof for varying the size of said casing, and means attached to said partition and supported by a wall of said casing for adjusting said partition longitudinally of the casing.



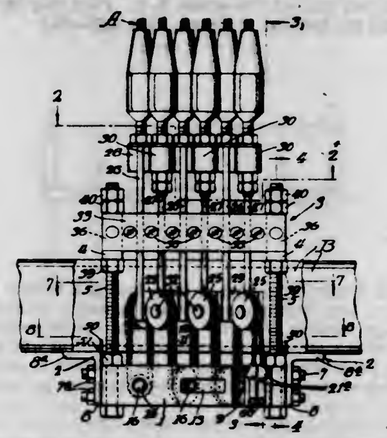
1,902,158. AUTOMATIC PHONOGRAPH. HERBERT L. BRUMP, FREDERICK O. GRAY, and FLOYD E. GRAY, Dayton, Ohio, assignors to General Motors Radio Corporation, Dayton, Ohio, a Corporation of Ohio. Filed June 8, 1931. Serial No. 542,822. 25 Claims. (Cl. 274—10.)

5. An automatic phonograph comprising, in combination, a carriage, a record magazine supported by the carriage, a rotatable turntable, a mechanism for transferring a record disc from the magazine to the turntable and vice versa and comprising record gripping fingers, a frame carrying the fingers, means for supporting the frame for rotation about an axis in the plane of the disc in order to place the disc either side up upon the turntable, means for bodily moving the frame so as to locate the disc upon the table, means for causing the gripper frame to rotate selectively in a predetermined direction and comprising pairs of mutilated bevel gears, one gear of each pair being carried by the gripper frame coaxially with respect to its axis, a frame carrying the other gears and movable in order to condition one of the pairs of bevel gears for cooperation when the gripper frame is bodily moved while the other pair of gears remain disconnected, a mechanism



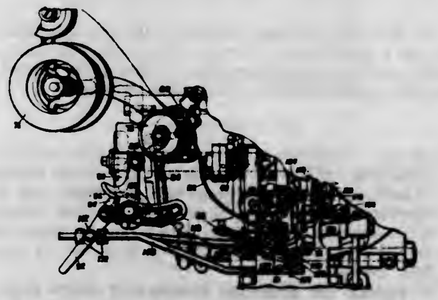
for moving the carriage in at least one of two directions to locate the desired record disc adjacent to the disc transfer mechanism, means for shifting the gear frame in response to the changing of the direction of movement of the carriage, and a reproducer for playing the disc.

1,902,159. BOILER. JONAS H. FOX, Seattle, Wash. Filed Feb. 16, 1931. Serial No. 516,072. 1 Claim. (Cl. 122—149.)



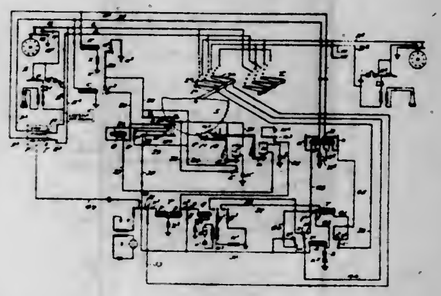
In a boiler of the character described, a horizontal shell, a flue sheet closing one end of the shell and comprising upper and lower relatively offset sections, and a horizontal connecting section merging into the offset sections in gradually rounded curves; said horizontal section being corrugated lengthwise with the corrugations thereof merging at their ends within the rounded curves.

1,902,160. METHOD OF USING OXIDATION CATALYSTS. JOSEPH C. W. FRAZER, Baltimore, Md., and LOUIS S. KASSEL, Pittsburgh, Pa.; said Kassel assignor to Carbon Monoxide Eliminator Corporation, Pittsburgh, Pa., a Corporation of Delaware. Filed June 29, 1931. Serial No. 547,674. 13 Claims. (Cl. 23—2.)



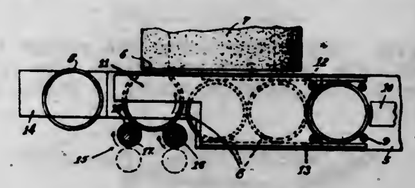
1. In a process of oxidizing an oxidizable gas in which an atmosphere containing said gas and oxygen sufficient for its complete oxidation is passed into contact with an artificially prepared copper chromite catalyst at an elevated temperature, the step comprising treating said chromite at an elevated temperature with a gaseous reducing agent prior to contact with said atmosphere of gas and oxygen to decrease the temperature at which said chromite begins to function when said atmosphere is supplied to it.

1,902,161. SUSPENSION DEVICE FOR EQUALIZING THE STRAIN ON ELEVATOR CABLES. WILLIAM P. FAOST, Jackson Heights, N. Y., assignor to Evans Elevator Equaliser Company, Bedford, Ind., a Corporation of Indiana. Filed Jan. 10, 1931. Serial No. 507,967. 18 Claims. (Cl. 187—1.)



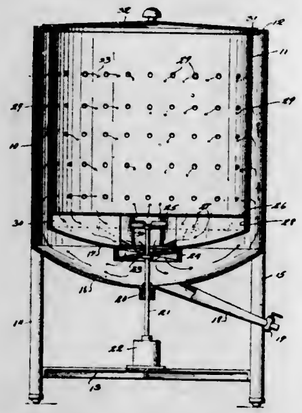
1. A suspension device for connecting an elevator car to a group of suspension cables including a plurality of pairs of floating equalizing pulleys, each pair being connected to a different suspension cable, a plurality of pairs of suspension pulleys pivotally connected to the car, a pair of strands of equalizing rigging connected to the car engaging said pairs of equalizing pulleys and pairs of suspension pulleys in alternation, and means for equalizing the strain on said strands.

1,902,162. LASTING MACHINE. GEORGE GODDU, Winchester, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed June 8, 1931. Serial No. 542,851. 47 Claims. (Cl. 12—2.)



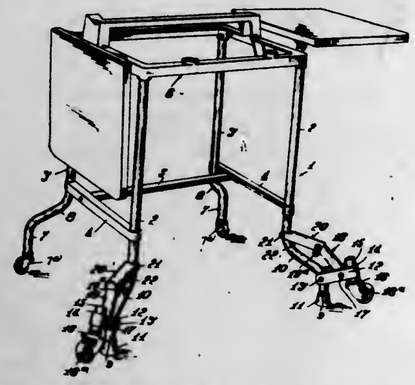
1. In a lasting machine, the combination with means for shaping an upper over a last, of means for fastening the upper to a sole on the last comprising devices arranged relatively to each other for alternative use respectively to drive fastenings and to curve them prior to and during their entrance into the shoe to anchor them in the shoe or to lay the marginal portion of the upper over the outer face of the sole and press it into position to adhere to said face in lasting the shoe with cement instead of with driven fastenings.

1,902,163. SWITCH CONTROL MECHANISM FOR AUTOMATIC TELEPHONE SYSTEMS. CHARLES L. GOODRUM, Athens, Ga., assignor of one-half to Louis G. Pacent, New York, N. Y. Filed Mar. 31, 1932. Serial No. 602,189. 7 Claims. (Cl. 179—16.)



1. In a telephone system, the combination with a switch mechanism comprising a motor magnet for advancing it and a locking magnet for holding it in its adjusted position, a pair of subscriber's line conductors, means for transmitting current impulses thereover, of main and associate control relays in said conductors, each having sets of contacts positioned to operate in reverse directions when said relays are energized, one of said sets of contacts being given a normal spring tension and the other a relatively weak spring tension, and a slow to release relay arranged to be energized upon the attraction of the weak set of contacts, a source of current for said line and for operating said magnets, an energizing circuit for the locking magnet closed by said slow relay, and a circuit for the motor magnet controlled by the normally adjusted contacts on the other line relay and intermittently energized in response to current interruptions on the telephone line.

1,902,164. PISTON RING SNAGGING MACHINE. RUDOLPH A. HANOS, Rockford, Ill., assignor to Burd High Compression Ring Company, Rockford, Ill., a Corporation of Illinois. Filed July 15, 1927. Serial No. 205,896. 12 Claims. (Cl. 51—129.)

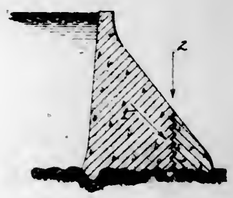


1. A piston ring snagging machine comprising, in combination, a work support, a rotary grinder turning in a plane approximately at right angles to the work support and having a side grinding face, said support being arranged to receive a piston ring laid flat thereon with the periphery thereof presented to said side grinding face, a guide over said work support serving to hold the piston ring flat on the support but permitting turning of said ring and means for simultaneously rotating the ring and pressing the periphery thereof against the grinding face comprising a pair of driven rollers adapted for engaging the periphery of the ring at circumferentially spaced points and to turn in the same direction approximately in the plane of the support and the ring thereon, said rollers being mounted on and movable bodily with a head whereby the same are arranged to be moved toward the grinder to press the ring against the same and communicate rotation thereto at the same time.

1,902,165. WASHING MACHINE. FRANK A. HANSEN, Fergus Falls, Minn. Filed May 19, 1931. Serial No. 538,525. 2 Claims. (Cl. 68—37.)

1. A washing machine of the character described comprising an outer casing, an upright inner casing removably mounted in said outer casing and disposed in spaced relation to the inner surface thereof, said inner casing having a plurality of perforations in the vertical wall thereof, an axially disposed outlet port in said inner casing communicating with the space between the casing, a depending annular flange defining the marginal edges of said outlet port and extending into the space between the two casings, a vertically disposed drive shaft extending through said inner and said outer casings, a propeller mounted on said drive shaft and disposed within said annular flange and having a pitch to force liquid downwardly therethrough into the space between the two casings, and means to cause liquid upon being forced downwardly against the bottom of the inner casing to flow upwardly between the two casings and inwardly of the perforations in the inner casing in a horizontal direction, a second propeller mounted on said drive shaft at a point upwardly from the first propeller and having a pitch to force liquid in a vertical column within the inner casing, and means for holding articles out of contact with each of said propellers but permitting liquids to pass therethrough.

1,902,166. CASTER MECHANISM FOR STANDS AND THE LIKE. EVAN C. HARTER, Sturgis, Mich. Filed Nov. 13, 1930. Serial No. 495,351. 3 Claims. (Cl. 16—34.)

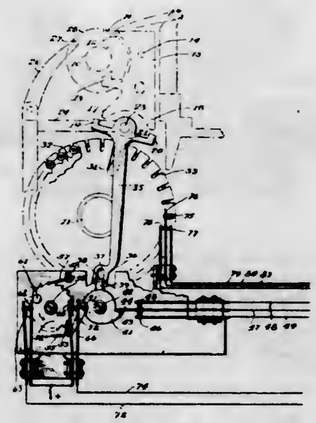


1. In combination with a stand leg having an offset bottom end adapted for friction engagement upon a floor, a swiveling caster, means pivoted at one end to said offset bottom end of the leg and carrying said caster at the other end, and toggle links pivoted to said pivoted means and to said leg above said bottom end and which links are pivoted together, said links being operable to be moved into substantial alignment to swing said pivoted means to engage said caster with the floor, and to automatically lock against reverse movement when so moved into substantial alignment.

1,902,167. EGG CARTON. MARIAN EARLY HASSELL and MALVERIN ALVO TODD, Miami, Fla., assignors of one-third to Starke Hassell, Greenville, N. C. Filed May 20, 1931. Serial No. 538,804. 7 Claims. (Cl. 229—29.)

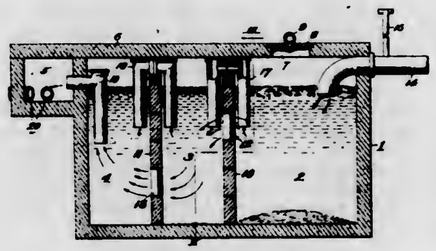
1. In a carton for eggs, a body having a bottom and a cover, a tray within the body and having a plurality of openings forming seats for eggs, said bottom being provided with a plurality of openings, each one of which overlaps a predetermined number of the openings in said tray to allow of the transillumination of the eggs in groups.

1,902,168. CONCRETE DAM. DAVID CHRISTIAAN HENNY, Portland, Oreg. Filed Sept. 21, 1932. Serial No. 634,098. 3 Claims. (Cl. 61—30.)



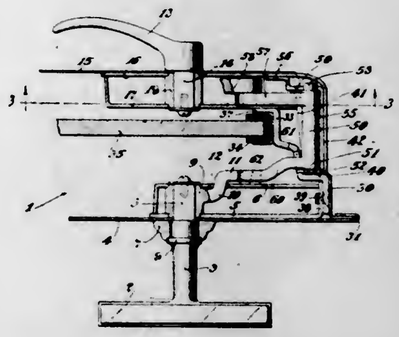
1. In a concrete dam serrated contraction joints extending in a substantially vertical plane with the contacting surfaces thereof being alternately substantially normal and parallel to the direction of principal stresses.

1,902,169. PROCESS FOR PRODUCING UNSATURATED ETHERS. WILLY O. HERRMANN and HANS DEUTSCH, Munich, Germany, assignors to Consortium fuer Elektrochemische Industrie, G. m. b. H., Munich, Germany, a Corporation of Germany. Filed Jan. 29, 1931, Serial No. 512,197, and in Germany Feb. 6, 1930. 14 Claims. (Cl. 260—151.)



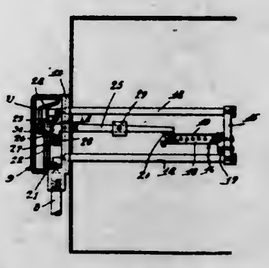
4. Process for producing unsaturated ethers from the vapors of acetals of saturated aldehydes containing a carbon atom adjacent to the carbonyl group, to which carbon atom is linked at least one hydrogen atom, comprising passing said vapors, at a velocity of at least 200 grams per liter of reaction space and per hour at temperatures between 250 and 500° C., over heated metal compound catalysts selected from the group consisting of fuller's earth, burnt brick clay, silica gel, asbestos, feldspars and analogous minerals, zeolites, natural and artificial aluminate-silicates and non-siliceous base exchange compounds.

1,902,170. DIVIDING RECEIVED INTELLIGENCE INTO TWO OR MORE GROUPS. VERNON R. KIMBALL, Palisades Park, N. J., assignor to The Western Union Telegraph Company, New York, N. Y., a Corporation of New York. Filed Oct. 21, 1930. Serial No. 490,261. 20 Claims. (Cl. 178—4.)



1. In a unit message system in which each message comprises characters from different groups, switching mechanism, counting means for operating in response to a change in the group of the received characters, and means responsive to said counting means for operating said switching mechanism.

1,902,171. SEPTIC TANK. CHARLES A. KOPP, Kansas City, Mo. Filed July 18, 1932. Serial No. 623,123. 1 Claim. (Cl. 210—6.)



A septic tank divided by full height partitions impervious to the passage of liquid, into a plurality of compartments, a sewage supply pipe communicating with one end compartment, an elevated compartment, an escape pipe for conducting liquid from the other end compartment into the elevated compartment, the end of said pipe where it communicates with said end compartment being at a lower level than the sewage supply pipe, overflow pipes in the partitions respectively and connecting the adjacent compartments, the lower ends of said overflow pipes being lower than the sewage supply pipe and their upper ends open for venting purposes within the respective adjacent compartments, a vent for the said supply pipe exterior to the tank, strainers in the partitions respectively at different levels and below the said various pipes, the strainer connecting the compartment into which the sewage is discharged occupying a higher plane than the other strainer.

1,902,172. LATCH FOR AUTOMOBILE DOORS. ALBERT L. LAMBERT, Philadelphia, Pa., assignor to Heintz Manufacturing Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Oct. 6, 1925. Serial No. 60,709. 2 Claims. (Cl. 292—161.)

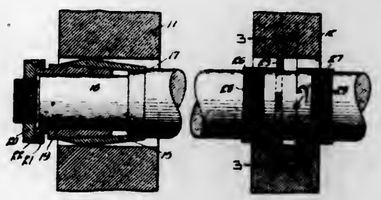
1. The combination with a door, of a latch on one side of the door, a handle on the other side of the door for operating the latch, and latch operating mechanism operatively connecting said handle and latch, said mechanism including a rock shaft, a housing projecting outside of the door edge, and said shaft being mounted in said housing outside of the edge of the door, said housing having vertical taper increasing from the inner side of the door, and a door jamb having a recess to receive said projecting housing when the door is closed.

1,902,173. HUMIDITY CONTROLLER. JOHN M. LARSON, Chicago, Ill., assignor to National Regulator Co., Chicago, Ill., a Corporation of Illinois. Filed July 14, 1930. Serial No. 467,698. 12 Claims. (Cl. 236—44.)

1. A humidity controller comprising a horizontally extending hydrostatic element secured at one end in a substantially horizontal position within an air duct, an air port for controlling a diaphragm valve secured to a plate attached to the outer side of said duct, a valve member for opening and closing said air port suspended from said plate in front of said air port, adjusting means extending through said valve member, a lever having a projecting portion adjacent one end, said projecting portion being pivotally mounted to said plate so that the actuating end of said lever engages the end of said adjusting means and the free end of said lever extends inwardly into said duct and engages the upper side of the free end of said hydrostatic element, whereby movement of said hydrostatic element pivots said lever and operates said valve member.

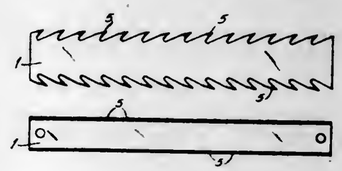
1,902,174. WELL BORE STRAIGHTENING TOOL. MILES J. LEWIS, Long Beach, Calif. Filed Jan. 13, 1932. Serial No. 586,293. 9 Claims. (Cl. 251—1.)

8. A well bore straightening tool including a reamer, a drilling bit, and a universal joint operatively connecting said reamer and bit.



1,902,175. ARTICLE OF MANUFACTURE. ARNOLD N. LUBIN, Chicago, Ill. Filed May 22, 1931. Serial No. 539,646. 5 Claims. (Cl. 45—47.)

1. A device for frictionally retaining a hingedly mounted member in adjustably varying angular positions, comprising an element movable with and connected to said member, said element having an offset portion spaced from the face of said member, a frictional grip comprising an arm having an opening in one end thereof through which said offset portion of said elements extends for frictional engagement, a pivot pin in the other end of said arm, a link connected with said pivot pin at one end thereof, and a stationary support for the other end of said link.



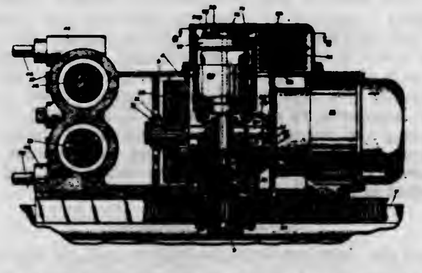
1,902,176. MANDREL FOR HOLLOW CRANK SHAFTS. HARRY H. MINER, Paris, France, assignor to Landis Tool Company, Waynesboro, Pa., a Corporation of Pennsylvania. Filed June 13, 1931. Serial No. 544,186. 9 Claims. (Cl. 82—44.)

1. A mandrel for grinding hollow crank shafts comprising a bar having means for securing it in two of the bearings of the crank shaft and having resilient expansible means engageable in another bearing to support it while it is being ground, substantially as set forth.

9. A mandrel for supporting a crank shaft during machining or grinding of bearings thereon comprising a bar adapted to be positioned through the bores of hollow bearings, the ends of said bar having expansible sleeves movable to engage the interior of the bearings and having a plurality of equally spaced radial bores, each of said bores having a pair of plungers radially movable therein, the said bores each having a single spring positioned between the inner ends of the plungers to urge the plungers radially outwardly whereby the outer ends of all the plungers will engage the interior of the bearings with substantially the same pressure irrespective of any eccentricity of the bar with the interior of the bearing, substantially as set forth.

1,902,177. METHOD OF PRODUCING SAWS. ORVILLE MITCHELL, Dallas, Tex. Filed July 23, 1931. Serial No. 552,650. 3 Claims. (Cl. 76—112.)

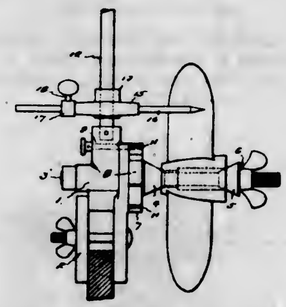
1. The method of making saws which consists in a continuous operation, in cutting over-size saw teeth in the edge of a body of metal, thereafter peening the points of said teeth to sharpen them and finally recutting the teeth to the proper size.



2. The method of making saw bands which consists in cutting over-size teeth in the opposite edges of a length of ribbon steel, peening the points of said teeth to sharpen them, recutting the saw teeth to the desired size and then bending the opposite edge portions of the ribbon at right angles to the body thereof in the same direction.

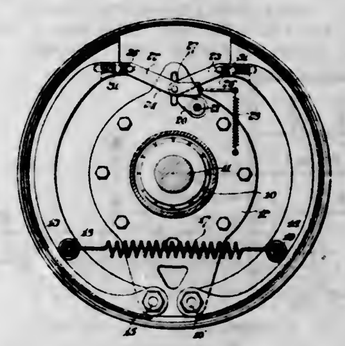
1,902,178. INSULATING BLOCK. WILLIAM K. NELSON, Chicago, Ill., assignor, by mesne assignments, to Insulex Corporation, Chicago, Ill., a Corporation of Delaware. Filed July 2, 1926. Serial No. 120,002. 7 Claims. (Cl. 72—36.)

6. A composition block comprising relatively thin masonry side walls, and a body of foamaceous material disposed between said side walls and bonded thereto to form an integral block, said foamaceous material forming a substantially uniform cellular structure.



1,902,179. MACHINE TOOL. ALEXANDER OBERHOFFKEN, Rockford, Ill., assignor to The Ingersoll Milling Machine Company, Rockford, Ill., a Corporation of Illinois. Filed May 15, 1931. Serial No. 537,569. 31 Claims. (Cl. 29—26.)

1. In a machine tool, the combination of a frame structure, a self-contained machine tool head assembly mounted to move bodily on said frame structure and comprising a saddle unit, tool driving and saddle feeding mechanism and motors therefor carried by said saddle unit, an interchangeable tool unit carried by said saddle unit, tool driving mechanism in said tool unit and means for connecting the tool driving mechanisms of said units for extending the tool drive from the saddle unit into the tool unit.

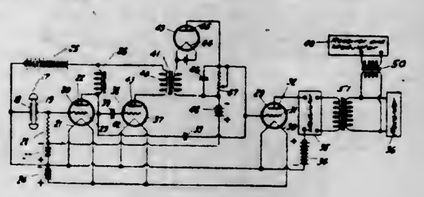


15. In a machine tool, the combination of a frame structure, a self-contained machine tool head assembly mounted to move on said frame structure and comprising a saddle unit and an interchangeable tool unit, drive, feed, and rapid traverse mechanisms and motors therefor carried by said head assembly, feed rate control mechanism and the electrical equipment also carried by said head assembly, said feed rate control mechanism comprising a revolving drum, a drive between the feed mechanism and said drum to revolve the same and switch operating means on the drum positioned to open and close predetermined ones of a group of switches in circuit with said motors.

1,902,180. GAUGE FOR DETERMINING PITCH OF PROPELLER BLADES. GEORGE A. PRIOR, West Hartford, Conn., assignor to The Gray & Prior Machine Company, Hartford, Conn., a Corporation of Connecticut. Filed Dec. 3, 1930. Serial No. 499,647. 7 Claims. (Cl. 33—174.)

6. A propeller gauge comprising a bracket, a shaft rotatably supported by the bracket, means for clamping a propeller on said shaft, a peripherally notched collar rotatable with the shaft, means movably supported by the bracket and adapted to be selectively engaged with the notches in the collar and register said collar and shaft with respect to the bracket, a post fixed to and extending from the bracket, a sleeve adjustable on said post radially with respect to said shaft, and a gauging pointer supported by said sleeve and adapted to be adjusted in a direction parallel to the shaft.

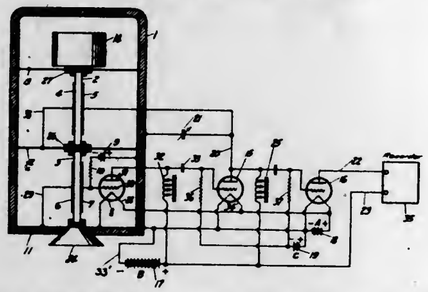
1,902,181. SELF-ADJUSTING BRAKE MECHANISM. EARL J. W. RAGSDALE, Philadelphia, Pa., assignor to Budd Wheel Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Mar. 20, 1926. Serial No. 96,119. 22 Claims. (Cl. 188—79.5.)



1. Brake mechanism comprising a drum, a pair of brake shoes adapted to cooperate therewith, means including toggle links for moving said shoes into engagement with said drum, and cam means in the connection between said toggle links and brake shoes operable by relative movement between the toggle links and brake shoes for making an automatic adjustment for wear of either or both brake shoes.

1,902,182. CURTAIN ROD TIP OR CURTAIN PROTECTOR. JOHN N. RASP, McKeesport, Pa. Filed June 30, 1931. Serial No. 547,964. 2 Claims. (Cl. 228—38.)

1. A tip for a curtain rod of a flat C type comprising a U-shaped member having channel side arms to snugly receive therebetween an end portion of the rod, said side arms at one side of the tip being provided with inwardly disposed flat lugs to be extended inwardly of the rod to which the tip is applied for close contact with the free longitudinal edges of the rod.

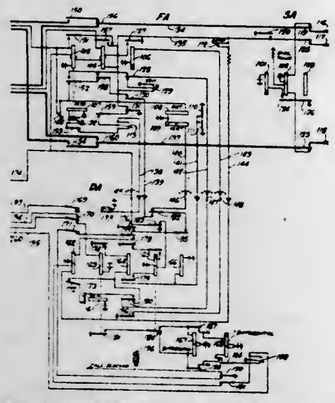


1,902,183. SYSTEM FOR RECEIVING AND RECORDING VIBRATIONS. FRANK RIEBER, San Francisco, Calif. Filed May 24, 1927. Serial No. 193,941. 11 Claims. (Cl. 177—352.)

6. In a system for recording earth vibrations at a plurality of spaced points, a receiver for converting the vibrations into electrical vibrations located at each of said points, a common recorder for all of said receivers, means associated with each receiver for transferring energy to said recorder, and means for blocking said transfer after an interval, comprising a condenser integrating the charges

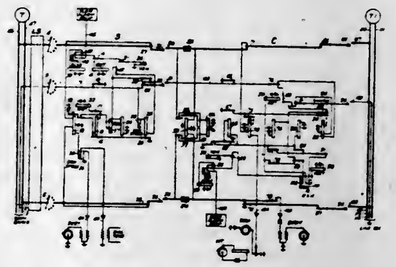
imparted thereto by the vibrations received by the receiver, and means whereby the potential difference of the condenser is utilized to block said energy transfer.

1,902,184. VIBRATION SENSITIVE SYSTEM. FRANK RIEBER, San Francisco, Calif. Filed June 7, 1927. Serial No. 197,211. 3 Claims. (Cl. 177—352.)



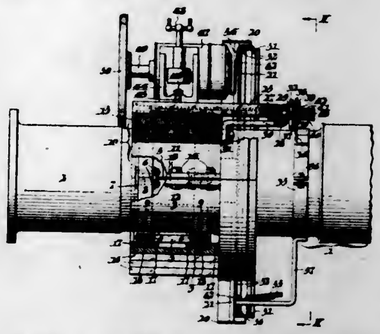
2. In combination, a casing, a contact member extending from the casing, a pair of piezo-electric devices in said casing, one over the other and mechanically in connection with each other, the lower of said devices being in mechanical contact with said contact member, a diaphragm extending across the casing and connected between the devices, another diaphragm extending across the casing and supporting the top end of the top device, and a weight acting on said top end.

1,902,185. METHOD OF COATING ELECTRODES OF DISCHARGE TUBES. HORST ROTHE, Berlin, Germany, assignor to Telefunken Gesellschaft fur Drahtlose Telegraphie m. b. H., Berlin, Germany, a Corporation of Germany. Filed Feb. 20, 1932, Serial No. 594,399, and in Germany Mar. 31, 1931. 4 Claims. (Cl. 250—27.5.)



1. The method of treating a metal electrode for electron discharge device to decrease its secondary electron emission which consists in applying to said electrode a coating of chromic oxide, and heating said coated electrode in an inert environment to convert said chromic oxide to chromous oxide.

1,902,186. AUTOMATIC TELEPHONE SYSTEM. NORMAN H. SAUNDERS, Chicago, Ill., assignor, by mesne assignments, to Associated Electric Laboratories, Inc., Chicago, Ill., a Corporation of Delaware. Filed Jan. 10, 1931, Serial No. 507,815. Renewed May 14, 1932. 26 Claims. (Cl. 179—18.)

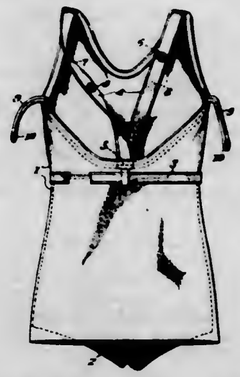


1. In a telephone system, a plurality of groups of lines, primary and overflow finders for each group, a single set of bank contacts comprising a test and line terminals terminating a plurality of overflow finders in different line groups, other similar sets of bank contacts terminating other multipled overflow finders, secondary finders having access to said set and other similar sets of bank contacts, a start relay in an overflow finder energized responsive to a call for initiating the operation of such overflow finder in case all the primary finders in the group of the calling line are busy, means controlled by said relay for applying a calling potential to the terminating test terminal of such overflow finder, means also responsive to the energization of said relay for initiating the operation of an idle secondary finder, and means for simultaneously operating said overflow and secondary finders in search of the calling line and said applied calling potential respectively.

1,902,187. TELEPHONE SYSTEM. NORMAN H. SAUNDERS, Chicago, Ill., assignor, by mesne assignments, to Associated Electric Laboratories, Inc., Chicago, Ill., a Corporation of Delaware. Original application filed Sept. 8, 1930, Serial No. 480,313. Divided and this application filed June 29, 1931. Serial No. 547,500. 11 Claims. (Cl. 179—18.)

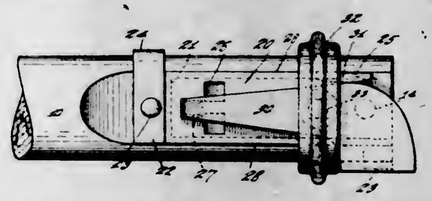
1. In an automatic switch having directive primary and secondary movements, a control circuit over which the primary operation of said switch is effected, a second control circuit over which the secondary operation of said switch is effected, and means automatically operative at the end of the primary movement for causing said switch to take one secondary step, and means responsive to said secondary step for effecting the change-over from the primary to the secondary control circuit.

1,902,188. MACHINE FOR GRINDING AXLES OR THE LIKE. VICTOR P. SCHMIDT and HARRY A. BRENAMAN, Altoona, Pa. Filed June 9, 1931. Serial No. 543,046. 6 Claims. (Cl. 51—241.)



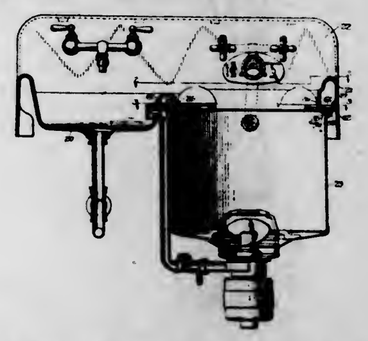
1. A machine for grinding axles or the like comprising an annular bearing adapted to be affixed rigidly to the work to be ground around the body thereof, said bearing being made up of separable segments, a carrier internally grooved to fit snugly on said annular bearing and adapted to be revolved thereon, a grinding tool adapted to engage the circumference of the work, and means for rotating said grinding tool about its axis.

1,902,189. HIGHWAY SIGN. WILLIAM A. SCHUTT, Litchfield, Ill. Filed Feb. 18, 1932. Serial No. 593,718. 2 Claims. (Cl. 40—145.)



1. A sign construction comprising a standard formed from a continuous length of angle iron and having slots in its upper end, a separate shorter length of angle iron integrally united to the lower end of said standard with the wings thereof arranged in opposite directions, a plate supported by the upper part of the standard and seated in said slots, and a sign frame removably connected with said plate.

1,902,190. BATHING GARMENT. ABRAHAM SLOTOROFF, Brooklyn, N. Y. Filed Dec. 10, 1931. Serial No. 580,099. 5 Claims. (Cl. 2—67.)

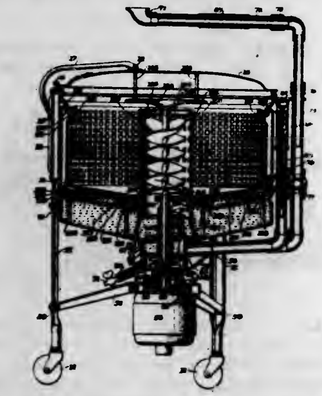


1. As an article of manufacture, a bathing garment comprising a waist having a bust-covering portion and a low-cut open back, a pair of shoulder straps connected at the front to the bust-covering portion and converging downward at the back within the back opening and having their lower end portions superposed and anchored to the lower edge of the back opening, releasable fastening means carried by said straps to fasten them together at a medial point thereof at the back and hold them superposed between said point and their anchorage at the back, a pair of transverse tension strips at opposite sides of the back opening and each anchored at one end to an inner edge margin of the back opening approximately at the bust level and being foldable to concealed positions beneath the bust covering portion, and releasable fastening means carried by the shoulder straps and said tension strips to secure the opposite end of each tension strip to the adjacent shoulder strap.

1,902,191. SNATH. RUBY P. STINE, Shelbyville, Ind. Filed Jan. 17, 1931. Serial No. 509,354. 14 Claims. (Cl. 56—326.)

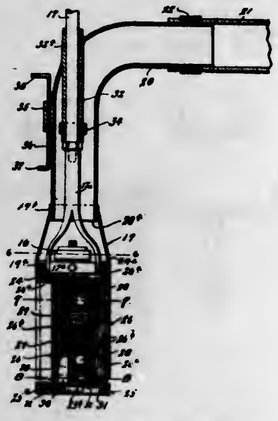
1. In a snath fastening for detachably fastening to a snath the usual scythe-blade tang, a plate secured to the side of the snath at its scythe-receiving end and having a tang-receiving portion inclined away from said side of the snath, said tang-receiving portion being adjacent said side at the extreme end of said snath, supporting means adapted to hold the upper end of said portion a considerable distance from said side of the snath and to support said portion throughout substantially its entire length, and means acting against the side opposite said blade-receiving scythe adapted to engage the exposed face of a tang and clamp said tang, blade, and snath together.

1,902,192. DISHWASHING MACHINE. EDGAR S. STODDARD, Berwyn, Ill., assignor to The Conover Company, Chicago, Ill., a Corporation of Illinois. Filed Apr. 24, 1930. Serial No. 446,810. 4 Claims. (Cl. 141—9.)



1. In a dishwasher sink combination, a shelf provided with a downwardly projecting skirt forming an opening, an adapter ring secured around the lower portion of said skirt and forming a water tight connection therewith, outwardly extending web portions on said ring, and a dishwasher tank of greater cross section than said opening supported by said ring and forming a water tight connection with said web extensions.

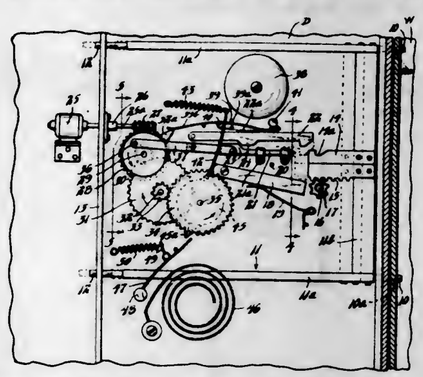
1,902,193. WASHING MACHINE. EDGAR S. STODDARD, Berwyn, Ill., assignor to The Conover Company, Chicago, Ill., a Corporation of Illinois. Filed May 5, 1930. Serial No. 449,749. 1 Claim. (Cl. 68—37.)



In a washing machine, a tank having a centrally draining bottom, a well chamber communicating with the lower portion of said draining bottom, a motor positioned

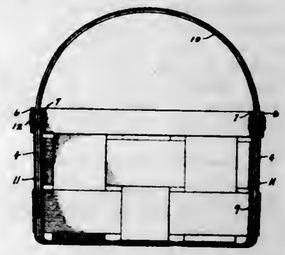
externally of said tank having a shaft extending upwardly through said well chamber and into the tank, a water elevating device operatively connected to said shaft above the well chamber, a water elevating and projecting device connected to said shaft about the upper por-

tion thereof, a perforated casing surrounding said water elevating and projecting device and spaced from the bottom of the tank, a rotatable clothes rack positioned about said casing, and means connected through the casing to an intermediate portion of said shaft and to the rack for rotating the latter.



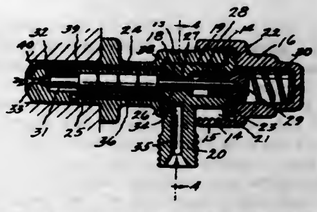
1,902,194. CYLINDER GRINDER. JOSEPH SUNNEN, St. Louis, Mo. Filed Apr. 11, 1930, Serial No. 443,293. Renewed Mar. 11, 1932. 23 Claims. (Cl. 51—184.1.)

1. A dust collector comprising a casing adapted to receive a cylinder grinder carrier and having peripheral outwardly presented pockets for receiving the mounts extensibly mounted on said carrier, an elbow member connected to one end of said casing, and a flexible conduit leading from said elbow member to a suitable exhaust apparatus whereby air can be exhausted from said casing, the latter being provided with a plurality of inlet openings arranged adjacent to said mounts to admit air and dust into the interior of said casing.



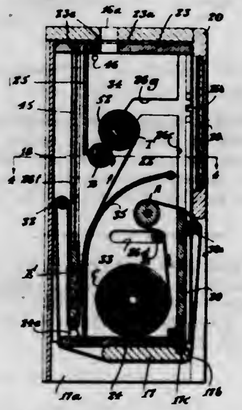
1,902,195. LOCKING SYSTEM FOR STRONG BOXES. ADOLPH SWAHN, Ellsworth, Wis. Filed May 6, 1932. Serial No. 609,613. 8 Claims. (Cl. 109—9.)

1. In a time controlled locking system for strong boxes, a projectable bolt, an apertured portion aligned to receive said bolt, a stop member to prevent retraction of said bolt, said stop member being movable to an inoperative position, means for moving said stop member to its inoperative position for a portion of a given re-



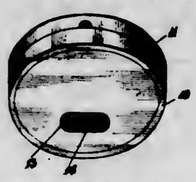
curring period of time, means for projecting said bolt, means for retracting said bolt, and means for reciprocating said movable member.

1,902,196. VEGETABLE AND FRUIT SHIPPING BASKET. GEORGE W. TALBOT, Bloomington, Ind. Filed Sept. 19, 1931. Serial No. 563,816. 2 Claims. (Cl. 217—125.)



1. A basket formed of veneer strips some of which comprise a bottom member and integral ends upturned to form staves, the middle stave on two opposite sides of the basket being double and interwoven with horizontal strips, a pair of rim strips one on each side of the staves, a handle having its ends inserted between the two members of the rim and frictionally gripped between the double staves and a plurality of staples on each side of the basket substantially spaced from each other uniting the assembly at the rim whereby the handle is prevented from tilting.

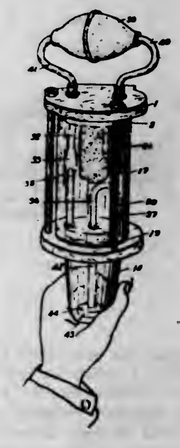
1,902,197. FUEL INJECTOR FOR ENGINES. FERI A. THAHELD, Dallas, Tex., assignor, by mesne assignments, to Guiberson Diesel Engine Company, Dover, Del., a Corporation of Delaware. Filed Oct. 20, 1930. Serial No. 490,003. 11 Claims. (Cl. 299—107.6.)



1. In an injector for an internal combustion engine, a body having a bore and a spray outlet at its forward end, a plunger slidable in the bore, and a valve connected with the plunger, the body having a by-pass for conducting fluids from in rear of the plunger to the spray outlet at the front end of the body in advance of the valve, so as to discharge said fluids with the spray of fuel.

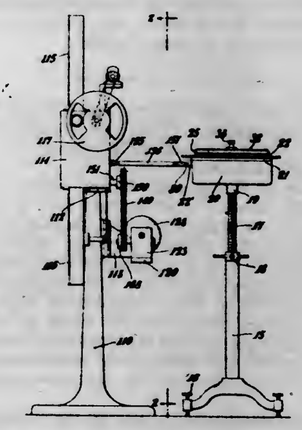
1,902,198. ROLL TOWEL CABINET. CHARLES W. THOMPSON, Wollaston, Mass., assignor, by mesne assignments, to Steiner Sales Company, Salt Lake City, Utah, a Corporation of Utah. Filed Jan. 31, 1929. Serial No. 336,518. 8 Claims. (Cl. 312—38.)

1. A towel cabinet comprising an outer frame and an inner case to fit into said outer frame, a curtain adapted to slide vertically in said inner case, said outer frame having provision to cooperate with said curtain whereby said curtain prevents said inner case from being drawn outwardly when the cabinet is in use.



1,902,199. COSMETIC CONTAINER. FERNAND TOURTOIS, New York, N. Y., assignor to Coty, Inc., Wilmington, Del., a Corporation of Delaware. Filed Apr. 6, 1931. Serial No. 527,900. 2 Claims. (Cl. 206—44.)

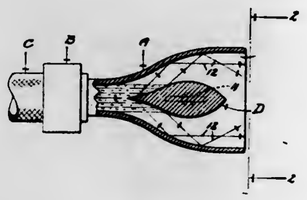
2. In combination, a container of the character described, comprising a covered casing and a cosmetic compact therein containing colored material, a surface thereof which is exposed when said casing is in an uncovered condition to permit a partial or complete removal of said material through the exposure of said surface, an insert being colored to correspond to the shade of the material and located outside the walls confining the material within the box and between the compact and outer wall of the casing, and an opening in the wall of the casing to disclose the color of said insert.



1,902,200. DEVICE FOR IMPREGNATING DRINKING WATER WITH RADIUM EMANATION. ALFRED HENRY TYRER, Toronto, Ontario, Canada, assignor to Standard Radium Corporation of America, New York, N. Y., a Corporation of Delaware. Filed Dec. 2, 1926. Serial No. 152,201. 13 Claims. (Cl. 167—51.)

1. A device for impregnating drinking water with radium emanation comprising a reservoir, a radium container having a perforated portion located in the reservoir, a duct leading into the radium container, a return duct leading through the bottom of the reservoir and having an open end adapted to be covered by the open top of the water containing vessel, a bulb adapted when compressed to force air through the aforesaid duct into the water containing receptacle and when expanded to draw the surplus radium charged air from the water

receptacle through said return duct, a tube extending through the bottom head of the reservoir and through which the radium charged air is forced, and a hollow head at the lower end of the tube having a perforated top adapted to be submerged in a body of water contained in a drinking vessel, a resilient washer secured to the lower face of the bottom head of the reservoir and extending around the depending tube against which the upper edge of the drinking vessel is adapted to be forced.



1,902,201. SYNCHRONIZING MECHANISM FOR TALKING MOTION PICTURES. ANTHONY J. VASSELLI, Newark, N. J. Filed May 16, 1929. Serial No. 363,418. 13 Claims. (Cl. 88—16.2.)

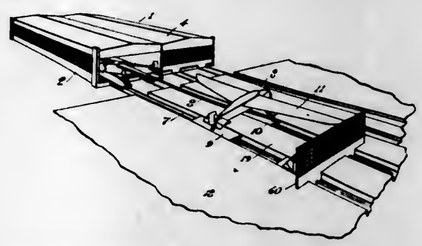
10. The combination with a moving picture machine and a sound record machine, each machine having an independent motor drive, of a shaft having two alined sec-

tions, a yielding clutch connecting the sections, one of said sections driving the picture machine and the other section driving the record machine, and means in said clutch to compel the machines to operate in synchronism.

1,902,202. CEMENT GUN NOZZLE. JOHN T. VAWTER, Los Angeles, Calif. Filed Dec. 30, 1929. Serial No. 417,467. 1 Claim. (Cl. 91—45.)

A cement gun nozzle for projecting hydrated particles of material comprising, a nozzle having an expanded orifice, and an ovicular shaped member centrally disposed in said nozzle, the distance between the walls of the nozzle and the ovicular member increasing diametrically from the greatest diameter of the ovicular member to the orifice of said nozzle.

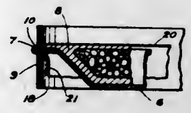
1,902,203. PROCESS OF PREPARING TITANIUM DIOXIDE. FOORD VON BICHOWSKY, Glendale, Calif. Filed Jan. 21, 1931. Serial No. 510,276. 9 Claims. (Cl. 23—202.)



1. Process of preparing titanium dioxide from crystalline titaniferous materials containing iron which comprises reducing the therein contained titanium compound by heating it with a reducing agent containing carbonaceous material to a crude amorphous sub-oxide, then leaching out the impurities and next heating the so-obtained residual sub-oxide with a sulphur containing material under non-oxidizing conditions so as to convert any iron compounds present to iron sulphides and then removing said iron sulphide impurities by means of a mineral acid and oxidizing the amorphous-titanium sub-oxide to titanium dioxide under such conditions as will give a titanium dioxide of pigment grade.

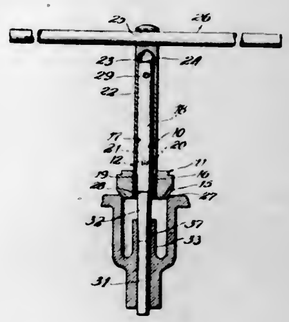
1,902,204. PROCESS OF PRODUCING PIGMENTS CONTAINING TITANIUM. FOORD VON BICHOWSKY, Glendale, Calif. Filed June 10, 1931. Serial No. 543,385. 8 Claims. (Cl. 23—50.)

1. Process of producing pigments, containing titanium, of a substituted alkaline earth titanate type in which the alkaline earth oxide material of the titanate is replaced by an alkaline earth sulphate material, which proccess consists in heating a titanium compound and alkaline earth material in molecular proportions with sulphuric acid in the amount required by theory to form the acid salt and heating the obtained compound with water so as to convert it to titanium dioxide and the sulphate of the alkaline earth and roasting this molecularly proportioned material to give a further degree of chemical homogeneity to the final product.



5. As new compositions of matter the compounds of the alkaline earth sulphates with titanium dioxide of a substituted alkaline earth titanate type in which the alkaline earth oxide material of the titanate is replaced by an alkaline earth sulphate material such compounds being dense white pigments.

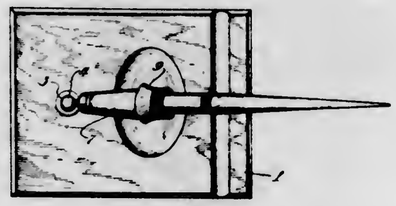
1,902,205. HANGAR FOR AEROPLANES AND THE LIKE. JAMES M. WEBSTER, New York, N. Y. Filed Mar. 8, 1930. Serial No. 434,226. 22 Claims. (Cl. 189—1.5.)



1. In an aeroplane hangar, the combination of means for movably mounting aeroplanes, a source of power operatively connected to said means, and temperature responsive devices operatively connected to said source of power to remove said aeroplanes from the hangar.

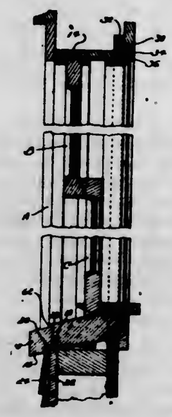
1,902,206. HOLDER FOR TRANSPARENT PIE COVERS. JOHN R. WRIGLEY, Norwalk, Conn., assignor to White and Wells Company, Waterbury, Conn., a Corporation of Connecticut. Filed May 16, 1932. Serial No. 611,648. 10 Claims. (Cl. 206—46.)

1. A holder for a pie cover, the same comprising a flexible strip having spaced longitudinally extending slots therein, said strip adapted to be drawn about a pie plate to draw portions of a cover against the edge thereof and secure the cover over a pie thereon and disposed portions of the edge of the pie plate in said slots, and complemental means on the respective end portions of the strip whereby said end portions may be connected to secure the strip in place.



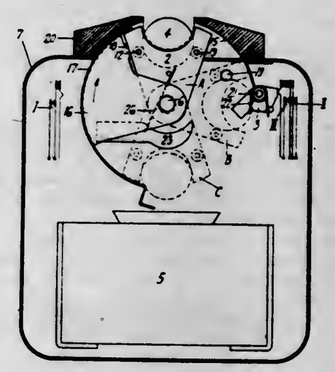
1,902,207. VALVE SEAT TOOL. FRANS O. ALBERTSON, Sioux City, Iowa, assignor to Albertson & Company, Inc., Sioux City, Iowa, a Corporation of Iowa. Filed May 19, 1931. Serial No. 538,504. 1 Claim. (Cl. 90—12.5.)

Apparatus for truing a valve seat aligned with a valve stem guide including: a stationary arbor formed with a cylindrical portion on its lower end adapted to substantially



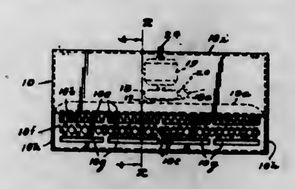
fit the cylindrical portion of the valve stem guide and having a long gradually tapered portion above said cylindrical portion, said tapered portion and cylindrical portion being of sufficient length to engage substantially the entire length of a valve stem guide, said tapered portion being adapted to be firmly wedged in the upper part of the guide, and the cylindrical portion substantially fitting in the valve stem guide throughout substantially the entire length of the guide, said tapered portion and cylindrical portion serving to hold the arbor against wabbling, the upper end of the arbor extending above the guide when the lower end is wedged in the valve stem guide, said tapered portion being tapered between the limits of fifteen to thirty thousandths of an inch taper per foot of length.

1,902,208. DESK PEN HOLDER. ROBERT BACK and GLENN A. COOPER, Chicago, Ill., assignors, by mesne assignments, to Pen Desk Set Company, a Corporation of Illinois. Filed Aug. 14, 1926. Serial No. 129,126. 2 Claims. (Cl. 120—108.)



1. In a fountain pen desk set, a base, an open-mouthed tubular pen holder mounted at its lower end on said base, an inwardly extending annular shoulder in said holder adjacent the mouth of the same, the inner walls of the holder and said annular shoulder being so related as to maintain the pen section shoulder of a fountain pen out of contact with said inner walls as the pen is inserted in the holder, said annular shoulder acting as a seal for the holder when the pen is positioned therein, the holder being provided with a small aperture for regulating the humidity of the air within the holder.

1,902,209. WINDOW FRAME CONSTRUCTION. FOREST FREDRICK BEIL, Clinton, Iowa, assignor to Curtis Companies, Incorporated, Clinton, Iowa. Filed Apr. 14, 1930. Serial No. 444,200. 9 Claims. (Cl. 20—11.)

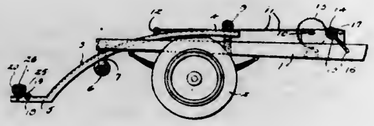


3. In a window frame, a sill, a side jamb, a strip applicable to said side jamb either flat-wise or edge-wise and flush with the inner face of the same when in either position for widening the jamb to a greater or less extent respectively as required, said strip having one side thereof in alinement with the inner face of said side jamb whereby said strip, when applied to the jamb edge-wise or flat-wise, will abut said face.

1,902,210. PAYSTATION APPARATUS. GEORG BINIEK, Berlin, Germany, assignor to Telephon-Apparat Fabrik E. Zwietusch and Company, Charlottenburg, Berlin, Germany. Filed Sept. 22, 1930, Serial No. 483,542, and in Germany Nov. 25, 1929. 10 Claims. (Cl. 194—16.)

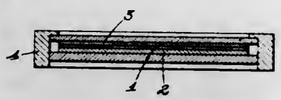
1. In a telephone paystation mechanism having a coin receiving unit, means for moving said unit into three different positions, means through which a coin is deposited in said unit or removed from said unit when the same is in one of its positions, a switch control circuit, means closed by said unit and a deposited coin when the unit is rotated to another of its positions for completing said switch control circuit, a talking circuit, means closed by movement of the unit and a coin deposited therein when the unit is moved to a third of its positions for completing said talking circuit, and a coin box for receiving the deposited coin consequent to the movement of the unit to the latter position.

1,902,211. HAIR COLLECTING DEVICE. HENRY L. BJORKLUND, Minneapolis, Minn. Filed Apr. 30, 1930. Serial No. 448,674. 12 Claims. (Cl. 15—15.)



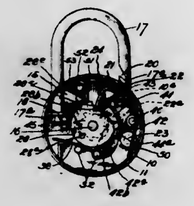
1. A device for collecting hair and the like comprising an upstanding casing having a foraminous front, a substantially horizontal projecting portion below said front, also of foraminous structure and means for withdrawing air from said casing whereby an apron, such as a barber's apron can be placed against the casing and the hair and refuse thereon drawn through said foraminous portion.

1,902,212. TOWING DEVICE. FRED BONGE, Seattle, Wash. Filed Oct. 20, 1931. Serial No. 569,998. 6 Claims. (Cl. 280—33.44.)



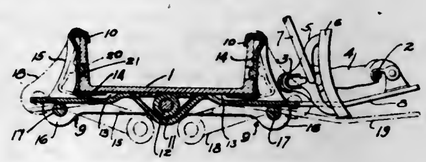
2. A towing mechanism comprising a wheeled structure, a roller suspended from the under side of said structure, a bar extending longitudinally of the structure over said roll-

er and having a downwardly directed rear portion terminating in a straight rear end, means carried by the structure for drawing the downwardly directed rear portion



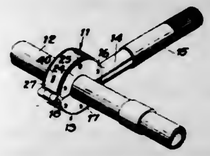
over said roller, and means carried by the straight rear end portion of the bar for coupling an axle of a vehicle therewith.

1,902,213. PROCESS OF REPRODUCING IMAGES ON METALLIC SURFACES. JOHN P. BROCKWAY, Coronado, Calif., assignor to A. B. Bowman, San Diego, Calif. Filed Feb. 28, 1929. Serial No. 343,576. 21 Claims. (Cl. 204—6.)



1. The herein described process of reproducing images on metallic surfaces, comprising the subjecting of a film to dry chlorine gas for a period of an hour or more, then placing the same on a highly polished metallic surface the metal of a group consisting of iron, steel, Monel metal, brass and copper, then placing a negative with images thereon over said chlorine treated film and subjecting the same to light.

1,902,214. SELF-CLOSING COMBINATION LOCK. RAYMOND J. BUETTNER and ROBERT A. FOUND, West Allis, Wis.; Joseph M. Muntner, Chicago, John J. Neitz, Naperville, Ill.; and Frank C. Zanzig, Milwaukee, Wis., assignors to Dudley Lock Corporation, Chicago, Ill., a Corporation of Illinois. Filed June 23, 1930. Serial No. 463,018. 22 Claims. (Cl. 70—113.)



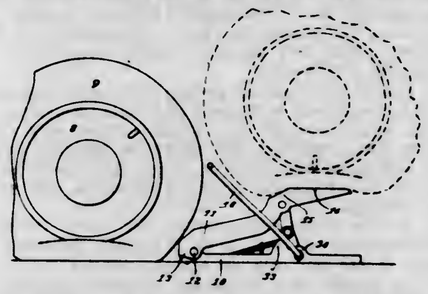
1. In a permutation lock, a lock casing, a shackle mounted in the casing having one end adapted to be released from engagement therein, a locking pawl mounted in the casing and engageable with said releasable end of the shackle, tumbler mechanism including a series of disks adapted to be adjusted in a predetermined combination which permits said pawl to release the end of the shackle, and means engageable by the end of the shackle as it re-enters the casing for positively dis-arranging the tumbler disks.

1,902,215. BRAKE BEAM SUPPORT BRACKET. EDWIN G. BUSSE, Chicago, Ill., assignor to Chicago Railway Equipment Company, Chicago, Ill., a Corporation of Illinois. Filed Nov. 3, 1930. Serial No. 493,191. 16 Claims. (Cl. 188—210.)

1. A two-part mounting bracket for a brake beam guard, guide, or support member, each part having a portion adapted to engage a truck spring plank and another portion in rigid relation therewith and adapted to be secured to the other part to retain the bracket in place.

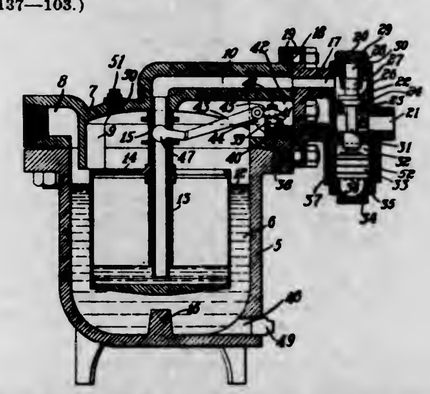
1,902,216. EXTERIOR GRIPPING DEVICE. JOSEPH A. BUTTRESS, South Pasadena, Calif., assignor of one-half to George Parker, Jackson, Miss. Filed Aug. 31, 1931. Serial No. 560,406. 11 Claims. (Cl. 81—179.)

1. An outside gripping device embodying: a body having a polygonal opening therein; a handle on said body; a plurality of floating gripping shoes in said opening having bearing projections engaging the inner face of said opening; means on said body for limiting the radial movement of said shoes into said opening; and yieldable means for normally tilting said shoes on said bearing projections relative to the engaged faces in said opening.



1,902,217. FISH-BAIT ADJUSTING DEVICE. JULES CATARAU, Seattle, Wash. Filed Oct. 29, 1930. Serial No. 491,864. 1 Claim. (Cl. 43—40.)

A fish-bait adjusting device comprising a leader, a conicoid-shaped member, means for adjustably securing said member for axial movement along said leader, a hoop loosely mounted on said leader and having inwardly directed prongs the inner ends of said prongs defining an opening of less diameter than the base diameter of the conicoid-shaped member whereby the base of said member constitutes a stop to limit movement of the hoop along the leader.



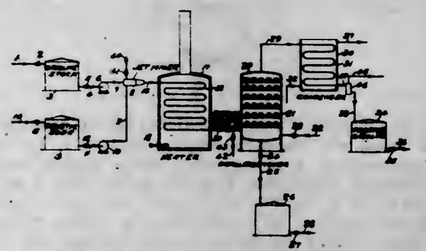
1,902,218. WHEEL RAMP. LOUIS L. COOMBER, Freeport, Ill. Filed May 16, 1930. Serial No. 452,874. 4 Claims. (Cl. 254—88.)

1. A portable wheel ramp upon which the wheel of an automobile is adapted to be driven, whereby supporting means may be placed beneath the axle thereof, comprising in combination, a base adapted to rest upon the ground, an inclined portion pivotally attached at one end to said base along which said wheel is adapted to move to be elevated, at least one toggle link pivotally attached at one end to said inclined portion, a second toggle link pivotally attached at its upper end to the lower end of said first toggle link and having a slotted sleeve positioned at the lower end thereof, a shaft journaled in said base and positioned within said sleeve, an abutment on said base adapted to support said toggle links on one side of the

center line thereof, means on said shaft adapted to engage the end of said slot whereby rotation of said shaft in one direction will cause rotation of said second toggle link, moving the pivotal connection between said toggle links through the center line thereof, said slot permitting movement of said toggle links independent of said shaft, under the weight of said inclined portion, whereby said inclined portion is lowered, to leave said wheel suspended.

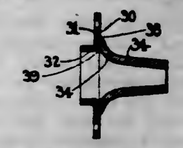
1,902,219. STEAM TRAP. CLARENCE F. COVEY, Pittsburgh, Pa., assignor to McAuley Automatic Trap Company, Pittsburgh, Pa., a Corporation of Delaware. Filed June 6, 1929. Serial No. 368,778. 3 Claims. (Cl. 137—103.)

1. A steam trap having in combination a body member forming a condensate collecting chamber, a condensate discharge control unit separably removable from said body member and having a main valve for controlling the discharge of condensate from said chamber, a condensate discharge pipe positioned in said chamber, a vertically movable bucket having a grooved guide sleeve surrounding said pipe, a pilot valve for controlling the delivery of operating pressure from said chamber to said main valve and a pilot valve operating lever mounted on said unit and having a yoke positioned in the groove of said sleeve and freely removable therefrom.



1,902,220. STENCIL CABINET. MICHAEL D'ANDREA, St. Paul, Minn., assignor of one-half to Ray J. Stieger, St. Paul, Minn. Filed Sept. 17, 1931. Serial No. 563,383. 4 Claims. (Cl. 101—126.)

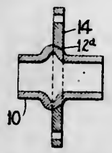
1. In a stenciling device of the class described, a normally upright cabinet of quadrangular box like form comprising two sections hingedly connected to each other at the top and opening toward each other, one part of the cover section adapted to be swung upwardly to resting position on top of the other or base section to about an upright common plane therewith, the lower rear corners of the base section supported in spaced relation to the support-



ing surface on which the device is set, a forward and downwardly inclined extension of said base section at each end thereof, a gage bar connecting the forward extremities of said extensions in parallel relation to the main or base part, said bar adapted to contact with a sheet to be stenciled forward of said bar and simultaneously support the front of the cabinet.

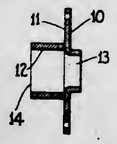
1,902,221. PROCESS OF PURIFYING NAPHTHA STOCKS. DAVID E. DAY, Los Angeles, Calif. Filed Dec. 5, 1931. Serial No. 579,287. 3 Claims. (Cl. 196—41.)

1. A process of purifying naphtha stocks, comprising, commingling a naphtha stock with a substantially concentrated water solution of a caustic alkali, passing the commingled mixture through a heating zone at temperatures of approximately 350–500 degrees F., under a pressure sufficient to prevent substantial vaporization of the naphtha stock, releasing the pressure and introducing air into the commingled mixture, and separating a purified naphtha by vaporization, fractionation and condensation from products of reaction, excess caustic alkali and aeriform products.



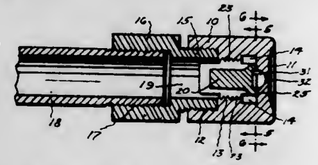
1,902,222. METHOD OF MAKING WHEEL HUBS. CAROLUS L. EKSERGIAN, Detroit, Mich., assignor to Budd Wheel Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed May 28, 1929. Serial No. 366,549. 2 Claims. (Cl. 29—159.3.)

1. The method of forming flanged hubs which consists in separately fabricating the flange and that part of the



hub barrel lying on one side thereof, flaring the end of a tubular section, and butt welding the flared end of the tubular section substantially to the cornice of the flanged section.

1,902,223. METHOD OF MAKING HUBS. CAROLUS L. EKSERGIAN, Detroit, Mich., assignor to Budd Wheel Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed June 4, 1929. Serial No. 368,349. 1 Claim. (Cl. 29—159.3.)

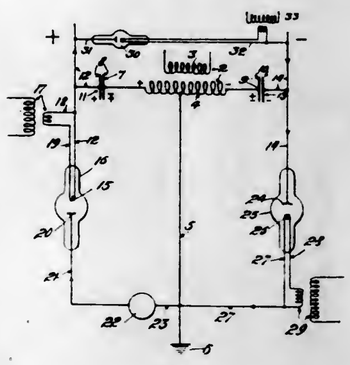


The method of forming hubs which consists in subjecting a tube to axial pressure to slightly externally collapse its walls intermediate its ends and thereby form an annular external shoulder, machining a portion of said shoulder, complementally machining the interior portion of a ring adapted to constitute the flange of the finished hub, and butt welding said complementally machined portions together.

1,902,224. METHOD OF MAKING WHEEL HUBS. CAROLUS L. EKSERGIAN, Detroit, Mich., assignor to Budd Wheel Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed June 6, 1929. Serial No. 368,775. 3 Claims. (Cl. 29—159.3.)

1. The method of making sectional flanged hubs formed from separately fabricated sections adapted to be united in substantially a radial plane, which method consists in integrally fabricating a flange portion and a portion of the barrel of the hub lying on one side thereof, forming a second unflanged barrel portion as a section of tubing, and butt welding the tubing section through one of its longitudinal extremities to the side of the flange opposite to that carrying the barrel portion.

1,902,225. FUEL BURNER. ROSS H. FORNEY, Dallas, Tex., assignor to Forney Combustion Engineering Company, Dallas, Tex., a Corporation of Texas. Filed Apr. 9, 1932. Serial No. 604,145. 3 Claims. (Cl. 299—120.)



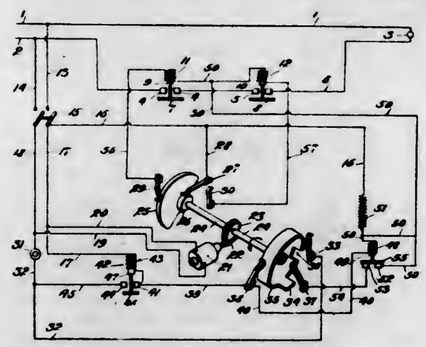
1. In a fuel burner, a burner head having a burner port at one end and a screw threaded internal flange intermediate its ends, a plug having a circumferential screw threaded collar intermediate its ends engaging in the flange of the head, the head having a storage chamber between its flange and its front wall surrounding the plug, the plug having a plurality of external fuel ducts extending substantially from end to end thereof and having at their forward ends deflectors curving gradually outward for directing the fluid fuel into the storage chamber of the head, the plug having also exterior ducts extending from the storage chamber and delivering fuel tangentially to the port of the head.

1,902,226. WEIGHTED SILK AND METHOD OF WEIGHTING THE SAME. VICTOR FROELICHER, Ridgewood, N. J., assignor to Textile Dyeing and Printing Co. of America, Inc., a Corporation of New Jersey. Filed July 27, 1932. Serial No. 625,220. 12 Claims. (Cl. 8—13.)

1. Process of weighting natural silk, which comprises weighting such silk with a tin phosphate, thereafter applying to the said silk an aqueous solution of a water soluble lead compound, and thereafter applying to the said silk an aqueous solution of an alkali metal borate selected from the group consisting of sodium and potassium borates.

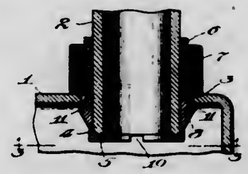
3. Process of weighting natural silk, which comprises weighting such silk with a tin phosphate, thereafter applying to the said silk an aqueous solution containing a water soluble lead compound, thereafter applying to said silk an aqueous solution of an alkali metal borate selected from the group consisting of sodium and potassium borates, and thereafter applying to said silk an aqueous solution of a compound selected from the group including the silicates, phosphates or tungstates of sodium or potassium.

1,902,227. HIGH POTENTIAL CURRENT UNIDIRECTIONAL SYSTEM AND METHOD. HARRY D. GARRETSON, New York, N. Y., assignor to Harry F. Waite, New York, N. Y. Filed Sept. 20, 1928. Serial No. 307,113. 4 Claims. (Cl. 250—34.)



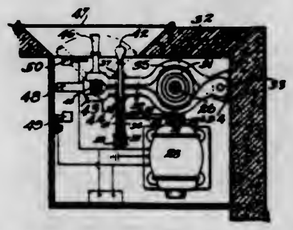
1. The method of generating a high potential, unidirectional, pulsating current which consists in simultaneously generating a first high potential between two terminals, said potential charging a condenser at each terminal to a fixed potential then reversing said high potential to add to said condenser potentials whereby upon discharge a current passes in one direction only from the condensers, said current being passed at a higher potential than said first high potential.

1,902,228. IMPULSE TIMER. HARRY D. GARRETSON, New York, N. Y., assignor to Harry F. Waite, New York, N. Y. Filed July 24, 1930. Serial No. 470,314. 4 Claims. (Cl. 175—375.)



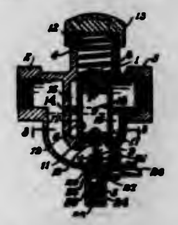
1. In a system of the class described, two separate electro-magnetic switches provided with suitable circuits, one circuit being closed through the contacts of said switches when both switches are closed but not otherwise, other circuits through the magnets of said switches

and means for controlling the magnet circuits for causing one of said circuits to open and close and the other of said circuits to open and close with a lag behind the



first both as to opening and closing, and each to function with regard to the other so that both are closed for a common period of time.

1,902,229. PIPE CONNECTER. WILLIAM GOETZELMAN, Chicago, Ill., assignor to Appleton Electric Company, a Corporation of Illinois. Filed July 30, 1931. Serial No. 553,985. 6 Claims. (Cl. 285—52.)

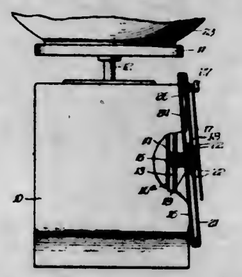


6. A device of the character described comprising a sleeve having remote from one end an external wedge face which recedes from the long axis of the sleeve as the distance from said end increases, the transverse dimension of the sleeve on a line at right angles to a diameter passing through said wedge face being smaller than the transverse dimension along said diameter, the sleeve being divided longitudinally from the opposite end inwardly past the zone in which the wedge face lies, and a nut screw-threaded on the first-mentioned end of the sleeve.

1,902,230. FIRE ESCAPE. OTTO C. N. GUNDERSEN, Spokane, Wash. Filed Feb. 18, 1929. Serial No. 340,694. 1 Claim. (Cl. 188—1.)

In a fire escape as described, the combination with an operating shaft having a brake drum thereon, an electric motor and transmission mechanism between the motor and said shaft, a pair of pivoted brake levers having shoes engaging the drum, a bolt engaging one of the levers, linkage connected to the other lever and a spring on the bolt for holding the linkage in alinement, means connected with the linkage and actuated by the transmission mechanism for releasing the brake shoes, manually operated means for spreading the free ends of the levers to release the brake shoes, a motor circuit and a switch therein, and electrical connections controlled by the manually operated means for closing the motor switch when the brake shoes are released.

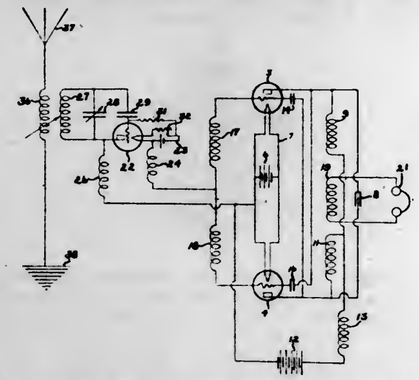
1,902,231. AUTOMATIC UNLOADING CHECK VALVE. JOHN W. GURLEY, Miamisburg, Ohio, assignor to The Dayton Air Compressor Company, Dayton, Ohio, a Corporation of Ohio. Filed July 31, 1931. Serial No. 554,171. 2 Claims. (Cl. 251—144.)



1. A check valve of the type described, comprising a valve body formed with a central bore, a hollow piston valve reciprocable in said bore, a seat for said piston valve, said valve body having a fluid inlet passage below said piston valve, and a fluid outlet passage, a spring for normally holding said piston valve upon its seat, said piston valve formed with an inlet port through which fluid may enter it after it has been raised by said fluid, and also having an outlet port of less diameter than the inlet port for communication with the outlet passage when the piston valve is above its seat.

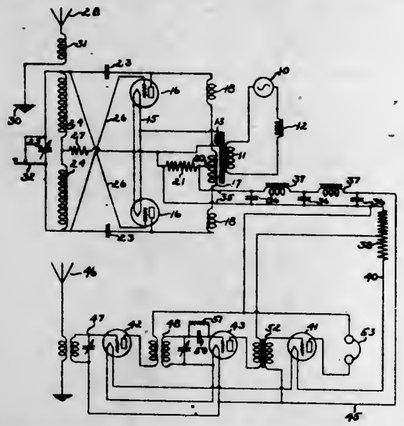
1,902,232. CLEANER FOR FURS AND THE LIKE AND PROCESS OF CLEANING. WALTER G. HABERL, Minneapolis, Minn. Filed July 31, 1930. Serial No. 472,212. 4 Claims. (Cl. 87—5.)

3. The method of cleaning furs which consists in spreading over the fur a multiplicity of small particles of corn-oil-cake meal, which have been impregnated with a liquid cleaning re-agent, agitating said furs and particles, whereupon the natural shape and characteristics of said particles cause the same to quickly work in to the leather of the fur and to then work outwardly frictionally engaging the hair of the fur and removing dirt therefrom.



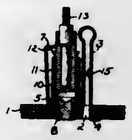
1,902,233. WEIGHING SCALE. STAN L. HANSSEN, Chicago, Ill., assignor to Hanson Scale Company, Chicago, Ill., a Corporation of Illinois. Filed Jan. 5, 1931. Serial No. 506,691. 2 Claims. (Cl. 265—68.)

1. A scale having in combination, a casing, weighing mechanism therein, a shaft connected to said mechanism and projecting through a wall of said casing, a point-



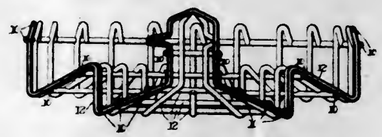
er on the end of said shaft, a dial positioned about said shaft between said pointer and said wall and mounted for rotative adjustment about the axis of said shaft, a handle for moving the dial, a spring concealed behind said dial and acting between said dial and said wall to resist movement of the dial, and a single means securing said handle and said spring to said dial.

1,902,234. RECEIVER FOR CONTINUOUS WAVES. RALPH M. HEINTZ, Palo Alto, Calif., assignor to Heintz & Kaufman, Ltd., San Francisco, Calif., a Corporation of Nevada. Filed Mar. 12, 1930. Serial No. 435,100. 6 Claims. (Cl. 250—8.)



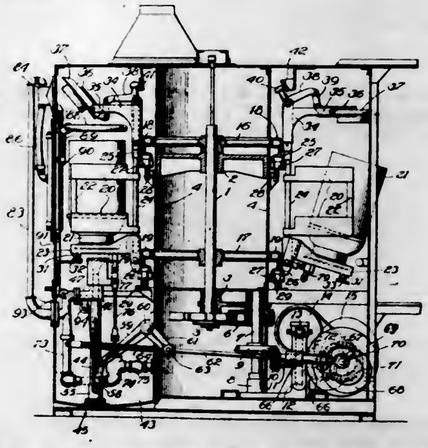
1. A receiver for continuous waves comprising a self-blocking oscillator, a trigger detector tube having a control electrode and a plate circuit connected to permit a current flow releasing said oscillator, and a regenerative detector circuit associated with said control electrode and arranged normally to block said current flow and to release said current flow when a received wave is impressed thereon.

1,902,235. RADIORECEIVER POWER SUPPLY. RALPH M. HEINTZ, Palo Alto, Calif., assignor to Heintz & Kaufman, Ltd., San Francisco, Calif., a Corporation of Nevada. Filed May 6, 1930. Serial No. 450,165. 11 Claims. (Cl. 250—13.)



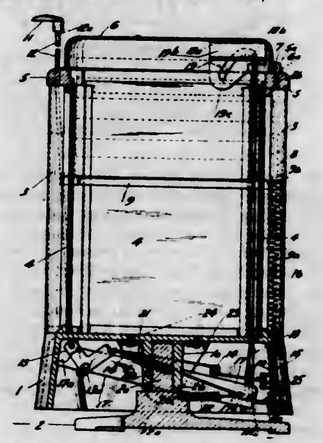
1. In combination, a transmitter for radio waves having a vacuum tube, a transformer for supplying an alternating potential between the cathode and anode of said tube, an impedance in series with said tube and said transformer, and a circuit bridged across said impedance for supplying rectified current to a receiver for radio waves.

1,902,236. CONNECTING PLUG RECEPTACLE. RALPH M. HEINTZ, Palo Alto, Calif., assignor to Heintz & Kaufman, Ltd., San Francisco, Calif., a Corporation of Nevada. Filed Nov. 24, 1930. Serial No. 497,817. 2 Claims. (Cl. 173—328.)



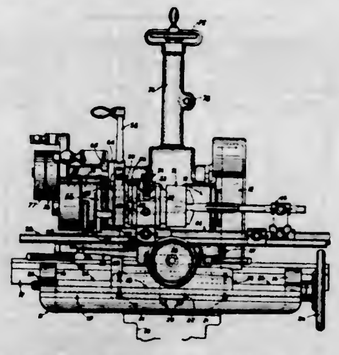
1. A plug receptacle comprising a base-plate apertured to receive a plug contact, a resilient contact strip secured to said base-plate and having a portion projecting from the plane of the base-plate and registered with said aperture to engage said plug contact, a socket member secured to the base-plate and electrically connected to said contact strip, a contact plug formed to engage said socket member and having a flange surface formed thereon, and a latch formed on the end of said contact strip and adjacent said socket for engaging said flange surface.

1,902,237. DISHWASHING MACHINE. WILLIS S. HILPERT, Winnetka, and EDGAR S. STODDARD, Berwyn, Ill., assignors to the Conover Company, Chicago, Ill., a Corporation of Illinois. Filed Feb. 5, 1930. Serial No. 425,952. 1 Claim. (Cl. 141—9.)



A dishwashing rack composed of a series of wires forming holders for the various articles to be cleansed, and a cushioning coating thereon, said coating consisting of a layer of plasticized and tanned gelatin.

1,902,238. CAN WASHING MACHINE. IRVING R. HIPPENMEYER, Waukesha, Wis., assignor to The Creamery Package Mfg. Company, Chicago, Ill., a Corporation of Illinois. Filed July 5, 1929. Serial No. 376,256. 2 Claims. (Cl. 141—7.)

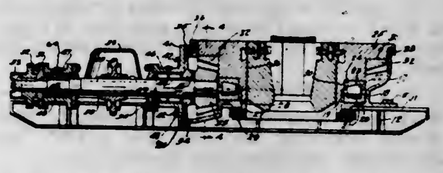


1. In a can washing machine, a liquid discharging jet mechanism having a connection for the supply thereto of liquid under pressure, a valve controlling said connection, mechanism for operating said valve having an actuating lever, a conveyor having a series of can holders adapted to receive cans for successive positioning over said jet mechanism, a plate mounted on each of said can holders adapted to be depressed by a can positioned in said can holder, and a member carried by said plate which is moved by the depression of said plate into position to engage said lever when said can is positioned over said jet mechanism.

1,902,239. BREAD SERVING APPLIANCE. CLEM HOLDGRAFER, Clinton, Iowa. Filed Nov. 17, 1930. Serial No. 496,214. 9 Claims. (Cl. 312—69.)

9. A server for sliced bread comprising a container having a base, cap and sides, with a plurality of tie-rods connecting them in assembled position, a cover hinged to the cap, an elevator platform within the container slidingly mounted upon a pair of tie-rods, coiled springs mounted upon said tie-rods adapted to exert pressure upwardly against the platform, and manually operable means to open the cover and to lock the platform in stationary position before the cover opens and to hold it locked until the cover is closed.

1,902,240. MACHINE FOR SHARPENING SCREWING TAPS AND THE LIKE. HERBERT WILLIAM HUNT and PERCY HUNT, Manchester, England. Filed Aug. 8, 1931, Serial No. 554,766, and in Great Britain Aug. 19, 1930. 4 Claims. (Cl. 51—95.)

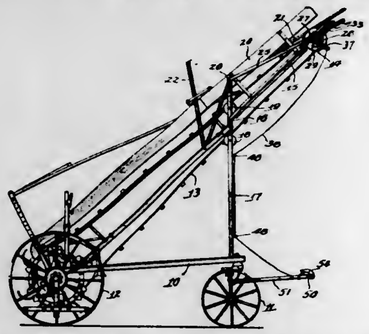


1. In a grinding machine for sharpening screwing taps and the like having a headstock and tailstock mounted to rock about an axis parallel to the axis of the tap and having a cam on the headstock engaging a fixed abutment to produce such rocking motion synchronously with the rotation of the headstock, in combination, a lever rotatably mounted on the axis of the headstock, and carrying the cam, a ratchet wheel secured on the spindle of the headstock adjacent to the lever, a pawl on the lever to engage the ratchet wheel, means for preventing the reverse rotation of the headstock and adjustable means for limiting the arc of movement of the lever.

1,902,241. BIRD CAGE AND UTILITY HANGER. CHARLES A. JONES, Campbell, Calif. Filed Feb. 24, 1932. Serial No. 594,867. 3 Claims. (Cl. 248—22.)

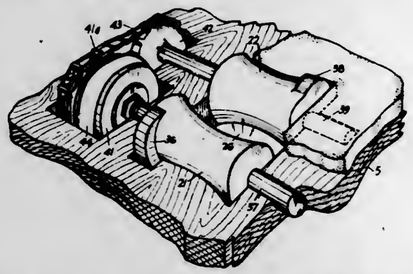
3. Means for movably suspending a hanger for bird cages and the like comprising the combination with a flanged bracket standard of a hook having teeth at its upper portion to securely engage a moulding or like place; a scroll or the like at its lower portion to prevent sway laterally; outwardly and downwardly disposed registering notches on the flanges of said bracket standard intermediate the hook and scroll to securely engage and cooperate with a suspension-hook of the class described and substantially for the purpose set forth.

1,902,242. WELL DRILLING ROTARY. HORACE G. JOHNSTON, Corsicana, Tex. Filed Oct. 24, 1930. Serial No. 490,948. 6 Claims. (Cl. 255—23.)



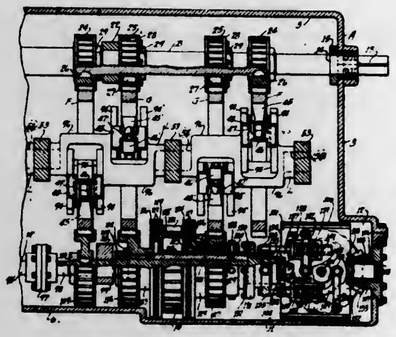
1. In a well drilling rotary, a pair of skids, a base plate mounted on said skids, a bed plate mounted on the skids, a bowl carried by the bed plate, a table rotatably mounted in the bowl, a gear depending from the table within the bowl, an oil sump in the bowl, an arch spanning the sump and integral with the bowl, an upright flange carried by the base plate and detachably fastened to the arch and the sump, a spacer carried by the flange and forming a closure for the sump and arch, a pair of bearing housings mounted on the base plate, a drive shaft journalled in said housings and extending through the flanges and spacer into the sump, and a pinion on the shaft in the sump meshing with the gear ring, the shaft, pinion, spacer, flange and housings being removable with the base plate as one unit.

1,902,243. HAY LOADER. LEE H. KAUPKE, Rock Island, Ill., assignor to The Rock Island Plow Company, Rock Island, Ill., a Corporation of Illinois. Filed Apr. 30, 1928. Serial No. 273,850. 2 Claims. (Cl. 198—109.)



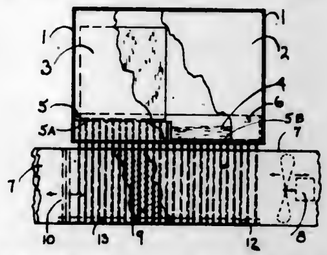
2. In an apparatus of the class described, a main frame, an elevator having a hinged upper portion, locking means

at opposite sides of said upper portion adjacent the outer end thereof, locking bars pivoted at opposite sides of said main frame, each being slidably engaged and selec-



tively adjustable relative to its respective locking member, and means for simultaneously operating said locking members from either side of said hinged portion.

1,902,244. EGG CANDLING MACHINE. JOSEPH F. KING, Burbank, Calif., assignor of one-half to Leo C. King, Glendale, Calif. Filed Mar. 11, 1932. Serial No. 598,102. 17 Claims. (Cl. 99—6.)

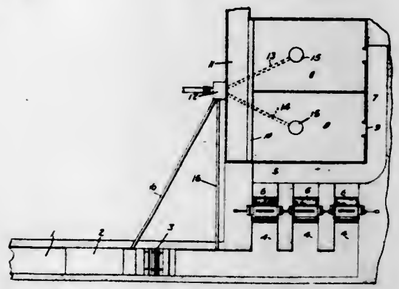


1. In a device of the kind described, a pair of spools, and means to impart to an egg supported between the adjacent surfaces of said spools a circumgyratory movement.

1,902,245. AUTOMATIC TRANSMISSION. VERNON KINSER, Butterfield, Mo. Filed Sept. 8, 1931. Serial No. 561,515. 13 Claims. (Cl. 74—53.)

1. In speed changing apparatus, the combination, with driving and driven shafts, of unyieldingly connected driving and driven elements, the driving element having permanent connection with the driving shaft, said elements having concurrent periods of revolution at relatively variable angular velocities, and means for alternately connecting and disconnecting the driven element with and from the driven shaft during respective predetermined periods of a revolution of the driving element.

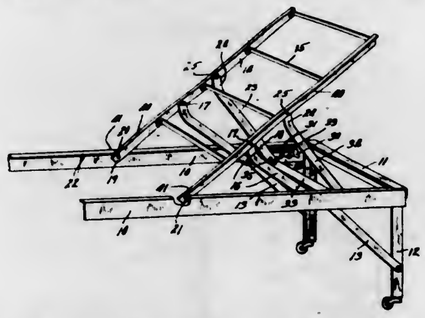
1,902,246. AIR COOLING. FRANCIS A. KITCHEN, Cleveland, Ohio. Filed Mar. 2, 1931. Serial No. 519,474. 2 Claims. (Cl. 62—131.)



1. An air conditioning device for cooling air and reducing its absolute humidity, comprising in combination a container having a stepped bottom, said step adapted to support a cake of ice within said container, the remainder of said bottom forming a recess for the reception of the water resulting from the melting of said cake of ice, an air duct positioned adjacent to said container, means for inducing a flow of air to be conditioned through said duct, and a plurality of heat exchanging elements extending into said duct, said elements connecting with said bottom in heat exchanging relationship and adapted to reduce the temperature of the air flowing through said duct below its dew point whereby condensation of the excess moisture present will be effected.

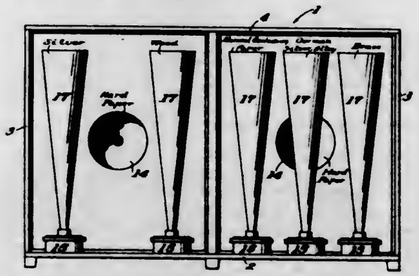
1,902,247. PACKING. ANDREW R. KLINGLOFF, Shrewsbury, Mass. Filed May 21, 1932. Serial No. 612,829. 3 Claims. (Cl. 288—1.)

1. As an article of manufacture, a packing consisting of a ring of packing material having conical slits extending into the packing from the outside cylindrical surface thereof, the material on both sides of each slit contacting.



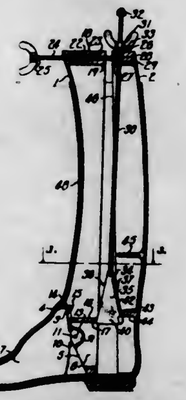
1,902,248. PROCESS AND APPARATUS FOR PURIFICATION OF SEWAGE AND TRADE WASTES. RAYMOND RICE KNIGHT, Toronto, Ontario, Canada. Filed June 1, 1931. Serial No. 541,330. 2 Claims. (Cl. 210—5.)

1. A purification process for sewage and trade waste consisting of first passing the sewage flow through screens



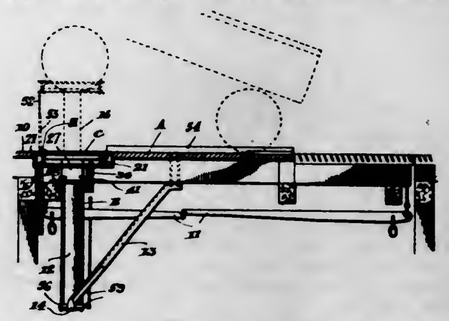
together with the unscreenable fine solids, then treating the effluent passed through such screens with the unscreenable solids contained therein to form screenable solids, then separating the screenable solids thus formed from the liquid effluent, and finally returning the solids resulting from the aforesaid treatment into the influent in front of the screening point thereof.

1,902,249. ADJUSTABLE BACK REST FOR BEDS. FRANK L. LANZY, Cleveland, Ohio, assignor to The Champion Spring Company, Cleveland, Ohio, a Corporation of Ohio. Filed Nov. 5, 1928. Serial No. 317,392. 4 Claims. (Cl. 5—73.)



4. A back rest attachment for a cot frame, having supporting braces pivoted to the back rest and the cot frame, the lower end of the rest slidably supported on the frame, the latter carrying elongated box-like structures having slotted vertical walls secured to the inner surface thereof and adjacent the head end of the frame, and the said slots having a series of ratchet notches on the lower edge thereof and facing away from the said head end, and a bail pivoted to said attachment and carrying outstanding pins adapted to enter any one of said notches selectively, the said pivoted bail being mounted beyond the supporting braces, and the latter being intermediate the bail and the lower end of the rest, and cover plates pivoted for movement in said slots to normally protect said notches from entrance of said pins and upon pressure from beneath to rise and expose the said notches to release the pins therefrom, to lower the back rest in a single operation.

1,902,250. SOUND AMPLIFIER. THEODORE LINDENBERG, Columbus, Ohio. Filed Dec. 1, 1931. Serial No. 578,311. 13 Claims. (Cl. 181—27.)

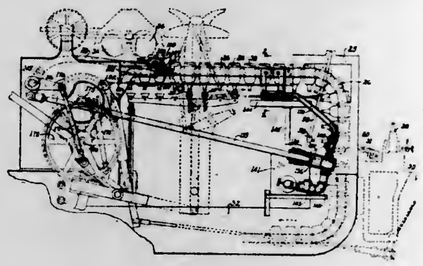


1. In a sound amplifier, a cabinet having open front and rear sides, a baffle arranged centrally of said cabinet and dividing the latter into front and rear compartments, said baffle having an opening formed therein, a reproducer unit arranged in said rear compartment and disposed in registration with the opening, and a plurality of reproducer units disposed in said front compartment, each of the reproducing units in the front compartment being provided with a tapered resonator.

1,902,251. BOOT TREE. FRED R. MAIER, Kansas City, Mo. Filed May 25, 1931. Serial No. 539,778. 8 Claims. (Cl. 12—117.)

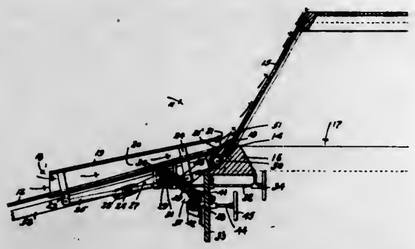
1. A boot tree including shin and calf sections, a wedge-shaped member slidably engaging one of the sections, a rod movable longitudinally of the sections to actuate the wedge to spread the lower ends of the sections, means on one of the sections for engaging the rod to effect pivotal movement of the wedge into that section when the wedge is in retracted position, and means for spreading the upper ends of the sections.

1,902,252. COMBINATION GRAIN DUMP. JOHN MCEACHERN, Winnipeg, Manitoba, Canada. Filed Apr. 20, 1931. Serial No. 531,512. 16 Claims. (Cl. 214—46.5.)



1. In combination with a scale platform, grain dumping mechanism comprising a hoist in the form of a piston and cylinder mounted below the scale platform, a piston rod connected to said piston and adapted to project above the level of the scale platform during operation, a hoist platform mounted on said piston rod and adapted to be flush with the scale platform in normal position, said hoist platform including a framework made up of a central stationary section secured to said piston spacing movable sections designed to be displaced on upward movement of the hoist, means for operating the hoist, and means for stopping downward or upward movement respectively of the movable sections when said hoist is in raised or lowered position.

1,902,253. WASHING APPARATUS. GEORGE J. MEYER, Milwaukee, Wis., assignor to Geo. J. Meyer Manufacturing Company, Milwaukee, Wis., a Corporation of Wisconsin. Original application filed Jan. 24, 1925, Serial No. 4,455, Patent No. 1,787,993, dated Jan. 6, 1931. Divided and this application filed Sept. 17, 1927. Serial No. 220,141. 5 Claims. (Cl. 141—7.)



1. In a bottle washing machine, the combination of an intermittently-traveling bottle conveyor adapted to hold

bottles in inverted position, conveyor-impelling means, a spray conduit disposed to register with the openings of said bottles during pauses in their travel, a plunger pump connected to said conduit including a plunger operatively

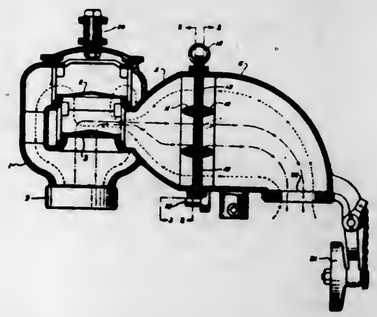
connected with said conveyor-impelling means to be movable on a pressure stroke during pauses in the travel of said bottle conveyor for injecting a fluid spray into said bottles, and means for supplying fluid to said pump.

1,902,254. WINDSHIELD CLEANER DEVICE FOR AIRPLANES. SILAS A. MOREHOUSE, Los Angeles, Calif. Filed Apr. 1, 1929. Serial No. 351,524. 9 Claims. (Cl. 20—40.5.)

1. For use in combination with the cowl and the windshield of aircraft and the like: a deflector plate mounted on and spaced above said cowl so as to form a passage for directing a stream of air across the outer surface of said windshield.

1,902,255. COATING COMPOSITION AND FILM PRODUCED THEREBY. WILLIAM HENRY MOSS and BLANCHE B. WHITE, Cumberland, Md., assignors to Celanese Corporation of America, New York, N. Y., a Corporation of Delaware. Filed Mar. 3, 1928. Serial No. 258,999. 3 Claims. (Cl. 134—26.)

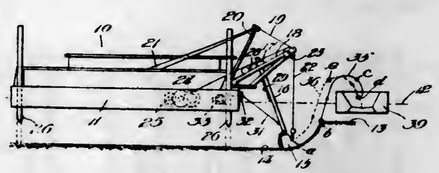
1. A coating composition comprising an organic derivative of cellulose, an aromatic amine-furfural resin which bleaches on exposure to light, a phenol-aldehyde resin which darkens on exposure to light and a common solvent, the proportions of resins present being such as to produce films that maintain their color unchanged on exposure to light.



1,902,256. COATING COMPOSITION AND FILM PRODUCED THEREBY. WILLIAM HENRY MOSS, Cumberland, Md., assignor to Celanese Corporation of America, New York, N. Y., a Corporation of Delaware. Filed Mar. 3, 1928. Serial No. 259,000. 7 Claims. (Cl. 134—79.)

1. A coating composition containing a derivative of cellulose, an acetone furfural resin, a phenol aldehyde resin and a solvent therefor the proportions of resins being such as to produce a light-fast film.

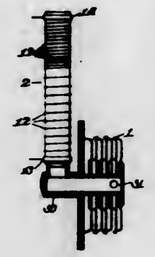
1,902,257. DERIVATIVE OF CELLULOSE COMPOSITION. WILLIAM HENRY MOSS, Cumberland, Md., assignor to Celanese Corporation of America, a Corporation of Delaware. Filed May 13, 1929. Serial No. 362,851. 3 Claims. (Cl. 134—26.)



1. A composition of matter containing cellulose acetate, a polymerized vinyl compound in greater quantity than is compatible with the cellulose acetate, a synthetic resin selected from the group consisting of phenol-formaldehyde resins, diphenylol propane-formaldehyde resins, aromatic sulfonamid resins, resins formed by the heating of lactic acid under reflux, phenol-furfural resins, acetone-furfural resins and aniline-furfural resins, and a common solvent, synthetic resin being present in sufficient amount so that the resulting product is clear and homogeneous.

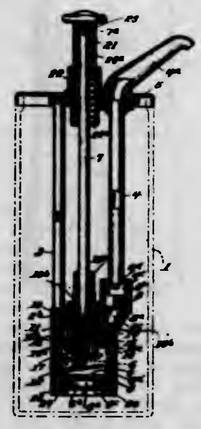
1,902,258. FLAME ARRESTER. FRANS G. D. MULLER, Houston, Tex., assignor to The Staytite Company, Houston, Tex., a Corporation of Texas. Filed Sept. 12, 1930. Serial No. 481,507. 5 Claims. (Cl. 220—88.)

1. A plurality of flame arresting elements, spacing means therefor, and a ring by which said elements and means are movably connected together so that they may be moved apart and cleaned.



1,902,259. METHOD OF AND APPARATUS FOR CONTROLLING DREDGES. ALOYS NEVELING, Chicago, Ill. Filed Feb. 18, 1932. Serial No. 593,815. 11 Claims. (Cl. 214—135.)

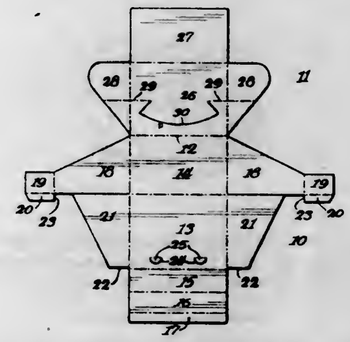
1. The combination with a dredge, of hoisting mechanism mounted on said dredge, and a pair of oppositely connected steam turbines connected to said hoisting mechanism for controlling the opposite movements thereof.



1,902,260. HEAT MOTOR. LAWRENCE M. PERSONS, Des Moines, Iowa, assignor to Cook Electric Company, Chicago, Ill., a Corporation of Illinois. Continuation of application Serial No. 37,091, filed June 15, 1925. This application filed Jan. 10, 1929, Serial No. 331,690. Renewed Jan. 27, 1933. 8 Claims. (Cl. 60—25.)

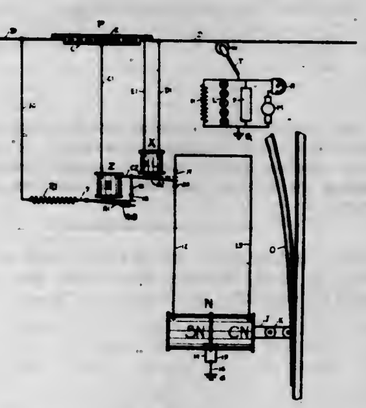
1. A heat motor comprising an expansible and contractible vessel having a volatile liquid therein, a heating device therefor and a heat coil wound about said heating device, said heat coil being arranged with the windings at the top of said heat coil more closely spaced to accelerate initial heating of said liquid.

7. A heat motor comprising an expansible and contractible vessel having an expansible liquid therein, suitable supporting means for said vessel, a heating device therefor comprising a substantially closed tube communicating at one end with said vessel, and mounting means arranging said tube substantially transversely with respect to said vessel.



1,902,261. SIRUP PUMP. ALLEN C. PILCHER and LAWRENCE C. PILCHER, Louisville, Ky., assignors, by direct and mesne assignments, to The Russ Manufacturing Company, Cleveland, Ohio, a Corporation of Ohio. Filed July 7, 1930. Serial No. 466,236. 17 Claims. (Cl. 225—35.)

1. In a liquid dispensing pump, a piston having a port, an actuating member having means to operatively connect with said piston for unitary movement therewith, means moving with the actuating member for closing said port, and means rendered operative during such unitary movement to disconnect said actuating member from the piston for relative endwise movement and to open said port.

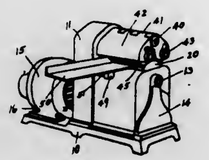


1,902,262. FOLDABLE DISPLAY CARTON. HENRY K. POWELL, Chicago, Ill., assignor to Morris Paper Mills, Chicago, Ill., a Corporation of Illinois. Filed Sept. 24, 1930. Serial No. 483,991. 7 Claims. (Cl. 206—44.)

1. A foldable carton formed of a single blank of paper and including a plurality of walls, one of said walls being formed of a pair of flaps projecting from two other of said walls into mutually overlapping relation, the outer of said flaps having a tongue extending laterally therefrom and across one edge of the other of said flaps, and

a lip extending laterally from said tongue for engaging the inside of the inner flap to lock said flaps in overlapping relation.

1,902,263. AUTOMATIC ELECTRIC SWITCH CONTROL. FRANK H. RICHTMEKESSING, Louisville, Ky., assignor to Cheatham Electric Switching Device Company, Louisville, Ky. Filed Jan. 7, 1928. Serial No. 245,182. 16 Claims. (Cl. 246—227.)

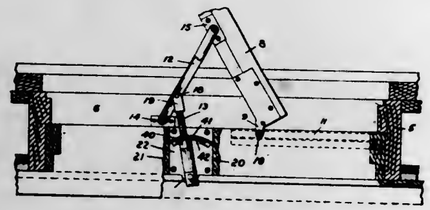


12. A switch operating system comprising an electrically operated track switch, a trolley conductor, a trolley contactor to be engaged by a current collector, a switch operating circuit for conducting current to a track switch solenoid for operating the said track switch, a relay having an operating coil in series with the said track switch solenoid, said relay operable to affect the opening of the said switch operating circuit upon disengagement of the current collector and trolley contactor.

1,902,264. GLUING MACHINE. FRANK J. RECTOR, Pendleton, Ind., assignor to International Printing Company, Indianapolis, Ind., a Corporation. Filed Nov. 3, 1930. Serial No. 493,187. 5 Claims. (Cl. 91—50.)

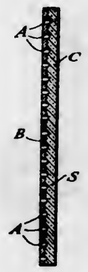
1. A gluing machine including an adhesive applying roll arranged to support an end and edgewise presented sheet of material while passing thereover and adhesive is applied to the underface thereof, a pair of spaced sheet engaging and sheet conveying pressing rolls positioned thereover and each normally and individually constrained toward the applying roll, means limiting the constrained

movement short of roll to roll contact, and a frame structure supporting said rolls comprising a pair of vertically spaced supports providing a gap between the



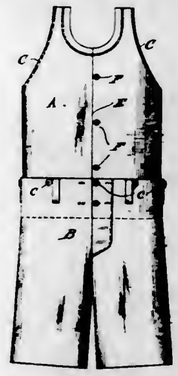
pressing rolls and the adhesive applying rolls and supporting the outer ends thereof and means supporting the opposite ends of said rolls and said supports.

1,902,265. ELECTRICAL PROSPECTING SYSTEM. FRANK RIEBER, Berkeley, Calif., assignor to Frank Rieber, Inc., San Francisco, Calif., a Corporation of California. Filed Feb. 3, 1930. Serial No. 425,631. 8 Claims. (Cl. 175—182.)



1. The method of determining the distribution of earth conductivity which comprises the steps of passing a current between points on the earth's surface, and measuring the vertical component of said current within the earth.

1,902,266. OPERATING MECHANISM FOR WINDOWS. FRANK X. RIPP, Madison, Wis. Filed Mar. 31, 1932. Serial No. 602,337. 11 Claims. (Cl. 74—14.)

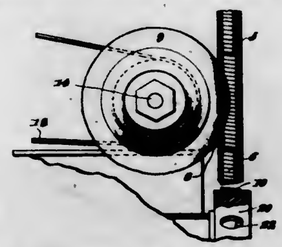


1. An operating mechanism for a swinging member including a bed plate, a bearing member pivotally mounted at one end on the bed plate, a sleeve having an internally threaded collar at one end, said sleeve inserted in the bearing member and having the collar abutting the bearing member, a separate collar on the opposite end of the sleeve and abutting the bearing member, means for securing the separate collar to the sleeve, means engageable with said preceding means for rotating the sleeve, a screw shaft receivable in the sleeve and engaged with the threaded collar and means on the screw shaft engageable with the threaded collar to limit movement of the screw shaft.

1,902,267. STORAGE BATTERY SEPARATOR. JOHN L. RUPP, Wilkinsburg, Pa., assignor, by mesne assignments, to Wubco Battery Corporation, Niagara Falls, N. Y., a Corporation of New York. Filed Apr. 24, 1928. Serial No. 272,502. 3 Claims. (Cl. 136—145.)

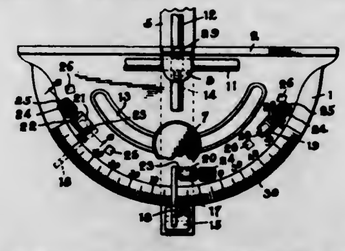
1. A storage battery separator comprising a sheet of porous material having one side only thereof coated with sizing material forming a layer, said layer being perforated, and said perforations extending for a distance into but not completely through said porous material.

1,902,268. WEARING APPAREL. ABE SCHEAER, Matewan, W. Va. Filed Mar. 22, 1930. Serial No. 438,196. 3 Claims. (Cl. 2—70.)



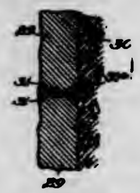
1. In a two-part garment comprising waist and trunk portions; a bifurcated belt-band attached to one of said portions in position to receive the other portion as an insert, the belt-band formed with fastenings on one flap positioned to pass through button holes in the insert and also through button holes in the other flap of the belt-band to fasten the parts together, the insert of the garment being formed with a reinforcement hem along its lower edge, and said hem formed with button-holes arranged in vertical and circumferentially spaced relation to provide for vertical adjustment of one portion of the garment relatively to the other portion, said belt band being also provided with circumferentially spaced button holes for selectively receiving a button to provide for circumferential adjustment of the garment.

1,902,269. APPARATUS FOR MAKING LOCK WASHERS. ALBERT STOLL, Detroit, Mich., assignor to National Machine Products Company, Detroit, Mich., a Corporation of Michigan. Filed May 23, 1930. Serial No. 454,977. 3 Claims. (Cl. 10—73.)



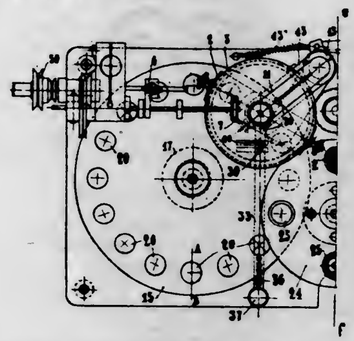
1. In an apparatus for making split lock washers, a magazine of tubular formation adapted for the reception

of a tubular body of helically wound stock, said magazine being provided with a longitudinally extending opening in one side thereof, a combined abrading and cutting wheel extending through the opening at right angles to the axis of the magazine for cutting said tubular body length-



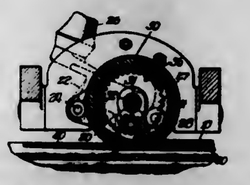
wise and for sharpening the ends of the washers thus formed, and feeding means for the helically wound stock, said magazine having an outlet portion extended beyond said abrading and cutting wheel to hold the previously formed washers in axial alignment.

1,902,270. MITER GAUGE. JAMES TATE, Milwaukee, Wis., assignor to Delta Manufacturing Company, Milwaukee, Wis. Filed June 2, 1932. Serial No. 615,049. 25 Claims. (Cl. 33—99.)



21. A geometrical instrument comprising a base, a bar pivoted to said base, a member adjustably supported by said bar adjacent an edge portion of the base, a gaging stop on said base adjacent its said edge portion and comprising an adjustable abutment, said abutment being within the path of said adjustably supported member on the bar when said member is adjusted into one position with respect to the bar and being clear of said path when said adjustably supported member is moved into another position with respect to the bar.

1,902,271. WALL STRUCTURE. HARRY S. WARNER, Joliet, Ill. Original application filed Apr. 21, 1930, Serial No. 446,010. Divided and this application filed Oct. 29, 1930. Serial No. 492,027. 2 Claims. (Cl. 72—50.)



1. A wall-structure comprising a framework, a wall portion of concrete at the outer surface of said framework, pins secured to, and extending forwardly from, said framework, and reenforcement for said wall portion secured to said pins and embedded in said concrete, all of the reenforcement being spaced from said framework.

1,902,272. WAFER DOSING, FILLING, AND SEALING MACHINE. GUSTAVE WILLMANN, Paris, France. Filed June 2, 1930, Serial No. 458,987, and in France June 5, 1929. 6 Claims. (Cl. 226—42.)

1. A machine for dosing, filling and sealing wafers, comprising a powder hopper having a closure at the lower end thereof, a balance for measuring predetermined quantities of the powder fed by the hopper to a wafer-half, electro-magnetic means for operating the said closure when the balance reaches a position of equilibrium, a pair of discs, one of said discs having bosses to carry the upper wafer-halves, and the other of said discs having recesses to carry the lower wafer-halves, means for rotating said discs in opposite directions, a moistener, an additional disc above said first mentionel discs having a plurality of sockets therein, means for imparting said additional disc, sequentially, with an axial movement and a quarter turn in the direction in which the disc carrying the upper wafer-halves rotates, whereby said pair of discs and additional disc cooperate to bring an upper wafer-half on its corresponding boss on one of the pair of discs, to bring the upper wafer-half previously taken in contact with the aforementioned moistener and to bring the upper wafer-half moistened in the preceding operation on to a lower half previously dosed with the powder, an ejector disc, and means for operating said ejector disc to free the completed wafer from the preceding operation with a single axial movement.

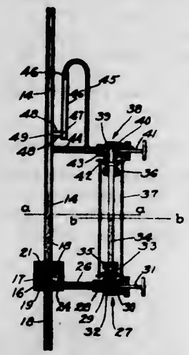
1,902,273. DUPLICATING APPARATUS. ALBERT J. BATES, Chicago, Ill., assignor to Ditto Incorporated, Chicago, Ill., a Corporation of West Virginia. Filed Oct. 8, 1930. Serial No. 487,177. 10 Claims. (Cl. 101—133.)

1. In a duplicating machine, a roller mounted for linear movement, a drum mounted therewith for controlling the rotation of said roller, said drum being of larger diameter than the roller, and means to cause said drum to rotate in response to linear movement of said roller.

1,902,274. ELECTRIC IMITATION FIRE. HERBERT HENRY BERRY, London, England. Filed Mar. 2, 1932, Serial No. 596,387, and in Great Britain Apr. 23, 1931. 10 Claims. (Cl. 272—8.)

1. In an electric artificial fire, a piece of translucent fuel simulating material at the front of the fire, a second piece of fuel simulating material arranged in rear of and

spaced from the said translucent material, an electric lamp for illuminating the rear of the translucent material and the front of the second piece of material, whereby the

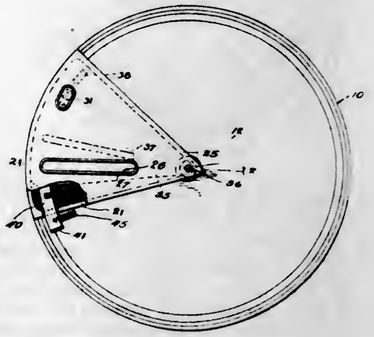


said pieces of material appear to glow and give to the space between them the appearance of a hollow with glowing sides.

1,902,275. GAS SAVER. CHARLES A. BORGESON, San Francisco, Calif. Filed Aug. 31, 1931. Serial No. 560,473. 4 Claims. (Cl. 48—180.)

1. An article of manufacture comprising a base having an opening therein, a bar extending diametrically across the opening, a support carried by the bar and being axially aligned with the short axis of the opening, pins extending radially from the support and being disposed equal distances around the support and equal distances along the support so as to form a spiral, and cup-shaped deflectors carried by the pins and facing toward the opening.

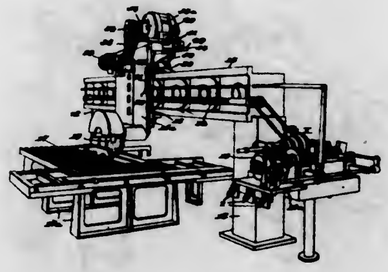
1,902,276. GAUGE FOR LOW TEMPERATURE FLUIDS. CHARLES S. BULL, Colton, Calif. Filed Jan. 20, 1930. Serial No. 421,889. 5 Claims. (Cl. 73—54.)



1. In combination with refrigeration apparatus, having a low temperature liquid coil therein, a tube connected across the terminals of said coil, and standing vertically, whereby the level of the liquid within the tube will agree with the level of the liquid within the coil, a trap forming a chamber around the tube and through which the tube extends, said tube being formed with openings through the walls thereof within the trap, and against the top thereof, whereby the low temperature liquid within the column may flow into the trap, a relatively non-freezing liquid of greater weight per volume than the low temperature liquid and disposed in the bottom of the trap, and upon which the low temperature liquid rests, and a sight gauge connected with the bottom of the said trap and into which said non-freezing liquid may flow under pressure of the hydrostatic head of the low temperature liquid in the tube, and whereby a definite relationship may be obtained between the level of the non-freezing compound in the sight gauge and the liquid in the tube.

1,902,277. PRINTING OF FILMS. CURTIS D. CHASE, Boston, Mass., assignor to Chase Rights Corporation, Philadelphia, Pa., a Corporation of Pennsylvania. Filed July 9, 1930. Serial No. 466,817. 8 Claims. (Cl. 95—77.)

1. A printing frame comprising a base section, a panel operatively related thereto, and a centering pin extending from the base section for centering disc films relative to each other, the panel being provided with a hole thru which the centering pin extends when the section and panel are disposed in printing relation.



1,902,278. FILM HOLDER. CURTIS D. CHASE, Boston, Mass., assignor to Chase Rights Corporation, Philadelphia, Pa., a Corporation of Pennsylvania. Filed July 9, 1930. Serial No. 466,818. 15 Claims. (Cl. 88—18.8.)

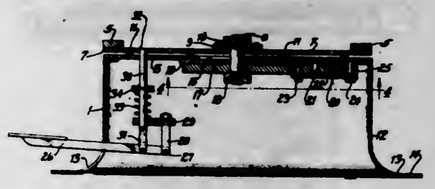
1. A film holder comprising complemental sections, one of which has a hub and the other has a depression into which the hub is seated, whereby the sections are centered with respect to each other, one of the sections having a seat near its periphery cooperating with a peripheral portion of the other section, whereby to provide a light-proof compartment between said sections, one of the sections being provided with an opening, a cover plate disposed over said section and having an opening in registering relation with the first-named opening, and means to interrupt and complete registry between said openings.

1,902,279. STONE CUTTING MACHINE. HAROLD EVANS, Niagara Falls, Ontario, Canada, assignor to Pollard Machinery Company, Inc., Niagara Falls, N. Y., a Corporation of New York. Filed July 29, 1932. Serial No. 626,105. 3 Claims. (Cl. 51—100.)

1. In a stone cutting machine, the combination with a travelling cutting wheel mounted for vertical movements, of a profiling mechanism whereby said cutting wheel may be automatically caused to follow any predetermined path of movement in cutting profile figures, said profiling mechanism comprising a template and a guide roller movable over said template and operatively connected with said cutting wheel to control its vertical movements, and manually operable adjusting means whereby the center distance from the guide roller to the center of the cutting wheel may be progressively increased after each forward

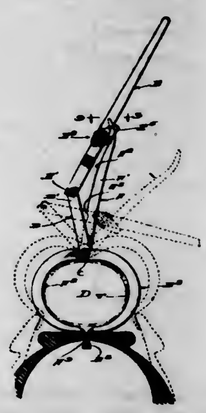
and reverse pass of the cutting wheel, the cutting wheel thus always moving in conformity to the template as it is progressively lowered until the desired depth or profile is produced.

1,902,280. PROCESS OF MAKING MIXED CELLULOSE ESTERS AND CELLULOSE ETHER ESTERS. MAX HAGEDORN, OTTO REICHERT, and EUGEN GÜHRING, Dessau in Anhalt, Germany, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Filed Apr. 25, 1927, Serial No. 186,566, and in Germany May 1, 1926. 4 Claims. (Cl. 260—101.)



1. The process which comprises treating cellulose acetate which still contains esterifiable hydroxyl groups with stearic acid anhydride.

1,902,281. FEEDING MECHANISM FOR PHOTOGRAPHIC STRIPS. WATERS LEE HELMS, Brooklyn, N. Y., assignor to The New Photomaton, Inc., New York, N. Y., a Corporation of New York. Filed July 25, 1932. Serial No. 624,638. 8 Claims. (Cl. 95—94.)

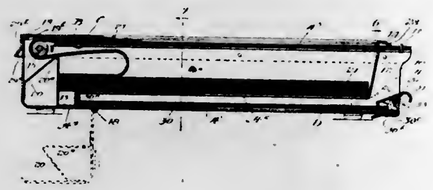


1. In feeding mechanism for photographic strips, means for conveying a strip in reverse directions within a tank, comprising opposed plates, a plurality of sets of feed rollers supported intermediate said plates, driving means for the rollers, parallel channels in each plate for guiding a margin of the strip, and a reversing block intermediate the plates and having a curved guiding face for receiving the strip fed to the base of one channel and for conveying it to the base of the second channel, said block contacting with the strip intermediate its marginal edges.

1,902,282. REVERSIBLE SEAT OR CHAIR. CHARLES R. HULTGREN, Chicago, Ill., assignor to S. Karpen & Bros., Chicago, Ill., a Corporation of West Virginia. Filed May 13, 1929. Serial No. 362,526. 12 Claims. (Cl. 155—96.)

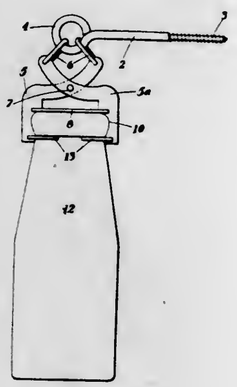
1. A chair of the character described comprising a base, a seat structure mounted to turn on the base, and seat-shifting connecting means between said base and seat structure serving to laterally shift the seat upon forcible turning of the same upon the base, said shifting means including a pair of intermeshing gear wheels mounted to shift laterally with said seat structure, and a throw arm pivotally secured to the base and having eccentric connection with one of said gear wheels.

1,902,283. TIRE TOOL. JOSEPH C. JACKSON and ANDREW J. INGERSOLL, Wildwood, N. J. Filed Nov. 13, 1931. Serial No. 574,708. 8 Claims. (Cl. 152—27.)



1. A tool for spreading the adjacent bead portions of a pneumatic tire casing, comprising a pair of levers pivotally connected intermediate their ends, each of said levers including an operating portion and a tire engaging portion, said portions lying on opposite sides of said pivotal connection, the tire engaging portion of each lever including a tube supporting and embracing portion conforming generally to the exterior surface of the tube and terminating in an outwardly directed spreading jaw.

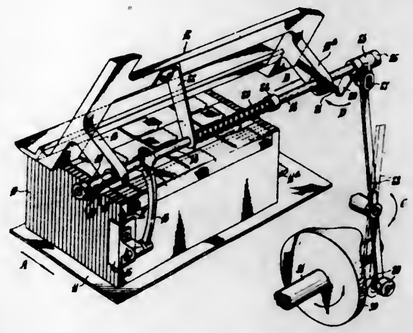
1,902,284. AUTOGRAPHIC REGISTER. LOUIS JENSEN, Chicago, Ill., assignor to United Autographic Register Co., a Corporation of Illinois. Filed Feb. 6, 1932. Serial No. 591,421. 9 Claims. (Cl. 282—12.)



1. An autographic register comprising an elongated casing provided with a platen and immediately below

said platen with a supply-compartment adapted to hold a zig-zag folded packet of continuous stationary; and a longitudinally withdrawable record-slip holder normally

housed and removably secured beneath said compartment between the lower portions of the side walls of said casing.

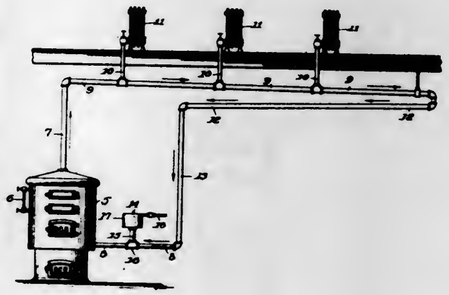


1,902,285. HOLDER FOR CONTAINERS. ARCHER ALFRED JEWELL, Peckham, London, England. Filed Jan. 16, 1932, Serial No. 587,138, and in Great Britain Feb. 2, 1931. 5 Claims. (Cl. 248—65.)

5. A holder for containers, comprising a pair of levers pivoted together with their inner edges shaped to engage a flange on a container, laterally and inwardly extended grips at the lower ends of the levers, the inner edges shaped to engage the container, a closure carried by one of the levers to cover the mouth of the container when the grips are engaged with said container, and means for supporting the levers.

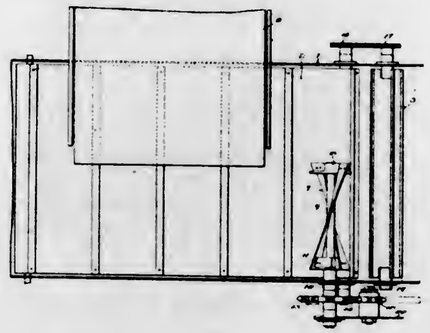
1,902,286. METHOD OF AND MECHANISM FOR EXTRACTING INTERCONNECTING THREADS BETWEEN STITCHED BOOKS. OSCAR KLEINSCHMIT, Leipzig-Plagwitz, Germany, assignor to Gebruder Brehmer, Leipzig-Plagwitz, Germany, a Limited Partnership of Germany. Filed Apr. 21, 1932, Serial No. 606,747, and in Germany June 4, 1931. 16 Claims. (Cl. 112—252.)

1. Means for extracting mechanically the severed interconnected threads between adjacent books of a continuously stitched book-pad, comprising a book-engaging device adapted to engage the foremost book of the book-



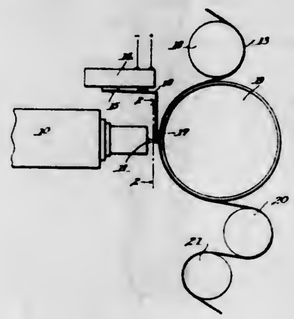
pad, and means for displacing said device and the book engaged thereby laterally with relation to the remainder of the book-pad.

1,902,287. ANTIFREEZE COMPOSITION FOR RADIATORS AND THE LIKE. JOSEPH B. MCCAULEY, Charles Town, W. Va. Filed Sept. 3, 1931. Serial No. 561,093. 4 Claims. (Cl. 252—5.)



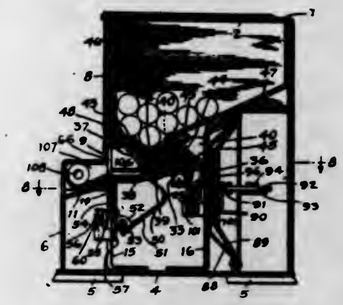
1. An anti-freeze composition for automobile radiators and the like comprising a mixture of sugar, 12 ozs., salt, 24 ozs., copperas, ¼ oz., hydrochloric acid, ½ oz., and heavy oil, 4 ozs.

1,902,288. STEAM HEATING SYSTEM. HARRY B. MCGINNIS, Chicago, Ill. Filed Mar. 17, 1930. Serial No. 436,511. 5 Claims. (Cl. 237—1.)



1. In a steam heating system having a steam boiler and one or more radiators, the combination of a conduit leading from the boiler to the radiators for supplying steam thereto, a second conduit connected to said conduit and to the steam boiler at a point substantially below the normal water level within said boiler for returning condensed steam from the radiators and from said first-named conduit to the boiler, a chamber mounted in a plane above the point of connection between said second-named conduit and the boiler and in a plane substantially below the normal level of the water within the boiler during operation of the system, downwardly extending conduit means having its upper end connected to the lower end of said chamber and its lower end connected to said second-named conduit a baffle in said downwardly extending conduit, and a drain conduit communicating with the upper end of said chamber.

1,902,289. GRAIN DISTRIBUTING MEANS FOR COMBINES. EARL W. MENTOR and CHARLES J. SCRANTON, Jr., Peoria, Ill., assignor to Avery Power Machinery Co., Peoria, Ill., a Corporation of Illinois. Filed Mar. 11, 1929. Serial No. 345,916. 3 Claims. (Cl. 130—1.)

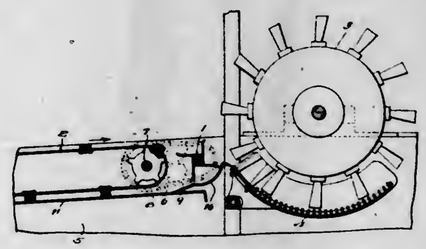


1. In combination in a combined harvesting and threshing machine, a cylinder and concave, means comprising a feed conveyor for delivering the cut grain to the cylinder and concave, means for delivering the cut grain in a loose and unbound condition to the feed conveyor at one side thereof, and a beater mounted to rotate on an axis and extending above and transversely of the conveyor at said side thereof, said beater comprising blades disposed lengthwise and at opposite sides of the axis thereof, said blades extending across said axis and being oppositely related for shifting the cut grain from the side of the conveyor at which the grain is delivered toward the other side of the conveyor, the respective blades having less than a complete turn about the axis of the beater, and the outer edges of the blades being smooth and continuous.

1,902,290. SOUND RECORDING DEVICE. MILTON HARRISON PAGE, Cohoes, N. Y. Filed Nov. 19, 1929. Serial No. 408,393. 4 Claims. (Cl. 274—5.)

1. The method of recording sound waves on the track portion of a sensitized film, which consists in projecting a beam of light onto the film and modulating the amplitude of an intermediate portion of the light longitudinally of the sound track before it strikes the film in accordance with the variations in the sound waves so as to produce adjacent the sides of the sound track dark lines of uniform width that extend lengthwise of the film, and transverse undulations extending inwardly from said lines, each of said lines acting as a base for preventing the transverse undulations from extending beyond the edges thereof.

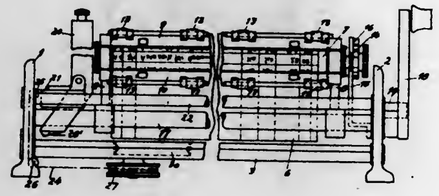
1,902,291. APPARATUS FOR DELIVERING LIGHTED CIGARETTES AND CIGARS. CLARK W. PARKER, New York, N. Y., assignor, by mesne assignments, to Max Bernstein, New York, N. Y. Filed June 30, 1927. Serial No. 202,497. 14 Claims. (Cl. 312—86.)



1. An apparatus for delivering lighted cigarettes having, in combinaion, a cigarette holder, a lighting device and a suction device at opposite ends of the holder, and means for shifting said holder longitudinally between the two devices.

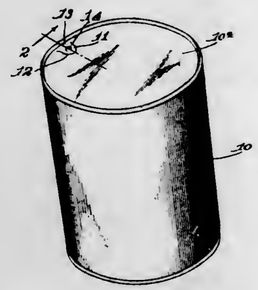
7. An apparatus for delivering lighted cigarettes including a horizontally supported tray for carrying a cigarette to be lighted, means for shifting said tray in the plane of its support and resilient clamping means for holding the cigarette in the tray.

8. An apparatus for delivering lighted cigarettes including a base-plate having all the kinetic elements of the apparatus mounted thereon, including an ejector, a removable covering frame for said elements, and means for securing said cover to the base-plate, said cover having a hopper or magazine for holding the cigarettes, and the hopper having an opening in its bottom covered by said ejector.



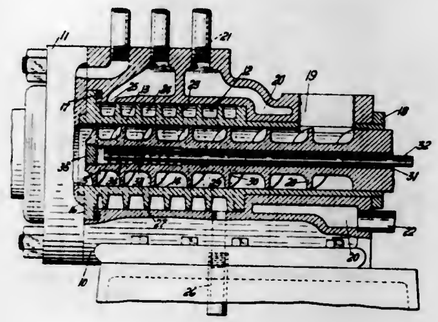
1,902,292. ACCELERATING FEED ROLL. JAMES N. REYNOLDS and CHARLES J. SCRANTON, Jr., Peoria, Ill., assignors to Avery Power Machinery Co., Peoria, Ill., a Corporation of Illinois. Filed Mar. 5, 1929. Serial No. 344,371. 2 Claims. (Cl. 130—1.)

1. In combination in a combined harvesting and threshing machine, a cylinder and concave, a feed house having a closed bottom, a feed conveyor for the cut grain and operating in said house, the lower run of the conveyor operating in proximity to the bottom wall of the feed



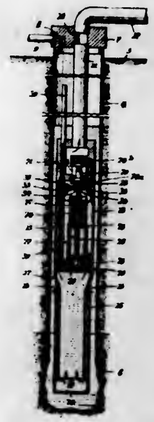
house, and a feed roll disposed to receive the cut grain from the discharge end of the conveyor and deliver it to the cylinder and concave, said roll comprising wing members projecting approximately radially therefrom, said wing members being continuous and unbroken at their outer edges, the roll being driven at higher speed than the conveyor and the wing members acting to prevent entry of the cut grain between the lower run of the conveyor and the bottom of the feed house.

1,902,293. MANIFOLDING MACHINE. WILHELM RITZERFELD, Berlin, Germany. Filed Jan. 8, 1931, Serial No. 507,540, and in Germany Sept. 20, 1928. 16 Claims. (Cl. 101—13.)



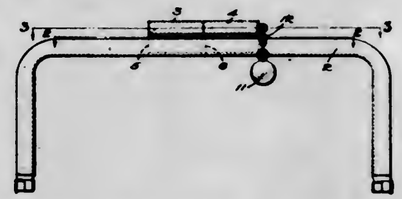
1. A machine of the class described comprising a base plate, levers pivotally connected with the base plate and having a paper feed roller journalled thereon, guide plates yieldably connected with the roller for holding a copy sheet thereon, and means for detachably securing a card upon the base plate for receiving an impression from the copy sheet, means movable transversely of the base plate for moistening the card, and means for swinging the levers to move the roller and copy sheet into engagement with the card.

1,902,294. CONTAINER. WALTER I. RUBOVITS, Chicago, Ill. Filed May 23, 1931. Serial No. 539,571. 2 Claims. (Cl. 220—27.)



1. A container comprising a metallic wall, prepared to provide an ear portion integral with said wall and having a base portion adjacent a margin of said wall with the metal in normal condition, the metal about the remaining margins of said portion weakened to permit of ready tearing, and a portion of said ear portion spaced from its margins also weakened about a part of the periphery thereof to permit of ready severance by a perforating instrument.

1,902,295. EXTRUDING MACHINE. FLORAIN J. SHOOK, Akron, Ohio, assignor to National Rubber Machinery Company, Akron, Ohio, a Corporation of Ohio. Filed Mar. 2, 1931. Serial No. 519,510. 2 Claims. (Cl. 18—12.)

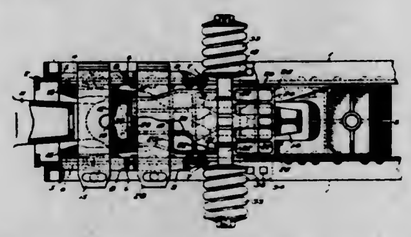


1. In an extruding machine, the combination of a housing formed with a bore, a bushing seated in said bore and comprising a work chamber, and a feed screw in said work chamber, said bushing being exteriorly formed with a helical rib that defines a helical passage for fluid around the work chamber.

1,902,296. PRODUCING OIL FROM WELLS AND APPARATUS THEREFOR. SAMUEL WILLIAM TRAYLOR, Jr., Allentown, Pa., assignor to Traylor Engineering & Manufacturing Company, Allentown, Pa., a Corporation of Delaware. Filed Apr. 25, 1932. Serial No. 607,254. 19 Claims. (Cl. 103—234.)

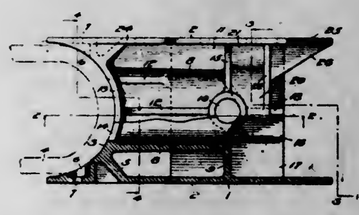
1. A process or method of taking liquid from a well while preventing the loss of gas, which method comprises opening and closing passage through a delivery conduit for the liquid according to variations of hydrostatic pressure of the liquid in the well, regardless of gas pressure, and thereby always maintaining in the well outside of said conduit, a liquid level above the highest point of entry of liquid into said conduit.

1,902,297. BAG FRAME STRUCTURE AND FASTENER THEREFOR. WILLIAM J. WALKER, Waterbury, Conn., assignor to United-Carr Fastener Corporation, Cambridge, Mass., a Corporation of Massachusetts. Filed Sept. 18, 1931. Serial No. 563,473. 1 Claim. (Cl. 292—171.)



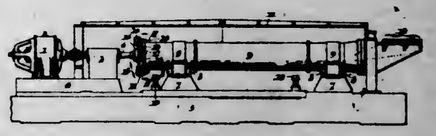
A bag frame structure including a pair of frame members hinged to each other at their ends and normally slightly bowed away from each other lengthwise, separable fastener members attached to said frame members for holding them together under compression when the fastener members are interlocked and hand operable means for unlocking the fastener members, said bowed frame members operating automatically to move the separable fastener members apart after the fastener members are unlocked.

1,902,298. ROOFING AND BUILDING MATERIAL. HENRY C. AVERY, New Brunswick, and LESTER KIRSCHBRAUN, Leonia, N. J., assignors, by mesne assignments, to The Patent and Licensing Corporation, Boston, Mass., a Corporation of Massachusetts. Continuation of application Serial No. 14,122, filed Mar. 9, 1925. This application filed Mar. 2, 1931. Serial No. 519,656. 5 Claims. (Cl. 154—51.)



1. A constructional unit comprising a rigid base consisting of a layer of coarse interfelted fibers with a plurality of relatively large interstitial voids, said base having a weather-resistant coating on one face thereof and a sheet of asphalt impregnated, asphalt coated and mineral surfaced roofing material secured to the opposite face thereof by means of a film of a weatherproof adhesive.

1,902,299. DRAFT RIGGING. DONALD S. BARROWS, Rochester, N. Y., assignor to The Symington Company, New York, N. Y., a Corporation of Maryland. Filed Sept. 13, 1928. Serial No. 305,817. 5 Claims. (Cl. 213—38.)

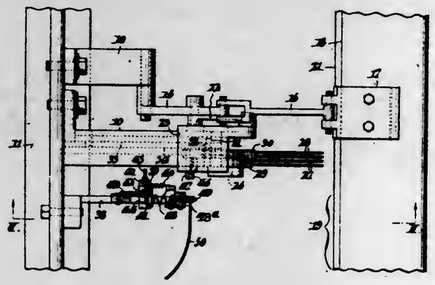


1. In railway draft rigging, in combination, a coupler, with a rearwardly extending stem, a vertical yoke with side walls connecting the forward portions thereof and normally lying on either side of said stem, means connecting said coupler and yoke for simultaneous rearward movement, cushioning mechanism embraced by said yoke and with a forward portion normally received between the side walls of said yoke and engaging the rear end of said stem, and means passing through said mechanism for connecting it to associated draft sills.

1,902,300. DRAFT RIGGING BACKSTOP. DONALD S. BARROWS, Rochester, N. Y., assignor to The Symington Company, New York, N. Y., a Corporation of Maryland. Filed Oct. 22, 1928. Serial No. 314,186. 5 Claims. (Cl. 213—57.)

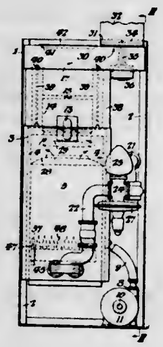
1. A backstop casting comprising side walls adapted for connection with associated center sills, a front wall concavely curved horizontally on its front face and adapted to receive buffing forces from the correspondingly curved end of an associated yoke, forwardly and inwardly converging webs connecting intermediate portions of said side walls and front wall, said wall portions forwardly of said webs being apertured for receiving connecting rivets.

1,902,301. CHUCK FOR CENTRIFUGAL CASTING MACHINES. LOUIS A. CAMBIOTA, Burlington, N. J., assignor to Walter Wood, Philadelphia, Pa. Filed Nov. 23, 1931. Serial No. 576,725. 2 Claims. (Cl. 22—65.)



1. In a centrifugal casting machine, including a prime mover having a driving shaft, and bearings for rotatably supporting a cylindrical flask in axial alignment with said driving shaft; a chuck for connecting the driving shaft to an end of the flask, said chuck comprising an arm projecting radially from said driving shaft, and a jaw on said arm in the form of a hook having its end projecting toward said driving shaft, said jaw being adapted to extend around the end of the flask and to engage a projection thereon to transmit rotary movement to the flask.

1,902,302. STOP MOTION FOR LOOMS. JOSEPH P. COSTELLO, Philadelphia, Pa., assignor to Collins & Aikman Corporation, Philadelphia, Pa., a Corporation of Delaware. Filed Jan. 28, 1931. Serial No. 510,674. 20 Claims. (Cl. 139—372.)

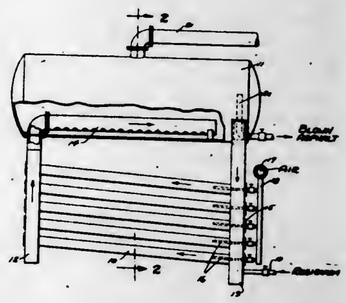


1. In a loom having a breast beam and lay, a weft stop motion including a counter-weighted detector finger supported between said beam and lay for reciprocation by the latter, said finger being pivoted above the plane of

the fabric woven and adapted to engage the weft from beneath and so be held down thereby without itself tending to shift the weft in the shed; and means subject

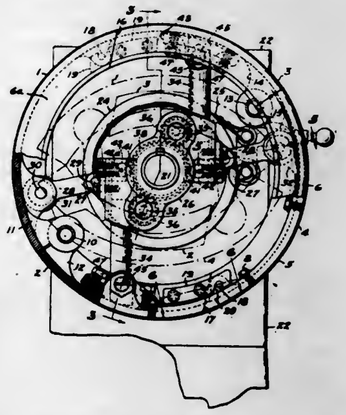
to actuation by the detector finger upon release thereof in the absence or failure of the weft, to automatically stop the loom.

1,902,303. ELECTRICAL CONTROLLING SYSTEM FOR GAS WATER HEATERS. ROBERT J. DOUGHERTY, Ambler, Pa., assignor to John Wood Manufacturing Company, Conshohocken, Pa., a Corporation of Pennsylvania. Filed Nov. 14, 1931. Serial No. 575,042. 3 Claims. (Cl. 236—21.)



1. In an electrical controlling system for a gas water heater, the combination with a main gas burner; an electrically operative and controlled main gas burner valve; an electrically operative and controlled pump for circulating water through said heater; an electric circuit including the pump motor and main gas valve motor, in multiple relation; a thermostatically operative electric switch controlling the branch circuit through said main gas valve motor independently of said other motor, for opening and closing that branch circuit in accordance with the temperature of the water heated; a thermostatically operative electric room switch for opening and closing said multiple circuit in accordance with atmospheric temperature; and means for supplying the entire circuit with current at the same voltage; whereby said multiple circuit is closed and said valve motor and pump motor energized when said room switch is closed, and deenergized when that switch is opened; and said branch circuit through said valve motor is broken, independently of the branch circuit through said pump motor, and the gas valve closed, if and when the temperature of the water heated exceeds a predetermined degree.

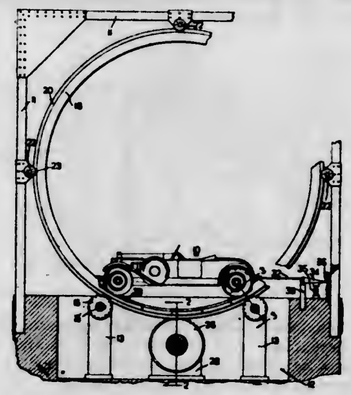
1,902,304. FLEXIBLE TRANSPARENT GELATINOUS PRODUCT. HERMANN HECKEL, Cincinnati, Ohio, assignor to The Twitchell Process Company, St. Bernard, Ohio, a Corporation of Ohio. Filed May 5, 1931. Serial No. 535,303. 6 Claims. (Cl. 106—39.)



1. A transparent and flexible gelatinous product, the constituting components of which comprise gelatin, white oil, and mahogany sulphonates.

1,902,305. METHOD OF PRODUCING ASPHALT. LESTER KIRSCHBRAUN, Leonia, N. J., assignor, by mesne assignments, to The Flintkote Corporation, Boston, Mass., a Corporation of Massachusetts. Filed May 14, 1930. Serial No. 452,249. 5 Claims. (Cl. 196—74.)

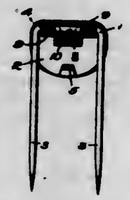
1. A process of producing oxidized asphalt in a continuous system which comprises establishing thermal-circulation of petroleum residuum from a relatively large bulk supply in parallel flow through a plurality of passageways, injecting air into said passageways for oxidising the residuum and accelerating thermal-circulation of the material through said passageways, continuously supplying fresh residuum to the system and withdrawing oxidized asphalt from said bulk supply.



1,902,306. TIRE BUILDING DRUM. HERMAN T. KRAFT, Akron, Ohio, assignor to The Bridgewater Machine Company, Akron, Ohio, a Corporation of Ohio. Filed May 4, 1932. Serial No. 609,058. 16 Claims. (Cl. 154—9.)

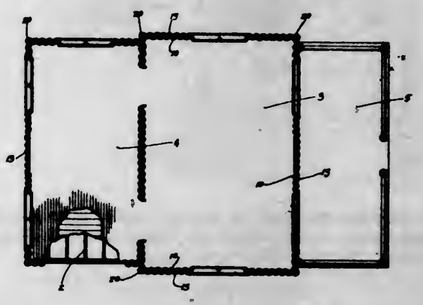
12. In a tire-building drum, a pair of diametrically opposed arcuate drum sections, each being bodily movable relative to the other, a pair of pivoted arcuate drum sections, each extending between the first drum sections and being pivoted to one of said first sections,

and means operable during rotation of said drum to bodily move said first drum sections toward each other and to swing said pivoted sections into close gradually increasing overlapping relation with said first sections.



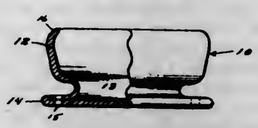
1,902,307. TESTING DEVICE. FRED V. LARKIN, Bethlehem, Pa. Filed July 16, 1928. Serial No. 292,958. 9 Claims. (Cl. 73—51.)

8. In a device for testing motor vehicles the combination of a circular track having an interior diameter large enough to simultaneously receive a front and a rear wheel of an automobile of normal size, means to support said circular track for rotation, and means to measure the power transmitted between said track and vehicle.



9. In a device for testing motor vehicles, the combination of two circular tracks of a diameter larger than an automobile of normal size, means for supporting said tracks for rotation about a common axis, said tracks being spaced apart so that the wheels on one side of a vehicle may rest on the interior of one of said tracks and the wheels on the other side of the same vehicle may simultaneously rest on the interior of the other of said tracks, and two separate power measuring devices mounted in a stationary position adjacent said tracks and separately connected to said tracks to thereby independently measure the power transmitted between the wheels of the vehicle and the respective tracks.

1,902,308. PIN FASTENER. GEORGE S. MAYNARD, Newtonville, Mass., assignor to United-Carr Fastener Corporation, Cambridge, Mass., a Corporation of Massachusetts. Filed June 25, 1931. Serial No. 546,732. 3 Claims. (Cl. 24—152.)

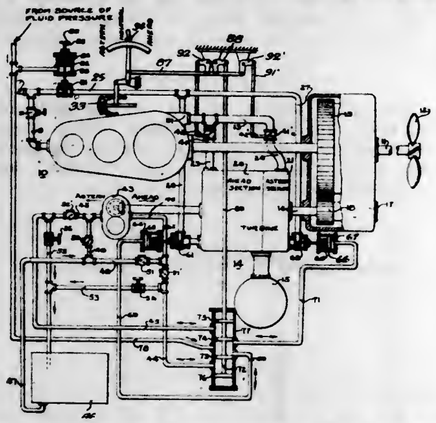


1. A pin fastener comprising, in combination, an attaching part having pin means for securing the fastener to a structure to be fastened thereby, a plate part hinged to said attaching part at its upper end and concealing the entire upper end portion of the attaching part and said plate part having a stabbing prong extending therefrom toward said attaching part and concealed locking means provided partly by the plate part and partly by the attaching part adjacent to the connection between the plate part and the attaching part to hold the plate part in locked position when the fastener is attached to a structure and the stabbing prong is engaged therewith.

1,902,309. LOG HOUSE. HARRY A. MUFFLEY, Minneapolis, Minn., and EDWARD F. MCLEER, Gordon, Wis., assignors to Log Cottage Company, Minneapolis, Minn., a Corporation of Minnesota. Filed Jan. 31, 1930. Serial No. 424,942. 11 Claims. (Cl. 20—2.)

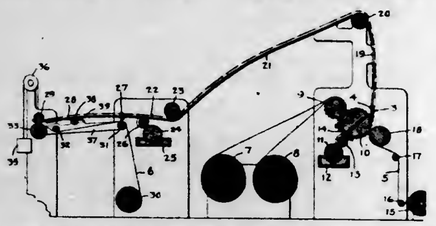
1. A wall structure comprising two series of half log sections inner and outer, the members of one series having their flat faces in contact with the members of the others, and being arranged in break-joint relation with the curved surfaces of the members of respective series facing in opposite directions, each log having its longitudinal edges flattened to provide surfaces which are substantially perpendicular to the flat face, said surfaces being engaged.

1,902,310. METHOD OF MAKING INSULATOR CAPS. BENTLEY A. PLIMPTON, Baltimore, Md., assignor to Locke Insulator Corporation, Baltimore, Md., a Corporation of Maryland. Filed Aug. 6, 1930. Serial No. 473,491. 3 Claims. (Cl. 29—155.5.)



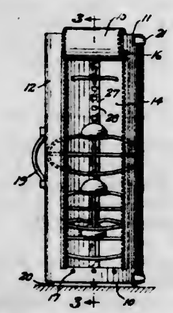
3. The method of making a malleable one piece insulator comprising taking a piece of material, subjecting the same to the action of dies to press it into a fruste-conical cup shape, spinning the cup to form the same with an inwardly extending neck portion intermediate the open and closed ends, and subsequently compressing the cup to fold upon itself the material between the constricted portion and the closed end while leaving the constricted portion unaffected.

1,902,311. GOVERNING MECHANISM. ANDREW B. REAVIS, Swarthmore, and RUDOLPH J. EISINGER, Moorea, Pa., assignors to Westinghouse Electric and Manufacturing Company, a Corporation of Pennsylvania. Filed May 24, 1929. Serial No. 365,635. 17 Claims. (Cl. 60—21.)



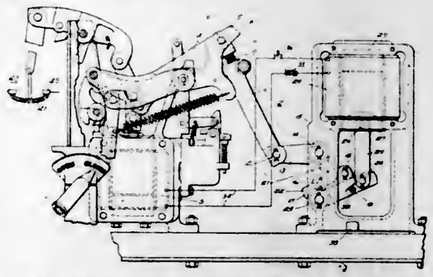
1. The combination with a prime mover capable of operation in its opposite directions, of a control mechanism therefor comprising a control device adapted to be set for operation in either direction, and means operative, when the prime mover is operating in the direction for

which the control device is set, to provide motive fluid admission in response to speed of the prime mover for operation in said direction and, when it is operating in



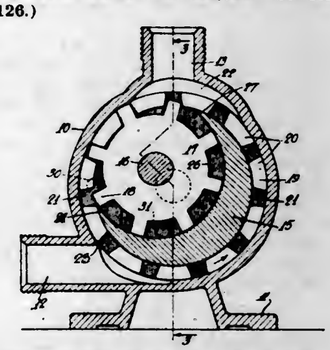
the opposite direction, to provide motive fluid admission independently of the speed for operation in the direction for which the control device is set.

1,902,312. DUPLEX ROLL OF CORRUGATED PAPER AND METHOD AND MEANS FOR MAKING THE SAME. BERNARD ROUS, Brooklyn, N. Y. Filed July 5, 1929. Serial No. 376,091. 7 Claims. (Cl. 154—33.)



2. Means for manufacturing a duplex roll of corrugated paper comprising in combination, means for corrugating and intimately associating two sheets of paper, means for securing facing sheets to the respective corrugated sheets, and means for winding the two corrugated and faced sheets into a duplex nested roll, the means for associating the facing sheet which is outermost in the convolutions of the duplex roll operating in conjunction with the winding means.

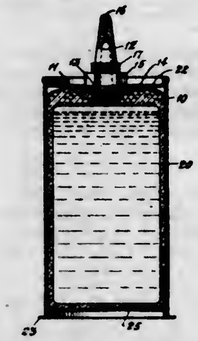
1,902,313. HAT BOX. MABEL STRUBLE, New York, N. Y. Filed Apr. 6, 1931. Serial No. 527,964. 16 Claims. (Cl. 206—8.)



1. A hat box comprising parallel oval end pieces, a side member curved to oval form connecting the end pieces, said side member having a door opening therein, a door adapted to close said opening, a handle on said side member, a circular hat retaining member, and means for holding said hat retaining member in the box in inclined position.

1,902,314. CIRCUIT BREAKER. ROSWELL C. VAN SICKLE, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Dec. 9, 1927. Serial No. 238,801. 14 Claims. (Cl. 200—101.)

1. The combination with an operating mechanism, of a booster mechanism, and a lever system joining the two mechanisms comprising a toggle for controlling the effective force of the said booster mechanism.

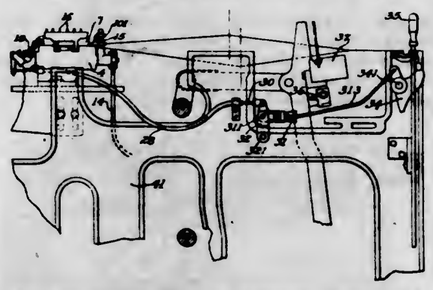


1,902,315. ROTARY PUMP. CLARENCE W. VOGT, Louisville, Ky., assignor to Vogt Instant Freezers Incorporated, Louisville, Ky., a Corporation of Delaware. Filed May 15, 1930. Serial No. 452,624. 10 Claims. (Cl. 103—126.)

1. A rotary pump including a cylindrical casing, an inlet and discharge port associated with said casing, an internally toothed rotor adapted to rotate in close proximity to the interior periphery of said casing, a pinion eccentrically mounted with respect to said rotor and fully intermeshing therewith at one side of the cylindrical casing, and a stationary crescentic member disposed on the opposite side and occupying the space between the disengaged teeth of said rotor and wheel, the end of said member proximate the inlet port extending beyond the latter to such a distance during pumping operations as to serve as a baffle and prevent the induction of material from said port into the interdental spaces of the pinion.

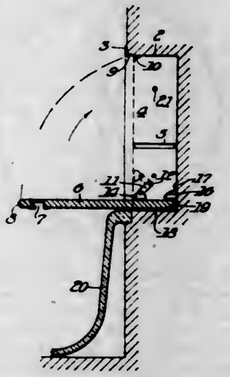
1,902,316. CONTAINER. ARTHUR W. WILKINSON, Easton, Pa., assignor to Sterling Products Company, Easton, Pa., a Corporation of Pennsylvania. Filed Sept. 27, 1932. Serial No. 635,011. 13 Claims. (Cl. 221—1.)

1. A container for corrosive liquids consisting of a supply chamber of relatively hard material, proof against attack by such liquid and of a size and shape adapted to be manipulatable by one hand alone, a seat associated with one wall of said chamber adapted to receive a washer, a threaded aperture surrounded by said seat and dimensioned for convenient filling of the chamber therethrough, a washer, a nozzle section of relatively nonbreakable material, proof against corrosive attack of the liquid contained in the chamber, apertured to permit passage of liquid from the chamber and having an exit duct of such small calibre as to prevent free flow of liquid therethrough, said nozzle section having at one end thereof a tapered nozzle extending to a point relatively remote from the apertured wall of the chamber and at the other end



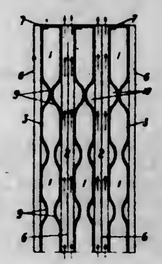
of the nozzle section a screwthreaded portion adapted to engage the threads of the aperture of the chamber, a flange associated with said nozzle section adapted for pressure-contact with the washer against the seat of the chamber, a relatively thick portion associated with said nozzle section adapted for engagement by a tightening tool, a cap-engaging and seating portion associated with said nozzle section, and a cap adapted to cooperate with the cap-engaging portion of the nozzle section and to be held thereby in liquid-tight position with reference to any liquid which might pass through the nozzle during the time the cap is in place.

1,902,317. FROTH-FLOTATION CONCENTRATION OF ORES. PERCY C. WRIGHT, Pittsburg, Calif., assignor to Minerals Separation North American Corporation, New York, N. Y., a Corporation of Maryland. Filed July 14, 1926. Serial No. 122,496. 4 Claims. (Cl. 209—166.)



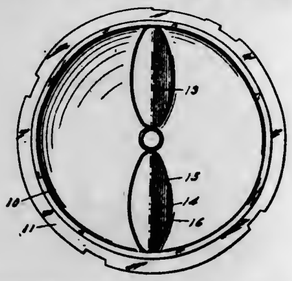
1. The process of concentrating ores which consists in mixing an xanthate and another material in an ore pulp so as to yield dixanthogen, agitating the pulp so as to produce a mineral-bearing froth, and separating the froth.

1,902,318. WARP-STOP MOTION FOR LOOMS. WILLIAM H. BAKER, Montreal, Quebec, Canada. Filed Mar. 5, 1929. Serial No. 344,235. 16 Claims. (Cl. 139—366.)



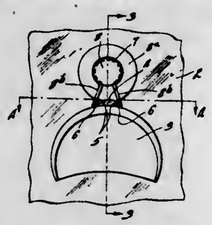
1. The combination with longitudinally reciprocable feeler-bars having projections with holes therethrough, of a vibrator, and flexible fingers extending through said holes and transmitting movement yieldingly from the vibrator to the individual feeler-bars.

1,902,319. COMBINATION CABINET AND SEAT CONSTRUCTION. HENRY A. BLOEDEL, Pittsburgh, Pa. Filed May 9, 1932. Serial No. 610,040. 5 Claims. (Cl. 155—83.)



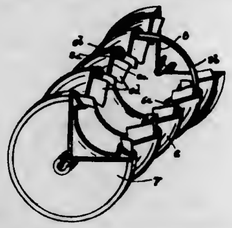
1. A cabinet consisting of a rectangular open front casing provided with side walls, a top and a flat bottom wall, a back wall having a longitudinal ledge spaced above the rear portion of the bottom wall for insertion thereunder of a door when resting horizontally on the bottom wall, a front closing wall fitting between the front edges of the bottom, side and top, and swinging hinge members connecting the lower inner portion of the front wall with the side walls at points above the ledge.

1,902,320. HEAT EXCHANGER. STUART MELVILL BURTON, Burnham, England. Filed Aug. 18, 1931. Serial No. 557,819, and in Great Britain Aug. 18, 1930. 6 Claims. (Cl. 257—130.)



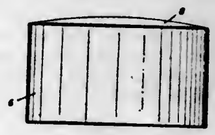
1. A heat exchanger built up from a plurality of assembled units presenting internal passages for fluid at one temperature alternating with passages for fluid at another temperature between adjacent units, each unit comprising a pair of registering metallic sheets having parallel longitudinal edges, each sheet joggled along a line adjacent and parallel to each of said edges to afford a strip portion located in a plane parallel to the plane containing the central portion of the sheet and offset from said last mentioned plane in the direction away from the other sheet of the unit, each such strip portion being formed at each of said edges with a series of hexagonal corrugations of a depth exceeding the amount of offset of the strip portion from the plane containing the central portion of the sheet, the troughs of the corrugations of the two sheets of the unit being in face to face contact, so that the central portions of the two sheets are spaced apart to afford a passage between said sheets, the ridges of the corrugations defining nozzles communicating with said passage, the offset strip portions on adjacent sheets of adjacent units contacting with one another whereby adjacent units are spaced apart to afford a passage therebetween.

1,902,321. NONGLARE REFLECTOR. ARCHIBALD K. CROSSMAN, Oakland, Calif. Filed Feb. 29, 1932. Serial No. 595,759. 2 Claims. (Cl. 240—41.35.)



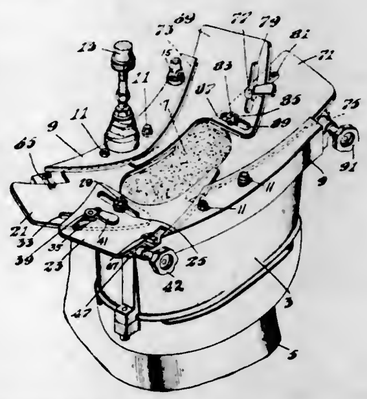
1. A reflector comprising a main reflector element of substantially parabolic form and having a lamp mounting socket positioned at the focal axis thereof, a light deflector element above said socket and a second light deflecting element below said socket, each of said light deflecting elements consisting of a single straight ridge connecting the periphery of the socket and the periphery of the reflector and being disposed in a vertical plane relative to the focal axis, said deflecting elements having plane inclined sides and each intersecting the parabolic surface in a curve having an ovate form.

1,902,322. SIGNAL VIEWING ATTACHMENT FOR AUTOMOBILES. BRUCE W. DAVID, Cleveland Heights, Ohio, assignor to The Moonbeam Manufacturing Company, a Corporation of Ohio. Filed Oct. 20, 1928. Serial No. 313,878. 20 Claims. (Cl. 88—1.)



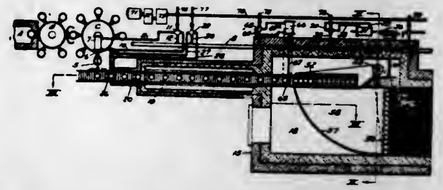
10. In a device of the class described, the combination of a resilient bracket, a suction means carried by said bracket for attachment to a glass window, and a lens mounted in said bracket and having means provided upon an annularly restricted portion of the lens for co-operating with said bracket for holding the lens in assembly.

1,902,323. CHAMBER OF VARIABLE VOLUME. GÉRARD DE MONGE, Brussels, Belgium, assignor to Fabrica Italiana Magneti Marelli, Societa Anonima, Milan, Italy. Filed Mar. 27, 1929, Serial No. 350,426, and in Belgium Apr. 2, 1928. 6 Claims. (Cl. 137—156.5.)



1. A chamber of variable volume comprising a corrugated bellows of rubber with reenforcing means embedded in the wall of said bellows between the bends thereof.

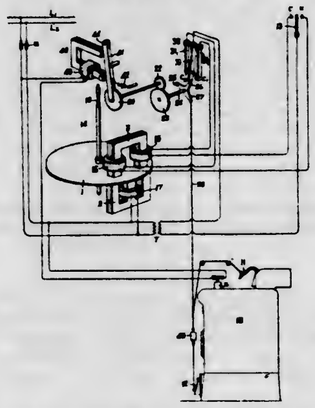
1,902,324. SIFTER CONTAINER. ALEXANDER H. DREUX, Buffalo, N. Y., assignor to F. N. Burt Company, Ltd., Toronto, Ontario, Canada, a Corporation of Ontario. Filed Mar. 21, 1929. Serial No. 348,822. 9 Claims. (Cl. 221—61.)



1. In a container, in combination, a shell crimped to provide a retaining bead, a sifter head and a movable cover for said head retained in position by said bead, and a frangible seal for said sifter head, said cover being mounted for movement upon said frangible seal.

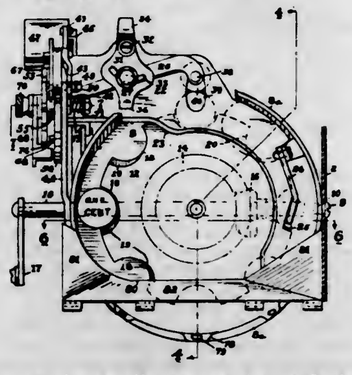
1,902,325. SOLE LAYING MACHINE. SIDNEY J. FINN, Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Apr. 3, 1929. Serial No. 352,279. 11 Claims. (Cl. 18—2.)

9. The combination with a pressure box one wall of which comprises a flexible diaphragm, of two converging guideways, two cooperating plates each having an edge located in a guideway, cooperating edges of the plates being shaped to provide a recess between them, and a slip connection between the plates constructed and arranged to permit the plates to overlap each other more or less as they are moved toward or away from the converging ends of the guideways.



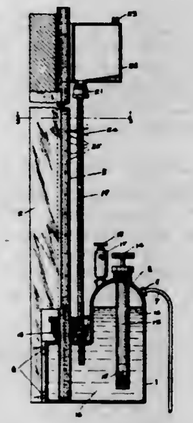
1,902,326. APPARATUS FOR ANNEALING GLASSWARE. PAUL L. GEER, Bellevue, Pa., assignor to The Amsler-Morton Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Nov. 11, 1926. Serial No. 147,681. 28 Claims. (Cl. 49—47.)

1. In an annealing apparatus, an annealing leer, a belt ware feeding conveyor, a second belt ware conveyor having parallel movement with the feeding conveyor, means for depositing ware on to the feeding conveyor, a radially movable transfer member within the leer for transferring the ware from the feeding conveyor to the said second conveyor movable from a position parallel with the feeding conveyor to a position transverse to the second conveyor, and means for moving the transfer member.



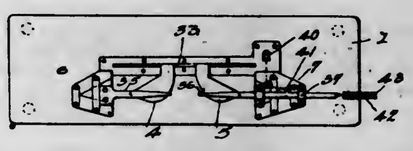
18. In a leer, a means for conveying articles to the leer, a main leer conveyer, a sweeper, means for swinging the sweeper to convey the articles from the means to the conveyor and return the sweeper to the means, and a means for raising and lowering the sweeper to disengage the articles and to receive the articles.

1,902,327. CONTINUOUS HEAT REGULATOR. CHESTER I. HALL, Philadelphia, Pa., assignor to General Electric Company, a Corporation of New York. Filed Oct. 8, 1929. Serial No. 398,252. 13 Claims. (Cl. 236—74.)



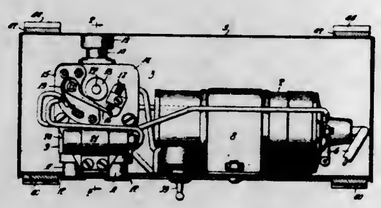
1. In a heat control device, a movable heat regulating member, a thermostatically controlled reversible motor for operating the member each way to a position dependent upon heating conditions, releasable operating connections between said motor and said member, means for independently moving the member upon release of said connections, and automatic means for controlling said releasable operating connections to release the same and effective to re-establish said connections to permit the motor to return the member to said position after said connections have been released independently of the relative positions of the motor and member.

1,902,328. MACHINE FOR COUNTING AND DELIVERING COINS. CHARLES D. HOWENSTINE, North Charleroi, Pa. Filed June 5, 1931. Serial No. 542,273. 4 Claims. (Cl. 133—8.)



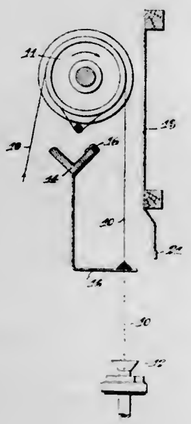
1. In a machine for the purpose described, the combination of a housing, a disk rotating in said housing and having notches formed in the perimetral edge of said disk to carry coins and the like, the carried coins protruding beyond the perimetral edge of the disk, means to feed the coins to said disk, a counting device, a lever, one end of the lever being operatively connected to the counting device whereby the latter is operated by the movement of the lever, the other end of the lever being in the path of the protruding edges of the coins carried by said disk, and means to regulate the path of movement of the coin-engaged end of the lever whereby it may be operated solely by a coin and the like of a selected diameter while the path of movement of the other end of the lever remains substantially constant.

1,902,329. LIQUID GAUGE. EDWARD L. HUBBARD, Piedmont, Calif., assignor to Water Works Supply Company, San Francisco, Calif., a Corporation of California. Filed Mar. 12, 1929. Serial No. 346,317. 2 Claims. (Cl. 73—54.)



1. A gauge for indicating the level of a liquid comprising a chamber partially filled with a gauging liquid, an air duct having one end connected with the chamber to communicate with the air space above the gauging liquid and having the other end positioned below the level of the liquid to open at the maximum depth to be indicated, an upwardly extending sight tube connected with said chamber and opening below the level of the gauging liquid, and a pump casing mounted in said chamber and having means projecting out of said chamber, and a check valve in said pump casing for compressing the air in the space above the liquid in the chamber, said check valve being submerged in the gauging liquid.

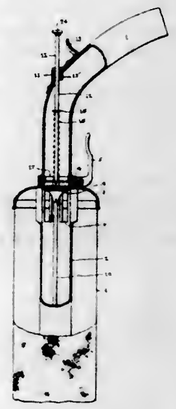
1,902,330. COLLAR STRETCHING MACHINE. MORRIS L. KAPLAN, Hazleton, Pa. Filed Apr. 25, 1931. Serial No. 532,913. 10 Claims. (Cl. 223—55.)



1. In a machine as described, the combination with a mold having a recess in one face, of a yieldable stretching-plate fitted in said recess, guide pins for said plate, and springs for urging the plate into said recess.

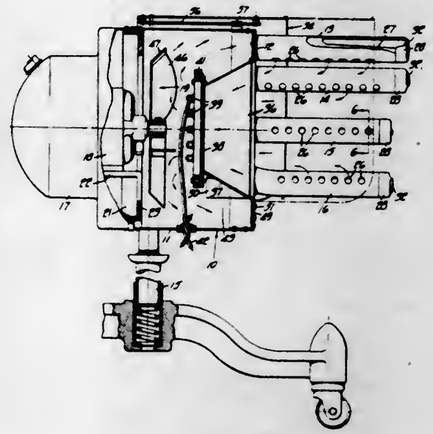
1,902,331. DISPLAY DEVICE. LUDVIO P. KONGSTED, Longmeadow, Mass., assignor to United American Bosch Corporation, Springfield, Mass., a Corporation of New York. Filed June 14, 1932. Serial No. 617,099. 4 Claims. (Cl. 176—124.)

1. An advertising device comprising a casing containing a transformer adapted to have its secondary circuit connected to a neon sign, a frame in the casing, a plate secured to the frame, an interrupter on the plate connected to the primary of the transformer, a motor in said frame, and gearing between the frame and the plate to enable the motor to operate the interrupter.



1,902,332. ARTIFICIAL SILK SPINNING MACHINE ATTACHMENT. ALFONS KRAUSE, Breslau-Cawallen, Giesche-Siedlung, Germany, assignor to American Glanzstoff Corporation, New York, N. Y., a Corporation of Delaware. Filed Oct. 27, 1931, Serial No. 571,474, and in Germany Feb. 13, 1931. 3 Claims. (Cl. 118—16.)

1. A machine for spinning thread having a take-up roller, a gutter located therebeneath, a guide means, a platform located between said take-up roller and guide means, movably secured to said gutter and adapted to receive the thread during the doffing operation.



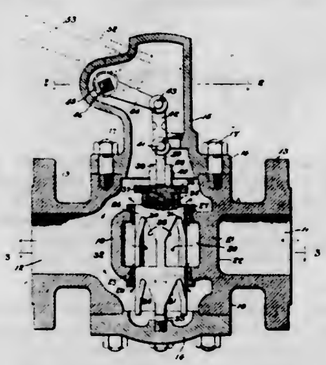
1,902,333. VACUUM CLEANER FILTER VALVE. WARD LEATHERS, Haworth, N. J., assignor to The Quadrex Corporation, a Corporation of Connecticut. Filed Nov. 3, 1930. Serial No. 493,068. 6 Claims. (Cl. 183—57.)

1. In a vacuum cleaner, a motor-driven blower, a rigid hollow air duct leading therefrom, a filter, upper and lower ports in said air-duct communicating with the filter, and means of opening and closing the upper and lower

ports, the upper being open when the lower is closed and vice versa, for purposes of cleaning said filter pneumatically.

1,902,334. HAIR DRIER. TOMLINSON I. MOSELEY, San Francisco, Calif., assignor to Duart Manufacturing Co. Ltd., formerly Pacific Hair Goods Company Ltd., San Francisco, Calif., a Corporation of California. Filed Feb. 8, 1932. Serial No. 591,529. 4 Claims. (Cl. 34—26.)

1. In a hair drier, a shell through which a current of air can be caused to flow, said shell having a forward end wall, a plurality of spaced air discharge tubes grouped in an inverted U formation and mounted on the sides and upper marginal portions of said front wall, said tubes having inner side openings for the discharge of air jets and having inlet ends communicating with the interior of the shell through said end wall, the lower marginal portions of said front wall having openings formed therein for the discharge of air in a forward direction, a rotary impeller disposed within the shell and adapted to deliver air to said tubes and said last mentioned openings, a frusto-conical structure secured to said front wall and

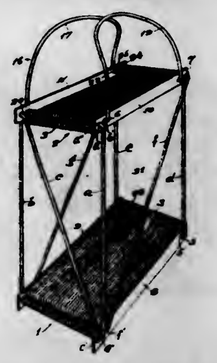


serving to form a passage leading through said front wall to said impeller, said passage being located above said last mentioned openings and within the space encompassed by said tubes, and means disposed within the shell for heating air flow.

1,902,335. CASEMENT WINDOW PROTECTION. WILLIAM F. MOSS, Upper Montclair, N. J. Filed Feb. 2, 1932. Serial No. 590,339. 1 Claim. (Cl. 156—14.)

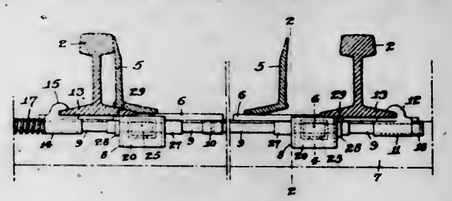
A frame for a rain-excluding ventilating fabric screen for casement windows or other wall openings having flanges extending inwardly of the same, comprising a collapsible frame consisting of members notched to fit over said above mentioned flanges and adapted to be connected with the edge portions of the ventilating rain-excluding fabric at points to hold the same fully stretched continuously across the space outlined by the flanges when said notched parts of said members are engaged over said flanges and releasable means for removably retaining said members spread apart in position thus engaged over the flanges and supporting said fabric in position closing the opening against rain but passing air for ventilation.

1,902,336. BALANCED VALVE. RALPH L. MURRAY, Philadelphia, Pa. Filed Nov. 25, 1930. Serial No. 497,972. 1 Claim. (Cl. 251—41.)



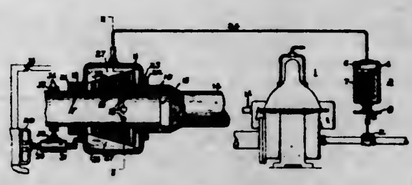
A valve organization comprising a housing, a valve mounted to reciprocate therein, a shaft extending through the housing, an arm on the shaft within the housing, links from the arm to the valve interconnected by a pintle, and a pintle perpendicular to the first mentioned pintle pivoting the terminal link to the valve, said links and pintles forming substantially a universal joint between the arm and valve.

1,902,337. MANUFACTURE OF FILMS, LACQUERS, AND THE LIKE. CARL NEUBAUER, Mannheim, Germany, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany, a Corporation of Germany. Filed Dec. 9, 1926, Serial No. 153,738, and in Germany Dec. 14, 1925. 5 Claims. (Cl. 134—26.)



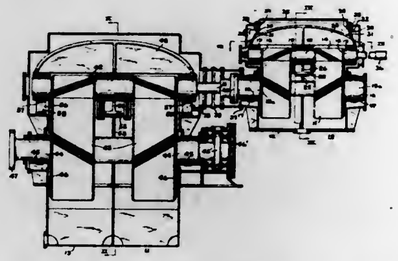
1. A composition of matter comprising a condensation product of urea and formaldehyde and at least one water-insoluble organic colloidal substance selected from the group consisting of cellulose esters and ethers in a quantity at least equal to that of the said condensation product.

1,902,338. PHOTOENGRAVER'S GLASS DIPPING RACK. CLARENCE E. RILEY, South Pasadena, Calif. Filed Oct. 21, 1930. Serial No. 490,157. 3 Claims. (Cl. 141—1.)



1. The combination with slats comprising ribs, and runners provided with hubs, of cross-bars extending through the hubs to hold the slats together to form a grooved member of a plate holding rack.

1,902,239. SWITCH HEATER. ERNST L. RUBY, Jenkintown, Pa. Filed Mar. 28, 1932. Serial No. 601,489. 15 Claims. (Cl. 246—428.)



1. In a gas burning switch heater, a burner box adapted to be supported below a railroad rail in close proximity to the bottom thereof and having an open top and an open bottom and comprising side walls adapted to extend substantially parallel to the rail, end walls adapted to extend transversely of the rail, and a substantially horizontal wall supported between said end walls in spaced relation thereto and below the upper ends thereof; and a fuel pipe extending through the side walls of the box and having fuel discharging openings beneath said horizontal wall.

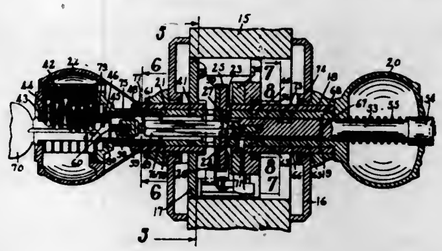
1,902,340. FLUID PRESSURE GOVERNING SYSTEM. HENRY F. SCHMIDT, Lansdowne, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Jan. 15, 1930. Serial No. 420,958. 9 Claims. (Cl. 264—14.)

1. The combination with centrifugal fluid impelling means and a governor responsive to fluid pressure developed by said impelling means, of means whereby the radial extent of the impelling surfaces providing the fluid pressure imposed on the governor may be changed.

1,902,341. REDUCTION GEAR. HENRY F. SCHMIDT, Lansdowne, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Aug. 29, 1931. Serial No. 560,194. 7 Claims. (Cl. 74—7.)

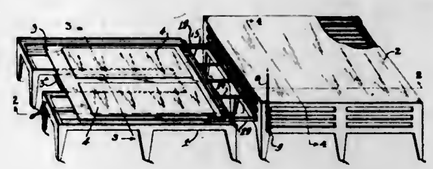
1. In a reduction gear, meshing pinion and gear members, a rigid frame having bearings for the gear member and provided with an arch springing from opposite sides thereof and midway of the length of the latter, a floating frame for the pinion disposed oppositely to the central portion of the arch, and flexible connecting means between the central portion of the arch and the floating frame.

1,902,342. SUSPENDERS. LUDWIG SCHULLERMAN, Astoria, N. Y. Filed Mar. 21, 1932. Serial No. 600,176. 1 Claim. (Cl. 241—27.)



In a pair of suspenders, two shoulder straps, two supporting members each comprising three suspending elements two of which form a forked member and with the third suspending element form a bite, each of said shoulder straps engaging the bite of its corresponding supporting member and with the forked members on proximate sides of said shoulder straps.

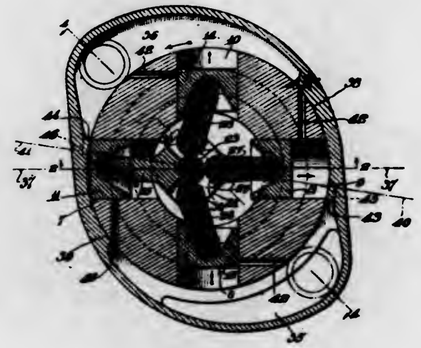
1,902,343. LOCK. JOHN H. SHAW, New Haven, Conn., assignor to Sargent & Company, New Haven, Conn. Filed Mar. 7, 1929. Serial No. 344,974. 27 Claims. (Cl. 70—91.)



1. In a door lock, a latch bolt, operating mechanism therefor, a knob on one side of said lock for actuating said operating mechanism and a key operated member on the other side of the lock for actuating said mechanism, said key operated member being adapted to receive a change key and a master key, means on the opposite side of the lock from said key operated member for disengaging the key operated member from connection with said mechanism for operation thereof by the change key, whereby when the change key is received in said lock it will rotate idly, and means controllable by the master key controlled member for restoring the engagement of the key controlled member with said operating mechanism.

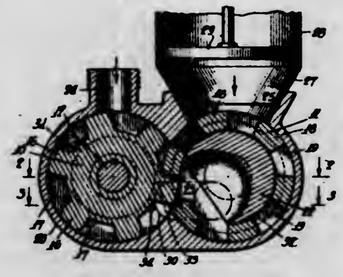
27. In a door lock, a latch bolt, operating mechanism for said latch bolt, a knob on one side of the lock for actuating said operating mechanism, key operated means on the other side of the lock for actuating the operating mechanism, a thimble on the inner end of said key operated means, an axially movable shaft mounted in said thimble and extending into the operating mechanism, said shaft

having a non-circular part and a circular part, said thimble having a part normally embracing the non-circular part of the shaft, means for moving said shaft to bring the circular part thereof opposite the said part of the thimble, and means associated with key operated means for rotating said shaft in either of said positions.



1,902,344. APPARATUS FOR CLEANING WINDOW SHADES. WILLIAM M. THEOBALD, Cleveland, Ohio. Filed Dec. 20, 1929. Serial No. 415,596. 6 Claims. (Cl. 15—1.)

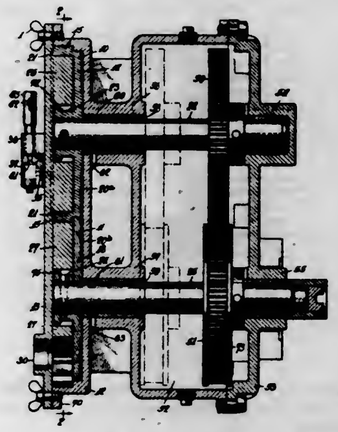
1. Apparatus for cleaning window shades including a polished metallic plate, means for supporting the same, drying means located adjacent said support, and means for supporting the plate for sliding the same from the supporting means to the drying means.



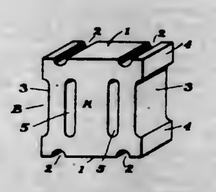
1,902,345. FLUID PRESSURE PUMP. WARREN P. VALENTINE, Line Lexington, Pa., assignor to National Transit Pump & Machine Company, Oil City, Pa., a Corporation of Pennsylvania. Filed Apr. 2, 1931. Serial No. 527,068. 6 Claims. (Cl. 103—161.)

1. A pump of the character indicated comprising a cylindrical rotor having a hollow recess extending rearwardly from its forward end and having circumferentially spaced radial bores intersecting said recess, a plunger in each bore, a stationary eccentric pin, an operating connection between said pin and said plungers whereby rotation of the rotor reciprocates the plungers in their respective bores, an external casing presenting a surface toward the rotor recessed outwardly to provide inlet and outlet passages respectively registering with the ends of the bores during major portions of the inward and outward movements respectively of the plungers within the bores and seals comprising casing portions making arcuate sealing engagements with the outside of the rotor intermediate the passages at positions to respectively register the seals with the bores when the plungers therein are at their innermost and outermost positions, and the seal in position to register with the bores while the plungers thereof are at their innermost positions having an arcuate forward sealing extension sealing the open ends of the bores during early portions of the outward movements of the plungers within the bores, said rotor having a perforation extending forwardly from an intermediate point only of each bore to a point on the circumference of the rotor such that the bore is connected to the discharge

passage through the perforation while the open end of the bore is closed by the sealing extension and the perforation is sealed when the piston extends outwardly beyond the intermediate point.



1,902,346. ROTARY PUMP. CLARENCE W. VOGT, Louisville, Ky., assignor to Vogt Instant Freezers, Incorporated, Louisville, Ky., a Corporation of Delaware. Filed Aug. 23, 1930. Serial No. 477,232. 7 Claims. (Cl. 103—126.)

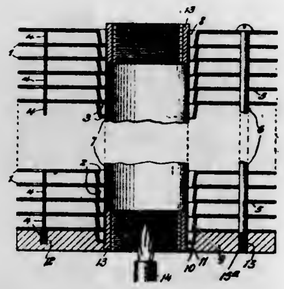


1. A rotary pump for mixing, proportioning and advancing separate materials including a pair of intermeshing rotary members having parallel axes, one of said members having an annular series of pockets and an internal chamber and the other having projections adapted to enter said pockets, separate inlets at the peripheries of the two members and an outlet from said chamber, said outlet being disposed adjacent the point of entry of the projections into said pockets.

1,902,347. ROTARY GEAR PUMP. CLARENCE W. VOGT and WALTER E. ZOELLER, Louisville, Ky., assignors to Vogt Instant Freezers, Incorporated, Louisville, Ky., a Corporation of Delaware. Filed Jan. 31, 1931. Serial No. 512,525. 8 Claims. (Cl. 103—126.)

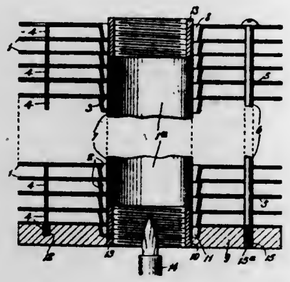
1. A rotary gear pump including a casing, a removable end wall connected to said casing and forming therewith a pumping chamber, a pair of shafts, a pair of intermeshing pumping gears connected to said shafts and disposed in said pumping chamber, a pair of intermeshing driving gears connected to said shafts, and means for interlocking said driving gears against relative axial movement, said casing having a wall between said driving gears and spaced from the former to a distance substantially equal to the thickness of said chamber, whereby said shafts may be moved axially through said wall to such distance as will move said pumping gears out of said chamber.

1,902,348. CHECKER BRICK AND CHECKER WORK FORMED THEREFROM. JAMES W. WAGSTAFF, Youngstown, Ohio. Filed Nov. 29, 1930. Serial No. 498,984. 3 Claims. (Cl. 263—51.)



3. A checker brick of the class described comprising a refractory body having substantially rectangular faces, the end faces thereof each having an elongated depression extending between the adjacent lateral faces spaced from the top and bottom faces, and each of the top and bottom faces having a pair of spaced semi-cylindrical grooves extending between said lateral faces, said body also having a pair of relatively narrow elongated spaced openings extending transversely therethrough and providing intercommunication between areas adjacent the respective lateral faces of the brick.

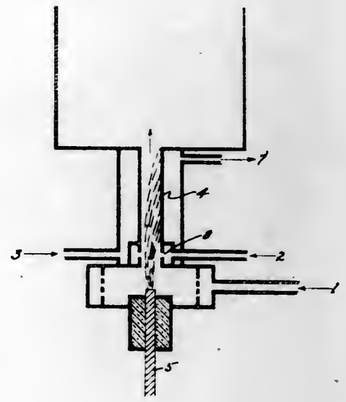
1,902,349. PROCESS OF MAKING HEAT EXCHANGERS. LOUIS PREVOST WHITAKER, New York, N. Y., assignor to S. R. Dresser Manufacturing Company, Bradford, Pa., a Corporation of Pennsylvania. Filed Jan. 31, 1931. Serial No. 512,577. 5 Claims. (Cl. 22—204.)



1. The herein described process of manufacturing a heat exchanger which consists in forming an exterior mold wall by assembling a plurality of apertured metal plate elements, spaced by apertured metal spacing ele-

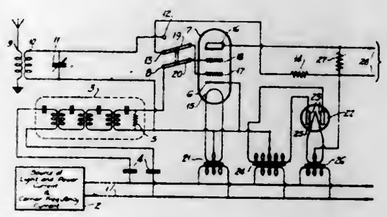
ments, said plate and spacing elements having their apertures in coaxial alignment, supporting a metal tube element within said exterior mold wall and spaced therefrom

to form an interior mold wall, and casting a body of metal between said mold walls, and united to said tube and said plate elements.



1,902,350. HEAT EXCHANGER. LOUIS PREVOST WHITAKER, New York, N. Y., assignor to S. R. Dresser Manufacturing Company, Bradford, Pa., a Corporation of Pennsylvania. Original application filed Jan. 31, 1931, Serial No. 512,577. Divided and this application filed Oct. 10, 1931. Serial No. 568,008. 7 Claims. (Cl. 257—263.)

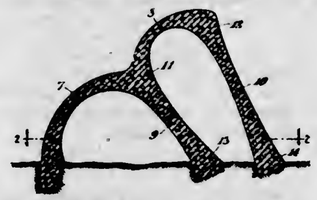
1. A heat exchanger comprising a thin metal tube, a series of parallel plates surrounding said tube, and an integral cylindrical reinforcing cast metal body united to said tube and to said plates to form an integral structure, said cast metal body forming the only connection between said plates and said tube.



1,902,351. TREATING CARBONACEOUS MATERIALS WITH ELECTRIC ARCS. PAUL BAUMANN, HEINRICH SCHILLING and ALBERT FISCHER, Ludwigshafen-on-the-Rhine, Germany, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Filed Mar. 16, 1932, Serial No. 599,156, and in Germany Mar. 20, 1931. 3 Claims. (Cl. 204—31.)

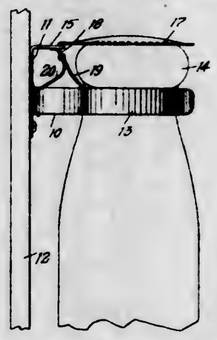
2. In the production of acetylene by treatment of a vaporized hydrocarbon in the electric arc the steps of suspending in said hydrocarbon a finely divided solid substance which is not chemically altered by said arc

and then passing the resulting suspension through the arc so that the said solid substance comes into contact with the surfaces confining the arc space.



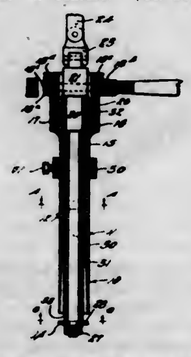
1,902,352. RADIO RECEIVING SYSTEM. ADOLF W. C. BOLJAHN, Jersey City, N. J., assignor to Wired Radio, Inc., New York, N. Y., a Corporation of Delaware. Filed Feb. 6, 1931. Serial No. 513,795. 3 Claims. (Cl. 179—2.5.)

1. A radio receiving system comprising, a plurality of different sources of signaling energy, a space discharge tube including a cathode and an anode, a plurality of control grids interposed between said cathode and anode, a source of steady potential, and means for connecting one of said control grids selectively to one of said sources of signaling energy or to said source of steady potential and the other of said control grids selectively to the other of said sources of signaling energy, or to said source of steady potential.



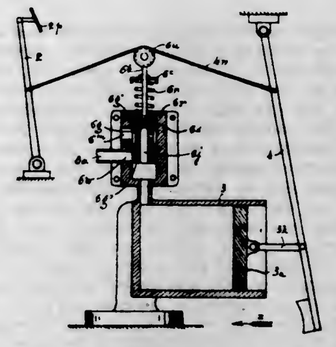
1,902,353. DAM. EDGAR H. BURROUGHS, Scarsdale, N. Y., assignor to Ambursen Construction Company, Inc., New York, N. Y., a Corporation of New York. Filed Apr. 30, 1930. Serial No. 448,504. 4 Claims. (Cl. 61—32.)

1. A dam with an up- and down-stream section comprising an arch having abutments in foundation material with the up-stream abutment terminating substantially normal to the surface of said material, a second arch



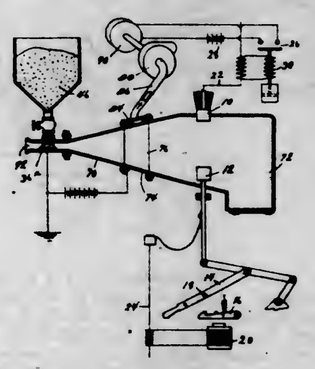
having one abutment on said first-named arch adjacent the crown thereof, with said arches presenting up-stream surfaces forming a water-bearing deck.

1,902,354. COMBINATION HOLDER AND COVER FOR BOTTLES. RULOFF D. CORKE, Yonkers, and FREDERIK HANSEN, White Plains, N. Y. Filed Nov. 7, 1931. Serial No. 573,530. 1 Claim. (Cl. 248—65.)



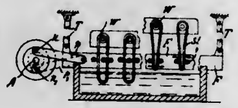
A device as characterized comprising a supporting member and bent forwardly and flatwise at its upper extremity, outwardly projecting arms adjacent and integral the lower end of said supporting member to hold a bottle therebetween, a slot in the flatwise portion of the supporting member, a cover attached to said flatwise portion, a strip extending from said cover and projecting downwardly through said slot and shaped to resiliently engage the side of said bottle, and a spring member attached to said strip and diverging at its free end to engage against the inner wall of the supporting member whereby the cover will be securely clamped on the top of the bottle.

1,902,355. TUBING CUTTER. LEVI DAY and WILLEM VAN EE, Long Beach, Calif. Filed June 27, 1930. Serial No. 464,282. 4 Claims. (Cl. 29—69.)



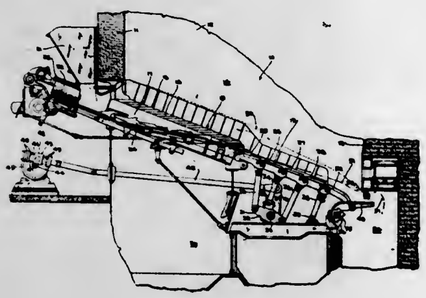
1. A tubing cutter including, a body adapted to be inserted in a tube and having a longitudinal opening, a shaft extending through the opening; means for rotatably and tiltably mounting the shaft in the opening including, a shell rotatably carrying the shaft and tiltably mounted in the opening, a cutter on the shaft, a screw on the body operable to engage the shell to tilt the shell and shaft to feed the cutter outwardly, and spring means for automatically tilting the shell to a normal axial position upon retraction of the screw.

1,902,356. SYSTEM FOR TRANSMITTING MOVEMENT. GÉRARD DE MONGE, Brussels, Belgium, assignor to Fabrica Italiana Magneti Marelli, Societa Anonima, Milano, Italy. Filed July 18, 1928, Serial No. 293,589, and in Belgium July 23, 1927. 1 Claim. (Cl. 121—41.)



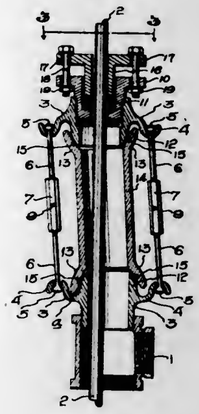
A transmission system comprising a cylinder having a piston, a lever connected to the piston, a valve casing having an opening for admitting a power medium to the cylinder and having means for exhausting said medium therefrom, a sliding valve having a duct therein and an external groove to control said opening and said means, a rod connected to said valve, a pulley on said rod, an actuating member and a flexible connection joining said lever and said member and passing over said pulley.

1,902,357. CIRCUIT INTERRUPTION. WILLIAM S. EDSALL, Brookline, Mass., assignor to Condit Electrical Manufacturing Corporation, South Boston, Mass., a Corporation of Massachusetts. Filed Feb. 17, 1930. Serial No. 428,894. 22 Claims. (Cl. 200—144.)



17. The method of extinguishing an electric arc which consists in neutralising electrically charged ions in the arc by oppositely electrically charged free discrete particles.

1,902,358. APPARATUS FOR THE MULTIPLE OR MULTICOLOR DYEING OF HANKS OF YARN. FRIEDRICH FAIGLE and CARL FAIGLE, Hard, near Bregenz, Austria. Filed Dec. 11, 1931, Serial No. 580,408, and in Austria May 23, 1930. 6 Claims. (Cl. 8—19.)

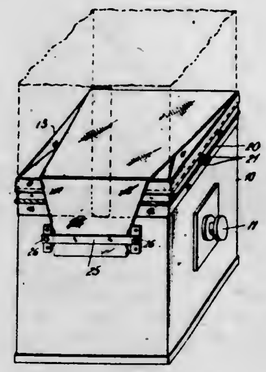


1. A device for swinging and wringing hanks of yarn subjected to multiple stepwise dyeing operations in a dye bath, comprising in combination: means for suspending the hanks so that they are immersed only to the desired extent in the dye bath; members arranged above the dye bath for moving the hanks; means for moving said members simultaneously either in the same direction or in opposite directions to one another, whereby the hanks are swung to and fro during the dyeing operation by said members and are wrung out after the dyeing operation between said members upon withdrawal from the bath; said means comprising a shaft on which some of said members are mounted; and a second shaft which is arranged adjacent to said first-named shaft and on which the others of said members are mounted; the said two shafts being arranged so as to be axially displaceable and to be rotatable together with said members through an angle of 90° independently of and, when desired, dependently on one another, substantially as described.

1,902,359. FURNACE. ROBERT A. FORESMAN, Moores, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Dec. 30, 1930. Serial No. 505,615. 5 Claims. (Cl. 110—44.)

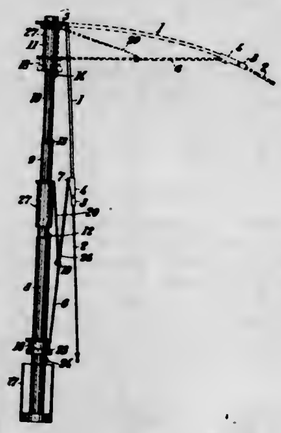
1. In a furnace, the combination of a progressive feed stoker including a grate disposed at the discharge end thereof and mounted for movement bodily in the direction of fuel feed for ejecting the ash therefrom; means for effecting such movement of the grate; a normally stationary member disposed transversely of the fuel feed at the discharge end of the stoker and providing a support for the ash coming from the stoker; the forward end of the member extending beneath and forming a bearing support for the rear end of the grate; a furnace wall disposed transversely of said member at the rear thereof and having a portion overhanging the rear portion of the member to form, in conjunction with said member, an approximately horizontally extending passage through which ash is moved by virtue of the action of the grate; adjusting means for moving the ash supporting member angularly about an axis extending transversely of the fuel feed and disposed adjacent the forward end of the member, whereby the rear portions of the member may be moved up or down with respect to the overhanging portion to vary the size of the passage.

1,902,360. PUMP ROD STUFFING BOX MOUNTING. WALTER W. FOSTER, Wichita Falls, Tex. Filed Nov. 23, 1931. Serial No. 576,765. 6 Claims. (Cl. 286—15.)



1. A pump rod stuffing box mounting including relatively movable flanges and a tubular spacing member, parallel rods arranged to maintain said flanges in positive parallel relationship whereby to constrain said stuffing box to move in a horizontal plane during reciprocating movements of said pump rod.

1,902,361. CUSHIONING PAD. CARL S. HAMERSLEY, New York, N. Y. Filed Feb. 27, 1932. Serial No. 595,447. 11 Claims. (Cl. 154—54.)



1. A cushion of the character described, comprising a plurality of corrugated sheets arranged in stacked relationship with the corrugations of each sheet arranged transverse to those of each adjacent sheet, each sheet having the major portion thereof free of connection with the adjacent sheet or sheets to permit independent expansion of each sheet in its own plane.

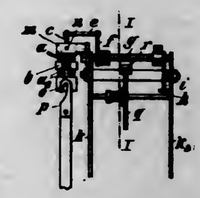
1,902,362. RECEPTACLE AND CLOSURE THEREFOR. WILLIAM L. HANAVAN, Montclair, N. J. Filed July 10, 1931. Serial No. 549,892. 10 Claims. (Cl. 220—1.)

1. A receptacle, having a single open side a closure therefor comprising a flexible member secured around the edge portion of said open side of the receptacle to form a continuation of the walls of the receptacle, and folded across said open side of the receptacle, and means securing the folded member across said open side.

1,902,363. TELESCOPIC UMBRELLA. HANS HAUPT, Berlin, Germany. Filed Aug. 16, 1930, Serial No. 475,647, and in Germany July 19, 1930. 3 Claims. (Cl. 135—22.)

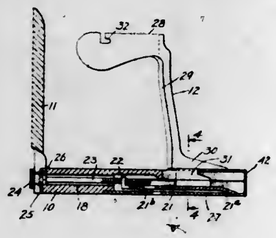
1. An umbrella of the character described, comprising a stick composed of telescopically connected sections, ribs composed of slidably connected sections, a runner on the stick, stretchers connecting said runners with the outer rib sections, a sleeve arranged to slide on the stick, and auxiliary struts pivoted at one end to said sleeve and at the other end to the central portions of the stretchers for supporting the latter in the open position of the umbrella, said struts being formed with knees adapted to bear against and exert outward pressure on the stretchers when the umbrella is closed.

1,902,364. METHOD OF PREPARING FATTY ACID ESTERS OF BORNEOL AND ISOBORNEOL. VALENTIN HILCKEN, Gersthofen near Augsburg, Germany, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Filed Oct. 19, 1931, Serial No. 569,843, and in Germany Nov. 7, 1930. 11 Claims. (Cl. 260—99.)



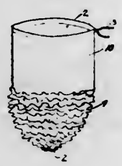
1. In the process of preparing fatty acid esters of borneol by causing fatty acids to react upon camphene, the new step which consists in adding a small amount of borontrifluoride to the reaction mixture.

1,902,365. WATER HEATER. WILLIAM M. HILLS, Hartford, Conn. Filed May 16, 1931. Serial No. 537,789. 11 Claims. (Cl. 122—333.)



1. A liquid heater including a base, composed of a gas receiving section having a peripheral flange to create a recess, an inlet section resting on said flange to close said recess and thereby create a gas chamber, said inlet section having passages therein, an inlet pipe extending through said gas chamber and communicating with said passages, tubes communicating with said passages and extending upwardly from said base, means at the top of the structure for collecting liquid delivered by said tubes, and gas tubes communicating with said gas chamber and extending upwardly within the space bounded by said tubes.

1,902,366. ESCAPEMENT AND PENDULUM MECHANISM. GOTTLOB JAISSLE, Feuerbach near Stuttgart, Germany, assignor to Uhrenfabrik J. Kienzle, Komotau, Czechoslovakia. Filed Jan. 5, 1931, Serial No. 506,690, and in Germany Jan. 7, 1930. 2 Claims. (Cl. 58—123.)



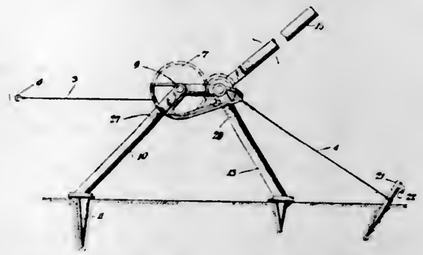
2. A mechanism of the class described and having the features outlined in claim 1, in which the said energy transmitting means comprise a lever, adjustably mounted on the axis of the anchor, a connecting rod horizontally extending from said lever and a U-shaped member rigidly interconnecting said rod and clamp.

1,902,367. SEAT. EVERARD L. JOHNSON, Patchogue, N. Y. Filed Mar. 11, 1930. Serial No. 434,869. 3 Claims. (Cl. 155—36.)

1. The combination with a seat and an upright member on said seat movable forwardly and backwardly with respect thereto, of means for retaining said member in different positions of adjustment, the seat having an elongated channel and a part on said member operating in said channel, said retaining means comprising a cam plate arranged in said channel, a rod projecting at the rear end of the seat and in screw threaded engagement with said plate for moving said plate longitudinally in said channel into and out of engagement with the part on said member for retaining said member in different positions of adjustment.

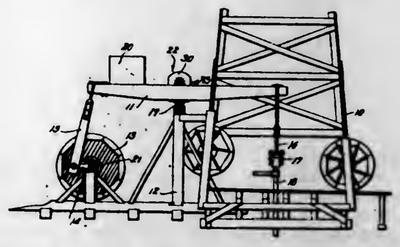
1,902,368. BAG. MARTHA E. JOHNS, Norfolk, Va. Filed May 27, 1932. Serial No. 614,016. 2 Claims. (Cl. 150—1.)

1. A bag comprising a single sheet of fabric having its side edges stitched together, hems arranged at the top and bottom of the sheet of material, draw strings arranged in said hems, draw strings having one of their ends secured to the sheet of material and disposed about the bag in row formation, said last mentioned draw strings being passed through the fabric in spaced parallel relation with respect to each other and in running stitch formation whereby to provide a ruffled portion upon movement of the fabric upwardly on the last mentioned draw strings, the first mentioned draw strings being adapted to draw the ends of the sheet together to give a pillow effect with the ruffled portion disposed above the remaining portion of the bag and ornamental means secured to the ruffled portion.



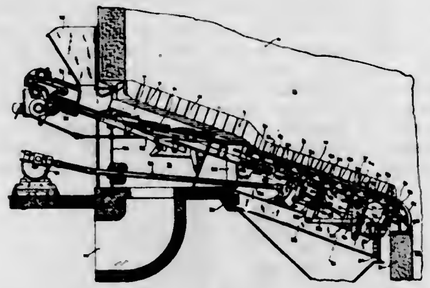
1,902,369. ADHESIVE TAPE FOR FASTENING PACKAGES AND FOR LIKE PURPOSES. THEODORE HENRY KRUEGER, New York, N. Y., assignor to Better Packages, Incorporated, Shelton, Conn., a Corporation of New York. Original application filed May 2, 1930, Serial No. 449,152, and in Great Britain Oct. 31, 1929. Divided and this application filed Aug. 7, 1930. Serial No. 473,747. 4 Claims. (Cl. 229—49.)

1. Adhesive tape for fastening packages and for like purposes, divided longitudinally into three zones by parallel lines of weakness along which said tape as a whole will bend readily to a channelled cross-section with the gum inwards, so that the flanges at the sides may be gripped by the operator without touching the moistened gum, and wherein the distance between the lines of weakness is at least one eighth of the width of the strip, and



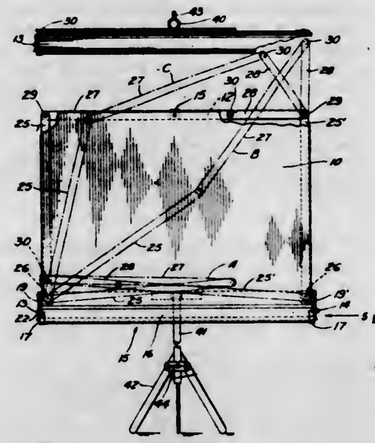
not less than one quarter of an inch (whichever is the greater), and not more than seven eighths of said width or three and one-half inches (whichever is the less).

1,902,370. SUPPORTING FRAME FOR WINDING MECHANISM. RAUL LAVANDEIRA, Buenos Aires, Argentina. Filed Dec. 6, 1930, Serial No. 500,530, and in Argentina Aug. 22, 1930. 1 Claim. (Cl. 254—135.)



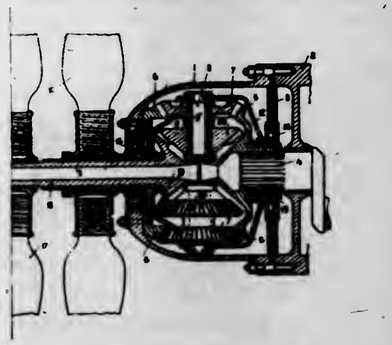
A supporting frame for a winding mechanism to pull vehicles from swampy ground comprising a casting supporting the winding mechanism, said casting being formed with sockets, legs having their upper ends secured in said sockets, spikes secured to the lower ends of the legs and positioned at an angle thereto, concave discs securing the spikes to the legs and having a surface adapted to rest on the surface of the ground, a peg adapted to be driven into the ground at a suitable distance from said spikes, and a stay connecting said peg to said casting, said peg and spike being relatively so arranged as to overcome the resistance of the vehicle.

1,902,371. CONTROL FOR PUMP ACTUATING MECHANISMS AND THE LIKE. LLOYD M. MILLER, Los Angeles, LYNN M. GREENE, Whittier, JOSEPH G. MILLER, Los Angeles, and ELMER E. CALKINS, Whittier, Calif. Filed Apr. 25, 1931. Serial No. 532,771. 22 Claims. (Cl. 192—116.5.)



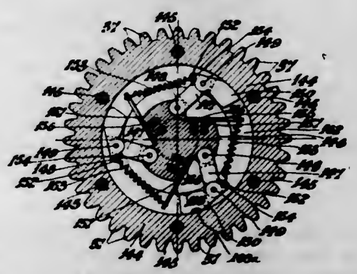
2. In combination, a walking beam, and a control device carried by the walking beam including, a contact mechanism, and means for actuating the contact mechanism upon the speed of the motion of the walking beam being accelerated.

1,902,372. COMBUSTION APPARATUS. DONALD J. MOSSHART, Lansdowne, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Sept. 14, 1929. Serial No. 392,578. 6 Claims. (Cl. 110—44.)



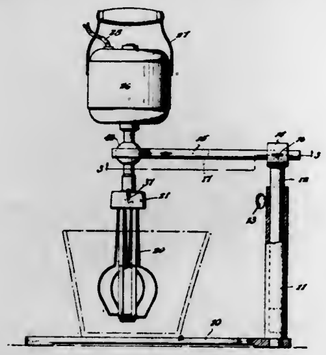
1. In combustion apparatus, the combination with an underfeed stoker section comprising alternately-arranged retorts and tuyère rows, and means for feeding fuel to one end of the underfeed section; of an overfeed section disposed to receive the burning material from the other end of the underfeed section and comprising a series of grate members pivotally connected together in end-to-end relation and extending in the direction of fuel feed; means for supporting the first grate member considered in the direction of fuel feed for reciprocatory movement bodily in the direction of such feed; and means for imparting a combined oscillatory and reciprocatory motion to some of the remaining grate members of the series.

1,902,373. PORTABLE SCREEN. ORRIN WESTON PINEO, Milo, Me., assignor to Sprague Specialties Co., North Adams, Mass., a Corporation of Massachusetts. Filed Nov. 13, 1931. Serial No. 574,878. 4 Claims. (Cl. 88—24.)



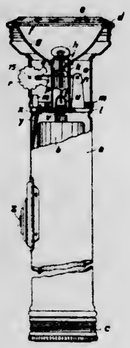
1. A portable screen assembly comprising a casing and a plurality of links adapted to form a frame, two of said links being of equal length and secured to the two ends of said casing to form the sides of the frame, and two links of unequal length connected to said side links, and adapted to form the top of the frame, the longer one of the top links being of equal length to the side links and the shorter one of the top links being equal in length to the difference between the width and length of the screen.

1,902,374. REDUCING GEAR. GUGLIELMO PIRINOLI, Turin, Italy, assignor to Fiat Società Anonima, Turin, Italy. Filed Sept. 23, 1931, Serial No. 564,650, and in Italy May 15, 1931. 1 Claim. (Cl. 74—34.)



In a reducing gear, the combination with a casing, a driving shaft and two driven shafts concentrically arranged to each other and in alignment with the driving shaft, of a sun gear fixed to the casing, a sun gear keyed to said driving shaft, planet gears comprising two toothed rims, one of which meshes simultaneously with both of said sun gears, a casing for said planet gears connected with the outer driven shaft and supported on both sides by the first-mentioned casing, said casing being provided with openings, through which project the toothed rims meshing with the fixed sun gears and a third sun gear keyed on the inner driven shaft and meshing with the other toothed rim of said planet gears.

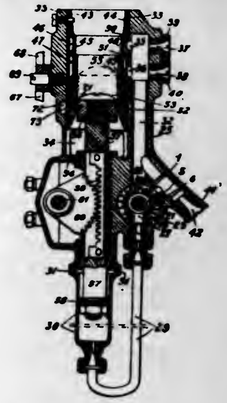
1,902,375. CLUTCH. WALTER CHARLES PITTER, London, England, assignor to Pitter Trust, a Common-Law Trust. Original application filed Sept. 20, 1924, Serial No. 738,829, and in Great Britain Aug. 28, 1924. Divided and this application filed July 18, 1928. Serial No. 293,593. 14 Claims. (Cl. 192—45.2.)



1. A one-way rotary clutch, comprising a driving member and a driven member, a clutch piece and a strut, the strut bearing at one end against one of the members, the other member being provided with an annular groove of which the opposite sides form concentric friction surfaces of different diameters, the clutch piece being provided at one end with oppositely-disposed gripping surfaces for engaging the inner and outer concentric friction surfaces when the clutch piece is tilted in a plane which is substantially at right angles to the axis of revolution, the rear end of the clutch piece bearing against the outer end of the strut, the strut being of such length as to hold the clutch piece substantially tangentially to the groove of the annular grooved member and to tilt it in such groove so that it will grip the opposite sides of the groove only when one of the members is moved rotatively relative to the other in one direction.

1,902,376. FOOD MIXER. CONN A. PURDIN, Chico, Calif. Filed Feb. 10, 1932. Serial No. 592,144. 2 Claims. (Cl. 259—132.)

1. A mixer comprising a vertically adjustable standard, a horizontally adjustable supporting arm thereon terminating in an adjustable socket, and a combined motor and beater assembly having a ball slidable bodily toward and away from the motor and pivotally received in said socket to contact the assembly for universal as well as vertical sliding movement on the supporting arm.



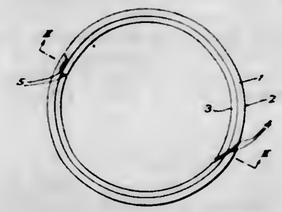
1,902,377. FLASH LIGHT. PAUL ROSENBERG, Berlin, Germany, assignor to Walter Rosenberg, Berlin, Pankow, Germany. Filed Dec. 4, 1930, Serial No. 500,113, and in Germany Mar. 11, 1929. 4 Claims. (Cl. 240—10.69.)

1. In a flash light having a casing, a reflector, and a source of light mounted to be adjusted with respect to said reflector, a battery in said casing, a plate of insulating material in said casing intermediate said battery and said source of light, a guide of channel section on said plate having slots, a socket for said source of light, pins on said socket adapted to move in said slots, a forked lever mounted to rock in said guide, with its arms surrounding said socket and engaging said pins, and manually operated means for rocking said lever.

1,902,378. CARBURETOR. HUGO SCHNEEBELI, Courbevoie, France. Filed Oct. 29, 1931, Serial No. 571,900, and in France Nov. 7, 1930. 5 Claims. (Cl. 261—49.)

1. A carburetor for internal combustion engines, comprising: a carburetor body, a tubular sleeve secured in a bore of the said body, a union secured on said sleeve and putting the sleeve in direct communication with the gasoline tank, without interposition of a constant lever chamber, a nozzle adapted to constitute a sprayer, in said sleeve, and perforated with a channel for the admission of gasoline, a conical seat surrounding the outlet orifice of the said channel, means for controlling the closing, opening and output of the spraying nozzle, an annular chamber formed in the tubular sleeve, about the conical seat of the spraying nozzle, and adapted to receive gasoline delivered by the spraying nozzle, a circular groove, provided in the outer wall of the tubular sleeve and adapted to form with the shape of the carburetor body, a gasoline atomizing chamber, channels putting the atomizing chamber in communication with said annular chamber, means for putting the atomizing chamber in communication with the atmosphere for the admission of primary air, its mixing with the gasoline admitted in the said chamber, and the atomization of

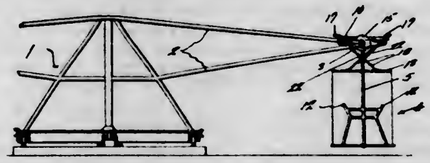
the gasoline in the form of a rich emulsion, means for transmitting in this atomizing chamber the partial vacuum produced by the engine and supplying the emulsion produced in the said chamber to the suction connecting branch of the engine, means for adding to and mixing with this emulsion further quantities of primary air during its passage from the atomizing chamber to the suction connecting branch of the engine, means for controlling the admission of this mixture into the suction connecting branch of the engine, means for ensuring the introduction in this mixture of adjustable quantities of secondary air and for delivering this explosive mixture in the suction connecting branch of the engine, and means adapted to ensure the simultaneousness of the control of the admission of gasoline and primary air and of the control of the admission of secondary air.



1,902,379. AGE RESISTING RUBBER COMPOUND AND PROCESS OF MAKING SAME. WINFIELD SCOTT, Nitro, W. Va., assignor to The Rubber Service Laboratories Co., Akron, Ohio, a Corporation of Ohio. Filed Sept. 10, 1929. Serial No. 391,709. 6 Claims. (Cl. 18—50.)

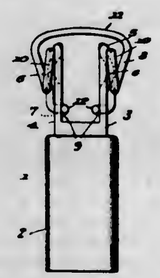
1. The process of manufacturing an age resisting vulcanized rubber product which comprises curing a rubber composition of vulcanization characteristics in the presence of an anit-oxidant comprising a sulfur derivative of a reaction product of substantially two molar proportions of beta-naphthol and substantially one molar proportion of p,p'-diamino-diphenyl-methane.

1,902,380. ANNULAR DOWEL FOR TIMBER BONDS. JACOB SEGER, Zurich, Switzerland, assignor to the Firm Locher & Cie., Zurich, Switzerland. Filed Sept. 11, 1930. Serial No. 481,297. 2 Claims. (Cl. 20—92.)



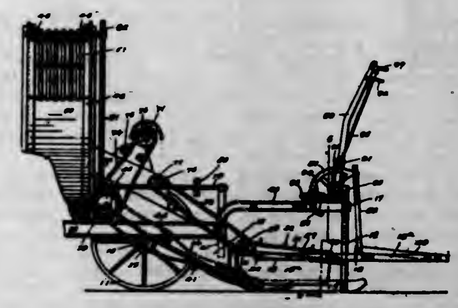
1. In a timber bond, the combination with grooves provided in the surfaces of the timbers to be joined,

said grooves forming internal cores the sides of said cores tapering inward from the bottom of the grooves to the jointing surfaces of the timbers, of a bipartite annular dowel having a cross-section corresponding to that of the juxtaposed grooves, the opposite faces of the dowel joints being parallel and at least one of said



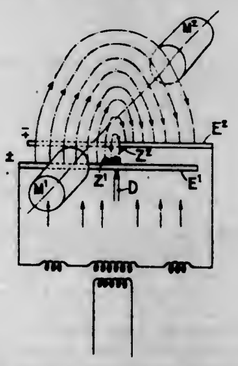
joints S-shaped, the ends of the two parts at the S-shaped joint being formed with interlocking axially extending sockets and knobs permitting opening and closing movements while opposing separate overturning movements of the two parts, and tightening means for said timbers adapted to press said dowel home in said grooves so as to yieldingly engage the side portions of said grooves.

1,902,381. AMUSEMENT DEVICE. SOLOMON W. SHEPHERD, Orlo Vista, Fla. Filed May 9, 1930. Serial No. 451,087. 5 Claims. (Cl. 272—40.)



1. An amusement device comprising, in combination, a rotatable supporting structure including radiating arms, connecting rods extending between the outer ends of the arms, a car suspended for lateral swinging movement from the connecting rods, and coacting means carried by the connecting rods and the car and operable by the occupants of said car for causing the car to swing laterally.

1,902,382. SPARK PLUG IGNITION TERMINAL. FRED G. SHOEMAKER, Syracuse, N. Y. Filed Mar. 2, 1928. Serial No. 258,517. 7 Claims. (Cl. 173—269.)



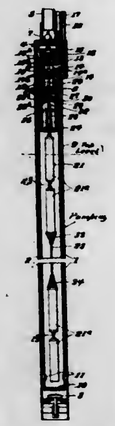
1. In combination with a forked ignition-cable-terminal having two opposed projecting bosses and a pair of perforations in the fingers of said forked terminal, a locking member including opposed trunnions to enter the said perforations in the forked terminal, a central transverse portion adapted to close the opening at the end of the forked terminal, and opposed coiled formations intermediate the said trunnions and the said central transverse portion, the said opposed coiled formations being adapted to engage the said opposed projecting bosses and to confine said opposed projecting bosses within the space defined by said opposed coiled formations.

1,902,383. TRACTOR OPERATED BEET LOADER. JULIUS SIEHC, Torrington, Wyo. Filed Mar. 21, 1931. Serial No. 524,350. 8 Claims. (Cl. 209—358.)

1. A beet loader including a wheel supported frame, a horizontally disposed pick-up blade carried by the frame, an agitating conveyor extending upward and rearward from the pick-up blade, means disposed above the pick-up blade and extending forward and rearward thereof whereby the beets in the path of movement of the blade are carried upward on to the blade and on to the conveyor, a transversely extending endless elevator on which the beets are discharged from the conveyor and including a floor having a slatted upper portion, and a plate disposed below and in spaced relation to the slatted portion of the floor and extending downward and inward to carry trash discharged through said slatted portion downward and inward.

1,902,384. PROCESS FOR PRODUCING CHEMICAL REACTIONS IN GASES AND VAPORS WITH AID OF A HIGH TENSION ELECTRIC ARC. EWALD STEINBUCH, Basel, and MAX ESCHMANN and HANS SCHWAMMBERGER, Monthey, Switzerland, assignors to Society of Chemical Industry in Basle, Basel, Switzerland. Filed Oct. 8, 1932, Serial No. 636,960, and in Switzerland Oct. 16, 1931. 20 Claims. (Cl. 204—31.)

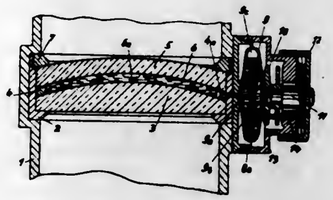
1. A process for the production of chemical reactions in gases and vapors by a high tension electric arc which is blown mechanically (aerodynamically) and magnetically, consisting in driving the gases from below upwards



through a space crossed by electrode bars of any suitable cross section substantially parallel to each other, extending transversely to the direction of the gases and approximately at right angles to the lines of force of the magnetic field, the electric arc being struck approximately at the middle points of the electrodes and the speed of the gas current being so selected that the arc, under the simultaneous effect of the magnetic field, is spread out to assume the form of an upwardly extending body with flat faces the foot of which oscillates on the electrode bars from within outwards.

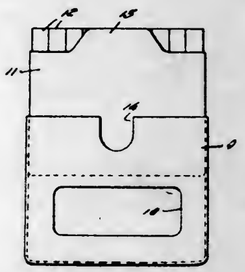
1,902,385. METHOD OF PRODUCING $MgCl_2$ CONTAINING CHLORIDES OF ALKALI METALS OR ALKALINE EARTH METALS. HIROSHI TANAKA, Komagome, Hongo-Ku, and SHOICHIRO IMATOMI, Ikegami-Machi, Ebara-Gun, Tokyo, Japan, assignors to Zaidan Hojin Rikagaku Kenkyujo, Tokyo, Japan. Filed Mar. 8, 1929, Serial No. 345,594, and in Japan Apr. 12, 1928. 8 Claims. (Cl. 23—91.)

1. A process of producing anhydrous magnesium chloride containing a chloride of alkali metals or of alkaline earth metals; consisting in mixing magnesium sulphide with chloride of alkali metals, charging the mixture into a furnace, heating the mixture from 400° to 600° C., and passing chlorine gas therethrough while continuing the heating.



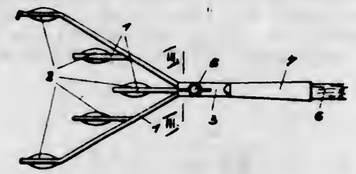
8. A process of producing anhydrous magnesium chloride containing chloride of alkaline earth metals, consisting in mixing magnesium sulphide containing magnesium oxide, with sulphide of alkaline earth metals, charging the mixture into a furnace, heating the mixture from 400° to 600° C., and passing a reducing gas containing chlorine gas therethrough while continuing the heating.

1,902,386. LIQUID PUMP. SAMUEL W. TRAYLOR, JR., Allentown, Pa., assignor to Traylor Engineering & Manufacturing Company, Allentown, Pa., a Corporation of Delaware. Filed May 19, 1932. Serial No. 612,348. 20 Claims. (Cl. 103—248.)



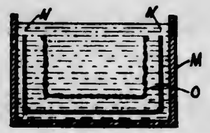
1. In a liquid pump, a working chamber, valve means controlling motive fluid inlet and exhaust for said chamber, operating means constantly tending to move said valve means into inlet position, and a buoyant member located in said chamber and constantly exerting a downward force tending to move the valve means into exhaust position against the force of said operating means, said buoyant member having its downward force reduced by the buoyancy of the liquid when it rises to a predetermined high level in said chamber to permit said valve means to be moved by said operating means into inlet position, said operating means including the buoyant member being in substantial longitudinal alignment for a substantially frictionless line motion directly from the buoyant force of the liquid on the said member to the valve means.

1,902,387. BOX SHAPED WATER LEVEL. CHRISTIAN VON HOFE and JOHANN SCHIER, Vienna, Austria, assignors to Actiengesellschaft C. P. Goerz Optische Anstalt Actiova Spolecnost K. P. Goerz Opticky Ustav, Pressburg, Bratislava, Czechoslovakia, a Company of Czechoslovakia. Filed Mar. 5, 1931, Serial No. 520,418, and in Germany Mar. 8, 1930. 2 Claims. (Cl. 33—211.)



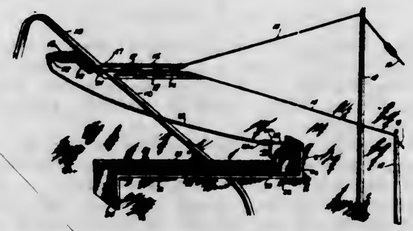
1. A box shaped water level comprising a liquid chamber enclosing the air bubble of the water level, an elastic container filled with the liquid of the said water level and communicating with the said liquid chamber, means for exerting external pressure on the said elastic container and a atructure supporting the said liquid chamber, elastic container and pressure exerting means, the proportions and materials of the said elements being such that the dilations by heat of the said elements substantially compensate for each other whereby the size of the air bubble in the said air chamber is automatically kept constant substantially in case of variations of temperature.

1,902,388. COMBINED CIGARETTE CASE AND ASH TRAY. CLIFTON WELCH, Pensacola, Fla. Filed Feb. 3, 1931. Serial No. 513,213. 1 Claim. (Cl. 206—41.)



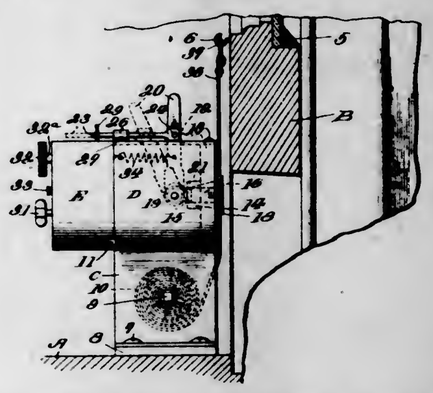
A device of the character described comprising an outer casing, having an open top and being further provided with an elongated opening in one side wall in spaced relation to said open top, an inner open top casing slidably disposed in the outer casing for the reception of cigarettes, and being movable across said elongated opening to close the same, when said inner casing is seated in the outer casing, the inner casing being of a height less than that of the outer casing and less than the length of the cigarettes for exposing one end portion of the cigarettes, opposed walls of the outer casing being provided with alined recesses to facilitate withdrawal of the inner casing from the outer casing, upstanding tongues formed integrally with the top of the inner casing and disposed in alinement with the recesses when the inner casing is seated in the outer casing, and a closure slidably mounted on the outer casing and removable therefrom and adapted to enclose one end of said inner casing.

1,902,389. HAND CULTIVATOR. GREGOR WOLF, Betzdorf-on-the-Sieg, Germany. Filed Nov. 22, 1930, Serial No. 497,509, and in Germany Aug. 5, 1930. 2 Claims. (Cl. 306—45.)



1. A hand cultivator comprising a tine socket, a handle secured to said socket, said tine socket having five sides three of which are substantially at right angles to each other, a plurality of exchangeable tines arranged pairwise juxtaposed in said socket, a single exchangeable tine disposed in the angle formed by the remaining two sides of said socket, and a screw mounted in the wall of said socket opposite said last named angle for pressing said tines against each other and towards said angle, whereby said tines are securely held in position.

1,902,390. STERILIZING PROCESS. JAMES C. WORMLEY, New York, N. Y. Filed May 9, 1931. Serial No. 536,204. 2 Claims. (Cl. 204—1.)

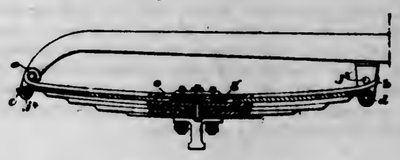


1. The method of sterilising metallic surfaces comprising, submerging the metallic surface in a receptacle containing an aqueous electrolyte solution containing sodium carbonate and inside of a U-shaped insoluble anode, connecting the anode in an electric circuit and connecting the metallic surface in the same circuit as a cathode supported within and spaced from the U-shaped anode, and passing current through the circuit and consequently the electrolyte whereby electrolysis is set up to generate caustic soda and hydrogen at the surface of the metal and to render the cleaned surface sterile and free from microorganisms.

1,902,391. AIR-MAIL PICK-UP AND DEPOSIT MECHANISM. LOUIS P. WULF, Lost Nation, Iowa. Filed Aug. 28, 1930. Serial No. 477,412. 19 Claims. (Cl. 258—1.)

16. A cable depending from an aircraft and carrying a mail bag supporting element, there being coupling means between the mail bag supporting element and said cable, including a loop and a latching element normally extending through the loop but retractible therefrom, a ground trap including converging guides defining a gap, and means at said gap causing the withdrawal of said latch from the loop when the cable has moved out of the gap.

1,902,392. AUTOMATIC CLOSER FOR WINDOWS AND THE LIKE. LOUIS VANCE BLUE, Pittsburgh, Pa.; Edward B. Blue executor of the estate of said Louis V. Blue, deceased. Filed July 12, 1927. Serial No. 205,204. 16 Claims. (Cl. 161—1.)

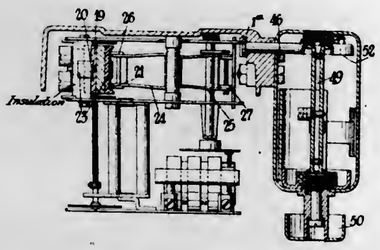


1. A window closing device comprising a spring pulling the window downward, said spring having trigger receiving means, a trigger for locking the spring against its downward tension, means to move said trigger into locked position in respect to the spring, and means for releasing the trigger, whereby the spring pulls the window downward.

1,902,393. ANCHOR FOR BOATS. ALBERTO BOSCH, Habana, Cuba. Filed Sept. 21, 1931, Serial No. 564,213, and in Cuba Jan. 29, 1931. 4 Claims. (Cl. 114—206.)

1. An anchor comprising a flat body slit at one end to define anchoring tongues, the two tongues being curved outwardly in opposite directions and projecting laterally beyond the flat sides of the body, and a supporting ring pivotally attached to the body at a point adjacent the slit end whereby the weight of the opposite end of the body tilts the latter to a vertical position with the tongues disposed uppermost when the body is held suspended from said ring.

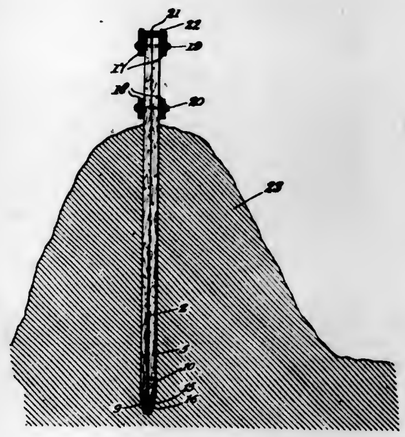
1,902,394. SUSPENSION SPRING. PAUL ADOLPHE CARTERET, Neuilly sur Seine, France. Filed Apr. 22, 1930, Serial No. 446,330, and in France Oct. 28, 1929. 5 Claims. (Cl. 267—36.)



1. A suspension spring comprising two leaves each of which is secured at one end to a fixed point while the other end is free and positioned adjacent the fixed end of the other leaf, one of said leaves being provided with a slot, and a stationary spacing plate mounted in the slot allowing relative longitudinal movement of the two leaves.

1,902,395. UMBRELLA. EMILE CORNIC, Paris, France. Filed Dec. 28, 1931, Serial No. 583,506, and in France July 23, 1931. 8 Claims. (Cl. 135—44.)

1. An umbrella, comprising a stick, a rib-carrying ring secured to this stick, ribs pivoted on this ring, a handle slidably mounted on the upper end of the stick, a cup rigid with the handle, a returning device between the handle and the stick, this returning device being adapted to constantly urge the cup towards the ribs, the end of the stick passing through an axial hole perforated from end to end in the handle, and projecting at the top of the latter when the returning device has relaxed.



1,902,396. PREPAYMENT ELECTRICITY METER. SEBASTIAN ZIANI DE FERRANTI, deceased, Hollinwood, England, by Gertrude Ruth Ziani De Ferranti, Legal Representative, London, England, assignor to Ferranti Inc., New York, N. Y. Filed Oct. 14, 1931, Serial No. 568,839, and in Great Britain Sept. 25, 1930. 4 Claims. (Cl. 200—164.)

1. An electric switch including contact members having contacting surfaces, means for urging said surfaces into mutual contact with sufficient pressure to prevent appreciable local temperature rise whilst the switch is closed, means for causing said surfaces to separate to an extent of about .01 inch only to open said switch and means ensuring that the contacting surfaces remain substantially parallel during separation.

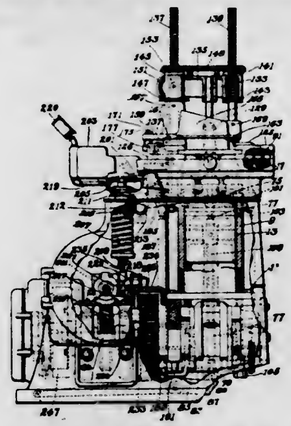
1,902,397. SHEET PILING BULKHEAD. OTIS F. DOYLE, New Orleans, La. Filed Sept. 7, 1932. Serial No. 632,026. 4 Claims. (Cl. 61—58.)

1. An improved sheet piling bulkhead comprising groups of vertical timbers associated together and driven into the levee, three of said timbers in the group lying end to end, the remaining two timbers of the group extending end to end with respect to one another and beside the first three timbers and bridging the joints between the first three timbers, the first three timbers being constructed and adapted to be driven into the ground in a definite order, the first timber having beveled walls to facilitate insertion, the second timber also having beveled side walls to facilitate insertion and a beveled end wall away from the first timber, a third timber having beveled sides and a beveled

end wall away from the second timber, the other two timbers being also adapted and constructed to be driven into the ground in a definite order, the fourth timber being driven into the ground at any time after the positioning of the first two timbers and having a beveled side face away from the first two timbers, the fifth timber being driven into place after the fourth timber and having a beveled end wall away from the fourth timber.

1,902,398. PROCESS OF MANUFACTURING VULCANIZED RUBBER AND PRODUCTS OBTAINED THEREBY. SYLVESTER M. EVANS, Nitro, W. Va., assignor to The Rubber Service Laboratories Company, Akron, Ohio, a Corporation of Ohio. Filed June 17, 1930. Serial No. 461,850. 10 Claims. (Cl. 18—50.)

1. The process of vulcanizing rubber which comprises heating rubber and sulfur in the presence of an anti-oxidant comprising a reaction product of a dioxy dinaphthyl sulfide and an aryl amine.



1,902,399. SOLE LAYING MACHINE. SIDNEY J. FINN, Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed July 29, 1927. Serial No. 209,297. 44 Claims. (Cl. 12—33.)

1. A machine of the class described having, in combination, a pressure box one wall of which comprises a flexible diaphragm, a jack adapted to support a shoe against pressure applied through the diaphragm, means located outside the box adjacent to the diaphragm and having an opening therein large enough to permit the bottom of the shoe to pass through it, and connected mechanisms acting in timed relation first to operate said means to decrease the size of the opening and then to apply pressure through the diaphragm to the shoe.

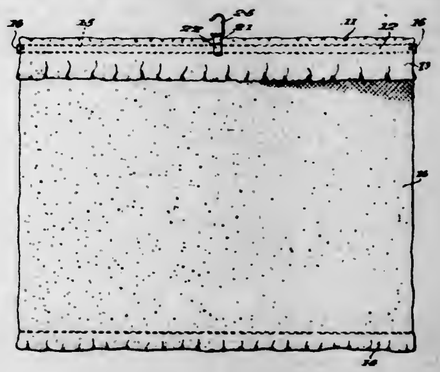
28. A machine of the class described having, in combination, a pressure box one wall of which comprises a flexible diaphragm, a jack for supporting a lasted shoe against pressure applied through the diaphragm, means for moving the jack into a position just above the top of

CARNEGIE LIBRARY OF ATLANTA

the last and for holding it stationary in that position, a plurality of plates, means for causing the plates to close about the shoe, means acting in conjunction with one of

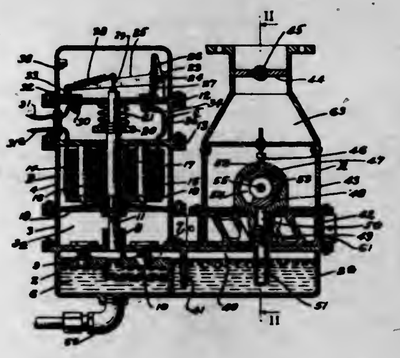
the plates for gripping the toe portion of the shoe, and means operating after the toe portion has been gripped for forcing fluid under pressure into the box.

1,902,400. PROCESS OF PRODUCING GUANIDINE-THIOCYANATE. WILHELM GLUUD, Dortmund-Eving, Germany, assignor to Gesellschaft für Kohlentechnik mit beschränkter Haftung, Dortmund-Eving, Germany, a Company of Germany. Filed Dec. 3, 1931, Serial No. 578,745, and in Germany Dec. 12, 1930. 5 Claims. (Cl. 260—125.)



1. The process of producing guanidine-thiocyanate, consisting in melting ammonium-thiocyanate and conducting ammonia through the molten mass.

1,902,401. OPHTHALMOLOGICAL APPARATUS. WILLIAM A. GUNNING, Southbridge, Mass., assignor to American Optical Company, Southbridge, Mass., a Voluntary Association of Massachusetts. Filed Nov. 14, 1929. Serial No. 407,148. 12 Claims. (Cl. 254—95.)

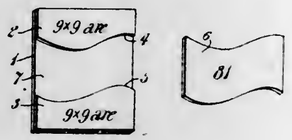


1. In a device of the character described an inner member, a housing surrounding the inner member, means attached to the housing to secure said housing against movement in one direction on said inner member at any variable position on said inner member and operating independently of any definitely formed holding means on said inner member, means to move said housing and securing means in the opposite direction on the inner member to any variable position and means to disengage the securing means to permit movement of the securing means and housing in either direction.

1,902,402. CURTAIN DISPLAY HANGER. HERBERT C. HERING, Cincinnati, Ohio. Filed Oct. 22, 1931. Serial No. 570,470. 7 Claims. (Cl. 156—22.)

1. A hook-clip for use in a curtain display hanger comprising a clip portion made from a single strip of metal bent intermediate its ends to form a spring loop, and a hook portion extending from said loop and retained against displacement therefrom.

1,902,403. COMBINATION FUEL PUMP AND CARBURETOR. WILLIAM R. HEWITT, New York, N. Y. Filed Sept. 3, 1930. Serial No. 479,529. 5 Claims. (Cl. 261—27.)

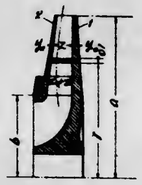


1. In a device of the character described, a carburetor having a chamber formed therein for the reception of air and fuel under pressure, an atomizing nozzle in communication therewith, an intermediate valve to regulate and to cause the flow of fuel under pressure to the nozzle, a pump whereby fuel under pressure is delivered to the chamber, and means whereby the pressure on the fuel in said chamber automatically regulates the pump to maintain a constant pressure.

1,902,404. MEANS FOR ASSISTING AND TESTING THE MEMORY. AUSTIN GEORGE HUMPHREYS, Brighton, England. Filed Feb. 27, 1930, Serial No. 431,946, and in Great Britain Mar. 27, 1929. 1 Claim. (Cl. 35—2.)

An educational appliance comprising a plurality of rectangular blocks of uniform peripheral dimensions, a transverse channel extending completely across one face of

each block between two ends so that each block consists of two parts the full thickness of the block separated by an integral part which is thinner, the edges forming the junctions of the said parts being sinuous, the transverse channel of one block being distinct from that of any other block, and a plurality of elements each having a longitudinal dimension corresponding to a transverse dimension of one of said blocks and each formed with longitudinal



sinuous edges and straight transverse ends, th sinuous edges of such elements being such that each element has its own characteristic configuration so that it has to be fitted into one of said channels of a predetermined block, the said elements bearing matter which is complementary to matter formed upon the said blocks, and their transverse end edges coinciding with the straight edges of the blocks.

1,902,405. AGE RESISTING VULCANIZED RUBBER PRODUCT AND PROCESS OF MANUFACTURING SAME. JOSEPH R. INGRAM, Nitro, W. Va., assignor to The Rubber Service Laboratories Co., Akron, Ohio, a Corporation of Ohio. Filed June 14, 1930. Serial No. 461,264. 14 Claims. (Cl. 18—50.)

1. The process of vulcanizing rubber which comprises heating rubber and sulfur in the presence of an anti-oxidant comprising a reaction product of a glycerol and an aromatic amine.

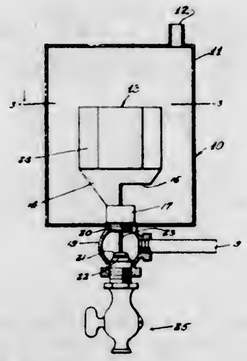
1,902,406. ROTOR FOR TURBO-BLOWERS, CENTRIFUGAL PUMPS AND THE LIKE. HARUHISA INOKUTY, Hongo-Ku, and ZYUNKITI NAGAOKA, Shitaya-Ku, Tokyo, Japan. Filed June 20, 1930, Serial No. 462,654, and in Japan Nov. 2, 1929. 2 Claims. (Cl. 103—115.)

1. A rotor for turbo-blowers, centrifugal pumps and the like including vanes, discs coupled together elastically by said vanes, one of said discs having an inner opening, and a shrinkage ring fitted on the innermost radial part of said disc and rendering the displacements and stresses in both discs substantially equal.

1,902,407. STATIC ELIMINATOR. PETE KLIER, Bisbee, N. Dak. Filed Sept. 24, 1929. Serial No. 394,860. 3 Claims. (Cl. 250—20.)

1. A static eliminator comprising an inner and an outer tubular member of metallic composition, an inner coil about the inner member, one end of the inner coil being adapted to be connected to a radio receiving set, an outer

coil about the outer member, one end of the outer coil being adapted to be connected to an antenna, a shield about the outer coil, and an iron core within the inner member.



1,902,408. MANUFACTURE OF NEW CARDIO-ACTIVE GLUCOSIDES OF BULBUS SCILLÆ. WALTER KREIS, Binningen near Basel, Switzerland, assignor to "Chemical Works formerly Sandoz," Basel, Switzerland. Filed Sept. 8, 1927, Serial No. 218,366, and in Germany Aug. 12, 1927. 6 Claims. (Cl. 87—28.)

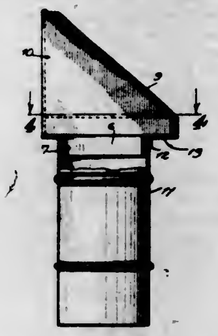
1. A process for the isolation of an easily soluble cardio-active glucoside from bulbus Scillæ, comprising the steps of dissolving a raw alcoholic extract from bulbus Scillæ in an aliphatic alcohol selected from a class comprising methanol and ethanol, treating this solution with chloroform in order to precipitate the inactive impurities, filtering the solution, evaporating same in vacuo at a low temperature, extracting the residue thus obtained which consists of a mixture of tannoids of the active glucosides, with water, in order to separate the water-insoluble portion, treating the obtained aqueous extract with tannin precipitating substances, separating the solution from the precipitate thus obtained, extracting the easily soluble gluco-side from the solution by means of a neutral aliphatic organic liquid from the class of chloroform and ethyl-acetate, and isolating the glucoside in dry form from its solution in the organic solvent by evaporating the solvent in vacuo.

1,902,409. AIR VENTING DEVICE. JEFFERSON N. LA BRANCH, San Diego, Calif. Filed Jan. 12, 1931. Serial No. 508,289. 3 Claims. (Cl. 137—69.)

1. An air venting device of the character described, comprising, a closed casing, an air vent leading from the casing, an air and fluid conduit intake opening in the casing, a float valve structure having a part thereof within the casing and a part thereof outside the casing, said structure comprising an inverted hollow conical body having an opening in one side and a closed top, a neck depending from the lower end of the body, a reduced screw threaded portion on the lower end of the neck defining a shoulder on the neck and adapted to be received through said intake opening so as to rest said shoulder upon the part of the casing surrounding said intake opening, a T-shaped fitting having a globular body portion, one of the arms

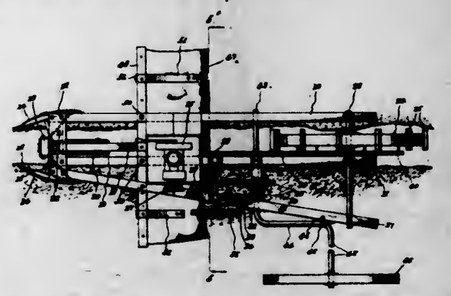
thereof being threaded upon the lower end of the said reduced portion so as to engage the exterior of the closed casing adjacent said intake opening, an air and fluid conduit connected with a lateral arm of the fitting, and a test spigot in the lowermost arm of the fitting; a float adapted to come to rest upon the top of the body, a valve

stem depending from the float through a guide hole in the top of the said body and into said globular body portion, a collar near the lower end of the stem adapted to enter snugly said neck, a valve on the lower end of the stem, a valve seat in the lower end of said reduced portion of the neck adapted to seat said valve.



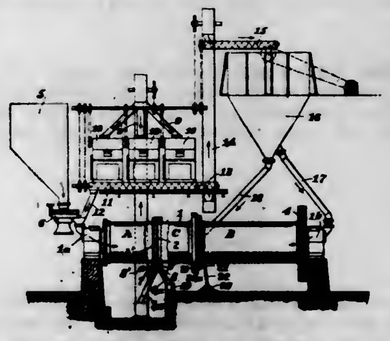
1,902,410. INTERCHANGEABLE TOOTHBRUSH. HENRY GUIDO LÉON LEMOINE, Perriers-sur-Andelle, France. Filed Mar. 12, 1930, Serial No. 435,805, and in France Apr. 26, 1929. 1 Claim. (Cl. 15—176.)

A tooth brush comprising a chambered head, flanges forming the chamber in said head, a bristle carrying plate disposed in the chamber of the head and engaging the flanges, one end flange of said chambered head being undercut to form a recess, and one end of said bristle plate engaging in said recess, the other end thereof being provided with a recess, a handle carried by the head, a reinforcing sleeve within the handle and terminating in the inner end of the chamber, an arcuate member carried by said sleeve and engaging said other end of the bristle carrying plate, said handle being formed in two pieces, said sleeve being threaded through both portions of the handle, a rotatable shaft extending through the sleeve and into said recess in the end of the bristle carrying plate, a handle member carried by said shaft and rotatably mounted on the rear end of the brush handle, said shaft being threaded into the rear end of the brush handle.



1,902,411. FORCED DRAFT DEFLECTOR FOR GAS STOVES. JOSEPH A. MCCARTHY, Richmond Hill, N. Y. Filed Feb. 25, 1930. Serial No. 431,187. 10 Claims. (Cl. 126—299.)

1. In a flue cap and deflector, a collar adapted for mounting on the outlet flue of a gas range, a deflector hood having a forward side opening therein parallel with the forward side of the outlet flue, said hood being mounted



on the upper end of the collar and said hood having an air inlet opening in the bottom thereof entirely rearwardly of the forward side of the collar.

1,902,412. MECHANICAL IRRIGATOR. OTTO MELIN, Livingston, Mont., assignor of one-half to Clarence Allen, Livingston, Mont. Filed Apr. 14, 1931. Serial No. 530,124. 21 Claims. (Cl. 61—1.)

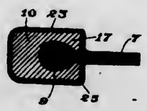
1. In a mechanical irrigator, a wheeled frame for movement through the field, and a dam carried by said frame for moving in the ditch.

1,902,413. METHOD OF AND APPARATUS FOR MULTIPLE STAGE GRINDING. ARTHUR F. MILLER, Jackson, Mich., assignor to Traylor Engineering & Manufacturing Company, Allentown, Pa., a Corporation of Delaware. Filed Apr. 29, 1931. Serial No. 533,842. 18 Claims. (Cl. 83—9.)

1. The process of comminuting material which comprises (a) reducing the material by subjecting the same

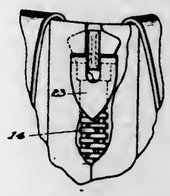
to the action of comminuting means, (*b*) separating the reduced product into undersize and oversize material, (*c*) returning the oversize for further reduction by said means, (*d*) separating the undersize into fine and coarse material, (*e*) subjecting the coarse material to the action of a second set of comminuting means to produce fine material, (*f*) and subjecting the fine of the undersize and the fine from said second set of comminuting means to the action of a third set of comminuting means.

1,902,414. GUY WIRE PROTECTOR. HERBERT E. MILLER, Allentown, Pa., assignor to Utilities Service Company, Inc., Allentown, Pa., a Corporation of Pennsylvania. Filed Feb. 28, 1931. Serial No. 519,187. 13 Claims. (Cl. 189—31.5.)



1. A device of the character described comprising a longitudinal body split to permit the insertion of a guy wire therein, means for fixing the lower portion of said body against movement with respect to the guy wire, a cap at the upper end of said body provided with a slot extending from the split in the body to a point substantially centrally of the cap, and a fixed retaining device adapted to contact with the guy wire at a point spaced from the cap longitudinally with respect to said body.

1,902,415. SWEETENED AND FLAVORED DESSERT MADE WITH RENNIN. KARL J. MONRAD, Little Falls, N. Y. Filed July 21, 1931. Serial No. 552,293. 4 Claims. (Cl. 99—11.)



1. A dry composition of matter for mixing with milk to form a sweetened and flavored dessert comprising suger, rennin, a flavoring ingredient, and calcium glycerophosphate.

1,902,416. SEPARABLE FASTENER. SAMUEL H. NORTON, Meadville, Pa., assignor to Hookless Fastener Company, a Corporation of Pennsylvania. Filed Aug. 4, 1930. Serial No. 472,846. 5 Claims. (Cl. 24—205.)

3. In a slide fastener, a pair of fastener stringers, cooperating series of metal fastener elements attached to the adjacent edges of said stringers, a slider movable along said elements for engaging and disengaging same, each of said elements having an interlocking head at one end and clamping jaws at the other end, the exterior edges at the jaw ends of said elements being normally sharp or burred, and a separate and individual coating of lacquer applied to the exterior surfaces of each individual element adjacent said corners to eliminate said sharp edges and thereby provide for smoother operation of said slider.

1,902,417. SLIDE FASTENER. HENRY J. PIEHL, Hudson, Ohio, assignor to Hookless Fastener Company, a Corporation of Pennsylvania. Filed Oct. 26, 1929. Serial No. 402,731. 12 Claims. (Cl. 24—205.)

1. In combination, an article having edges to be fastened, fastening means along said edges, a slider movable over said fastening means for engaging or disengaging the same, a slider retaining means including a member fixed to said article and extending longitudinally of the fastener, and means for pressing said member against said slider to retain the same in the desired position.

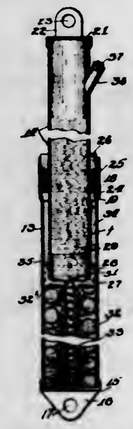
1,902,418. SURGICAL INSTRUMENT. ERNEST C. PILGRIM, Okmulgee, Okla., assignor to The Jensen-Salsbery Laboratories, Inc., Kansas City, Mo., a Corporation of Missouri. Filed Nov. 2, 1931. Serial No. 572,512. 7 Claims. (Cl. 128—350.)

2. A device of the character described comprising a drainage tube, a liquid supply tube extending through the drainage tube, a guide bearing a fixed relation to the supply tube and a sliding relation to the drainage tube, and a stop to prevent projection of the supply tube and guide beyond the front end of the drainage tube.

1,902,419. MOLDING COMPOSITION AND METHOD OF TREATING. ROY A. PLANT and MANLEY E. BROOKS, Midland, Mich., assignors to The Dow Chemical Company, Midland, Mich., a Corporation of Michigan. Filed July 30, 1931. Serial No. 554,154. 13 Claims. (Cl. 22—188.)

1. In a method of treating a molding composition to prevent excessive loss of moisture, the step which consists in incorporating in such composition a hygroscopic, fluorine free, halide salt.

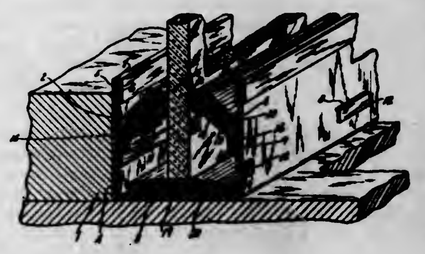
1,902,420. CUTTER CHAIN FOR MINING MACHINES. EDWARD W. RADIUS, Chicago, Ill., assignor to Goodman Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed Feb. 26, 1931. Serial No. 518,418. 9 Claims. (Cl. 262—33.)



1. In combination with a cutter chain block for mining machines, a body portion having a bit receiving slot therein opening to the forward end thereof, said body portion having a rearwardly and downwardly inclined face, a bit insertable in said bit receiving slot, and means for securing said bit in said bit receiving slot comprising a removable forward part arranged in alignment with said body portion having an upwardly extending projection

adapted to fit in said slot and engage the forward face of said bit and having an inclined plane surface adapted to abut said rearwardly and downwardly inclined face of

said body portion and adapted to engage the under portion of said bit and force said bit against said body portion and the forwardly facing face of said slot.



1,902,421. SHOCK ABSORBER. HERBERT RAWDON and WALTER E. BURNHAM, Wichita, Kans., assignors to Travel Air Company, a Corporation of Delaware. Filed Oct. 23, 1929. Serial No. 401,748. 2 Claims. (Cl. 267—34.)

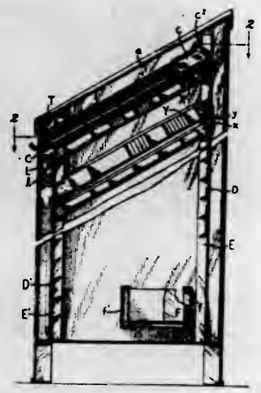
1. A shock absorber comprising a cylindrical member closed at its outer end; a tubular plunger member concentric with but of less diameter than the cylindrical member telescoped therein; a piston secured to said plunger member, engaging a wall of the cylindrical member, and having a convergent orifice therethrough for allowing the restricted flow of fluid between the cylindrical member and the plunger member; a shock absorbing spring at the outer end of said cylindrical member, said plunger member being adapted to be moved outwardly with its piston a distance away from said spring, whereby upon sudden movement of said plunger member into the cylindrical member such movement would be primarily dampened solely by the resistance to flow through said orifice and eventually assisted by the engagement of the plunger member with the spring; and relatively hard inserts in said piston head for taking up the wear due to the contact of the spring on the piston head.

1,902,422. GLASS RUN CHANNEL STRUCTURE. JAMES S. REID, Shaker Heights, Ohio, assignor to The Reid Products Company, Cleveland, Ohio, a Corporation of Ohio. Filed Aug. 6, 1931. Serial No. 555,518. 2 Claims. (Cl. 296—44.5.)

1. A glass run channel structure, comprising a non-metallic generally U-shaped channel member having side flanges and a base portion, finishing strips at the outer edges of said flanges, and a pair of glass-engaging lip pad strips, one for each of said side flanges, each of said lip pad strips comprising a main strip portion engaging the

inner surface of one of said side flanges, a glass-engaging padded lip portion secured to said main strip portion and means integral with said main strip portion for securing the same to one of said side flanges.

1,902,423. FLOWER HOLDING DEVICE. WILLIAM H. SELTZER, Lehighton, Pa. Filed Apr. 14, 1932. Serial No. 605,335. 16 Claims. (Cl. 47—39.)



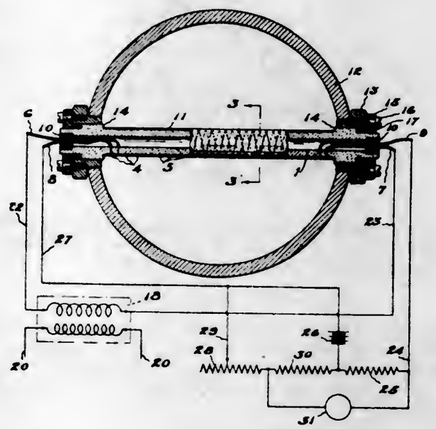
1. A flower holding device comprising a frame ring, supporting members carried by the frame ring to support said ring in an elevated position, and a reversible support disposed below the frame ring and adjustably engaging said supporting members, said support having differently positioned flower holder engaging and ground engaging devices on the opposite faces thereof.

1,902,424. DRAFTING TABLE. DONALD W. SHERMAN, Milwaukee, Wis., assignor to A. O. Smith Corporation, Milwaukee, Wis., a Corporation of New York. Filed Apr. 30, 1931. Serial No. 538,927. 9 Claims. (Cl. 45—109.)

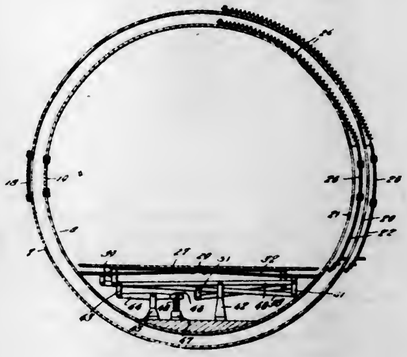
1. A table, comprising a table top, legs formed by struts spaced apart at the top and converging toward the bottom, said legs being arranged in pairs at each end of said table top and pivotally connected thereto to permit each pair to turn or oscillate relative to the other pair to adjust the legs to the floor.

1,902,425. MATRIX CABINET. ANTHONY J. STOUGHS, Queens Village, N. Y., assignor to Mergenthaler Linotype Company, a Corporation of New York. Filed June 19, 1931. Serial No. 545,381. 19 Claims. (Cl. 276—44.)

1. A matrix cabinet including in combination, a frame, a plurality of pairs of brackets supported by the frame and arranged equidistant from one another, a plurality of drawers arranged in the cabinet each supported by a pair of the brackets and adapted to occupy the space between the pair of brackets on which the drawer is supported and an adjacent pair of the brackets, and at least one drawer adapted to be supported by any pair of the brackets and to occupy a space greater than that between the pair of brackets on which the drawer is supported and an adjacent pair of the brackets.



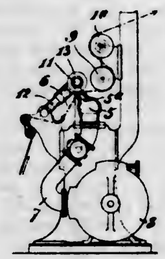
1,902,426. SMOKER'S FINGER GLOVE. ROSETTA RICH STRASSER, New York, N. Y. Filed July 25, 1931. Serial No. 553,112. 2 Claims. (Cl. 2—21.)



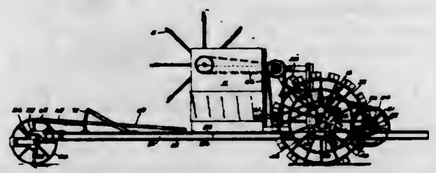
1. In combination with a finger glove having two fingers for covering adjacent fingers on one's hand, cigarette holding pieces mounted upon said fingers and having opposite curved recesses for engaging against the opposite sides of a cigarette, and means for adjustably holding said holding pieces comprising a ring within each finger and having ridges engaging through the materials of the fingers and into grooves in said holding pieces, the holding pieces being provided with prong portions extending substantially around the fingers.

1,902,427. FLOW METER. CHARLES B. SAWYER, Cleveland Heights, Ohio, assignor to The Brush Laboratories Company, Cleveland, Ohio, a Corporation of Ohio. Filed Jan. 10, 1930. Serial No. 419,826. 9 Claims. (Cl. 73—167.)

6. In a meter for determining a characteristic of a fluid, a thermally sensitive body arranged in heat interchanging relation with the fluid, said body including a heater winding having a negligible temperature coefficient of resistance, means for automatically supplying constant current to said heater winding to effect the interchange of heat between said fluid and body, and a resistance thermometer arranged to determine the average temperature of the surface of said body in contact with the fluid.



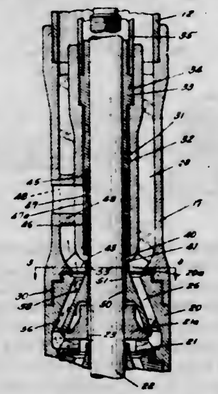
1,902,428. CABIN FOR AIRCRAFT AND THE LIKE. THEODORE A. VERSTEGEN, Buffalo, N. Y. Filed Apr. 29, 1932. Serial No. 608,271. 6 Claims. (Cl. 244—1.)



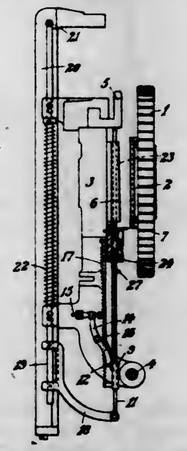
1. In a cabin construction, inner and outer spherical shells respectively provided with doors and windows with the doors and windows of the inner shell normally coinciding with the doors and windows of the outer shell, anti-friction means disposed between said shells, and stabilizing means for said inner shell.

1,902,429. MOISTENING CLOTH. EMIL WENZEL, Aue, Germany, assignor to Ernst Gessner Aktiengesellschaft, Aue, Germany, a Corporation of Germany. Filed May 11, 1931, Serial No. 536,624, and in Germany June 2, 1930. 1 Claim. (Cl. 26—46.)

A device for moistening cloth comprising a moistening drum formed of a perforated hollow cylindrical body and a porous liner surrounding said body, a supply pipe for water under pressure connected to the interior of said cylindrical body, a suction chamber extending along said drum and having a suction slot directed towards said drum, and means for passing the cloth to be treated between said drum and slot.



1,902,430. HARVESTER. ELMER E. WICKERSHAM, San Leandro, Calif., assignor, by mesne assignments, to Caterpillar Tractor Co., San Leandro, Calif., a Corporation of California. Filed Apr. 24, 1928. Serial No. 272,435. 22 Claims. (Cl. 56—23.)



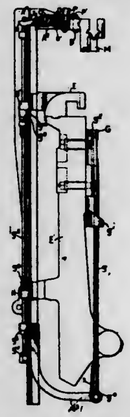
1. A windrow header comprising a box frame including a pair of beams joined substantially throughout their length by upper and lower plates, a body loosely pivoted to said frame, and means for fastening the axle of a standard header at a plurality of points to said body.

1,902,431. DEEP-WELL TURBINE LEAKPROOF AND SANDPROOF UPPER MAIN BEARING. ARTHUR R. WEIS, Huntington Park, Calif., assignor of one-half to Pacific Pump Works, Huntington Park, Calif., a Corporation of California, and one-fourth to George E. Bigelow, Huntington Park, Calif. Filed Apr. 23, 1928, Serial No. 272,097. Renewed July 5, 1932. 6 Claims. (Cl. 103—102.)

1. In a deep-well turbine pump, the combination of: a supporting structure having a discharge chamber, and a bearing chamber therein; a bearing in said bearing chamber; and a shaft journalled in said bearing and passing through a bore in said supporting structure, there being a longitudinal leakage passage between said shaft and the walls of said bore, said longitudinal leakage passage being communicable with said bearing chamber, said supporting structure also providing a radial leakage passage opening on said longitudinal leakage passage and on said discharge chamber, said radial leakage passage being narrower than said longitudinal leakage passage.

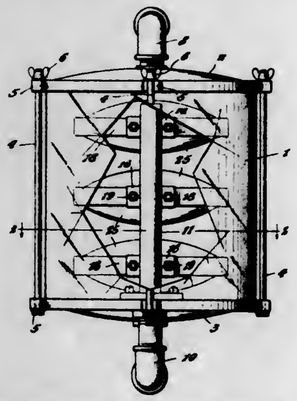
1,902,432. WIPING MECHANISM FOR MATRIX COMPOSING AND LINE CASTING MACHINES. CHRISTIAN AUGUSTUS ALBRECHT, Berlin, Germany, assignor to Mergenthaler Linotype Company, Brooklyn, N. Y., a Company of New York. Filed Oct. 1, 1931, Serial No. 566,248, and in Germany Oct. 7, 1930. 10 Claims. (Cl. 199—62.)

1. Wiping mechanism for matrix composing and line casting machines, with a common wiper for the mold and trimming knives, characterised by the fact that the wiper is pivotally supported by the mechanism actuating it, and is so controlled, that when moved in one direction, it will be brought into position to effect the wiping of the mold, and when moved in the other direction, will bear against and wipe the knives.



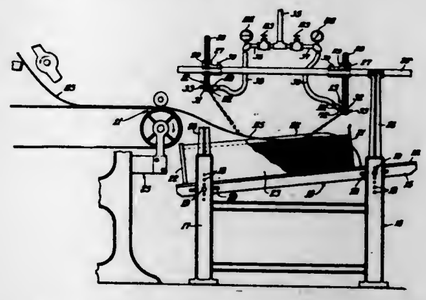
1,902,433. NIPPLE. FRANKLIN BROWN, Philadelphia, Pa., assignor to General Health Corporation, Philadelphia, Pa., a Corporation of Delaware. Filed July 2, 1931. Serial No. 548,428. 2 Claims. (Cl. 128—252.)

1 A rubber nipple comprising a thick, upwardly tapering relatively stiff breast portion non-collapsible under



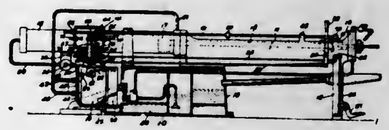
pressure to which it will ordinarily be subjected in use while applied to a bottle, a flexible elastic mouth piece extending from the top of the breast portion, a flexible elastic attaching flange at the base of the breast portion, and a flexible elastic connecting portion between the flange and the base of the breast portion, the attaching flange being sufficiently thin to be rolled up against the breast portion preparatory to applying the nipple to the bottle, the breast portion being non-collapsible under the pressure exerted thereon while the attaching flange is being rolled up and while it is being rolled down into engagement with the bottle.

1,902,434. KNIFE WIPER. HAROLD A. BURT, St. Albans, N. Y., assignor to Mergenthaler Linotype Company, a Corporation of New York. Filed July 21, 1931. Serial No. 552,145. 11 Claims. (Cl. 199—62.)



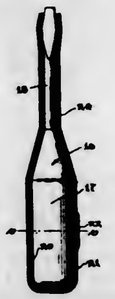
1. In a slug casting machine, the combination of a line transporter, means for varying the casting position of the transporter, slug trimming knives, means for cleaning the knives, and operative connections between the transporter and the knife cleaning means, said connections including an adjustable element carried by the transporter and arranged to engage a stationary part of the machine whereby the extent of the knife cleaning action may be kept uniform regardless of the casting position of the transporter.

1,902,435. FILTER. WILLIS G. ELDER, West Somerville, Mass. Filed July 13, 1931. Serial No. 550,533. 1 Claim. (Cl. 210—165.)



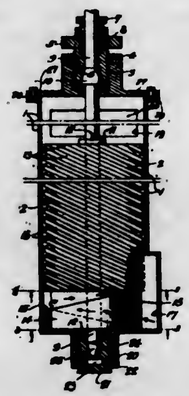
A filter comprising a casing, a stand pipe within the casing, the casing being provided with an inlet at one end and with an outlet at its opposite end alined with the stand pipe and the stand pipe having an opening through its side and having flattened lugs at the sides of said opening, a ring having an opening alined with the opening in the stand pipe and having flattened lateral projections at the sides of said opening bearing against the flattened lugs on the stand pipe and being further provided in its upper and lower sides with annular grooves, fastening devices inserted through the flattened projections on the ring into the lugs on the stand pipe, reticulated frames having their edges disposed within the respective grooves in the ring and their areas bowed from the ring, filtering cloths extending over said frames with their edges fitted in the grooves in the ring, and retainers engaged in the edge portions of the filtering cloths to stretch the same over the reticulated frames and secure the cloths in the grooves in the ring.

1,902,436. METHOD OF AND APPARATUS FOR STACKING SHEETS. HERMAN L. JOACHIM, Ridgefield Park, N. J. Filed Aug. 3, 1931. Serial No. 554,649. 16 Claims. (Cl. 271—74.)



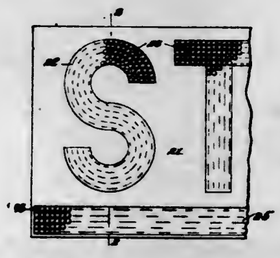
1. A device of the class described comprising a support for a pile of sheets, conveying means terminating adjacent the support and disposed so as to project the sheets over such support in a plane substantially aligned with the plane of the conveying means, a conduit adapted to be connected to a source of air pressure disposed above the plane of the conveying means and transversely to its direction of travel, a port in the conduit for directing an air jet across the width of the sheets and biased in the direction of travel of the sheets whereby to facilitate the delivery and laying of the sheets on the support.

1,902,437. HYDRAULIC DRIVE. JOHN P. FERRIS, Milwaukee, Wis., assignor to The Oilgear Company, Milwaukee, Wis., a Corporation of Wisconsin. Filed Sept. 29, 1924. Serial No. 740,560. 5 Claims. (Cl. 60—52.)



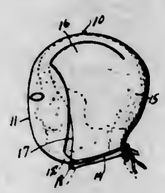
1. In a hydraulic drive for machine tools and the like the combination of a driven member, a hydraulic motor cylinder, a differential piston therein coacting therewith to drive said member, said piston having two opposite faces having unequal pressure areas, a hydraulic pump, and hydraulic connections though which the entire discharge from said pump is delivered directly to said cylinder to effect operation of said member, said connections including valve means selectively operable to subject one only of said faces or both of said faces to the delivery pressure of said pump, the difference in the areas of said faces being such as to effect operation of said member at a greater rate when both of said faces are subjected to said pressure than when said one only of said faces is subjected to said pressure.

1,902,438. INSULATED ARTICLE. JOHN RUSSELL FOLEY, New York, N. Y. Filed Jan. 23, 1932. Serial No. 588,425. 5 Claims. (Cl. 145—61.)



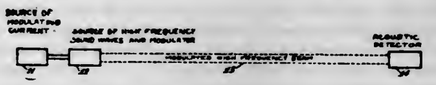
3. A conventional tool coated with electric insulating material, consisting mainly of cellulose acetate, and a tubular lamination of absorbent shock absorbing material embedded within said insulating material and spaced from the metal of the tool by said insulating material.

1,902,439. FLYING WORM STEAM MOTOR. LELAND L. FOSS, Statesboro, Ga., assignor, by direct and mesne assignments, of fourteen per cent to Edward T. Skeffington, fourteen per cent to Bert H. De Loach, and three per cent to Arthur H. Barrington, Savannah, Ga., fourteen per cent to Lee V. Graham, Chatham County, Ga., and five per cent to Sam J. Foss, Statesboro, Ga. Filed Dec. 30, 1930. Serial No. 505,604. 2 Claims. (Cl. 253—65.)



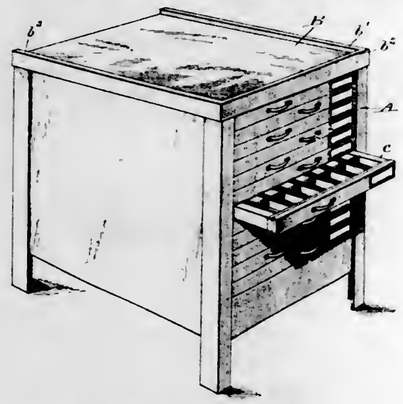
1. In a worm steam motor, the combination of a cylindrical casing, bearings on the ends of the casing, a shaft rotatably mounted in said bearings, a drum welded on the shaft, spiral blades integral with the drum and extending to the inside wall of the casing to provide spiral steam channels intervening between the worm blades, a wedge-like steam guide member affixed to the inside wall of the motor casing below the drum and guiding the inflowing steam to the open lower ends of the spiral steam channels of the drum, means for conducting steam to the lower portion of the casing and directly into the mouths of the steam spiral channels, means for discharging exhaust steam from the upper portion of the casing after passing through the steam channels of the drum, the means for conducting steam to the lower portion of the casing comprising a passage having one wall thereof aligned with the periphery of the adjacent portion of the drum, the end of the steam passage being of restricted size to increase the speed and power of the steam current applied to the worm blades of the drum.

1,902,440. SIGN. EDWIN R. GILL, Jr., Yonkers, N. Y., assignor to Prismo Holding Corporation, a Corporation of New York. Filed Jan. 15, 1932. Serial No. 586,827 9 Claims. (Cl. 40—130.)



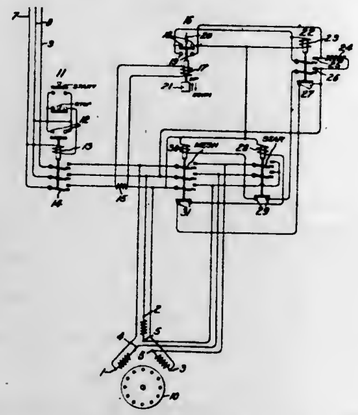
7. In a sign a portion covered with a reflecting layer and a plurality of relatively small substantially symmetrical reflex reflecting elements embedded to about half their depth in the reflecting layer.

1,902,441. PROTECTIVE HEAD COVERING. RONALD GIULIANO, South Orange, N. J. Filed Apr. 23, 1932. Serial No. 607,195. 6 Claims. (Cl. 2—174.)



1. A protective head covering formed to provide a front, face covering portion and a portion covering the top, back and sides of the head, the upper end of the face-covering portion above the eyes of the wearer being connected to the portion covering the top of the head but separated from a point above the eyes of the wearer from the portions covering the sides of the head, and strings adapted to encircle the neck and hold the head protector in place.

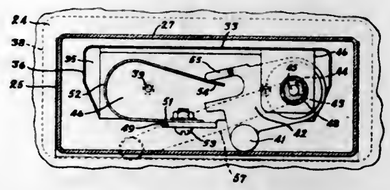
1,902,442. SOUND REPRODUCER. ALFRED N. GOLDSMITH and IRVING WOLFF, New York, N. Y., assignors to Radio Corporation of America, a Corporation of Delaware. Filed Nov. 5, 1928. Serial No. 317,149. 30 Claims. (Cl. 181—0.5.)



1. An acoustic system comprising a source of modulated super-audible frequency sound waves and an acoustic detector for obtaining an audible frequency sound wave therefrom.

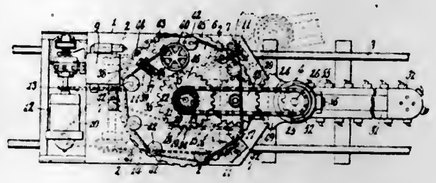
1,902,443. MATRIX CABINET. FRED C. GRUMMAN, Norwalk, Conn., assignor to Mergenthaler Linotype Company, a Corporation of New York. Filed July 8, 1931. Serial No. 549,882. 10 Claims. (Cl. 276—44.)

1. A matrix cabinet drawer for storing matrices having ears projecting from the edges thereof, and provided with means for supporting the matrices by their edges in an upright position independent of their projecting ears.



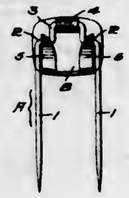
1,902,444. METHOD OF OPERATING POLYPHASE ALTERNATING CURRENT MOTORS. HENRY M. HOBART, Niskayuna, FREDERICK O. STEBBINS, Schenectady, N. Y., and ARTHUR F. GETTELMAN, Duluth, Minn., assignors to General Electric Company, a Corporation of New York. Filed July 19, 1929. Serial No. 379,528. 10 Claims. (Cl. 172—274.)

1. In a motor control system, a source of alternating current, an alternating current motor having primary windings, switching means between said motor and source of supply adapted in different positions to connect the primary winding of said motor to said source so as to impose different volts per turn on such windings, and electromagnetic control means responsive to the load on said motor for controlling said switching means to increase the volts per turn on said windings as the load increases beyond a predetermined amount, said control means having a time delay action.



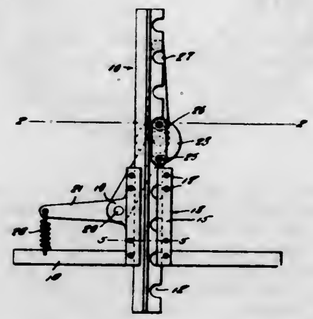
10. The method of operating an alternating current motor having a primary winding, which with motor loads below a predetermined value consists in impressing on the primary winding approximately 30% less volts per turn than would be impressed if the volts per turn were to remain substantially constant during the entire operating load range of the motor, and which with motor loads above the predetermined value consists in impressing on the primary winding approximately 22% more volts per turn than would be impressed if the volts per turn were to remain substantially constant during the entire operating load range of the motor.

1,902,445. REFRIGERATING APPARATUS. GEORGE F. HOFFERBERTH, Dayton, Ohio, assignor to Frigidaire Corporation, Dayton, Ohio, a Corporation of Delaware. Filed Feb. 27, 1931. Serial No. 518,686. 16 Claims. (Cl. 62—108.5.)



1. A refrigerating apparatus comprising in combination, an evaporator, a container to be cooled by said evaporator, a support for said container, means for separating the container from said support, said means including an arm pivotally mounted to said container at a point remote from the vertical center thereof, said arm including a camming portion adapted to engage said support at a point between the vertical center of said container and said pivot point of said arm, and handle means having one end thereof secured to the pivot point of said arm for actuating said camming portion of said arm into engagement with said support.

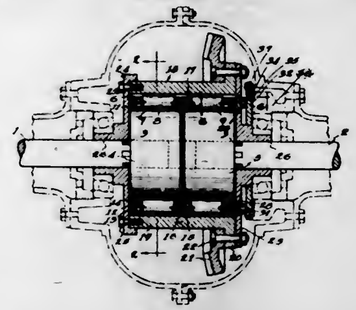
1,902,446. MINING APPARATUS. MORRIS P. HOLMES, Claremont, N. H., assignor to Sullivan Machinery Company, a Corporation of Massachusetts. Filed Feb. 7, 1929. Serial No. 338,286. 9 Claims. (Cl. 262—28.)



2. In a mining apparatus, the combination of a support, a second support mounted on said first support for rotation upon a vertical axis, kerf cutting mechanism including a cutter bar pivotally mounted on said second support for swinging movement upon an axis parallel to the axis of rotation of said second support, means for effecting rotation of said second support upon its axis of rotation to effect swinging movement of said cutter bar about the axis of rotation of said second support, and means operatively connected to said supports and said cutter bar for swinging automatically said cutter bar upon its own pivotal axis relative to said second support as said second support is rotated, said automatic bar swinging means including a gear member secured to said first support, a rotatable gear carried by said second support and meshing with said gear member, and a gear member connected to said cutter bar and meshing with said gear.

1,902,447. PIN FASTENER. GEORGE A. HOLMES, Newton, Mass., assignor to United-Carr Fastener Corporation, Cambridge, Mass., a Corporation of Massachusetts. Filed Jan. 9, 1932. Serial No. 585,755. 3 Claims. (Cl. 24—152.)

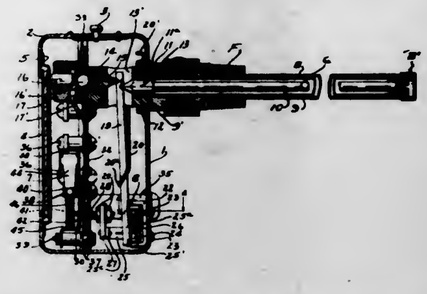
3. A pin fastener comprising, in combination, an attaching part formed from a single piece of wire bent to provide two spaced sharp pointed legs, a cross-bar connecting said legs at one end, two shoulders each extending at right angles from one leg of the attaching part, a U-shaped loop formed in said cross-bar between said shoulders, a plate part formed from a single piece of metal and having concealed at the under side a hinge portion engaging said loop to pivot the plate to the attaching part and two yieldable stabbing prongs extending away from the plate and adapted to enter the material to which the pin is to be attached and said stabbing prongs having detent means engaging said shoulders to lock the plate in position when said stabbing prongs are in operating position.



1,902,448. LIFTING JACK. ANTHONY HORVATH, Wallingford, Conn. Filed July 8, 1931. Serial No. 549,516. 3 Claims. (Cl. 254—122.)

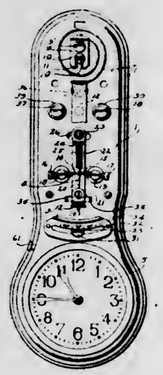
2. In a jack, a bar provided with a series of relatively spaced notches, a lifting device provided with means engaging the bar to constrain the lifting device to shift longitudinally of the bar, a lever pivotally mounted on the lifting device, a member rotatably mounted on the lever, and having a pair of relatively spaced pins to engage the notches of the bar, and a handle for rotating the member.

1,902,449. COMBINED POSITIVE DRIVE WITH DIFFERENTIAL CHARACTERISTICS AND FREE-WHEELING. HUGHEY V. HUGHES, Oakland, Calif., assignor of one-half to John A. Weaver, Oakland, Calif. Filed Dec. 8, 1931. Serial No. 579,804. 13 Claims. (Cl. 74—7.)



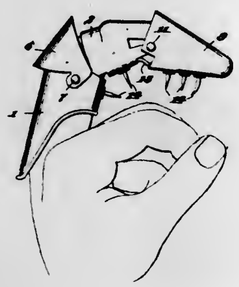
1. In combination, a driven member, a control member, a driving member, rollers having spring shafts carried by the control member for causing the rollers to yieldingly contact with the driven member, and means on the driving member and cooperating with the rollers for locking the drive and driven members together when the drive member is rotated in either direction.

1,902,450. RESERVING OF ANIMAL FIBERS. JOHANN HUISMANN and HUGO SCHWEITZER, Wiesdorf near Cologne-on-the-Rhine, Germany, assignors, by mesne assignments, to General Aniline Works, Inc., New York, N. Y. Filed Mar. 26, 1930, Serial No. 439,216, and in Germany Mar. 30, 1929. 5 Claims. (Cl. 8—5.)



1. Process for reserving animal fibers in mixed textile fabrics with vegetable fibers which comprises applying to the fibers a water soluble aryl-sulfonic or aryl-carboxylic acid amide in which at least one hydrogen atom of the amino group is replaced by a substituent of the group consisting of alkyl, aryl and aralkyl and which cannot be coupled with diazo compounds.

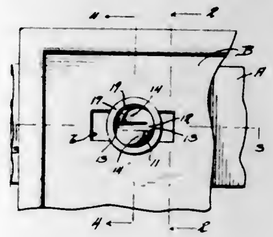
1,902,451. THERMOSTATIC SWITCH FOR USE WITH HEATERS. ROY W. JOHNSON, Milwaukee, Wis., assignor, by mesne assignments, to Minneapolis-Honeywell Regulator Company, Minneapolis, Minn., a Corporation of Delaware. Filed Apr. 19, 1929. Serial No. 356,580. 7 Claims. (Cl. 200—137.)



1. In combination, a thermostatic element, an electric switch and mechanism for operating the switch in accordance with movement of said thermostatic element, said mechanism including a lever associated with said thermostatic element to be moved thereby, a spring for exerting a bias upon the lever in opposition to the force exerted by the thermostatic element, a second lever associated in operative relation with said switch, and a second spring for biasing said second lever to maintain the same in abutting relation with the movable end of said first mentioned lever and to bias the switch to one position whereby movement of the thermostatic element controls the operation of the switch.

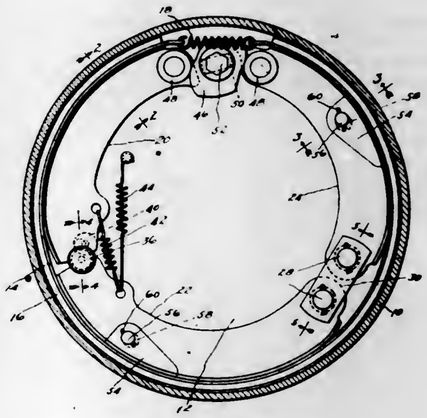
1,902,452. THERMOSTATIC SWITCH. ROY W. JOHNSON, Milwaukee, Wis., assignor, by mesne assignments, to Minneapolis-Honeywell Regulator Company, Minneapolis, Minn., a Corporation of Delaware. Filed Apr. 19, 1929. Serial No. 356,581. 30 Claims. (Cl. 200—139.)

1. In an electric switch of the character described, the combination of a thermostat, a movable contact member, a spring acting upon said movable contact member and adapted to have varying angular relation with respect thereto to cause said contact member to move from one position to another with a snap action, and means operable in response to movement of said thermostat for varying said angular relation and also operable independently of said thermostat for varying said angular relation to effect the temperature adjustment.



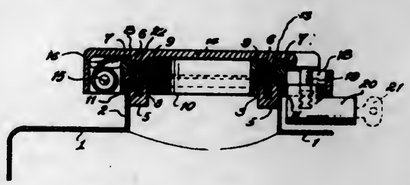
1,902,453. EEL GRIP. HARRY N. KAISER, Washington, D. C. Filed Sept. 1, 1932. Serial No. 631,407. 5 Claims. (Cl. 294—25.)

1. In an eel holder, a flexible finger member having right front sections over the three phalanges and prongs projecting from two or more of said front sections.



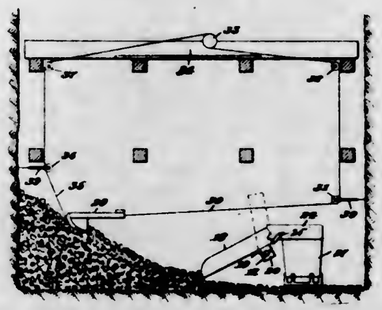
1,902,454. SELF-LOCKING BOLT. THOMAS A. KIRTON, Jacksonville, Fla., assignor to Lanier-Kirton Co. Inc., Jacksonville, Fla., a Corporation of Florida. Filed May 21, 1931. Serial No. 539,100. 6 Claims. (Cl. 40—125.)

1. The combination with two elements, each having a slot, of a bolt passing through the slots and having a ratchet nick in its head, a nut engaging the bolt and a washer through which the bolt passes, the confronting faces of the washer and nut having diametrically extending projecting portions extending into the slots in the said elements to thus prevent any rotation of the nut or washer



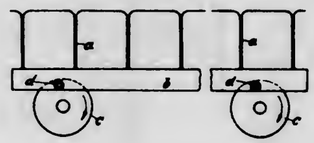
when the nut is screwed home, the outer face of the washer being recessed to receive the head of the screw and surround its periphery.

1,902,455. BRAKE. LUDGER E. LA BAIE, South Bend, Ind., assignor to Bendix Brake Company, South Bend, Ind., a Corporation of Illinois. Filed Jan. 30, 1928. Serial No. 250,353. 22 Claims. (Cl. 183—78.)



1. A brake comprising, in combination, a drum, a flexible friction band, a plurality of shoes engaging said band and arranged to force the band against the drum, an applying device engaging said shoes, said band being arranged to anchor on one of the shoes when the drum is turning in one direction and on a different shoe when the drum is turning in the other direction, and a return spring for contracting the band bridging across the applying device.

1,902,456. TANK COVER. WILLIAM HENRY MATTHEWS, Fort Valley, Ga. Filed Oct. 14, 1931. Serial No. 568,843. 5 Claims. (Cl. 220—55.)

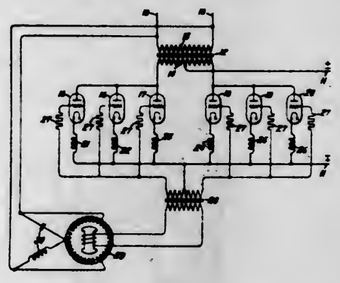


1. A tank inlet having a turned over mouth portion, a ring extending over the turned over portion, a block separable from the tank inlet and ring and insertible under the turned over portion and means for attaching the ring and the turned over mouth portion of the tank inlet to the block through said turned over portion.

1,902,457. APPARATUS FOR LOADING BROKEN ROCK. ALBERT MENDELSOHN, Painesdale, Mich. Filed Oct. 17, 1932. Serial No. 638,205. 2 Claims. (Cl. 214—105.)

1. An ore loading apparatus for mines or shafts comprising an extensible and contractible post or bar to be fixed to the sides of a mine shaft or drift, an inclined guideway or slide adjustably mounted on said bar or post, a hinged, open-bottomed receiving pan open to said guideway, a weighted scraper constructed to drag broken ore from a pile up said guideway to said pan for delivery to an ore-receiving bucket or skip, and means for moving said scraper to and fro in a loading operation.

1,902,458. THREAD GUIDE. KARL MEYER-GAUS, Barmen, Germany, assignor to American Bemberg Corporation, New York, N. Y. Filed Mar. 16, 1929, Serial No. 347,502, and in Germany Mar. 19, 1928. 8 Claims. (Cl. 242—158.)

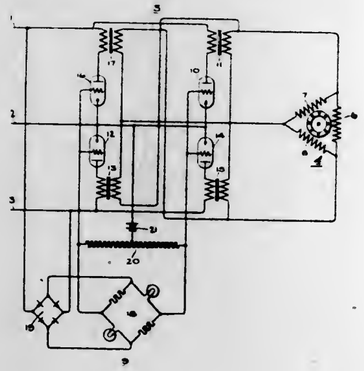


2. A thread guide for reeling threads on reels, bobbins and the like, comprising a bar, a plurality of wire stirrups mounted thereon so as to form slots between adjacent stirrups and means for imparting to the thread guide a motion in the direction of the slots and a motion at right angles thereto.

1,902,459. GUY WIRE ANCHOR CONNECTION. HERBERT EDWARD MILLER, Allentown, Pa. Filed Dec. 14, 1931. Serial No. 580,976. 14 Claims. (Cl. 24—129.)

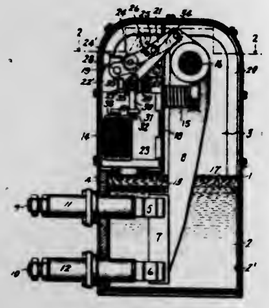
5. The combination with a guy clamp, of an anchor connection, a head carried by said connection adjacent the upper end thereof and having its lower end offset from the connection to form therewith a saddle around which the guy wire is adapted to be looped, and opposite inwardly opening hooks carried by the head for engaging the strands of the cable on opposite sides of the loop thereof, the upper extremity of said hooks being engageable against the lower end of the guy clamp to prevent downward movement thereof with respect to said connection.

1,902,460. ELECTRIC TRANSLATING CIRCUITS. ALBERT H. MITTAG, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Sept. 14, 1932. Serial No. 634,001. 12 Claims. (Cl. 175—363.)



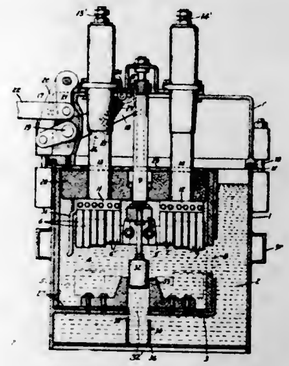
1. In an electric translating circuit, a pair of grid controlled vapor electric valves connected in parallel, a grid circuit for each of said valves, and means for forcing a distribution of the current between said valves in accordance with their ratings comprising means responsive to the current in each valve for modifying the action of the grid circuit of the other valve.

1,902,461. THERMOSETTING RESINOUS PRODUCT AND METHOD OF MAKING THE SAME. EMIL E. NOVOTNY, Philadelphia, Pa., assignor to John Stogdell Stokes, Spring Valley Farms, Huntingdon Valley, Pa. Original application filed June 10, 1930, Serial No. 460,282. Divided and this application filed Sept. 6, 1930. Serial No. 480,281. 37 Claims. (Cl. 92—21.)



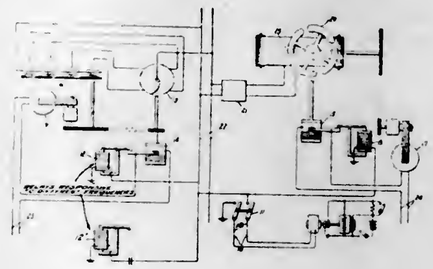
1. A sheetlike body comprising a fibrous material and a substantially nongritty natural gum of plant origin containing free phenolic hydroxyl groups and a hardening agent.

1,902,462. ELECTRICAL CONTROL SYSTEM. HARRY L. PALMER, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Jan. 29, 1931. Serial No. 512,102. 6 Claims. (Cl. 172—274.)



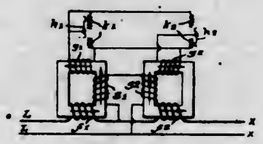
1. In combination, a three phase alternating current supply circuit, a three phase load, means including a single pair of electric valves for connecting said load to said circuit, means including a single pair of electric valves for connecting said load to said circuit with reversed phase rotation, and means for selectively rendering each pair of valves conductive.

1,902,463. ELECTRIC CIRCUIT BREAKER. WILLIAM E. PAUL, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Mar. 3, 1931, Serial No. 519,757, and in Great Britain Jan. 13, 1931. 7 Claims. (Cl. 200—150.)



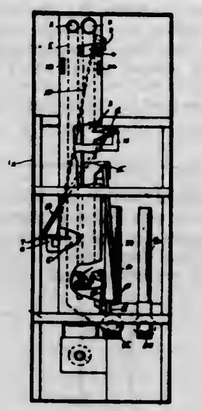
1. An electric circuit interrupter comprising a pair of contacts and a bridging member coacting therewith forming two breaks in series, a common pressure-confining casing for said contacts containing an insulating liquid in which said contacts are immersed, said casing provided with a pressure relief opening opposite and adjacent one of said breaks arranged so that the arc is drawn transversely of said opening, the other of said breaks being remotely positioned with respect to said relief opening so that pressure generated by arcing at said last-named break is effective to blast the arc formed at said first-named break through said relief opening by a high velocity jet of insulating liquid.

1,902,464. ELECTRIC CIRCUIT BREAKER. WILLIAM E. PAUL, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed July 28, 1931. Serial No. 553,603. 11 Claims. (Cl. 200—150.)



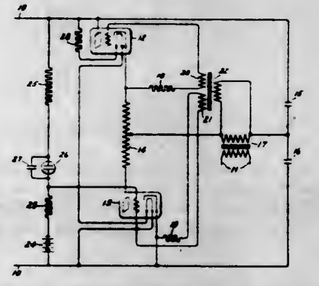
1. An electric circuit breaker of the fluid-blast type comprising a pressure confining casing containing an insulating liquid, said casing provided with a pressure relief opening, relatively movable contacts forming a pressure generating arc and a second arc within said casing, and means maintaining fixed the length of said pressure arc during the initial circuit opening movement, the pressure forcing insulating liquid from said casing through said relief opening at high velocity to interrupt said second arc.

1,902,465. CENTRALIZED METER RECORDING. WILLIAM H. PRATT, Lynn, Mass., assignor to General Electric Company, a Corporation of New York. Filed Aug. 12, 1930. Serial No. 474,746. 23 Claims. (Cl. 234—35.)



1. A system for recording at a central station the indication of an integrating meter having a plurality of dials, comprising contacts and a contact actuating device, positioned in accordance with the dial indication associated with each of said dials, an independently driven mechanism for operating said devices, an electro-responsive device located at the central station, a circuit connecting said contacts and said electro-responsive device, recording means including recording elements corresponding to each of said dials successively actuated by said electro-responsive device, and means for synchronizing said mechanism and said recording means whereby the time of actuation of each recording element is dependent upon the indication of its corresponding dial.

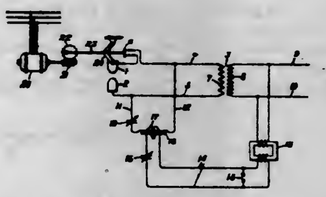
1,902,466. APPARATUS FOR REGULATING ALTERNATING CURRENT CIRCUITS. FERENCZ RATKOVSZKY, Budapest, Hungary, assignor, by mesne assignments, to General Electric Company, Schenectady, N. Y. Filed May 28, 1928, Serial No. 281,056, and in Hungary May 28, 1927. 4 Claims. (Cl. 171—119.)



1. Apparatus for regulating the tension of an alternating current circuit, comprising transformer means providing two closed flux paths, a series coil for each path, a control coil for each path, a voltage winding connected to the alternating current circuit to be regulated in such manner that the flux generated by the winding flows through the series coils of the separate paths in opposite directions relative to their direction of winding, and means for short circuiting one of said control coils, said means including a variable resistance arranged to regulate the tension in the alternating current circuit.

1,902,467. COMBINED VENDING AND CHANGE MAKING MACHINE. LEWIS J. ROSS, Rochester, N. Y. Filed Apr. 30, 1930. Serial No. 448,681. 8 Claims. (Cl. 194—10.)

1. In a combined vending and change making machine the combination of a magazine adapted to contain packages to be vended, a coin tube containing coins of predetermined denomination, a coin chute having a coin slot for the insertion of a coin of another predetermined denomination into said coin chute, an electric switch, a lever projecting into said coin chute and operated on the passage of a coin thru said coin chute to close said switch, a second lever, a link connecting said first lever with said second lever and operable to project said second lever into said coin chute on the operation of said first lever by a coin passing thru said coin chute, said second lever being operated by the coin after said coin has operated said first lever, said second lever operating to return said first lever to its original position and simultaneously open said switch on the operation of said second lever by said coin, a solenoid operated on the closing of said switch to eject a package from said magazine and a coin from said coin tube.

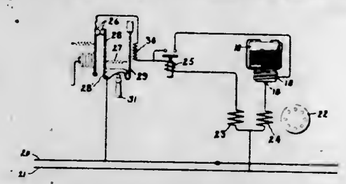


1,902,468. ELECTRIC POWER CONVERTING APPARATUS. CAMIL A. SABBAH, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Oct. 16, 1930. Serial No. 489,149. 12 Claims. (Cl. 175—363.)

2. In combination with an electric power converting apparatus including a direct current circuit and a plurality of electric valves adapted to be rendered conductive in a predetermined sequence, means for maintaining one of said valves non-conducting, and means responsive to the potential of the direct current circuit for overcoming said first mentioned means to render said valve conductive a predetermined time interval after initiation of the operation of said apparatus.

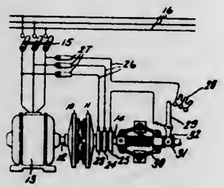
4. In combination with an apparatus for converting direct current into alternating current including a direct current circuit and a plurality of electric valves serially connected across said source, said valves being provided with cathodes heated from said direct current circuit, means for rendering one of said valves non-conducting to interrupt the operation of the apparatus upon a decrease in the potential of the direct current circuit to such a value that the valves are operating beyond their normal capacity of electron emission.

1,902,469. WELDING APPARATUS. JOHN A. SEEPE, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed July 22, 1931. Serial No. 552,425. 7 Claims. (Cl. 219—4.)



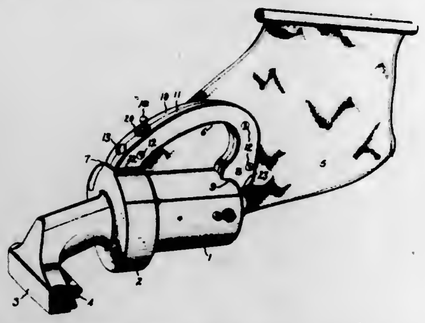
1. Resistance welding apparatus comprising a plurality of work engaging electrodes, means for moving said electrodes into and out of engagement with the work to be welded, a source of welding current, means for connecting said source of welding current to said electrodes, and means including an auxiliary source of current for establishing the flow of welding current through said electrodes and said work as soon as said electrodes engage said work.

1,902,470. VOLTAGE COMPENSATED MOTOR STARTER. CHRISTIAN STRENSTRUP, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Mar. 25, 1930. Serial No. 438,858. 7 Claims. (Cl. 172—279.)



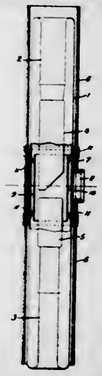
1. In combination a split phase motor having a running winding and a starting winding, electroresponsive means in series with said running winding and con-

trolled by the current therethrough for controlling energization of said starting winding, a resistor unit comprising a fixed resistance and a self reducing variable resistance for splitting the phase to start the motor



and limiting the current through said starting winding, said resistor decreasing its impedance on low voltage to permit sufficient current to start the motor and thermostatic switch means for energizing said motor.

1,902,471. ELECTROMAGNETIC CLUTCH. ELIHU THOMSON, Swampscott, Mass., assignor to General Electric Company, a Corporation of New York. Filed Sept. 3, 1929. Serial No. 389,891. 11 Claims. (Cl. 172—239.)

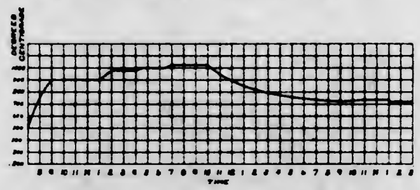


1. A clutch comprising a pair of members mounted for relative rotation and for mechanical driving engagement with each other, a polyphase winding on one of said members in inductive relation with the other member, means for energising said winding from a polyphase source of supply whereby said members are clamped together and a variable resistance in circuit with one phase of said winding for independently controlling the energization of said phase to control the slip between said members.

1,902,472. HANDLE FOR VACUUM CLEANERS. JULIUS TUTEUR, Cleveland, Ohio, assignor to Electric Vacuum Cleaner Company, Inc., Cleveland, Ohio, a Corporation of New York. Filed July 21, 1930. Serial No. 469,509. 1 Claim. (Cl. 247—13.)

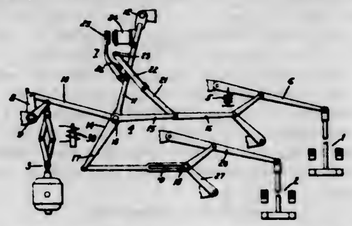
A handle adapted to be secured to the upper side of a motor driven vacuum cleaner for sustaining its weight when in use, and comprising a pair of counterpart members extending longitudinally of the cleaner and defining between them an elongated channel, the front end of said channel having walls arranged to form a clamping means, seats formed at both ends of the handle for engagement with the cleaner, a switch held by said clamping means, circuit wires extending from the switch through the channel and one of the seats into the cleaner whereby they are fully protected and concealed from view, and means for securing both ends of the handle to the cleaner.

1,902,473. DEVICE FOR SUPPORTING METAL PARTS WITHIN A VACUUM TUBE. ALFRED UNGELENK and WALTER HOFMANN, Thuringia, Germany, assignors to General Electric Company, a Corporation of New York. Filed Apr. 11, 1930, Serial No. 443,587, and in Germany Apr. 20, 1929. 2 Claims. (Cl. 250—35.)



1. The combination of a cylindrical envelope containing a plurality of cooperating electrodes in endwise opposed relation, a cylindrical metal member surrounding the discharge space between the electrodes and concentrically mounted within the envelope, means for supporting said member, said means comprising a plurality of wires equidistantly spaced about the periphery at both ends of said member, said wires extending radially from the member and secured to the peripheral surface of the envelope at positions contained wholly within the length of said member.

1,902,474. PROTECTIVE COVER FOR X-RAY TUBES. ALFRED UNGELENK and WALTER HOFMANN, Thuringia, Germany, assignors to General Electric Company, a Corporation of New York. Filed Apr. 11, 1930, Serial No. 443,588, and in Germany Apr. 19, 1929. 3 Claims. (Cl. 250—35.)



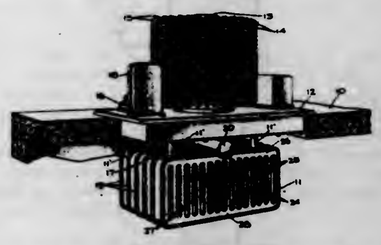
1. A wheel having a plurality of spokes and a rim fastened thereto, the spokes being of a material for which the ratio $\frac{E}{\rho}$ is less than the corresponding ratio for the material forming the rim, E representing the modulus of elasticity and $\frac{E}{\rho}$ the density of the respective materials.

1,902,475. SHORT CYCLE ANNEALING PROCESS FOR PRODUCING MALLEABLE IRON. IRVING R. VALENTINE, Erie, Pa., assignor to General Electric Company, a Corporation of New York. Filed Apr. 9, 1930. Serial No. 442,921. 5 Claims. (Cl. 148—21.8.)

1. The method of producing malleable cast iron which comprises heating white cast iron at an elevated temperature for a period of time long enough to cause the cementite in the iron to go into solid solution, cooling the casting in about 6 to 11 hours to a temperature of about 720° C. and raising the temperature of the casting to 730° C. in a relatively short time and maintaining the casting at 730° C. for a few hours.

1,902,476. CIRCUIT CONTROLLING APPARATUS. LUDWIG S. WALLE, Lansdowne, Pa., assignor to General Electric Company, a Corporation of New York. Filed Aug. 18, 1930. Serial No. 475,919. 7 Claims. (Cl. 200—92.)

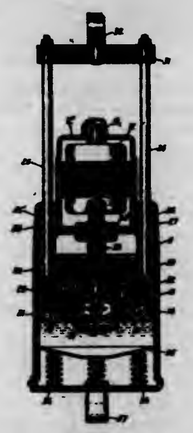
1. Circuit controlling apparatus comprising a plurality of circuit breakers, actuating means including thrust transmitting structure for effecting closing of one of said breakers, a lost-motion mechanical connection between said thrust transmitting structure and the other of said breakers, and spring means adapted to be charged by said actuating means during the said switch closing operation for causing opening of said first breaker and closing of said second breaker through said lost motion connection in response to collapse of said thrust transmitting structure.



1,902,477. MANUFACTURE OF SYNTHETIC RESINS. HENRY WILLIAM HUGH WARREN, Coventry, REGINALD NEWBOUND, Rugby, and ALFRED T. WARD, Derby, England, assignors to General Electric Company, a Corporation of New York. Filed July 31, 1930, Serial No. 472,184, and in Great Britain Nov. 29, 1929. 8 Claims. (Cl. 260—8.)

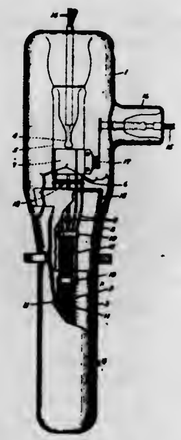
7. The process which comprises heating a fusible alkyd resin with a substance of the class consisting of organic acid chlorides and anhydrides of monobasic carboxylic acids to accelerate the conversion of the resin from the fusible to the infusible state.

1,902,478. MANUFACTURE OF HOT CATHODES FOR ELECTRIC DISCHARGE DEVICES. ERICH WIEGAND, Berlin-Waidmannslust, Germany, assignor to General Electric Company, a Corporation of New York. Filed Feb. 11, 1932, Serial No. 592,450, and in Germany Feb. 14, 1931. 6 Claims. (Cl. 75—1.)



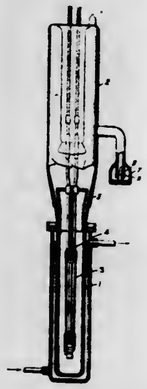
1. The process of producing a metallic structure suitable for use as a hot cathode which comprises pressing a powdered metal of high melting point thereby to provide a porous body and impregnating said body with molten material comprising an alkaline earth metal.

1,902,479. REFRIGERATOR CABINET. HENRY S. WOODRUFF, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Feb. 19, 1930. Serial No. 429,781. 4 Claims. (Cl. 62—126.)



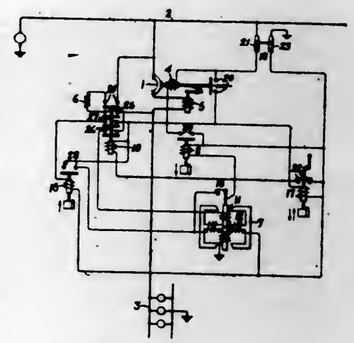
2. An evaporator for refrigerating systems including a plurality of flat refrigerant containing plates spaced apart to provide for an unobstructed flow of air between them over the entire surface of said plates, said plates being vertically arranged and having passages therein arranged to provide for the circulation of liquid refrigerant in a plurality of closed paths, and a refrigerant header secured directly to the upper portion of said plates communicating directly with said passages.

1,902,480. HYDRAULIC OPERATOR. WILLIAM J. WOODS, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Aug. 15, 1930. Serial No. 475,424. 9 Claims. (Cl. 60—52.)



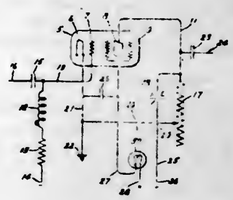
1. An electro-hydraulic operator including a fluid-containing cylinder, a piston operable within said cylinder between two positions and biased to one of said positions, said piston being provided with passageways therethrough, an electrically driven pump having communication with said passageways for controlling the transfer of fluid between opposite sides of the piston through said passageways in one direction to move the piston from its biased position to the other position when said pump is energized, and a movable baffle means cooperating with said piston and effective to control the flow of fluid through the passageways of said piston in the reverse direction for producing a time-delay effect on said piston when said pump is deenergized and said piston moves to the biased position.

1,902,481. ELECTRON DISCHARGE DEVICE. MARCUS A. ACHESON, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed July 2, 1928. Serial No. 289,666. 4 Claims. (Cl. 250—27.5.)



1. In an oscillation generator, an evacuated envelope composed of a material which upon being heated conducts current to an appreciable extent, said envelope containing an electron emitting cathode, a control member and an anode, and having a reentrant portion, a clamping device surrounding said portion, stay wires secured to the clamp for supporting the control member, and means comprising a member positioned in close proximity to said clamping device for preventing the initiation of induced heating currents when high frequency oscillations are generated in said reentrant portion, said member constituting a flat metallic plate secured to said stay wires.

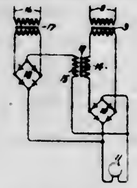
1,902,482. ELECTRON DISCHARGE APPARATUS. MARCUS A. ACHESON and JAMES L. ZEHNER, Schenectady, N. Y., assignors to General Electric Company, a Corporation of New York. Filed Sept. 4, 1928. Serial No. 303,698. 15 Claims. (Cl. 250—27.5.)



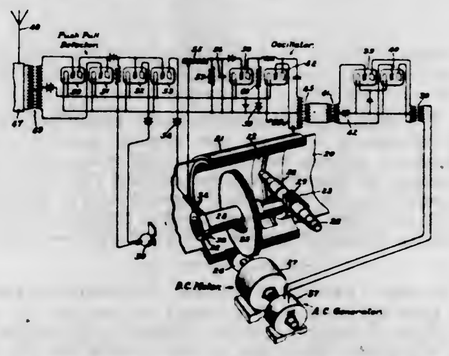
1. A thermionic device comprising a filamentary cathode and a cooperating anode between which the discharge tends to be limited by space charge, said anode being adapted to have its temperature controlled, and means, comprising a substance forming a substantial coating on said anode, for reducing space charge.

1,902,483. AUTOMATIC RECLOSING CIRCUIT BREAKER SYSTEM. ARVID E. ANDERSON, Lansdowne, Pa., assignor to General Electric Company, a Corporation of New York. Filed Aug. 10, 1928. Serial No. 298,684. 5 Claims. (Cl. 175—294.)

1. In combination, a supply circuit, a load circuit, a circuit breaker connecting said circuits together, overload responsive means for opening said circuit breaker, a resistor, a reclosing relay having an operating winding, means responsive to the opening of said circuit breaker for connecting said resistor in series between said circuits and for connecting said operating winding to said load circuit so that energization of the operating winding varies in accordance with amount of the load connected to said load circuit, and means for preventing the subsequent reclosure of said circuit breaker including a timing device responsive to the opening of said circuit breaker for disconnecting said winding from said load circuit after said circuit breaker has remained open for a predetermined time.



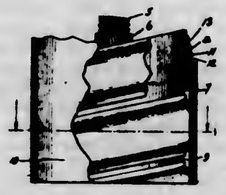
1,902,484. REGULATING MEANS FOR HIGH POWER ELECTRIC DISCHARGE AMPLIFIERS. PAUL D. ANDREWS, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Apr. 12, 1930. Serial No. 443,876. 8 Claims. (Cl. 179—171.)



1. The combination with an electric discharge device having a control grid, a cathode, an anode, and an additional grid, of means for applying a positive biasing potential to said additional grid, said means including a voltage supply circuit and a constant current device in series with said supply circuit.

1,902,485. ELECTRICAL CONTROL SYSTEM. WEBER H. ARKENBURGH, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Nov. 13, 1931. Serial No. 574,845. 6 Claims. (Cl. 171—119.)

1. An electrical system including, in combination, a load, a plurality of sources of current supply connected in parallel to said load, and a saturable reactor having an alternating current winding connected to control the output of one source and a direct current saturating winding connected to be energized in accordance with the output of another source.



1,902,486. PICTURE TRANSMISSION. HENRY B. BUTLER, East Orange, N. J., and CHARLES J. YOUNG, Ardmore, Pa., assignors to General Electric Company, a Corporation of New York. Filed Oct. 31, 1930. Serial No. 492,535. 3 Claims. (Cl. 178—69.5.)

1. In picture transmission apparatus including a sending device having means for producing framing impulses and a receiving device, means for driving the receiving device, and means for regulating the speed thereof, including an oscillator having a plate circuit, and an electron discharge device for varying the voltage applied to said plate circuit in accordance with the phase relation of said framing impulses and said driving means.

1,902,487. OIL-FILLED HIGH TENSION CABLE. FRANCIS V. CALVERT, Madison, Me., assignor to General Electric Company, a Corporation of New York. Filed July 26, 1928. Serial No. 295,569. 4 Claims. (Cl. 173—266.)

1. A high tension cable comprising a conductor, insulation therefor which includes a fluid and an impervious sheath, in combination with a spirally wound cellular element located within the sheath and extending longitudinally thereof and comprising two spaced metal strips united along their edges to form a closed chamber, one of said strips being corrugated in the direction of its length to increase its flexibility.

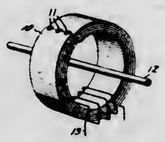
1,902,488. OUTLET BOX. GEORGE CARLSON, Bridgeport, Conn., assignor to General Electric Company, a Corporation of New York. Filed Sept. 17, 1930. Serial No. 482,549. 2 Claims. (Cl. 247—20.)

1. A bridge for securing devices in place over apertures of different sizes in cover plates and which permit securing means to extend therethrough, said bridge comprising an elongated plate having elongated slots in each end thereof, and pairs of integral projecting lugs unequally spaced on opposite sides thereof and the lugs on each side adapted to abut against the periphery of a correspondingly sized aperture to position said bridge concentrically of said cover.

1,902,489. INSULATING COMPOSITION. FRANK M. CLARK, Pittsfield, Mass., assignor to General Electric Company, a Corporation of New York. Filed Aug. 24, 1931. Serial No. 559,187. 3 Claims. (Cl. 252—1.)

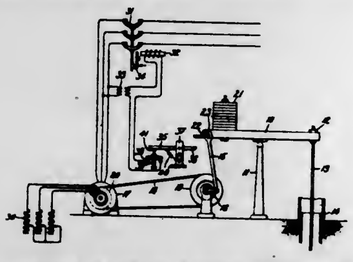
1. An insulating composition consisting of mineral wax, petrolatum and mineral oil, the mineral wax being a preponderant ingredient.

1,902,490. ELECTRORESPONSIVE LATCHING MECHANISM. HARRY B. CRAGO, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Apr. 25, 1930. Serial No. 447,368. 10 Claims. (Cl. 175—375.)



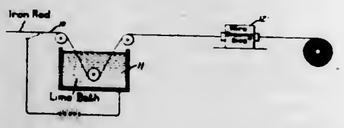
1. In combination, a movable member biased to one position, latching means for holding the member against its bias upon operation thereof to another position, electroresponsive means for independently holding the member against its bias in said other position and means for releasing said latching means while said member is being held by said electro-responsive means against its bias and for deenergising said electro-responsive means after said movable member has been released from said latching means.

8. A circuit controlling device comprising a circuit controlling member movable between two positions, and biased to one position, an electroresponsive means for moving said circuit controlling member from one position to another position, an extension on said circuit controlling member, a latch for engaging said extension to retain said circuit controlling member against its bias in said other position, an electroresponsive means for releasing said latch from said extension, a plurality of circuit controlling contacts actuated by said latch for opening and closing a circuit through said first electroresponsive means for energising and deenergising the same, means for energising said first electroresponsive means to close said circuit controlling member, said latch member actuating said contacts to open the circuit through said first electroresponsive means when said latch engages said extension and means for energising said first electroresponsive means to remove the bias pressure of said circuit controlling member from the latch when said releasing electroresponsive means is energised to release said latch from said extension, said contacts being



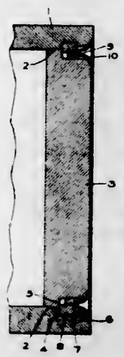
actuated to deenergize said first electro-responsive means after said circuit controlling member is released from said latch, and means for thereafter deenergizing said second electroresponsive means.

1,902,491. MAGNETIC CORE. OTTO DAHL, Berlin-Wilmersdorf, and JOACHIM PFAFFENBERGER, Berlin-Marienfelde, Germany, assignors to General Electric Company, a Corporation of New York. Filed Nov. 11, 1932, Serial No. 642,306, and in Germany Nov. 12, 1931. 2 Claims. (Cl. 175—21.)



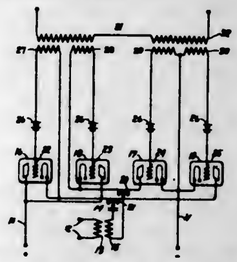
2. A method for making an annular magnetic core, said method including the steps of heating a strip of magnetic sheet material to a temperature between 100° and 350° C., winding the strip of magnetic sheet material into annular form while still heated and to a diameter smaller than the desired diameter of the finished core, and then permitting the wound strip to expand while still heated to the desired diameter.

1,902,492. PROTECTIVE DEVICE FOR WALKING BEAM PUMPING RIGS. HARRY H. DANSBOE, Dallas, Tex., assignor to General Electric Company, a Corporation of New York. Filed Sept. 24, 1930. Serial No. 484,224. 11 Claims. (Cl. 192—116.5.)



1. A protective device for a motor driven counter-balanced walking beam pumping rig comprising a switch for controlling the energising circuit of the electric driving motor, electro-responsive means for maintaining said switch in the closed position, a control switch for controlling the energization of said electro-responsive means, and a member adapted to be positioned adjacent the normal path of movement of a movable part of the beam mechanism to be engaged thereby upon abnormal unbalanced movement of the beam mechanism and arranged to control said electric switch.

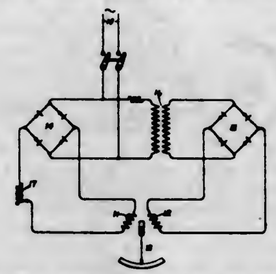
1,902,493. WIRE MAKING PROCESS. CHRISTIAN DANTSIZEN, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed June 22, 1931. Serial No. 546,169. 9 Claims. (Cl. 205—21.)



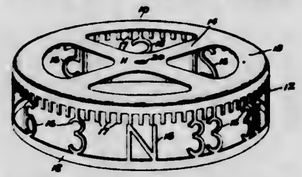
1. The process of making wire which comprises fabricating a ferrous metallic rod of requisite thickness, making said rod the anode in a bath of lime and water, passing current therethrough, drying said rod, and drawing said rod through a wire drawing die.

1,902,494. CYLINDER HEAD FASTENING MEANS. WILLIAM L. R. EMMET, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Original application filed Sept. 17, 1928, Serial No. 306,486. Divided and this application filed Oct. 22, 1929. Serial No. 401,564. 5 Claims. (Cl. 220—46.)

4. A drum comprising an integrally formed body with an opening, a plate for said opening, means for mechanically securing said plate to said body and a ring covering the joint between the body and plate and being integrally united therewith at opposite sides of the joint, said ring being yieldable in a radial direction to permit relative expansion between the drum and the plate.



1,902,495. ELECTRIC POWER CONVERTING APPARATUS. ALAN S. FITZ GERALD, Wynnewood, Pa., assignor to General Electric Company, a Corporation of New York. Filed Aug. 8, 1930. Serial No. 473,913. 6 Claims. (Cl. 115—363.)

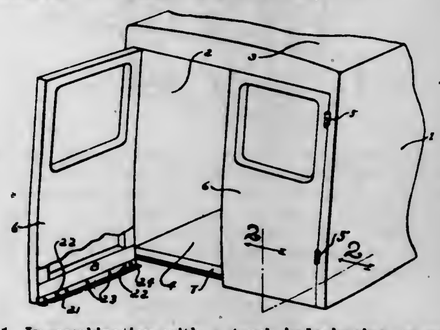


1. In a system for converting direct current electrical energy into periodically varying current, the combination of a source of direct current, a plurality of electrical valves, a capacitor, a circuit including a plurality of said valves for charging said capacitor from the full voltge of said source, a circuit including a plurality of other of said valves for oppositely charging said capacitor from the full voltage of said source, means for controlling the conductivities of said valves, and an output circuit common to both of said charging circuits and adapted to furnish periodically varying currents.

1,902,496. HIGH FREQUENCY MEASUREMENT. ALAN S. FITZ GERALD, Wynnewood, Pa., assignor to General Electric Company, a Corporation of New York. Filed May 27, 1931. Serial No. 540,488. 2 Claims. (Cl. 175—368.)

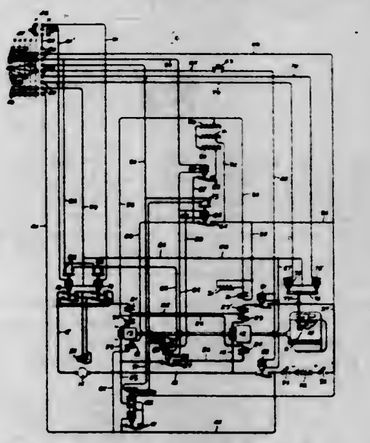
1. Frequency measuring apparatus comprising a differential direct current instrument having two supply circuits, a source of alternating current supply, a rectifier having its direct current terminals connected to supply one of said instrument circuits and having its alternating current terminals connected to said source of supply, a second rectifier having its direct current terminals connected to supply the other instrument circuit, and a transformer connected between said source of supply and the alternating current terminals of the second mentioned rectifier for varying the voltage supplied to the latter in proportion to the frequency of said source.

1,902,497. INDICATING DEVICE. CHARLES F. GREEN, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Apr. 26, 1930. Serial No. 447,716. 4 Claims. (Cl. 33—223.)



3. An indicating member comprising a cupped member having the major portion of its side wall cut away to provide a plurality of solid spaced apart markings of different masses circumferentially arranged with respect to a central axis, and a support attached to said markings and having its mass unevenly distributed with respect to said central axis to form with said markings a balanced structure with respect to said central axis.

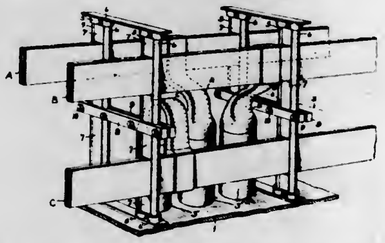
1,902,498. CONTROL DEVICE. CHESTER I. HALL, Philadelphia, Pa., assignor to General Electric Company, a Corporation of New York. Filed Oct. 8, 1929. Serial No. 398,253. 3 Claims. (Cl. 297—15.)



2. A room thermostat including an enclosing casing having a base and a removable cover provided with a pair of openings therein, two pairs of stops mounted one above the other in the same plane at one end of the base in spaced apart alignment for independent adjustment transverse the base, a pair of bimetallic thermal strips extending substantially in edgewise alignment centrally of the base and in substantially the same plane and each having one end thereof movable between a corresponding pair of said spaced apart contacts, a pair of oppositely disposed lever arms, each having one end thereof secured to the other end of a corresponding one of said thermal strips and mounted adjacent the other end of the base for movement transverse the base to adjust the position of the corresponding thermal strip between the pair of spaced apart contacts cooperating therewith with the free ends of the lever arms extending on opposite sides of the thermal strips and adjacent thereto, and a pair of adjusting screws mounted transversely of the base in opposing alignment and each having a drum dial partially extending through a corresponding one of the openings in the cover for effecting micrometer adjustment of the free end of a corresponding one of said lever arms.

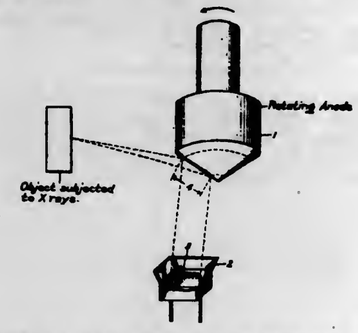
1,902,499. VEHICLE BODY DOOR STIFFENER. ALEXANDER G. HERRESHOFF, Highland Park, Mich., assignor to Chrysler Corporation, Detroit, Mich., a Corporation of Delaware. Filed May 8, 1930. Serial No. 450,835. 2 Claims. (Cl. 296—44.)

1. In combination with a truck body having an opening in one side thereof, a door for said opening, a plate on said closure extending substantially normally to said door, said plate being engageable with the lower surface of the floor of said body, and means mounted on said lower surface engageable with the outer side of said plate for resiliently clamping said plate against said floor when said door is closed.



1,902,500. DRIVING APPARATUS FOR SELF-PROPELLED VEHICLES. MARSHALL D. HENSHAW, Erie, Pa., assignor to General Electric Company, a Corporation of New York. Filed Apr. 6, 1931. Serial No. 527,958. 12 Claims. (Cl. 290—16.)

7. A vehicle driving apparatus including a prime mover, a generator driven by said prime mover and

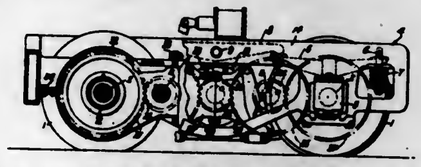


having a field excitation system, a battery, means for connecting said battery to said generator to charge the same, means for increasing the excitation of said generator at idling speed of said prime mover to charge said battery, and means responsive to actuation of said first-mentioned means for preventing increase in excitation of said generator until said prime mover is running at idling speed.

1,902,501. BUS BAR STRUCTURE. CHARLES H. HILL, Drexel Hill, and NATHAN SWERDLOW, Philadelphia, Pa., assignors to General Electric Company, a Corporation of New York. Filed June 16, 1932. Serial No. 617,588. 7 Claims. (Cl. 173—251.)

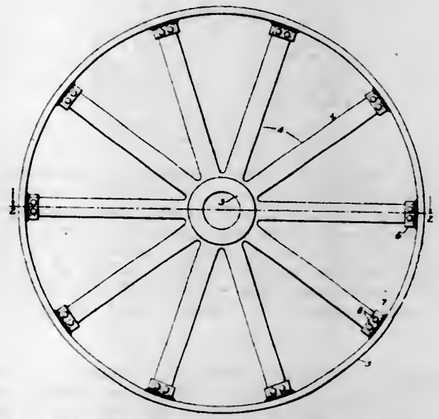
1. Supporting and insulating structure for parallel bus bars comprising a plurality of pairs of rods of insulating material, the rods of each pair disposed on opposite sides of a bus bar for preventing lateral movement thereof, and insulating means common to and bracing pairs of said rods associated with different bus bars with respect to lateral movement.

1,902,502. X-RAY TUBE. WALTER HOFMANN, Erlangen, Germany, assignor to General Electric Company, a Corporation of New York. Filed June 6, 1931, Serial No. 542,671, and in Germany Feb. 4, 1930. 4 Claims. (Cl. 250—35.)



1. An X-ray tube including an envelope and provided with an anode adapted to rotate, and a line focus cathode, said cathode comprising a helical filament whose turns are spaced closer together as the end of the filament remote from the anode axis of rotation is approached.

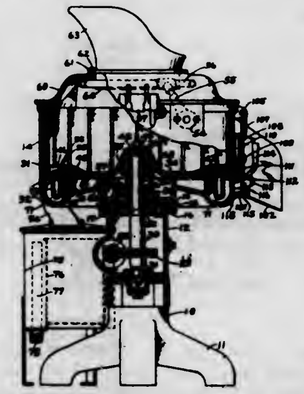
1,902,503. PROCESS FOR COATING METALS. GOODWIN H. HOWE, Scotia, N. Y., assignor to General Electric Company, a Corporation of New York. Filed May 29, 1930. Serial No. 457,492. 8 Claims. (Cl. 91—70.1.)



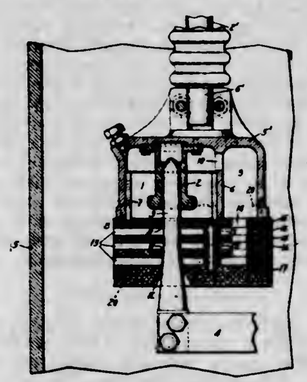
1. The method of providing a foundation metal with a protective coating of chromium, which comprises heating the said metal in the presence of, but out of contact with, chromium and with a carrier which is out of contact with both the foundation metal and the chromium.

1,902,504. TRUCK. FRED B. HOWELL, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Sept. 29, 1931. Serial No. 565,819. 7 Claims. (Cl. 105—113.)

1. A truck including wheels and an axle, a truck frame, resilient means for supporting said truck frame on said wheels and axle, said truck frame having a transom and longitudinal members extending between said transom and the ends of said truck frame, a motor provided with a frame and carried by said truck frame, means including reduction gearing having a countershaft and a quill shaft surrounding said axle for connecting said motor to said axle, means including bearings for securing said countershaft to said motor frame and said quill shaft to said longitudinal members, and a flexible connection between said quill shaft and said axle.



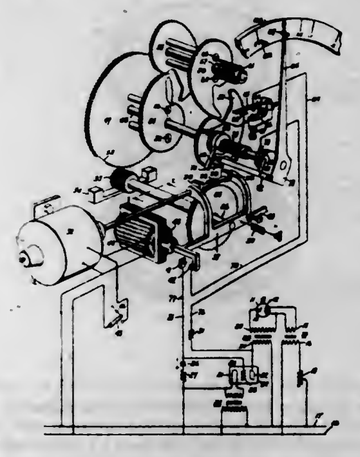
1,902,505. FLYWHEEL. WILFRID E. JOHNSON, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Apr. 22, 1932. Serial No. 606,892. 5 Claims. (Cl. 74—6.)



1. A wheel having a plurality of spokes and a rim fastened thereto, the spokes being of a material for which the ratio $\frac{E}{\rho}$ is less than the corresponding ratio for the material forming the rim, E representing the modulus of elasticity and ρ the density of the respective materials.

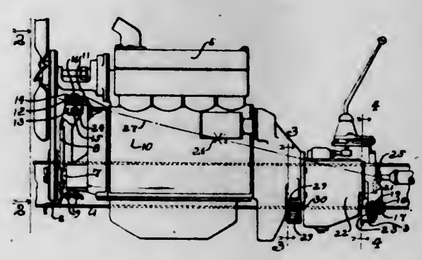
1,902,506. FOOD HANDLING APPARATUS. HERBERT L. JOHNSTON and DAVID A. MEEKER, Troy, Ohio, assignors to The Hobart Manufacturing Company, Troy, Ohio, a Corporation of Ohio. Filed July 19, 1929, Serial No. 379,426, and in France Feb. 2, 1929. 21 Claims. (Cl. 146—49.)

2. In a peeling machine of the character described, a container, a rotary peeling member having an upper abrasive surface adapted to effect peeling of vegetables and the like within said container and to throw them outwardly by centrifugal force due to rotation of said member, said member having an upstanding projection on the upper surface of the member adjacent the periphery thereof to impart an upward thrust to the vegetables thereon during rotation of the member, said container having a side wall formed about its interior surface with a multiplicity of closely spaced smooth-surfaced non-abrasive corrugations extending inwardly from the side wall a comparatively small distance in substantially uniform close spacing about the interior thereof so as to retard the rotary movement of the vegetables without materially deflecting them toward the center and while permitting their upward movement along said wall in a substantially uniform manner about the periphery thereof, without substantial peeling action or cutting of the vegetables by said interior side wall.



1,902,507. ELECTRIC CIRCUIT INTERRUPTER. GUSTAF ADOLF JUHLIN, Timperley, England, assignor to General Electric Company, a Corporation of New York. Filed Nov. 19, 1931, Serial No. 576,163, and in Great Britain Dec. 16, 1930. 5 Claims. (Cl. 200—150.)

1. An electric circuit interrupter of the oil-blast type comprising an arcing chamber, contacts separable in an insulating liquid within said chamber, an auxiliary chamber communicating with said arcing chamber containing insulating liquid in amount sufficient to interrupt the circuit, the liquid in said auxiliary chamber being subjected to pressure generated within said arcing chamber and means directing insulating liquid under influence of said pressure from said auxiliary chamber across the arc formed between said contacts.

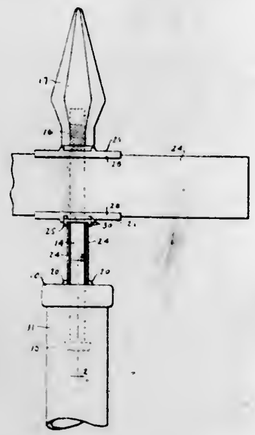


1,902,508. TIME SWITCH. WILLIAM K. KEARSLEY, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Nov. 12, 1930. Serial No. 495,193. 16 Claims. (Cl. 175—375.)

1. A time switch comprising driving means having a substantially constant velocity, two pairs of cooperating contacts, means operated by said driving means for effecting a change in the normal contact relationship of one pair of contacts, a movable element for effecting a change in the normal contact relationship of the second pair of contacts at a desired time interval after the change in normal contact relationship of the first pair of contacts, and motion transmitting means between the driving means and the movable element for driving the latter at a constantly varying velocity.

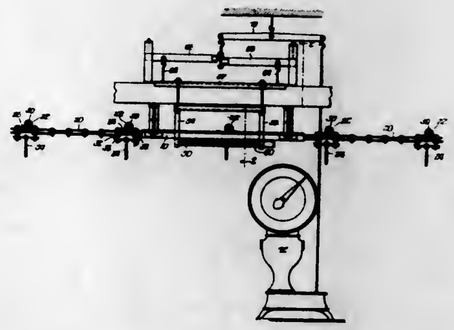
15. Apparatus for controlling the time interval between two operations on an external mechanism, said apparatus comprising driving means having a substantially constant velocity, two adjustably spaced apart normally stationary members, movable means normally maintained in a stationary position, said movable means being adapted to engage at one instant during its travel with one of the stationary members to effect one of said operations and to engage at a later instant with the second stationary member to effect the other of said operations, and motion transmitting means between the driving means and the movable means for driving the latter at a constantly varying velocity.

1,902,509. INTERNAL COMBUSTION ENGINE MOUNTING. ROGER K. LEE, Highland Park, Mich., assignor to Chrysler Corporation, Highland Park, Mich., a Corporation of Delaware. Original application filed June 6, 1931, Serial No. 542,601. Divided and this application filed Feb. 3, 1933. Serial No. 655,129. 23 Claims. (Cl. 248—14.2.)



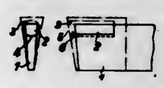
1. The combination of an internal combustion engine unit having a crankshaft, supporting structure, and means for mounting said unit on said supporting structure so constructed and arranged as to mount said engine unit for oscillation about an axis extending substantially through the center of mass of said engine unit and at an inclination to the axis of said crankshaft.

1,902,510. ELECTRICAL DISCHARGE DEVICE. KARL B. MCEACHRON and ELMER J. WADE, Pittsfield, Mass., assignors to General Electric Company, a Corporation of New York. Filed Jan. 20, 1932. Serial No. 587,716. 3 Claims. (Cl. 175—30.)



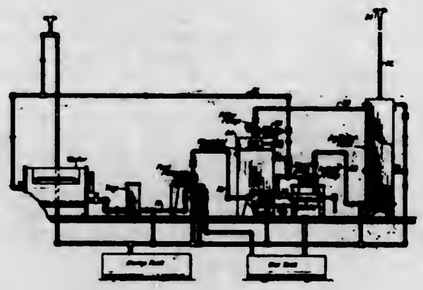
1. An electrical discharge device including an insulating casing, a plurality of gap assemblies in said casing, a support for said gap assemblies, springs between said support and the inner surface of said casing and connected to said gap assemblies, a conductive member between each spring and the inner surface of said casing, and a conductive member on the outer surface of said casing and extending opposite all of said inner conductive members.

1,902,511. POST CAP. DONALD MCDANIEL, Hamilton, Ohio, assignor to The Hamilton Foundry and Machine Company, Hamilton, Ohio, a Corporation of Ohio. Filed Oct. 13, 1930. Serial No. 488,370. 13 Claims. (Cl. 40—145.)



1. In apparatus of the character described, adapted to be attached to a post end or the like, a cap member comprising a cover portion for the post end and a projection telescoping the post end, a wedge member operably associated with the cap member, and means extending through the cap member cover portion and operable upon the cap member for causing said wedge member to grip said post.

1,902,512. COMBINATION CONVEYER AND SCALE. ARTHUR JULIUS MEHL, Omaha, Nebr., assignor to Swift and Company, Chicago, Ill., a Corporation of Illinois. Filed May 3, 1929. Serial No. 360,073. 4 Claims. (Cl 265—27.)

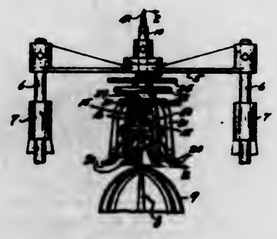


1. Conveying and weighing means comprising in combination a horizontally moving conveying element having vertically extending guide rods depending therefrom, a horizontally extending plate normally supported from the lower ends of said rods but in a manner to permit movement of the plate in respect to its vertically extending guide rods, which said guide rods are relied upon to effect horizontal movement of the plate as the conveying element moves, a hook or supporting means depending from the central portion of said plate, and horizontally extending weighing platform bars supported and held in spaced parallel relationship in respect to each other by depending stirrup means that straddles the conveying element and that constitutes part of the weighing platform of the weighing means, said parallel weighing platform bars each having a series of longitudinally spaced rollers thereupon and being arranged in respect to the horizontally moving conveying element in such a manner that the opposite longitudinally extending edge portions of the plate during the travel of the plate past the weighing means must ride upon said series of rollers in a manner to be lifted thereby and to be completely supported thereby whereby a weighing operation can be carried out while the plate is being moved horizontally and while it is completely supported on the parallel weighing platform bars through the medium of said series of rollers thereupon.

1,902,513. METHOD OF MAKING AND HARDENING STEEL TOOLS PROVIDED WITH HARD METAL MEMBERS. ADOLF MEUTSCH, Essen, Germany, assignor to Gewerkschaft Walram, Essen, Germany. Filed Aug. 15, 1931, Serial No. 557,337, and in Germany May 6, 1930. 6 Claims. (Cl. 76—101.)

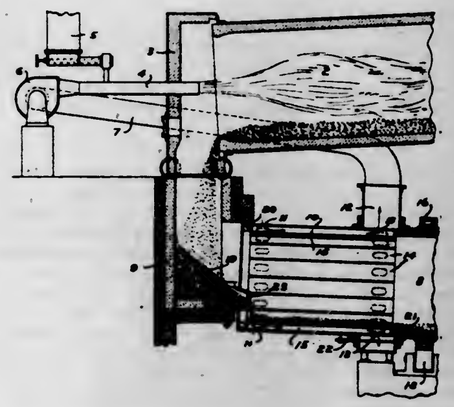
1. The method of making and hardening steel tools provided with hard metal members consisting in forming a cavity in the tool, inserting the hard metal member into the said cavity, closing up the said cavity with a metal covering means, heating up to hardening temperature and chilling the tool together with the covered hard metal member, and exposing the hard metal cutting edges by removing the covering means.

1,902,514. PROCESS OF CLARIFYING DRY CLEANING FLUID. RALPH A. MORGEN and FRANK FAIR, Kansas City, Mo. Filed July 11, 1931. Serial No. 550,180. 3 Claims. (Cl. 196—15.)



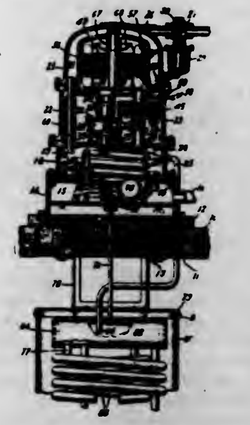
1. The process of clarifying dry cleaning fluid including delivering the fluid and a cleaning compound to an open mixing basin, pumping the mixture from the basin in accelerated flow to effect addition of air to the mixture and promote agitation of the mixture, delivering the mixture into a body thereof in an accumulator, drawing off the mixture from the accumulator at a point sufficiently above its intake to provide a conditioning period between intake and outlet of the mixture, and filtering the drawn off mixture.

1,902,515. PROCESS FOR PRODUCING WATER-SOLUBLE CONDENSATION PRODUCTS AND THE PRODUCTS PRODUCED. ROBERT MULLER, Pirna-Copitz, Germany, assignor to Chemische Fabrik Pott & Co., Dresden, Germany. Filed Nov. 25, 1929, Serial No. 409,746, and in Germany Nov. 27, 1928. 8 Claims. (Cl. 260—127.)



1. The process of preparing water soluble condensation products having capillaractive properties, which comprises nuclear condensing a carbocyclic, water soluble, non-sulfonated quaternary ammonium compound with an aliphatic alcohol above ethyl alcohol in the paraffin series.

1,902,516. HAT MAKING MACHINE. RUDOLPH G. MULLER, Irvington, N. J. Filed Dec. 1, 1931. Serial No. 578,283. 12 Claims. (Cl. 223—33.)

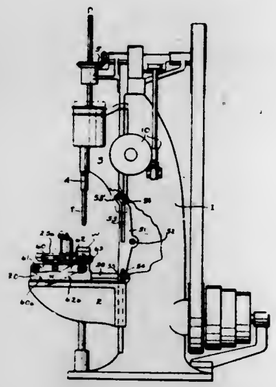


1. In a machine of the kind described, stretcher means including a support and a plurality of stretcher fingers projecting angularly and radially from said support, said support having a central opening outwardly open at its upper and lower ends, a tip cushion, disposed in said opening to abut converging inner end portions of said stretcher fingers, and releasable means for holding said tip cushion so disposed, said tip cushion being replaceably removable through the outwardly open upper end of said opening.

1,902,517. ROTARY COOLER. RAY C. NEWHOUSE, Milwaukee, Wis., assignor to Allis-Chalmers Manufacturing Company, Milwaukee, Wis., a Corporation of Delaware. Filed July 11, 1929. Serial No. 377,384. 8 Claims. (Cl. 222—7.)

1. In combination, a rotary shell, inlet means for delivering hot granular material into an end of said shell, a corrugated lining for said shell located adjacent to said end and forming a series of passages extending longitudinally of the shell axis, said passages being isolated from the material confining space within said shell, the corrugations of said lining being adapted to shower material within said shell, and means for producing a flow of cooling air through said passages.

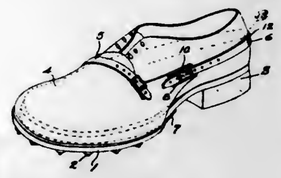
1,902,518. REFRIGERATING MACHINE. CLARK ORR, Fort Wayne, Ind., assignor to General Electric Company, a Corporation of New York. Filed July 3, 1920. Serial No. 393,888. 11 Claims. (Cl. 62—115.)



1. The combination with a casing provided with a compression chamber, a compressor located in the lower portion of said chamber, a motor for operating the compressor located in the upper portion of said chamber, and means for conducting cooling fluid around said motor, and means for automatically controlling the flow of cooling fluid in response to the temperature in the upper portion of said compression chamber.

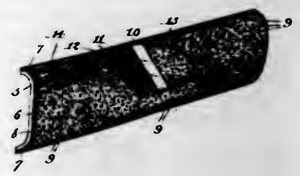
1,902,519. AIRSHIP. WILFRID V. N. POWELSON, New York, N. Y., and WARREN TRAVELL, San Bernardino, Calif. Original application filed Sept. 6, 1921, Serial No. 498,605. Divided and this application filed Mar. 17, 1931. Serial No. 523,250. 3 Claims. (Cl. 244—3.)

1. In an airship, an upper gas container for lifting gas and a lower gas container for gas of different properties, the two containers being external to each other, with atmospheric air intervening between them, but having contiguous walls, movable in unison and in harmony with expansion and contraction of gas in the upper container, and means whereby gas flows out from the lower container in harmony with said expansion; the said contiguous walls extending in direction approximately normal to the direction of gravity, whereby mutual abrasion is minimized.



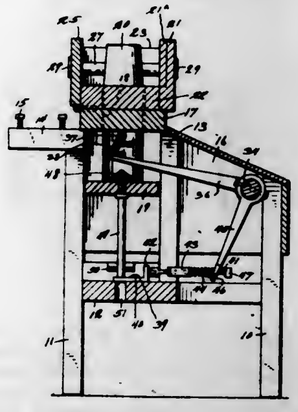
1,902,520. INDEXING MECHANISM FOR MACHINE TOOLS. GEORGE E. RANDLES, Cleveland, Ohio, assignor to The Foote-Burt Company, Cleveland, Ohio, a Corporation of Ohio. Filed Aug. 20, 1928. Serial No. 300,834. 13 Claims. (Cl. 77—64.)

1. Indexing mechanism of the kind described, comprising, a rotary element to be indexed, a support therefor, said element being movable transversely of as well as along its axis relative to the support, and means interposed between the element and support for causing an indexing movement of the element consequent upon the transverse movement, there being locking means for holding the rotary element in indexed position, said means being affected to release the element consequent upon said movement of the element along its axis.



1,902,521. SPIKED SANDAL. ELMER V. RICE, Covina, Calif. Filed Mar. 31, 1932. Serial No. 602,229. 2 Claims. (Cl. 36—7.7.)

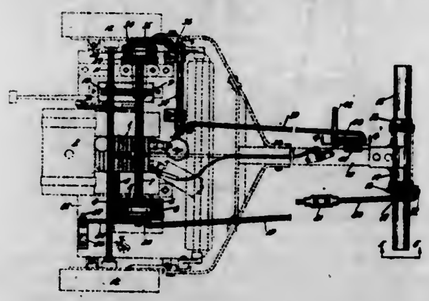
1. A sandal comprising a flexible sole provided with antislipping members, means to removably attach the sandal to the forward portion of an ordinary shoe, said means comprising a pair of spring hooks attached to the



shoe, and a reversible strap provided at one end with a link and at the other end with a buckle whereby said strap may optionally engage either of said spring hooks.

1,902,522. METHOD OF IMITATING WOOD GRAINING. GUSTAF ALBIN ROSE, Jamestown, N. Y., assignor to Dahlstrom Metallic Door Company, Jamestown, N. Y., a Corporation of New York. Filed Aug. 31, 1929. Serial No. 389,855. 4 Claims. (Cl. 91—68.)

1. The method of simulating the grain of natural wood on a metallic or other hard surface, which consists in irregularly spattering paint in varied sized regions over such surface, and before drying, spreading such paint regions to form elongated markings of varying degrees of fineness to simulate the pores of the wood to be imitated.



1,902,523. MACHINE FOR MAKING CEMENT BLOCKS. JOSEPH P. ROSE, Jr., Wellfleet, Mass. Filed Feb. 24, 1932. Serial No. 594,831. 5 Claims. (Cl. 25—41.)

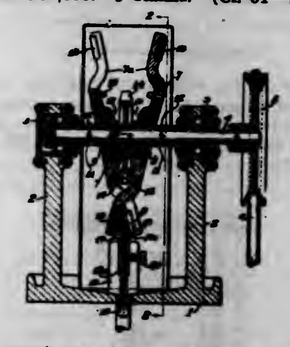
4. A cement block machine including a supporting frame, a block mold hinged to the frame for movement from a horizontal to a vertical position, the bottom of the mold

having core openings, a plurality of vertical cores disposed within the frame, a member supporting said cores and vertically guided in the frame, a rod extending downward from said member, a manually operable shaft having an arm, a rod connecting said cores and beneath which said arm engages upon an upward movement of the arm, an operative spring connection between the arm and the cores to permit an initial downward movement of the arm before the cores are pulled downward, a latch mounted for swinging movement into a position beneath said rod when the cores are fully raised, an arm on the shaft having an eye, a rod passing loosely through the latch and through said eye, a sleeve bearing against the latch and surrounding the rod, and a coiled compression spring between said sleeve and the eye.

1,902,524. POWER LAWN MOWER. LESTER B. ROTH, Prophetstown, Ill. Filed Jan. 12, 1931. Serial No. 508,075. 3 Claims. (Cl. 56—26.)

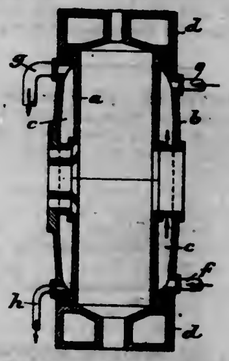
1. Control mechanism for a power lawn mower having an engine comprising an idler shaft carried by the lawn mower, clutch mechanism associated with said shaft for transmitting power from the shaft of the engine to the idler shaft, a drive shaft for the ground wheels of the lawn mower, driving connections between the idler shaft and the drive shaft, a shaft carrying the cutting reel of the lawn mower and driving connections between the idler shaft and the reel shaft, said connections including a clutch for completing or releasing the connection between the idler shaft and the reel shaft.

1,902,525. MIXER. CHARLES A. ROWLEY, Los Angeles, Calif. Filed June 12, 1931. Serial No. 543,771. 5 Claims. (Cl. 259—144.)



1. An article of manufacture comprising a handle, fittings secured at the opposite ends thereof and extending in parallel planes at right angles thereto, mixing wires flexed to assume an arcuate shape and secured within said fittings, the fittings being longitudinally corrugated to receive the individual wires and having a folded over portion to hold the wires within the individual corrugations, said wires being formed with bent end portions engaging the ends of the ribs of the corrugations to prevent the withdrawal of the wires from the fittings after being assembled therewith.

1,902,526. FILAMENT TREATMENT. KURT SCHMIDT, Wuppertal-Elberfeld-Grenze, Germany, assignor to American Glanzstoff Corporation, New York, N. Y., a Corporation of Delaware. Filed May 20, 1932, Serial No. 612,658, and in Germany June 8, 1931. 9 Claims. (Cl. 117—53.)



1. In a method of treating spun filaments, the steps of spooling the filaments, after-treating with appropriate liquids while on the spool, rewinding and twisting the filaments onto a second supporting means, removing the filaments in the form of a cake from this second support, and further wet treating the said cake.

1,902,527. METAL SHARPENING MACHINE. CONRAD B. SCHUMACHER, Lynbrook, N. Y., assignor, by mesne assignments, to Gillette Safety Razor Company, Boston, Mass., a Corporation of Delaware. Filed Apr. 30, 1928. Serial No. 273,835. 6 Claims. (Cl. 51—112.)

1. A sharpening machine comprising a pair of separate spaced members located side by side at an angle to one another and having sharpening means in opposing relation on side faces of the members, means supporting said members for common axial rotation and each member for individual angular rocking movement with respect one to another due to centrifugal force in said members during rotation thereof, means to rotate said members, and means to support a piece of metal in position between said members to be sharpened by said sharpening means with the axis of a member on the side of the metal remote from the side of the metal engaged by the sharpening means of said member.

1,902,528. WATER COOLED INTERNAL COMBUSTION ENGINE CYLINDER. OSCAR SIMMEN, Erlach, Switzerland, assignor to Firm Sulzer Freres Societe Anonyme, Winterthur, Switzerland. Filed Mar. 19, 1931, Serial No. 523,777, and in Switzerland Mar. 31, 1930. 2 Claims. (Cl. 123—173.)

1. In a vertical, water-cooled cylinder for internal-combustion engines, a water-jacket having at the top an inlet,

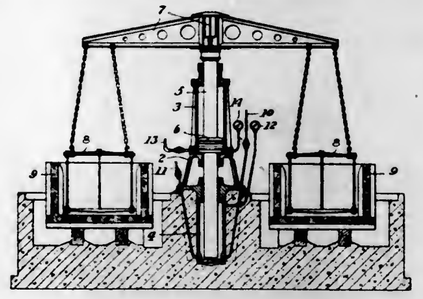
for the cooling water and an outlet therefor, and having at the lower part of the cylinder another inlet for the water, and a discharge port at the lowest point of the jacket for continuously discharging therethrough, by the cooling-circulation, the slurry continuously forming.

1,902,529. ARTIFICIAL SILK. JOHANN JOSEPH STOCKLY, Teltow, and EBHARD WITTE, Berlin-Lichterfelde, Germany, assignors, by mesne assignments, to American Glanzstoff Corporation, New York, N. Y. Filed Apr. 9, 1929, Serial No. 353,889, and in Germany Oct. 2, 1928. 1 Claim. (Cl. 106—40.)

As a solution for use in the manufacture of dull lustre filaments, threads, bands, and the like, a filtered and deaerated mixture comprising:

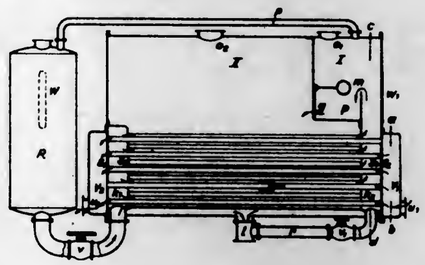
	Per cent
Viscose	98.7
Japan wax	0.4
Benzol	0.9

1,902,530. HANDLE FOR ROCK DRILLS. EDWARD F. TERRY, Phillipsburg, N. J., assignor to Ingersoll-Rand Company, Jersey City, N. J., a Corporation of New Jersey. Filed July 30, 1931. Serial No. 553,939. 3 Claims. (Cl. 121—36.)



1. In combination, a rock drill having pairs of opposed recesses spaced along the length thereof, a handle, legs on the handle having apertures therein, rods seated with their ends in the recesses and extending through the apertures, springs to oppose the movement of the legs relatively to the rods, and yieldable means in the recesses to serve as abutments for the ends of the rods.

1,902,531. MARKER OR TAG. CHARLES E. TIMSON, Chicago, Ill., assignor to William Cooper & Nephews Incorporated, Chicago, Ill., a Corporation of Illinois. Filed Sept. 19, 1932. Serial No. 633,803. 8 Claims. (Cl. 40—3.)



1. A marking and sealing tag comprising a bent metal strip having a pointed portion at one end and a cap covered aperture near the other end for receiving the pointed portion, said cap being provided with means to prevent the curling of the pointed portion when the same is inserted in the cap, the pointed portion being bent within said cap when said tag is applied in marking or sealing position, said pointed portion having a hole in it to weaken it so that when the weakened portion is bent within the cap an enlarged end is produced to prevent withdrawal of the point from within the cap without breaking the tag and thus preventing re-use of the tag.

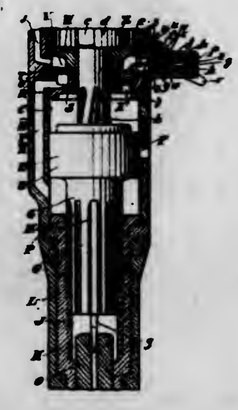
1,902,532. METHOD OF OPERATING PICKLING MACHINES. WILLIBALD TRINKS, Pittsburgh, Pa., assignor to Mesta Machine Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed June 26, 1929. Serial No. 373,742. 1 Claim. (Cl. 121—1.)

A method of operating a pickling machine having an air balancing means and a steam lifting means which comprises evaluating for various loads the highest air pressure at which rapid lowering of the respective loads can be effected, and the relation of the load carried at any time to the air and steam pressures required to balance it, embodying these relations in a calculation-saving device, and adjusting the air pressure for the loads being handled in accordance with the pressures indicated by said device.

1,902,533. EVAPORATOR. KAREL VYKOUPIL, Mariampol, Lithuania. Filed July 27, 1932, Serial No. 625,067, and in Czechoslovakia May 31, 1929. 3 Claims. (Cl. 159—17.)

1. An evaporator having two evaporating chambers separated from one another, characterised in that these evaporating chambers (I, II) are connected together by means of a float valve (g) and are heated by a system of heating tubes (t_1, t_2, t_3) which consist of outer tubes (t_3) in which are carried inner tubes (t_1, t_2) through which latter the heating steam flows, the substance to be evaporated flowing through the outer tubes (t_3) into the first chamber (I) of the evaporator, while the second chamber (II) of the evaporator is heated by the outer tubes (t_3), and different pressures may be maintained in the two chambers.

1,902,534. VACUUM CLEANING DEVICE. FRED WIELATZ, Chicago, Ill. Filed Jan. 11, 1932. Serial No. 585,826. 4 Claims. (Cl. 15—152.)

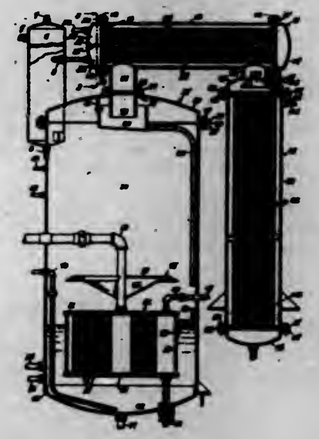


1. A suction nozzle for cleaning devices, formed with a pair of laterally spaced longitudinal internal passageways and provided with apertures on opposite sides in communication with said passageways, and opposed longitudinally extended brushing elements on the opposite sides of the nozzle and interposed medially between said passageways.

1,902,535. FOLDABLE BUCKLE. MAURICE ANDERSON, Edgewood, R. I., assignor to Levy, Anderson Co., Inc., a Corporation of Rhode Island. Filed July 18, 1932. Serial No. 623,210. 11 Claims. (Cl. 24—71.)

1. In a foldable buckle, a section provided with a curved tongue, a pivoted member in said section to confine a bracelet link between it and the section and provided with a curved tongue to snap over the first tongue and hold the member in closed position, a second section hinged to the first section to fold over the said member and the first said section and maintain said member in link confining position.

1,902,536. BLOWING DEVICE FOR ROCK DRILLS. LEWIS C. BAYLES, Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J., a Corporation of New Jersey. Filed July 23, 1931. Serial No. 552,600. 2 Claims. (Cl. 121—6.)

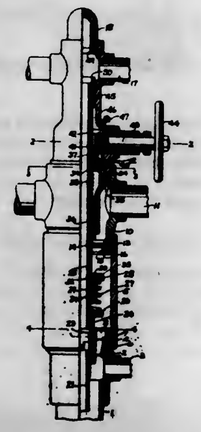


1. A fluid actuated rock drill comprising a casing having a piston chamber and an exhaust port, a hammer piston in the piston chamber controlling the exhaust port and having a blower passage, an automatic valve for distributing pressure fluid to the piston chamber, a spring in the casing, a plug in the casing to actuate the spring against the valve for holding the valve in position to admit pressure fluid into the front end of the piston chamber and to the blower passage, said plug having a groove for engagement with the spring to retain the plug in the casing, a passage in the casing opening into the rear end of the piston chamber, and a passage in the plug to register with the passage in the casing for admitting pressure fluid into the rear end of the piston chamber during the blowing operation to maintain the piston in an intermediate position in the piston chamber for closing the exhaust port.

1,902,537. CASE FOR LIPSTICKS. FELICIE EUGENIE AMELIE WANPOUILLE BERGAUD, Paris, France. Filed July 9, 1931, Serial No. 549,719, and in France July 30, 1930. 7 Claims. (Cl. 206—56.)

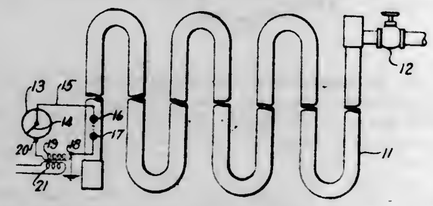
1. A case for lipsticks comprising a body, a tube slidable therein and projecting through the rear end of the body, and coacting shutters forming front extensions of the tube for opening and closing the front end of the body as the tube is moved rearwardly and forwardly respectively.

1,902,538. DISTILLING APPARATUS. WILLIAM F. BRACE and FERNAND E. BELUCHE, Buffalo, N. Y., assignors to S. F. Bowser & Company, Inc., Fort Wayne, Ind., a Corporation of Indiana. Filed Jan. 19, 1931. Serial No. 509,590. 6 Claims. (Cl. 202—177.)



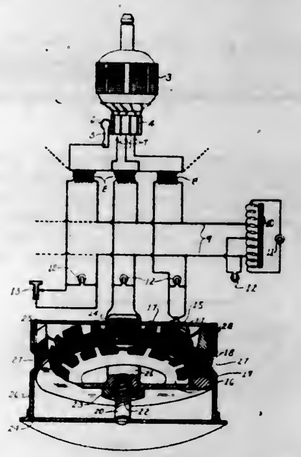
1. In an apparatus of the character described for removing foreign substances from a liquid, a preheater and a still, means for conducting the liquid to be treated first through said preheater and thence to said still, means for heating said still, said preheater comprising means forming an upper header chamber, means forming a lower header chamber arranged immediately below said upper header chamber, means for conducting the liquid to be treated into one of said header chambers and out of the other header chamber, tubes connecting said chambers, means increasing the flow of liquid through said header chambers without increasing the flow of liquid through said tubes, comprising means forming a restricted by-pass directly connecting said header chambers and means for conducting the vapors from said still around said tubes to preheat the liquid flowing therethrough.

1,902,539. STENCIL. CARL FRIEDRICH BRAUER, Stettin, Germany. Filed Apr. 16, 1931, Serial No. 530,723, and in Germany Oct. 28, 1930. 10 Claims. (Cl. 41—38.6.)



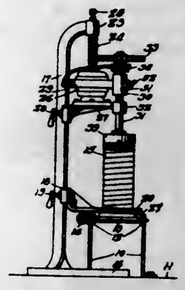
1. A directly stencilizable stencil sheet comprising an open texture fibrous base coated with a composition including gelatin highly distended in an aqueous solution of acetic acid and having homogeneously dispersed therethrough oleic acid and a noncoagulating stabilizer of the group comprising chlorinated naphthalene, palmitic acid and stearic acid, the gelatin in the coated sheet being in an unhardened and uncoagulated condition, and said stabilizer maintaining the homogeneity and permanence of the coating.

1,902,540. WELL CONTROL DEVICE. CICERO C. BROWN, Houston, Tex. Filed Feb. 19, 1932. Serial No. 593,993. 8 Claims. (Cl. 166—15.)



1. A well control apparatus including a well casing, a casing head thereon, a well tubing suspended in said casing head, an upward extension for said tubing adapted to form a seal with the upper end of said tubing, means connected with said casing head to entirely enclose the said upward extension, outlets from said casing, outlets from the tubing extension at its upper end, means to move said extension, and means on said extension to close said casing outlets and said extension outlets when said extension is moved upwardly.

1,902,541. METHOD AND APPARATUS FOR IGNITING COMBUSTIBLE MIXTURES. GEORGE G. BROWN and MOTT SOUDERS, Jr., Ann Arbor, Mich. Filed Apr. 15, 1931. Serial No. 530,270. 8 Claims. (Cl. 175—115.)



4. The method of igniting combustible mixture in combustion chambers without the accompaniment of shock waves which comprises filling a combustion chamber with a combustible mixture at a desired temperature and at a pressure of several atmospheres, and igniting the same by a substantially unilateral passage of an electric spark of desired intensity for a period of time of the order of a ten-thousandth part of a second.

1,902,542. TESTING INSTRUMENT AND REGULATOR. PENROSE E. CHAPMAN, St. Louis, Mo. Filed Sept. 16, 1929. Serial No. 392,830. 6 Claims. (Cl. 171—242.)

1. In an adjustable impedance, the combination of a magnetic core having a plurality of symmetrically spaced pairs of poles, electrical windings around said poles, an armature adapted to engage the poles of said core, the engaging faces of said poles and said armature being tapered so that the movement of one relative to the other will effect a change in the length of the air gap.

1,902,543. MEANS AND METHOD OF MARKING CONTAINERS FOR ICE CREAM AND THE LIKE. GEORGE F. DICKSON, Chicago, Ill., assignor to George A. Pearson and Leslie Muter, Chicago, Ill. Original application filed July 3, 1931, Serial No. 548,577. Divided and this application filed Mar. 18, 1932. Serial No. 599,835. 8 Claims. (Cl. 93—36.)

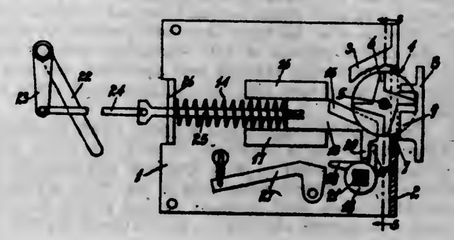
1. Cap seating and marking apparatus comprising a standard, a head on said standard, branding dies in said head, means for heating said branding dies, and means for maintaining said branding dies in contact with a cap while said head is rotating.

1,902,544. GRAIN DOOR FOR CARS. FRANK DITCHFIELD, Cleveland, Ohio, assignor to The Youngstown Steel Door Company, Cleveland, Ohio, a Corporation of Ohio. Filed Aug. 29, 1930. Serial No. 478,645. 15 Claims. (Cl. 20—27.)

1. In a car having a door opening and a floor, a grain door for closing said opening, said door being comprised of a main lower section and an auxiliary upper section, said sections being arranged to assume either a vertical operative position over the door opening with the surfaces on one side thereof adapted to engage fixed portions of the car defining the door opening to form a seal therewith, or an inoperative horizontal floor position, said auxiliary section overlying the main section when the

sections are in the horizontal floor position and the auxiliary section having its said seal-forming side faced downwardly to thereby prevent injury to the seal-forming surfaces of both sections.

1,902,545. GRAIN DOOR FOR CARS. FRANK DITCHFIELD, Cleveland, Ohio, assignor to The Youngstown Steel Door Company, Cleveland, Ohio, a Corporation of Ohio. Filed Sept. 24, 1930. Serial No. 484,032. 16 Claims. (Cl. 20—27.)

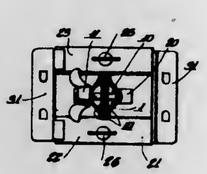


1. In a car having a door opening, a grain door movably attached to the car adjacent the sill of the door and movable to both vertical operative position to close the lower portion of the door opening and a horizontal inoperative floor position; a relief door pivotally mounted on said grain door and bodily movable therewith; and displaceable floor-forming means for covering and protecting said grain door and relief door when the grain door is in said inoperative floor position.

1,902,546. METAL DOOR CONSTRUCTION. FRANK DITCHFIELD, Cleveland, Ohio, assignor to The Youngstown Steel Door Company, Cleveland, Ohio, a Corporation of Ohio. Original application filed June 18, 1930, Serial No. 461,976. Divided and this application filed Feb. 27, 1931. Serial No. 518,616. 4 Claims. (Cl. 189—46.)

1. In a door of the class including a plurality of sheet metal panels with the main portions thereof located in substantially the same plane and each panel having strengthening indentations incorporated therein; means for uniting the panels along adjacent edges, said means including: a flange on one panel offset to one side of the main plane of said panel, and an offset to the same side on the adjacent panel located inwardly from the edge of the last named panel, the flange of the first named panel being secured to said offset of the second named panel and the edge of the second named panel beyond said offset thereof being secured to the main portion of said first named panel whereby to provide a box girder lap joint between the panels.

1,902,547. ROTARY BOLT DOORLOCK. WALDEMAR A. ENDTER, Long Beach, Calif. Filed Mar. 15, 1932. Serial No. 598,960. 8 Claims. (Cl. 292—218.)

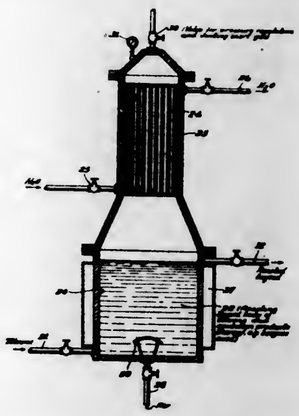


1. In a latch construction, a rotary bolt capable of free rotation in all positions when released, including a plurality of heads, any one of which is adapted to engage a keeper, a movable dog adapted to engage successive heads of the bolt in non-latching position, cooperating means between the bolt and the dog imposing a continued rotation of the bolt in latching direction when one of the heads is in keeper engaging position and concurrently imposing a multi-directional wedging action.

1,902,548. WATER CARRIER AND THE LIKE. FRANCIS F. FENWICK, Jr., East Orange, N. J. Filed Jan. 13, 1932. Serial No. 586,357. 14 Claims. (Cl. 299—97.)

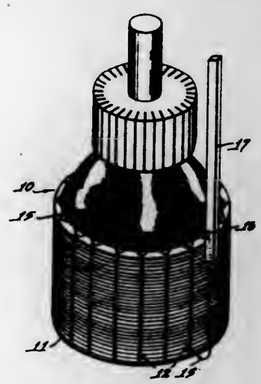
1. A device of the kind described, comprising a flexible tubular bag body doubled upon itself with the doubled end lowermost to provide upstanding communicating superimposed sections, means to secure said sections together, closable filling means at the upper end of one section, and means connected with the doubled end of said bag body for discharging the content therefrom, said means issuing from the space between the body sections.

1,902,549. BOOKHOLDER. GEORGE J. FLANAGAN, Chicago, Ill.; Earle C. Grannan executor of said George J. Flanagan. Filed Oct. 30, 1930. Serial No. 492,144. 9 Claims. (Cl. 45—85.)



1. A book holder comprising a support, a stationary friction disc carried by said support having a central aperture, said disc having a cut out peripheral portion, movable means for engaging and holding a book, a friction disc carried by said means having a central aperture, said latter friction disc having a deflected portion extending into the cut-out portion of said stationary friction disc, a pivot pin extending through said apertures, and a nut cooperating with said pin for clamping said discs together.

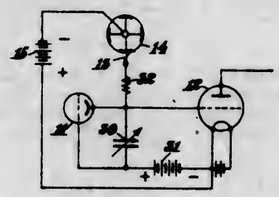
7. A book holder comprising a support, a pair of laterally adjustable brackets connected to said support, a pair of members connected to said brackets and adapted to receive a book therebetween, and a lazy-tong structure connected between said members to engage the back of the book and support the same in any adjusted position of said brackets.



1,902,550. PROCESS OF OXIDIZING CYCLIC ORGANIC COMPOUNDS. HENRY O. FORREST, Andover, Mass., and PER K. FROLICH, Elizabeth, N. J., assignors to National Synthetic Corporation, Painesville, Ohio, a Corporation of Delaware. Filed Jan. 31, 1930. Serial No. 424,904. 11 Claims. (Cl. 260—108.)

1. A process of producing a cyclic partial oxidation product of a directly oxidizable cyclic organic compound other than benzene by direct oxidation thereof, comprising heating a liquid body of the compound to an elevated temperature above the normal boiling temperature and below critical temperature and contacting it with molecular oxy-

gen in the absence of other active agents in a closed system and under a pressure substantially in excess of the vapor pressure of the compound at said temperature.



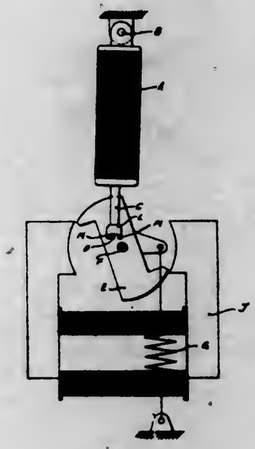
1,902,551. WEDGE REMOVING TOOL FOR ELECTRIC MOTORS AND GENERATORS. MILTON O. FREDRICKSON, San Pedro, Calif. Filed Mar. 23, 1932. Serial No. 600,689. 6 Claims. (Cl. 29—84.)

1. A device of the class described comprising a handle, a web adjacent one end of the handle extending laterally therefrom, said web being designed to extend through the slot opening of a winding slot of an electric motor, generator or the like, there being an enlargement at the edge of the web presenting a driving end adapted to engage the end of a wedge in the slot to drive the wedge from the slot.

1,902,552. APPARATUS FOR PICTURE TRANSMISSION OR THE LIKE. OTHO FULTON, Bromley, England. Filed Mar. 16, 1929, Serial No. 347,623, and in Austria Aug. 22, 1928. 2 Claims. (Cl. 250—41.5.)

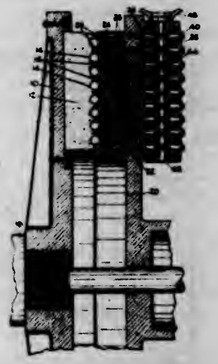
1. In a communication system, a three-electrode valve having a grid and a cathode, a condenser connected in circuit with said grid and cathode, means for periodically charging the condenser to interrupt the flow of current from said valve, and a photocell connected to the grid to provide a leak path whereby the period of interruption

of the flow of current from the valve is inversely proportional to the intensity of the illumination impinging upon said cell.



1,902,553. BUTTON-HOLE TAPE. EDWIN M. GOLDSMITH, Philadelphia, Pa., assignor to Friedberger-Aaron Manufacturing Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Sept. 27, 1930. Serial No. 484,858. 4 Claims. (Cl. 139—383.)

1. A woven button-hole tape having elongated button-holes extending in the direction of the warp threads comprising two sets of warp threads extending respectively along opposite sides of the tape, and two weft threads, both weft threads being interwoven with both sets of warp threads to form the body of the fabric between button-holes, and one weft thread being interwoven with only one set of warp threads and the other weft thread being interwoven with only the other set of warp threads to form a button-hole, each weft thread extending from an edge of a button-hole to the corresponding edge of the tape in each pick involved in the formation of a button-hole, whereby the tape is of close weave both beyond and at the sides of the button-holes, the weft threads of each side being extended over a limited number of warp threads of the other side at both ends of each button-hole.

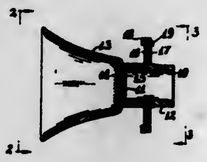


1,902,554. VOLTAGE REGULATING APPARATUS. HUGO GROB, Berlin, Germany. Filed Oct. 22, 1930, Serial No. 490,428, and in Germany Oct. 22, 1929. 7 Claims. (Cl. 171—229.)

1. In apparatus of the character described, in combination, a carbon pile, means pivotally supporting one end of said pile so that said pile may pivot about the axis thereof and means at the other end of said pile having a substantially flat face extending transversely of the length of said pile, said second-mentioned means with its flat face being adapted to move in a direction to vary the compression of said pile and to move with the said other end of said pile as the latter swings about said axis, an electromagnet having and controlling a rotatable armature, spring means acting upon said armature to rotate it in a direction opposite to that in which an increasing flux of said electromagnet rotates said armature, and a member carried by said armature at a point eccentric to the axis of rotation of said armature, said member having a curved face engaging said flat face and adapted to be in rolling contact therewith as the flux of said magnet rotates said armature in one direction to swing said pile in one direction about the axis of its pivot

and as said spring rotates the armature in opposite direction to swing said pile in opposite direction about the axis of its pivot.

1,902,555. GRINDING MACHINE. FREDERICK G. HUGHES, Bristol, Conn., assignor to The New Departure Manufacturing Company, Bristol, Conn., a Corporation of Connecticut. Filed June 6, 1923. Serial No. 643,764. 8 Claims. (Cl. 51—130.)

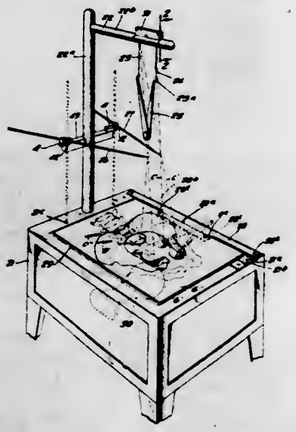


6. In a grinding machine having a grinder and means for rotating the grinder, a series of shafts extending parallel to the axis of the grinder and arranged in a radial plane, a dressing tool eccentrically mounted on the end of each shaft, and means for rotating the shafts to carry each dressing tool over a portion of the surface of the grinder, substantially as described.

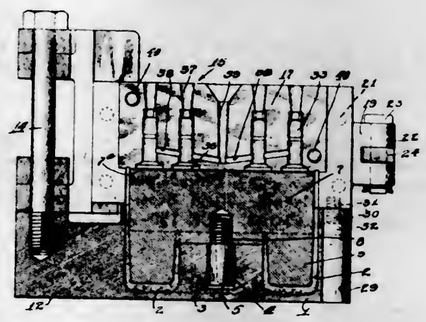
1,902,556. SILENCER MOUTHPIECE FOR TELEPHONE TRANSMITTERS. EMMA V. HUSSON, Brooklyn, N. Y. Filed Apr. 11, 1932. Serial No. 604,515. 2 Claims. (Cl. 179—188.)

1. A silencer mouthpiece for telephone transmitters, comprising a tubular member closed at the front end and adapted for attachment at the rear on a telephone transmitter, a mouthpiece rotative on the front of said tubular member and having apertures adapted to align with or

be out of alignment with similar apertures on the front end of said tubular member, and means for urging said mouthpiece into one of said rotative positions and adjustable for urging the mouthpiece into the other of said rotative positions and further adjustable to hold the mouthpiece in either of said positions.



1,902,557. SNAP FASTENER SOCKET. EDMUND D. JANES, Waterbury, Conn., assignor to Scovill Manufacturing Company, Waterbury, Conn., a Corporation of Connecticut. Filed June 20, 1932. Serial No. 618,196. 2 Claims. (Cl. 24—77.)



1. A detachable snap fastener comprising a stud element having an attaching head and a two-part socket element consisting of a perforated sheet-metal body portion and a restricted, resilient, expansible stud-engaging portion in the form of a split ring having a neck portion extending through the perforation in the body portion and outwardly-turned portions overlapping parts of the opposite surfaces of the body portion immediately surrounding the perforation, the diameter of the perforation in the body portion being equal to the diameter of the head of the stud plus twice the thickness of the material of the neck portion of the split ring plus a minimum necessary working tolerance.

1,902,558. APPARATUS FOR AND METHOD OF LOCALIZING AND MEASURING BY X-RAY. CLAYTON R. JOHNSON, Los Angeles, Calif. Filed Sept. 29, 1928. Serial No. 309,197. 5 Claims. (Cl. 250—34.)

3. In an apparatus of the class described, a table, a supporting means secured thereto and extending thereover, a pair of wires extending from horizontally spaced apart portions on said supporting means, resilient means normally drawing said wires toward said supporting means, and extensible means having a pair of pointed portions adjustable with respect to each other, the free end of each wire being secured to one of the pointed portions.

1,902,559. MOLD. WILLIAM E. KEMP, Kokomo, Ind., assignor to Kingston Products Corporation, Kokomo, Ind., a Corporation of Indiana. Filed Dec. 3, 1931. Serial No. 578,648. 12 Claims. (Cl. 22—136.)

1. Apparatus for forming metal articles having portions of different degrees of hardness, comprising a mold having a number of article forming cavities, a base having a fluid reservoir, a chill plate pivotally mounted on said base and having a portion thereof directly below said mold and fins on said chill plate extending in said reservoir.

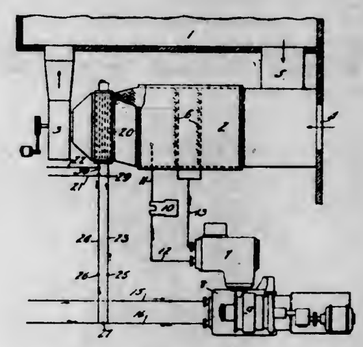
12. A molding apparatus comprising a base, a permanent mold proper attached to said base, said permanent mold proper being formed in separable sections having matched recesses in abutting faces providing mold cavities, and a chill plate for forming the bottom closure of the mold cavities, said chill plate being rotatably mounted on said base.

1,902,560. SPINNER. JOHN J. KILPATRICK, San Francisco, Calif. Filed Oct. 27, 1931. Serial No. 571,303. 3 Claims. (Cl. 43—45.)

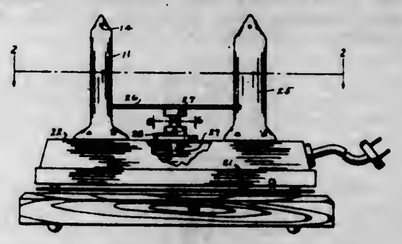
1. A spinner comprising a central web having an aperture adjacent its leading edge, a hook secured adjacent the trailing edge of the web, a pair of oppositely extending wing flanges projecting outwardly from the side edges of the web, and a pair of oppositely extending end flanges projecting outwardly from the trailing edges of the wing flanges.

1,902,561. VACUUM CLEANER. CARL KÜHNEL and KARL KORITTKE, Berlin-Charlottenburg, Germany, assignors to Siemens-Schuckertwerke Aktiengesellschaft, Berlin-Siemensstadt, Germany, a Corporation of Germany. Filed Nov. 23, 1932, Serial No. 643,966, and in Germany Oct. 27, 1931. 4 Claims. (Cl. 15—155.)

1. In a vacuum cleaner, a nozzle having an elongated inlet opening, an apertured flap adapted to restrict the cross-section of said inlet opening, supports integral with said nozzle at one side of the latter, said flap being pivotally mounted on said supports to bring in and out of engagement said flap with said nozzle, and means for holding said flap out of engagement with said inlet opening.



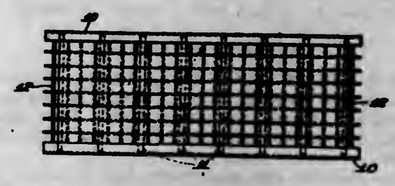
1,902,562. BLOWING DEVICE FOR PNEUMATIC TOOLS. EARL B. LEAR, Phillipsburg, N. J., assignor to Ingersoll-Rand Company, Jersey City, N. J., a Corporation of New Jersey. Filed Aug. 6, 1931. Serial No. 555,415. 1 Claim. (Cl. 121—10.)



A pneumatic tool comprising a casing having a piston chamber, a hammer piston therein, a hollow drill steel guided by the casing, an automatic valve to distribute pressure fluid to the piston chamber, a blower passage in the casing and being in constant communication with the interior of the drill steel, a bushing in the casing communicating with the passage and extending through the automatic valve to act as a guide therefor, a blower valve to connect the bushing with a source to selectively supply pressure fluid through the passage to the drill steel during the operating and idle periods of the piston and being arranged coaxially with the bushing, and a spring interposed between the bushing and the blower valve to hold the blower valve immovable in its limiting positions and to hold the bushing firmly seated in the casing.

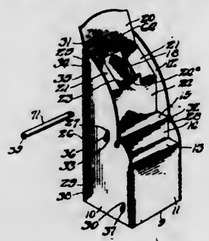
1,902,563. APPARATUS FOR CONDITIONING INCLOSURES. LEO L. LEWIS, Plainfield, N. J., assignor to Carrier Engineering Corporation, Newark, N. J. Filed Feb. 23, 1928. Serial No. 256,258. 4 Claims. (Cl. 257—8.)

1. In a system for conditioning the atmosphere of an inclosure, the combination of air conditioning apparatus, means for conveying air through said apparatus and to said inclosure, means including a refrigerating device for lowering the dewpoint of the air passing through said apparatus and including a condenser, means for circulating a fluid through said condenser, a heater for heating air leaving said apparatus and moving to said inclosure, and means connected to said heater for supplying additional heat thereto, whereby said heater may be connected selectively either to said last means or in series with the outgoing side of said condenser.



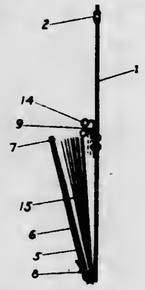
1,902,564. BUN PUNCHER AND TOASTER. CHARLES W. MABEY, Indianapolis, Ind., assignor to Mabey Electric and Manufacturing Company, Indianapolis, Ind., a Corporation of Indiana. Filed Feb. 15, 1929. Serial No. 340,254. 4 Claims. (Cl. 219—19.)

1. In a bun puncher and toaster, a post formed of a plurality of hollow longitudinally divided sections tapered to form a sharpened top and flared at the bottom to form an expanded base, a fixed base, means for detachably securing the upper portions of the sections together, means for removably securing the expanded base to the fixed base and an electric heating element located in the hollow of the post.



1,902,565. SLAB FLOOR OR ROOF CONSTRUCTION. HERBERT E. MARKS, Sewickley, Pa., assignor to United States Gypsum Company, Chicago, Ill., a Corporation of Illinois. Filed May 14, 1928. Serial No. 277,425. 11 Claims. (Cl. 72—68.)

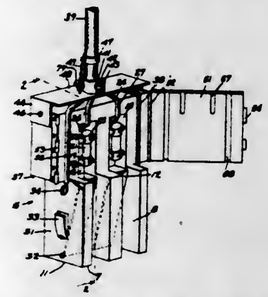
7. A preformed building slab comprising a body of cementitious material, slab-supporting and side-facing



bars molded in the sides of the slab and having their ends projecting beyond the ends of the slab, and integral cementitious flanges formed below said bars and extending outwardly from the edges of the slab.

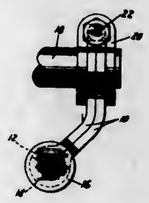
1,902,566. DISPLAY RACK. HARRY V. MARSH, Chicago, Ill. Filed Nov. 8, 1930. Serial No. 494,216. 3 Claims. (Cl. 211—72.)

1. A display device having a seat angularly positioned for the support of an article of merchandise and comprising a plurality of blanks of sheet material, one of said blanks being divided into a series of sections, there being a section extending from a second to a third of said sections and traversing intermediate sections, said first named section being cut from the body of said intermediate and said third section, and the intermediate sections and said first section being articulated to coform said seat.



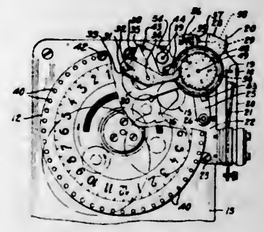
1,902,567. CALENDAR AND RECORD. LESTER B. MARTIN, Columbus, Ohio. Filed Mar. 19, 1932. Serial No. 599,986. 2 Claims. (Cl. 281—15.)

1. In a combination calendar and record, a base section, a second section, a strip of fabric connecting said sections permitting the second section to be swung vertically upward in superposed position on the base section, a record book connected to said strip between the edges of said sections so that it may be readily severed from both sections, means for securing the second section in raised position with said book between it and the base section, a calendar pad having its top edge connected to the rear side of the second section, and means engaging the lower free edges of the calendar to hold the same flat against said section, said calendar being visible for reference when said second section is raised.



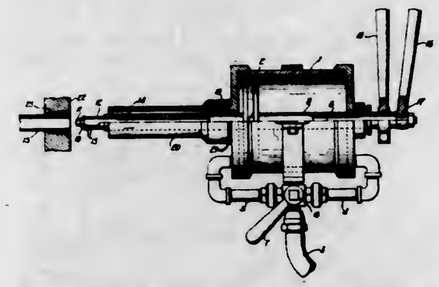
1,902,568. FUSED ELECTRICAL PLUG. LEONARD L. MAXAM, Los Angeles, Calif., assignor of one-third to Clarence S. Crews, San Pedro, Calif. Filed Apr. 10, 1931. Serial No. 529,115. 6 Claims. (Cl. 200—115.5.)

4. An electrical plug cooperative with a socket having a plurality of structurally differentiated pairs of electrical contacts therein, said plug comprising a body of insulative material receivable within said socket, a plurality of pairs of electrical contacts carried by said plug and differentiated similarly to those of the socket, means for bringing contacts of the plug into engagement with the associated contacts of the socket when the plug is inserted therein, an electrical conductor con-



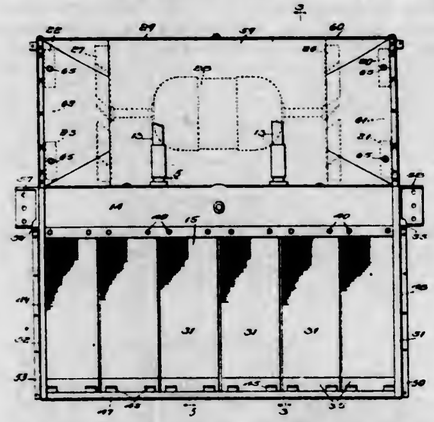
nected to each of said plug contacts, means associated with each of said plug contacts for resiliently pressing them against the associated socket contacts, and fuses interposed between certain of said conductors and their associated contacts.

1,902,569. OPERATING DEVICE. EUGENE G. MCDONALD, South Bend, Ind., assignor to Bendix Brake Company, South Bend, Ind., a Corporation of Illinois. Filed July 12, 1929. Serial No. 377,673. 14 Claims. (Cl. 74—33.)



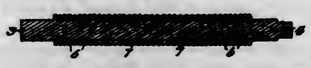
1. An operating device having a shaft-encircling opening with a slot communicating therewith so that the opening may be contracted about a shaft, and a generally U-shaped member with its sides secured to the opposite sides of the device and with its center arranged to cooperate with the edge of said device to embrace a clamping member arranged to contract said opening as described.

1,902,570. TIME-CONTROLLED ELECTRIC SWITCH. JOSEF METTLER, Zug, Switzerland, assignor to Landis & Gyr, A.-G., a Limited Joint-Stock Company of Switzerland. Filed Nov. 30, 1928, Serial No. 322,619, and in Switzerland Dec. 6, 1927. 11 Claims. (Cl. 200—38.)



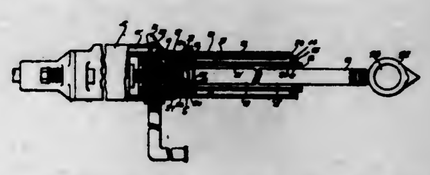
1. A time-controlled switch, including in combination a switch, clock-controlled means for closing the switch, switch opening means brought into operation by the closing of the switch for opening the switch, and means for driving the opening means from the clock mechanism only during the time the switch is closed.

1,902,571. APPARATUS FOR EXTRACTING TUBES. DAVID F. MITCHELL, Staten Island, N. Y. Filed Sept. 17, 1931. Serial No. 563,328. 6 Claims. (Cl. 29—88.2.)



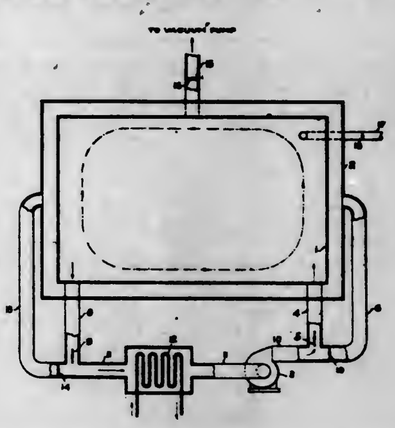
1. A device of the class described comprising a sleeve, a shaft within said sleeve, a removable extension comprising an eccentric cutting member carried by said shaft and an eccentric cutting member carried by said sleeve, said shaft being rotatable within said sleeve to move the cutting members into and out of alignment.

1,902,572. RADIATOR. ARTHUR B. MODINE, Racine, Wis., assignor to Modine Manufacturing Company, Racine, Wis., a Corporation of Wisconsin. Filed Oct. 7, 1929. Serial No. 397,877. 9 Claims. (Cl. 257—125.)



9. In a device of the kind described the combination of a plurality of heat exchange devices respectively providing top and side walls of a casing, means for advancing air through said casing, a fluid supply tank with which said device providing the top wall is connected.

1,902,573. METHOD FOR FORMING TUBES OF CELLULOID AND THE LIKE. SAMUEL A. NEIDICH, Edgewater Park, N. J. Filed Jan. 18, 1929. Serial No. 333,356. 12 Claims. (Cl. 18—56.)

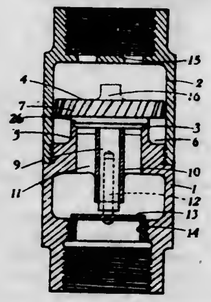


1. The method of forming a tube of celluloid and the like, with a smoothly cylindrical inner surface formed of a single material, and a smoothly cylindrical outer surface formed of a plurality of materials in an exterior mosaic structure; which includes forming a tube of smoothly cylindrical laminations of different materials, forcing different regions of an outer lamination into an inner lamination, sequentially thus embedding the same sequentially, without deforming the interior surface of said tube; and thereafter separating from the embedded portions and eliminating the portions of the outer laminations which are not thus embedded.

1,902,574. POWER FEEDING DEVICE. GUSTAVE M. NELL, Detroit, Mich., assignor to Chicago Pneumatic Tool Company, New York, N. Y., a Corporation of New Jersey. Filed Oct. 23, 1929. Serial No. 401,747. 6 Claims. (Cl. 121—9.)

1. In combination, in a rock drill, a fluid pressure percussive motor, a fluid pressure power feed for advancing said percussive motor and retracting it from the work, said feed comprising at least three nested telescoping members capable of extending to a length equal to at least twice its length when collapsed, and a single manually operated valve for controlling both said percussive motor and said feed, said valve having three control sones motive fluid, control means in each of said sones one sone controlling the operation of said percussive motor, another sone controlling the extending of said feed and the third sone controlling the retracting or collapsing of said feed, vent means under control of said valve in said second and third sones, said valve being arranged to admit pressure fluid at the third sone in all positions except neutral.

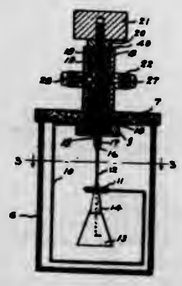
1,902,575. METHOD OF TREATING OBJECTS. LOUIS C. NICHOLS, Wauwatosa, Wis., assignor to Allis-Chalmers Manufacturing Company, Milwaukee, Wis., a Corporation of Delaware. Filed Jan. 23, 1930. Serial No. 422,963. 8 Claims. (Cl. 34—24.)



1. The process of treating which comprises placing the object to be treated in a container, raising the temperature of said object by blowing heated air into said container, against said object and out of said container for a predetermined time, heating said container from the exterior after stopping said blowing action, and subjecting

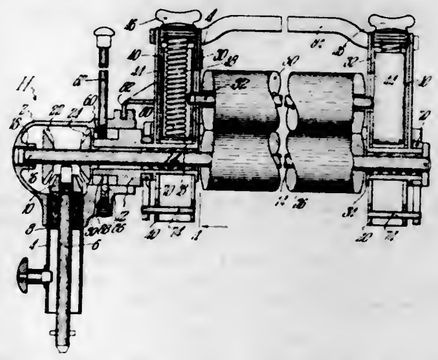
the inside of said container to a pressure lower than atmosphere by withdrawing the air and vapor from said container while maintaining the heating of said container from the exterior thereof.

1,902,576. FRICTION SURFACES. RAYMOND J. NORTON, Washington, D. C., assignor to Bendix Brake Company, South Bend, Ind., a Corporation of Illinois. Filed May 29, 1930. Serial No. 457,530. 6 Claims. (Cl. 154—52.)



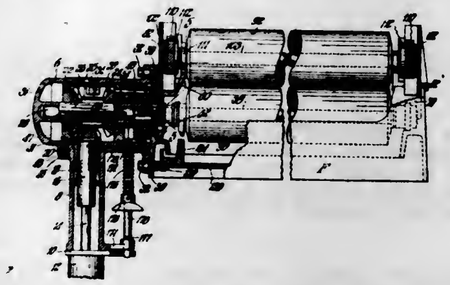
1. A friction facing comprising a bonded asbestos fiber having incorporated therein alloys of different melting points, and which alloys melt within the temperature ranges of normal braking.

1,902,577. NONRETURN VALVE. EDWARD CHARLES FREDERICK OAKLEY, Norbury, Eng. Filed Feb. 25, 1931, Serial No. 518,160, and in Great Britain Feb. 28, 1930. 5 Claims. (Cl. 277—42.)



1. A non-return valve for controlling the flow of fluids, comprising in combination a casing, a valve seating therein, a valve coacting with said seating, a plurality of angularly disposed vanes on the periphery of the head of said valve, a part screwed into the lower end of the casing below the first named valve seating, a seating formed on the inner surface of said part, a light flat plate valve coacting with said seating, the two valves being so arranged that the light plate valve closes first and permits the fluid to leak slowly past, thereby for a short period maintaining fluid pressure below the first named valve for preventing the two rapid closure thereof.

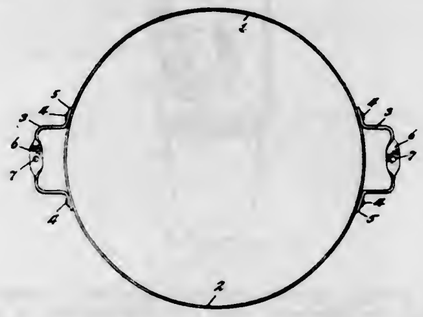
1,902,578. CIRCUIT CLOSER FOR AN AUTOMATIC SIGNALING DEVICE. WILLIAM M. PARSONS, Seattle, Wash. Filed Mar. 1, 1928. Serial No. 258,198. 3 Claims. (Cl. 200—52.)



1. In a device of the class described, a housing, a rigid stem extending upwardly from said housing, universal joint suspension means connected with said stem, a screw threaded lengthwise through said stem and adjustable from the upper end thereof, a pendulum of electrically conductive material suspended from the lower end of said screw, a cone shaped contact member on the lower end of said pendulum, a resilient electrical conductor disposed within said housing, and means forming a horizontal contact loop on the lower end of said resilient electrical conductor, said cone shaped contact member being positioned within said loop whereby vertical adjustment of said screw will adjust the clearance between said cone shaped contact member and said loop.

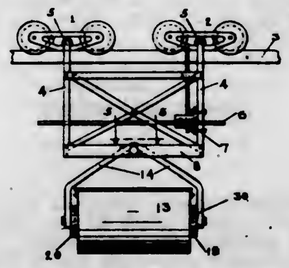
1,902,579. WRINGER. JULIAN L. PERKINS, West Springfield, Mass. Filed Apr. 6, 1931. Serial No. 528,093. 17 Claims. (Cl. 68—32.)

1. A wringer comprising in combination a support, a barrel rotatable and reciprocable therein, a shaft rotatable in said barrel having a free end extending from said support, engageable driven and driving gears associated with said shaft and support, movable means associated with said barrel and support and movable on said barrel to facilitate reciprocation of said barrel for moving said gears between neutral and operative positions, roll supporting means associated with said support and shaft, coacting wringer rolls associated with said shaft and said roll supporting means and means associated with said barrel and support to releasably hold said barrel against movement.



1,902,580. WRINGER. JULIAN L. PERKINS, West Springfield, and HIRAM D. CROFT, Springfield, Mass. Filed Aug. 6, 1931. Serial No. 555,612. 17 Claims. (Cl. 68—32.)

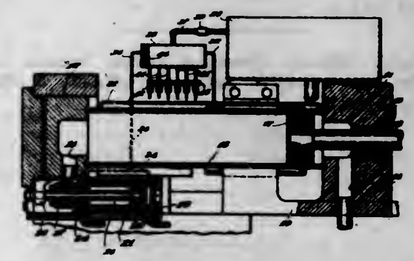
1. A wringer apparatus comprising in combination, a frame, a lower roll rotatable therein, spring pressed members at opposite ends of said frame, a guard having an upper roll associated therewith, the said spring pressed members being provided with receiveing means for receiving said guard and upper roll so that said roll may rest on said lower roll with the axes of said rolls in a certain plane, the said receiving means being arranged to permit the upper roll in contact with the lower roll



to be moved circumferentially of said lower roll so that the axes of said rolls are in a different plane from said certain plane, and releasable connections associated with said guard and spring pressed members to releasably hold said rolls in operative engagement.

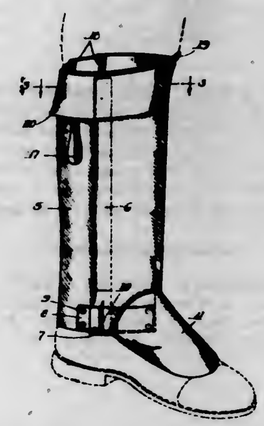
1,902,581. SUSPENSION RING FOR SCALE PANS. LEONARD W. REIS, Dumont, N. J., assignor to John Chatillon & Sons, New York, N. Y., a Corporation of New York. Filed Sept. 14, 1931. Serial No. 562,711. 12 Claims. (Cl. 265—27.)

1. A suspension ring for scale pans comprising a strip of material having a plain end and an integral loop projecting outwardly adjacent the other end, the looped end of the strip overlapping the plain end and secured thereto at both sides of the loop.



1,902,582. CONVEYER BUCKET. ROYAL N. RIBLET, Spokane, Wash. Filed Mar. 24, 1931. Serial No. 524,885. 1 Claim. (Cl. 214—61.)

In a conveyer bucket, the combination with a suspending frame having a pair of spaced, lower, parallel bars and a transversely extending pin joining said bars, of an angular bail pivoted on the pin and between said bars to prevent lateral sway of the bail, a complementary bearing plate beneath the pin and bolted to the angular bail, brackets on the ends of said bail, offset bearings on said brackets, a tiltable bucket journalled in said brackets, co-acting means on said bucket and one of the brackets for latching the bucket, and means for releasing the latching means.



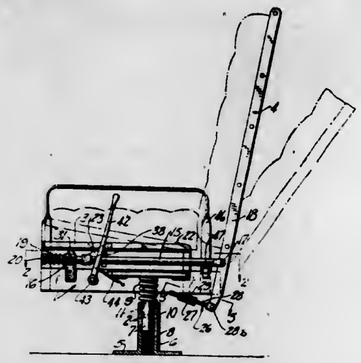
1,902,583. LUBRICATING SYSTEM. GEORGE J. RUSSELL, Waltham, Mass. Filed Mar. 18, 1930. Serial No. 436,736. 5 Claims. (Cl. 184—55.)

1. The combination with a fluid motor of the kind utilizing a relatively non-compressible working fluid and comprising a cylinder and a piston therein, of a pressure tank for supplying lubricant to a lubricating system and a tube extending between the cylinder and the tank for conducting fluid from the cylinder to the pressure tank, at least a portion of the tube being capillary to the working fluid, whereby the tube may be effective for sealing the cylinder to prevent air from passing from the tank to the cylinder

during non-working periods and to provide for removal of air from the cylinder during working strokes of the piston.

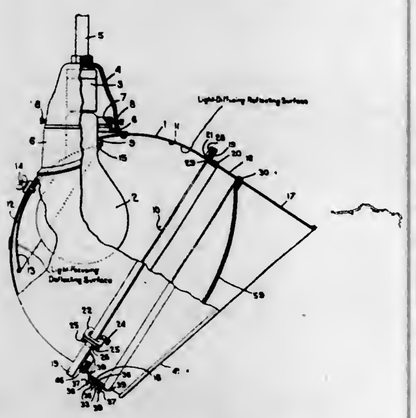
1,902,584. PULL-OFF LEGGING. SAMUEL N. SAGER, Chicago, Ill. Filed Oct. 23, 1930. Serial No. 490,572. 2 Claims. (Cl. 36—2.)

1. A pull-off legging of the quick detachable type having metal fastenings at the top for securing the overlapping parts together, and a flap secured to the underlying part of the legging and extending over the top of the overlying legging part and covering the metal fastening parts to protect them from lodgement of molten particles.



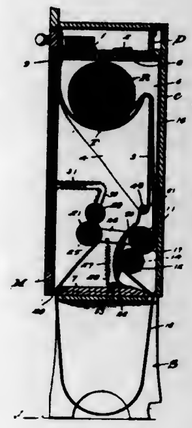
1,902,585. CABLE CONTROL. ROY SELDEN SANFORD, South Bend, Ind., assignor to Bendix Brake Company, South Bend, Ind., a Corporation of Illinois. Filed Mar. 9, 1929. Serial No. 345,703. 1 Claim. (Cl. 74—89.)

A control device comprising a cable having a rigid element secured to its ends, the rigid element being of larger diameter than the cable, a support having a bore of a diameter to fit the rigid element and into which bore a short section of the cable extends, a flexible conduit housing the cable and engaging the support at its end, and



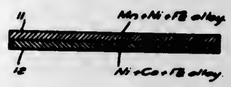
means for introducing lubricant into the annular space about said short section of the cable within the bore of said support whereby the inner end of the rigid element serves as a pump plunger for forcing lubricant into the flexible conduit.

1,902,586. CHAIR. JOSEPH A. SANTOS, Oakland, Calif. Filed Mar. 14, 1930. Serial No. 435,836. 3 Claims. (Cl. 155—116.)



1. In a chair, a frame, a seat member pivoted thereto, a member slidably mounted on said frame, means connecting said seat member to said second named member, spring means yieldingly resisting relative sliding motion between said second member and said frame, a back rest pivotally mounted on said second member, and a resilient link mechanism connected between said back rest and said frame.

1,902,587. FLOODLIGHT. KENNETH A. SAWIN, Winthrop, Mass., assignor to Wheeler Reflector Company, Boston, Mass., a Corporation of Massachusetts. Filed Dec. 4, 1930. Serial No. 500,032. 4 Claims. (Cl. 240—3.)

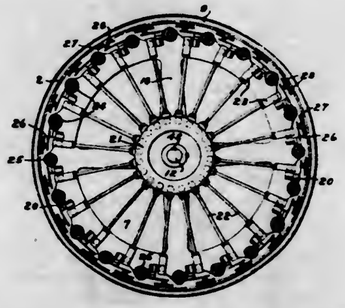


1. In an electric light fixture, the combination with a reflector, of a light within the reflector, a supporting ring detachably secured to the reflector, a visor element carried by the supporting ring, said visor element being expansible and contractible radially, a cover glass situated within the visor member and a lock for locking the visor member in its contracted condition, the cover glass being held in the visor by the contraction thereof.

1,902,588. TOWEL SERVICE APPARATUS. SAMUEL A. SCHWARTZ, St. Paul, Minn. Filed Apr. 28, 1931. Serial No. 533,527. 7 Claims. (Cl. 312—38.)

5. A towel service apparatus comprising a casing, a trough for supporting clean toweling mounted in said casing and having an apron depending from a side portion thereof, a feed roller mounted in said cabinet below said apron, soiled towel takeup means mounted in said casing in spaced relation from said feed roller and a plate projecting from the lower edge of said apron downwardly to the bottom of said casing between said feed roller and said takeup means.

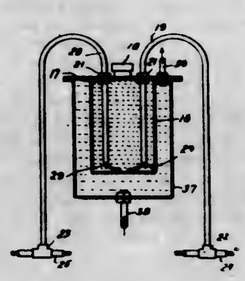
1,902,589. BIMETAL THERMOSTAT. HOWARD SCOTT, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Apr. 28, 1930. Serial No. 446,776. 2 Claims. (Cl. 297—15.)



1. A thermostatic element comprising a pair of cooperating metallic members having different temperature coefficients of expansion, the high-expansion member including approximately sixteen per cent of manganese, a major portion of iron, relatively small quantities of silicon and carbon and approximately three per cent of nickel to substantially eliminate the delta to gamma transformation of the iron within the temperature range of from 0° C. to 500° C., and the low-expansion member being an iron alloy including approximately twenty-eight per cent nickel, approximately sixteen per cent cobalt and not over one per cent each of manganese and carbon.

1,902,590. ELECTRIC FLASH-LIGHT. JAMES L. SHANNON, Longmeadow, Mass., assignor, by mesne assignments, to French Battery Company, Madison, Wis., a Corporation of Wisconsin. Filed Sept. 30, 1930. Serial No. 485,421. 2 Claims. (Cl. 200—60.)

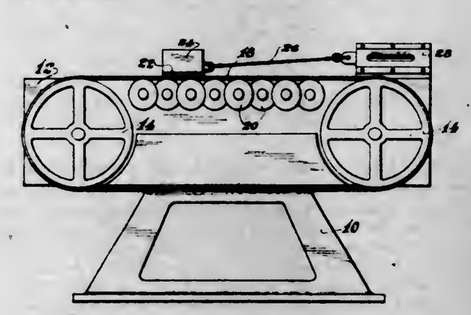
2. In a flashlight construction having a battery enclosing casing and a switch enclosing casing, a contact strip insulated from and secured to the inner surface of the battery enclosing casing, said securing means comprising two rivets whose heads project within said switch enclosing casing, a slidable switch in said switch enclosing casing which is formed with a contact loop portion at each end, means for retaining said switch in an open circuit position, means for retaining said switch in a position for making a momentary contact between one of said contact loops and one of said rivets, means for retaining said switch in continuous contact between the opposite end of said contact loops and the other one of said rivets, and means for moving said switch from any one of said positions to any other.



1,902,591. GRINDING, REFINING, AND MIXING MACHINE. CARL G. SPRADO, Milwaukee, Wis., assignor to Allis-Chalmers Manufacturing Company, Milwaukee, Wis., a Corporation of Delaware. Filed Jan. 18, 1929. Serial No. 333,314. 15 Claims. (Cl. 83—11.)

1. A device of the character described comprising a blade having front and rear grinding portions, pivot means for applying pressure to said blade between said portions, and stop means for limiting the movement of said blade about said pivot means.

1,902,592. OILING SYSTEM FOR MOTOR CARS. EDGAR CLARK STANLEY, Glen Cove, N. Y., assignor, by mesne assignments, to Motor and Plane Accessories, Inc., Detroit, Mich., a Corporation of Delaware. Filed Feb. 10, 1926, Serial No. 87,246. Renewed Aug. 11, 1932. 15 Claims. (Cl. 184—7.)

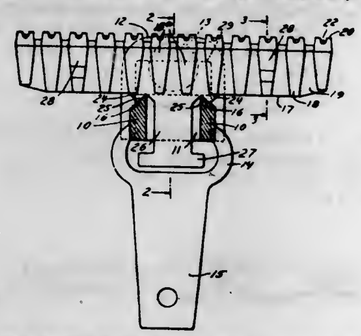


1. An oiling system for use in conjunction with a prime mover comprising a sealed receptacle to contain oil, the receptacle being so mounted as to be exposed to heat applied during the operation of the prime mover, a conduit leading from below the surface of the oil in the receptacle to a point in proximity to an element to be lubricated, a wick within the conduit extending a substantial proportion of the length thereof, said system upon operation of the prime mover and the application of heat to the fluid within the receptacle causing oil to flow from the receptacle to the element and causing the flow of oil to cease upon the stopping of the prime mover and the cooling of the receptacle.

1,902,593. VACUUM CLEANER HANDLE STRUCTURE. BERNARD JACQUES TAMARIN, Philadelphia, Pa. Filed July 19, 1930. Serial No. 469,247. 2 Claims. (Cl. 242—77.)

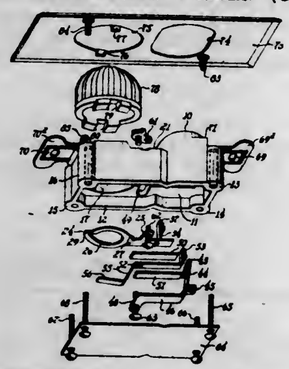
1. A vacuum cleaner handle structure comprising companion casing members having marginal flanges arranged in overlapping relation with each other and further provided with two sets of neck sections extending from opposite points from the casing members, a sleeve slipped over and secured to one set of neck sections, a tubular handle having one end portion slipped over and securing the remaining neck sections together, a bearing supported by one of the casing members, an axle secured to the remaining casing member, and also secured to said bearing thereby forming an interconnection between the central portions of the said casing members, and a reel unit removably mounted on said axle and said bearing.

1,902,594. BRAKE-LINING TESTING. GEORGE J. THOMAS, South Bend, Ind., assignor to Bendix Brake Company, South Bend, Ind., a Corporation of Illinois. Filed Sept. 13, 1928. Serial No. 305,672. 4 Claims. (Cl. 73—51.)



1. A machine for testing brake linings and the like comprising an endless power driven band having a rectilinear reach, means for pressing the work against said reach, and means connected to said first-mentioned means for yieldingly overcoming the frictional drag of the band on the work and measuring by its yield the frictional drag.

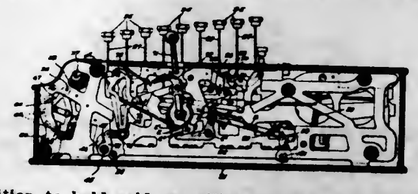
1,902,595. GRATE BAR. JAMES S. THOMPSON, New Rochelle, N. Y., assignor to Firebar Corporation, Cleveland, Ohio, a Corporation of Delaware. Filed July 1, 1931. Serial No. 548,124. 13 Claims. (Cl. 126—180.)



1. A grate bar which comprises the combination of a carrier made up of a pair of supporting members connected at their ends by arms and spaced apart to define an opening through the carrier from top to bottom and substantially the full length thereof, and a plurality of fuel-supporting units on the carrier, each having a part extending

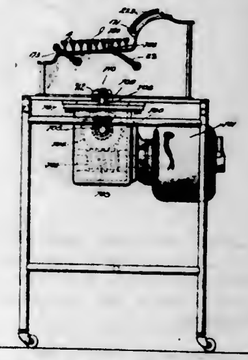
through said opening and provided with a portion underlying said members and of a greater over-all width than the width of the space between said members, at least

one of said arms having a passage communicating with said opening and of a size to permit said portions of the units to be moved through it.



1,902,596. COMBINED PLUG RECEPTACLE AND WARNING LIGHT FIXTURE. WILLIAM C. TREGONING, Wauwatosa, Wis., assignor to Cutler-Hammer, Inc., Milwaukee, Wis., a Corporation of Delaware. Filed Nov. 6, 1929. Serial No. 405,164. 7 Claims. (Cl. 173—330.)

1. In a combined plug receptacle and warning light fixture, in combination, a one-piece molded insulating base having a plurality of recesses extending upwardly from the lower surface thereof, center and screw shell lamp contacts located in one of said recesses, attachment plug receptacle contacts in other of said recesses, wiring terminal plates located in spaced relation to each other on the upper surface of said base, a pair of screws penetrating said base and having mechanical and electrical connection with the respective terminal plates and with certain of said contacts, said screws clamping all of said contacts in position within said base, and means comprising a plurality of plates for normally insulating certain of said contacts from other of the same and from one or both of said terminal plates.

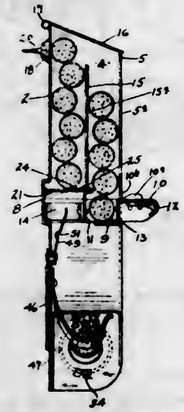


1,902,597. CALCULATING MACHINE. JOSEPH A. V. TUSCK, Wilmette, Ill., assignor to Felt & Tarrant Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed Sept. 29, 1927. Serial No. 222,733. 8 Claims. (Cl. 235—130.)

1. In a multiple-order key-driven calculating machine, in combination: accumulator mechanism including numeral wheels and trains of gearing; column actuators therefor; driving keys therefor; cancelling mechanism operable to detrain said gearing; means for detaining said gearing in detrained position; a shaft adapted to be moved when a column actuator is out of normal position; a member connected to said shaft and operable thereby to prevent said detaining means from further detaining said detrained gearing; a cancelling mechanism lock between said shaft and said cancelling mechanism said lock connection being operable by said shaft when said shaft is in moved

position to hold said cancelling mechanism in cancelling position until the column actuator that has moved said shaft has returned to normal position and being adapted to so hold the cancelling mechanism until after said shaft has moved said member to permit said detaining means to detain said detrained gearing whereupon said lock releases said cancelling mechanism; substantially as specified.

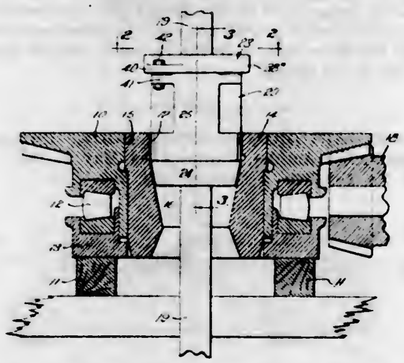
1,902,598. CALCULATING MACHINE. JOSEPH A. V. TUSCK, Wilmette, Ill., assignor to Felt & Tarrant Mfg. Company, Chicago, Ill., a Corporation of Illinois. Filed July 7, 1922, Serial No. 573,431. Renewed Feb. 18, 1932. 16 Claims. (Cl. 235—62.)



1. In a calculating machine, in combination: accumulator mechanism; multiplying mechanism adapted to actuate the accumulator mechanism; a continuously operating power member; a driven member connectable with said multiplying mechanism; a spring actuated clutch interposed between said members; and a locking device, releasable only upon setting of the multiplying mechanism for both factors of a multiple stroke problem, for permitting such clutch to operate to connect the driven member with the driving member; substantially as specified.

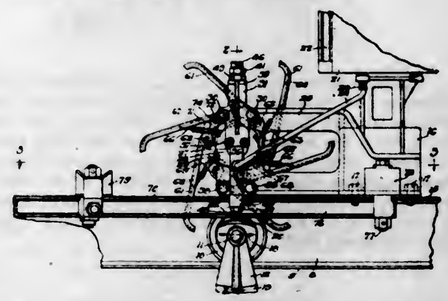
10. A multiple-order calculating-machine controlled by multiplicand and multiplier keyboards, combined with a common member for transferring power to all the orders of actuating mechanism and adapted to receive hand or other flexible power, and means for delivering an inflexible power to the said common member, said means being controlled by the said multiplier keys, to regulate the varying amount of inflexible power required to effect the varying number of actuations of the actuating mechanism in accordance with the predetermined setting of the multiplier keys.

1,902,599. CIGARETTE DISPENSING AND LIGHTING MACHINE. SERGIUS VERNET, Brooklyn, N. Y. Filed Jan. 13, 1926. Serial No. 80,881. 7 Claims. (Cl. 312—86.)



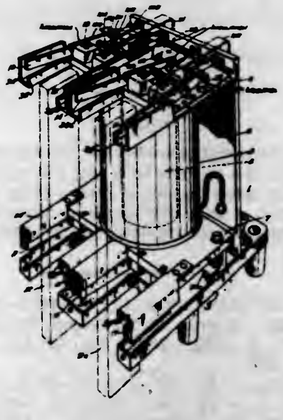
1. In a cigarette dispensing and lighting machine, a container for a supply of cigarettes comprising front and rear compartments, a dispensing slide mounted at the bottom thereof and having an opening extending therethrough large enough to accommodate a cigarette, means to close the bottom and open the top of said opening when said slide is in its normal outer position and to open the bottom and close the top when said slide is in its inner position, and means connected with said slide to urge a cigarette from said rear compartment to said front compartment when said front compartment is empty.

4. In a cigarette dispensing and lighting machine, means to dispense a cigarette and means to light the dispensed cigarette including a flue, an ignition device comprising a wire heating element, a non-conducting support therefor having a duct therethrough, and means to releasably secure said support and heating element at the bottom of said flue to provide a path for a current of air through said duct, across said heating element and up said flue.



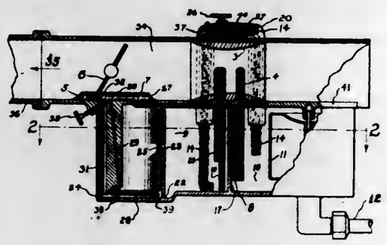
5. In a cigarette dispensing and lighting machine, a container for a supply of cigarettes, a dispensing means at the bottom of said container to drop one cigarette at a time from said container, a hook attached to said container, a second hook attached to said dispensing means, said hooks being substantially in line and cooperating to receive a cigarette when said dispensing means is operated and inclined forwardly when said dispensing means is released to bring one end of said cigarette into more easily removable position.

1,902,600. BUSHING. WILLIAM A. VOCK, Long Beach, Calif. Filed Oct. 5, 1931. Serial No. 566,992. 13 Claims. (Cl. 253—23.)



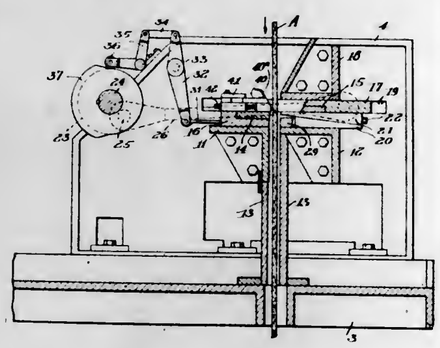
1. A bushing for use in a rotary table to form a drive between the table and a drill stem, which bushing includes a body to be carried by the table and having an opening for passing the drill stem, and a plurality of rotatable members mounted in the opening for engaging the drill stem, the said members being related vertically so that when during vertical movement of the drill stem one of the said members comes into register with one of the points on the drill stem previously engaged by one of the other members all of the said other members are out of register with the other points on the drill stem previously engaged by said other members.

1,902,601. AUTOMATIC LUBRICATOR. JOSEPH R. WARNER, Fort Wayne, Ind., assignor to S. F. Bowser & Company, Inc., Fort Wayne, Ind., a Corporation of Indiana. Filed Aug. 8, 1929. Serial No. 384,341. 12 Claims. (Cl. 184—3.)



1. In automatic lubricating mechanism, the combination with a lubricator, of means for operating the same, a pivoted lever in the path of the moving part to be lubricated and connected to said operating means to serve as an actuator therefor, and a retaining spring connected to said lever to permit swing thereof on its pivot when said moving part is reversed.

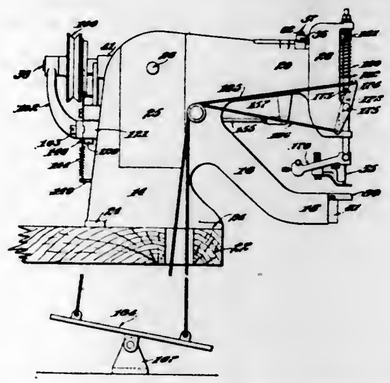
1,902,602. RELAY. HAROLD W. WILLIAMS and DANILO SANTINI, East Pittsburgh, Pa., assignors to Westinghouse Electric and Manufacturing Company, a Corporation of Pennsylvania. Filed May 22, 1928. Serial No. 279,771. 12 Claims. (Cl. 175—336.)



1. In an inductor relay, a magnetizable coil, an armature, a magnetizable plate for cooperating magnetically with said armature, and a magnetic shield disposed to prevent the passing of magnetic lines of force directly between the armature and the plate until the plate is in a predetermined position relative to the armature.

1,902,603. AUTOMATIC PRIMING DEVICE. WESLEY WILSON, Chicago, Ill., assignor, by direct and mesne assignments, to Bendix Aviation Corporation, South Bend, Ind., a Corporation of Delaware. Filed Aug. 29, 1927. Serial No. 216,171. 6 Claims. (Cl. 123—179.)

1. The combination with an internal combustion engine, carburetor and throttle, of a means for automatically supplying additional fuel to the fuel mixture of said carburetor when the engine is being started, the total quantity of said additional fuel to vary as the time interval between said starting and the last stopping of the engine previous to said starting varies, and a thermostatic means for controlling the action of said automatic means of supplying additional fuel.

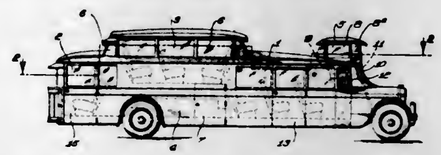


1,902,604. SHEET SEVERING MECHANISM. OTTO R. WINTER, Cincinnati, Ohio, assignor to The Upson Company, Lockport, N. Y., a Corporation of New York. Filed Jan. 22, 1930. Serial No. 422,686. 6 Claims. (Cl. 164—49.)

1. In a sheet severing mechanism, the combination with a fixed knife and a movable knife cooperating therewith, of guides for the latter including a supporting surface having a plurality of adjusting means at intervals along the length of the knife to regulate its cooperation with the fixed knife.

1,902,605. MACHINE FOR ATTACHING ORNAMENTS TO SHOES. GUSTAF E. ANDERSON, Brockton, Mass. Filed May 6, 1926. Serial No. 107,140. 9 Claims. (Cl. 112—258.)

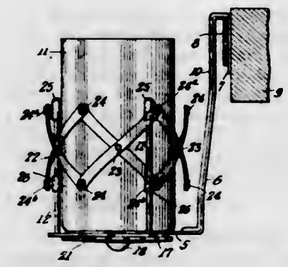
1. A machine of the character described, comprising a frame made up of an overhanging arm carrying a main shaft and operating instrumentalities, a lower work-supporting arm thereunder having its end of a diameter sufficiently restricted to permit a shoe to be mounted thereon with its vamp uppermost and in position to be operated on by the instrumentalities on said overhanging arm, said arm being bent upwardly a short distance from its end to permit the heel of the shoe to be raised back of said end, operating instrumentalities carried by the end of said lower arm, a short shaft rotatably mounted in the bent upwardly end of said arm and a transmission shaft



rotatably mounted in the oblique portion of said arm for transmitting rotary movement from said main shaft to said short shaft.

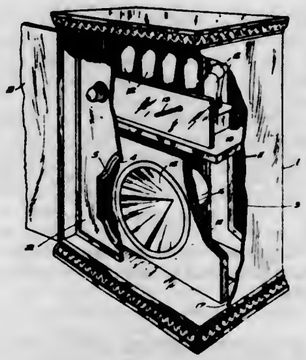
1,902,606. METHOD OF MAKING A SPRING COVER. FRED. W. ANDREW, Philadelphia, Pa., assignor to Briggs & Stratton Corp., Milwaukee, Wis., a Corporation of Delaware. Filed Mar. 12, 1930. Serial No. 435,054. 6 Claims. (Cl. 153—1.)

1. The method of covering a vehicle spring, which consists in taking a flat metal strip and draw-forming this into a curved channel-shaped member, then slitting the sides of the channel into sections, forming flanges at the free edges of said sections, then placing the channel over the spring so the web of the channel fits on one side of the spring, forcing the sides of the channel member over the edges and other side of the spring so said flanges are in close juxtaposition along said other side of the spring, placing a continuous substantially W-shaped seam member of metal over said flanges, said seam member being formed to engage each of said flanges on both sides thereof between the legs of the W, and then spreading said flanges and at the same time flattening the seam member against the side of the spring.



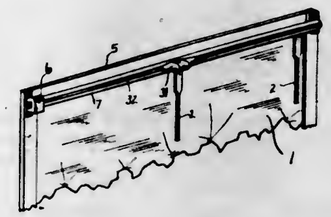
1,902,607. AUTOMOBILE STAGE BODY. DWIGHT E. AUSTIN, Los Angeles, Calif. Filed May 7, 1927. Serial No. 189,705. 2 Claims. (Cl. 296—24.)

1. In an automobile stage body, the combination with a stage body having entrance and exit means at its opposite ends, an aisle connecting said entrance and exit



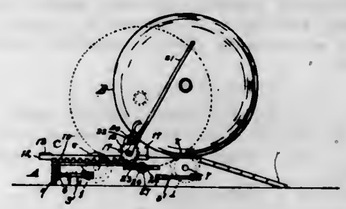
means for continuous passage therebetween, the intermediate portion of the aisle being raised above the floor portions within the body immediately adjacent said entrance and exit means, of seat compartments arranged on different levels adjacent the aisle, seats in said compartments, the floor levels of the seat compartments on the lower level being substantially on the level with the floor portions adjacent said entrance and exit means, and the floor levels of the seat compartments on the higher level being positioned above the raised portion of the aisle and communicating therewith.

1,902,608. GLASS HOLDER. LOUIS E. BALTZLEY, Glen Ridge, and FREDERICK GOERTZ, Newark, N. J. Filed Sept. 29, 1930. Serial No. 484,975. 4 Claims. (Cl. 248—20.)



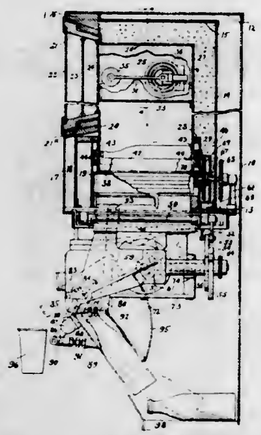
1. A glass holder comprising a base, glass confining rods upstanding from said base, supports for said rods movably mounted on the base, a rotatable control disc mounted on the base and connected with said supports for shifting the same, said control disc being dished and frictionally gripping said supports.

1,902,609. LOUD SPEAKER MOUNTING. GEORGE L. BEERS, East Pittsburgh, and WILLIAM S. BARDEN, North Braddock, Pa., assignors to Westinghouse Electric and Manufacturing Company, a Corporation of Pennsylvania. Filed Sept. 19, 1928. Serial No. 306,869. 3 Claims. (Cl. 274—2.)



1. In combination, a sound-reproducing device, including a baffle, a cabinet that has a tendency to accentuate by resonance-chamber effect, certain of the sound frequencies that said device is capable of reproducing, said cabinet being substantially open in the rear, said baffle being located within said cabinet and in spaced relationship with certain of the walls of said cabinet so that said tendency to accentuate is nullified.

1,902,610. WINDSHIELD WIPER. PETER F. BERRY, Detroit, Mich. Filed July 6, 1931. Serial No. 548,919. 6 Claims. (Cl. 15—253.)

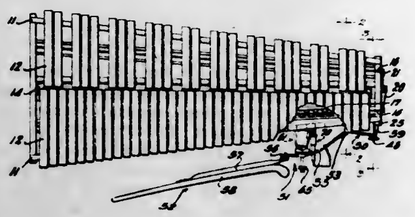


1. In a windshield wiper, the combination with a windshield, of a pair of wiper arms reciprocatory respectively between the median vertical line of said shield and its lateral margins, a threaded shaft extending across said shield, an electric motor driving said shaft, a pair of nuts threaded upon and reciprocatory by said shaft respectively at each side of the vertical median line of the shield, means attaching each of said wiper arms to one of said nuts, a reversing switch controlling said motor, positioned adjacent to the mid portion of said shaft, and comprising a single control element directly projecting from such switch substantially toward said shaft, and means carried by each of said nuts engageable with said control element in substantially identical inner limiting positions of said nuts to reverse the motor.

1,902,611. CARRIER FOR CABLE AND WIRE REELS. EARL P. BLACKMAN and LEON D. BLACKMAN, Battle Creek, Mich.; said Earl P. Blackman assignor to said Leon D. Blackman. Filed Oct. 16, 1931. Serial No. 569,300. 6 Claims. (Cl. 242—54.)

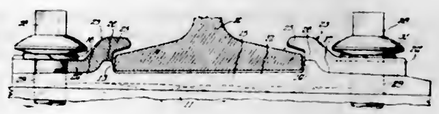
1. In a reel or spool carrier, oppositely disposed parallel narrow rectangular side pieces adapted to seat on their lower edges, said pieces sloping downwardly and outwardly from their upper narrow edges, a tramway mounted upon said sloping portions, a flanged ended roller journalled to the rear and in close proximity to the upper rear edge of said tramway, a secondary flanged ended roller journalled in spaced parallel arrangement to said first named roller, in said side pieces, and ball bearing castors longitudinally adjustable between said rollers on the inner side faces of said side pieces above the axles of said rollers.

1,902,612. VENDING MACHINE. CARL W. BLOSSOM, Cleveland, and WILLIAM H. STAPLES, Cleveland Heights, Ohio. Filed May 31, 1930. Serial No. 457,726. 8 Claims. (Cl. 225—21.)



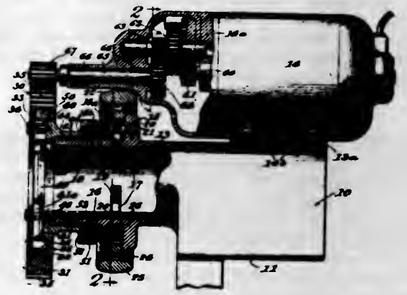
1. A vending apparatus comprising means adapted to contain a plurality of capped bottles filled with liquid, and means automatically operable upon the insertion into the apparatus of a suitable medium, such as a coin, token, or the like, for decapping one of the bottles and emptying the contents thereof into a suitable container.

1,902,613. FUSE. GUSTAV BLUMBERG, Berlin-Spandau, Germany, assignor to Siemens & Halske Aktiengesellschaft, Wernerwerk, Siemensstadt, near Berlin, Germany. Filed Apr. 28, 1930, Serial No. 447,847, and in Germany July 22, 1929. 7 Claims. (Cl. 200—131.)



6. In an electric fuse, a transparent tube, electrodes at each end thereof, a fusible metallic coating deposited on the inner surface of said tube in the form of a ring, said metallic coating rendering the tube opaque as long as the coating is intact, and transparent when the fuse is blown by an excessive current extending between said electrodes.

1,902,614. CONTROL MECHANISM FOR VIBRA HARPS. HARRY A. BOWER, Los Angeles, Calif. Filed Oct. 1, 1931. Serial No. 566,296. 13 Claims. (Cl. 84—410.)



1. A musical instrument having a percussion means to produce musical tones of different pitches, a tubular resonator to respond to each different tone, a vibrator for each resonator, a driving means to operate said vibrators, a setting means to initially set the driving means to operate the vibrators at a certain predetermined period of vibration, and a control means operable by the body of the player of the instrument to increase the rate of drive to decrease the period of vibration.

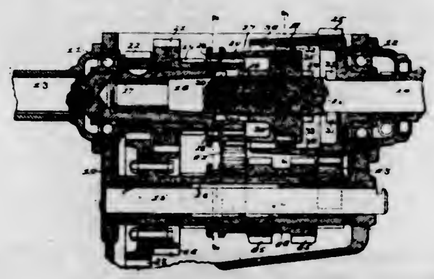
1,902,615. RAIL SUPPORT AND FASTENING MEANS. WILLIAM S. BOYCE, Chicago, Ill. Filed Oct. 13, 1930. Serial No. 488,237. 10 Claims. (Cl. 238—338.)

1. In combination, a tie plate having a rail seat portion, end portions projecting from the opposite sides of said rail seat portion, and a rail-abutting shoulder at one side of said rail seat, a rail seated on said rail seat, and a fastening clip seated on the end portion of the tie plate outside of said rail-abutting shoulder and provided with a shoulder portion constituting an extension of said tie plate shoulder, and a lip portion overlying the base flange of the rail in spaced relation thereto.

1,902,616. PORTABLE PIPE CUTTER. ALPHONSE O. BRUNGARDT, Scituate, FRENCH H. MOREHEAD, Brookline, and JAMES W. MORRISSEY, Medford, Mass. Filed June 27, 1930. Serial No. 464,222. 13 Claims. (Cl. 81—190.)

1. A hand portable, power-operated pipe cutting device adapted to cut and sever pipe of various sizes and diameters, comprising a rotatable head, cutting and centering members carried by said head, cam means forming a part of said head and adapted to engage said cutting and centering members to propel them inward simultaneously and progressively toward the center of the pipe when the head is revolved, means for gripping a pipe and supporting it centrally within the rotatable head, and an electric motor forming a fixed part of said device for rotating one of said head members to first cause movement of the cutting and centering members by the cam means into engagement with the pipe and then automatically to rotate said head members as a unit to cut and sever the pipe.

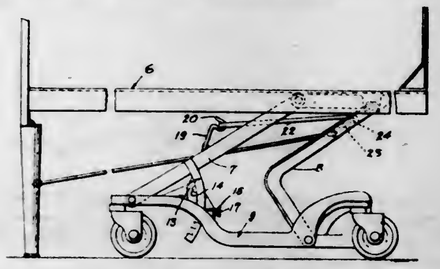
1,902,617. HIGH-VOLTAGE BUSHING DEVICE. GORDON A. BURR, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Feb. 6, 1929. Serial No. 337,884. 1 Claim. (Cl. 173—318.)



The combination with a condenser bushing including conducting cylinders of different lengths, and a dielectric

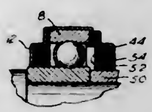
tube enclosing a portion thereof, of a tap lead extending from an intermediate conducting cylinder adjacent to an end thereof at a position between the ends of the tube

and along a portion of a shorter outer conducting cylinder of the bushing in insulated relation thereto within the tube to a position beyond one end of the tube.



1,902,618. TRANSMISSION MECHANISM. EVERETT R. BURTNETT, Pasadena, Calif. Filed Jan. 14, 1931. Serial No. 508,601. 20 Claims. (Cl. 74—57.)

18. In transmission mechanism, the combination of a drive shaft, a driven shaft in alignment with said drive shaft, a device operating to drive said driven shaft in one direction and permit over-run of said driven shaft in the same direction under momentum of the latter, and means for driving said driven shaft from said drive shaft through the medium of said device at a different speed than said drive shaft including a gear train, the driven gear element of said gear train being in encircling and rotatable relative position to said drive shaft.



1,902,619. COUNTERBALANCING MEANS FOR FOLDABLE BEDS. GORDON F. CANE, San Francisco, Calif., assignor, by mesne assignments, to Thorn Thompson, San Francisco, Calif. Filed July 23, 1929. Serial No. 380,320. 5 Claims. (Cl. 5—164.)

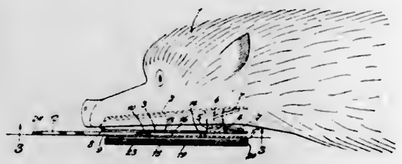
1. In a folding bed, a rollabout truck, an upendable bed frame, interconnecting means between the frame and truck whereby the frame may be swung on the truck from vertical to horizontal position and vice versa, a helical spring mounted on said truck and arranged with the ends thereof extended at substantially right angles from the longitudinal axis of the spring, means connecting one of said spring ends to said first named means, and a member slidably and adjustably carried by said truck and connected to the other end of said spring whereby

upon displacement of said member relative to said truck the torsional twist exerted by said spring may be adjustably varied.

1,902,620. BEARING AND SEAL THEREFOR. LELAND D. COBB, Bristol, Conn., assignor to The New Departure Manufacturing Company, Bristol, Conn., a Corporation of Connecticut. Filed Aug. 25, 1930. Serial No. 477,589. 11 Claims. (Cl. 308—187.)

1. In a unit-handling antifriction bearing and seal, an inner race ring, an outer race ring, a series of rolling elements between the race rings, and a closure plate detachably carried by the bearing to close the space between the race rings, said plate comprising a circular body portion extending alongside the end of the bearing, a web bent inwardly from the outer edge of the body portion and abutting against the end of the bearing to hold the body portion spaced therefrom, and means for securing the web to one of the race rings; substantially as described.

1,902,621. ZINC COATED ARTICLE. SIDNEY H. DAVIS and CARL O. ANDERSON, Baxter Springs, Kans., WILLIAM N. SMITH, Platteville, Wis., and HERBERT R. HANLEY, Rolla, Mo., assignors to The Century Zinc Company, a Corporation of Ohio. Filed Nov. 2, 1928. Serial No. 316,875. 3 Claims. (Cl. 29—181.)

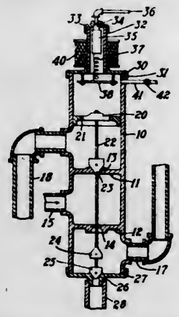


1. As a new product of manufacture, a ferrous article having a plurality of irregularly shaped minute surface depressions, bodies of spongy lead disposed in and partially filling said depressions, and a coating of substantially pure zinc intimately associated with all of said bodies of lead and contacting said article itself in the spaces between adjacent bodies.

1,902,622. HANGER FOR FUR SCARFS AND THE LIKE. GOLIAT DAVISON, St. Louis, Mo., assignor of one-third to John Speroulias and one-third to George Abatgis, St. Louis, Mo. Filed May 22, 1931. Serial No. 539,156. 11 Claims. (Cl. 223—68.)

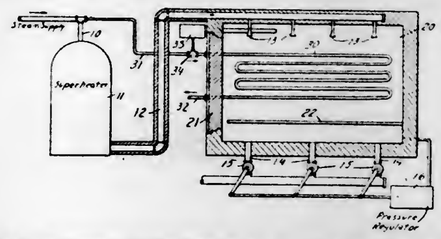
1. A device of the character described comprising a supporting pivot, means holding said pivot in connection

with an article to be suspended, a hanger member having one end pivoted on for swinging movements about said pivot and having a hook on the opposite end, and a wall



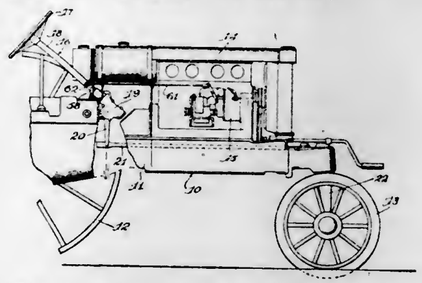
attached to said pivot and arranged to cover said hanger member when said hanger member is in an unoperated position and to expose said hook when said hanger is in its operated position.

1,902,623. FREEWHEELING ATTACHMENT. JAMES DORST and PHILIP BACHHUBER, Mayville, Wis. Filed May 2, 1931. Serial No. 534,628. 9 Claims. (Cl 192—.01.)



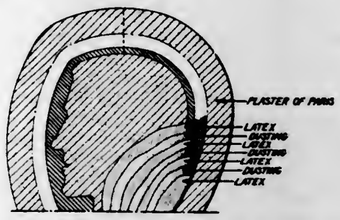
1. A free wheeling device of the character described, comprising the combination with a motor vehicle and an engine therefor, of a resilient diaphragm supported within the vehicle, lever means connecting the diaphragm with the clutch pedal for rocking of the pedal upon movement of the diaphragm, said diaphragm normally maintaining said lever means ineffective and suction means connecting the diaphragm and the vehicle engine whereby to move the diaphragm.

1,902,624. VALVE MECHANISM. ANDREW J. DOTTERWEICH, Pittsburgh, Pa., assignor to Automatic Water Softener Company, Pittsburgh, Pa., a Corporation of Delaware. Filed July 1, 1927. Serial No. 202,842. 8 Claims. (Cl. 137—139.)



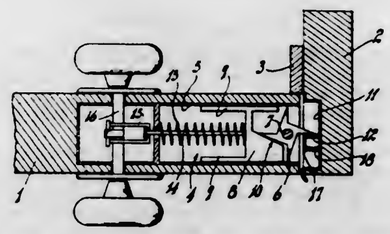
1. In a flow control system, a valve chamber having divergent outlet passages and having a common inlet passage, a single valve controlling the flow through said divergent outlet passages, a leaky piston connected to said valve, means independent of said valve for causing flow through said inlet passage around said leaky piston to close one of said outlet passages and said valve being responsive to the flow from said inlet passage against said valve for causing the flow to the other said outlet passages.

1,902,625. METHOD AND APPARATUS FOR STERILIZING. ARTHUR L. DUNHAM, Tompkinsville, N. Y. Filed June 22, 1929. Serial No. 372,848. 10 Claims. (Cl. 167—3.)



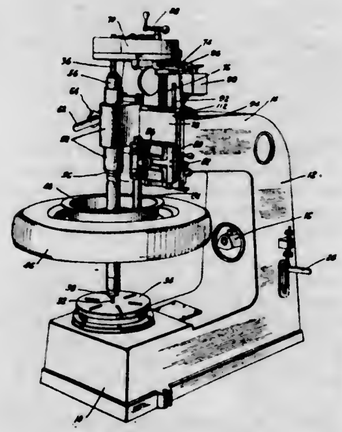
5. A chamber provided with an opening for the introduction of an article to be sterilized, means for closing the opening, means for raising the temperature within the chamber, a source of superheated steam, and means for passing a current of the superheated steam into and out of the chamber.

1,902,626. DEVICE FOR SYNCHRONIZING THE SPEED OF A VEHICLE WITH THE STEERING MECHANISM THEREOF. OSCAR E. EGGEN, Charles City, Iowa, assignor to Oliver Farm Equipment Company, a Corporation of Delaware. Filed July 6, 1931. Serial No. 548,754. 9 Claims. (Cl. 180—82.)



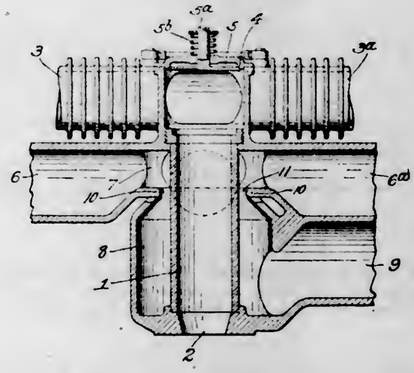
1. The combination with a motor vehicle, of an internal combustion engine for propelling said vehicle, traction elements operatively driven by said engine, steering means for steering said vehicle, a governor for controlling the speed of said engine, and means for synchronizing said steering means with said governor for controlling the speed of said vehicle when making a turn.

1,902,627. MOLD AND METHOD OF MAKING THE SAME. PAUL ELBOGEN, Mount Kisco, N. Y., assignor of one-third to George D. Kratz, Scarsdale, N. Y. Filed July 5, 1932. Serial No. 620,797. 10 Claims. (Cl. 18—47.)



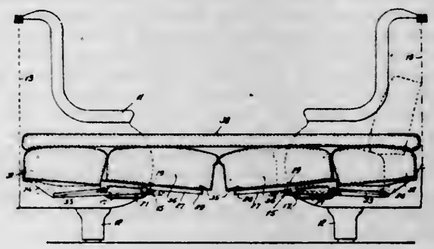
1. A mold for the casting of articles having an inner matrix portion and outerly backing portions, said inner matrix being formed principally of rubber derived from rubber latex and the more outerly portions of the mold comprising laminated layers of gypsum alternating with rubber.

1,902,628. DOORLOCK. WALDEMAR A. ENDTER, Long Beach, Calif. Filed Sept. 13, 1930. Serial No. 481,707. 6 Claims. (Cl. 292—213.)



2. In a latch construction, a rotary bolt capable of free rotation in all positions when released, including a plurality of heads, any one of which is adapted to engage a keeper, means engageable with any one of the heads, said means including means for imposing a continuous rotation of the bolt in a latching direction when the bolt is in keeper engaging position.

1,902,629. DRUM TRUING MACHINE. WILLIAM F. EVANS, South Bend, Ind., assignor, by mesne assignments, to Bendix Aviation Corporation, New York, N. Y., a Corporation of Delaware. Filed Apr. 8, 1929. Serial No. 353,279. 11 Claims. (Cl. 51—50.)

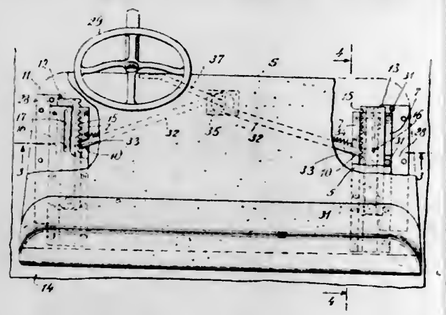


1. A machine comprising, in combination, a motor-driven wheel support, a spindle in alinement with said support and driven thereby through the wheel, a tool, and tool-traversing means driven by said spindle, together with adjusting means for shifting the tool at right angles to its direction of traverse.

1,902,630. CERAMIC CATALYZER. ALICE MAUDE FAIRCHILD, Chicago, Ill., assignor, by mesne assignments, to The Mantle Lamp Company of America, Chicago, Ill., a Corporation of Illinois. Filed July 6, 1929. Serial No. 376,341. 10 Claims. (Cl. 23—288.)

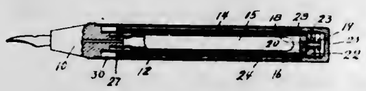
1. A catalytic member for use in treating hydrocarbons which includes a ceramic body structure containing catalytic zirconium and platinum halogen compounds.

1,902,631. SEAT. GERHARD FLINTERMANN, West Orange, N. J. Filed May 8, 1929. Serial No. 361,405. 8 Claims. (Cl. 155—6.)



1. A seat comprising a frame, a rigid support therefor, resilient supporting means interposed between said frame and said rigid support and connecting the same, a cushion support and horizontally extending means for slidably connecting said cushion support to said frame whereby said cushion support may be moved in a direction from front to rear of the seat to change the horizontal relationship between the cushion support and the resilient means.

1,902,632. ADJUSTABLY SUPPORTED SEAT. GERHARD FLINTERMANN, West Orange, N. J. Filed Apr. 25, 1931. Serial No. 532,827. 11 Claims. (Cl. 155—14.)



1. In a device of the character described, two relatively movable members comprising a fixed support and a seat, a pair of spaced substantially parallel guides both extending in a single substantially horizontal plane from front to rear of said seat and fixed to one of said members, a separate slide movably carried in each of said guides,

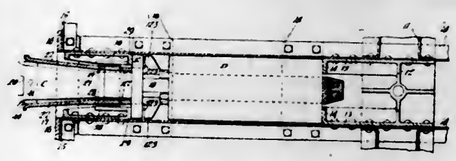
anti-friction means disposed between one only of said guides and its corresponding slide and resilient means interposed in supporting and connecting relationship be-

tween each of said slides and the other of said members whereby said two slides may move relative to each other to a limited extent as said slides move in said guides.

1,902,633. FOUNTAIN PEN. WILLIAM J. FOLEY, West Somerville, Mass. Filed Oct. 24, 1931. Serial No. 570,817. 2 Claims. (Cl. 120—47.)

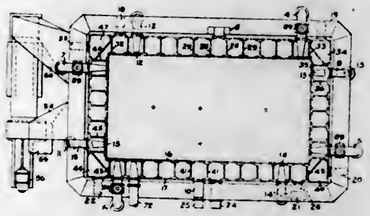
1. In a self-filling fountain pen having a collapsible ink sack, a tube enclosing said sack and having an air tight connection at one end with the mouth thereof, a piston disk mounted on the opposite end of said tube, arranged for limited movement axially thereof, and having a constantly open air passage therethrough to the interior of said tube, a tubular plunger closed at one end and telescopically fitted on said tube at its opposite end, with its inner surface having an air tight connection with the periphery of said disk in all relative positions thereof, said disk being inwardly movable by the frictional engagement of the plunger therewith when moved to force air into the tube thru said passage, and said tube having a vent passage arranged to be obstructed by said piston disk when moved inward and to be fully opened when the disk is moved outward.

1,902,634. DROP SEAT PAJAMA. NATHAN A. GROSS, Fords, N. J., assignor to William Gross, Fords, N. J. Filed Sept. 26, 1931. Serial No. 565,332. 2 Claims. (Cl. 2—83.)



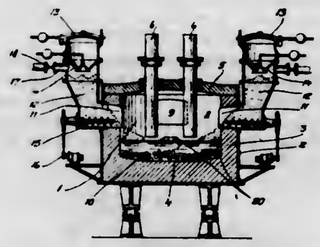
1. In a pajama, material in the form of pajamas open at the shoulders and having shoulder straps attached upon the rear and extendable across to the front for closing the opening, said material being open at the seat portion and provided with an upwardly extended flap for closing this latter mentioned opening, said flap having extensions to the front of the garment, said shoulder straps extending inside and down the front of the garment to the vicinity of the flap extensions, means for detachably securing the upper portion of the front of the garment on to the shoulder straps, and means for detachably securing the free ends of the shoulder straps with the flap extensions, comprising buttons upon the ends of the shoulder straps engageable through button holes formed in the front of the garment and button holes formed in the flap extensions.

1,902,635. GREASE AND METHOD OF MAKING THE SAME. FRANK C. GEBHARDT, Erie, Pa., assignor to United Oil Manufacturing Company, Erie, Pa., a Corporation of Pennsylvania. Filed June 6, 1927. Serial No. 197,003. 13 Claims. (Cl. 87—9.)



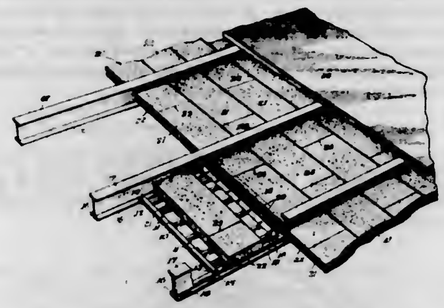
1. The method of forming grease which consists in mixing and heating mineral oil of a viscosity of not less than ninety seconds Saybolt at 212° F. and an aluminum salt of fatty acid of general formula $C_nH_{2n}O_2$ when n is not less than fifteen, such fatty acid salt being from 15% to 45% by weight of the total mass to a temperature from 160° to 260° F., and chilling the mass rapidly enough to prevent reversion.

1,902,636. RAILWAY DRAFT RIGGING. WILLIAM A. GRIGER, Chicago, Ill., assignor to W. H. Miner, Inc., Chicago, Ill., a Corporation of Delaware. Filed Feb. 13, 1928. Serial No. 254,010. 3 Claims. (Cl. 213—61.)



2. In a draft rigging, the combination with draft sills; of front and rear stop means; a shock absorbing device of relatively long compression stroke; a yoke; and means limiting the draft movement of said yoke to less than the compression stroke of said device, said means including portions formed integrally with said yoke and engaging the front stop means of the sills.

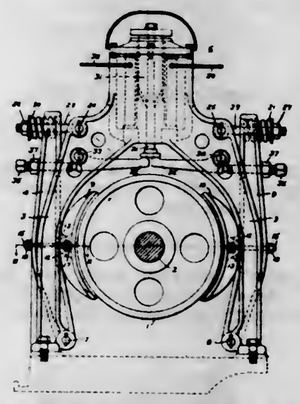
1,902,637. APPARATUS FOR TREATING OBJECTS. JOHN H. GROW, Milwaukee, Wis., assignor to Allis-Chalmers Manufacturing Company, Milwaukee, Wis., a Corporation of Delaware. Filed Jan. 25, 1930. Serial No. 423,530. 16 Claims. (Cl. 34—30.)



1. In combination, a tank, a jacket spaced from said tank, partitions dividing the space between said tank and said jacket into a plurality of intercommunicated chambers, an inlet header surrounding said jacket and conduits connecting said header with certain of said chambers respectively.

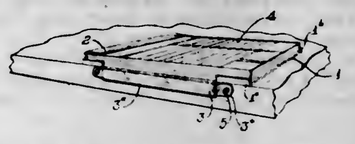
1,902,638. METHOD OF MELTING METALS IN ELECTRIC FURNACES. EMIL GUSTAF TORVALD GUSTAFSSON, Stockholm, Sweden. Filed Apr. 28, 1930, Serial No. 448,185, and in Sweden May 7, 1929. 9 Claims. (Cl. 75—22.5.)

1. A method of melting metals and metal alloys containing metal of the iron group, consisting in preparing a slag bath in a closed electric furnace having a downwardly extending electrode that can be raised and lowered, melting the metal practically completely covered by said slag, simultaneously reducing and melting in the furnace a charge containing oxide ore and reducing agent for producing similar metal as that to be melted with the charge floating on the slag, and adapting the heat development in the furnace by arc and by electric resistance in the slag bath so that the additional heat required for melting the solid metal is developed in the slag.



1,902,639. BUILDING INSULATION AND METHOD OF APPLYING SAME. ROBERT G. HALLIWELL, Wilmette, Ill., assignor to Armstrong Cork Company, Lancaster, Pa., a Corporation of Pennsylvania. Filed July 30, 1928, Serial No. 296,207. Renewed Jan. 24, 1933. 7 Claims. (Cl. 108—65.)

1. The method of applying building insulation which consists in first arranging a plurality of blocks of insulating material end to end; applying a perforated plate to the sides of said blocks; sticking pins through said plate and partially into said blocks; partially withdrawing said plate over said pins; applying other blocks to the ends of said pins; and then forcing said sets of blocks together.



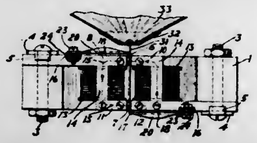
3. A building insulation comprising elevated spaced supporting members, there being open space between and below said members; a plurality of insulating blocks of relatively soft penetratable material extending between said supporting members; a relatively thin, flat reinforcing bar imprisoned between and contacting with said blocks and spanning the joints between them; and penetrating members securing said bar to said blocks on opposite sides of the joints between the blocks whereby said bar supports the weight of said blocks and said blocks reinforce said bar against lateral flexing.

1,902,640. BRAKE. GUSTAF A. HALVARSON, Verona, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Apr. 12, 1928. Serial No. 269,535. 4 Claims. (Cl. 188—171.)

1. A brake comprising a brake drum, a frame associated with said drum, a pair of brake levers pivotally mounted at their lower ends, on said frame, a pair of brake shoes disposed on the inner central portions of said levers for engaging said drum, a plurality of springs independently mounted on said frame and engaging the upper ends of said levers for actuating said levers independently into braking position, and releasing means positioned for engaging said brake levers between the brake shoes and the springs.

1,902,641. RESTAURANT CHECK HOLDER. EVANGEL A. HAVELES, Los Angeles, Calif. Filed Feb. 3, 1930. Serial No. 425,697. 7 Claims. (Cl. 281—15.)

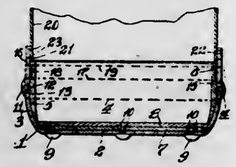
2. In a restaurant check holder, the combination with a counter or table having a slot therein adjacent its upper surface, and a check holder comprising a plate adapted to rest upon the upper surface of the counter or table and having a downwardly extending flange extending into the slot for removably locating the holder on the top of the counter or table.



1,902,642. METHOD OF COATING AND COATING COMPOSITION. CHARLES G. HARFORD, Quincy, Mass., assignor to The Philadelphia & Reading Coal & Iron Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Dec. 12, 1928. Serial No. 325,653. 2 Claims. (Cl. 134—15.)

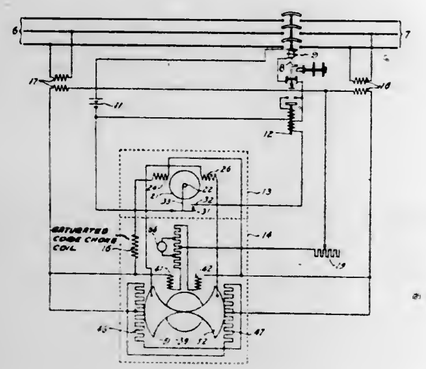
1. A coating composition for spraying coal, consisting of finely divided colored cellulose pulp of sprayable fineness distributed through an aqueous suspension of a water repellent substance.

1,902,643. ELECTRICAL TRANSLATING DEVICE. JUNIEN S. HIGH, Oaklyn Manor, N. J., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Oct. 30, 1930. Serial No. 492,215. 8 Claims. (Cl. 179—115.5.)



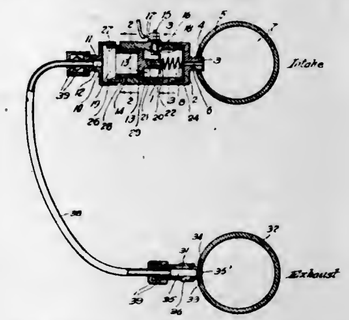
8. In a loud speaker actuating motor, a magnetic circuit defining an air gap, an armature, only a portion of which

lies in said air gap, means for generating a current in that portion of said armature lying outside of said air



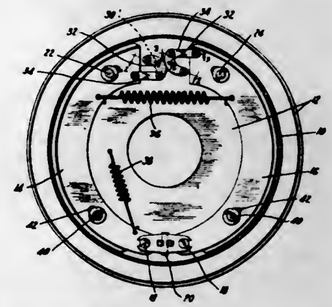
gap but parallel to the portion in said air-gap and means for directing said current into that portion of the armature located in the air gap.

1,902,644. BOWL SHAPED BASE FOR GOLF BAGS. JOHN K. HOTZE, St. Louis, Mo. Filed Dec. 23, 1929, Serial No. 415,972. 15 Claims. (Cl. 150—1.5.)



1. A golf bag base comprising a material layer formed into a bowl like shape having an annular connector secured interiorly of the upturned wall of the base, and a reinforcing ring secured on the outside of the upturned wall of the base having a part engaging the connector.

1,902,645. AUTOMATIC PARALLEL CONNECTING SYSTEM. ROBERT KELLER, Ennetbaden, Switzerland, assignor to Aktiengesellschaft Brown Boveri & Cie., Baden, Switzerland, a Joint Stock Company of Switzerland. Filed Feb. 18, 1931, Serial No. 516,655, and in Germany Feb. 27, 1930. 6 Claims. (Cl. 171—118.)

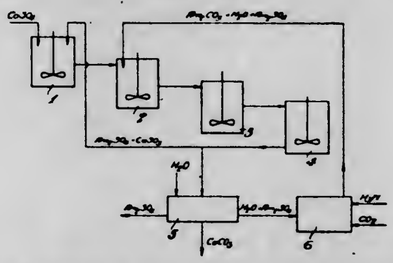


1. In a system for automatically connecting alternating current systems when synchronized, a plurality of alternating current systems to be connected, a circuit breaker for connecting said systems, a coil for electromagnetically causing closing of said circuit breaker, a source of current applicable to said coil to cause energization thereof, a relay for applying said source of current to said coil, a relay responsive to the frequency relations of said systems to cause operation of said first relay, and comprising a disc and two electromagnets, a regulator responsive to the phase relations of said systems, a voltage transformer connected with each of said systems, and a choke coil, one of the electro-magnets being supplied from said transformers through said regulator and the other of the electro-magnets being supplied from said transformer through said choke coil.

1,902,646. AUTOMATIC STARTING SYSTEM FOR INTERNAL COMBUSTION ENGINES. ARTHUR S. KNAPP, Glendale, Calif., assignor, by direct and mesne assignments, to Automatic Safe-Start Company, a Corporation of California. Filed July 23, 1928. Serial No. 294,834. 3 Claims. (Cl. 290—38.)

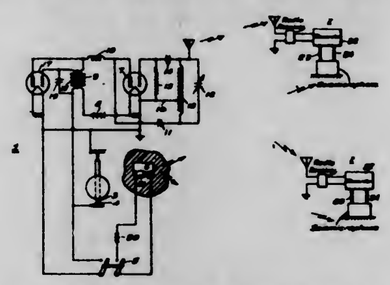
1. An apparatus for starting internal combustion engines comprising, in combination with an internal combustion engine and with a starting motor therefor and means for automatically effecting operative connection of said motor to said engine to start the same and automatically releasing such connection upon starting the engine, an electric circuit including said starting motor, a switch included in said circuit, means for causing said switch to be opened upon starting of the engine, solely by the expansive effect of the exhaust gases of said engine, and means for causing said switch to be closed upon stopping of the engine, by the combined action of the decrease in intake suction and the decrease in expansive effect of the exhaust gases.

1,902,647. BRAKE. LUDGER E. LA BRIE, South Bend, Ind., assignor to Bendix Brake Company, South Bend, Ind., a Corporation of Illinois. Filed Jan. 30, 1929. Serial No. 336,130. 1 Claim. (Cl. 188—78.)



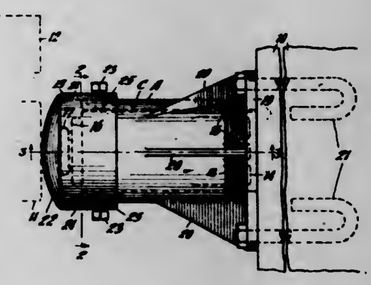
A brake having an operating shaft, a crosshead on the shaft, thrust members pivoted to opposite ends of the crosshead on opposite sides of the axis of the shaft and rolling against each other, approximately at said axis and thrust links pivoted to the ends of said thrust members and constructed and arranged for operative engagement with the friction means of a brake.

1,902,648. METHOD OF LEACHING RAW PHOSPHATE. MARKUS LARSSON, Berlin Germany, assignor to Kunstdünger-Patent-Verwertungs-Aktiengesellschaft, Glarus, Switzerland. Filed May 25, 1929, Serial No. 366,078, and in Sweden June 5, 1928. 7 Claims. (Cl. 23—165.)



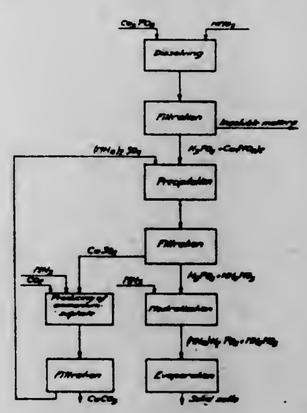
1. A method of treating phosphate rock, which comprises reacting upon the phosphate rock with chemical reagents under such condition of concentration that a solution containing an essential part of the phosphoric acid and a precipitate of calcium sulphate are produced, subjecting the reaction mixture to a temperature of at least 80° C., thus bringing the calcium sulphate to crystallise substantially as semihydrate in the solution, then causing the semihydrate to recrystallise into dihydrate by lowering the temperature of the solution, and finally separating said dihydrate from the solution produced.

1,902,649. METHOD OF PRODUCING AMMONIUM SULPHATE. MARKUS LARSSON, Berlin, Germany, assignor to Kunstdünger-Patent-Verwertungs-Aktiengesellschaft, Glarus, Switzerland. Filed Oct. 25, 1930, Serial No. 491,104, and in Sweden Nov. 9, 1929. 2 Claims. (Cl. 23—119.)



1. In a method of continuously producing ammonium sulphate in which calcium sulphate is reacted upon by means of ammonium carbonate, the process which consists in forming a suspension of the calcium sulphate in a slurry of finished reaction products consisting chiefly of ammonium sulphate solution and precipitated calcium carbonate, adding a solution of ammonium carbonate to said slurry in sufficient quantity to react with calcium sulphate, returning a portion of the reaction products to the process as suspending means for the calcium sulphate in the continuous performance of the process, and separating the ammonium sulphate solution from the insoluble matters of the reaction products not returned.

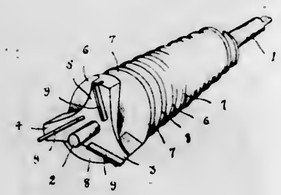
1,902,650. REMOTE CONTROL SYSTEM FOR OSCILLOGRAPHS. JOSEPH W. LEGG, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Sept. 13, 1928. Serial No. 305,858. 10 Claims. (Cl. 234—1.5.)



1. A system comprising transmitter means for transmitting a series of signals which occur at predetermined intervals and receiver means for recording them on a receiving surface, said two means being widely separated geographically, means for transmitting mechanical vibrations through the earth and means for recording them on said receiving surface, and means for altering the characteristic of said series in response to the initiation of said mechanical vibrations.

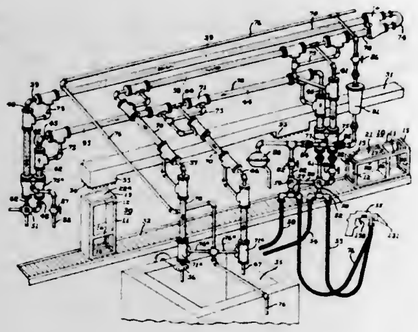
1,902,651. BUMPER. GOODRICH Q. LEWIS, Wheaton, Ill., assignor to W. H. Miner, Inc., Chicago, Ill., a Corporation of Delaware. Filed June 22, 1931. Serial No. 546,014. 5 Claims. (Cl. 104—254.)

1. In a bumper including a supporting post, the combination with a casing fixed to said post, said casing being open at the forward end; of a buffing cap closing the open end of the casing and movable lengthwise of the same; and a removable friction shock absorbing mechanism housed within the casing, said friction shock absorbing mechanism including a friction shell and cooperating spring resisted friction means movable lengthwise of the shell, said friction means being engaged and actuated by the buffing cap and said shell being held against movement outwardly and inwardly of the casing.



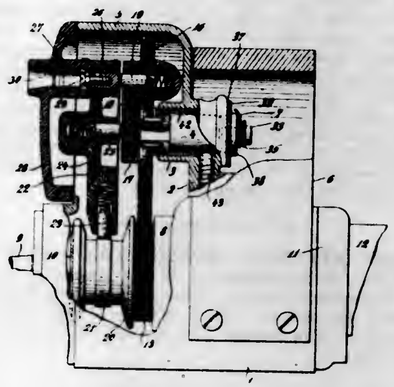
1,902,652. METHOD OF PRODUCING MIXED FERTILIZERS. FRANS GEORG LILJENROTH, Stockholm, Sweden. Filed Dec. 10, 1927, Serial No. 239,259, and in Sweden Dec. 14, 1926. 5 Claims. (Cl. 71—7.)

1. Method of producing mixed fertilizers, which comprises leaching crude calcium phosphate with a solution containing a sulphate the base of which forms a soluble salt with phosphoric acid and an acid the calcium salt



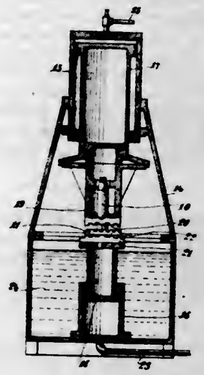
of which is soluble, said acid being present in deficit in relation to the content of lime in the crude phosphate, separating the insoluble matters from the solution, neutralising the latter, and finally recovering the soluble salts from the neutralised solution by evaporation.

1,902,653. MEAT CHOPPER. CHARLES F. LINDGREN, Duluth, Minn. Filed Dec. 1, 1930. Serial No. 499,137. 2 Claims. (Cl. 146—189.)



2. A worm of the class described comprising a plurality of cutting blades forming independent passages therebetween, each blade terminating at one end in a flat faced arm substantially at right agles to the axis of the worm, and a cutting knife removably disposed within the surface of each face and projecting substantially axially therefrom.

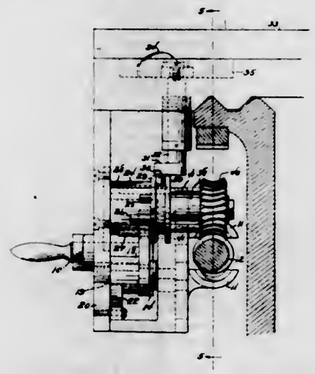
1,902,654. COATING PROCESS AND APPARATUS. CECIL A. MANN, Dayton, Ohio, assignor to Frigidaire Corporation, Dayton, Ohio, a Corporation of Delaware. Filed Apr. 30, 1929. Serial No. 359,358. 9 Claims. (Cl. 91—44.)



2. An apparatus for the manufacture of refrigerator cabinets or the like comprising a movable track for supporting and moving the unfinished cabinets, a system of conduits for continuously circulating hot bituminous material, a plurality of individually operable flow control nozzles on said conduits for selectively applying bituminous material to said cabinets at various places on said track, a flexible inlet conduit connected to each nozzle, each of said conduits being connected to a common point of supply from the conduit system, and a flexible return conduit connected to each nozzle, each of said return conduits communicating with a common point of return to the conduit system.

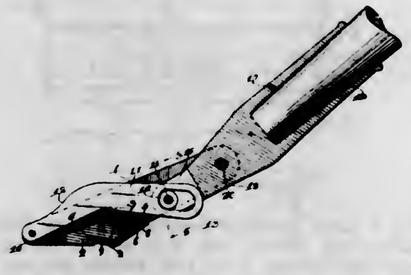
1,902,655. MAGNETO TIMING INDICATOR. JOHN F. MARTIN, Springfield, Mass., assignor to United American Bosch Corporation, Springfield, Mass., a Corporation of New York. Filed Sept. 26, 1931. Serial No. 565,295. 8 Claims. (Cl. 171—209.)

1. In a magneto having encased movable parts and means for continuously moving same, the combination of a continuously movable member having an enclosed portion and another portion projecting constantly into view and an element secured to said member to indicate the position of said parts.



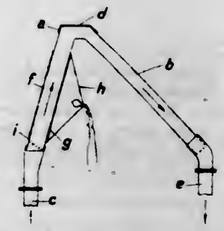
1,902,656. METHOD OF MANUFACTURING GEARING. JOSEPH L. MATTHEWS, New Brunswick, N. J., assignor to International Motor Company, New York, N. Y., a Corporation of Delaware. Original application filed Jan. 7, 1931, Serial No. 507,086. Divided and this application filed Aug. 11, 1931. Serial No. 556,370. 4 Claims. (Cl. 29—159.2.)

1. The method of forming gear sectors comprising machining a sector with gear teeth lying at angles to the axis of the sector and subsequently forming certain of the teeth in different planes.



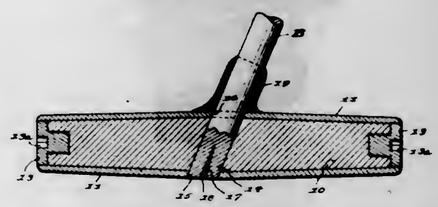
1,902,657. THREAD CUTTING ATTACHMENT FOR LATHES. GEORGE E. MERWIN and FRANK W. SHOEMAKER, Port Arthur, Tex. Filed Nov. 23, 1931. Serial No. 576,929. 5 Claims. (Cl. 82—83.)

1. In combination with the carriage and lead screw of a lathe, half nuts, means for engaging the half nuts with the lead screw and disengaging them therefrom, a latch for the last said means, a barrel provided with peripheral ribs constituting latch releasing elements which are of different lengths axially, means for shifting the barrel axially, and means for driving the barrel from the lead screw, said means comprising a worm wheel meshing with the lead screw and having dowel pins slidably engaged with said barrel.



5. In combination with the carriage and lead screw of a lathe, half nuts, means for engaging the half nuts with the lead screw and disengaging them therefrom, a latch for the last named means, a barrel provided with peripheral ribs constituting latch releasing elements which are of different lengths axially, means for driving the barrel from the lead screw, a lever disposed on top of the carriage, a shaft extending through the carriage and connected with said lever, a crank carried at the lower end of the shaft, the barrel having spaced flanges, and a wrist pin carried by the crank disposed between said flanges to impart axial movement to the barrel upon swinging movement being imparted to said lever, the lever being disposed in a segmental clearance space in said carriage, the latter being formed with spaced seats to be engaged by a lever carried latching means in different positions of adjustment of the lever.

1,902,658. CAR MOVER DEVICE. OSCAR W. MILLER, Appleton, Wis. Filed Jan. 10, 1931. Serial No. 507,889. 1 Claim. (Cl. 254—38.)

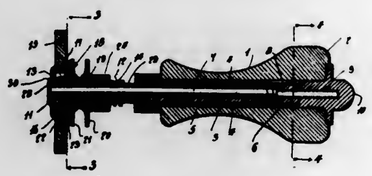


A car mover comprising a shoe having a fulcrum on its lower face at a point substantially equally distant from its ends, said shoe being provided with a longitudinally extending slot from one end thereof to the other, an operating lever having its forward end received in the slot and pivotally connected to the rear end of the shoe, the forward end of the lever in advance of the pivot being provided with a longitudinal guide slot, a lift link of substantially bell crank shape received within said slot, means pivotally connecting the forward end of the lift link to the forward end of the shoe, the angle portion of the lift link being arranged substantially above the fulcrum of the shoe and opposite thereto, the rear end of the lift link being provided with a closed slot received within the slotted end of the lever and closely engaged by the side walls of the slot of said lever, and a transversely extending pin carried by the slotted portion of the lever having an antifriction roller received within the closed slot of the lift link.

1,902,659. APPARATUS FOR THE CONTINUOUS CONTROL OF THE PROPERTIES OF SOLID BODIES DISPERSED IN A LIQUID. HELLMUTH MÜLLER-CLEMM, Mannheim-Waldhof, Germany, assignor to The Firma Zellstoffabrik Waldhof, Mannheim-Waldhof, Germany. Filed Oct. 6, 1930, Serial No. 486,852, and in Germany Feb. 3, 1930. 3 Claims. (Cl. 88—14.)

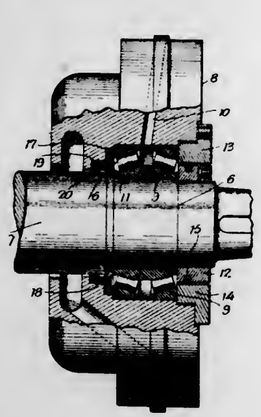
1. Apparatus for viewing the presence and nature of solid matter in suspension in a liquid in motion, the said apparatus comprising a vessel having its front and back walls spaced apart a distance less than the distance between its side walls and having an outlet at one end, a chamber having one of its ends in open communication with the other end of said vessel and having an inlet in its opposite end, the cross section of said chamber increasing from said inlet toward said vessel, a source of light disposed outside the vessel and sheets of transparent material forming the front and rear walls of said vessel and disposed opposite said source.

1,902,660. PONY POLO MALLET. HANS P. NELSON, Grantwood, N. J. Filed Aug. 22, 1931. Serial No. 558,813. 4 Claims. (Cl. 273—67.)



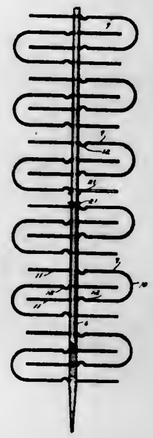
1. The herein described process of making a mallet which consists in treating a wooden core in heated oil to render the same impervious to moisture, affixing and shaping a prepared cylinder of celluloid about said core and finally affixing moisture-proof plugs to the ends of said core to seal the connection between said core, said cylinder of celluloid and said plugs.

1,902,661. GRINDING MACHINE. OSCAR W. NELSON, Portland, Oreg. Filed Nov. 6, 1930. Serial No. 493,879. 1 Claim. (Cl. 51—170.)



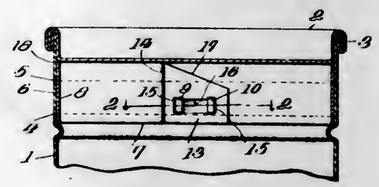
A portable grinding machine, comprising a shaft having a flanged head at one end, the other end of the shaft being

reduced and polygonal in cross section, a handle having a longitudinal bore therethrough, a sleeve secured in said bore and provided with a bore to receive the shaft, a threaded sleeve rotatably mounted on the shaft and having a flanged head engaging the head on the shaft, a grinding disk splined on the threaded sleeve and abutting the



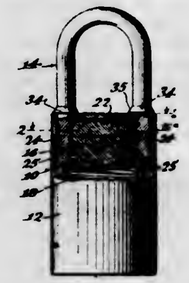
head thereon, a pulley loosely mounted on the sleeve, a friction washer secured to the pulley and engaging the grinding disk, and a jam nut threaded on the threaded sleeve and engaging the pulley to hold it for rotation with the grinding disk and threaded sleeve, said pulley being adapted to be geared to a motor shaft.

1,902,662. PACKING RING FOR SHAFT BEARINGS. ARTHUR F. PHELPS, Bluefield, W. Va., assignor to West Virginia Armature Co., Bluefield, W. Va. Filed Apr. 6, 1931, Serial No. 528,119. Renewed Dec. 12, 1932. 1 Claim. (Cl. 308—207.)



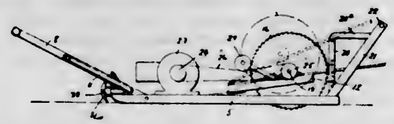
In combination, a shaft having progressive reduced diameter portions, a shaft bearing comprising an outer and an inner race member, a housing, a bushing screw-threaded into said housing and engaging the outer of said races, a grooved nut screw-threaded on the shaft wholly within said bushing and adjustably bearing against the inner race member of the bearing, an expansible packing ring located in said nut groove and tightly fitting against said bushing, a collar on the inner-most reduced diameter of the shaft and adjacent the inner side of the bearing races, an expansible packing ring in the housing immediately adjacent said collar, and a contractile packing ring on the shaft lying immediately against said expansible ring, said packing rings having intimate contact with each other, substantially as set forth.

1,902,663. TRELLIS, ARBOR, AND THE LIKE. HEMAN HENRY PHILLIPS, Charlemont, Mass. Filed May 23, 1931. Serial No. 509,598. 1 Claim. (Cl. 47—47.)



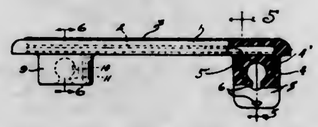
A device of the character described comprising a main body member of elongated form and having a plurality of aligned openings passing therethrough, and a plurality of resilient U-shaped members having their leg portions removably insertable thru said openings, and said members being retained in place by their own resiliency, the leg portions of each of said U-shaped members being formed intermediate their ends with opposed offset portions defining stops for engaging said main body member.

1,902,664. METAL CONTAINER. WILLIAM F. PUNTE, Syracuse, N. Y., assignor to Continental Can Company, Inc., New York, N. Y., a Corporation of New York. Filed Apr. 3, 1931. Serial No. 527,583. 2 Claims. (Cl. 220—54.)



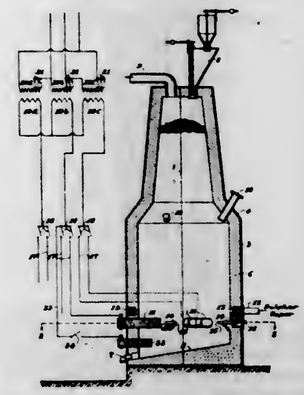
1. A metal container comprising a body portion, an end secured thereto, said body portion having spaced score lines forming a rip strip whereby the end may be released from the body of the container, and a collar inserted within said body and positioned so as to overlie the rip strip, one end of said collar having an offset portion overlying the other end of the collar, one end of said collar having an opening therethrough and the other end of said collar having a lug struck up from the metal forming an opening adjacent the lug, said lug extending through the opening in the other end of the collar and folded down against the face of the end of the collar and depressing a portion of said end into the opening formed by striking up the lug.

1,902,665. PADLOCK. FREDERICK E. REINHOLD, Los Angles, Calif. Filed June 6, 1932. Serial No. 615,570. 3 Claims. (Cl. 70—108.)



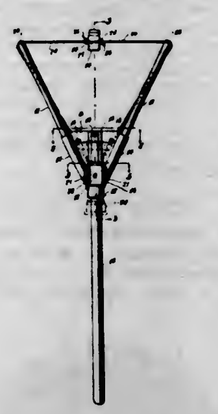
1. A padlock comprising a housing having a screw threaded bore therein, a bow shaped shackle threaded ends movably mounted in said housing, and a screw plug mounted in the housing bore and engaging the threads of the shackle to lock the same to the housing.

1,902,666. PORTABLE ICE SAW. THEODORE J. ROBBINS, New Egypt, N. J. Filed Mar. 10,1932. Serial No. 598,063. 2 Claims. (Cl. 262—20.)



2. An ice saw comprising in combination a pair of spaced parallel runners, a bar supported on the runners adjacent the forward ends thereof, a scriber adjustably mounted on the bar laterally of said runners, a frame hinged at one end to said runners rearwardly of said bar, a shaft rotatably mounted on said frame, a cutter mounted on said shaft laterally of said frame and runners, driving means for said shaft, a standard rising from one of said runners rearwardly of said frame, a lever pivotally secured to said frame, and a vertical series of spaced elements on said standard and with which said lever is engageable for securing said frame at the desired angular adjustment relative to the plane of said runners.

1,902,667. ACCELERATOR PEDAL. RUFUS C. SANDERS, Detroit, Mich., assignor to Chrysler Corporation, Detroit, Mich., a Corporation of Delaware. Filed July 22, 1931. Serial No. 552,315. 7 Claims. (Cl. 74—81.)

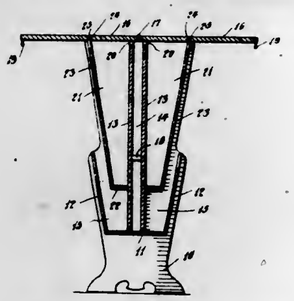


1. An accelerator pedal including a tread portion having rigid sheet-like elements protruding from one side thereof, a lug enveloping said protruding rigid elements comprising resilient material and having a pair of sockets therein between said elements, the entrances to said sockets being yieldably restricted by the resilient material of said lug, and a pair of members, each securable at one end to a supporting structure and each having a knob slightly larger than the relaxed dimensions of said sockets, said knobs being receivable in said sockets for tiltably supporting said pedal.

1,902,668. ELECTRIC FURNACE. CLARENCE C. SCHWEGLER, Midland, Mich., assignor to The Dow Chemical Company, Midland, Mich., a Corporation of Michigan. Filed May 14, 1932. Serial No. 611,313. 13 Claims. (Cl. 13—23.)

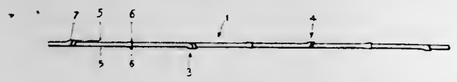
1. In an electric furnace for the manufacture of carbon bisulphide, the combination of a chamber enclosed by walls of refractory heat-insulating material, a plurality of electrodes laterally inserted through the walls of said chamber, a source of electric current for said electrodes, switch means to control each electrode independently, a plurality of inlet ports for introducing sulphur vapor into said chamber, said ports being at a level not substantially below that of the electrodes, a header connecting said inlet ports for supplying sulphur vapor thereto, and valve means for independently controlling said inlet ports.

1,902,669. ARTICLE DELIVERY DEVICE. CHESTER G. SHEPHERD, Freeport, Ill. Filed Oct. 20, 1932. Serial No. 638,812. 3 Claims. (Cl. 258—3.)



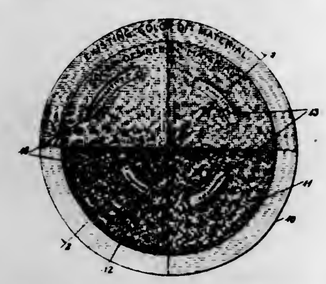
3. In an article delivery device, a staff, arms mounted on said staff arranged at an angle to said staff, a two-part clamping head having mating grooved recesses receiving and clamping said staff and arms in position, and means to hold an article between the ends of the angularly disposed arms.

1,902,670. COMBINED RACK AND UTILITY TABLE. ALYSON E. SMITH, Ogden, Utah. Filed Jan. 28, 1932. Serial No. 589,467. 4 Claims. (Cl. 45—116.)



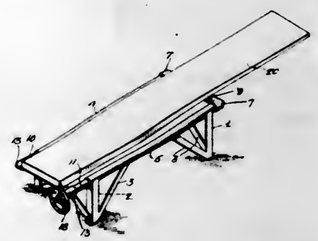
4. A device of the class described comprising end members, panels between the same having a space therebetween,

panels on opposite sides of the first mentioned panel and coacting therewith to form racks, a table top comprising flexibly connected sections, said top being normally disposed in said space, said top being disposable in extended



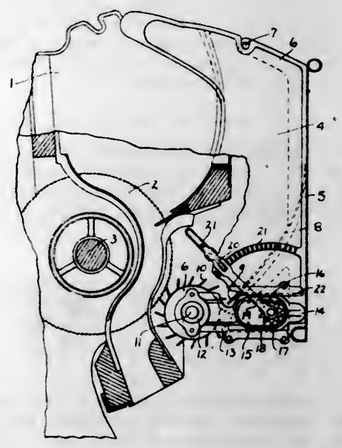
condition across the top of said panels for support thereon, and the second mentioned panel having interfitting engagement at the upper end thereon with said top, and said end members extending above the lower edge of the table top in its extended position.

1,902,671. SAW. WILLIAM H. SMOLA, Sr., Central City, Iowa. Filed May 25, 1932. Serial No. 613,497. 1 Claim. (Cl. 143—140.)



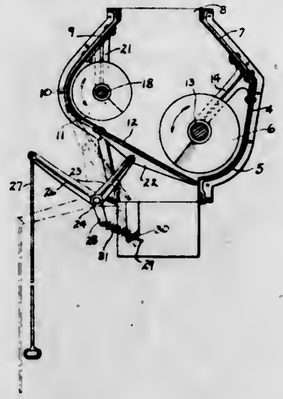
A saw consisting of a series of teeth, certain of which have their cutting edges extending in the direction of motion of the saw and certain of which have laterally extending cutting edges, the teeth having the laterally extending cutting edges being bent in alternately opposite directions to form said edges, the side walls of said teeth opposite said cutting edges being co-planar with the face of the saw, and shoulders behind the cutting edges of said bent teeth on the side thereof towards which the teeth are bent, said bent teeth having a distance between the cutting edges of oppositely bent teeth greater than the width of the teeth having cutting edges extending in the direction of motion of the saw, whereby the edge of the cut is smoothed by said bent teeth.

1,902,672. COLOR METER. RAYMOND L. SPERBER, Cheviot, Ohio, assignor to Wells & Richardson Company, Inc., Burlington, Vt., a Corporation of Vermont. Filed Apr. 8, 1931. Serial No. 528,683. 5 Claims. (Cl. 35—12.)



1. A coloring meter comprising, in combination, a plurality of relatively movable members, one of said members bearing a plurality of areas of varying colors to be matched against the existing color of a material to be color adjusted, another of said members bearing a plurality of areas variously colored to show colors which may be produced in material, a plurality of sets of coloring directions associated with each of said areas on one member and an indicator associated with each of the areas on the other of said members to indicate the appropriate set of directions for bringing an existing color in the material to the chosen color desired when any two areas are brought into juxtaposition.

1,902,673. ADJUSTABLE SPRINGBOARD. HORACE N. STEVENSON, Trenton, N. J. Filed Nov. 1, 1932. Serial No. 640,712. 10 Claims. (Cl. 272—66.)



1. In an apparatus of the stated character, a frame including a fulcrum member, a carriage movable with respect to said frame, a spring board resting on said fulcrum and anchored at one end to the carriage, and means for adjusting the carriage with respect to the frame, to vary the relative positions of the spring board anchorage and the fulcrum with respect to each other and increase or decrease the effective rigidity of the board.

1,902,674. ADJUSTABLE PICKER ROLLER. JOHN ARNOLD STREUN, Sherman, Tex., assignor to Hardwicke-Etter Company, Sherman, Tex. Filed Feb. 21, 1931. Serial No. 517,427. 6 Claims. (Cl. 19—56.)

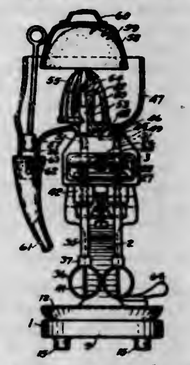
1. In a cotton gin including a saw cylinder, a rotating toothed roll positioned in front of said saw cylinder, a shaft for said roll, plates supporting the ends of said shaft, slideways for said plates, racks on said plates, pinions engaging said racks and means to rotate said pinions to slide said plates in said slideways.

1,902,675. CONVEYER FOR COTTON. JOHN ARNOLD STREUN, Sherman, Tex., assignor to Hardwicke-Etter Company, Sherman, Tex. Filed Apr. 3, 1931. Serial No. 527,457. 8 Claims. (Cl. 19—74.)

1. A plurality of cotton machines, a conveyer for cotton above said machines, including a trough having its floor inclined to one side thereof, hopper openings in said floor to discharge cotton to said machines, a large screw conveyer in the lower side of said trough and at the downward edge of said floor, a smaller conveyer at the upper edge of said floor at the opposite side above said large conveyer and means in said openings and forming a part of said floor to control the passage of cotton therethrough.

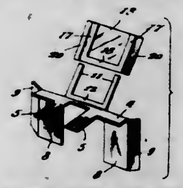
1,902,676. HARDENING ALLOY STEELS. HUBERT SUTTON, ARTHUR JOHN SIDERY, and BENJAMIN EVANS, South Farnborough, England. Filed Nov. 18, 1930, Serial No. 496,559, and in Great Britain Dec. 19, 1929. 15 Claims. (Cl. 148—16.)

1. Case-hardening an alloy steel by subjecting it to nitrogenization after coating it while cold with a porous, thin, adherent film of a nitride promoting agent of the group consisting of copper, silver, platinum, arsenic, cobalt, which permits penetration of nitrogen to the alloy steel.



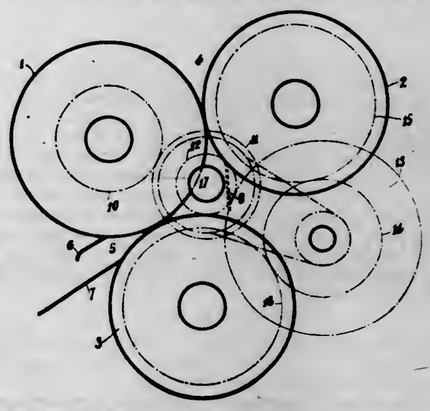
1,902,677. DISPLAY TABLE. EUGENE S. TAYLOR, Montpelier, Ohio. Filed Dec. 26, 1931. Serial No. 583,258. 10 Claims. (Cl. 312—140.)

10. In combination: a table having spaced sockets; a vertical wall; a post having means in spring-pressed relation with the wall for releasably holding the same, and legs spring-pressed apart and adapted in their sprung-together position to be thrust into the sockets respectively and to releasably engage the same respectively in the normal position of the legs.



1,902,678. TWIN FOOD MIXER. ARISTEDE A. THEODOROPULOS, New York, N. Y. Filed Apr. 18, 1932. Serial No. 605,860. 9 Claims. (Cl. 259—105.)

1. In a mixing machine of the character described, a head, a motor in said head, a worm gear operated by said motor, spur gears meshing with said worm gear, spindles with solid central portions having triangular shaped sockets in their ends upon which said spur gears are mounted, threads holding said spur gears on said spindles, set



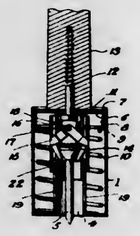
screws also holding said spur gears on said spindles, a stand pivotally supporting said head, and a base in which said stand is freely mounted.

1,902,679. TOOL HOLDER GUARD. ISIDORE E. TONIEWICZ and MICHAEL LIZON, Buffalo, N. Y. Filed Mar. 19, 1931. Serial No. 523,874. 7 Claims. (Cl. 82—34.)

5. A guard for a tool holder comprising an attaching portion adapted to be firmly secured upon a tool holder, depending laterally extending wings at opposite sides of said attaching portion adapted to straddle said tool holder and forming side guards, a portion projecting upwardly at a forward incline from the front of said attaching portion between said wings, a frame carried by the last-mentioned portion, and a transparent sheet carried by the frame.

1,902,680. MILL FOR REDUCING PAINTS, COLORS, AND PIGMENTS. JOHN ROWLAND TORRANCE, Bitton, England. Filed Dec. 21, 1928, Serial No. 327,704, and in Great Britain Jan. 3, 1928. 2 Claims. (Cl. 83—12.)

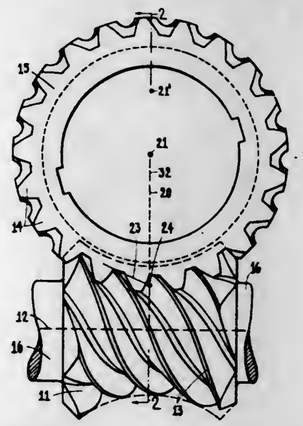
1. A roller mill of the character described for grinding pastes and semi-pastes, comprising a high periphery speed



roll mounted in fixed bearings so as to prevent any oscillation of the roll due to its speed, two low periphery speed rolls, one located beneath the high periphery speed roll, and the other located at the back of said high periphery speed roll, said high periphery speed roll mating with said low periphery speed rolls to form the grinding nips and serving to convey the material from one grinding nip to the next, means for adjusting the bearings of the low periphery speed rolls in relation to the fixed high periphery speed roll, a driving shaft, a driving wheel train from said shaft to said high speed roll, a speed decreasing driving wheel train from said shaft to said low speed low speed rolls, a feed hopper from which the material is supplied to the first grinding nip, and a scraper on the high periphery speed roll at the front of the mill.

1,902,681. COSMETIC COMPACT. WILLIAM R. TUTTLE and CHARLES W. STICKEL, Rochester, N. Y., assignors to The Kurlash Company, Inc., Rochester, N. Y., a Corporation of New York. Filed Mar. 14, 1932. Serial No. 598,742. 4 Claims. (Cl. 132—79.)

1. In combination with a compact case having an intermediate base plate as described, a casing for a moistening element or sponge adapted to engage with an opening in the said intermediate base plate, and means to raise the said casing.



1,902,682. GOLF TEE POSITIONING DEVICE. ERNEST L. WALRATH, Bend, Oreg. Filed May 18, 1931. Serial No. 538,315. 4 Claims. (Cl. 273—32.)

1. A golf tee positioning device comprising a handle, a head secured to the handle, a casing slidable on the head and having an opening, tension means between the head and casing, a sleeve secured to the head in alinement with said opening to receive a tee, gripping means in said sleeve to engage the tee and retain the latter within the sleeve, means carried by the casing to disengage the gripping means from the tee when the latter has been inserted in the ground by pressure placed on the handle and with the casing in engagement with the ground, and means carried by the sleeve for releasing the gripping means from the last named position after the tee has been again inserted in the sleeve.

1,902,683. WORM GEARING. ERNEST WILDHABER, Brooklyn, N. Y. Filed Sept. 3, 1931. Serial No. 560,905. 19 Claims. (Cl. 74—41.)

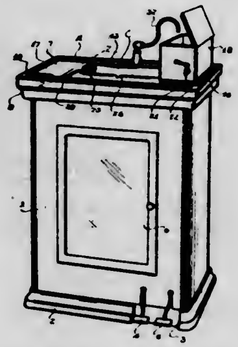
1. Worm gearing, comprising two conjugate worm gears each containing differing profiles in parallel planes perpendicular to its axis, one of said worm gears having composite tooth surfaces, a composite tooth surface containing two individual surfaces meeting along a line extending obliquely over the tooth surface, at least one of

said individual surfaces being a surface envelopable by a member containing tooth like projections of constant side profile in all axial planes.

1,902,684. METHOD OF TREATING DRYING OILS. ERICH ASSAN, Wandsbek, Germany. Filed Nov. 2, 1929, Serial No. 404,513, and in Germany May 1, 1929. 7 Claims. (Cl. 87—12.)

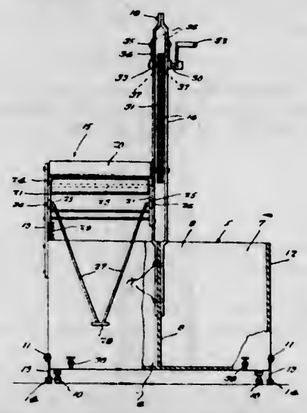
1. Improved method of treating drying oils for paint purposes, which comprises heating the oil to a temperature at which polymerization begins until the oil begins to thicken, then blowing air through the oil and continuing to heat the latter up to about 310° C., until the viscosity of standoil is obtained.

1,902,685. COMBINATION TONGS AND POKER DEVICE FOR FIRE GRATES AND FIREPLACES. NATHANIEL BALDWIN, East Mill Creek, Utah. Filed Oct. 29, 1930, Serial No. 491,858. Renewed June 21, 1932. 4 Claims. (Cl. 294—11.)



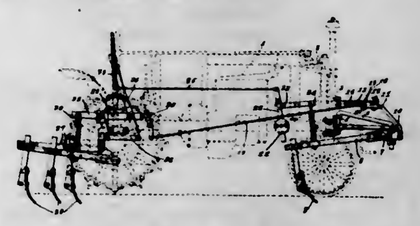
1. In a device of the class described, two members permanently connected together to be rotatably movable with respect to each other, said members being each shaped at one end to form handles and at the other end to form coacting jaws, and means connected to both said members normally to urge said jaws to the open position.

1,902,686. SHOE HEEL. LINZY W. BROOKS, Portland, Oreg., assignor of one-third to Howard P. Arnest, Portland, Oreg. Filed Dec. 5, 1931. Serial No. 579,291. 5 Claims. (Cl. 36—35.)



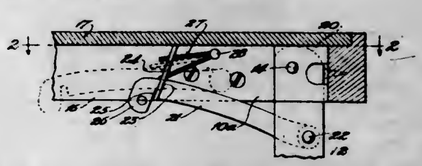
1. A heel of the class described comprising a base formed of hard rubber and a tread part formed of softer and more elastic rubber and a metal plate partly inserted in the base part and having its lower face partly contacting the upper face of the tread part, said plate having holes therein for receiving fastening means for connecting the heel to the heel part of the shoe.

1,902,687. STERILIZING APPARATUS. WILMOT V. CASTLE, Rochester, N. Y., assignor to Wilmot Castle Co., Rochester, N. Y., a Corporation of New York. Filed Sept. 4, 1931. Serial No. 561,235. 10 Claims. (Cl. 167—3.)



5. An apparatus of the class described comprising a supporting means and a top member mounted on the supporting means and including upper and lower walls connected by a continuous side wall rising at its upper edge slightly above the upper surface of the top member, a bowl carried by the top member and connecting the upper and lower walls, the top member having sloping depressions in its upper wall and provided with communicating passageways leading from said depressions to said bowl, said depression each having a lateral extension communicating therewith adapted to receive drippings, from a faucet of a sterilizer when supported over said depression, each of which depressions is constructed so as to conduct drippings thus received in the extension thereof to the bowl by way of the respective communicating passageway between such depression and the bowl.

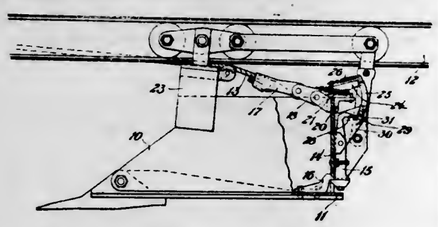
1,902,688. MOP WRINGER. MARY CESARIO, Kenosha, Wis. Filed Aug. 25, 1932. Serial No. 630,468. 1 Claim. (Cl. 15—264.)



A mop wringer comprising in combination a receptacle provided with two compartments, swivel casters supporting said receptacle, laterally extending bars mounted on the receptacle at relatively opposite ends thereof, and ground engaging elements pivotally connected with said bars; and a wringer device mounted on said receptacle in operative position to one of said compartments, said wringer device comprising a pair of spaced parallel supports, a roller rotatably supported between said supports, a shaft mounted on one of said supports above said roller, chain and sprocket means connecting said shaft with said roller, handle means for said shaft, a curved arm pivoted to each of said supports intermediate the ends of said arm, a roller supported between said arms at one end of said arms, a foot pedal supporting bracket pivotally connected with the other end of said arms, and yieldable means urging said arms to rotate in one direction for normally retaining said rollers spaced apart.

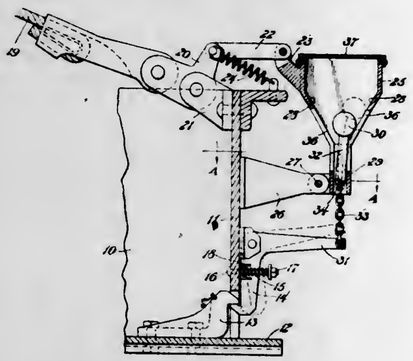
1,902,689. TRACTOR CULTIVATOR. IRA L. CHARLESWORTH, Newton, Iowa. Filed Oct. 5, 1931. Serial No. 567,054. 1 Claim. (Cl. 97—47.)

A tractor cultivator attachment comprising in combination with an upstanding steering shaft on the tractor provided with a forwardly projecting lug having a notch in its free end, brackets secured to the tractor frame, arms mounted in said brackets projecting forwardly from the tractor frame, a transverse bar carried by said arms, cultivators having beams pivotally mounted on said bar, means for swinging and lowering said beams, a rearwardly disposed arm, means for supporting the last said arm from the forwardly projecting arms, a centrally arranged forwardly pojecting bar disposed in diametrical alignment with said notch when the steering shaft is disposed to direct the tractor steering wheels directly forward, and a spring actuated latch bar carried on the under side of the last named bar, a lever pivotally mounted on the rear end of the rearwardly projecting arm and operatively connected with said latch member, and means for rocking said lever, the latch being engageable with the notch and said steering shaft in one position of the latter and being releasable therefrom on rocking said lever.



1,902,690. TABLE LEG BRACE. GEORGE J. CORPORON, Hooksett, N. H. Filed Mar. 5, 1931. Serial No. 520,371. 3 Claims. (Cl. 45—11.)

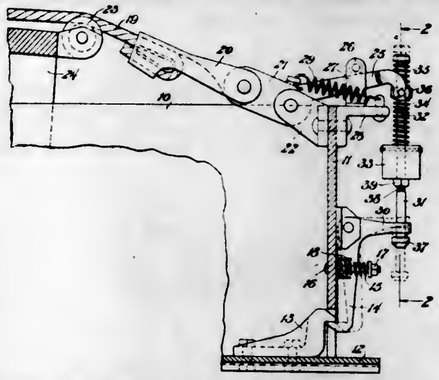
1. A device for the purpose indicated comprising a bracket for securement at the corners of the side rails of a table top and having a parallel walled leg seat in which a leg is disposed for pivotal or swinging movement, and a lever pivotally connected with the leg and having a sliding connection with the bracket and interlocking with the latter in the extended or right angular position of the legs, the bracket having an angularly turned flange formed with a slot through which the lever extends and the latter having a slot engageable with the bottom of the slot in the flange when the leg is in extended position, that



portion of the bracket carrying said flange being offset from the leg seat to dispose the flange next adjacent the side rail of the table top and the pivotal connection between the leg and the lever being on that side of the leg next to the offset to dispose the lever between the bracket and said side rail when the leg is folded.

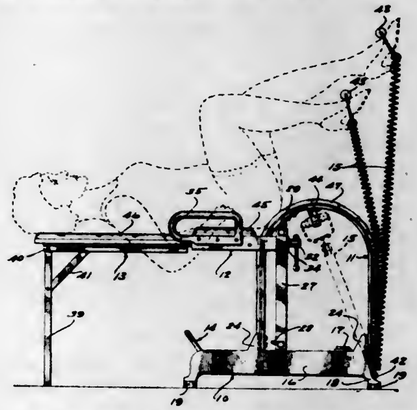
1,902,691. EXCAVATING MACHINE. ROBERT REX DOWNIE, Beaver Falls, Pa. Filed July 14, 1928. Serial No. 292,655. 16 Claims. (Cl. 214—146.)

1. An excavating machine comprising, in combination, a scoop with a latched bottom; a hauling line for moving the scoop in its excavating stroke. a connection between the hauling line and the scoop permitting slight longitudinal movement of the line relative to the scoop; and a latch operating mechanism secured to the hauling line by means of said connection and constructed and arranged to release the latch whenever the hauling line is sharply released and rapidly thereafter sharply retracted.



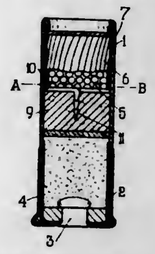
1,902,692. EXCAVATING MACHINE. ROBERT REX DOWNIE, Beaver Falls, Pa. Filed July 14, 1928. Serial No. 292,657. 10 Claims. (Cl. 214—146.)

1. An excavating machine comprising, in combination, an excavating scoop having a pivoted discharge wall and provided with a spring-actuated latch for controlling the discharge of spoil from the scoop; a power-actuated hauling line attached to the scoop for moving it through the earth; and latch operating mechanism mounted on the scoop and connected with the hauling line and latch and so constructed and arranged that a series of rapid jerks on the hauling line releases the latch.



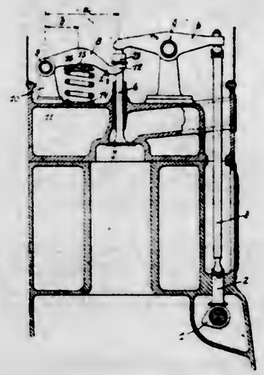
1,902,693. EXCAVATING MACHINE. ROBERT REX DOWNIE, Beaver Falls, Pa. Filed Feb. 11, 1932. Serial No. 592,407. 16 Claims. (Cl. 214—146.)

1. A machine of the class described comprising, in combination, a scoop having an automatically latched bottom; a hauling line attached to the scoop; and mechanism mounted on the scoop and connected to the hauling line and latch for releasing the latch, said mechanism having a reciprocatory weight whose momentum is used



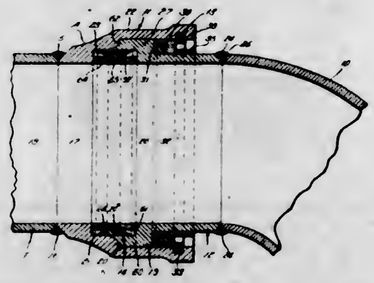
to release the latch, and being so constructed and arranged that a sharp release of the hauling line followed by a sharp retraction will operate it.

1,902,694. GYMNASTIC APPARATUS. REID A. EDWARDS, Albert Lea, Minn. Filed Feb. 8, 1932. Serial No. 591,599. 17 Claims. (Cl. 272—58.)



1. In an apparatus of the class described, a base, an arch member, and a vertically adjustable seat on the base.

1,902,695. CARTRIDGE. WALTER EDWARDS, Luton, England. Filed Feb. 17, 1932, Serial No. 593,613, and in Great Britain Dec. 23, 1931. 4 Claims. (Cl. 102—15.)



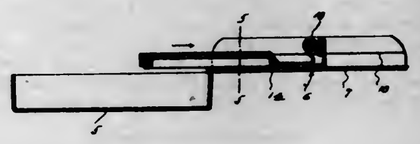
1. A sporting cartridge comprising in combination an outer container, a percussion cap, a wad, loose shot, a spiral corrugated metal foil shell containing said shot and means to secure said shell directly upon said wad.

1,902,696. VALVE CONTROL GEAR FOR INTERNAL COMBUSTION ENGINES. ERNEST EIMER, Courbevoie, France, assignor to Delage & Cie, Courbevoie, France. Filed Jan. 7, 1930, Serial No. 419,018, and in France Nov. 12, 1929. 3 Claims. (Cl. 123—90.)

1. In a valve control gear for internal combustion engines, a valve, a rocker arm adapted to move the valve in one direction, a return lever adapted to move the valve in the opposite direction and a spring adapted to actuate said lever, the leverage of the valve being greater than the leverage of the spring with respect to said lever.

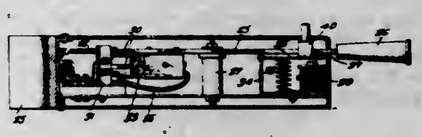
1,902,697. COUPLING. FRANK ELLINGSEN, Brea, Calif., assignor to Chiksan Oil Tool Company, Fullerton, Calif., a Corporation of California. Filed Nov. 7, 1932. Serial No. 641,570. 12 Claims. (Cl. 285—9.)

1. A connection for a conduit including, two relatively rotatable members, one extending into the other, a bushing surrounding the first mentioned member in the said other member, and a removable lock part in registering recesses in the bushing and the said other member.



1,902,698. COLLAPSIBLE TUBE CAP. VICTOR E. GASSER and LEONIDES J. GASSER, Madison, Wis. Filed Mar. 8, 1932. Serial No. 597,576. 6 Claims. (Cl. 221—60.)

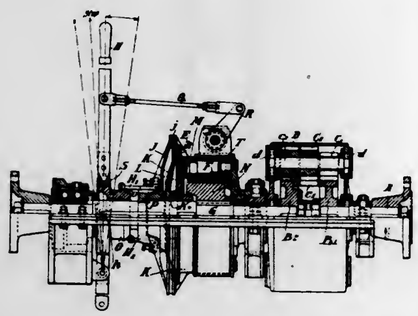
1. A collapsible tube comprising a collapsible body, a semi-spherical shaped head for said body and having a port adjacent one edge, said head having a groove and a flattened face in communication with the groove and surrounding the port, said flattened face and groove forming



oppositely disposed abrupt shoulders, and a closure slidably mounted in the groove and movable to close the port and limited in its movement by the shoulders.

1,902,699. CIGARETTE RECEPTACLE AND ROLLER. HARRY H. GERJETS, Bellingham, Wash. Filed Apr. 7, 1932. Serial No. 603,881. 3 Claims. (Cl. 131—5.)

3. A cigarette rolling device comprising a plate having side walls bent downwardly to provide guides, a cross member between the side walls, a slider movable in the guideways, and a cigarette rolling web carried by the said slider and being disposed over the cross member.



1,902,700. SWITCH FOR DIRECTION INDICATORS. RINJIRO HADANO, Honolulu, Territory of Hawaii. Filed May 5, 1931. Serial No. 535,231. 1 Claim. (Cl. 200—6.)

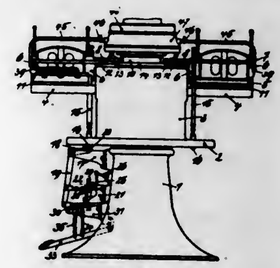
A switch comprising a casing, spaced resilient contacts mounted in the casing, a lever pivotally mounted ingthe casing with one end thereof arranged exteriorly of the casing to provide a handle and the other end of said lever arranged for movement between said contacts, resilient contacts carried by the last-named end of the lever to alternatingly engage the first-meationed contacts during opposite movements of the lever by the handle, tension means connected to the lever and the casing for normally positioning the lever to disengage the contacts, a spring pressed hinged latch plate mounted in the casing and underlying the lever adjacent the handle and having

spaced notches, a lug on said lever to engage in said notches for holding the lever against self-movement and means for removing said plate to allow self-movement of the lever.

1,902,701. SHIP DRIVE-COUPLING MECHANISM. OTTO HEGEMANN, Dortmund, Germany, assignor of one-half to Dortmunder Vulkan A. G., Dortmund, Germany, a Corporation of Germany. Filed Apr. 8, 1930, Serial No. 442,699, and in Germany June 24, 1929. 6 Claims. (Cl. 192—48.)

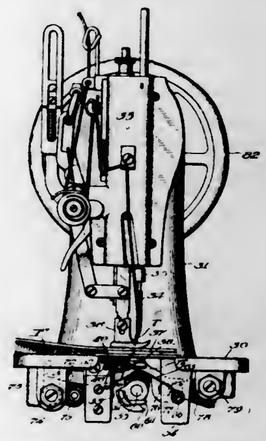
1. In a ship's reversing gear mechanism embodying a helical-band coupling and a rotating casing, a pair of slip-clutch elements movable separately into frictional drive contact with the casing and a plate-member with which one of the same in so moving engages; said plate-member being in turn actable on the helical-band part of the coupling and actuated by said one of the slip-clutch elements to bring the same into operation or engagement after its rotative part has first been set in motion.

1,902,702. SHOTGUN. RALPH M. JENKINS, Orleans, Ind. Filed May 23, 1932. Serial No. 613,072. 10 Claims. (Cl. 42—42.)



1. In a triple barreled shot gun having two barrels in one plane and the third barrel in a parallel plane and between the other two, means for extracting shells from said third barrel operating between the other barrels of said gun, and in advance of the rear end of the barrels.

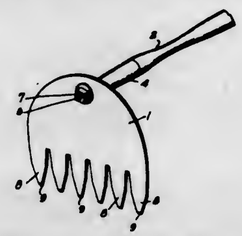
9. In a single-trigger mechanism comprising a selector mechanism movable into two firing positions by a table, means for moving said selector mechanism into a third firing position.



1,902,703. SOLDERING MACHINE. EWALD HORST JUGEL, Goppingen, Germany. Filed Nov. 28, 1931. Serial No. 577,798. 4 Claims. (Cl. 113—92.)

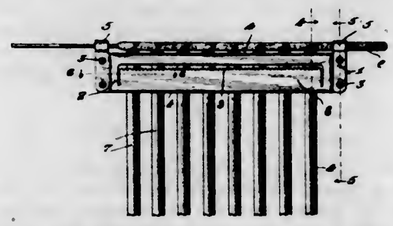
1. A machine for the production of longitudinal soldering seams, comprising, in combination, a stationary base and a rotatory table adapted to perform part rotations in intervals; a plurality of clamping devices attached to said table, each of these devices comprising a supporting mandrel projecting freely over the table, a pressure ledge adapted to be pressed against said mandrel from above, an abutment ledge adapted to be shifted parallel to said pressure ledge, and a heating device so located as to be adapted to heat the place of soldering of the workpiece; a cam for the automatic and positive control of said ledges, a bell-crank lever (26) so arranged as to be adapted to be actuated by said cam; a shiftable roll (22) and a chain (25) connected at one end with said lever and running over said roll; another bell-crank lever (18, 19), one arm of which is connected with the other end of said chain;

a supporting member (20) attached to the other arm of said other bell-crank lever; a slidable rod (15) carried by said supporting member, and a lever (8) hinged to said rod, this lever carrying said pressure ledge, substantially as set forth.



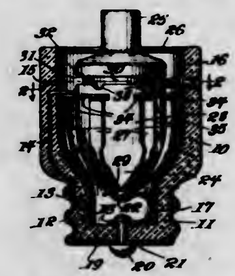
1,902,704. TUFTING MECHANISM. CHARLES KADLEC, Oshkosh, Wis., assignor to Waite Carpet Company, Oshkosh, Wis., a Corporation of Wisconsin. Filed Dec. 2, 1931. Serial No. 578,425. 31 Claims. (Cl. 112—79.)

1. In tufting mechanism of the class described, the combination of a reciprocating needle, a bill-shaped looper presenting its tip in a direction opposite to the line of advance of the fabric and in closely spaced relation to the needle when lowered and provided with a downwardly presented cutting blade, a feeding finger mounted for movement laterally past the tip of the needle when lowered, to engage a turn of thread carried by the needle and carry the same over the tip of the looper, and means for actuating the parts in timed relationship to one another.



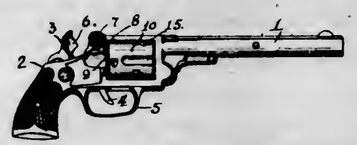
1,902,705. HOE. WILLIAM B. KEE, Atlanta, Ga. Filed Oct. 21, 1932. Serial No. 638,963. 1 Claim. (Cl. 97—71.)

An implement of the class described comprising a hoe structure provided with a body portion and a plurality of spaced, parallel, sharpened teeth extending from the body portion and adapted to enter the soil, each tooth having side edges in the plane of the adjacent teeth and provided with one angle of inclination extending from the points of each tooth to a point approximately one-half the length thereof, and with a continuing straight edge extending at



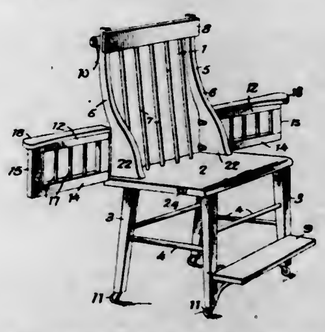
a less angle of inclination to the point of merger with the body portion of the hoe, substantially as and for the purpose set forth.

1,902,706. COMBINATION FUSE HOLDER AND LIGHTER. FRANK E. KEESE, Jr., Iron River, Mich. Filed Apr. 21, 1932. Serial No. 606,711. 3 Claims. (Cl. 102—8.)



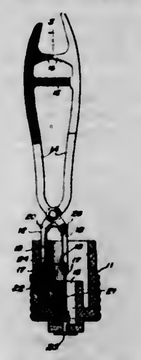
1. A holder comprising spaced plates fixed together to receive therebetween a plurality of fuses with their igniting ends arranged in alignment, tension tongues on said plates and gripping the fuses, and a burnable medium carried by said plates and arranged in close proximity to the igniting ends of said fuses.

1,902,707. RENEWABLE ELECTRIC FUSE. CHARLES KEMP and ERNEST KEMP, Bloomfield, Ind. Filed July 8, 1931. Serial No. 548,635. 8 Claims. (Cl. 200—125.)



1. A renewable fuse device comprising a casing of insulating material, a metallic threaded shell member on one end of said casing adapted to be screwed into a socket, a spring contact bearing secured within said end of the casing and having a projecting element adapted to engage the central contact of a socket, a contact member embedded in the wall of said casing and connected with said shell member, a spindle of insulating material rotatably mounted within the casing, and a plurality of fuse elements carried by said spindle and radiating from a common element rotatably engaged with said spring contact bearing and having their other ends terminating in lateral extensions cooperating with said contact member embedded in the wall of the casing.

1,902,708. TOY PISTOL. FREDERICK B. KEYSTON, San Mateo, Calif., assignor to Keyston Bros., San Francisco, Calif., a Corporation of California. Filed Feb. 15, 1932. Serial No. 592,901. 4 Claims. (Cl. 42—58.)



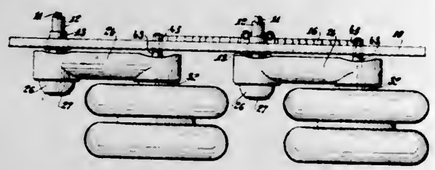
1. A toy pistol of the revolver type comprising a body having a stock and a paper cap seat; a hammer and trigger assembly carried by the stock and associated for tripping function; a barrel extending from the body; a chambered cylinder revolubly mounted in the body between the cap seat and the barrel, said cylinder having a plurality of exterior recesses; and a spring mounted in the body above said cylinder for resiliently engaging said recesses when the cylinder is revolved.

1,902,709. INVALID'S CHAIR. DELLA KING, Louisville, Ky. Filed Apr. 9, 1932. Serial No. 604,302. 4 Claims. (Cl. 155—30.)

1. A chair having a seat, a seat back including side members set inward from the side edges of the seat and forming stops, side arms hinged on fixed pivots to swing to a forward operative position above and at the sides of the seat and against said stops and to a rearward inoperative position behind the seat back, and a latch for fixing each side arm in its operative position to the seat.

1,902,710. FUSE REFILLING TOOL. MASARU KONDO, Puunene, Maui, Territory of Hawaii. Filed Feb. 29, 1932. Serial No. 595,949. 1 Claim. (Cl. 81—5.1.)

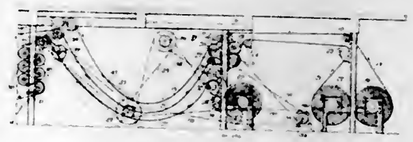
A tool of the kind indicated comprising pivotally connected members of which those portions on one side



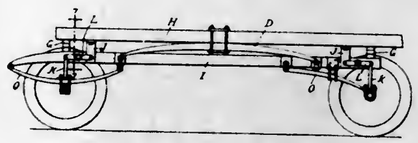
of the pivot constitute jaws and the remaining portions constitute handles, an expansion spring connecting the handles, stops carried by the handles and engaged with each other against the action of the spring, and a bowed spring member disposed between the jaws and secured to each, the legs of said member lying flat against the jaws and the latter and the spring member having lateral extensions constituting fuse leg engaging elements.

1,902,711. BUSHING REMOVER. HARRY W. KULP and MARTIN C. DELLINGER, Lancaster, Pa. Filed Nov. 21, 1928. Serial No. 320,851. 11 Claims. (Cl. 29—88.2.)

1. A bushing removing tool comprising two members having their upper end portions secured together, free arms adapted to cooperate in fitting about an interposed part and adapted to engage the opposed end face of a bushing while said interposed part extends in said bushing, and formed intermediate said upper end portions and said arms with portions outwardly bent away from each other whereby said members may straddle an element of greater diameter than, and carried by, said interposed part and exert pressure on said opposed end face of said bushing.



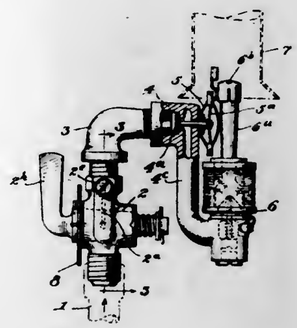
1,902,712. CHAIN DRIVE. AUGUST H. LEIPERT, College Point, N. Y., assignor to International Motor Company, New York, N. Y., a Corporation of Delaware. Filed July 22, 1931. Serial No. 552,361. 6 Claims. (Cl. 180—22.)



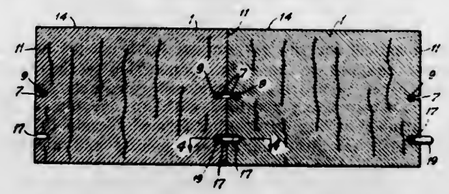
1. A drive for a wheel mounted independently on a vehicle frame comprising a hollow crank arm for mounting a wheel and having apertures spaced upon opposite sides at one end thereof, a driving shaft on the frame projecting into the crank arm, a housing for the shaft secured to the frame, a sleeve journaled on the housing in the crank arm, a spider secured to the sleeve and splined to the shaft, and means to journal the arm on the spider.

1,902,713. MACHINE FOR PASTING WEBS OF PAPER TOGETHER. JOSEPH A. LOWE, Fitchburg, Mass., assignor to Falulah Paper Company, Fitchburg, Mass., a Corporation of Massachusetts. Filed June 21, 1930. Serial No. 462,847. 18 Claims. (Cl. 154—37.)

1. In a machine for pasting webs of paper together to form a sheet, nip rolls disposed adjacent each other for drawing webs of paper from unwinding rolls, guide rolls disposed adjacent each other and spaced from the nip rolls to provide a festooning arrangement between the nip rolls and the guide rolls with the webs of paper disposed face to face and approximately parallel, wrap rolls for holding the webs of paper under tension, means for drawing the webs of paper from the wrap rolls and pressing the webs of paper together, and a pasting means between the wrap rolls and the first mentioned means for coating surfaces of one or more webs of paper with paste.



1,902,714. METHOD OF SUPERSHOCK ABSORPTION. RHETHERFORD B. MARTIN, Roselle, N. J. Filed Jan. 26, 1927, Serial No. 163,709. Renewed Mar. 16, 1932. 2 Claims. (Cl. 280—106.5.)

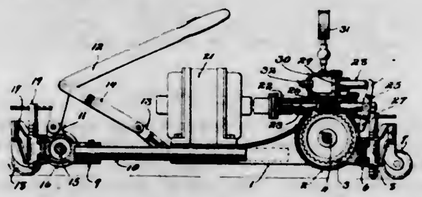


1. The combination with front and rear axles of a vehicle, of spaced frames superposed relative to said axles, bowed leaf springs arranged at opposite sides and opposite ends of the frames and connecting the same, said side springs being located medially with respect to the frames, bowed springs yieldably suspending said frames from the axles and means connecting the axles of said frames operative by shock impacts to reverse the directions of movements of the frames and axles.

1,902,715. GAS REFRIGERATING APPARATUS. HAROLD J. NACHMAN, Washington, D. C., assignor to Washington Gas Light Company, Washington, D. C., a Corporation. Filed Mar. 9, 1931. Serial No. 521,328. 2 Claims. (Cl. 62—5.)

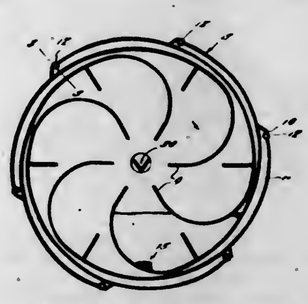
1. In gas refrigerating apparatus of the character specified having a generator, a burner, a manually operable main gas valve, means for conducting gas from the said valve to the burner, and a thermostatic cut-off valve interposed between the main valve and burner and adapted to be heated by the burner flame, said manually operable valve being open when the apparatus is normally operating and closed when it is desired to defrost the apparatus; a passage whereby when the main valve is closed a small amount of gas is supplied to the burner to maintain a flame sufficient to keep the thermostatic valve open and the generator warm enough to prevent condensation of vapors therein.

1,902,716. FLOORING. HAROLD M. NEWTON, Clayton, Mo., assignor to Midland Creosoting Company, Toledo, Ohio, a Corporation of Ohio. Filed Sept. 8, 1931. Serial No. 561,655. 11 Claims. (Cl. 20—6.)



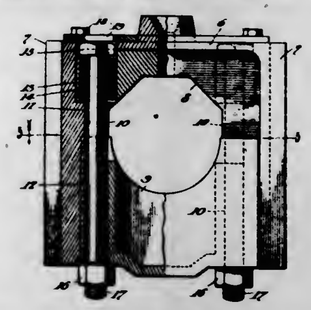
1. Flooring comprising units, the units being composed of juxtaposed wood members, aligned grooves in the members and wire in said grooves joining said members, said grooves having widths normally less than the diameter of the wire, the grooves being so arranged with respect to the natural grain of the wood that said wood presents end grain to wear after the flooring is laid.

1,902,717. PAPER DRINKING CUP. ABRAHAM NOVICK, Flushing, N. Y., assignor to United States Envelope Company, Worcester, Mass., a Corporation of Maine. Filed Jan. 11, 1930. Serial No. 420,128. 6 Claims. (Cl. 229—1.5.)



1. A paper drinking cup comprising a sector-shaped body portion, a body flap folded upward toward the bottom portion, and wing portions turned over without creasing into overlapped relation with and secured adhesively to the outer face of the bottom flap just above the lower margin thereof, forming a cup of normally distended open form, tapering to a straight line bottom closure, portions of the walls of the cup adjacent said bottom closure being of less thickness than portions of the walls directly above said bottom portions.

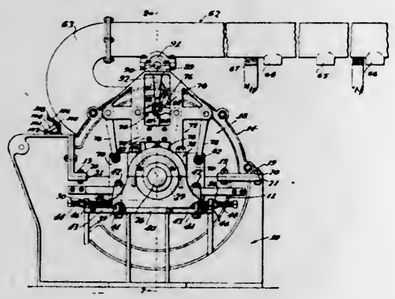
1,902,718. BRAKE TESTING DEVICE FOR VEHICLE WHEELS. THOMAS A. PATTERSON, Clintonville, Wis. Filed May 31, 1928. Serial No. 282,027. 4 Claims. (Cl. 265—25.)



1. A brake testing device for vehicle wheels comprising a body portion, an auxiliary portion slidably carried by said body portion, wheel engaging rollers carried by said body portion and auxiliary portion, means for moving said auxiliary portion towards said body portion to cause said rollers to engage and raise a wheel of the vehicle, power means for rotating one of said rollers, and a dynamometer for indicating the force required to rotate the vehicle wheel.

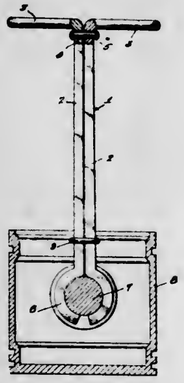
1,902,719. METHOD OF CLEANSING METERING DRUMS. THOMAS PAYTON, Rock Rapids, Iowa. Filed Nov. 18, 1931. Serial No. 574,881. 1 Claim. (Cl. 141—1.)

The herein described method of washing and cleansing a metering drum of the type having an axial hub, peripheral slots, and circumferentially spaced baffles therein, comprising placing and confining shot within the drum while permitting the passage of cleaning solution into and out of said drum through said slots, then rotating said drum containing shot with its axis substantially horizontal and its lower part dipping into a cleaning solution, and finally removing the shot through said hub while said drum rotates.



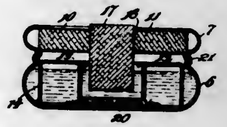
1,902,720. LOCOMOTIVE JOURNAL BOX. ARTHUR FRED PHELPS, Bluefield, W. Va., assignor to West Virginia Armature Co., Bluefield, W. Va. Filed Apr. 28, 1931. Serial No. 533,585. 1 Claim. (Cl. 308—88.)

An inside journal box for locomotive axles comprising an open frame adapted to be mounted on the locomotive, an upper bearing block arranged in and fixed to the frame, a lower bearing block mounted on and between the sides of the frame for sliding movement toward and away from the upper bearing block and for restricted angular movement with relation to the frame and upper bearing block, the bearing blocks having alined bolt openings and the upper portions of the openings in the upper bearing block being enlarged to provide recesses, bolts mounted in said openings and smaller diametrically than the same to permit the lower bearing block to move angularly with relation to the frame and upper bearing block without distorting the bolts, the bolts having heads located in said recesses and having elements contacting with the lower side of the lower bearing block, and springs sleeved on the bolts between the heads and the bottom walls of



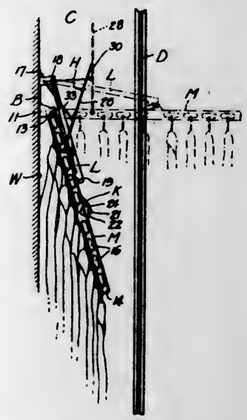
said recesses and constantly acting to move the lower bearing block in the direction of the upper bearing block and normally hold the lower bearing block against angular movement.

1,902,721. ROCK CRUSHER AND SEPARATOR. GEORGE A. REYNOLDS, Los Angeles, Calif. Filed Oct. 25, 1930. Serial No. 491,241. 4 Claims. (Cl. 83—11.)



1. An apparatus of the character described comprising a housing, a shaft extending through said housing, bearings rotatably supporting said shaft at each end thereof, a plurality of disks secured to said shaft, a plurality of hammers pivotally mounted on pins extending between said disks, a horizontally disposed conduit having a plurality of outlets connected to said housings with one end thereof in register with an opening formed in said housing, each of said disks and hammers having a plurality of blades formed thereon for inducing a current of air through said housing and conduit, and means for controlling the current of air induced by the fan blades on said disks and hammers.

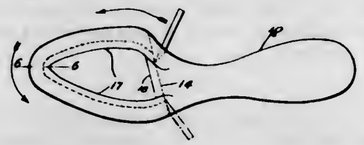
1,902,722. PISTON TOOL. POSEY D. REYNOLDS, Rustburg, Va. Filed July 6, 1932. Serial No. 621,108. 1 Claim. (Cl. 294—115.)



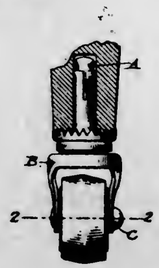
A tool comprising elongated shanks, arcuate shaped jaws formed on one of the ends of the shanks, handles formed on the other ends of the shanks, said shanks having aligned openings adjacent the handles, a rivet loosely fitted in the apertures to pivotally connect the shanks, and a collar slidable on the shanks to be moved towards the jaws for urging the latter about the wrist pin of a piston.

1,902,723. CONTAINER. EDWARD WILLIAM ROBERTS, Chicago, Ill., assignor to Lakewood Manufacturing Co., Chicago, Ill., a Corporation of Illinois. Filed Sept. 10, 1930. Serial No. 480,933. 2 Claims. (Cl. 43—131.)

1. An article for the purpose set forth comprising two members adapted to have interconnection with respect to each other to provide an enclosed receptacle and one of the members being provided with an opening, a partition member having an opening formed therein in registration with the first mentioned opening and arranged in said receptacle to divide the receptacle into an upper and lower compartment, an absorbent member arranged in the upper compartment and supported by the partition member and having a portion thereof exposed through the first mentioned opening, and a wick member in contact with the absorbent member with one end projecting through the first mentioned opening and having its opposite end portion extending into the lower compartment.



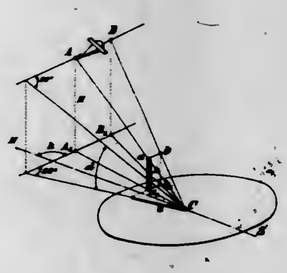
1,902,724. GARMENT RACK. ARTHUR E. SANDERSON, San Pedro, Calif., assignor of one-half to Hughes T. Rupert, San Pedro, Calif. Filed Mar. 16, 1931. Serial No. 523,082. 12 Claims. (Cl. 211—99.)



1. A garment rack comprising a garment supporting member, means for mounting said member on a support for pivotal movement vertically to occupy raised and lowered positions, a pivoted latching member having a lug adapted to ride upon a surface of the garment supporting member during movement of the latter, and a keeper pivoted on the garment supporting member over which said lug is adapted to ride during raising movement of the garment supporting member, the keeper having a notch receiving said lug to latch the garment supporting member in raised position.

1,902,725. METHOD OF PRODUCING COMPLEMENTARY INSOLE-OUTSOLE COMBINATIONS. FRANK SBICCA Philadelphia, Pa., assignor to Sbicca-Method Shoes Incorporated, Philadelphia, Pa., a Corporation of Delaware. Filed Nov. 7, 1931. Serial No. 573,676. 4 Claims. (Cl. 12—146.)

1. The method of producing complementary insole-outsole combinations comprising the following steps, providing a leather sole blank of the desired thickness of the outsole and having a grain and a flesh side, splitting the heel and shank portions of the sole blank to form insole and outsole shank pieces, removing a rand from the margin of the ball section of the flesh side of the sole while leaving the same attached to the forward end of the insole shank piece, and splitting the sole between the shank and ball sections by a cut extending inwardly from the flesh side thereof to the depth of the desired insole and between the rand terminals.



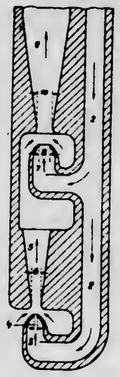
1,902,726. CASTER ROLLER. WILLLIAM F. SCHACHT, Huntington, Ind. Filed May 9, 1932. Serial No. 610,253. 1 Claim. (Cl. 16—45.)

A caster wheel, comprising a molded circular solid body of rubber, having an axial bore extending therethrough; side plates each having an inwardly directed offset shoulder adjacent their peripheries closely fitted against the sides of the body, the offset shoulders being substantially V-shaped in cross-section and adapted under compression to enter into the sides of the body and maintain the sides of the body in substantial conformity with the contour of the side plates; the marginal portions of the side plates lying against the sides of the body adjacent its periphery; and means transfixing the body and connecting the side plates together with the body compressed therebetween.

1,902,727. APPARATUS FOR DETERMINING THE POSITION OF AIRCRAFT NOT VISIBLE WITH THE NAKED EYE. JOHANN SCHIER, KARL PETSCHENIG, and ANTON PEINL, Vienna, Austria, assignors to the Firm Optische Anstalt C. P. Goerz Aktiengesellschaft, Akciova Spolecnost K. P. Goerz, Opticky Ustav, in Bratislava, Czechoslovakia. Filed Nov. 15, 1924, Serial No. 750,215, and in Czechoslovakia Nov. 16, 1923. 1 Claim. (Cl. 181—05.)

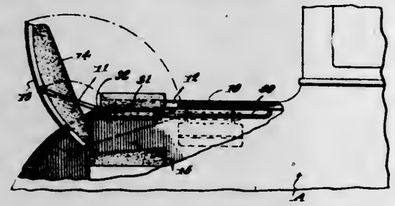
In an apparatus for determining and following the path of an object not visible with the naked eye, but producing a sound, the said object moving substantially in a straight horizontal line, a unitary structure located at the point of observation and comprising a double binaural device for determining the direction of the incoming sound waves means cooperating with the said binaural device for keeping the plane of the sound receiving orifices of the said binaural device perpendicular to the said incoming sound waves moving in the so-called roof plane, and a horizontal rotatable table for plotting a line parallel to the direction of flight of the aircraft, the said table being provided with parallel lines, the distance of the said lines from the center of the table being proportional to the cotangent of the angle of the roof plane relatively to a horizontal plane, and means on said first-mentioned means and cooperating with said table for defining a rectangular rotatable triangle having a constant height and a hypothenuse of variable length, the said hypothenuse being arranged at a right angle to the binaural device whereby the said hypothenuse lies constantly in the direction of the sound waves.

1,902,728. CONVEYING LIQUIDS AT HIGH PRESSURE BY MEANS OF EJECTORS. PAUL SCHMIDT, Munich, Germany. Filed Aug. 14, 1930, Serial No. 475,803, and in Germany Aug. 21, 1929. 2 Claims. (Cl. 103—233.)



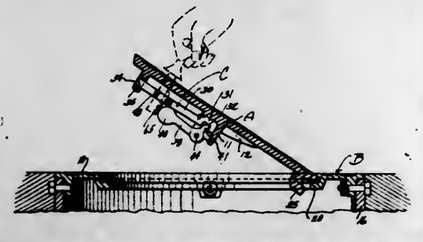
1. The method of creating a high liquid pressure in a conduit which comprises admitting a liquid under low pressure into the conduit, and successively imparting to it, during its passage through the conduit, increments of pressure totaling the differential between said high and low pressures by impulses from individual jets from a single column of a liquid under a pressure less than the said high pressure to be created.

1,902,729. MULTISTAGE LIQUID DRIVEN EJECTOR FOR DELIVERING LIQUIDS. PAUL SCHMIDT, Munich, Germany. Filed Aug. 10, 1932, Serial No. 628,247, and in Germany, Aug. 15, 1931. 1 Claim. (Cl. 103—261.)



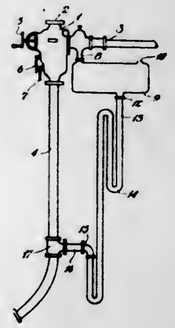
A liquid driven ejector of two or more stages, for delivering liquids from deep bore holes, characterized by the

fact that, in the first stage the size of the exit cross sectional area of the driving nozzle is less than 0.5 of the size of the smallest cross sectional area of the diffuser, while



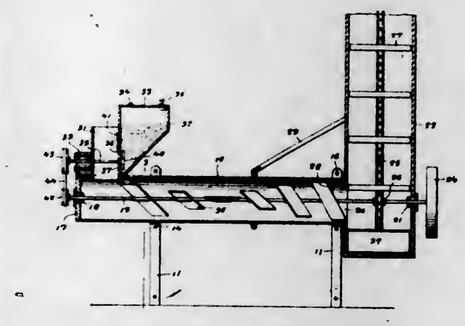
in the second stage, the size of the exit cross sectional area of the driving nozzle is more than 0.6 of the size of the smallest cross sectional area of the diffuser.

1,902,730. SIDE ARM CUSHION. ARTHUR W. SHAW, Cambridge, Mass. Filed Mar 8, 1930. Serial No. 434,850. 1 Claim. (Cl. 155—198.)



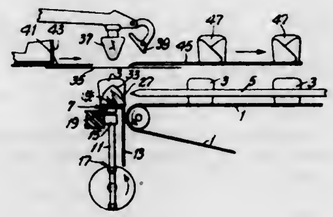
The combination with a vehicle provided with a rumble seat opening having a hinged back secured thereto, a guiding rod extending longitudinally of the side of the rumble seat opening and hung under the side edge thereof, an arm rest slidably mounted upon said rod and capable of being swung thereon, whereby the arm rest may be moved over the edge of the rumble seat opening to protect the same, and means pivotally connecting the back to said arm rest for automatically moving said arm rest longitudinally upon said rod and away from the side edge of the rumble seat opening to permit the closing of said hinged back over said opening.

1,902,731. LOCKING COVER. WARREN S. SHERMAN, Oklahoma City, Okla. Filed Nov. 15, 1930. Serial No. 496,008. 2 Claims. (Cl. 70—14.)



1. In a cover lock, the combination of a cover having an elongated keyhole and a depending flange about said keyhole, said flange having an outer face substantially perpendicular to the cover throughout the length of said flange, and a locking bolt carried by said cover, said locking bolt including a portion engageable with a key for retracting said bolt, whereby said flange provides a substantially perpendicular stop for the bit of a key to prevent unintentional removal of said key, the bit of said key being provided with a recess allowing insertion, operation and partial retraction of the key so as to receive said flange in said recess and thus stop said key from removal by abutment of its bit against said substantially perpendicular flange.

1,902,732. METHOD OF AND APPARATUS FOR ECONOMIZING FEED WATER. MICHAEL P. SHIELDS, Quebec, Quebec, Canada. Filed Oct. 31, 1929. Serial No. 403,843. 7 Claims. (Cl. 103—264.)



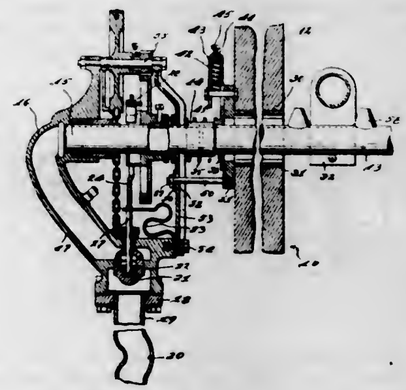
1. The method of economizing feed water being injected into a boiler by a steam jet which consists in draining by gravity from the injector and against atmospheric pressure only, the mixed steam and water not delivered to the boiler when the injector is first operated, and thereafter, as soon as the feeding operation is effective, drawing the water so collected into the stream being fed into the boiler.

1,902,733. GRAIN TREATING AND ELEVATING DEVICE. HANS M. SMESTAD, Bainville, Mont. Filed July 19, 1930. Serial No. 469,184. 1 Claim. (Cl. 83—28.)

In a device of the character described, a conveyor pipe, legs for the pipe, each leg formed from a single length of material bent to provide spaced parallel members connected at their lower ends, bolts bridging said members, an arcuate-shaped strap formed at the upper ends of the inner members of the legs, curved straps extending from the outer members of said legs around the pipe and adjustably connected together, a head closing one end of the pipe, a vertical feed chute opening into the pipe near its closed ends, a hopper located adjacent to the chute and having openings leading thereinto, a shaft journaled centrally of the pipe and having staggered blades working therein, a second shaft journaled exteriorly of the pipe and having blades working within the hopper next to the openings communicating said hopper with the chute, driving connections between said shafts, and an elevator communicative with the shaft at its end opposite the closed end thereof.

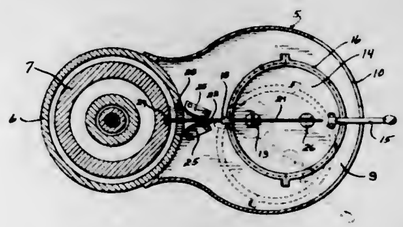
1,902,734. BREAD WRAPPING MACHINE. LEO F. STRENG, Columbia, Mo., assignor to Streng Bakery Appliance Company, Columbia, Mo., a Corporation of Missouri. Filed July 22, 1932. Serial No. 624,008. 9 Claims. (Cl. 93—2.)

1. In a bread wrapping machine, an elevator, wrapping means including end folding plates and a bottom plate adapted to force the wrapping material beneath the loaf being wrapped, said elevator including collapsible end wings adapted to hold sliced loaves from falling apart, said end wings remaining in position until said loaf is positioned between said end folding plates, said bottom plate and said wings being so shaped that as said bottom plate advances to force the wrapping material beneath said loaf, it collapses said end wings.



1,902,735. PROCESS FOR TREATING MATERIAL CONTAINING TIN. SETSUZO TAMARU, Kamakura Gun, Kanagawa Ken, and YUKO KOIZUMI, Ebara Gun, Tokyo Fu, Japan, assignors to Mitsubishi Kogyo Kabushiki Kaisha, Tokyo, Japan, a Corporation of Japan. Filed Sept. 11, 1928, Serial No. 305,313, and in Japan Feb. 7, 1928. 6 Claims. (Cl. 23—53.)

1. A process for treating ores containing tin with oxygen containing alkaline earth metal compounds, which consists in igniting the mixture in the presence of a trace of reducing agent, and converting tin into the form easily soluble in acid and alkali, thereby to render possible its technical separation from its admixture.

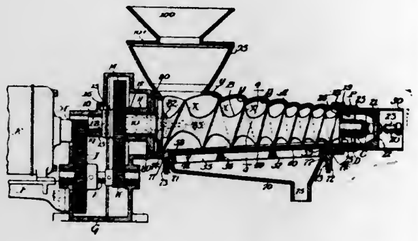


6. A process for treating ores containing tin with oxygen containing alkaline earth metal compounds, which consists in igniting the mixture in the presence of a trace of reducing agent and extracting tin therefrom by a solution containing alkali and a salt of alkali metal.

1,902,736. BOILER CLEANER. WILLIS P. THOMAS, Detroit, Mich., assignor to Diamond Power Specialty Corporation, Detroit, Mich., a Corporation of Michigan. Original application filed Nov. 6, 1922, Serial No. 599,330. Divided and this application filed Nov. 25, 1929. Serial No. 409,611. 9 Claims. (Cl. 122—392.)

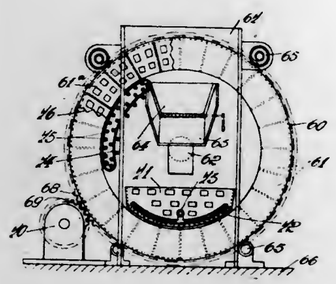
1. In a boiler cleaner, the combination with a boiler wall, a blower element projecting through said wall for discharging jets of cleaning fluid adjacent the portions of the boiler to be cleaned, and a head arranged exteriorly of said boiler wall for supplying cleaning fluid to said blower element, said blower element being rotatable relative to said head but fixed against longitudinal movement with respect thereto, of means for adjusting said blower element relative to the portions of the boiler to be cleaned, said means including a bracket fixed to said head and a member fixed to said boiler wall and adjustably engaging said bracket.

1,902,737. VEHICLE SIGNAL SWITCH. JOHN EMMANUEL TSAVARIS, Tarpon Springs, Fla. Filed Oct. 9, 1930. Serial No. 487,540. 5 Claims. (Cl. 200—59.)



1. In a vehicle signal switch the combination with a steering column housing having an opening therethru and a steering tube rotatable in the housing and provided with a recess for movement past said opening, of a casing mounted upon the housing over said opening, a manually operated eccentric disc mounted in the casing, circuit controlling means operable by movement of the disc when swung to either side of a neutral position, an eccentric strap on the disc, and a spring arm carried by the strap and operatively connected to the eccentric disc for movement into engagement at one end with the periphery of the steering tube at a selected side of said recess, said end of the arm being engaged in the recess upon rotation of the steering shaft to return the disc to a neutral position.

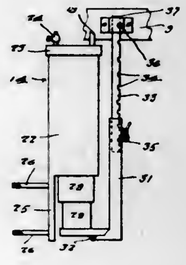
1,902,738. MACHINE FOR EXPRESSING FRUIT JUICES AND THE LIKE. HENRY W. TUTTLE, Chicago, Ill. Filed Sept. 2, 1927. Serial No. 217,248. 16 Claims. (Cl. 100—48.)



1. In combination, a screw casing provided on the interior thereof with spiral inwardly projecting ribs having feed grooves therebetween, and a co-operating screw revolubly mounted within said casing and being provided with a continuous spiral rib extending from end to end thereof, and having a continuous spiral feed groove between said

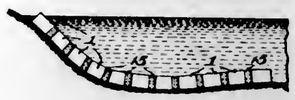
ribs and co-operating with the spiral feed grooves of the said casing, there being a portion of the side wall of each convolution of the said groove in the casing formed to lie approximately parallel to the plane of the pitch of the screw, one of the side walls of the grooves of the

said screw opposite the aforesaid wall in the groove of the casing being formed also approximately parallel to the plane of the pitch of the screw and consequently approximately parallel with the opposing wall in the corresponding groove of the casing.



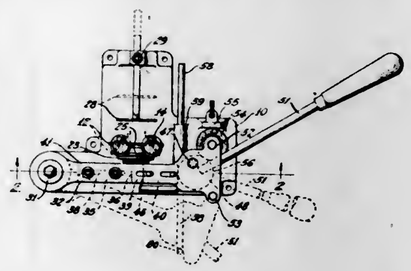
1,902,739. APPARATUS FOR SEPARATING WATER FROM DREDGED MATERIAL. DIRK VERSTOEP, The Hague, Netherlands. Filed Mar. 4, 1931, Serial No. 520,015, and in Belgium Mar. 7, 1930. 2 Claims. (Cl. 40—196.)

1. An apparatus for separating water from dredged material, comprising a wheel structure rotatable about a horizontal axis, said wheel having a series of circumferentially arranged compartments which are open at the side facing the center of the wheel, a fixed trough having straining apertures in the side walls mounted inside the wheel in the lowest part of the inner free space, means for discharging the contents of the trough into the wheel compartments, a chute for conveying the contents discharged from the wheel compartments and extending from the upper part of the inner free space of the wheel to an outer point of discharge, and means for rotating the wheel.



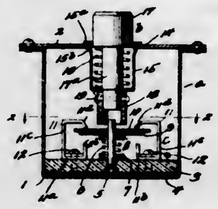
1,902,740. COMBINATION JACK AND SHOCK ABSORBING STRUCTURE. ALBERT BERT WALTER, Elm Grove, W. Va. Filed Sept. 30, 1931. Serial No. 566,102. 5 Claims. (Cl. 254—93.)

1. In a structure of the class described, in combination, a wheel supported axle, a vehicle frame connected thereto, a fluid actuated lifting jack clamped on said axle, said jack embodying a cylinder, an air supply pipe connected thereto, an air release valve also connected thereto, a piston slidable in said cylinder, said piston being provided with a base plate constituting a foot, and adjustable means for connecting the foot to said frame, whereby to



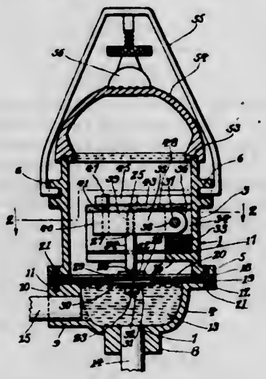
permit the jack to have the additional function of a pneumatic shock absorber when partially collapsed for normal running conditions.

1,902,741. DIVERSION DAM. CARL WEBER, Jacksonville, Fla. Filed Dec. 1, 1930. Serial No. 499,355. 4 Claims. (Cl. 61—32.)



1. A diversion dam composed of sinkable independent hollow units, flexible couplings uniting said units and a flexible mat secured to each unit to overlap the joint between it and the adjacent unit.

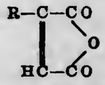
1,902,742. INSULATION STRIPPING DEVICE. ALFRED N. WENTINK, Chicago, Ill. Filed Sept. 28, 1931. Serial No. 565,678. 13 Claims. (Cl. 81—9.51.)



1. A device of the character described, comprising a base, rotatable elements on the base, stripping knives carried by the rotatable elements, means constraining said elements and knives to rotate in unison, an arm pivotally mounted on the base, a slidable jaw and a relatively stationary jaw carried by said arm adapted to grip an object and pull the same between the knives, a rotatable cam eccentrically mounted on said arm to move said slidable jaw toward said stationary jaw, a handle attached to said cam for moving the same, and stops on said arm limiting movement of said handle relative to said arm.

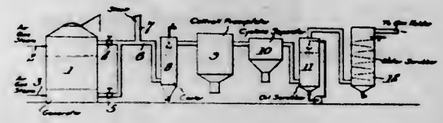
1,902,743. PUSH BUTTON SWITCH. GEORGE H. WHITTINGHAM, Baltimore, Md., assignor to Monitor Controller Company, Baltimore, Md., a Corporation of Maryland. Filed Aug. 4, 1930. Serial No. 472,963. 3 Claims. (Cl. 200—159.)

3. A switch casing having a detachable cover, a base of insulating material removably secured within the casing, a switch mounted on said base and comprising a guide pin projecting toward the cover, stationary contact members at opposite sides of the pin, each member having two spaced contact surfaces, an insulating disk and a metal disk slidable on the pin and both projecting between said spaced surfaces and a spring interposed between said disks and the base, and means for moving said disks comprising a thimble, concentric with the pin, extending through an opening in the cover into the casing and secured to the cover, a push button movable in said thimble and having a shank extending through the bottom of the thimble, a sleeve of insulating material on the inner end of said shank adapted to bear against said disks, and a spring in said thimble normally pressing said push button away from the disks.



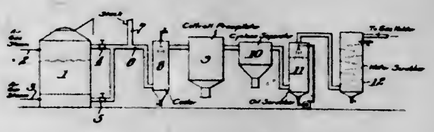
1,902,744. CIRCUIT CONTROLLING DEVICE. CHRISTOPHER B. WILLI, Heber, Calif., assignor of one-fourth to George D. Thompson, Heber, Calif. Filed Feb. 11, 1932. Serial No. 592,416. 2 Claims. (Cl. 200—83.)

1. In a circuit controlling device, an angle shaped flat support including a pair of legs disposed at right angles to each other, an insulator element mounted on and of the same form as that of said support, an angle shaped flat holder including a pair of legs disposed at right angles to each other, seated upon and of the same form as that of said element, one of the legs of said holder formed in its upper face with a transverse groove, insulating means mounted upon the other leg of the holder, a shiftable arm having one end positioned in said groove, said arm being pivotally connected at said end to and extended from said grooved leg, said arm having a vertical opening and a breaker point interposed in the circuit, a holder mounted on said means and formed with a stationary arm extended over said shiftable arm, said stationary arm having a breaker point interposed in the circuit and normally spaced from and aligning with said other breaker point, a spring attached to and extending from said grooved leg and permanently bearing on said shiftable arm, means for anchoring said support, holders, insulating means and element together, and a normally stationary vertically movable shouldered post abutting and extending into said opening and providing when moved upwardly to bring the breaker points on said arms into contact.



1,902,745. ANTIRACHITICALLY ACTIVE PRODUCT. ADOLF WINDAUS, Gottingen, Germany, assignor to Winthrop Chemical Company, Inc., New York, N. Y., a Corporation of New York. Filed June 24, 1931, Serial No. 546,662, and in Germany Apr. 2, 1931. 21 Claims. (Cl. 167—81.)

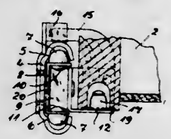
1. In the process of preparing antirachitically highly active transformation products of ergosterol which has been irradiated with ultra violet light not containing wave lengths below 275 $\mu\mu$, the steps which comprise reacting upon the irradiation product with an anhydride of the formula



wherein R stands for hydrogen or alkyl during several days in the presence of an organic solvent being inert to the reacting components, subjecting the reaction mass to a saponifying process at room temperature, and extracting the reaction mass by means of an organic solvent.

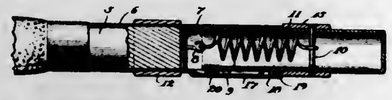
1,902,746. PROCESS FOR THE PRODUCTION OF CARBON BLACK. JAMES A. YUNKER, Louisville, Ky., assignor to National Gas Hydrogen Corporation, New York, N. Y., a Corporation of Delaware. Filed July 8, 1930. Serial No. 466,558. 4 Claims. (Cl. 134—60.)

3. Process of making carbon black which comprises blasting a bed of ignited coke with air, purging the coke bed with steam, passing natural gas through the bed of coke and continuously repeating this series of steps, collecting carbon black from the gases produced by the passage of natural gas through the coke bed, and occasionally substituting steam for natural gas in the cycle.



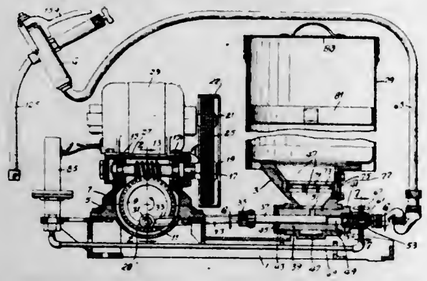
1,902,747. PROCESS OF RE-FORMING NATURAL GAS. JAMES A. YUNKER, Louisville, Ky., assignor to Natural Gas Hydrogen Corporation, New York, N. Y., a Corporation of Delaware. Filed July 8, 1930. Serial No. 466,559. 1 Claim. (Cl. 48—196.)

Process of re-forming natural gas which comprises blasting a bed of coke at a temperature of about 1200° C., with air for about three minutes, to raise its temperature to about 1400° C., wasting the gases produced during about the first 2¼ minutes of said 3 minute period and saving the gases produced during about the last ¾ minute



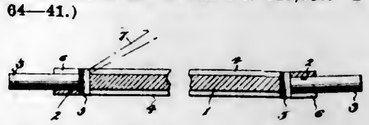
of said 3 minute period, purging the bed of coke with steam for about ½ minute, saving the resulting gases, and then passing natural gas through the bed of coke for about 8 to 10 minutes, saving the resulting gases, purifying the saved gases and recovering carbon black therefrom and mixing the purified gases for use as fuel, and continuously repeating the series of operations.

1,902,748. DRAWER GUIDE. GUSTAV HERMANN ZIEHL, Rodenkirchen, Germany. Filed Oct. 30, 1931, Serial No. 572,137, and in Germany Nov. 8, 1930. 7 Claims. (Cl. 45—77.)



1. In a device of the kind described, a cabinet having side walls and an open front, main channel rails fixed to said side walls in confronting relation, sliding rails supported in said main rails to move in and out of the cabinet, means to limit outward movement of the sliding rails arranged to retain the rear ends of the sliding rails in the channel rails in the extreme outward position of said sliding rails, said sliding rails includng angle members havng horizontal legs projecting toward the center of the cabinet from the sliding rails, and a drawer resting on said horizontal legs and vertically liftable therefrom, said drawer being slidable on said horizontal legs.

1,902,749. ATTACHING MEANS FOR FISHING REELS. CLIFF BAIRD and WILLIAM R. ROBERTSON, Eugene, Oreg. Filed Apr. 19, 1932. Serial No. 606,210. 5 Claims. (Cl. 43—22.)

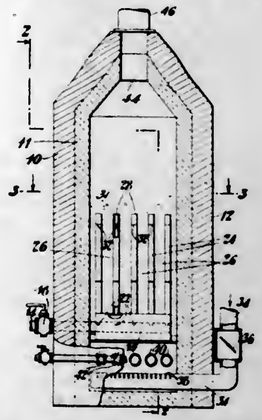


1. A reel holder for fishing rods comprising a sleeve attachable to the rod, a spring retracted carrier telescopically mounted therein, pockets on the sleeve and the carrier for receiving the reel base, said sleeve having a longitudinal groove on its inner wall, and a projection on the carrier slidable in said groove and maintaining the pockets in alignment.

1,902,750. DISPENSING APPARATUS. FRANK S. BARKS, St. Louis, Mo. Filed Sept. 8, 1928. Serial No. 304,831. 8 Claims. (Cl. 221—47.1.)

6. In a high pressure lubricating apparatus, a lubricant supply chamber, a delivery line leading from said supply chamber, means for forcing lubricant from said supply chamber to the delivery line whereby high pressure is effected in said line, electric motivating means for actuating said forcing means, an electric circuit for energizing the electric motivating means, a pressure-operated and snap-acting switch in said circuit, means placing said delivery line and said pressure switch in communication, said switch being operable to instantaneously start and stop said motivating means at predetermined pressures in said delivery line.

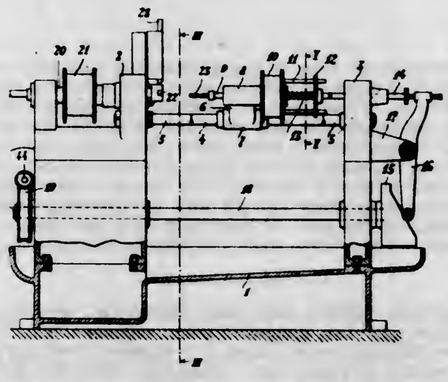
1,902,751. SPINDLE. FRANK BAUMAN, Honesdale, Pa. Filed Nov. 15, 1928. Serial No. 319,568. 2 Claims. (Cl. 64—41.)



1. A spindle provided with an axial opening and an intersecting transverse opening and having a slot formed in a side thereof and extending from the transverse opening through the end of the spindle and communicating with the axial opening, and a removable journal pressed into the axial opening and removable therefrom by means of a drift which has a free passage through the side slot leading outwardly from the axial opening.

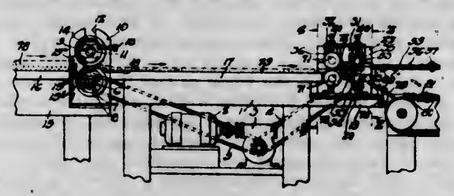
1,902,752. STRAIGHT BAR KNITTING MACHINE. CARL BAUMGÄRTEL, Zeulenroda, Germany. Filed Aug. 22, 1932, Serial No. 629,957, and in Germany Jan. 29, 1931. 6 Claims. (Cl. 66—76.)

1. In a needle operating mechanism for straight bar knitting machines, operating jacks for moving the needles, cams for moving the said operating jacks, and longitudinally shiftable auxiliary jacks on which the said operating jacks are caused to slide, the said operating jacks being lifted and lowered by the said auxiliary jacks parallel to the walls of the needle passage and remaining in continuous engagement with the heels of the needles.



1,902,753. METHOD OF AND APPARATUS FOR PRODUCING CARBON BLACK. DAVID J. BEAVER, Elizabeth, N. J., assignor to General Atlas Carbon Company, Dover, Del., a Corporation of Delaware. Continuation of application Serial No. 219,152, filed Sept. 12, 1927. This application filed Jan. 27, 1931. Serial No. 511,640. 40 Claims. (Cl. 134—60.)

1. Apparatus for the production of carbon black, comprising a furnace chamber having an unobstructed upper interior portion, a plurality of uniformly-spaced, narrow gas ducts mounted in the lower portion of the chamber with their longer sides arranged in parallel, and air ducts surrounding each of the gas ducts and wider than the latter, the said arrangement of the air and gas ducts within the furnace chamber thereby providing for the radiation directly from each flame to the others of a greater proportion of radiant energy, during the combustion of gas in the chamber than is radiated from such flame directly to the walls of the chamber.

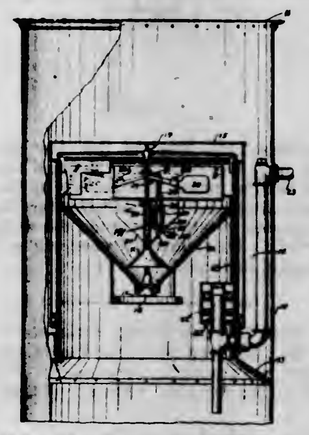


12. In the art of producing carbon black by partial combustion of contiguous flowing streams of hydrocarbons and air in a heated, enclosed chamber, the improvement comprising burning the said hydrocarbon with between 60% and 65% of the theoretical amount of air required for the complete combustion of the hydrocarbons.

1,902,754. AUTOMATIC LATHE FOR HIGH SPEED WORK. ADRÉ BECHLER, Moutier, Switzerland. Filed May 20, 1932, Serial No. 612,594, and in Switzerland Apr. 30, 1932. 3 Claims. (Cl. 29—53.)

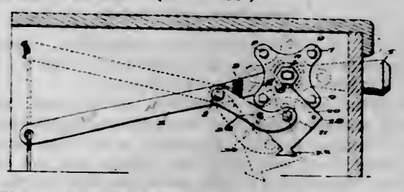
3. In an automatic lathe for high speed work of the kind described, and in combination, a head stock having a hollow base provided with a trough-like extension towards the tail stock, a tail stock mounted upon said extension and connecting rods between head stock and tail stock, a head comprising a housing enclosing the tool with driving means and mounted angularly adjustable on one of the rods left hollow, a driving shaft arranged within said hollow shaft, at least one spindle, as tool holder held slidingly and rotatably within said housing, a system of spur wheels constituting the means for transmitting movement from the said driving shaft to the spindle, a piston-like member held slidingly in the tail stock to constitute an axial abutment for the spindle and a system of cams and levers operated from the main shaft and adapted to guide said piston-like member.

1,902,755. CONFECTION MACHINE. JOHN L. BIGGS, Chicago, Ill., assignor to Queen Anne Candy Company, Hammond, Ind., a Corporation of Illinois. Filed Aug. 12, 1931. Serial No. 556,469. 1 Claim. (Cl. 107—21.)



In a confection machine, the combination of two drums disposed upon parallel axes, blades having cutaway sections and extending radially from the periphery of said drums, and a taut wire intermediate said drums and arranged normally to said axes, said drums being timed to rotate so that a blade on either of said drums traverses the plane common to said axes simultaneously, said wire being cleared by the cutaway sections of one of said drums.

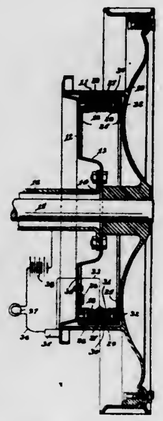
1,902,756. HETEROCYCLIC ARSENO-COMPOUNDS AND PROCESS OF PURIFYING SAME. ARTHUR BINZ, Berlin, and CURT RÄTH, Rangsdorf, Germany. Original application filed Nov. 8, 1924, Serial No. 748,717, and in Germany Nov. 19, 1923. Divided and this application filed Mar. 28, 1927. Serial No. 179,180. 4 Claims. (Cl. 260—15.)



1. Process of purifying heterocyclical compounds which comprises transforming a heterocyclical compound of the arsonic acid type into a compound of a lower degree of oxidation by treating same with a reducing agent separating the resulting arseno compound by filtration and reconverting this arseno compound into the starting product by means of an oxidising agent.

1,902,757. ACETYLENE GENERATOR. ROY A. BOLEY, Indianapolis, Ind., assignor to J. B. Colt Company, a Corporation of New Jersey. Filed June 13, 1928. Serial No. 285,084. 10 Claims. (Cl. 48—38.)

1. In acetylene generator, the combination of a main carbide hopper; a gas bell; a reserve carbide hopper comprising a discharge opening normally closed by a gate; mechanism operable by said bell for opening said gate; mechanism operated by a yieldable means for closing said gate against the pressure thereon of the carbide in said hopper; and a device operable by said mechanism to suddenly release said gate to discharge reserve carbide into said main hopper.



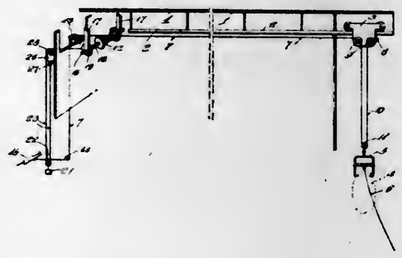
1,902,758. FLUSH-TANK LEVER. WILLIAM B. CAMPBELL, Nashville, Tenn. Filed Mar. 2, 1931. Serial No. 519,670. 3 Claims. (Cl. 4—67.)

1. The combination of a lever, a cam having a projection formation, said cam reversibly connected with the lever, a handle having a stem, said stem having means

thereon in position to engage and traverse the edges of the cam, the cam and said means having edges in position to meet and pass when the lever is actuated to prevent hanging, the projection formation on the cam acting as a stop, when the cam is properly set to limit the turn of the handle in either direction, when used as a double-acting lever.

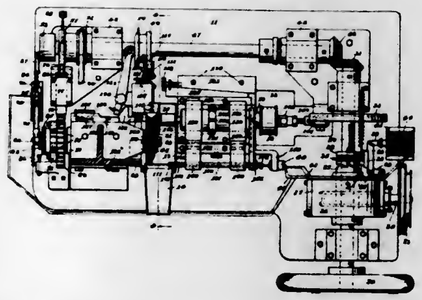
1,902,759. BRAKE BAND SIGNALING DEVICE. ALFRED S. CATAUDELLA, Bridgeport, Conn. Filed Feb. 5, 1931. Serial No. 513,509. 4 Claims. (Cl. 177—311.)

1. In an automobile brake of the class described, the combination with a circular brake drum, a circular brake shoe, a flat circular lining intermediate of the drum and shoe, a metal strip positioned between the shoe and lining, an insulating covering enclosing the strip, a circuit wire connected to the strip and ground, and a battery and signal connected in circuit.



1,902,760. SPECIAL PACKAGE. CHARLES C. CHASE, St. Joseph, Mo., assignor to Chase Candy Company, St. Joseph, Mo., a Corporation of Missouri. Filed June 22, 1931. Serial No. 546,119. 1 Claim. (Cl. 206—46.)

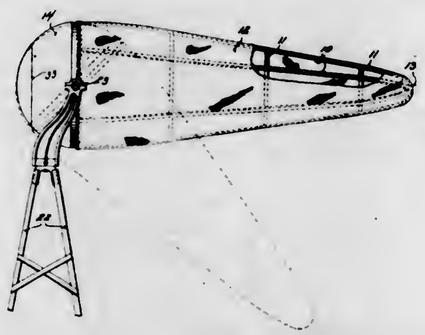
Package, comprising a flexible sheet uniformly diverted in a central portion from a planar state to form a convex chamber, a flat reinforcing element forming the bottom of said chamber, the corner portions of said flexible sheet being folded over said reinforcing element, and the secondary corners thus formed also being folded over said reinforcing element, a sealing sheet pasted over said folded portions, any one of said corners constituting a pouring trough when released from said sealing sheet.



1,902,761. HAY UNLOADING APPARATUS. HARRY C. CHRISTIANCE, Compton, Ill. Filed Dec. 31, 1930. Serial No. 505,926. 1 Claim. (Cl. 212—93.)

Unloading apparatus comprising an overhead track, a carriage movable along said track from a loading position to an unloading position, a grapple, a tow rope extending longitudinally of said track and having one end secured to the carriage and a portion extending downwardly from the carriage and trained about a pulley wheel carried by the grapple whereby movement of the grapple towards and away from the carriage may be controlled, hangers at opposite sides of said track adjacent one end thereof, a shaft rotatably supported by said hangers and extending transversely beneath the track, a drum carried by said shaft, said rope having a portion wound about the drum to cause the drum and shaft to rotate when the rope is drawn upon to move the carriage along said track and the rope extending outwardly from the drum for engagement by draft means, said drum being corrugated longitudinally to create frictional binding between the drum and rope

and cause the drum to rotate when the rope is drawn upon, and means to yieldably resist rotation of the drum and shaft in one direction consisting of a cable having one end wound upon said shaft and its intermediate portion engaged with a guide pulley, said cable extending downwardly from the guide pulley and then upwardly and secured to form a depending loop, and a weight having a suspending pulley engaged with the depending looped portion of the cable to exert pull upon the cable and resist rotation of the shaft and drum in one direction.



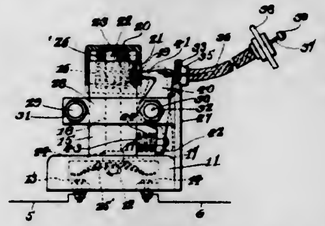
1,902,762. RIVET DRILLING MACHINE. BARTHOLOMEW J. CONLON, Bridgeport, Conn., assignor to The Conlon Manufacturing Company, Bridgeport, Conn., a Corporation of Connecticut. Filed Mar. 18, 1931. Serial No. 523,507. 5 Claims. (Cl. 77—5.)

1. In a rivet drilling machine of the class described, the combination of a rotatable carrier having a series of pockets in its peripheral edge portion, means for imparting step-by-step rotary movement to said carrier, comprising a rotatable spindle upon which the carrier is mounted, a stop wheel mounted upon the spindle, means for engagement with the wheel to lock it and the carrier in properly indexed positions, a pawl and ratchet wheel mounted on the spindle, means for adjusting the ratchet wheel upon the spindle, a solenoid, an eccentric and yieldable link connected for operating the pawl and ratchet, said link connection including contacting means, means whereby incomplete indexing operations of the carrier and the locking device will operate the solenoid to stop the machine.

CARNEGIE LIBRARY OF ATLANTA

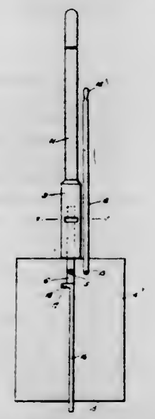
1,902,763. WIND INDICATOR FOR AIRPLANE LANDING FIELDS. FRANK M. CHAPIEWSKI, Milwaukee, Wis. Filed Aug. 13, 1928. Serial No. 299,280. 9 Claims. (Cl. 73—55.)

1. In a wind indicator the combination of a hollow elongated body portion having translucent walls, a support therefor, a pivotal connection between said support and said body portion permitting the same to swing with the wind about a substantially vertical axis to thereby indicate the direction of the wind, and a rockable connection between said support and said body portion permitting the same to rock about a substantially horizontal axis in accordance with the changes in wind velocity to thereby indicate the velocity of the wind, and means for illuminating the interior of said body portion to render the same visible at night.



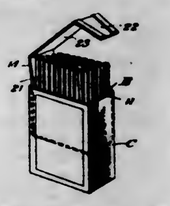
1,902,764. MAIL BAG. JULIUS L. DE GIVE, Atlanta, Ga.; Henry L. de Give executor of said Julius L. de Give, deceased. Filed Nov. 8, 1929. Serial No. 405,756. 2 Claims. (Cl. 150—13.)

1. The combination with a mail bag, of flexible cable members extending around the bag near the top and bottom ends thereof, spaced eyelets disposed around the bag adjacent the opposite ends of the bag and through which the cable is threaded, and buoyant element carried by each cable and disposed between the confronting portions of each of the eyelets.



1,902,765. SAFETY CUT-OUT SWITCH. CARL E. DEITSCH, Marion, Ohio. Filed Dec. 13, 1929. Serial No. 413,895. 3 Claims. (Cl. 200—169.)

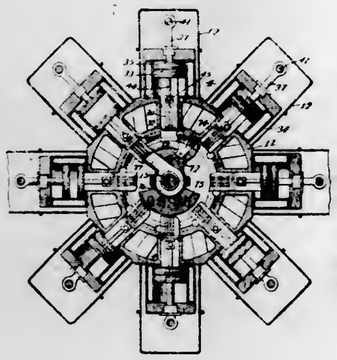
1. In a latching device for a safety cut-out switch of that type including a base, a notched stationary member carried by the base and a spring controlled apertured movable member having its aperture adapted to register with the notch in the former, the combination of an upstanding support arranged in opposed spaced relation to said members, adapted to be secured at its lower end to said base and having an opening near its top, a bracket extended from the support at right angles to the latter to oppose and extend across one side of said stationary member, means carried by the bracket for securing it to said



stationary member, a spring controlled vertically movable dog pivotally supported intermediate its ends from said bracket between said support and said members and having a nose at its upper end for extension into the registering notch and aperture for normally latching said movable member to said stationary member, and a pull element extending through said opening and attached to said dog.

1,902,766. SCRAPING AND CLEANING IMPLEMENT. EDGAR DE NIO, Woodford, N. Y. Filed Sept. 11, 1930, Serial No. 481,244. Renewed Sept. 1, 1932. 2 Claims. (Cl. 15—236.)

1. Means for cleaning the blade of a scraper implement comprising an arm pivotally connected to the upper part of the blade whereby said arm can be swung across the blade to clean one face thereof.

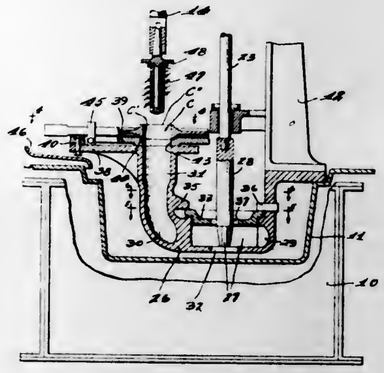


1,902,767. MATCH BOX. ISADORE H. DUBE, Cincinnati, Ohio. Filed Apr. 23, 1932. Serial No. 607,196. 2 Claims. (Cl. 206—3.)

1. A match box comprising a shell, a slide member fitted within the shell and having a bridging tongue for

a group of matches when contained in the slide member, said tongue being provided with a weakened line between it and the slide member, said tongue further having fold lines for disposing the same in bridging relation to the matches and adapted to open and close relative thereto, and extensions folded from the tongue onto the same exteriorly thereof to reinforce said tongue.

1,902,768. ROTARY INTERNAL COMBUSTION ENGINE. EDWARD C. DUER, Los Angeles, Calif., assignor of one-half to John Harrah, Los Angeles, Calif. Filed May 30, 1930. Serial No. 457,551. 14 Claims. (Cl. 123—14.)



1. In a rotary internal combustion engine, a housing provided on its inner surface with a circumferential channel, a crank shaft journaled in and passing through said housing, a rotor secured to said crank shaft, a head on said rotor, which head is positioned in the channel in said housing, said rotor being provided with a channel to the rear of said head that registers with the channel in the housing, a series of reciprocating abutments radially disposed about the housing, the inner ends of which abutments are adapted to enter the channel in the rotor, pins projecting laterally from said abutments, radially disposed arms having their inner ends mounted on cranks of said crank shaft, radially movable axes to which the outer ends of said arms are pivotally connected, blocks mounted on said arms and adapted during the swinging reciprocating movements of the arms to engage beneath the pins of said abutments and to move the same radially outward and retractile springs connected to said abutments for moving the same inwardly after said pins ride off said blocks.

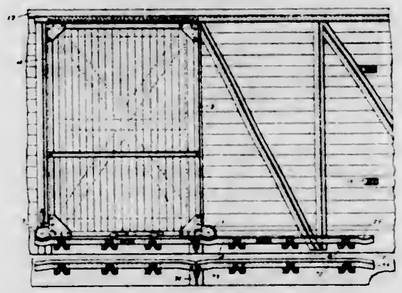
1,902,769. STORE FIXTURE DISPLAY MOLDING. JOHN H. ESDORN, New Rochelle, N. Y. Filed Feb. 18, 1932. Serial No. 593,921. 3 Claims. (Cl. 40—16.)

1. A molding formed of a relatively long narrow strip of material, said strip having marginal beads at its opposite longitudinal edges, and an outwardly projecting portion arranged centrally between the beads, the beads having each an angular notch undercut therein, said outwardly extending portion having an inwardly projecting groove formed in the exposed face thereof, a pair of diverging surfaces extending from the opposite edges of the groove to form each one of the sides of the angular notch in the respective bead.

1,902,770. METHOD AND APPARATUS FOR TINNING CONNECTING ROD BEARINGS. WILLIAM J. FIEGEL, Detroit, Mich., assignor to Bohn Aluminum & Brass Corporation, Detroit, Mich., a Corporation of Michigan. Filed Sept. 16, 1929. Serial No. 393,092. 9 Claims. (Cl. 91—70.2.)

1. In the method of tinning the bearing surfaces of heat treated connecting rods and the like, that step which consists in locally heating the surface to be tinned by continuously flowing a column of tinning metal in contact with the said surface, and excluding air from contact with said surface by contact therewith of said column of tinning metal whereby said surface is tinned without oxidization.

1,902,771. PRACTICE CARTRIDGE. ALONZO F. GAIDOS, Redwood City, Calif. Filed Dec. 22, 1930. Serial No. 503,957. 2 Claims. (Cl. 102—14.)

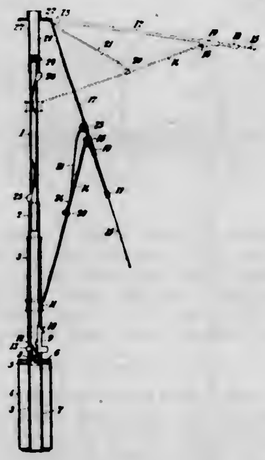


2. A reloadable practice shell comprising two longitudinal shell sections demountably secured to each other, an end of one section having a recess in its free end to receive a projectile therein, and having a passage from said recess to the other end of said section to contain a cartridge behind the projectile, the passage being of smaller diameter than the projectile, the firing end of the section being recessed and apertured, an auxiliary firing pin in said second section in operative position relative to the usual firing mechanism of a firearm, and a rim firing element on the end of said pin adjacent the rim of the cartridge.

1,902,772. RAILWAY CAR DOOR FIXTURE. GARTH G. GILPIN, Riverside, Ill., assignor to Railway Metal Products Company, Chicago, Ill., a Corporation of Delaware. Original application filed Mar. 27, 1930, Serial No. 439,398. Divided and this application filed Jan. 25, 1932. Serial No. 588,684. 4 Claims. (Cl. 16—96.)

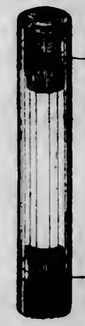
1. In a railway car, a track having a tread arranged to engage rollers supporting a door and a member on the door positioned over the track but out of engagement

therewith, said tread having interrupted portions of sufficient depth to allow the door to move downwardly, when the rollers are moved to a position over said interrupted



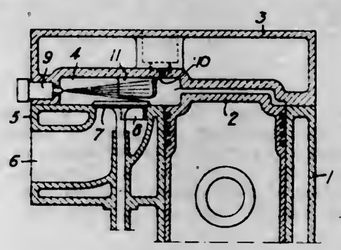
portions of the tread, until said member engages said track and supports the entire weight of the door upon the track independently of the rollers.

1,902,773. METHOD OF PROTECTING GRANULES OF HYGROSCOPIC SUGARS AND ARTICLE PRODUCED THEREBY. WILLIAM J. HALE, Midland, Mich. Filed Mar. 25, 1930. Serial No. 438,911. 13 Claims. (Cl. 127—63)



1. The process of protecting a hygroscopic carbohydrate from atmospheric moisture which comprises spraying the surfaces of the granules of the carbohydrate with a non-hygroscopic water-soluble carbohydrate to produce a continuous and completely enclosing film thereof, and increasing the thickness of such non-hygroscopic film by crystalline deposition thereon from a solution saturated with respect to the non-hygroscopic carbohydrate being deposited.

1,902,774. TELESCOPIC UMBRELLA. HANS HAUPT, Berlin-Wilmersdorf, Germany. Filed Apr. 18, 1931, Serial No. 531,172, and in Germany Apr. 25, 1930. 2 Claims. (Cl. 135—27.)



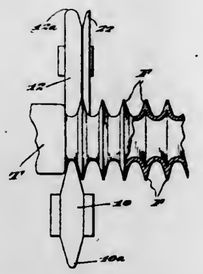
1. In an umbrella having a telescopically adjustable rib pivoted to a crown and a stretcher pivoted to the outer rib section, an auxiliary strut pivoted at one end to the stretcher and slidable at the other end on the inner rib section independently of the outer one.

1,902,775. PROCESS OF RENDERING NONPOISONOUS THE TOBACCO FUMES DURING SMOKING. KARL HERRMANN, Vienna, Austria, assignor, by mesne assignments, to Bonicot Corporation of America. Filed June 17, 1930, Serial No. 461,827, and in Austria Feb. 15, 1930. 2 Claims. (Cl. 131—52.)

1. Process of rendering nonpoisonous the tobacco smoke during smoking which consists in injecting a liquid into the cigar or cigarette at its forward end, and injecting a solution containing a ferric salt into the cigar or cigarette at its rear end.

1,902,776. INTERNAL COMBUSTION ENGINE. KNUT JONAS ELIAS HESSELMAN, Saltsjo-Storangen, Sweden. Filed Dec. 16, 1927, Serial No. 240,554, and in Sweden Dec. 31, 1926. Renewed Sept. 30, 1930. 9 Claims. (Cl. 123—32.)

1. In an internal combustion engine having a cylinder chamber substantially of the shape of a body of revolution, a drum shaped combustion chamber situated at the side of the cylinder, means to introduce atmospheric air directly into said combustion chamber so as to cause said air to perform a rotating motion therewithin, there being an opening affording communication between said combustion chamber and the cylinder chamber at the inner end thereof, the center line of said opening being radial with respect to both of said chambers in order to allow said rotating motion to transmit from the combustion chamber to the cylinder chamber, and vice versa.



1,902,777. PROCESS FOR WEIGHTING OF NATURAL AND ARTIFICIAL SILK FIBERS. HARRY HERTZ, Paterson, N. J. Filed Apr. 22, 1932. Serial No. 607,006. 17 Claims. (Cl. 8—13.)

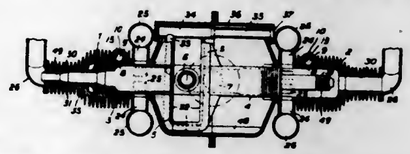
1. The process of weighting natural and artificial silk fiber which comprises treating said fiber in separate baths with tin-weighting agents and fixing baths, subsequently treating the fiber with aqueous solution containing sodium acetate with isopropylated beta naphthaline di-sulphonic acid, and with di-chloride of lead in the presence of at least one material selected from the group consisting of phosphoric acid, di-sodium phosphate and tri-sodium phosphate, and finally treating said fiber in a bath of aqueous carbonate of ammonia.

1,902,778. PROCESS FOR WEIGHTING OF NATURAL AND ARTIFICIAL SILK FIBERS. HARRY HINTZE, Paterson, N. J. Filed May 13, 1932. Serial No. 611,244. 10 Claims. (Cl. 8—13.)

1. The process of weighting natural and artificial silk fiber which comprises treating said fiber in separate baths with tin-weighting and fixing agents, treating said fiber in a bath containing di-chloride of lead, and subsequently treating said fiber in a fixing bath.

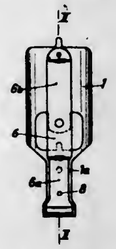
1,902,779. METHOD OF MAKING RADIATOR ELEMENTS. FRANK K. HOFFMAN, Dunkirk, N. Y. Filed Apr. 19, 1930. Serial No. 445,738. 1 Claim. (Cl 29—157.3.)

The method of spinning tubes to produce tubular finned elements which comprises rotating said tube, and feeding spinning elements into operating engagement therewith with operative portions of said elements adapted to engage the metal of the tube in a relatively narrower area at one side thereof and in a wider area producing the finished contour of the tubular finned element at another side thereof.



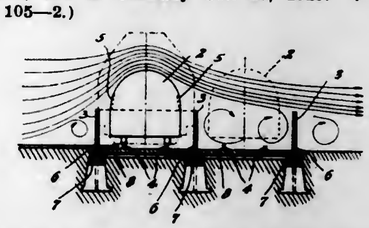
1,902,780. KNITTED LINING FOR RUBBER FOOTWEAR AND METHOD OF MAKING SAME. ROGER M. HOLDEN and JOHN F. ROBERTS, Worcester, Mass., assignors to Holden Knitting Co., Worcester, Mass., a Corporation of Massachusetts. Filed Apr. 11, 1930. Serial No. 443,358. 4 Claims. (Cl. 66—170.)

1. The improvement in the manufacture of a lining for a formed rubber article which consists in knitting a length of tube with one portion in rib stitch, another portion partially in rib and partially in tuck stitch and a third portion in tuck stitch, the mixed rib and tuck stitched portion lying between the other portions to impart an arcuate form to the lining.



1,902,781. INTERNAL COMBUSTION ENGINE. CECIL ISLE, London, England. Filed May 18, 1929, Serial No. 364,241, and in Germany May 18, 1928. 11 Claims. (Cl. 123—56.)

7. In an internal combustion engine comprising a cylinder, having inlet and exhaust ports, a tubular extension formed with said cylinder, means for supplying air under pressure to said tubular extension, a hollow working piston movable in said cylinder adapted to communicate with said tubular extension whereby air may be continuously supplied within the hollow working piston, a

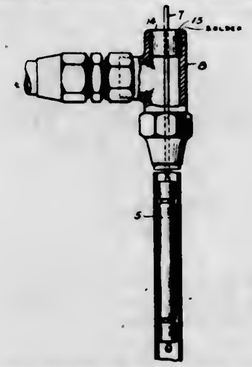


crosshead for driving the crankshaft of the combustion engine, and said crosshead having slots formed therein for the escape of air flowing through said hollow piston.

1,902,782. WRITING, DRAWING, OR RULING PEN. THEODOR KOVACS, Berlin-Schoneberg, Germany. Filed Mar. 16, 1932, Serial No. 599,259, and in Germany Mar. 18, 1931. 8 Claims. (Cl. 120—114.)

1. A pen for attachment to a pen holder comprising a pen-shaped element of spring metal and formed with a reduced writing portion, a spring metal member pivoted to said element and having its pivoting axis normal to the top face of said element, said member having a portion adapted to normally overlie the reduced writing portion.

1,902,783. SIDE WIND PROTECTION FOR RAILWAY SYSTEMS. FRANZ KRUCKENBERG and CURT STEDEFELD, Hanover, Germany. Filed Sept. 4, 1930, Serial No. 479,762, and in Germany Oct. 25, 1929. 7 Claims. (Cl. 105—2.)

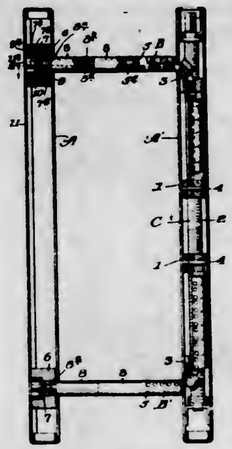


1. In a railway the combination of a track, imperforate wind protection walls parallel with said track in the outer boundaries of the loading gauge, and a car having portion projecting above said walls said portion being rounded off, the upper edges of said walls being substantially level with the lower edges of the car windows.

1,902,784. REFRIGERATION SYSTEM. LESTER U. LARKIN, Atlanta, Ga., assignor to Larkin Refrigerating Corporation, Atlanta, Ga., a Corporation of Georgia. Filed Oct. 9, 1930. Serial No. 487,542. 1 Claim. (Cl. 62—8.)

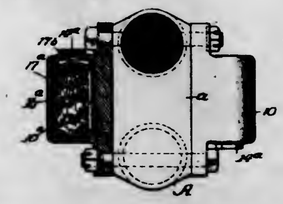
In combination, pipe fitting adapted to be intercalated in the conduit on the low side of a refrigeration system for the purpose of introducing a thermostat directly into the stream of effluent refrigerant in said system, comprising a T having a through-bore and a branch nipple,

one end of said through-bore being counter-bored, and a thermostatic element comprising a bulb and a tube connected thereto, said tube passing axially within said



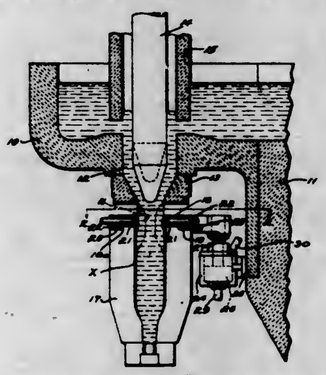
through-bore, and means secured to said tube and adapted to be secured in sealing relation in the counter-bored end of said T.

1,902,785. CRYSTALLINE ANTIRACHITICALLY ACTIVE PRODUCT AND A PROCESS OF PREPARING THE SAME. OTTO LINSERT, Wuppertal-Elberfeld, Germany, assignor to Winthrop Chemical Company, Inc., New York, N. Y., a Corporation of New York. Filed July 26, 1932, Serial No. 624,899, and in Germany Sept. 18, 1931. 4 Claims. (Cl. 167—81.)



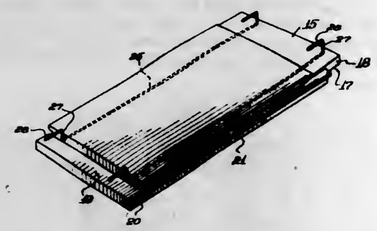
1. The process which comprises freeing an antirachitically active product, prepared by irradiating ergosterol with the unfiltered light of a magnesium spark from the unchanged ergosterol contained therein, subjecting the product obtained to the action of at least one mol of citraconic acid anhydride over a period of several days at room temperature in the presence of an organic solvent which is inert to the reacting components, saponifying the reaction mixture by the addition of a caustic alkali, then diluting the mixture with water, extracting the mixture obtained with an organic solvent, evaporating the solvent and transforming the remainder into crystals by fractional recrystallization from an organic solvent.

1,902,786. LOOSE-LEAF BINDER. LESTER T. LLOYD, Chicago, Ill., assignor to W. G. Lloyd Company, Chicago, Ill., a Corporation of Illinois. Filed June 17, 1929. Serial No. 371,594. 7 Claims. (Cl. 129—41.)



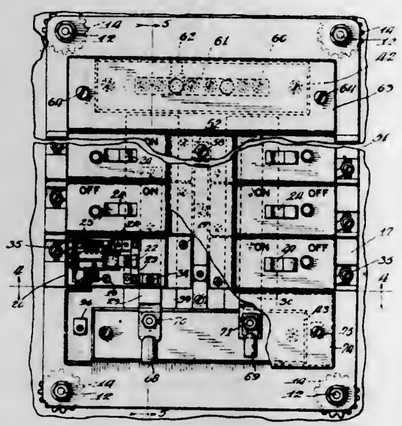
3. In a binder, a hollow clamping-member having bearings therein and having its outer wall provided with perforations registering with said bearings, and rotary connectors journalled and confined in said bearings having actuating stems presented to said perforations.

1,902,787. DAMPING DEVICE FOR CRANK-SHAFTS. FREDERICK S. DUESENBERG, Indianapolis, Ind., assignor to Duesenberg, Inc., Indianapolis, Ind., a Corporation of Delaware. Filed Jan. 28, 1929. Serial No. 335,405. 6 Claims. (Cl. 74—6.)



1. The combination with the crank-shaft of a high speed multi-cylinder engine, of a damping device comprising a casing rotatable with the shaft and having a chamber therein, and a removable liquid-filled container in the chamber.

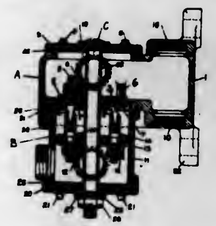
1,902,788. GLASS FEEDING APPARATUS AND METHOD. KARL E. PEILER, West Hartford, Conn., assignor to Hartford-Empire Company, Hartford, Conn., a Corporation of Delaware. Filed May 2, 1928. Serial No. 274,389. 5 Claims. (Cl. 49—55.)



5. The method of feeding molten glass from a downwardly opening outlet to a charge receiver below and spaced from the outlet, comprising the steps of discharging glass downwardly from the outlet in a column having an area in cross section not substantially less than the cross-sectional area of the major portion of the cavity of the charge receiver, guiding the lower end of said column into the cavity of said charge receiver centrally of the latter and providing a seal between the glass column and the upper end of the charge receiver, augmenting the column of glass by discharge of glass from said outlet at a rate so related to the rate of downward movement of the lower end of said column in the cavity of said charge receiver as to prevent substantial attenuation of any portion of said column before the lower end thereof reaches the lower end of the cavity of the charge receiver, applying sub-atmospheric pressure to the cavity of the charge receiver around the glass at the upper end of the latter to aid in effecting contact of the lateral surface of the glass in the charge receiver with the side walls of said cavity, breaking the seal between the glass column and the upper end of the charge receiver and attenuating the glass column at the upper end of said charge receiver, and severing the attenuated glass at a plane close to that of the upper end of said charge receiver.

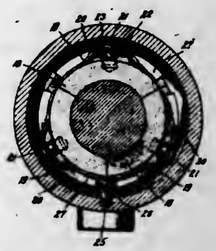
1,902,789. PRECAST CEILING CONSTRUCTION. HERBERT W. REEL, Hinsdale, Ill., assignor to United States Gypsum Company, Chicago, Ill., a Corporation of Illinois. Filed June 17, 1930. Serial No. 461,738. 3 Claims. (Cl. 72—68.)

2. A ceiling tile comprising a rectangular slab of cementitious material having a reinforcing mat embedded therein, tongues and grooves formed on the four edges of said slab adapted to interlock with the tongues and grooves of other adjacent slabs to form a ceiling, said slab being provided with core holes, and attaching hook rods removably extending into said core holes and adapted to attach said slabs to lower flanges of floor beams.



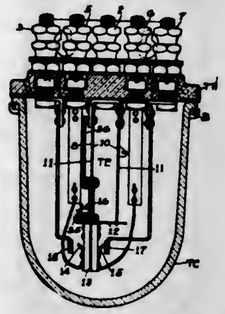
1,902,790. PANEL-BOARD AND PANEL-BOARD CONSTRUCTION. HENRY F. STARRETT, Chicago, Ill. Filed Mar. 25, 1929. Serial No. 349,622. 16 Claims. (Cl. 247—10.)

1. A panel-board comprising, in combination, a panel-box enclosure, a metallic panel-board mounting plate positioned in said box, insulated branch switch mounting bases secured thereto, a strip of insulating material positioned on said plate, a stepped longitudinal channel formed by the assembled switch mounting bases, the wider stepped channel serving to laterally position said insulating strip, and a panel-board bus-bar, said bus-bar being positioned in the narrower stepped channel.



1,902,791. ELECTRICAL PLUG COUPLER. HERBERT B. TAYLOR, Rochester, N. Y., assignor to General Railway Signal Company, Rochester, N. Y. Filed Oct. 15, 1926. Serial No. 141,864. 1 Claim. (Cl. 173—328.)

A quick-detachable connector for electric circuits, comprising, a two part casing, means for insuring its proper assembly, a female portion in the casing including, two opposed flat spring clips, spaced apart and having inturned free ends facing each other to form a narrow slot therebetween, a fixed port spaced from, and in line with, said narrow slot, a sleeve slidably carried on said post with a flat face, and a spring biasing said sleeve to press said face against the ends of said spring clips, and a

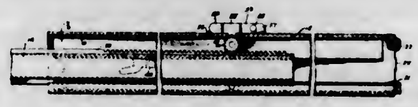


male portion in the casing including a flat sided wedge tapering toward its free end and adapted to enter between, and spread, said clips.

1,902,792. PACKING. DONALD F. WARNER, Lynn, Mass., assignor to General Electric Company, a Corporation of New York. Filed Mar. 23, 1932. Serial No. 600,741. 1 Claim. (Cl. 286—24.)

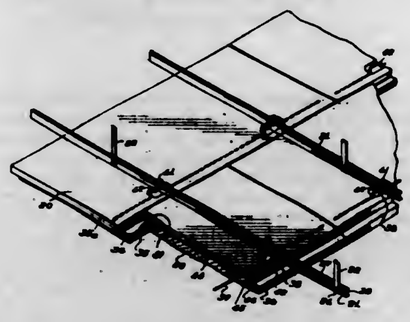
In a packing arrangement, a casing having walls defining a cell, a rotary member projecting through the casing, a packing ring in the cell comprising a plurality of segments surrounding the rotary member, each segment having a portion with an outer surface inclined towards the shaft, a saddle member having a twisted portion engaging the inclined surface of the segment, and a leaf spring fastened to the saddle member and having portions engaging the inner surface of the casing.

1,902,793. THERMAL RELAY. JOSEPH E. WILLING, Rochester, N. Y., assignor to General Railway Signal Company, Rochester, N. Y. Filed June 26, 1930. Serial No. 463,903. 6 Claims. (Cl. 200—122.)



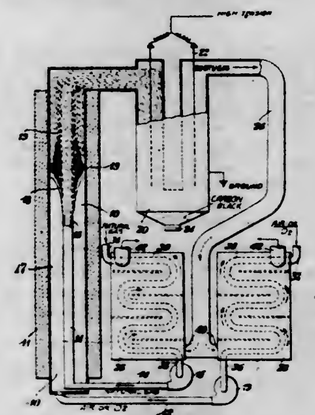
1. In a thermal relay, in combination, fixed front and back points, and a thermal element positioned to move between and said points and including, spaced, bi-metallic arms, a heating coil on but one of said arms, and rheostat for regulating flow of current through the heating coil.

1,902,794. HEAT INSULATING COVERING. GRANT V. WILSON, Chicago, Ill., assignor to Norristown Magnesia & Asbestos Company, Norristown, Pa., a Corporation of Pennsylvania. Filed May 18, 1932. Serial No. 611,987. 10 Claims. (Cl. 154—28.)



2. In a laminated heat insulating covering, for a cylindrical body; the combination with a plurality of double webs, each including a plane web and a corrugated web cemented together at the crests of the corrugations; said laminations being of the relatively different circumferential extent of respective concentric circles in radially spaced relation, and for coaxial relation with the body to be covered; of means reinforcing the ends of said laminations, and holding said ends even, including cement between said laminations.

1,902,795. DRAWER SUSPENSION. CARL F. WOLTERS, Marietta, Ohio, assignor to Remington Rand Inc., Buffalo, N. Y. Filed Aug. 30, 1930. Serial No. 478,941. 11 Claims. (Cl. 45—77.)



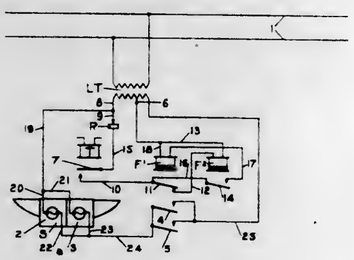
10. In combination with a cabinet having a longitudinally movable drawer therein, a drawer support comprising a pair of cabinet slides mounted within the cabinet in parallel spaced relation, an intermediate slide slidably mounted on each cabinet slide, a drawer slide slidably mounted on each intermediate slide, said drawer secured to the drawer slides, said cabinet slides and drawer slides having rack portions, a pinion mounted on each intermediate slide in meshing engagement with adjacent rack portions of the drawer and cabinet slides, and means cooperating with said slides for positioning said intermediate slides in transverse aligned relation.

1,902,796. CEILING CONSTRUCTION. CHARLES R. BIRDSEY, Oak Park, and HERBERT W. REEL, Hinsdale, Ill., assignors to United States Gypsum Company, Chicago, Ill., a Corporation of Illinois. Filed Dec. 12, 1930. Serial No. 501,834. 8 Claims. (Cl. 72—68.)

3. In a ceiling construction, the combination with a plurality of support bars in spaced parallel relation, of a plurality of precast ceiling slabs arranged in a plane below said bars, an outstanding tongue formed along each diagonal edge of the tile forming upper and lower tongues, the upper tongue on one edge of each slab being supported solely on the lower tongue of the adjoining tile, said slab having a recess formed in its upper surface adjacent said lower tongue, a hook bar embedded in said slab and extending into said recess, attaching means engaging said hook bar within said recess and also engaging said support bar, and a reinforcing mat embedded in said slab and extending into said tongue.

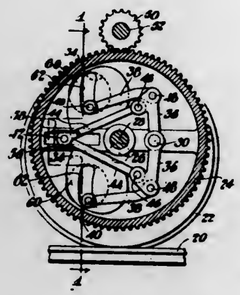
1,902,797. CARBON BLACK PROCESS AND APPARATUS. STEPHEN P. BURKE, New York, N. Y., assignor to General Atlas Chemical Company, Dover, Del., a Corporation of Delaware. Filed Sept. 10, 1927. Serial No. 218,755. 22 Claims. (Cl. 134—60.)

1. A method of making carbon black including diffusing a gaseous or vaporous hydrocarbon into a stream of highly heated gas while they are flowing along a predetermined path within an enclosed unobstructed space, decomposing said hydrocarbon in said stream by heat with the production of carbon black while maintaining nonturbulent stream line flow of the gas within the zone of decomposition of said hydrocarbon.



9. Apparatus for making carbon black comprising a furnace having insulated walls forming an elongated combustion chamber, a gas duct within the chamber having walls parallel to those of the latter, an air duct concentric with the said gas duct and having its walls forming a continuation of the chamber walls, and means for independently controlling the rate of fluid flow respectively through the gas duct and the air duct.

1,902,798. PAPER MAKING APPARATUS. WILLIAM H. CAPE, Cumberland Mills, Me., assignor to S. D. Warren Company, Boston, Mass., a Corporation of Massachusetts. Filed Apr. 28, 1931. Serial No. 533,377. 15 Claims. (Cl. 92—44.)

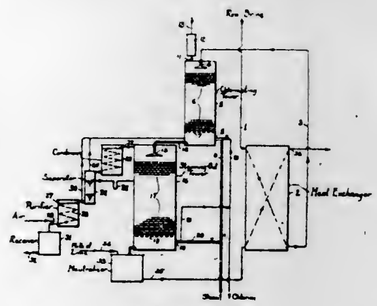


1. In an appratus for forming a travelling web of paper stock comprising a travelling surface and an extensible slice bar comprising sections movable longitudinally relative to each other and disposed transversely across the travelling surface, the combination of means disposed along adjacent sides of said sections and independently adjustable relative to the travelling surface at points spaced along the slice bar for maintaining the forming web of a substantially uniform thickness transversely thereof.

1,902,799. FLASHING LIGHT SIGNAL. SALISBURY M. DAY, Rochester, N. Y., assignor to General Railway Signal Company, Rochester, N. Y. Filed Sept. 1, 1926. Serial No. 132,998. 5 Claims. (Cl. 177—329.)

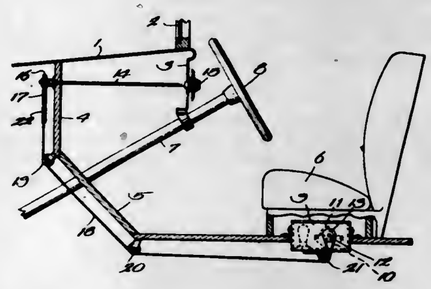
1. In an automatic railway crossing signal system, an alternating current source of energy, a flashing light signal unit, a lighting circuit for the light unit fed from the alternating current source, direct current interconnected relays constituting automatic make and break control means for the lighting circuit, and an energized circuit for the control means including the alternating current source and a rectifier in series.

1,902,800. FLEXIBLE TRANSMISSION. PHILIP C. GORDON, New York, N. Y., assignor to Doherty Research Company, New York, N. Y., a Corporation of Delaware. Filed July 27, 1928. Serial No. 295,702. 14 Claims. (Cl. 64—97.)



1. A flexible transmission comprising a driving pin, a pair of arms pivoted on said pin, a pair of driven pins, links pivoted to said driven pins and to said arms, a second pair of links pivoted to a common axis and to said pairs of links and arms, and means supporting said common axis and permitting it to move toward and away from said driving pin.

1,902,801. CONTINUOUS PROCESS OF PREPARING LIQUID BROMINE. IVAN F. HARLOW, IVAN A. KENAGA, and GRAYTON F. DRESSEL, Midland, Mich., assignors to The Dow Chemical Company, Midland, Mich., a Corporation of Michigan. Filed Apr. 3, 1930. Serial No. 441,210. 12 Claims. (Cl. 23—218.)

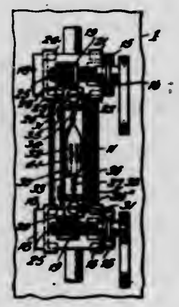


1. The process of extracting bromine from bromide-containing solutions which comprises treating such solution with an air-chlorine mixture at a temperature materially below the boiling point thereof whereat the liberated bromine remains substantially dissolved, steaming the treated solution in a separate stage to expel bromine as vapor therefrom, condensing the vapors and separating liquid bromine from the aqueous distillate.

10. The continuous process of producing liquid bromine of high purity from aqueous solutions containing a bromide in relatively small amount which comprises preheating such solution to a temperature between about 70° and 90° C., treating the preheated solution with chlorine in amount slightly in excess of that theoretically required to oxidize reduced compounds and liberate all of the bromine, separating residual undissolved gases, steaming the treated solution to expel bromine as vapor therefrom while adding thereto a further amount of chlorine sufficient to liberate

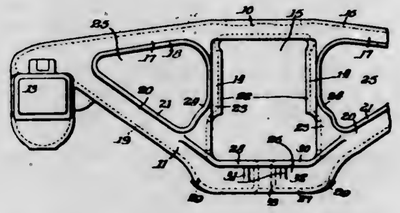
any recombined bromine therein, refluxing the vapors at a temperature between 80° and 90° C., condensing the residual vapors, separating liquid bromine from the aqueous distillate, returning the latter to the steaming-out step, purifying the liquid bromine by flowing the same in contact with a current of air, returning the exit gases from the purification step to the chlorinating step, and employing the hot debrominated solution from the steaming-out step for preheating the original solution in the first step.

1,902,802. AUTOMOTIVE VEHICLE WITH RADIO EQUIPMENT. JOHN W. HOBBS, Rockford, Ill., assignor to Mechanics Universal Joint Company, Rockford, Ill., a Corporation of Illinois. Filed Jan. 29, 1930. Serial No. 424,435. 2 Claims. (Cl. 250—14.)



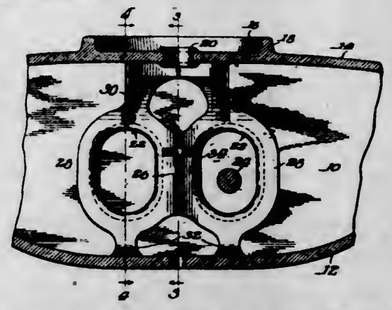
1. The combination with an automotive vehicle having a dashboard and an instrument board at the rear of the dashboard; of a radio receiving set carried by the vehicle and which is inclusive of a tuning member that is mounted to turn; a motion transmitting shaft mounted in the dashboard and instrument board and extending forwardly beyond the dashboard and accessible for operation at the instrument board; a driving pulley upon the forward end of said shaft; a driving pulley coupled with the tuning member of the radio receiving set; and a bolt passing beneath the floor of the automotive vehicle and over said pulleys, said belt being inclusive of two springs one in each of its stretches and serving to maintain said belt stretches taut whereby movement of the aforesaid shaft is accurately communicated to the tuning member of the radio set.

1,902,803. PLASTIC COMPOSITION. HARRY HOPKINSON and JOHN GUY BRITTON, Lansdowne, Pa., assignors of one-third to Tudor R. Williams, Scranton, Pa. Filed May 2, 1931. Serial No. 534,699. 13 Claims. (Cl. 91—63.)



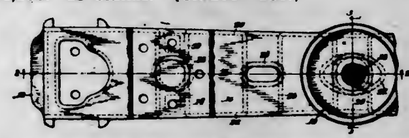
1. A method of forming a substantially fireproof plastic composition which is principally porous cellulosic material which is normally inflammable; which consists in impregnating such cellulosic material with a dilute solution of a metallic phosphate containing excess or free acid, and forming an insoluble salt in said material by neutralising said excess or free acid with an alkaline substance.

1,902,804. FUSE CLIP LOCK. FRANK C. LA MAR, New York, N. Y., assignor to Great Western Fuse Company, New York, N. Y., a Corporation of Delaware. Filed Mar. 8, 1932. Serial No. 596,452. 5 Claims. (Cl. 200—134.)



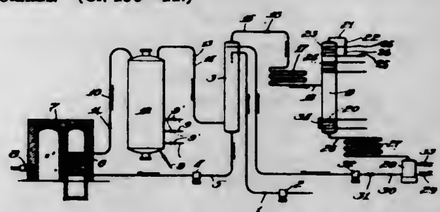
1. In a combined clip lock and fuse integrity indicator, in combination: two separated pairs of locking fingers adapted to contact with and press together the free ends of the legs of two separate substantially U-shaped fuse clips; means for causing the locking fingers to approach and/or recede one from the other and means associated with said last named means for indicating the integrity of a fuse in the clips.

1,902,805. TRUCK SIDE FRAME. HARRY C. DREIBUSS and GEORGE S. CHILES, St. Louis, Mo., assignors to Scullin Steel Company, St. Louis, Mo., a Corporation of Delaware. Filed Nov. 12, 1929. Serial No. 406,678. 9 Claims. (Cl. 105—205.)



1. In a side frame, a box-shaped spring seat section and tubular strengthening means between the webs of the spring seat section.

1,902,806. TRUCK BOLSTER. HARRY C. DREIBUSS and GEORGE S. CHILES, St. Louis, Mo., assignors to Scullin Steel Co., St. Louis, Mo., a Corporation of Delaware. Filed Oct. 9, 1930. Serial No. 487,488. 15 Claims. (Cl. 105—230.)



1. A box type bolster having a wall with an opening therethrough, the portion of said wall adjacent said opening being thicker than the remote portion of said wall and a reentrant flange surrounding said opening.

1,902,807. REENFORCED TRUCK BOLSTER. HARRY C. DREIBUSS and GEORGE S. CHILES, St. Louis, Mo., assignors to Scullin Steel Co., St. Louis, Mo., a Corporation of Delaware. Filed Apr. 14, 1930. Serial No. 444,180. 15 Claims. (Cl. 105—230.)

1. A truck bolster including a compressional member, a tensional member, and a reenforcing member integral therewith comprising a portion of a tube with the remainder of the tube cut away,

1,902,808. CONVERSION OF HYDROCARBONS. EDWIN F. NELSON, Chicago, Ill., assignor to Universal Oil Products Company, Chicago, Ill., a Corporation of South Dakota. Filed June 28, 1929. Serial No. 374,471. 2 Claims. (Cl. 196—11.)

2. In hydrocarbon oil pressure cracking processes wherein the cracked vapors and gases are cooled under superatmospheric pressure to condense the vapors, the improvement which comprises introducing the condenser distillate and gas to a stabilising zone maintained under the superatmospheric pressure of the cracking process, separating the gas from the distillate in said zone, removing the separated gas under pressure from the stabilising zone and reducing the pressure thereon, and passing the expanded gas in indirect heat exchange relation with the gas being separated in said zone.

Patents Nos. 1,902,809 to 1,903,276

CARNEGIE LIBRARY OF ATLANTA

THE OFFICIAL GAZETTE

OF THE

United States Patent Office

Vol. 428—No. 4 TUESDAY, MARCH 28, 1933 Price—$16 per year

The OFFICIAL GAZETTE is mailed under the direction of the Superintendent of Documents, Government Printing Office, to whom all subscriptions should be made payable and all communications respecting the Gazette should be addressed. Issued weekly. Subscriptions, $16.00 per annum, including annual index, $18.25; single numbers, 35 cents each.

PRINTED COPIES OF PATENTS are furnished by the Patent Office at 10 cents each. For the latter, address the Commissioner of Patents, Washington, D. C.

CIRCULARS OF GENERAL INFORMATION concerning PATENTS or concerning TRADE-MARKS, PRINTS, and LABELS will be sent without cost on request to the Commissioner of Patents, Washington, D. C.

Adjudicated Patents

(D. C. La.) Dodds patent, No. 1,295,853, for sample-taking device, claims 3 and 5 *Held* invalid. *Reed Roller Bit Co.* v. *Brewster Co.*, 2 F. Supp. 197.

(D. C. La.) Dodds patent, No. 1,295,134, for sample-taking device, claims 1, 2 and 3 *Held* invalid. *Id.*

(C. C. A. Ohio.) Warren patent, No. 1,502,494, for time-indicating apparatus, claims 8 and 9 *Held* invalid. *Kodel Electric & Mfg. Co.* v. *Warren Telechron Clock Co.*, 62 F.(2d) 692.

(C. C. A. Me.) Paisseau patent, No. 1,525,317, for process of preparation of pearl essence, claims 1, 2, 4 and 5 *Held* not infringed. *Joseph H. Meyer Bros.* v. *Pelspearl Products*, 62 F.(2d) 668.

(C. C. A. Mich.) Winters and Crampton patent, No. 1,648,249, for hinge, *Held* invalid. *Winters & Crompton Mfg. Co.* v. *Grand Rapids Brass Co.*, 62 F.(2d) 822.

(C. C. A. Mich.) Roedding patent, No. 1,710,321, for furniture fixture, *Held* not infringed. *Id.*

(D. C. Mass.) Watson and Culver patent, No. 1,729,654, for method of making bifocal lenses, *Held* invalid, or, if valid, not infringed. *United Kingdom Optical Co.* v. *American Optical Co.*, 2 F. Supp. 174.

(C. C. A. Me.) Paisseau patent, No. 1,760,771, for process for purifying pearl essence, claims 1 and 2 *Held* invalid. *Joseph H. Meyer Bros.* v. *Pelspearl Products*, 62 F.(2d) 668.

(D. C. N. Y.) Tanger patent, No. 1,807,852, for radiator enclosure, claims 2–6 *Held* invalid. *Universal Radiator Products Co.* v. *Craftsmen Radiator Enclosure Co.*, 2 F. Supp. 205.

(D. C. La.) Barrett and Robichaux patent, No. 1,837,424, for core taking apparatus, claims 4, 7 and 8 *Held* invalid. *Reed Roller Bit Co.* v. *Brewster Co.* 2 F. Supp. 197.

Trade-Marks Canceled

125,797. Whiskey. Jack Daniel Distilling Company, St. Louis, Mo. Registered June 17, 1919. Canceled February 28, 1933.

193,162. Certain named radio and electrical apparatus, machines, and supplies. Music Master Corporation, Philadelphia, Pa. Registered May 5, 1925. Canceled February 28, 1933.

289,573. Certain named lubricating equipment, apparatus, and machinery. Gray Company Incorporated, Minneapolis, Minn. Registered December 1, 1931. Canceled February 28, 1933.

291,942. Medical preparation. Robert G. Reaves, Knoxville, Tenn. Registered February 23, 1932. Canceled February 28, 1933.

296,433. Coal. Harlan-Wallins Coal Corporation, Verda, Ky. Registered August 9, 1932. Canceled March 9, 1933.

TRADE-MARK RULES—AMENDMENT

Order No. 3,234

U. S. Patent Office, *Washington, Feb. 11, 1933.*

Acting under the provisions of section 487 of the Revised Statutes (U. S. C. Title 35, sec. 11), and with the approval of the Secretary of Commerce, the rules of the Patent Office governing the registration of trade-marks are amended as follows:

Rule 11, add at the end thereof the following paragraphs:

Every attorney prosecuting applications for registration of trade-marks shall submit to the Commissioner of Patents for approval copies of all proposed advertising matter, circulars, letters, cards, etc., intended to solicit trade-mark business, and if it be not disapproved by him and the attorney so notified within 10 days after submission, it may be considered approved.

Any such attorney sending out or using any such matter, a copy of which has not been submitted to the Commissioner of Patents in accordance with this rule, or which has been disapproved by the Commissioner of Patents, shall be subject to suspension or exclusion from practice before the Patent Office, or any division thereof.

THOMAS E. ROBERTSON,
Commissioner.

Condition of Applications Under Examination at Close of Business March 11, 1933

DECISIONS IN PATENT AND TRADE-MARK CASES

U. S. Court of Customs and Patent Appeals

In re Reeves

No. 3,990. Decided December 27, 1932

1. Patentability—Printed Matter.

"It seems to be settled patent law that invention cannot rest alone in novel printing arrangement, although it may reside in some physical structures of printed matter."

2. Same—Same.

Claims for a valuation chart *Held* unpatentable since such an article does not fall within the scope of the patent law.

Appeal from the Patent Office. Affirmed.

Messrs. Parker & Prochnow, Mr. Charles W. Parker and *Mr. Max D. Farmer* for Reeves.

Mr. T. A. Hostetler and *Mr. Howard S. Miller* for the Commissioner of Patents.

Bland, *J.*:

Appellant appeals to this court from a decision of the Board of Appeals of the United States Patent Office, affirming that of the Examiner, who refused to allow appellant's two claims, being all of the claims in appellant's application for patent.

The nature of the alleged invention is described in appellant's brief as follows:

The claims are drawn to a valuation chart intended for use in appraising buildings. The chart carries designations representing characteristics of buildings, with check spaces adjacent each item, and the various items are grouped according to classes. Each vertical column of items includes such characteristics as may be expected in buildings of a particular class. In the use of the charts, the building to be appraised is inspected and the characteristics or construction details or items of the building are checked off on the classification chart by placing check marks opposite those items. After the items of a building have been checked off on the chart, it is readily apparent from an inspection of the chart that the particular building has a predominating number of characteristics found in a particular class or column, which indicates directly the class of buildings in which that particular building should be classified, and since the average cost of reproduction of such buildings of each particular class is known, this classification gives a starting point for determining the value of the building. The extent of check marks in the other classes or columns on those items which distinguish from the items in the particular class in which the building falls by reason of the predominating number of check marks, indicates directly the extent to which this particular building differs from the other average buildings of that class. Hence, by an inspection of the chart for any building it can be ascertained whether such distinctions in the other items checked tend to place the building in a higher or a lower class, thereby enabling the appraiser to know whether to add to or subtract from the average cost of the building of that class in which the building is placed, amounts determined by the differences which that particular building has from the average building of that class in which it falls.

Claim 2 is illustrative and reads:

2. A valuation chart for buildings comprising a record sheet having details of building constructions arranged in groups designated by classes, each class having listed thereunder the details of building construction frequently found in buildings of that class, and the details being arranged similarly in order in all the classes, whereby when the details of construction of a building to be valued are checked on the record sheet under the nearest approximated classes, the preponderance of checks in any class group will directly indicate the class of buildings to which that particular building belongs and the checks missing in that class group or found in the groups of the other classes will indicate directly the extent to which that building being valued differs from the usual run of buildings of that class.

The Examiner held that under the decisions of *Guthrie* v. *Curlett et al.*, 10 F.(2d) 725, 353 O. G. 286, and *Flint* v. *Leonard*, 27 F.(2d) 215, appellant's disclosure showed no invention within the scope of devices intended to be patented under the patent laws.

The Board of Appeals said:

We see nothing inventive in this grouping of characteristics which the applicant has adopted, and therefore deem the claims clearly unpatentable in view of the decisions relied upon by the Examiner.

The appellant relies upon the following decisions: *Cincinnati Traction Co.* v. *Pope*, 210 Fed. 443; *Benjamin Menu Card Co.* v. *Rand, McNally & Co., et al.*, 210 Fed. 285; *Rand, McNally & Co.* v. *Exchange Scrip Book Co.*, 187 Fed. 984; *Munson* v. *The Mayor, etc.*, 3 Fed. 338.

Appellant argues here that his disclosure shows invention of the same character as that which was shown by the claims sustained by the courts in the Cincinnati Traction Co. case and in the other cases relied upon by him.

The Cincinnati Traction Co. case, supra, involved a street railway transfer ticket having tabulations of information thereon and a coupon which could be detached in certain instances in order to convey certain information.

The Benjamin Menu Card Co. case, supra, held the claims of a patent valid, which patent was granted for a menu card, so arranged that use by a guest would change its form.

In the *Rand, McNally & Co.* v. *Exchange Book Co.* case, supra, the patentable subject matter consisted of a railroad ticket having a series of coupons to be detached and exchanged at ticket offices for passage tickets and having stubs with specified information thereon.

We agree with the Board of Appeals that appellant's disclosure shows nothing inventive within the meaning of the patent law. It is not a

new and useful art, machine, manufacture, or composition of matter, or any new and useful improvements thereof. *Guthrie* v. *Curlett et al.* supra, and *Flint* v. *Leonard*, supra.

It was said in *Guthrie* v. *Curlett* et al., supra, that:

* * * we believe that it discloses an art, which, if it be novel, is not the kind of art protected by the patent acts.

In discussing the holding of the court in *Cincinnati Traction Co.* v. *Pope*, supra, this court in *In re Russell*, 18 C. C. P. A. 1184, 48 F.(2d) 668, 410 O. G. 820, said:

The court, however, did not hold that the mere arrangement of the printed text constituted patentable subject matter, but, on the contrary, based its decision upon the patentable novelty of the physical structure of the tickets * * *.

See also *In re Dixon*, 18 C. C. P. A. (Patents) 711, 44 F.(2d) 881, 402 O. G. 3; *In re Clark*, 19 C. C. P. A. (Patents) 1166, 58 F.(2d) 455, 422 O. G. 608; and *In re Malcolm*, 19 C. C. P. A. (Patents) 1097, 56 F.(2d) 876, 420 O. G. 293.

It seems to be settled patent law that invention cannot rest alone in novel printing arrangement, although it may reside in some physical structures of printed matter.

The decision of the Board of Appeals is affirmed.

Affirmed.

U. S. Court of Customs and Patent Appeals

IN RE MASON

No. 3,989. Decided December 27, 1932

PATENTABILITY—COMPOSITE FIBER BOARD.

Claims for a composite fiber board *Held* unpatentable, in view of the prior art, over the claims of applicant's prior patents which, respectively, cover each of the elements which make up the composite board.

APPEAL from the Patent Office. Affirmed.

Mr. Herbert H. Dyke for Mason.

Mr. T. A. Hostetler and *Mr. Howard S. Miller* for the Commissioner of Patents.

GARRETT, *J.*:

This is an appeal from a decision of the Board of Appeals of the United States Patent Office affirming the rejection of four out of five claims in an application for patent on "hard-surfaced composite insulating board," filed February 23, 1926.

Claims numbered 8 and 12 are quoted as representative:

8. Composite fibre board comprising at least one highly dense surface portion or layer of wood or woody material which had been disintegrated into fibrous state and permanently coalesced together while wet under high heat and pressure and containing at least the principal part of the lignins and cellulose of the original wood or woody material, and an adjacent portion or layer of light porous relatively yielding fibrous heat insulating material cemented to the first named portion.

12. Composite fibre board comprising a porous layer of fibrous material obtained by disintegration of ligno-cellulose material with retention of at least the principal part of the lignin and by the drying of a wet body thereof under initial pressure only, and a protective layer non-integral therewith and composed of similar material compacted and substantially completely dried under pressure in the presence of moisture and heat to produce a hard, strong, coherent, substantially non-porous sheet of specific gravity approximately one.

The record is not entirely clear as to just what references were relied upon by the tribunals of the Patent Office. First and last, the Examiner made reference to three patents to applicant himself (Nos. 1,578,609, 1,663,504, and 1,663,505), two to Toles and one each to Carey and Lappen. Each of these was listed in the statement of the Examiner responding to the appeal to the Board; each was listed in the Board's opinion, and each appears in full in the record.

Of the Examiner's decision the Board says:

The Examiner holds that, in view of Toles, there is no invention in uniting the porous and hard finished boards of Patents Nos. 1,663,504 and 1,663,505. He also rejects the claims on the Toles patent in view of Mason No. 1,578,609, holding that the product is substantially the same although made of a different material.

The Board sustained the rejection, apparently relying, in part, upon Toles Patent No. 1,369,500, but said in conclusion:

As to the second ground of [the Examiner's] rejection we are unable to say whether the products would be substantially the same in the application and in the Toles patent and we prefer to stand on the rejection above discussed.

The opinion of the Board made no allusion to Carey beyond merely listing it with the references. The brief of the Solicitor for the Patent Office, however, includes Carey Patent No. 1,156,753 as a reference and analyzes it, and applies it alternatively with Toles.

As we interpret the claims they are meant to cover a composite board, or "hard-surfaced composite insulating material," made up of at least two parts. One of these parts is a lamina of light, porous insulating material, spoken of in argument as a "core"; the other (or others if each side of the "core" is surfaced with one) consists of a dense, or "highly dense" (claim 8, supra), layer. Both are made of ligno-cellulose. They are united by "cementitious" material, "asphaltum, for example."

The claims themselves set forth details and limitations with sufficient clearness to render unnecessary closer analysis, or further description.

The first of appellant's patents referred to by the Examiner is No. 1,578,609, issued March 30, 1926, upon an application which was, for a time, copending with the one at bar. It is entitled "Process and apparatus for disintegration of wood and the like." It seems to have been used by the Examiner to show that applicant's material was disclosed therein and is, therefore, old. The Board makes no specific reference to this patent, nor is it mentioned in the brief of the Solicitor for the Patent Office.

The application in the instant case in its specifications makes reference to "the inner insulating board portion" (the "core") of the composite board and states that it—

may be made * * * in accordance with my copending application Serial No. 57,251, filed September 18, 1925, * * *.

Serial No. 57,251 matured into Patent No. 1,663,504, one of the references.

The instant application also refers in the specifications to "The hard, dense, grainless surface board material" (the surface "layer" either upper or lower or both), and states that this—

may be produced in accordance with my copending application Serial No. 57,252, filed September 18, 1925, * * *.

Serial No. 57,252 matured into Patent No. 1,663,505, another of the references.

It thus appears that appellant has received product patents, issued upon each product separately, for both the boards or material, which, when combined or united by "cementitious" material, comprise the product for which the patent application involved was filed.

The Toles Patent No. 1,369,500 relates to built-up board of fiberized cereal straw made of layers "cementitiously" united with, preferably, "a waterproof cement."

The Board of Appeals took the view that appellant's real and only product inventions resided in the separate boards for which patents had been granted, because, in view of the teaching of Toles, as to—

a similar composite board made up of laminæ of porous and hard finished boards of fiberized cereal straw,

united "cementitiously," there was no per se invention in appellant's combination of the two similarly united. The Board said:

Where a patent has been granted, the novelty of which depends upon a certain feature, the invention is exhausted so far as that feature is concerned and any further patent must be based upon an inventive improvement thereon or upon a novel and inventive combination of such feature with other elements. If there is no further invention there is no consideration for another patent.

The fact that a loose practice has grown up of allowing claims in the same application which are not patentably different from each other is no argument for the allowance of such claims in different patents in which the monopoly of the same invention would be extended, *Ex parte Edison* C. D. 1915, page 30, *Ex parte Creveling* C. D. 1904, page 253.

In *James* vs. *Campbell* C. D. 1882, pages 67, 85, the Supreme Court said:

It is hardly necessary to remark that the patentee could not include in a subsequent patent any invention embraced or described in a prior one granted to himself any more than he could an invention embraced or described in a prior patent granted to a third person.

Appellant very earnestly urges that his instant application was copending with the applications upon which the respective patents for the respective separated products were granted; that these are not legal references against the involved applications; that he was entitled, under the practice of the Patent Office, to have the instant claims; that he earnestly sought an issuance of patent upon them simultaneously with the issuance of the other patents, and that he never sought any extension of monopoly. The implication is that if the grant of the involved application should have the effect of double patenting, or be equivalent thereto, that is the fault of the Patent Office for which he should not be held responsible.

Upon this last point the brief, after having classified the three Mason patents as A, B, and C, says:

Mason never sought any extension of monopoly, but on the contrary, endeavored to obtain issue of this case simultaneously with his companion cases B and C on which it is now rejected, and this application would have been issued with B and C, and none of the questions involved in this appeal would have arisen had not the Examiner erred in forcing applicant to appeal in order to overcome his erroneous rejection on applicant's copending patent A and patents of the prior art, instead of according the allowance that applicant requested and was entitled to have.

This argument renders it proper to say that our concern is primarily with the decision of the Board of Appeals and, the Patent Office rules having been complied with, if we find that decision to be sound, we have no occasion to look back of it to the decision of the Examiner.

In the instant case, however, we do not find that the Board overruled the grounds upon which the Examiner based his decision. One ground at least was approved, and the other was not expressly overruled, but merely disregarded.

Much of appellant's argument is devoted to the contention that his own patents are not legal references against the instant application. As we have said in the case of *In re Thompson* (suit No. 3008), 20 C. C. P. A. (Patents) ——, —— F(2d) ——, recently decided, while the said patents are not technical references in the sense that a timely granted patent to a third person might have been, it is, under the rule announced in the case of *In re Isherwood*, 46 App. D. C. 507, 245 O. G. 847, which we have frequently followed, perfectly proper to look to them for what they claim, and when two applications are presented by an inventor it is proper—

to hold the one unpatentable in view of the prior art and the claims upon which the other was patented.

The real test in such cases is whether the application presents claims that are inventive over the claims of the patent granted in a copending application. If not, then appellant had no legal right to an allowance of the application at the time the copending applications were allowed. Conceding, without holding (since we are not here concerned with any possible issue as to the validity of the patent sought had it then been granted), that no harm would have resulted from its allowance, it remains true that, if the only really patentable matter was covered by the applications that were granted, appellant has not suffered from the action, nor has he been deprived of any legal right, while to grant same now would result in double patenting, which the law prohibits.

Of course, if appellant were not already fully protected as to the matter which he invented, and if he had matter in his application patentable over his patents or other references, an entirely different situation would confront us.

We find no error in the decision of the Board of Appeals and same is affirmed.

Affirmed.

U. S. Court of Customs and Patent Appeals

IN RE BENDIX

No. 3,940. Decided December 27, 1932

PATENTABILITY—DISC WHEELS.

Claims for a disc wheel *Held* unpatentable over the prior art.

APPEAL from the Patent Office. Affirmed.

Mr. M. W. McConkey, Mr. H. O. Clayton and *Mr. N. D. Parker, jr.* for Bendix.

Mr. T. A. Hostetler and *Mr. Howard S. Miller* for the Commissioner of Patents.

LENROOT, *J.*:

This is an appeal from a decision of the Board of Appeals of the United States Patent Office, affirming a decision of the Examiner, rejecting for want of invention, in view of the prior art, claims 13, 14, 16, 17, 18, and 19 of appellant's application, filed April 10, 1925.

Claims 13 and 18 are illustrative of the claims in issue and read as follows:

13. A disk wheel having a radially-extending body part and formed at its outer periphery to support a rim, in combination with a member secured to the inner face of the body part and having a flange projecting laterally and radially inward, the flange and said body part providing opposed friction surfaces for engagement with an axially-expansible disk brake positioned within the plane of the rim.

18. A disk wheel having a rim, a load-supporting disk secured marginally within the rim adjacent its outer edge and deformed inwardly thereinto and having a radially-extending load-carrying portion arranged substantially within the load-carrying plane of the wheel and provided with an inner braking surface, and a second disk secured marginally to the inside of the first disk and thence offset and having a radially-extending portion provided with an outer braking surface spaced from and arranged opposite and parallel to the braking surface of the first disk, said second disk being disposed inside of the radial plane of the wheel and in substantial proximity to its load carrying plane.

The references relied upon are: Aspinwall, 1,612,345, December 28, 1926; Putnam, 1,398,739, November 29, 1921; Putnam, 1,414,375, May 2, 1922; Williams, 1,441,770, January 9, 1923.

The alleged invention relates to vehicle wheels and the brake mechanisms cooperating therewith, and more particularly to the construction and arrangement of a combined disk wheel and disk brake.

Appellant discloses a disk, hereinafter called the "disk wheel," comprising a relatively thin metal disk adapted to support a rim, the intermediate portion of the disk being located substantially in the central or load-supporting plane of the wheel. The disk is mounted upon the wheel hub and a portion of the disk extended radially from said mounting is utilized as a braking zone, the same being adapted to be frictionally engaged by a non-rotatable braking member and attached friction disk movable axially of the wheel; also attached to said disk wheel, outside of the braking zone above described, is a metal flange or housing member extending laterally from said disk wheel and then projecting radially inward toward the hub of the wheel in a plane parallel with, but spaced from, said disk wheel in order to form a housing for the braking elements; this housing rotates with the wheel. The radially extending portion of said housing member also forms a braking zone which is adapted to be frictionally engaged by a non-rotatable axially movable braking member to which is attached a friction disk. Mechanism is disclosed for simultaneously moving each of said braking members into frictional engagement with the braking zones upon the disk wheel and upon said housing member.

In rejecting the claims, both tribunals of the Patent Office relied principally upon the reference Aspinwall. This reference shows a car wheel provided with braking surfaces, one of which is formed on the web of the wheel and the other on a plate bolted to the body of the wheel proper. The necessary offsetting of the plate is obtained by securing a seat therefor on an offset portion of the wheel.

The Williams reference shows a portion of a disk of a sheet metal wheel as a braking surface, and Putnam shows a brake member attached to an intermediate zone of a wheel disk.

In its decision the Board said:

> In converting a wheel of the Putnam type to provide axially engaging braking surfaces it is our view that appellant has merely adapted obvious expedients. Clearly, as taught by Aspinwall, there must be an offset either in the body of the wheel or in the attached cooperating element and we deem it a matter of choice to provide such offset in either. If the continuity of the disk is to be maintained the obvious solution is to provide the necessary offset in the attached plate.
>
> To summarize: It is not new to provide a wheel with parallel braking surfaces normal to its axis of rotation. It is old to attach a brake element to an intermediate portion of a sheet metal wheel disk. We see no invention in giving to such a disk and such an element a form which will adapt them for cooperation with axially movable braking members.

Appellant contends that there is no suggestion in any of the references of the construction disclosed by him with respect to the offsetting of braking elements outside of the wheel body; that appellant's structure preserves the wheel disk body unchanged, while the Aspinwall reference does not; that the structure shown by Aspinwall traps the heat energy generated during braking and will effect a material increase in the temperature of the wheel structure, including the rim, resulting, in the case of rubber tires, in melting or vulcanizing the rubber; and further, that the construction shown by Aspinwall would greatly weaken the wheel because of the recessing to provide the brake housing. Appellant insists that his construction avoids all of these objections to the Aspinwall construction.

All of these contentions of appellant may be conceded to be well founded, but the question remains whether, in view of the references, it required the exercise of the inventive faculty to produce the construction set forth in appellant's claims. In other words, did appellant's construction require anything more than the exercise of mechanical skill in view of the prior art?

It is clear that when there are parallel braking surfaces upon two disks, said disks being perpendicular to the wheel axis but spaced one from the other, and said disks being joined together at points radially beyond the braking zone, one disk must be offset with respect to the other. Aspinwall shows such offset within the body of the wheel; appellant shows and claims such offset outside of the body of the wheel. In view of the references, we think the only debatable question is whether placing the offset outside of the body of the wheel, thus distinguishing it from Aspinwall, constituted invention. Upon this question we agree with the Board of Appeals that appellant's construction is merely an obvious expedient in view of Aspinwall, and called only for the exercise of mechanical skill.

For the reasons stated, we are in accord with the views of the Board of Appeals above quoted and its decision is affirmed.

Affirmed.

OLYMPIC

For Metal Pipe.
Claims use since Sept. 30, 1932.

Ser. No. 333,149. CHASE BRASS & COPPER CO. INCORPORATED, Waterbury, Conn. Filed Dec. 17, 1932.

CORVIC

For Metal Pipe.
Claims use since Oct. 5, 1932.

CLASS 14

Metals and Metal Castings and Forgings

Ser. No. 333,148. CHASE BRASS & COPPER CO. INCORPORATED, Waterbury, Conn. Filed Dec. 17, 1932.

CORVIC

For Angles, Wire, and Sheet-Metal.
Claims use since Oct. 4, 1932, on angles; since Oct. 5, 1932, on wire; and since Oct. 7, 1932, on sheet-metal.

CLASS 15

Oils and Greases

Ser. No. 332,806. BRADFORD GASOLINE COMPANY OF BRADFORD, Bradford, Pa. Filed Dec. 6, 1932.

PENN-TEST

The words "Penn-Test" are hereby disclaimed when used apart from the mark as shown in the drawing.
For Illuminating Oils, Lubricating Oils, Lubricating Greases, and Motor Fuel Oils.
Claims use since Nov. 19, 1932.

Ser. No. 333,587. HANCOCK OIL COMPANY OF CALIFORNIA, Long Beach, Calif. Filed Jan. 3, 1933.

5 Point

For Gasoline.
Claims use since Nov. 1, 1932.

Ser. No. 333,588. HANCOCK OIL COMPANY OF CALIFORNIA, Long Beach, Calif. Filed Jan. 3, 1933.

For Gasoline.
Claims use since Nov. 1, 1932.

Ser. No. 333,589. HANCOCK OIL COMPANY OF CALIFORNIA, Long Beach, Calif. Filed Jan. 3, 1933.

The words "Quality" and "Regular Gasoline" are disclaimed apart from the mark shown in the drawing.
For Gasoline.
Claims use since Nov. 1, 1932.

Ser. No. 334,278. ARBUTHNOT OIL COMPANY, Picher, Okla. Filed Jan. 24, 1933.

For Petroleum Products—Namely, Gasoline, Kerosene, Lubricating Oils, Lubricating Greases, Fuel Oil (a Heavy Residual Oil Used for Burning Under Boilers, and as a Fuel in Diesel-Type Oil Engines), Petroleum Distillate (Used as a Furnace Fuel and as a Fuel in Semi-Diesel-Type Oil Engines), and Motor Fuels in Which the Chief Constituent is Gasoline.
Claims use since Apr. 26, 1930.

Ser. No. 334,487. MERLE B. KEMPER, doing business as Sta-Lube Company, St. Louis, Mo. Filed Jan. 28, 1933.

STA-LUBE

For Lubricating Oils and Greases.
Claims use since Aug. 1, 1931.

Ser. No. 334,487. JOHN B. CONNOR, Los Angeles, Calif. Filed Jan. 31, 1933.

HI-EFF

For Lubricating Oil.
Claims use since July 21, 1932.

Ser. No. 334,534. NEW YORK & NEW JERSEY LUBRICANT COMPANY, New York, N. Y. Filed Feb. 1, 1933.

CONDENZOL

For Lubricating Oils and Lubricating Oil Compositions and Greases.
Claims use since Jan. 6, 1933.

Ser. No. 334,581. STANDARD OIL COMPANY OF NEW JERSEY, Wilmington, Del. Filed Feb. 2, 1933.

ARACAR

For Lubricating Oils.
Claims use since Jan. 11, 1933.

CLASS 16

Paints and Painters' Materials

Ser. No. 325,260. THE R. M. HOLLINGSHEAD COMPANY, Camden, N. J. Filed Mar. 18, 1932.

NUGLOSS

For Polishing Materials—Namely, Automobile Polish and Furniture Polish.
Claims use since January, 1906.

Ser. No. 331,064. RINSHED-MASON COMPANY, Detroit, Mich. Filed Oct. 7, 1932.

Pearlite

For Lacquer, Including Lacquer with a Pigment Which Forms a Film of Irridescent Nature.
Claims use since Aug. 17, 1932.

Ser. No. 334,514. CONTINENTAL CAR-NA-VAR CORPORATION, Brazil, Ind. Filed Feb. 1, 1933.

Luster var

For Liquid Polish for All Kinds of Floors.
Claims use since June 25, 1931.

Ser. No. 334,544. VALENTINE & COMPANY, New York, N. Y. Filed Feb. 1, 1933.

Super VALSPAR

For Paint Enamels, Stains, and Varnishes.
Claims use since Mar. 23, 1932.

CLASS 17

Tobacco Products

Ser. No. 332,254. GOLDBLATT BROS., INC., Chicago, Ill. Filed Nov. 18, 1932.

Goldblatt's Bond

For Cigars.
Claims use since Mar. 15, 1932.

Ser. No. 334,387. CUESTA, REY & CO., Tampa, Fla. Filed Jan. 27, 1933.

FAVORITA DE TAMPA

For Cigars.
Claims use since June 15, 1930.

CLASS 19

Vehicles, Not Including Engines

Ser. No. 332,717. INTERNATIONAL MOTOR COMPANY, New York, N. Y. Filed Dec. 3, 1932.

For Self-Propelled Commercial Motor Trucks and Tractor Trucks.
Claims use since Nov. 1, 1932.

Ser. No. 332,866. LIPSCHULTZ BROS. INC., St. Paul, Minn. Filed Dec. 8, 1932.

WASHABLE AUTO SEAT COVERS

The descriptive words "Washable," "Fitwel," and "Auto Seat Covers" also the representation of the goods and of the manner of their use are disclaimed apart from the mark as shown on the drawing.
For Automobile Seat Covers.
Claims use since Nov. 1, 1932.

Ser. No. 332,868. LIPSHULTZ BROS. INC., St. Paul, Minn. Filed Dec. 8, 1932.

KOOL-TEX SEAT COVERS

The descriptive words "Seat Covers" and "Kool" are disclaimed apart from the mark as shown on the drawing.
For Automobile Seat Covers.
Claims use since Mar. 1, 1931.

Ser. No. 332,869. LIPSCHULTZ BROS. INC., St. Paul, Minn. Filed Dec. 8, 1932.

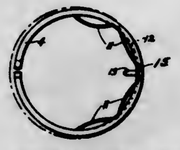
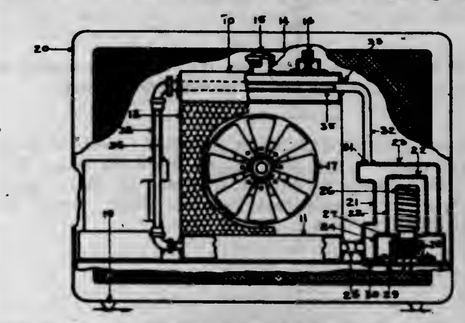
REISSUES



MARCH 28, 1933

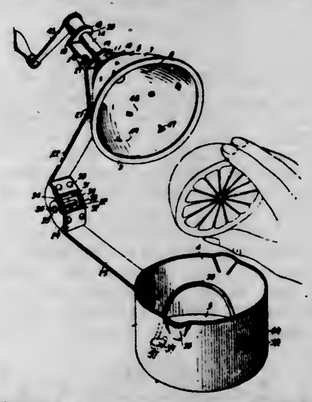
18,775. MANUFACTURE OF STARCH. ROBERT F. SHERMAN, Pekin, Ill., assignor to Corn Products Refining Company, New York, N. Y., a Corporation of New Jersey. Original No. 1,554,301, dated Sept. 22, 1925, Serial No. 682,516, filed Dec. 24, 1923. Application for reissue filed Sept. 30, 1932. Serial No. 635,639. 24 Claims. (Cl. 127—67.)

1. In the process of manufacturing starch from corn which comprises disintegrating the corn and making a separation in water of the starch therein from the non-starch constituents, an improvement consisting in withdrawing from the disintegrated corn subjected to the aforesaid separation the bulk of the water employed in making such separation together with substantially all the residual solubles of the corn in solution therewith, reusing in the process substantially all of the soluble containing water so withdrawn and recovering the solubles therein.



18,776. ANTISLAP RING. CHARLES RICHARD MCMINN, JAMES THOMAS ROBINSON, and JAMES BLAIR HOLLIDAY, Incompetent, Los Angeles, Calif., by Elsie C. Couch, guardian, Los Angeles, Calif., assignors, by mesne assignments, to The Simplex Piston Ring Company of America, Inc. Original No. 1,660,846, dated Feb. 28, 1928, Serial No. 148,307, filed Nov. 13, 1926. Application for reissue filed Dec. 6, 1929. Serial No. 412,253. 2 Claims. (Cl. 74—109.)

1. A cylinder, a piston having a groove around its periphery and loosely fitting said cylinder, a ring having an eccentric arcuate groove on its inner periphery and seated in the groove in said piston, a wave-like resilient expander seated in both of said grooves to exert a preponderance of radial pressure in one direction on said ring and to lock the ring yieldingly against rotation around said piston, said piston being provided with a recess, and a pin on said expander engaging said recess to prevent substantial bodily rotation of said expander around said piston.



18,777. AIR HEATER. DONALD W. LAKE, Chicago, Ill. Original No. 1,767,082, dated June 24, 1930, Serial No. 238,253, filed Dec. 7, 1927. Application for reissue filed Feb. 12, 1932. Serial No. 592,813. 3 Claims. (Cl. 257—137.)

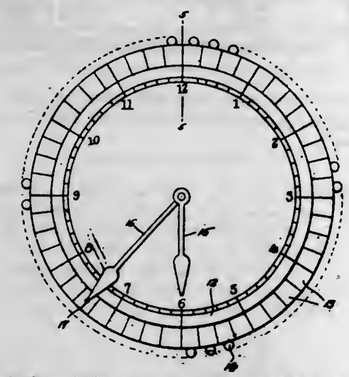
3. In a heat exchange device, a casing having one open face, a heat dissipating unit positioned adjacent said open face in such manner as to provide an air inlet portion and a draft opening in the open face of the casing, fluid heating means communicating with the heat dissipating unit,

and an air blowing unit associated with the heat dissipating unit in such manner that a warm air blast is projected therethrough.

18,778. FRUIT JUICE EXTRACTOR. CLARENCE E. ELLIOTT and LEONARD O. NICHOLS, Kansas City, Mo., assignors to Knapp Monarch Company, Inc., St. Louis, Mo., a Corporation of Missouri. Original No. 1,743,661, dated Jan. 14, 1930, Serial No. 249,258, filed Jan. 25, 1928. Application for reissue filed Jan. 13, 1932. Serial No. 586,448. 20 Claims. (Cl. 146—3.)

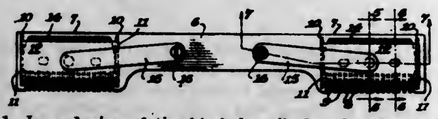
1. In a fruit juice extractor, a juice receiving member, pins on the member, a wire loop engaging the pins for deforming the fruit pulp, a fruit impaling member rotatable over the wire loop, and a crank for rotating the said impaling member during the juice extracting operation.

18,779. FUSE BLOCK. JOSEPH MESSING, Detroit, Mich., assignor to Bull Dog Electric Products Company, Detroit, Mich., a Corporation of West Virginia. Original No. 1,817,521, dated Aug. 4, 1931, Serial No. 421,278, filed Jan. 16, 1930. Application for reissue filed Oct. 21, 1932. Serial No. 638,984. 34 Claims. (Cl. 200—133.)



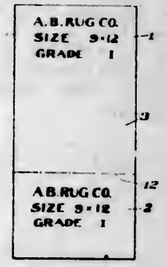
1. A fuse block having contact clips to receive a cartridge fuse and having a screw shell to receive a plug fuse, the screw shell having a shell contact and a center contact, the shell contact being connected to one of the clips, and the center contact being connected to the other one

of the clips, the block being adapted to receive a plug fuse or a cartridge fuse, the shell and the clips lying in sub-



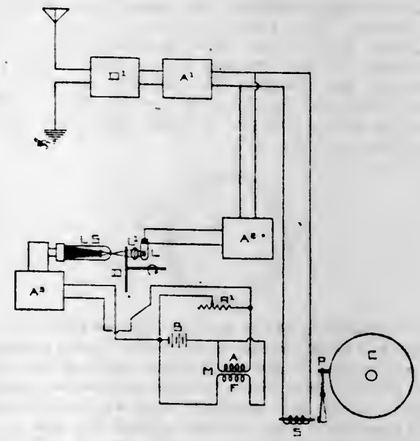
stantially the same plane, and the shell being slotted so that a cartridge fuse can lie therein, transversely.

18,780. TIME CONTROLLED SWITCH. ADOLF H. SAAR, Jr., Omaha, Nebr. Original No. 1,885,482, dated Nov. 1, 1932, Serial No. 537,703, filed May 15, 1931. Application for reissue filed Jan. 20, 1933. Serial No. 653,909. 1 Claim. (Cl. 200—37.)



In a clock switch, a clock casing provided with a dial opening, the edge portion of the casing at the opening being provided with an inwardly disposed circumferentially extending flange, an annular wall extending outwardly from the flange and provided with a backwardly disposed circumferentially extending flange defining a trough, and removably disposed conductor blocks in the trough for engagement by one hand of the clock.

18,781. HAIR TRIMMER AND DRESSER. JOHN KEENAN, Cincinnati, Ohio. Original No. 1,789,234, dated Jan. 13, 1931, Serial No. 319,672, filed Nov. 15, 1928. Renewed July 3, 1930. Application for reissue filed Sept. 9, 1931. Serial No. 561,969. 10 Claims. (Cl. 30—12.)



1. In a device of the kind described, a handle member, the handle formed to provide comb teeth at the edge of the member near one end thereof, a plate formed to hold a thin razor blade with a cutting edge substantially parallel with the toothed edge of the handle, yielding clamping means for holding the plate pressed against the handle and adapted to hold a blade between the handle and the plate, the plate arranged and adapted to be moved transversely of the handle for adjusting the cutting edge of a blade from and toward the points of the teeth of the comb, the plate and handle provided with a transversely extending inter-engaging guide rib and groove for retaining the cutting edge of the blade substantially parallel with the points of the comb teeth as the blade is adjusted transversely of the handle.

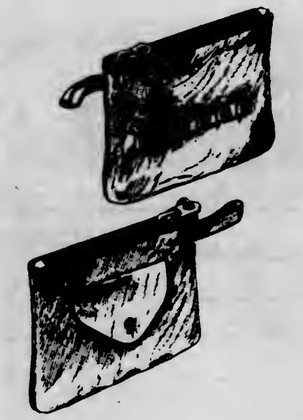
18,782. LABEL. ELLIOTT I. PETERSEN, Enfield, Conn., assignor to Bigelow-Sanford Carpet Co., Inc., Thompsonville, Conn., a Corporation of Massachusetts. Original No. 1,850,988, dated Mar. 22, 1932, Serial No. 572,490, filed Nov. 2, 1931. Application for reissue filed Nov. 3, 1932, Serial No. 640,977. 5 Claims. (Cl. 40—2.)

1. In combination with a floor covering, a double label formed of a relatively narrow strip of material and comprising two relatively movable end portions connected by a foldable intermediate portion, one end portion forming a back label permanently secured to the back of the floor covering, the other end portion forming a front label secured to and displayed at the upper edge of the floor covering while connected to the back label by said intermediate portion, said strip being looped around the adjacent edge of the floor covering and said intermediate portion being normally spaced from said edge.

18,783. SYNCHRONIZING SYSTEM. CHARLES FRANCIS JENKINS, Washington, D. C., assignor to Jenkins Laboratories, Inc., Silver Spring, Md., a Corporation of the District of Columbia. Original No. 1,766,644, dated June 24, 1930, Serial No. 207,515, filed July 21, 1927. Application for reissue filed Mar. 22, 1932. Serial No. 600,549. 12 Claims. (Cl. 178—69.5.)

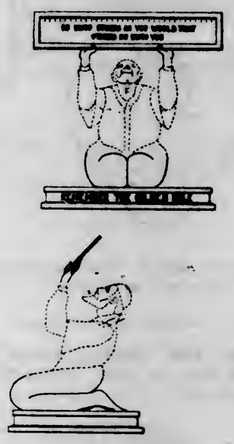
11. The method of synchronising radiographic apparatus, which comprises producing at the transmitting station a continuous series of electrical signals of predetermined duration, in determinate order and of a strength variable in accordance with areas of an image to be transmitted; and, at a receiving station, varying an electric current in consonance with said signals and in proportion to simultaneous phase displacements existing between the apparatus in the two stations; and applying the varied current for synchronising.

DESIGNS



MARCH 28, 1933

89,544. RECEPTACLE COVER. FELIPE INOCENCIO, Glendora, Calif. Filed Dec. 29, 1932. Serial No. 46,653. Term of patent 7 years.

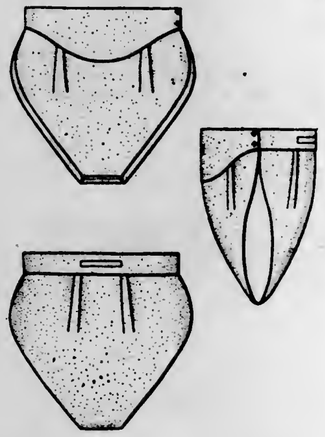


The ornamental design for a receptacle cover, as shown.

89,545. LADIES' HAND-BAG. EVELYN JAMNCKE, New Orleans, La. Filed June 24, 1932. Serial No. 44,190. Term of patent 7 years.

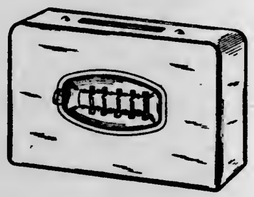
The ornamental design for ladies' hand bag as shown.

89,546. TABLE ORNAMENT. RALPH F. MANNING, Medford, Mass. Filed Nov. 29, 1932. Serial No. 46,197. Term of patent 14 years.



The ornamental design for a table ornament as shown and described.

89,547. STOCK BOX FOR TYPEWRITER RIBBONS. GEORGE D. ATWOOD, Brooklyn, N. Y., assignor to Decorated Metal Manufacturing Company, Inc., Brooklyn, N. Y., a Corporation of New York. Filed Dec. 22, 1932. Serial No. 46,566. Term of patent 7 years.

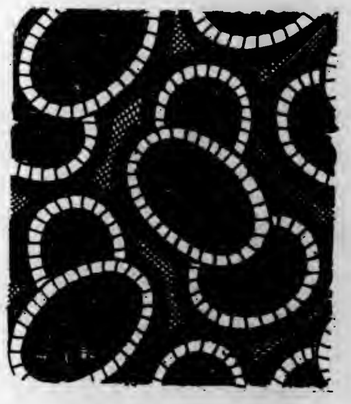


The ornamental design for a stock box for typewriter ribbons, substantially as shown.

89,548. UNDERGARMENT OR SIMILAR ARTICLE OF MANUFACTURE. WILLIAM W. BRADFORD, Clarendon, Va. Filed Oct. 4, 1932. Serial No. 45,212. Term of patent 3½ years.

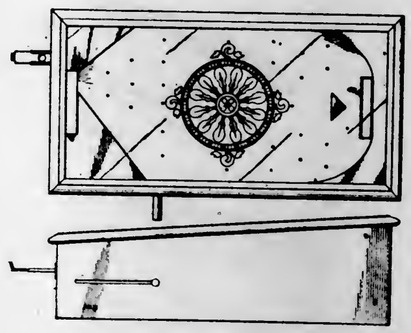
The ornamental design for an undergarment or similar article of manufacture, as shown.

89,549. COIN BANK. SPENCER BABCK, Shaker Heights, Ohio. Filed May 15, 1931. Serial No. 39,862. Term of patent 14 years.



The ornamental design for a coin bank as shown and described.

89,550. SHADE FOR AN ELECTRIC LAMP. GLENN E. MCFADDEN, Buffalo, N. Y., assignor to Markel Electric Products, Inc., Buffalo, N. Y., a Corporation of New York. Filed Jan. 27, 1933. Serial No. 47,019. Term of patent 3½ years.

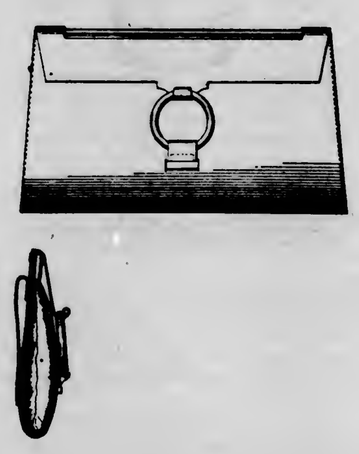


The ornamental design for a shade for an electric lamp substantially as shown.

89,551. LACE. JOHN MOOSHERR, New York, N. Y., assignor to Liberty Lace and Netting Works, New York, N. Y., a Corporation of New York. Filed Feb. 2, 1933. Serial No. 47,084. Term of patent 3½ years.

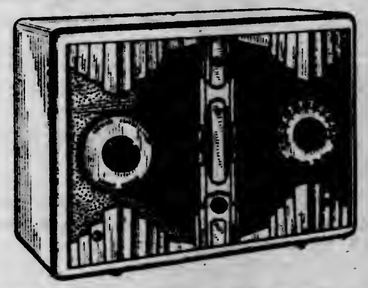
The ornamental design for lace, substantially as shown.

89,552. PIN-BALL AMUSEMENT GAME DEVICE. ARTHUR D. PEARSON, Chicago, Ill. Filed Dec. 5, 1932. Serial No. 46,310. Term of patent 3½ years.



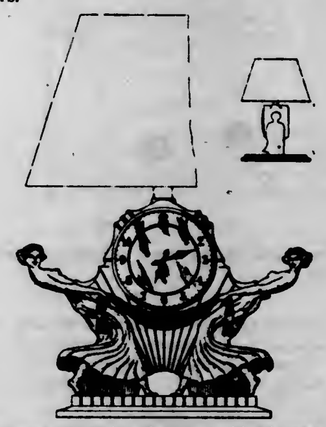
The ornamental design for a pin-ball amusement game device, as shown and described.

89,553. TEXTILE FABRIC OR SIMILAR ARTICLE. JACK SCHWEIZER, New York, N. Y., assignor to William Willheim Co., Inc., New York, N. Y. Filed Nov. 4, 1932. Serial No. 45,789. Term of patent 3½ years.



The ornamental design for a textile fabric or similar article as shown and described.

89,554. HAND-BAG. MORRIS WHITE, New York, N. Y., assignor to Morris White Mfg. Co. Inc., a Corporation of New York. Filed Jan. 26, 1933. Serial No. 46,992. Term of patent 3½ years.



The ornamental design for a handbag as shown.

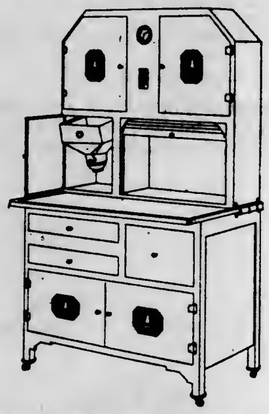
89,555. CABINET FOR RADIORECEIVERS. ISIDOR GOLDBERG, New York, N. Y., assignor to Pilot Radio and Tube Corporation, New York, N. Y., a Corporation of Delaware. Filed Jan. 7, 1933. Serial No. 46,759. Term of patent 3½ years.

The ornamental design for a cabinet for radio receivers, as shown.

89,556. COMBINED CLOCK CASE AND LAMP OR SIMILAR ARTICLE. JOSEPH GOTTLIEB, Jersey City, N. J. Filed Jan. 3, 1933. Serial No. 46,700. Term of patent 3½ years.

The ornamental design for a combined clock case and lamp or similar article, as shown and described.

89,557. TEXTILE FABRIC OR SIMILAR ARTICLE. WILLIAM WILLHEIM, New York, N. Y. Filed Sept. 29, 1932. Serial No. 45,142. Term of patent 3½ years.



The ornamental design for a textile fabric or similar article as shown and described.

89,558. BOOT HOOK. THORVALD F. HAMMER, Branford, Conn. Filed Dec. 29, 1932. Serial No. 46,647. Term of patent 7 years.

The ornamental design for a boot hook, as shown.

89,559. KITCHEN CABINET. WILLIAM D. WILLIAMS, Junior, Richmond, Ind. Filed Dec. 9, 1932. Serial No. 46,403. Term of patent 7 years.

The ornamental design for a kitchen cabinet, substantially as shown.

89,560. CONTAINER CAP. GEORGES WILMET, New York, N. Y., assignor to Armstrong Cork Company, Lancaster, Pa., a Corporation of Pennsylvania. Filed Jan. 16, 1933. Serial No. 46,861. Term of patent 7 years.

The ornamental design for a container cap as shown.

89,561. SUGAR BOWL OR SIMILAR ARTICLE. CURTIS B. ILGENFRITZ, York, Pa., assignor to United States Glass Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Jan. 12, 1933. Serial No. 46,808. Term of patent 7 years.

The ornamental design for a sugar bowl or similar article, substantially as shown.

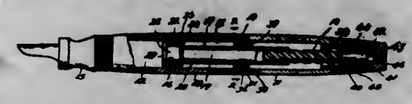
89,562. TUMBLER OR SIMILAR ARTICLE. CURTIS B. ILGENFRITZ, York, Pa., assignor to United States Glass Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Jan. 12, 1933. Serial No. 46,809. Term of patent 7 years.

The ornamental design for a tumbler or similar article, substantially as shown.

PATENTS

GRANTED MARCH 28, 1933

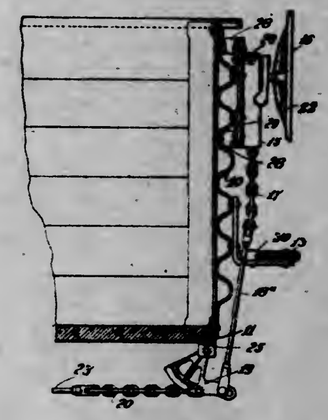
1,902,809. PLUNGER TYPE PEN. ANDREAS BIENENSTEIN, Toledo, Ohio, assignor to The Conklin Pen Company, Toledo, Ohio, a Corporation of Ohio. Filed Nov. 24, 1930. Serial No. 497,939. 9 Claims. (Cl. 120—47.)



1. A fountain pen having in combination, a barrel portion presenting a tubular reservoir, a piston axially reciprocable in said reservoir, a piston stem therefor, a steep pitch screw-drive for said piston including a screw member, means for swivelly mounting said screw member in said barrel portion, and a short sleeve in said barrel having an angular bore engaging a similarly shaped exterior surface on said stem.

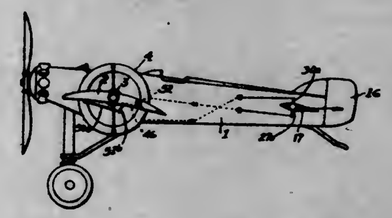
1,902,810. PLUNGER TYPE PEN. ANDREAS BIENENSTEIN, Toledo, Ohio, assignor to The Conklin Pen Company, Toledo, Ohio, a Corporation of Ohio. Filed Apr. 20, 1931, Serial No. 531,567. Renewed Sept. 21, 1932. 9 Claims. (Cl. 120—47.)

1. A fountain pen including in combination, a barrel presenting a tubular reservoir, a piston and piston rod reciprocable in said reservoir, a sleeve member mounted in said barrel, a screw member arranged within said sleeve member and swivelly mounted in said sleeve member at one end of the latter, means for operatively connecting said piston rod and screw member whereby said piston may be reciprocated upon rotation of said screw member, said piston rod being hollow to telescopically receive said screw member, and means presenting an extended bearing surface carried by said sleeve for slidably but non-rotatably supporting said piston rod, the latter telescoping within said sleeve.



1,902,811. PLUNGER TYPE PEN. ANDREAS BIENENSTEIN, Toledo, Ohio, assignor to The Conklin Pen Company, Toledo, Ohio, a Corporation of Ohio. Filed July 5, 1932. Serial No. 620,960. 10 Claims. (Cl. 120—47.)

1. In a fountain pen, a barrel portion presenting a tubular reservoir, a piston reciprocable in said reservoir, said barrel being formed in two sections, and means non-rotatively associated with the interior of the ends of the barrel sections at the parting line of the sections and concealed thereby for slidably and non-rotatably mounting said piston.

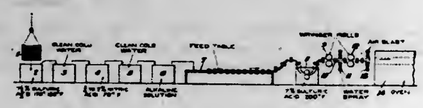


1,902,812. MEANS FOR MOUNTING RAILWAY CAR HAND BRAKES. RICHARD W. BURNETT, Chicago, Ill. Filed May 27, 1926. Serial No. 111,909. 1 Claim. (Cl. 74—121.)

In combination with a brake rigging and the corrugated end wall of a railway car, a hand brake for operating said brake rigging comprising a housing, a hand wheel, and a flexible connector adapted to be tightened by rotation of said hand wheel, and means for securing said housing

to the end wall of the car comprising a U-shaped bracket, one flange of which is secured to the flat marginal portion of the wall and the other flange of which extends over and is secured to the crest of an adjacent corrugation.

1,902,813. AEROPLANE. GEORGE CROMPTON, Jr., New York, N. Y. Filed Apr. 9, 1930. Serial No. 442,931. 10 Claims. (Cl. 244—14.)



1. In an aeroplane, a main plane mounted to rotate freely on an horisontal axis, and ailerons provided by said main plane.

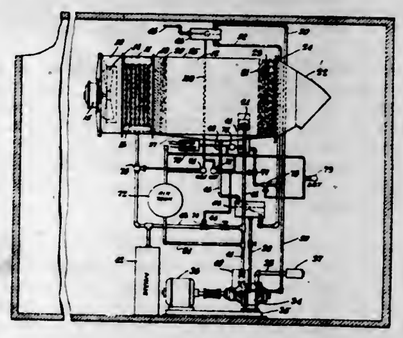
1,902,814. RECORDING OF SOUNDS. FREDERICK KENNETH CROWTHER, New Malden, England. Filed Dec. 23, 1930, Serial No. 504,437, and in Great Britain Aug. 25, 1930. 8 Claims. (Cl. 176—122.)

1. An electrical discharge device for photographically recording sound comprising an hermetically sealed container an insulator within said container having a narrow longitudinal slot, a long cathode located at the bottom of said longitudinal slot, an anode adjacent said cathode and connections to establish electrical circuit.

1,902,815. MANUFACTURE OF STEEL SHEETS. ARCHIE R. GOODHUE, Vandergrift, Pa., assignor to American Sheet and Tin Plate Company, a Corporation of New Jersey. Filed Nov. 21, 1931. Serial No. 576,596. 5 Claims. (Cl. 148—8.)

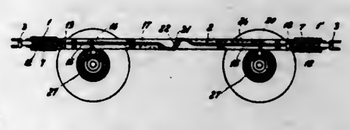
1. The method of producing scale-free, clean, high silicon electrical steel sheets, which consists in spacing the sheets, after being annealed, maintaining a batch of said sheets in spaced relation, pickling said sheets in a hot sulfuric acid solution, washing said pickled sheets in clean water to remove loose scale, pickling said washed sheets in a nitric acid solution, washing said sheets after said last named pickling step in clean water, then immersing said sheets in an alkaline bath, passing said sheets through a sulfuric acid solution, washing said sheets to remove all traces of acid and then drying said sheets.

1,902,816. COMBINED EYE AND EYELASH FOR DOLLS. VICTOR KENNY, Woodside, N. Y. Filed Apr. 11, 1931, Serial No. 529,469. Renewed July 25, 1932. 10 Claims. (Cl. 46—40.)



1. A combined eye and lash member for dolls, comprising a sheet metal member for extending transversely across an eye opening of a doll and having resilient inwardly directed edges, and eyelashes supported outside of said edges, said resilient inwardly directed edges holding the eye and eyelash in place in the eye opening of a doll.

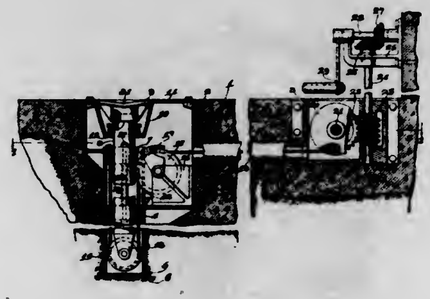
1,902,817. COMMUNICATION WITH MOVING TRAINS. HERMAN A. AFFEL, Ridgewood, and ESTILL I. GREEN, East Orange, N. J., assignors to American Telephone and Telegraph Company, a Corporation of New York. Filed Oct. 2, 1929. Serial No. 396,893. 15 Claims. (Cl. 179—2.5.)



1. In a signaling system to and from moving trains, a transmission line along the route of the trains, means for electrically dividing said line into a plurality of sections, a fixed carrier frequency signaling station near the middle of each section and associated for two-way signaling with the transmission line, and a plurality of trains each provided with inductive means for two-way signaling with said line, each train in a section being provided for signaling on a different pair of carrier frequencies and each fixed station being equipped for signaling simultaneously on the pairs of carrier frequencies associated with the plurality of trains.

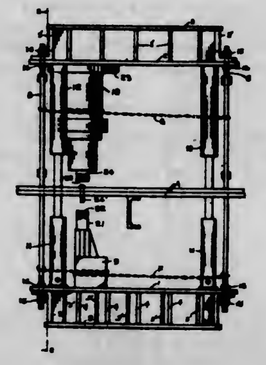
1,902,818. AIR CONDITIONING CONTROL. SAMUEL M. ANDERSON, Sharon, Mass., assignor to B. F. Sturtevant Company, Boston, Mass., a Company. Filed Sept. 10, 1930. Serial No. 481,012. 16 Claims. (Cl. 261—13.)

1. An air conditioning system comprising a ventilating unit, a heater unit, a spray chamber, and means responsive to the temperature of the water returned from said spray chamber for controlling the temperature of said heater unit.



1,902,819. BRAKE CONTROL FOR VEHICLE WHEELS. ACHILLE ARATO, Turin, Italy. Filed Nov. 12, 1930, Serial No. 495,260, and in Italy Nov. 25, 1929. 4 Claims. (Cl. 188—142.)

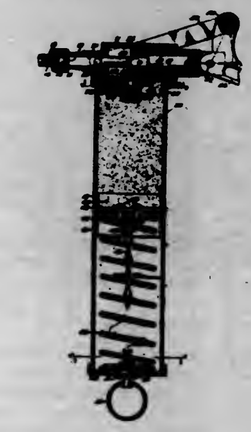
1. In a device for automatic control of the brakes of a trailer on said trailer approaching a leading vehicle, a draft member resiliently mounted to reciprocate in a support in the frame of said trailer, brake gears on said trailer, an oscillating member connected with said brake gears for their actuation, and a bar supported in the trailer frame and adapted to move along its own axis, said bar having one end connected with said brake gear actuating member and its other end opposite to and spaced from the inner end of said draft member.



1,902,820. AUTOMOBILE LIFT. GEORGE P. BALL, Allentown, Pa. Filed Feb. 13, 1931. Serial No. 515,462. 1 Claim. (Cl. 254—148.)

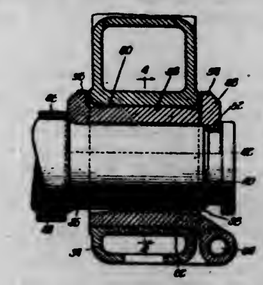
A lifting device comprising an imbedded casing, a guide cylinder in said casing rigidly connected therewith, an embedded gear casing spaced from the first casing, a guide tube connecting the casings together, a bearing cap fitted in the upper end of the cylinder, a second bearing secured in the cylinder in spaced relation to the bearing cap, a standard slidably mounted in the bearings, a lifting head on the upper end of the standard, a pulley carried by the lower end of the standard, a winding drum rotatably mounted in the gear casing, a pulley rotatably mounted in the first casing adjacent to the upper end of the cylinder and one end of the guide tube, a cable secured to the bearing cap and trained over said pulleys and threaded through the guide tube and wound upon said drum, an operating shaft rotatably mounted in the gear casing and

extending externally thereof, means for rotating the shaft, and a worm and a worm-wheel connected between the shaft and drum.



1,902,821. APPARATUS FOR RIVETING PLATES OF SHIPS. GEORGE H. BATES, Cranford Township, Union County, N. J., assignor to United Dry Docks, Incorporated, New York, N. Y., a Corporation of New York. Filed Apr. 18, 1930. Serial No. 445,240. 6 Claims. (Cl. 78—48.)

2. In a device of the character described, a riveter and an anvil adapted to be placed on opposite sides of plates to be riveted with a rivet to be squeezed between them, separate backing members for the said riveter and anvil with respect to which they are mounted to be laterally and vertically movable and members spacing and connecting said backing members, adapted to extend through said plates and located at points removed from the zone of operation of said riveter and anvil.

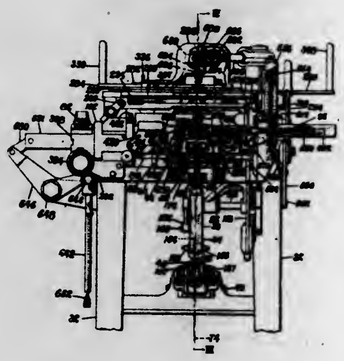


1,902,822. GREASE DISPENSING DEVICE. JULIUS H. BECKER, San Francisco, Calif., assignor, by direct and mesne assignments, to Alemite Corporation, a Corporation of Delaware. Filed Sept. 9, 1926. Serial No. 134,375. 5 Claims. (Cl. 221—473.)

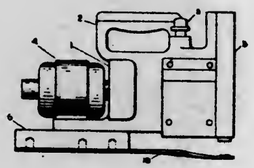
2. In a portable grease dispensing device a tubular grease reservoir, a cap therefor, a passageway extending through said cap, a plunger comprising a pair of concentrically mounted pistons, a bore in said passageway for each of said concentric pistons, an inlet port in the larger of said bores communicating with said reservoir,

a hand lever mounted on said head adapted to reciprocate said plunger, and a valved discharge outlet at the outer end of the smaller of said bores.

1,902,823. TRUCK FRAME MOUNTING. FREDERIC H. BENDER, Chicago, Ill., assignor to American Steel Foundries, Chicago, Ill., a Corporation of New Jersey. Filed Mar. 22, 1929. Serial No. 349,217. 9 Claims. (Cl. 308—40.)



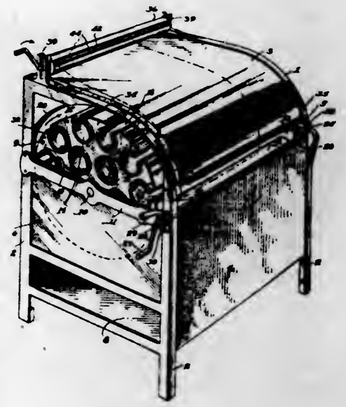
1. In a side frame, the combination of a journal box receiving portion including spaced jaws defining a seat therebetween, the lower ends of said jaws being connected by a transverse member, a normally stationary axle extending through said journal box receiving portion and provided with a channel outwardly of said jaws, a friction bearing received between said jaws and disposed in direct contacting relation to said axle and in direct supporting relation to said side frame on said seat, said bearing having portions embracing said side frame, and a portion received in said channel whereby an interlock is provided between said side frame and axle.



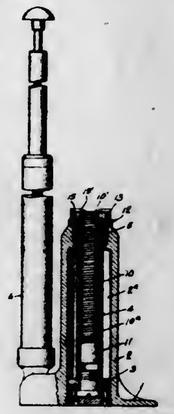
1,902,824. HEEL-SEAT FITTING MACHINE. EARL A. BESSOM, Marblehead, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed May 29, 1931. Serial No. 540,990. 109 Claims. (Cl. 12—81.5.)

1. A heel-seat fitting machine having, in combination, a pair of plates constructed and arranged to engage within the rand crease of a shoe at opposite sides of the shoe,

a gage constructed and arranged for engagement with the rear portion of the shoe for positioning the sole of the shoe lengthwise thereof upon said plates, said plates being mounted for adjustment lengthwise of the shoe relatively to the gage, and means for so adjusting the crease plates relatively to the gage that when the rear portion of the shoe engages said gage the plates will terminate substantially at the breast line of the sole.



1,902,825. STITCHING MACHINE ANVIL. HERBERT R. BLISS and HOWARD G. ALLEN, Niagara Falls, N. Y., assignors to H. R. Bliss Company, Inc., Niagara Falls, N. Y., a Corporation of New York. Filed Aug. 16, 1930. Serial No. 475,780. 2 Claims. (Cl. 1—48.)

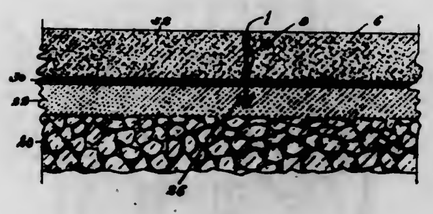


1. A stitching machine comprising in combination, a portable machine having a stitcher head, means for operating it, and a handle by means of which the machine may be manipulated, a blade anvil carried by the machine comprising a laterally angularly and downwardly angularly extending shank with a gradual continuous slope adapted to lie in between container flaps, a relatively sharply reversely bent neck portion, and an anvil portion projecting from the neck portion and adapted to lie in under both flaps, said reversely bent neck portion extending downwardly angularly, and the downwardly angularly extent of the shank and neck being substantially continuous.

1,902,826. STORAGE AND DISPENSING DEVICE FOR SCREEN WIRE AND THE LIKE. HENRY S. BOSO, Greenfield, Ohio. Filed Feb. 26, 1930. Serial No. 431,477. 2 Claims. (Cl. 242—55.3.)

1. A device for storing and dispensing sheet material, a reel for winding up the dispensed material, a shaft on which the reel is loosely mounted, said reel provided with a longitudinal slot in its periphery, a member secured to said reel and extending inwardly thereof, an arm on said shaft for cooperating with said member for gripping the free edge of the sheet material and for imparting a rotary movement to the reel.

1,902,827. HYDRAULIC JACK. HARRY W. BOLENS, Port Washington, Wis. Filed Nov. 22, 1928. Serial No. 321,162. 2 Claims. (Cl. 138—9.)

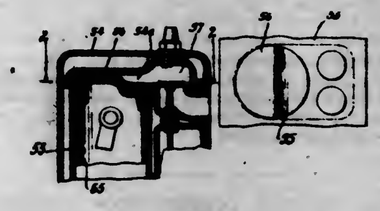


1. A hydraulic jack including a base, a lifting cylinder carried thereby, a lifting piston fitted in said cylinder, a hollow piston rod connected to the piston and projecting exteriorly to the cylinder, a combined spring connecting member and nut abutting the upper end of the piston rod, retractile coil springs between the combined spring connecting member and nut and the base operating to bias the piston to its lowermost position in the cylinder and to releasably hold the combined connecting member and nut against rotation and an extension member slidably fitted in the hollow piston rod and threaded through the combined connecting member and nut.

1,902,828. WELL BORE ANGLE DETECTOR AND RECORDER. WILLIAM G. BOTTOM, Tulsa, Okla. Filed Aug. 27, 1930. Serial No. 478,121. 7 Claims. (Cl. 234—1.)

1. In a device of the character described, a housing, a carrier rotatably mounted in the housing, a plate supported by the carrier, means for recording on the plate the degree of inclination of the housing, and means responsive to vibration of the housing for deferring said recording process until the housing has come to complete rest.

1,902,829. FLOOR CONSTRUCTION. JESSE R. BOWMAN, Newburyport, Mass. Filed Mar. 6, 1931. Serial No. 520,590. 8 Claims. (Cl. 94—4.)



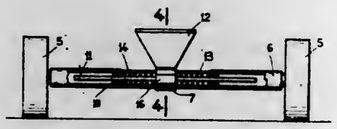
1. In a flooring construction, in combination, a foundation member, a plurality of mold forming strips vertically arranged, said strips being secured to said foundation member, a plurality of cross strips cooperatively associated with the aforesaid mold forming strips and forming a plurality of individual molds therewith, plastic material filling said molds, and means for preventing bonding of said plastic material and said foundation member whereby the blocks formed by the plastic material are restrained from movement only by the engagement with said strips, said strips being constructed and arranged to permit a floating action of the blocks retained thereby.

1,902,830. SEAL FOR GEMS. ABBE BULOVA, New York, N. Y., assignor to Bulova Watch Company, Inc., New York, N. Y., a Corporation of New York. Filed May 17, 1932. Serial No. 611,762. 10 Claims. (Cl. 63—1.)

1. A jewelry sales unit comprising an article of jewelry having a gem setting; a stone mounted in the setting; and a hollow transparent cover over the stone and sealed to the setting.

1,902,831. INTERNAL COMBUSTION ENGINE. JAMES P. BUAKS, Newark, N. J., assignor of twenty per cent to James MacIntosh, Norristown, Pa., of twenty per cent to Kenneth W. Mackey, and of ten per cent to Sidney I. Howell, Montclair, N. J. Filed Mar. 30, 1929. Serial No. 351,279. 1 Claim. (Cl. 123—91.)

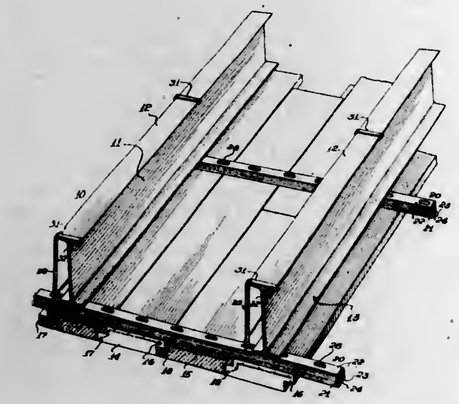
An L-head internal combustion engine, including a cylinder, a head therefor, said head being constructed to have a space in registry with the cylinder, said space being of comparatively small uniform depth, said head having a combustion pocket positioned substantially wholly laterally and above the cylinder, said pocket being deeper than the said space and having unrestricted communication therewith, gas fuel and air intake and exhaust valves at said pocket, the said pocket being otherwise closed, fuel ignition means for the pocket, a piston in the cylinder, said piston in the position of greatest compression thereof entering said space and approaching in comparatively close proximity to the opposed wall of the head, said piston having a recess of substantially uniform depth in the upper end thereof, said recess being adjacent to the combustion pocket, said recess forming with said pocket an unrestricted combustion compartment in the position of greatest compression of the piston, said combustion compartment providing the total volume of space for combustion and being comparatively small for high compression of the fuel and air, said opposed wall of the head having a transverse corner at the junction of said space and the combustion pocket and the intake valve being arranged opposite to said opposed wall and in proximity to said corner for increasing turbulence and mixing of the fuel and air.



1,902,832. MINERAL FEED. PAUL CALDWELL, Quincy, Ill., assignor to Moorman Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed Oct. 29, 1931. Serial No. 571,855. 10 Claims. (Cl. 167—58.)

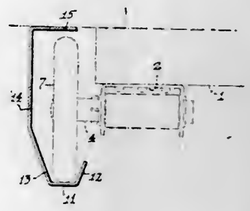
7. A mineral feed for animals, comprising highly porous substantially water insoluble particles of calcined rock phosphate from which substantially all of the fluorine has been removed.

1,902,833. METHOD OF TREATING TEXTILE THREADS. WILLIAM HALE CHARCH, Buffalo, N. Y., assignor to Du Pont Rayon Company, New York, N. Y., a Corporation of Delaware. Filed Apr. 23, 1929. Serial No. 357,608. 2 Claims. (Cl. 8—5.)



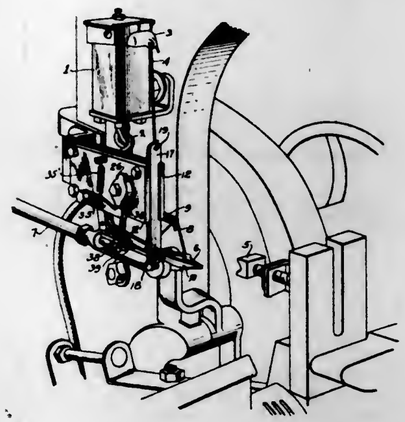
1. In a method of treating artificial thread, the step of subjecting said thread to a nonaqueous composition comprising a thread conditioning compound and a methyl violet base dissolved therein, whereby the thread is simultaneously tinter and conditions, said conditioning compound and color being readily removable.

1,902,834. TAIL-SUPPORTING TRUCK FOR AEROPLANES. CARLO COHEN-VENEZIAN, Turin, Italy. Filed Feb. 25, 1931, Serial No. 518,189, and in Italy Feb. 26, 1930. 3 Claims. (Cl. 280—53.)



1. A two-wheel truck for supporting and shifting an aeroplane tail over the ground, comprising an axle, means for propelling and steering said axle, an aeroplane tail engaging member, means associated with said axle for mounting said member to move along a line substantially parallel with said axle, and spring means also associated with said axle for resiliently restricting said motion of said member in both directions.

1,902,835. CEILING CONSTRUCTION. CHARLES R. BRADSEY, Oak Park, Ill., assignor to The United States Gypsum Co., Chicago, Ill., a Corporation of Illinois. Filed Aug. 9, 1930. Serial No. 474,132. 14 Claims. (Cl. 72—68.)



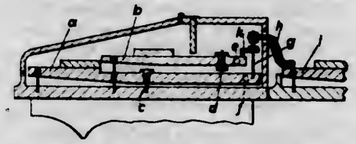
12. A building construction comprising a plurality of spaced, parallel support members, a plurality of relatively thin, elongated, precast slabs of gypsum-like material provided with interlocking edges and supported by said members, said slabs being longer than the spacing between said members so that at least one end of a slab extends beyond a given pair of support members, and being supported largely by cooperative action with adjoining slabs.

1,902,836. ROLLER TRACK. CLARENCE G. JOHNSON, Hartford City, Ind. Original application filed Dec. 1, 1926, Serial No. 151,884, and in Canada Aug. 20, 1928. Divided and this application filed Aug. 12, 1929. Serial No. 385,293. 5 Claims. (Cl. 16—96.)

1. A channel track for a vertical lift door on which a plurality of single roller units are mounted on horizontally-disposed shafts at the vertical margins thereof, which channel comprises a pair of parallel and oppositely-spaced treads between which the rollers at the adjacent margin of the door are disposed to hold the door in vertical position, a web uniting the said treads and positioned at the margin thereof remote from the door, a portion of which web is inclined away from the door to thereby space the web from the rollers in said channel, a wall at the margin adjacent the door leading from one of said treads and inclined toward the door and extending part of the distance toward the opposite tread, the inclined portion of the web and the inclined wall constituting portions of an auxiliary channel for the rollers to guide them during lateral shifting of the door in its vertical movement by contacting the rollers only at a point adjacent the periphery of each.

1,902,837. TIMING DEVICE FOR LOOM STOP MECHANISM. WILLIAM P. CRAIG, Shelby, N. C., assignor of one-half to Cleveland Cloth Mill Company, Shelby, N. C., a Corporation of North Carolina. Filed Mar. 29, 1932. Serial No. 601,861. 7 Claims. (Cl. 139—371.)

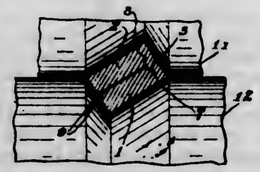
1. A control device for looms having a knock-off lever movable into and out of the path of the lay and a shuttle feeler operable by the exhaustion of weft from the shuttle; comprising an operating member movable into and out of the path of the lay, means operatively connecting said member with the shuttle feeler device in such manner that said member is moved into the path of the lay upon exhaustion of the weft, and selective means connecting the knock-off lever and said operating member whereby the striking of said last mentioned member by the lay will operate after a predetermined number of picks to throw the knock-off lever into the path of the lay.



1,902,838. PROCESS OF ORE FLOTATION AND FLOTATION REAGENT. ORIN D. CUNNINGHAM, Indianapolis, Ind., assignor to Peter C. Reilly, Indianapolis, Ind. Filed Feb. 19, 1931. Serial No. 517,126. 18 Claims. (Cl. 209—166.)

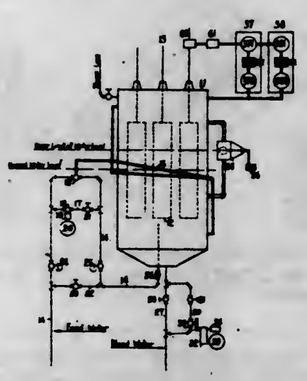
1. A process which comprises floating ore material in the presence of a reaction product of a phosphorus sulfide on an unsaturated fatty acid substance and a phenol-like substance, as herein specified.

1,902,839. PROCESS OF FROTH FLOTATION AND MATERIAL EMPLOYED TO EFFECT THE SAME. ORIN D. CUNNINGHAM, Indianapolis, Ind., assignor to Peter C. Reilly, Indianapolis, Ind. Filed Aug. 3, 1931, Serial No. 554,954. Renewed Nov. 10, 1932. 14 Claims. (Cl. 209—166.)



1. A process which comprises froth flotation of ore material in the presence of a reaction product of a hydrocarbonaceous substance, phosphorus, sulfur, a phenol-like substance and an unsaturated fatty acid compound.

1,902,840. COUPLING DEVICE FOR KEYBOARDS. LEONHARD DEUTSCH, Vienna, Austria. Filed July 15, 1930, Serial No. 468,116, and in Austria July 19, 1929. 4 Claims. (Cl. 84—235.)



2. In a device for increasing the range of a keyboard in a musical instrument, a plurality of rows of keys, each row embracing corresponding successive octaves, corresponding octaves being separated by the space of one octave, and connecting means between corresponding keys of corresponding octaves and the corresponding keys of the instrument keyboard.

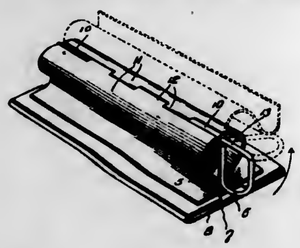
1,902,841. PROCESS OF FORMING NUT BAR FOR THE MANUFACTURE OF GRIP NUTS AND APPARATUS FOR PERFORMING THE SAME. GEORGE C. EASTER, Baltimore, Md., assignor, by mesne assignments, to The Vulcan Steel Products Company, Baltimore, Md., a Corporation of Maryland. Filed July 30, 1928. Serial No. 296,191. 4 Claims. (Cl. 80—60.)

1. The method of forming a nut bar from which individual nuts are adapted to be cut, punched and threaded, which consists in subjecting a bar of metal stock, to successive passes between differently shaped rolls to progressively fold different portions of the bar into superimposed relation, and then subjecting the bar to pressure between rolls to squeese the superimposed portions together to eliminate the space between said portions.

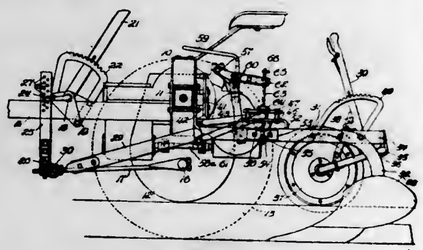
1,902,842. APPARATUS FOR REGULATING ELECTRIC STEAM GENERATORS. MILTON EATON, Shawinigan Falls, Quebec, Canada. Filed Apr. 25, 1930. Serial No. 447,291. 33 Claims. (Cl. 219—40.)

1. Means for regulating electric steam generators to maintain a selected condition of operation substantially constant including, in combination, an electric steam generator; a bleed valve therefor; and control apparatus arranged to open and close said bleed valve in response to variations in the generator steam pressure and generator current input.

1,902,843. BATHING SUIT. ALBERT FERRARI, Drexel Hill, and SIDNEY W. DEVERS, Philadelphia, Pa. Filed May 26, 1930. Serial No. 455,824. 2 Claims. (Cl. 2—67.)



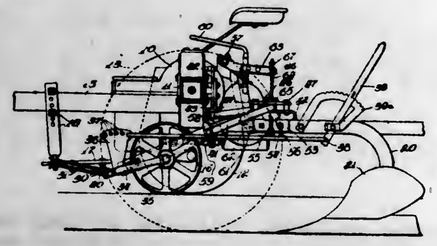
1. A bathing suit comprising a nether garment having a slit formed entirely across the back and curved to continue downwardly along the remote sides of the legs forming a flap having rounnded corners, strips of relatively non-stretchable material reinforcing the edges of the slit, and a sliding closure intimately connecting the margins of the flap and garment throughout the entire extent of the slit.



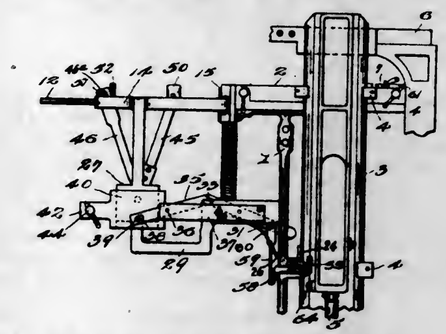
1,902,844. ABRADING, POLISHING, OR LIKE SURFACING TOOL. ALPHONSE FISET, Cambridge, Mass. Filed Mar. 21, 1932. Serial No. 600,330. 5 Claims. (Cl. 51—187.)

2. A tool of the character described comprising a flat base having a rigid upstanding body in the form of a rib, a hinge pin parallel with and journaled in the upper edge

of said body, and combined hand grip forming and sheet clamping members arranged at opposite sides of the body and provided with hinge barrels at their upper edges frictionally receiving said hinge pin, said hinge pin having a projecting end formed to provide a handle for manipulating said members.

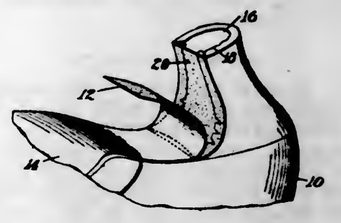


1,902,845. TRACTOR PLOW. WILLIAM S. GRAHAM and ARTHUR D. GALLAGHER, Canton, Ill., assignors to International Harvester Company, a Corporation of New Jersey. Filed Aug. 19, 1931. Serial No. 558,034. 7 Claims. (Cl. 97—50.)



1. The combination with a tractor comprising a rear axle structure, of a plow having a beam extending forwardly below the axle, a vertically adjustable draft connection between the forward end of the beam and the tractor, a vertically adjustable land wheel on the plow beam, and lifting and lowering means on the axle structure connected to the plow beam substantially midway between its ends, said connection including pivots for adjustment of the beam and plow about a longitudinal and a transverse axis.

1,902,846. PLOW ATTACHMENT FOR TRACTORS. WILLIAM S. GRAHAM, Canton, Ill., assignor to International Harvester Company, a Corporation of New Jersey. Filed Sept. 24, 1931. Serial No. 564,823. 6 Claims. (Cl. 97—50.)

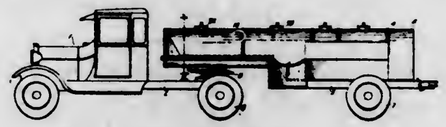


1. The combination with a tractor of a horisontal drawbar carried thereby having a transversely extending portion, a draft element comprising a link having its forward end connected to the transverse portion of the drawbar for movement laterally and vertically and a transverse link pivotally connected to its rear end, a plow beam pivoted on a horisontal axis at its forward end to said transverse link, means carried by the draft element for adjusting the angular relation of said links, a transversely extending stop bar on the drawbar positioned to prevent upward movement of the draft element into the horizontal plane of the drawbar, and a ground engaging support on the forward end of the plow beam.

1,902,847. SLUG CASTING MACHINE. ARCHIE V. GILBERT, Spokane, Wash. Filed Mar. 12, 1931. Serial No. 522,034. 10 Claims. (Cl. 199—50.)

1. In a slug casting machine, the combination of a pair of opposed, relatively movable jaws, duplex means for operating the jaws, means for rendering one of the jaws inactive, actuating means for the operating means, a justification rod and means carried thereby for co-action with the actuating means in centering the jaws, an elevator slide, and means carried by the slide for co-action with the actuating means in re-setting the jaws.

1,902,848. COVERING BREASTS OF HEELS. JOSEPH GOULDBOURN and GEORGE HAZELTON, Leicester, England, assignors to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Jan. 3, 1930, Serial No. 418,372, and in Great Britain Jan. 17, 1929. 12 Claims. (Cl. 12—142.)



1. That improvement in methods of making shoes in which a covering flap is provided upon the sole of the shoe for the breast of the heel attached to said shoe which consists in providing a film of dried glue between said flap and the breast of the heel, directing a jet of steam upon said film to bring it to a tacky condition, applying steam to the outer surface of the covering flap to temper it, and then laying the flap against the breast of the heel.

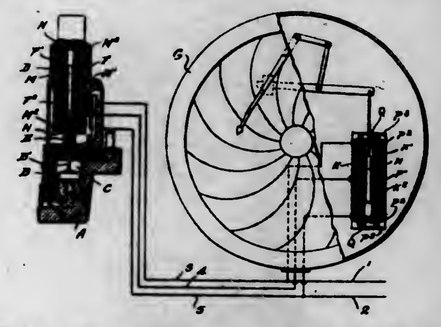
1,902,849. TRAILER TRUCK TANK CONSTRUCTION. OTTO N. GRENDELL, Kansas City, Mo., assignor to Standard Steel Works, North Kansas City, Mo., a Corporation of Missouri. Filed July 8, 1929. Serial No. 376,788. 8 Claims. (Cl. 280—5.)

8. In a device of the character described, a frame including horisontal longitudinal sills having upwardly offset

front portions, and a tank mounted on said frame including a reduced front end portion having a bottom and downwardly extending side walls forming a depending skirt,

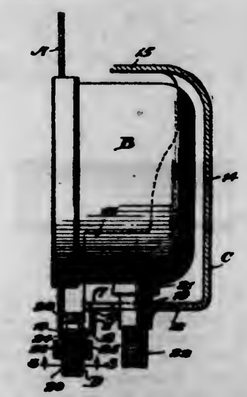
and means including plates secured to said skirt and having edges fixed respectively to the frame and to the bottom for stabilizing the tank.

1,902,850. DENTAL INSTRUMENT. JOHN H. GREENE, Philadelphia, Pa. Filed Mar. 5, 1931, Serial No. 520,863. Renewed Aug. 18, 1932. 3 Claims. (Cl. 32—10.)



1. A dental instrument of the type described comprising a tubular body, the said body having one side thereof substantially shorter than a diametrically opposed side and longitudinally and circumferentially resilient.

1,902,851. OVERSHOT. AUDREY L. HAMPTON, Houston, Tex. Filed Feb. 26, 1932. Serial No. 595,270. 4 Claims. (Cl. 294—102.)

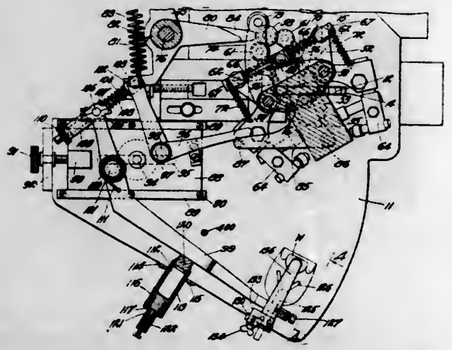


1. An overshot for engaging and pulling a pipe in a well, comprising a tubular body having a downwardly converging inside seat, a tubular slip in said body shaped to surround the pipe and having engaging jaws whose outer surfaces taper downwardly and whose inner surfaces have pipe engaging teeth, a tubular nipple having a threaded connection with said body, said slip and nipple being provided, one with a longitudinal bearing and the other with a flexible arm having a projection which works in said bearing.

1,902,852. METER MECHANISM. THOMAS RANDOLPH HARRISON, Wyncote, Pa., assignor to The Brown Instrument Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Jan. 11, 1929. Serial No. 331,934. 7 Claims. (Cl. 177—351.)

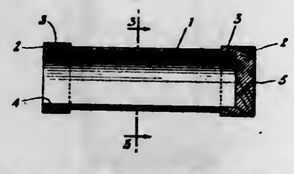
7. An inductance bridge having a pair of axially aligned juxtaposition coils, an armature extending partially into each coil, a magnetic member positioned at the distant ends of each of the coils for increasing the effective measuring stroke of the armature, said member being distortable to balance the bridge.

1,902,853. MEANS TO PREVENT DETACHMENT OF SPEEDOMETER OR DISCONNECTION OF ITS DRIVE MEANS. FRED HENNIG, Pittsburgh, Pa., assignor to Pittsburgh Taximeter Company, Pittsburgh, Pa., a Corporation. Filed July 14, 1931. Serial No. 550,798. 4 Claims. (Cl. 264—1.)



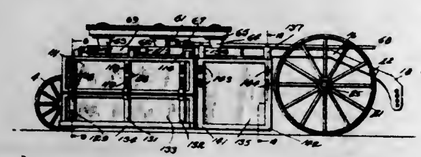
1. In combination, a support having a channel formation, a device mounted on said support, a cover disposed in enclosing relation to the device and provided with a formation seated in the channel formation of the support to hold the cover firmly with respect to the support, and means for fastening the cover to the support.

1,902,854. PROCESS OF MANUFACTURING SUBSTITUTED SECONDARY AMINES OF THE BENZYL-ANILID TYPE. WILHELM HERRMANN, Berlin-Wilmersdorf, and HANS LAUER, Berlin-Friedenau, Germany, assignors, by mesne assignments, to Winthrop Chemical Company, Inc., New York, N. Y., a Corporation of New York. Filed Apr. 13, 1926, Serial No. 101,782, and in Germany Apr. 15, 1925. 4 Claims. (Cl. 260—128.)



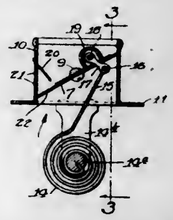
1. The process which comprises reacting on a primary aralkylamine with a nitrochlor benzene compound in which the chlorine is easily exchanged, in an aqueous solution and in the presence of an alkali at a temperature not exceeding the boiling point.

1,902,855. HEEL CONCAVING MACHINE. MERTON W. HOWARD, Lynn, Mass., assignor to Pope Machinery Corporation, Haverhill, Mass., a Corporation of Massachusetts. Filed Dec. 1, 1931. Serial No. 578,251. 10 Claims. (Cl. 12—46.)



1. A machine for concaving heels having, in combination, a cutter, means for holding a heel including a heel clamp, means for moving the heel holding means continuously through a predetermined path which path includes a heel cutting range, a heel ejecting range and a heel loading range, means operative to open said clamp and eject the heel while the heel holding means is moving through the ejecting range, and means to move a heel into said open clamp, and close the clamp while the heel holding means is moving through the heel loading range.

1,902,856. CARRIER FOR PNEUMATIC DISPATCH SYSTEMS. VICTOR H. JACKSON, Metuchen, N. J., assignor to New York Stock Exchange, New York, N. Y. Filed Sept. 2, 1931. Serial No. 560,697. 6 Claims. (Cl. 243—35.)

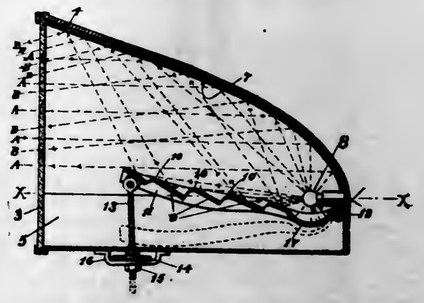


1. A carrier for pneumatic dispatch systems, comprising a substantially cylindrical body portion, enlarged end portions adapted to support the carrier within the tubing of the system, a closure at one end, said end portions and closure being formed integral with said body portion, said carrier being of material which does not retain a permanent deformation when subjected to pressure, and means encircling said end portions to prevent the passage of air around said carrier.

1,902,857. PULVERIZER. CHARLES C. JAMIESON, Jacksonville, Fla. Filed Oct. 28, 1930. Serial No. 491,802. 12 Claims. (Cl. 97—43.)

1. A pulverizer comprising vertically mounted rotating blades, means to direct packed earth into said blades, and means to obstruct passage of the earth through the blades.

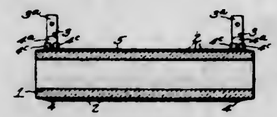
1,902,858. THERMOSTATIC CONTROLLING DEVICE. PETER J. JORGENSEN and CLARENCE H. JORGENSEN, Chicago, Ill. Filed Aug. 2, 1930. Serial No. 472,647. 8 Claims. (Cl. 236—34.)



1. A thermostatic controlling device comprising a valve, a support therefor having a passageway closed by said valve, a thermostatic element connected with said valve for moving said valve in response to variations in temperature, a baffle projecting into said passageway and against which the liquid flowing past the valve while it is being opened strikes said liquid rebounding and striking the valve so as to apply an opening pressure to it.

1,902,859. FOUNTAIN TOOTHBRUSH. RUDOLPH JULIUS JOSEPH, New York, N. Y. Filed Mar. 25, 1931. Serial No. 525,071. 8 Claims. (Cl. 15—137.)

1. A fountain tooth brush comprising a cylindrical container having an open end through which its contents may be removed, a nozzle at the other end provided centrally thereof with a threaded opening, a plunger having a sliding but non-rotatable tight fit in the container, ejecting means for advancing the plunger towards the nozzle, a brush having a back provided with a set of bristles and having an S-shaped shank having a threaded end demountably screwed into the nozzle, said back and shank provided with a passageway extending therethrough in substantially the same general direction and terminating in a straight discharge vent parallel to the length of the back and opening therefrom at the extreme end of the brush beyond the bristles, a manually actuated finger disk for advancing the ejecting rod and thus cause the plunger to advance the contents of the container out through the discharge vent.



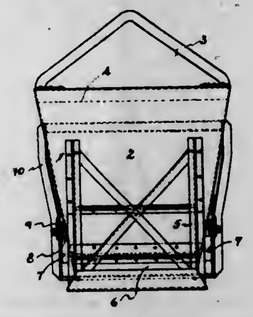
1,902,860. HEADLIGHT. WILLIAM H. KAY and ESKEL MCDANIEL, St. Louis, Mo. Filed Mar. 7, 1932. Serial No. 597,298. 2 Claims. (Cl. 240—41.35)

1. A headlight comprising the upper half of a parabolic reflector, a lamp mounted therein, a casing having a curved top and vertical sides below the horizontal axis which are

connected by a substantially trapezoidal bottom, an auxiliary multifaced reflector of substantially trapezoidal shape corresponding to said bottom and hinged at its straight rear edge for adjustment between said straight sides of the casing, and adjusting means therefor, substantially as described.

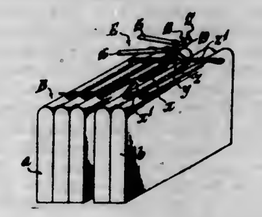
1,902,861. RESISTANCE UNIT. LEONARD KEBLER, Bronxville, N. Y., assignor to Ward Leonard Electric Company, a Corporation of New York. Filed July 19, 1930. Serial No. 469,043. 8 Claims. (Cl. 201—64.)

7. A resistance device comprising a tubular support, a resistive conductor wound thereon, a sheet metal element embracing said support and having enlarged outwardly extending portions, a conductive sheet metal terminal between said outwardly extending portions and extending beyond the same, said sheet metal element having higher tensile strength and a lower coefficient of expansion than the metal of said conductive sheet metal terminal, said resistive conductor being directly mechanically and electrically connected to said conductive sheet metal terminal, and an insulating coating covering said resistive conductor and at least a part of said element.



1,902,862. PRESSURE DRUM. HOWARD J. KERR, Westfield, and GEORGE D. EBERTS, Kenilworth, N. J., assignors to The Babcock & Wilcox Company, Bayonne, N. J., a Corporation of New Jersey. Filed Sept. 27, 1928. Serial No. 308,824. 3 Claims. (Cl. 220—40.)

1. The combination with a container having an opening of a closure arranged to fit within the wall of said opening, an outwardly extending flange on said closure formed so as to lie flush with the surface of the container around said opening, a metal weld closing the seam between said flange and said surface and interlocking flanges on said container and said closure for securing said closure in place.



1,902,863. CONCRETE BUCKET. BERNARD H. KERSTING, Ben Avon, Pa., assignor to The Dravo Contracting Company, a Corporation of Pennsylvania. Filed Aug. 19, 1932. Serial No. 629,435. 3 Claims. (Cl. 294—69.)

1. A bottom-dump bucket provided with opposite walls downwardly inclined to a central discharge orifice, a gate consisting of an upwardly concave closure plate arranged beneath the discharge orifice and pivoted on an axis which intersects the opposite bucket walls and which is eccentric with respect to plate curvature, whereby on the swinging of the plate from closed position its heel rises and its toe descends and at every point it recedes from

the edges of the bucket orifice, the said plate and its heel extending upwardly beyond the horizontal plane in which, when the bucket is new, it meets the bucket wall, whereby compensation for wear is afforded, and the gate continues effective during prolonged use.

1,902,864. METHOD OF AND MECHANISM FOR EXTRACTING INTERCONNECTING THREADS BETWEEN STITCHED BOOKS. OSCAR KLEINSCHMIT, Leipzig-Plagwitz, Germany, assignor to Gebruder Brehmer, Leipzig-Plagwitz, Germany, a Limited Partnership of Germany. Filed Apr. 21, 1932, Serial No. 606,748, and in Germany June 4, 1931. 19 Claims. (Cl. 112—252.)

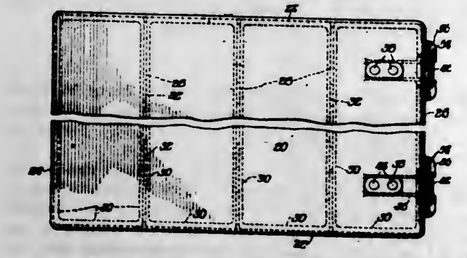
1. A method of extracting the severed interconnecting threads of a stitched book-pad from the loops of the adjacent stitches, which includes positively engaging a looped thread length with a thread-guiding device and thereby guiding the thread length so that by the normal progression of the stitched book-pad the thread length after the severance thereof is caused to withdraw from the adjacent interdepending thread loop.

1,902,865. DRAFTING INSTRUMENT. JOHN V. KOSTER, Los Angeles, Calif., assignor to Eugene Morrison, Los Angeles, Calif. Filed Sept. 8, 1930. Serial No. 480,495. 1 Claim. (Cl. 33—42.)

A drafting instrument comprising a straight handle having a fixed head disposed at right angles to the longitudinal axis thereof and provided with branches of substantially equal length projecting radially from the handle at one end of the latter, a scribing portion extending from one of the branches, and a guiding portion extending from the other of the said branches and disposed in parallelism

with the said scribing portion and being of equal length therewith, whereby the scribing portion is adapted to occupy a perpendicular position during movement of the

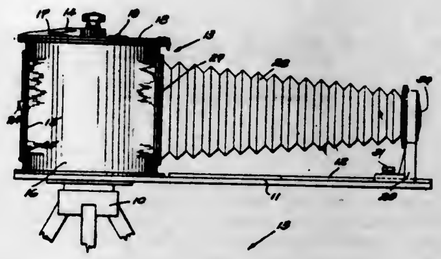
guiding portion over a straight surface of a straight edge and a position where the lower end thereof is in a plane with the lower end of the said guiding portion.



1,902,866. ACETALS OF CYCLIC KETONES WITH POLYHYDRIC ALCOHOLS AND PROCESS OF PREPARING THE SAME. GEORG KRÄNZLEIN, Frankfort-on-the-Main-Hochst, EWALD DICKHÄUSER, Gersthofen near Augsburg, and ARTHUR VOSS, Frankfort-on-the-Main-Hochst, Germany, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Filed Mar. 3, 1932, Serial No. 596,672, and in Germany Mar. 4, 1931. 19 Claims. (Cl. 260—54.)

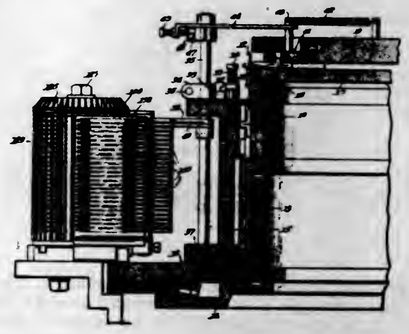
1. The process which comprises causing a cyclic ketone to act upon a polyhydric alcohol containing at least 6 carbon atoms and more than two hydroxy groups united with adjacent carbon atoms.

1,902,867. ALLO-MS-NAPHTHODIANTHRONES. MAX ALBERT KUNZ, Mannheim, and KARL KOEBERLE, Ludwigshafen-on-the-Rhine, Germany, assignors to General Aniline Works, Inc., New York, N. Y., a Corporation of Delaware. Filed Nov. 30, 1929, Serial No. 410,869, and in Germany Dec. 8, 1928. 5 Claims. (Cl. 260—61.)



5. As a new article of manufacture tribromo-allo-ms-naphthodianthrone, which forms an orange red paste and a brown red powder, when dried, crystallizes from organic solvents of high boiling point in needles, dissolves to a green solution in concentrated sulphuric acid and dyes cotton from a violet vat powerful and brilliant scarlet shades.

1,902,868. CAST STEEL BOTTOM DROP DOOR. JOHN A. LAMONT and FREDERICK A. LORENS, Jr., Chicago, Ill., assignors to American Steel Foundries, Chicago, Ill., a Corporation of New Jersey. Filed Apr. 24, 1929. Serial No. 357,630. 36 Claims. (Cl. 105—280.)

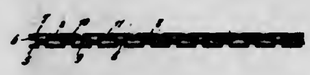


1. In a mechanism of the character described, the combination of a cast drop door provided with stiffening ribs, hinges for attaching the door to a mounting, means for securing the movable hinge elements to the door, and recesses formed within said door for receiving these elements, so designed as to relieve the securing means from stress when the door is in the normally closed position.

1,902,869. ROTATABLE TURRENT CAMERA BACK FOR EXPOSING LIGHT SENSITIVE PHOTOGRAPHIC PLATES. FRED A. LATHE, Oakland, Calif., assignor to Gabriel Moulin, San Francisco, Calif. Filed Aug. 26, 1931. Serial No. 559,439. 4 Claims. (Cl. 95—19.)

1. In a camera the combination of: a lens; bellows communicating with said lens; a turret housing communicating with said bellows; a rotatable turret in said turret housing, said turret being provided with a multiplicity of plate holder receiving openings; and a removable member in the side of said turret housing opposite the side communicating with the bellows.

1,902,870. CONTROLLING MEANS FOR KNITTING MACHINES. NATHAN LEVIN, Trenton, N. J., assignor to H. Brinton Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Aug. 24, 1931. Serial No. 559,077. 24 Claims. (Cl. 66—25.)



1. In a dial and cylinder knitting machine, a knitting head including stationary needle beds, needles therein, revolving needle cams comprising a plurality of sets corresponding to the number of yarn feeds in the machine, a pattern device on a stationary part of the machine adjacent the knitting head, said device having a plurality of operating levels at different heights relative to said knitting head, means revolving with said needle cams including rockarms at different heights on the knitting head said arms being operatively connected to the respected needle cams, and transmitting means between each rockarm and an individual operating level of said pattern device.

1,902,871. REENFORCED VULCANIZED RUBBER ARTICLES AND PROCESS OF MAKING THE SAME. GEORGE R. LOCKHART, Providence, R. I., assignor to Manville Jenckes Company, Pawtucket, R. I., a Corporation of Rhode Island. Filed May 18, 1929. Serial No. 364,322. 6 Claims. (Cl. 18—54.)

3. The process of manufacturing viscose rayon thread which comprises washing the thread to remove the injurious acids and subjecting the thread to the action of formaldehyde while in the undesulphurized condition.

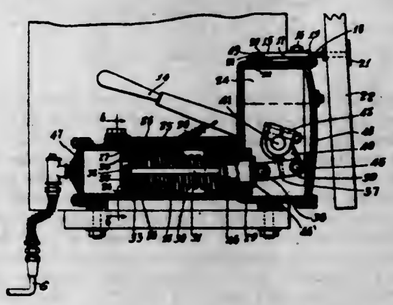
1,902,872. ROOFING. LEONARD F. LONG, Montreal, Quebec, Canada, assignor to The Barrett Company, New York, N. Y., a Corporation of New Jersey. Filed Dec. 22, 1928. Serial No. 327,839. 5 Claims. (Cl. 154—51.)

1. As an article of manufacture, a sheet of roofing material comprising a plurality of superimposed felt sheets, at least one of which is formed with projections forming pockets for the reception of coating material and extending toward an adjacent sheet so that the space between the surfaces of the projections and the overlying portions of the adjacent sheet is of less extent than the space between the recesses intervening said projections and the overlying portions of the adjacent sheet, a heavy coating of bituminous material being provided between the sheet having projections and the adjacent sheet and filling said intervening recesses.

1,902,873. CHAIN CONVEYING APPARATUS. ALFREDO MARONE, Santa Vittoria d'Alba, Italy. Filed May 28, 1930, Serial No. 456,414, and in Italy June 17, 1929. 1 Claim. (Cl. 198—189.)

In an endless conveyor, in combination with an endless chain with interlocked rings carrying means for conveying the articles, a tubular guide having a triangular cross section and a longitudinal slot substantially on the axis of one of the sides of the triangle, said guide closely embracing alternate chain rings, the outer rings partly engaging said slot, so as to prevent lateral displacements of the chain in the tubular guide during its travel in said guide.

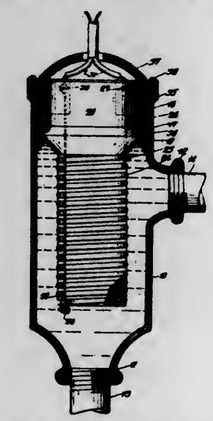
1,902,874. DUST PROTECTOR DEVICE. JOHN F. MARTIN, Springfield, Mass., assignor to United American Bosch Corporation, Springfield, Mass., a Corporation of New York. Filed Feb. 26, 1931. Serial No. 518,482. 5 Claims. (Cl. 286—5.)



1. A protective device for apparatus arranged in an enclosing casing, with a rotary shaft entering the casing to drive said apparatus, said device including a member on the shaft and an element affixed within the casing adjacent one end and encircling said member adjacent the opposite end to be put under stress when the shaft revolves to cause the member to engage the shaft tightly and seal said casing.

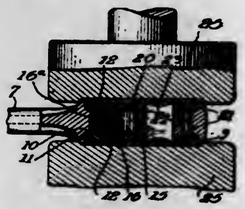
1,902,875. PLOT MARKER. RALPH R. MASON, Pittsburgh, Pa. Filed Mar. 11, 1931. Serial No. 521,678. 2 Claims. (Cl. 189—21.3.)

1. A plot marker formed as a single metallic driving piece comprising a shank formed of intersecting ground engaging webs, a flattened marker head on said shank disposed at right angles to the longitudinal axis of the shank, one of said intersecting webs extended terminally to form a plane ground penetrating and engaging member with a penetrating edge lying at right angles to the longitudinal axis of the shank and extending in opposed directions outwardly from the shank, said member being of substantial depth throughout its lateral extent to present terminally disposed surfaces of relatively great area resisting turning movement of the marker when driven.



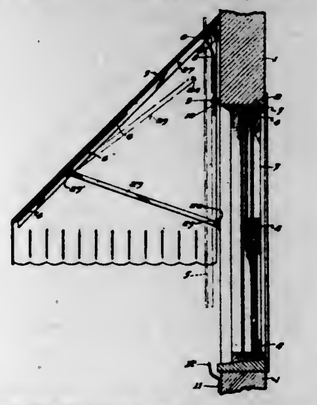
1,902,876. TANK TRUCK EMERGENCY VALVE SYSTEM AND CONTROLLER. JOSEPH H. MCEACHERN, San Francisco, Calif., assignor to Standard Oil Company of California, San Francisco, Calif., a Corporation of Delaware. Original application filed Nov. 4, 1924, Serial No. 747,784. Divided and this application filed July 19, 1926. Serial No. 123,330. 7 Claims. (Cl. 60—54.5.)

7. In a hydraulic control system including hydraulic bellows for actuating parts in the system, the combination of pipes carrying liquid under pressure, a cylinder connected with the pipes, a piston having a forward head freely movable in the cylinder and having a rear head freely movable in the cylinder, a spring located between the said heads, a rod connecting said heads and limiting the separation of said heads by the spring, said rod being capable of a relatively sliding movement with respect



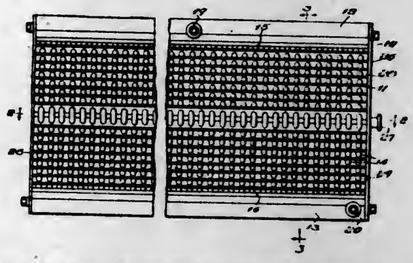
to the rear head when the same is moved forwardly, and means for forcing the rear head forwardly to apply pressure to liquid in the cylinder, said spring operating to limit said pressure.

1,902,877. ELECTRIC FLUID HEATER. WALTER J. BAKER, Wyckoff, N. J. Filed Sept. 18, 1931. Serial No. 563,600. 5 Claims. (Cl. 219—39.)



1. An electric fluid heater comprising an outer casing having a fluid inlet and a fluid outlet, an internal flange extending around said casing, a heating element, an enlarged annular portion on said heating element for engagement with said flange, and means having threaded engagement with said outer casing for securing said heating element in engagement with said flange.

1,902,878. RATCHET WRENCH. NORRIS F. MCNAUGHT and EDWARD H. PETERSON, Chicago, Ill., assignors to Duro Metal Products Company, Chicago, Ill., a Corporation of Illinois. Filed June 16, 1932. Serial No. 617,522. 1 Claim. (Cl. 81—61.)

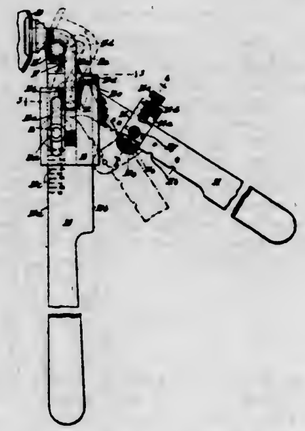


A ratchet wrench comprising a handle member having an opening extending through it at the end thereof for the reception of a socket-ratchet member, a pawl and a spring bearing thereagainst, flanges on each side of the handle member extending in opposite directions and circumscribing said opening, seats occupying parallel planes within the confines of the respective flanges and extending between said opening and the bases of said flanges, side plates resting against said seats and accurately lying within the embrace of said flanges, the thickness of said side plates being less than the height of said respective flanges, a socket ratchet occupying said opening and confined therein by said side plates for coaction with said pawl, said socket ratchet having cylindrical extremities, said side plates having opposed, aligned circular apertures which receive and constitute bearings for the cylindrical extremities of the socket-ratchet member, the outer edges of said flanges in the finished article overhanging and contacting the outer margins of said side plates firmly and permanently to retain the several parts of the wrench in assembled relation.

1,902,879. COMBINED AWNING AND SHUTTER. CHARLES F. MILLER, Miami, Fla. Filed Nov. 18, 1929. Serial No. 408,045. 15 Claims. (Cl. 20—59.)

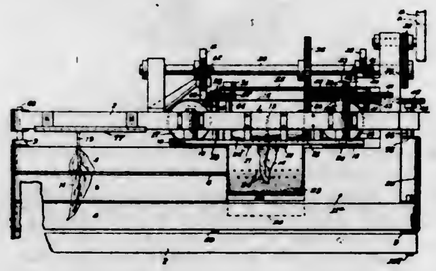
1. A protective device for a window opening of a building involving a rigid member adapted to be disposed in a substantially vertical position to serve as a shutter for the opening and adapted to be moved bodily upward into an elevated and downwardly inclined position above said opening to serve as an awning for the latter, means secured to the building wall for supporting said rigid member in vertical position, means secured to the building wall above the said first-named means engageable with said rigid member to support the latter in elevated position, and members adapted to be interposed between the building and rigid member for maintaining the latter in an inclined position.

1,902,880. RADIATOR. ARTHUR B. MODINE, Racine, Wis., assignor to Modine Manufacturing Company, Racine, Wis., a Corporation of Wisconsin. Original application filed Mar. 25, 1927, Serial No. 178,491. Divided and this application filed May 8, 1930. Serial No. 450,729. 9 Claims. (Cl. 257—136.)



1. In a heat exchange device, the combination of a plurality of vertical spaced tubes, headers arranged at the opposite ends of said tubes and providing means connecting said tubes, a casing extending from one header to the other, a plurality of spaced fins in contact with said tubes arranged transversely of said tubes and at an angle to the vertical, said fins being arranged in sets, the fins of one set being disposed at an angle to the fins of another set and providing means for heating and inducing the directing of air into and out of said casing.

1,902,881. VALVE BENDING TOOL. GERRY A. MORGAN, Garden City, N. Y., assignor to A. Schrader's Son, Incorporated, Brooklyn, N. Y., a Corporation of New York. Filed Sept. 10, 1930. Serial No. 480,858. 6 Claims. (Cl. 81—15.)

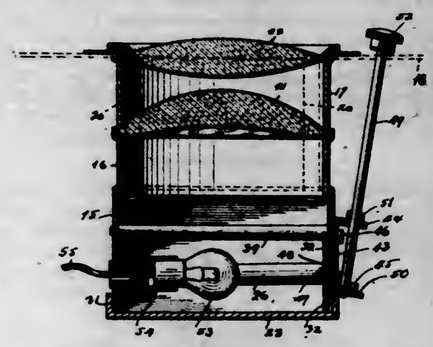


1. A tire valve bending tool comprising a pair of pivotally connected arms, a slide-block longitudinally adjustable

on one of said arms, said slide-block having a socket for receiving the inflating end of a valve stem and a curved surface over which said valve stem can be bent, and means

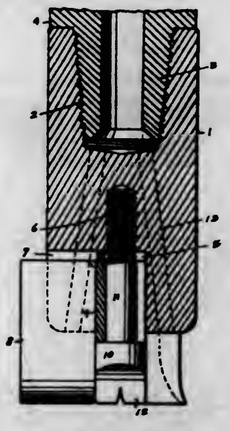
on the other of said arms for engaging the valve stem to bend it over said curved surface as the pivoted arms are moved relatively to each other.

1,902,882. TOBACCO LEAF STEMMING AND STRAIGHTENING MACHINE. JOHN O. MORRIS, deceased, Washington, D. C., by Carrie B. Morris, administratrix, Washington, D. C., assignor, by mesne assignments, to Tobacco Stemming Corporation, Dover, Del., a Corporation of Delaware. Continuation of application Serial No. 693,184, filed Feb. 16, 1924. This application filed Nov. 24, 1926. Serial No. 150,591. 13 Claims. (Cl. 131—57.)



1. A tobacco stemming machine including intermittently operated stem gripping means, continuously operated stemming rolls and intermittently operated suction means to convey the stemmed leaf away from said gripping means, said rolls and suction means being arranged on opposite sides of the gripping means.

1,902,883. PRODUCTION OF VAT DYESTUFFS OF THE DIBENZANTHRONE SERIES. PAUL NAWIASKY, Ludwigshafen-on-the-Rhine, and JULIUS MUELLER, Mannheim, Germany, assignors to General Aniline Works, Inc., New York, N. Y., a Corporation of Delaware. Original application filed Sept. 22, 1926, Serial No. 221,396, and in Great Britain Feb. 14, 1927. Divided and this application filed Aug. 4, 1928. Serial No. 297,551. 2 Claims. (Cl. 260—29.)

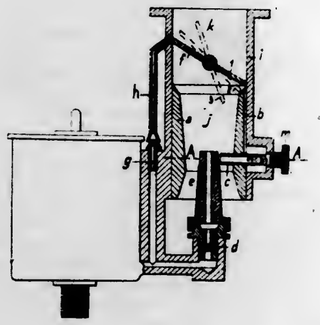


1. The process of producing a new valuable brown vat dyestuff which comprises treating with an oxidising agent the vat dyestuff obtainable by treating in an alcoholic caustic potash melt at between 120 and 200° C. aminobensanthrone, which is derived from the nitrobensanthrone obtainable by treating bensanthrone with nitric acid in boiling glacial acetic acid.

1,902,884. MAP DISPLAY DEVICE FOR MOTOR VEHICLES. WALTER WAGNER, Park Ridge, Ill. Filed Nov. 9, 1931. Serial No. 574,013. 9 Claims. (Cl. 40—95.)

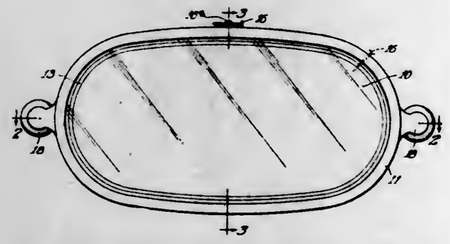
1. In a map display device of the character described, a casing, magnifying lenses set into one end of the casing, a pair of map drums journaled in the casing below the lenses with the strip run of the map traversing the lenses, illuminating means in the casing inwardly of the strip run, gear connections between the map drums and operating means for the gear connections disposed exteriorly of the casing, and including a bracket plate on the outer side of the casing having angle arms, a shaft journaled in said angle arms, a gear on said shaft and said casing having an opening therein through which the last named gear extends for communication with the gear connections between the map drums.

1,902,885. DRILL. JEDDY D. NIXON, Houston, Tex. Filed June 29, 1931. Serial No. 547,609. 5 Claims. (Cl. 255—61.)



1. A drill including a head, detachable blades therein said head having downwardly flared slots and said blades having upwardly tapered portions in said slots, arcuate tenons on the inner margins of the blades, a center drill engageable against the lower ends of said tenons and having a shaft fitted between, and surrounded by the tenons which has a threaded connection with said head, said center drill being turnable, relative to the head during drilling operations, to exert a pressure against said blade tenons.

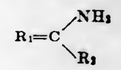
1,902,886. PREPARED FUEL AND METHOD OF PRODUCING IT. BENJAMIN F. J. ODELL, Chicago, Ill. Filed Jan. 9, 1931. Serial No. 507,762. 5 Claims. (Cl. 44—6.)



1. The method of producing a prepared fuel, comprising spraying on the surface of a solid fuel an atomized emulsified mixture of water, and an oil-like material comprised only of components boiling at temperatures above those of benzol and naphthalene, the amount of said oil-like material in the emulsion being 20 to 50 per cent.

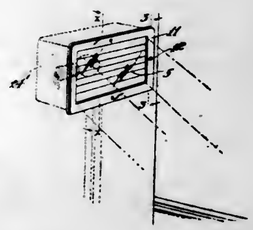
1,902,887. CARBURETOR. RENÉ OPPENHEIM, Gennevilliers, France, assignor to Société Anonyme le Carbone, Gennevilliers, France. Filed Dec. 30, 1930, Serial No. 505,541, and in France Jan. 7, 1930. 4 Claims. (Cl. 261—41.)

1. A carburetor including the combination of two nozzles, one of which is for slow speed and the other nozzle for normal speed, a porous hollow body associated with the normal speed nozzle and forming the terminus thereof, a conduit for the slow speed nozzle, an auxiliary conduit terminating at one end in the vicinity of the normal speed nozzle and a controllable valve for opening and closing the other end of said auxiliary conduit at will.



1,902,888. FROST ELIMINATOR FOR VEHICLES. HERMAN PAQUETTE, Chicago, Ill. Filed Oct. 26, 1931. Serial No. 571,194. 3 Claims. (Cl. 20—40.5.)

1. A device of the class described comprising a panel formed of transparent material adapted to be secured to a window in spaced parallel relation thereto, a frame surrounding the marginal edges of said panel and secured thereto, a continuous resilient flange extending rearwardly from the frame and adapted to be pressed against the window upon applying the device to the latter, and means operable upon pressing the flange against the window to permit the air in the space defined by the flange to escape.

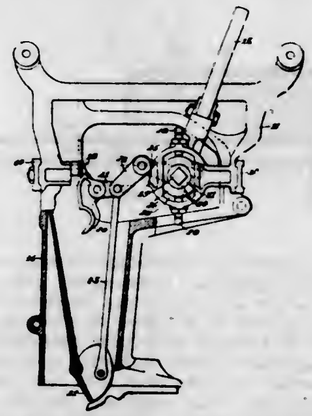


1,902,889. UREA CONDENSATION PRODUCTS AND PROCESS OF MAKING THEM. MAX PAQUIN, Konigstein-on-Taunus, Germany, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany, a Corporation of Germany. Original application filed Sept. 30, 1927, Serial No. 223,232, and in Germany Oct. 4, 1926. Divided and this application filed Aug. 31, 1928. Serial No. 303,368. 12 Claims. (Cl. 260—2.)

1. The process of preparing condensation products, which comprises causing to act upon each other at a temperature between about 0 and about 300° C. an amidocarbonic acid derivative of the following constitution:

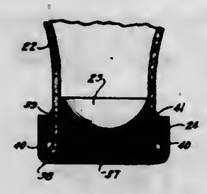
wherein R_1 stands for oxygen or sulfur and R_2 for NH_2, NH-acyl, °-alkyl or °-aryl and an excess of a compound containing an alcoholic hydroxy group and a metal selected from the group consisting of the alkaline and alkali-earth metals, zinc and cadmium.

1,902,890. WALL FIXTURE. RICHARD O. PFEIFFER, Newark, N. J. Filed June 8, 1931. Serial No. 542,893. 8 Claims. (Cl. 240—73.)



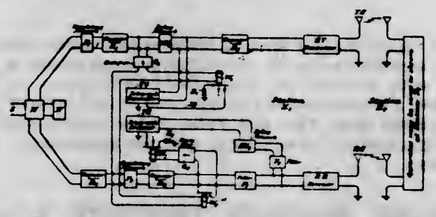
1. In a device of the character described, a base member provided with an upstanding bracket having a series of spaced apertures, a strip removably secured to said base member opposite said bracket and provided with aligned apertures, and a plurality of louvers provided with reduced ends loosely passing through the apertured portions of said bracket and strip, and a fulcrum plate provided with apertures, said louvers being further provided with fulcrum pins extending beyond said bracket and loosely passing through the apertures in the fulcrum plate, said bracket having a series of spaced recessed portions to receive the fulcrum pins when the louvers are moved to their closed position.

1,902,891. CHECK ROW PLANTER. JAMES H. PINSON, Richmond, Ind., assignor to International Harvester Company, a Corporation of New Jersey. Filed Jan. 14, 1931. Serial No. 508,735. 4 Claims. (Cl. 111—38.)



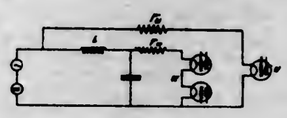
1. In a grain planter a frame structure, seed dispensing means mounted thereon at laterally spaced locations, seed depositing means extending downwardly from the dispensing means, each of the depositing means comprising a boot formed with a seed passage therethrough, a discharge valve controlling said seed passage, an actuating

link extending upwardly from the valve, a check row rock shaft mounted transversely of the frame structure, lever arms joining each of the valve actuating links to



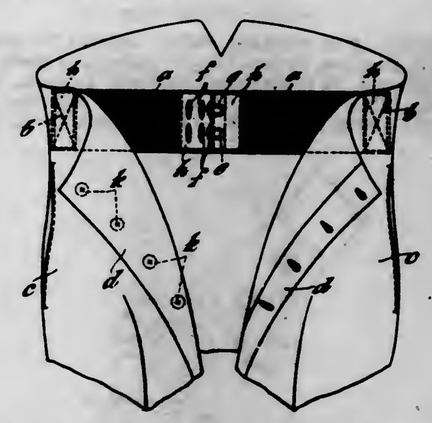
the rock shaft, and means for vertically adjusting the ends of the rock shaft with respect to the frame structure whereby the discharge timing of the valves is altered.

1,902,892. BOTTLE STOPPER AND FLASK CONNECTER. FRANCIS M. POTTENGER, JR., Monrovia, and EDWIN G. HOUSE, Los Angeles, Calif. Filed Aug. 29, 1931. Serial No. 560,072. 6 Claims. (Cl. 215—41.)



1. The combination with a bottle of: a rubber plug inserted in the mouth of the bottle; a rubber skirt integral with the plug and rolled over the rim of the bottle; and two spaced, divergent, annular flanges integral with the skirt embracing the bottle neck, the two flanges forming with the skirt and bottle neck a vacuum-sustaining annular space.

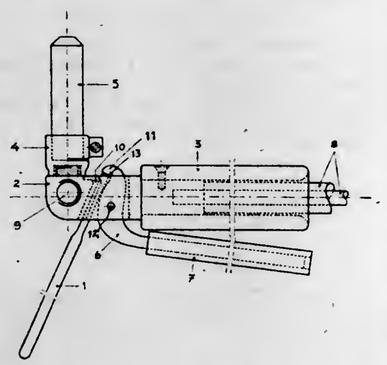
1,902,893. SIGNALING SYSTEM. RALPH K. POTTER, New York, N. Y., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed Mar. 1, 1928, Serial No. 258,378. Renewed May 27, 1929. 6 Claims. (Cl. 250—9.)



1. A radio signaling station comprising a voice frequency circuit including a hybrid coil and a balancing network, said voice frequency circuit being capable of transmitting and receiving voice frequency signals without distortion, a telegraph transmitter for generating telegraph signals, a telegraph receiver for receiving telegraph signals, a transmitting radio antenna, a receiving radio antenna, a radio transmitter including a source of current of high frequency upon which the signals to be transmitted through said radio transmitter may become modulated, a radio receiver including a similar source of current of high frequency for demodulating signals received through said receiving radio antenna, automatic means to prevent the telegraph transmitter from generating telegraph signals when voice frequency signals are being transmitted through said voice frequency circuit, and automatic means including a rectifier and a relay responsive to received voice frequency signals to prevent the telegraph receiver from receiving telegraph signals when the receiving antenna is receiving modulated voice frequency signals.

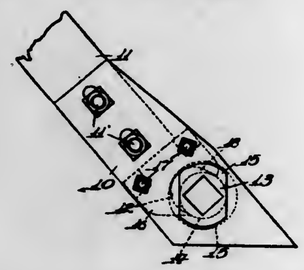
1,902,894. CURRENT SOURCES. RUDOLF RECHNITZER, Berlin, Germany, assignor to Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H., Berlin, Germany, a Corporation of Germany., Filed Nov. 14, 1929, Serial No. 407,097, and in Germany Nov. 8, 1928. 4 Claims. (Cl. 250—27.)

1. In apparatus for supplying the filaments of thermionic tubes having different amplification factors, a source of pulsating direct current, means for connecting the filaments of the high amplication tubes in series through an inductance and resistance with said source, and means for connecting the remaining tube filaments through said resistance in series with said source.



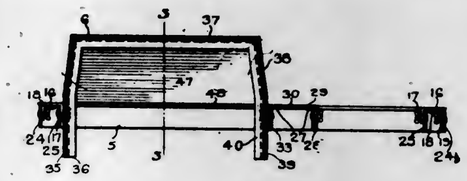
1,902,895. SUPPORTING MEANS FOR TROUSERS AND THE LIKE. FREDERICK JOSEPH CHARLES SMITH, London, England, assignor to Tenova Limited, London, England, a British Company. Filed Nov. 19, 1932, Serial No. 643,483, and in Great Britain Oct. 30, 1931. 2 Claims. (Cl. 2—287.)

1. A supporting means for trousers and like garments provided with usual complementary front fastening devices, said supporting means comprising aligned bands having elastic sections, each band being provided at its outer end with a reinforcing tab of substantially non-elastic material and said tabs being adapted for permanent securement to the garment and within the waist band thereof at about the wearer's hips, the inner meeting ends of said bands being provided with a series of complemen-



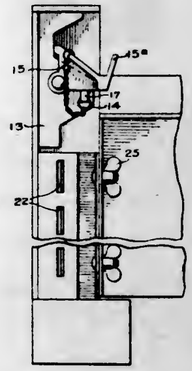
tary detachable fasteners whereby the effective length of the bands may be adjusted, said bands, when fastened as aforesaid, extending across the abdomen of the wearer and acting as a support therefor, and the bands being otherwise unattached to the garment whereby the front fastening devices thereof may be undone independently of the supporting means and without affecting the support provided the garment by said supporting means.

1,902,896. DEVICE FOR THE ELECTROTHERMIC TREATMENT OF METALS. WILLIAM SCHABELITZ, Lucerne, Switzerland. Filed Feb. 27, 1931, Serial No. 518,875, and in Switzerland Feb. 28, 1930. 1 Claim. (Cl. 219—8.)



An electrical soldering or welding device comprising an insulated handle having a head provided with sockets at a right angle to each other, said sockets being each constructed to hold a preheating electrode, said head being also constructed with an opening for holding a welding electrode, and means for clamping said electrodes to said head, said clamping means for the preheating electrode consisting of a clamping sleeve fitting either of said sockets, and said clamping means for the welding electrode consisting of a cam lever.

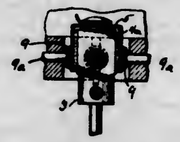
1,902,897. ROD WEEDER SHOE. CHARLES W. ROBINSON, Hamilton, Ontario, Canada, assignor, by mesne assignments, to International Harvester Company, Chicago, Ill., a Corporation of New Jersey. Filed Dec. 18, 1931. Serial No. 581,828. 4 Claims. (Cl. 97—42.)



1. A rod weeder shoe comprising a flat thin shoe member substantially uniform in thickness, a transverse opening formed therein, a rotatable journal member extending through said opening, said shoe member forming a narrow bearing surface at the front of said journal member, and a bearing member removably supported on the shoe member and presenting a wide bearing surface at the rear of the journal member.

1,902,898. APPARATUS FOR FORMING CONCRETE FLOORS. HENRY W. ROOS, Cincinnati, Ohio. Filed Mar. 13, 1930. Serial No. 435,466. 2 Claims. (Cl. 25—131.5.)

2. A unit form for concrete floor molds comprising a substantially rectangular frame having a pair of openings therein and cut away at its corners to engage the sides of shore tops in the plane of which the frame is adapted to be mounted, said frame comprising side and end members and a bridge connecting said end members and separating the openings of said pair, each of said side members and bridge comprising two parts, a downwardly projecting flange on the outer side of each part of said side members, a plurality of brackets on the side members of one of said parts having downwardly projecting flanges spaced inwardly from said first mentioned flanges, bars secured to and between the flanges on said brackets and side member and projecting therefrom to overlap and engage the flanges on the side members of the other part of the frame, and means for securing said bars to said flanges on the other part for retaining the parts of the frame in adjusted position.

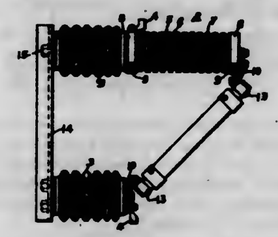


1,902,899. APPARATUS FOR FORMING CONCRETE FLOORS. HENRY W. ROOS, Cincinnati, Ohio. Filed Mar. 13, 1930. Serial No. 435,468. 8 Claims. (Cl. 25—131.5.)

1. Apparatus for forming concrete floor molds, comprising a shore having an upright support comprising a pair of walls arranged at substantially right angles to each other, a top secured to the upper end of said support with its edges flush with said walls, and a bracket mounted on the support between said walls for supporting a floor form.

1,902,900. ELECTRICAL PHONOGRAPH PICK-UP. SAMUEL RUBEN, New Rochelle, N. Y. Filed Oct. 24, 1930. Serial No. 490,903. 14 Claims. (Cl. 179—100.4.)

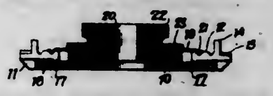
1. A phonograph pick-up comprising a vibratory stylus and a pressure sensitive electrode composed of vanadium pentoxide, said electrode constituting a part of an electrical circuit and said stylus being adapted to vary the



pressure on said electrode in accordance with mechanically recorded vibrations to translate the latter into electrical undulations in the electrical circuit.

1,902,901. ELECTRICAL STUNNING DEVICE. HENRY DELANO TEFFT, Chicago, Ill. Filed Jan. 21, 1932. Serial No. 588,015. 5 Claims. (Cl. 175—265.)

1. A device for stunning animals electrically, comprising an operating handle, an arcuated skull engaging electrode on the handle, and a movable forehead engaging electrode on the handle.



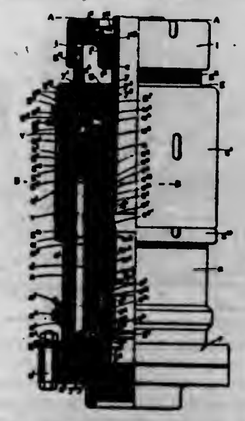
1,902,902. COMBINATION FUSE AND CURRENT LIMITING RESISTOR. JEROME SANDIN, East Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed June 16, 1928. Serial No. 285,799. 13 Claims. (Cl. 201—63.)

1. A fuse structure comprising a fuse, a pair of insulating supports therefor and a resistor in series with the fuse and mounted coaxial with one of said supports.

12. The combination with a fuse of a pair of insulating supports therefor, a resistor having an insulating body separate from said fuse and supported solely from one of said insulating supports and electrically connected in series with said fuse and said fuse being removable from said pair of insulating supports independently of said resistor.

1,902,903. DESIGN WHEEL. JOSEPH J. SANDERS, Philadelphia, Pa., assignor to H. Brinton Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed July 8, 1931. Serial No. 549,558. 2 Claims. (Cl. 66—50.)

1. In a design wheel, a body member having radially extending slots in a side face thereof, inserts in said slots movable into an outer active position or an inner inactive position, a resilient disk bearing on the inner ends of said inserts, and rigid means for holding the disk in place.

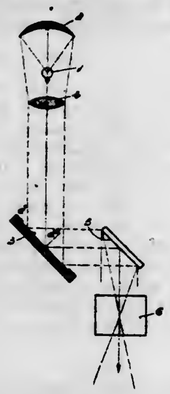


1,902,904. PROCESS FOR PREPARING THYMOL. KARL SCHÖLLKOPF, Dusseldorf-Oberkassel, and ARTHUR SERINI, Dusseldorf-Heerdt, Germany, assignors to Rheinische Kampfer-Fabrik Gesellschaft mit beschrankter Haftung, Dusseldorf-Oberkassel, Germany, a German Company. Filed Jan. 5, 1931, Serial No. 506,747, and in Germany Oct. 12, 1927. 11 Claims. (Cl. 260—154.)

1. A process for preparing thymol (5-hydroxy-1-methyl-4-isopropyl-benzene) which consists in causing propane derivatives in which one hydrogen atom of propane is substituted by a negative group to react with m-cresol at temperatures from 100° C. to 400° C. and subjecting the reaction product obtained to fractional distillation.

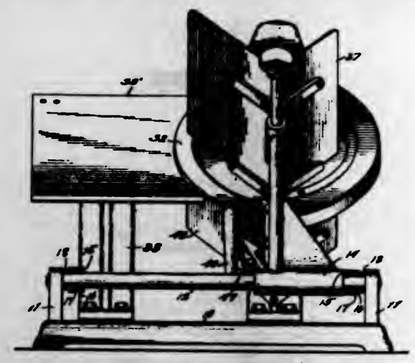
1,902,905. PROCESS OF WORKING MAGNESIUM AND HIGH PERCENTAGE MAGNESIUM ALLOYS BY ROLLING. GUSTAV SCHREIBER, Bitterfeld, Germany, assignor, by mesne assignments, to Magnesium Development Corporation, a Corporation of Delaware. Filed Dec. 10, 1931, Serial No. 580,220, and in Germany Dec. 16, 1930. 6 Claims. (Cl. 148—21.3.)

1. A process of producing rolled articles from magnesium and high percentage magnesium alloys, which comprises subjecting the metal as cast to a plastic deformation by the application of specific pressures which are moderate as compared with those exercised by a rolling mill, and which act on a considerable portion of the boundary surfaces of the cast metal, and then rolling such deformed metal.



1,902,906. CASING HEAD EQUIPMENT. LEWIS MERVYN CECIL SEAMARK, Outer Down, Chagford, England. Filed Sept. 3, 1931, Serial No. 560,998, and in Great Britain Aug. 12, 1931. 20 Claims. (Cl. 166—14.)

1. A casing head equipment comprising a stationary casing, a rotor within the said casing, a packing device within the said roter and adapted to be contracted under



pressure externally applied, means for the application of pressure externally to the said packing device, jointing faces on parts of the said rotor, packers for the said jointing faces, and means to render the said packers accessible to the pressure applied externally to the said packing device.

1,902,907. EPISCOPIC PROJECTOR. CHRISTIAN SEMENITZ, Berlin, Charlottenburg, Germany, assignor to Reinhold Kupfer, Berlin, Germany. Filed July 22, 1931, Serial No. 552,471, and in Germany July 23, 1930. 2 Claims. (Cl. 88—24.)

1. A device for recording or reproducing pictures applied upon a non-transparent image band having a reflecting surface, comprising a source of light, a support for the image band and a mirror of reflection, said elements being so disposed that the light rays fall at an angle of less than 25° on the surface of the image band and are reflected by said image band at an angle of equal value, the reflecting surface of the image band being so highly polished that the surface acts as a mirror which reflects substantially all the rays falling on the image at the said small angle, at an angle of reflection of about the same value.

1,902,908. CUSHIONING DEVICE FOR SLICING MACHINES. ANTON C. SENSOW, La Porte, Ind., assignor to U. S. Slicing Machine Company, La Porte, Ind., a Corporation of Indiana. Filed Jan. 28, 1928. Serial No. 250,101. 4 Claims. (Cl. 146—102.)

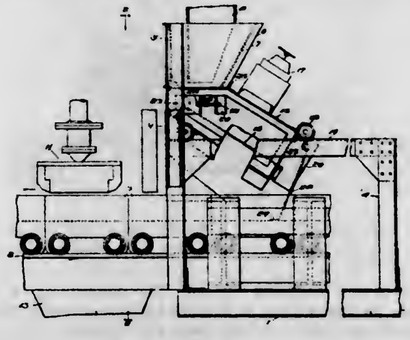
1. In a slicing machine having a slicing knife and a work support, a slide rod upon which said work support is slidably mounted for reciprocation past the edge of said knife, said work support having oppositely directed recesses therein, a spring in each of said recesses, an abutment member against which one end of each spring bears,

stationary contact members, said abutment members each having a contact face adapted to engage one of said contact members at the end of each reciprocative movement to compress said springs and yieldingly retard the motion of said work support, one of said contact members being adjustably mounted on said slide rod to vary the length of the path of reciprocative movement of said work support.

1,902,909. DIESTOCK. VERNON L. WHEELER, Sault Ste. Marie, Mich. Filed Mar. 25, 1932. Serial No. 601,218. 1 Claim. (Cl. 10—128.)

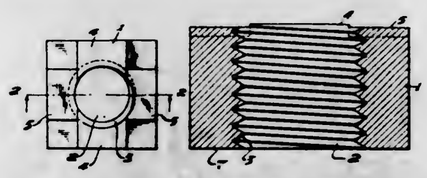
A die stock comprising a socket forming a ring-shaped part having an internal flange spaced from its outer end forming a seat for a die placed in the socket part, a screw passing through a portion of the wall of the ring-shaped part for engaging a die placed in the socket part, a pair of opposed legs each having one end connected to an edge portion of the ring-shaped part, said legs converging upwardly and having straight parallel parts at their upper ends, and a tubular part having its lower edge connected to the upper ends of said legs, the bore of said tubular part being adapted to receive a handle or a member for knocking the die from the ring-shaped part and said bore and that portion of the handle received therein being of non-circular shape in cross section, said tubular part being formed integrally with the upper ends of the legs and having its exterior walls tapering upwardly.

1,902,910. ANTIFRICTION WHEEL AND AXLE CONSTRUCTION. ALFRED H. OELKERS, Chicago, Ill., assignor to American Steel Foundries, Chicago, Ill., a Corporation of New Jersey. Filed Apr. 11, 1927. Serial No. 182,734. 78 Claims. (Cl. 295—36.)



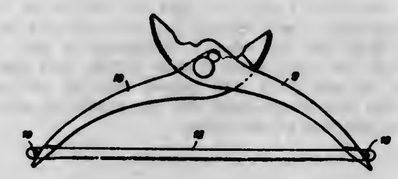
1. A railroad car axle construction comprising a tubular axle, and wheels fixed on the ends thereof, said axle being constructed to selectively receive anti-friction bearings at its ends and a stationary axle therethrough supported within said bearings, or a journal bearing member in fixed relation with said tubular axle.

1,902,911. SINTERING MACHINE. EDWARD W. SHALLOCK, Chicago, Ill., assignor to American Ore Reclamation Company, Chicago, Ill., a Corporation of New York. Filed Mar. 21, 1930. Serial No. 437,649. 7 Claims. (Cl. 266—21.)



1. In a continuously operating sintering machine, a screen, pallets travelling in one direction beneath the screen, said screen being inclined downwardly and contra to the direction of travel of the pallets, said pallets having

grates for reception of material to be sintered and the space beneath the screen and between the underface thereof and the pallet grates being unobstructed, and means for

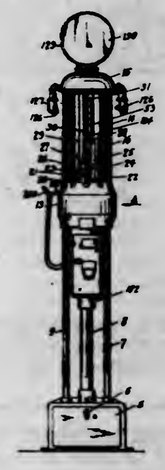


delivering upon the upper face of the screen and adjacent the upper end thereof material to be sintered and including both fines and aggregates.

1,902,912. LOCK NUT AND PROCESS OF MAKING. WILLIAM E. SHARP, Chicago, Ill. Filed Mar. 5, 1930. Serial No. 433,373. 14 Claims. (Cl. 151—21.)

1. The process of making a lock nut, comprising forming a blank with a ridge extending across one face thereof and intersected by the bolt hole, and another ridge angularly disposed with respect to the first ridge, intersected by the bolt hole, and with its top face at a different elevation, forming a thread in said nut, and thereafter applying pressure to the ridges, whereby parts of the threads in line with the higher ridge on each side of the bolt hole are deflected to form locking portions, and parts of the threads in line with the other ridge squeezed together, to take up the normal slack with respect to the threads on a corresponding bolt.

1,902,913. PLIERS. FREDERICK SIEVERS, McKeesport, Pa. Filed Jan. 9, 1931. Serial No. 507,658. 1 Claim. (Cl. 7—4.)



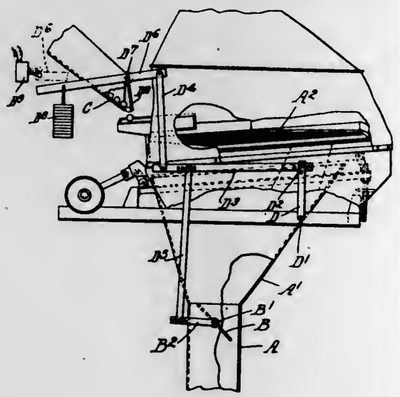
Pliers having the outer ends of their handles bifurcated for the reception of a blade which is provided with transversely-extending pins at its ends, the outer sides of the bifurcated portions serving as seats for the pin and lying upwardly and inwardly-inclined positions when the plier handles are spread for engagement with a saw blade.

1,902,914. DUPLICATING STENCIL. HANS SIMON, Hanover, Germany, assignor to Gunther Wagner, Hanover, Germany, a Corporation of Germany. Filed June 15, 1931, Serial No. 544,701, and in Germany Apr. 20, 1931. 12 Claims. (Cl. 41—38.6.)

9. A coating for duplicating stencils comprising a mixture of hardened gelatin, a softening agent and a permanent finely divided substantially insoluble organic filler.

1,902,915. AUTOMATIC VENDING MACHINE. LEWIS P. STARKEY, Fort Collins, Colo. Filed Dec. 1, 1930. Serial No. 499,321. 15 Claims. (Cl. 221—100.)

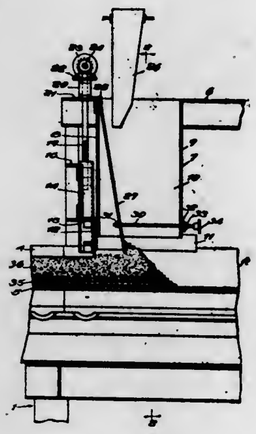
1. In an apparatus for dispensing liquids, a liquid supply, a measuring chamber, a pump to transfer liquid from the supply to the measuring chamber, a motor for the pump, a circuit for the motor, two switches connected in series in said circuit, one switch being normally in a circuit breaking position, the other switch being normally in a circuit closing position, a coin controlled circuit adapted to move the first noted switch to a circuit closing position whereby to actuate the pump, and a float controlled by overflowing liquid pumped to the measuring chamber, to move the second noted switch to a circuit breaking position at a predetermined point in the operation of the apparatus.



1,902,916. PROCESS FOR DECOMPOSING PLANT FIBER MATERIAL BY COOKING WITH PHENOLATES. OTTO HEINRICH STRECKER, Darmstadt, Germany, assignor to the Firm Dr. Otto C. Strecker, Darmstadt, Germany, a Company of Germany composed of Otto Carl Strecker and Gerald Strecker and Otto Heinrich Strecker. Filed June 7, 1930, Serial No. 459,843, and in Germany June 7, 1929. 8 Claims. (Cl. 92—9.)

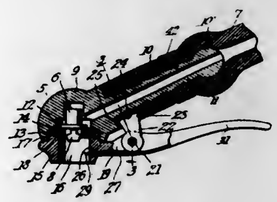
1. A process for the purposes set forth, characterized in that the content of free phenol or the like is from time to time during the boiling process, at least about half as great as the amount which corresponds to the alkali content of the phenolates present.

1,902,917. CLASSIFYING TABLE. EARL STUMP, Chicago, Ill., assignor to Roberts and Schaefer Company, Chicago, Ill., a Corporation of Illinois. Filed Dec. 18, 1929. Serial No. 413,715. 8 Claims. (Cl. 209—502.)



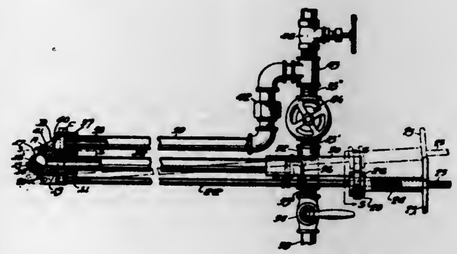
1. In combination with a material classifier, a continuous air supplying means therefor for forcing a constant supply of air through the classifier, means for feeding ma-

terial thereto and regulating means to vary the volume of said air supply, adapted to operate automatically in response to variations in the feed of material to said classifier whereby the supply of air is adjusted in accordance



with requirements on the classifier table due to variations in the feed of material thereto, said regulated means arranged to permit a minimum of air to pass, irrespective of its setting.

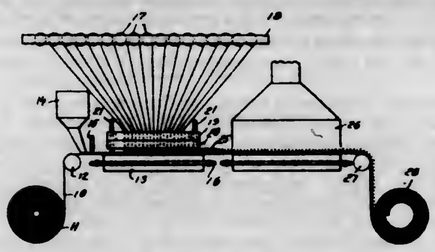
1,902,918. SINTERING MACHINE. GEORGE E. SWINEHART, Buffalo, N. Y., assignor, by mesne assignments, to American Ore Reclamation Company, Chicago, Ill., a Corporation of Illinois. Filed Mar. 19, 1930. Serial No. 436,924. 4 Claims. (Cl. 214—35.)



1. In combination in a sintering machine, a plate, a grate structure traveling beneath the plate, the plate being inclined downwardly and contra to the direction of travel of the grate structure, and means for delivering material to be sintered to the plate remote from the lower end thereof and in a freely flowing stream against the rear inclined face of the plate.

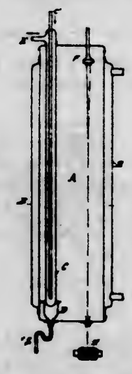
1,902,919. COUPLING. FRANK A. TALBOT, Greenville, S. C. Filed June 28, 1928. Serial No. 288,967. 16 Claims. (Cl. 285—173.)

1. A pump coupling or the like comprising a body portion having a bore, a flexible locking member slidable into said bore and normally extending therein, and means for flexing said member to slide the same outwardly in said bore.



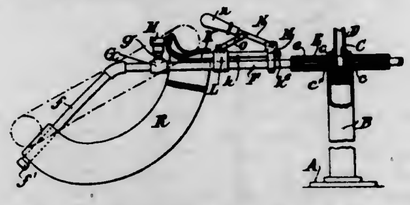
1,902,920. BURNER FOR LIQUID OR SEMILIQUID FUEL. REGINALD W. TITMAS, London, England, and ROBERT S. HICKISH, La Ceiba, Spanish Honduras, assignors to Titmas Company, Inc., New Orleans, La., a Corporation of Louisiana. Filed Aug. 24, 1931. Serial No. 559,084. 2 Claims. (Cl. 299—143.)

1. A burner of the class described, comprising a nozzle for steam or other atomizing agent and a passage for liquid fuel, said fuel passage being located below said nozzle, a valve seat extending across said passage and having a lip located between said valve seat and said nozzle, and a valve rotatably mounted in said valve seat and having a groove presenting a bottom wall sloping forwardly from said fuel passage in the direction of said nozzle in all open positions of said valve, said valve groove also presenting a front wall extending upwardly from the front edge of said bottom wall and located forwardly beyond said lip in all open positions of the valve, the inclination of said bottom wall with relation to said fuel passage and the upward inclination of said front wall from the front edge of said bottom wall and the position of said front wall beyond said lip serving to deflect the fuel transversely into the atomizing agent in all open positions of the valve.



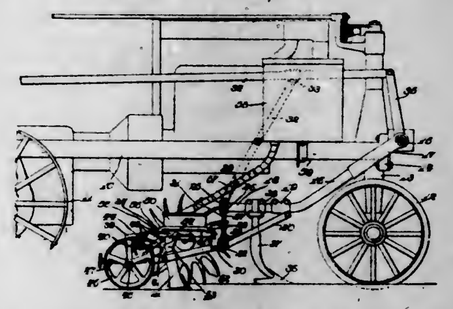
1,902,921. METHOD OF MAKING PILE FABRICS. GARFIELD J. UNDERWOOD, Amsterdam, N. Y., assignor to Mohawk Carpet Mills, Inc., Amsterdam, N. Y., a Corporation of New York. Filed Jan. 23, 1932. Serial No. 588,355. 8 Claims. (Cl. 154—2.)

1. A method of making pile fabrics, which comprises producing a base having an adhesive surface, guiding and separately embedding in said surface the ends of a plurality of pile yarns drawn from separate supplies to be



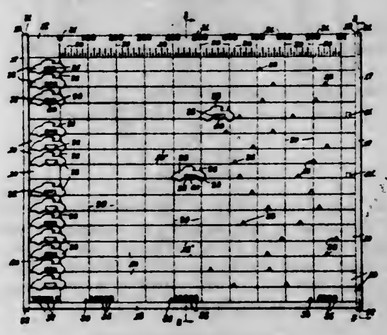
bound to the base by said surface, and severing said yarns between said surface and the sources of supply.

1,902,922. APPARATUS FOR DRY-SPINNING ARTIFICIAL TEXTILE FIBERS WITH RECOVERY OF THE VOLATILE SOLVENTS. ETTORE VIVIANI, Milan, Italy. Filed Sept. 19, 1928, Serial No. 306,940, and in Italy Apr. 7, 1928. 16 Claims. (Cl. 18—8.)



1. In the apparatus for dry spinning artificial textile fibers with recovery of the solvent contained in the spinning solution, the combination of a spinning cell provided with a spinning nozzle, means for effecting vaporization and condensation of the solvent within the cell while in direct open communication with the body of the vapors therein, and means for collecting the condensate.

1,902,923. DEFLATING MACHINE. JOHN WAHL, Rosedale, N. Y., assignor to A. Schrader's Son, Incorporated, New York, N. Y., a Corporation of New York. Filed Mar. 5, 1930. Serial No. 433,371. 10 Claims. (Cl. 154—9.)

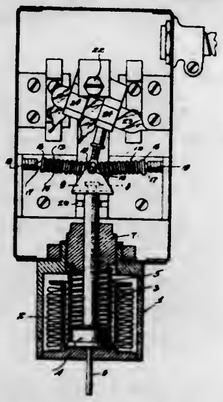


1. In a deflating machine for pneumatic tubes or the like, a valve opener, means for bodily supporting the tube, said means being movable with the tube to present the free end of the tube valve to the opener, and means normally urging the tube supporting means toward the opener.

1,902,924. PLANTER ATTACHMENT FOR TRACTORS. WILLIAM F. WAMHOFF, Emblem, Wyo., and WILLIAM H. THOMPSON, Canton, Ill., assignors to International Harvester Company, a Corporation of New Jersey. Filed July 9, 1930. Serial No. 466,820. 10 Claims. (Cl. 111—63.)

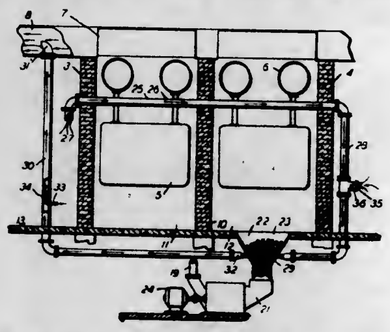
1. A tractor seed planter comprising the combination with a tractor frame of a draft means pivotally secured at the front of the tractor frame laterally thereof on a transverse axis, a planter frame structure attached to the draft means, a rolling support for said structure, a seed dispensing mechanism and a seed hopper mounted thereon, a shaft adapted to operate said mechanism, a wheel mounted on said shaft operable to engage the ground and to drive said mechanism, a seed tank mounted on the tractor frame, and means adapted to deliver seed from said tank to the hopper.

1,902,925. SALES INDICATOR. GEORGE M. WARD, East Weymouth, Mass. Filed July 15, 1932. Serial No. 622,585. 16 Claims. (Cl. 116—135.)



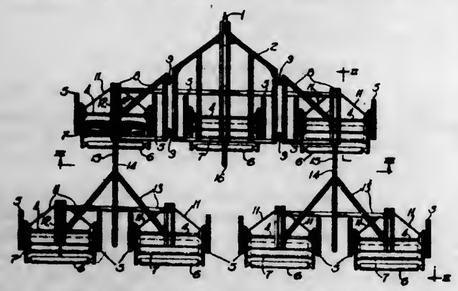
1. A board provided with a plurality of parallel slots; a name plate movably mounted in each slot; a graduated scale above and parallel with said slots; a plurality of movable pointers adapted to be positioned in said slots; and a plurality of clips provided with figures adapted to be clamped to said scale.

1,902,926. CONTROL DEVICE FOR ELECTRIC CIRCUITS. FRANK R. WEST and THOMAS E. CARPENTER, Detroit, Mich.; said Carpenter assignor to said West. Filed Dec. 24, 1927. Serial No. 242,490. 9 Claims. (Cl. 200—67.)



9. A control switch for electrical circuits, comprising in combination a pivotally mounted bulb of the mercury spaced terminal type, a power operated plunger movable toward and from said pivotally mounted mercury bulb, a shoe carried by the top of said plunger and having a lost motion connection therewith, a pin in the top of said shoe, spring pressed toggle levers operatively contacting

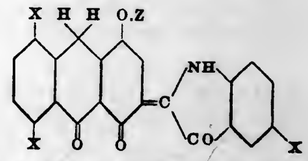
with said pin and adjustably mounted in a position substantially at right angles with the movement of said plunger, and an adjustable link connecting said shoe and



said pivotally mounted mercury bulb, the connection between said link and said shoe being by means of a pin-and-slot.

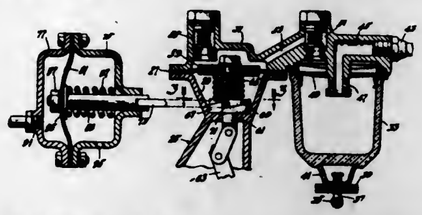
1,902,927. HEATING AND DRYING APPARATUS. WILLIAM E. WESTON, Kansas City, Mo. Filed May 12, 1930. Serial No. 451,790. 6 Claims. (Cl. 34—18.)

1. In combination with a furnace having a flue, and means including a fuel containing chamber member for supplying fuel to the furnace, an air conduit located to receive heat from the furnace and having a portion located to transmit heat to said chamber member and an outlet end extending into the flue.



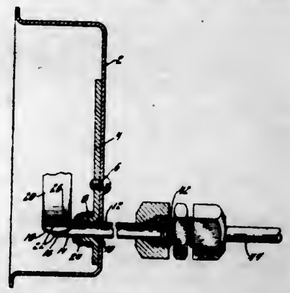
1,902,928. GANG LAWN MOWER. CHARLES C. WORTHINGTON, Dunfield, N. J. Filed July 29, 1931. Serial No. 553,709. 5 Claims. (Cl. 56—7.)

1. A gang lawn mower comprising a center front frame section, a side section horizontally hinged to each side thereof, lawn mower units respectively connected to each of said sections by means holding their several wheel-axes to a common vertical transverse plane, a tail piece on each hinged section and a rear row unit flexibly coupled to said tail piece.



1,902,929. CONDENSATION PRODUCT OF ISATIN-α-ANILIDE AND SUBSTITUTED ANTHRONES AND PROCESS OF PRODUCING SAME. KARL ZAHN, Frankfort-on-the-Main-Hochst, Germany, assignor to General Aniline Works, Inc., New York, N. Y., a Corporation of Delaware. Filed June 4, 1930, Serial No. 459,260, and in Germany July 16, 1929. 9 Claims. (Cl. 260—49.)

5. As new products, compounds of the following general formula:

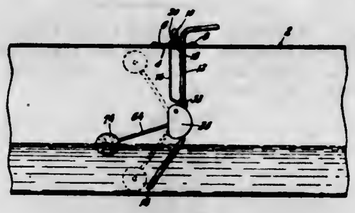


wherein X stands for hydrogen or chlorine and Z for methyl or ethyl being vat dyestuffs of very good fastness properties.

1,902,930. FUEL PUMP. JOSEPH ZUBATY, Flint, Mich. Filed Mar. 9, 1928. Serial No. 260,419. 6 Claims. (Cl. 123—139.)

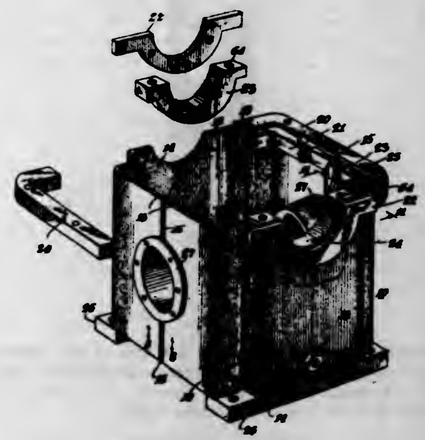
1. In a fuel supply system for internal combustion engines, a carburetor having a sealed float chamber and an air inlet, a supercharger delivering air under pressure to said air inlet, a conduit from said air inlet to said float chamber, a pump having a yielding member to effect a discharge stroke, a movable abutment therefor, a variable volume chamber, a conduit therefrom to said air inlet, a plunger reciprocable by air pressure in said chamber, said plunger operably connected to said variable abutment whereby the potential energy of the yielding member is modified by movements of the plunger.

1,902,931. PRESSURE GAUGE. JOSEPH ZUBATY, Flint, Mich., assignor to A C Spark Plug Company, Flint, Mich., a Company of Michigan. Filed Sept. 20, 1928 Serial No. 307,068. 4 Claims. (Cl. 73—109.)



4. In a gauge, a casing, a frame mounted in said casing, an integral projection on said frame extending inwardly of said casing, a pressure transmitting tube of uniform cross section in said projection and extending a short way into said casing, a soldered connection between said tube and projection extending entirely over said projection, and a Bourdon tube having a portion thereof mounted directly in said pressure tube and extending at right angles thereto.

1,902,932. INSTRUMENT MOUNTING. JOSEPH ZUBATY, Flint, Mich., assignor to A C Spark Plug Company, Flint, Mich., a Company of Michigan. Filed Aug. 23, 1929. Serial No. 387,966. 6 Claims. (Cl. 236—34.)



1. In combination with an internal combustion engine having a cooling system, an adapter comprising a folded metallic member having a retaining member formed therein, said adapter positioned at a joint in said system, and said retaining member adapted to receive a heat responsive member and to deliver heat thereto, said retaining member being positioned outside the joint and outside the cooling system.

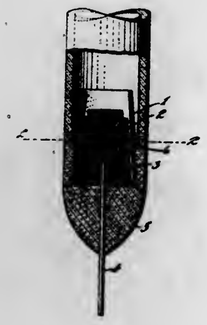
1,902,933. ELECTRIC GASOLINE GAUGE. JOSEPH ZUBATY, Flint, Mich., assignor to A C Spark Plug Company, Flint, Mich., a Company of Michigan. Filed Sept. 29, 1930. Serial No. 485,107. 2 Claims. (Cl. 201—48.)

1. In an electric liquid level indicator for application to liquid containers, a pipe for the outflow of the liquid from the container, a bracket secured to and extending into the container adjacent the pipe, a housing within the container and secured to both pipe and bracket, means to secure said pipe and bracket permanently and rigidly together, a float arm pivotally mounted in the housing, a resistance in the housing, a float on one end of the arm movable in response to changes in liquid level caused by the outflow through the pipe, and a contact on the other end of the arm in the housing and adapted to move over the resistance in response to movements of the float.

1,902,934. GEAR CASING. GEORGE H. ACKER, Cleveland, Ohio, assignor to The Cleveland Worm and Gear Company, Cleveland, Ohio, a Corporation of Ohio. Filed Aug. 27, 1931. Serial No. 559,636. 8 Claims. (Cl. 74—56.)

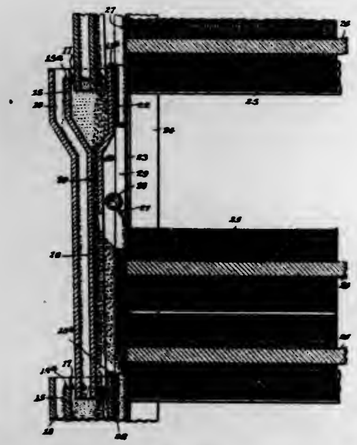
1. In a casing for gearing, side and end walls, inner and outer members welded to said side walls and extending slightly above the upper edge thereof and forming an oil groove therewith, bearing pieces welded to said end walls and connecting with said groove, and means for supplying oil to said groove.

1,902,935. SLIDE. CARL E. ANDERSON, East Orange, N. J., assignor to Eastern Tool & Mfg. Co., Bloomfield, N. J. Filed June 12, 1931. Serial No. 543,891. 3 Claims. (Cl. 24—186.)



1. A slide consisting of a single sheet of metal punched to form three parallel bars and end bars, the top bar and the end bars being concavo-convex in cross section with the concave side at the back, the center bar being U-shaped with its recessed part toward the front, the bottom bar being elliptical in cross section with its rear portion formed of material bent over from above the bottom bar whereby a pair of jaws is formed for grasping and holding a strap when the jaws are squeezed together.

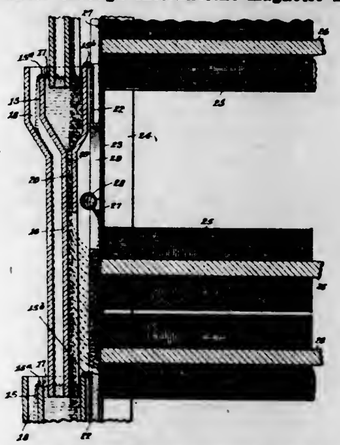
1,902,936. ELECTRODE FOR VAPOR GAS ELECTRIC DEVICES. WILLIAM T. ANDERSON, Jr., Newark, N. J., assignor to Hanovia Chemical and Manufacturing Company, Newark, N. J., a Corporation of New Jersey. Filed Mar. 8, 1932. Serial No. 597,461. 5 Claims. (Cl. 176—126.)



1. An electrode for vapor electric devices, comprising a gas tight vessel, an electrode mass formed of alkaline

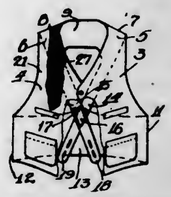
earth oxide intimately mixed with weakly basic metallic oxides, a sleeve surrounding said electrode mass, and a plurality of pieces of metal distributed throughout the

electrode mass and contacting the wall of the sleeve, said metal pieces being of higher thermal conductance than the electrode mass to conduct a portion of the heat of the electrode mass to the wall of the sleeve.



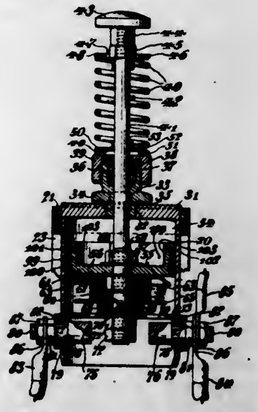
1,902,937. METHOD FOR AUTOMATIC ELECTROMAGNETIC WET SEPARATION. HARRY B. ARDEN, New York, N. Y. Filed Oct. 11, 1928, Serial No. 311,869. Renewed Feb. 24, 1932. 6 Claims. (Cl. 209—214.)

1. The method of automatic, electro-magnetic wet separation which consists in passing downwardly a substantially vertical, smooth-flowing stream of magnetic ore and water through an intermittent magnetic field which separates the magnetic from the non-magnetic material carried by the stream.



1,902,938. MEANS FOR AUTOMATIC ELECTROMAGNETIC WET SEPARATION. HARRY B. ARDEN, New York, N. Y. Refile of application Serial No. 502,117, filed June 14, 1909. This application filed Oct. 11, 1928. Serial No. 311,870. Renewed Feb. 24, 1932. 16 Claims. (Cl. 209—232.)

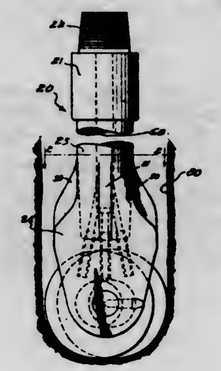
1. Means for automatic, electro-magnetic, wet separation which consists of means for passing downwardly a substantially vertical, smooth-flowing stream of magnetic ore and water through intermittent magnetic fields, and



means for creating such fields whereby the magnetic material of the stream may be separated from the rest of the stream.

1,902,939. COMBINATION VEST AND SUSPENDERS. MARCUS ADLER, Chicago, and JOSEPH C. JANOSIK, Cicero, Ill. Filed Nov. 3, 1932. Serial No. 640,988. 8 Claims. (Cl. 2—102.)

1. In a vest and suspender combination, a vest front including shoulder portions, a swinging pocket secured to the vest front adjacent the upper edge of the pocket, suspender straps extending below said pocket and secured to the lower free edge of the pocket to uniformly distribute stress across the front and shoulder portions of the vest above said pocket without distorting the front of the vest.

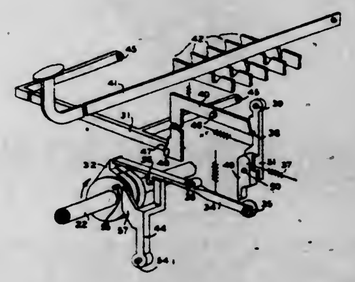


1,902,940. VACUUM CONTROLLED SWITCH FOR STARTING MOTORS. ARTHUR B. ALTHOUSE, Drexel Hill, Pa. Filed Mar. 17, 1931. Serial No. 523,221. 4 Claims. (Cl. 200—82.)

1. An automobile starter switch of the kind described comprising, a casing, a piston slidably mounted in said

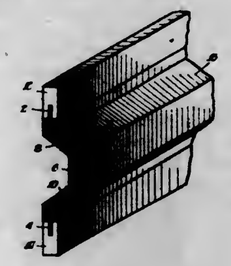
casing, a rod secured to the piston, and a circuit-completing member secured to said rod and arranged between shock-absorbing material fastened to the rod, said circuit-completing member being coactingly engageable with contact members secured to the casing for completing an electric circuit.

1,902,941. ROTARY BIT. WALTER C. BAILEY, Norwalk, Calif. Filed Oct. 19, 1927. Serial No. 227,103. 12 Claims. (Cl. 255—71.)



1. A rotary bit for drilling wells comprising: a drill bit body adapted to support a pair of cutters, there being a pair of pockets formed in said body on opposite sides of the axis thereof, said pockets being disaligned with each other, and a hole in said body which is aligned with each of said pockets; cutter bushings adapted to fit into said pockets, there being openings in said bushings adapted to be aligned with said hole in said body; cutters adapted to rotate upon said bushings; a locking pin adapted to extend into said body hole and into the openings in said bushings; and means disposed between and interlocking with said bushings for preventing rotation of said bushings relative to each other.

1,902,942. CAPACITOR. WILLIAM M. BAILEY, Lynn, Mass., assignor, by mesne assignments, to General Electric Company, a Corporation of New York. Filed June 8, 1929. Serial No. 369,293. 9 Claims. (Cl. 175—41.)

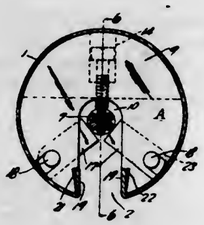


1. A capacitor of the character described, including, in combination, an elongated insulating supporting plate, a condenser stack positioned on the plate, foil tabs of opposite polarity extending from opposite sides of the stack; terminal screws passing through the plate and in good electrical and thermal connection with the foil tabs; a resilient compression member overlying the stack, and a casing adapted to compress the stack members, being compressed thereagainst by the engagement therewith of a plurality of casing clamping screws passing through the supporting plate and out of contact with the terminal screws; and terminal strips connected to the terminal screws and extending outwardly therefrom around the ends of the supporting plate to form terminals of high heat dissipating capacity.

1,902,943. KEYBOARD TRANSMITTER. ERWIN P. BANCROFT, Brooklyn, N. Y., assignor to International Communications Laboratories, Inc., New York, N. Y., a Corporation of New York. Filed May 1, 1931. Serial No. 534,295. 18 Claims. (Cl. 178—17.5.)

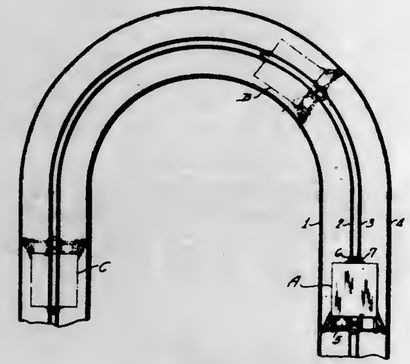
1. A keyboard transmitter comprising a plurality of depressible key levers for setting up signal combinations, means for transmitting signals corresponding to the combination set up by the depression of one of said key levers, means under control of the signal transmitting means for rendering another of said key levers depressible for transmitting signals corresponding to combinations set up by its depression and before all the signals corresponding to the first combination have been transmitted.

1,902,944. COMBINED EXPANSION AND CONTRACTION JOINT. ALBERT C. FISCHER, Chicago, Ill., assignor to The Philip Carey Manufacturing Company, a Corporation of Ohio. Filed May 19, 1927. Serial No. 192,710. 3 Claims. (Cl. 94—18.)



1. A combined expansion and contraction joint adapted to interlock monolithic sections comprising a flexible, metallic strip having upper and lower flanged portions lying in substantially the same plane and joined by an intermediate portion lying to one side of such planes, the flanged portions being capped with bituminous slabs and the intermediate portions carrying a relatively thick coating of bituminous material.

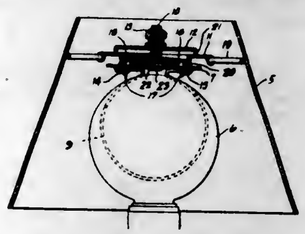
1,902,945. GUY STRAND GUARD AND LOCK. JASPER BLACKBURN, Webster Groves, Mo. Filed Mar. 3, 1932. Serial No. 596,459. 18 Claims. (Cl. 189—31.5.)



13. A gravity control lock for mounting a guard upon a guy strand, the said lock comprising a supporting ele-

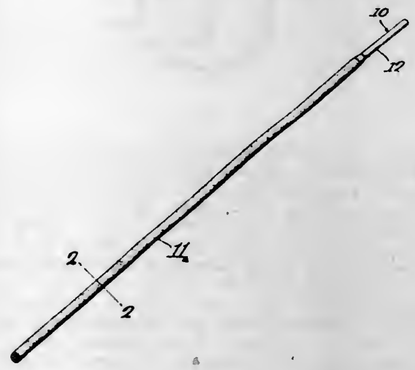
ment mounted upon the guard and having a cable-way opening out through one margin and locking members

movably supported upon the element and adapted by gravity to lockingly engage the guy strand as it passes transversely into the said cable-way.



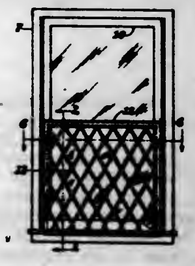
1,902,946. SAFETY CABLELESS MULTIPLE ELEVATORS. MAURICE E. BREED, St. Louis, Mo. Filed July 16, 1930. Serial No. 468,363. 7 Claims. (Cl. 187—16.)

1. An elevator system comprising separate ascending and descending shaft portions having arcuate shaft connection at their upper and lower ends respectively, an elevator car in said shaft, parallel endless racks mounted rigidly in said shaft portions and shaft connections, mechanism supported at one end of said car and engaging said racks for propelling said car upwardly through said ascending portion and downwardly in inverted position through said descending portion of said shaft, a guide device in said shaft, and means in connection with the opposite end of said car from said mechanism engaging said guide device, said elevator car being propelled through said arcuate shaft connections from said ascending shaft portion to said descending shaft portion and from the latter to the former and guided throughout by said guide device and guide means.



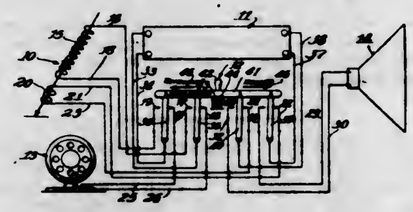
1,902,947. SHADE HOLDER. EDWARD W. CARPENTER, Fairfield, CHARLES LA REAU, Bridgeport, and HENRY MORGAN KELLOGG, Stratford, Conn., assignors to The E. W. Carpenter Manufacturing Company, Bridgeport, Conn., a Corporation of Connecticut. Filed June 15, 1931. Serial No. 544,352. 7 Claims. (Cl. 240—138.)

1. In a lamp shade holder, a mounting member, a pair of looped clamping members to engage over a bulb, said mounting member having a pair of portions pressed therefrom, each of said loops formed of a length of wire having its end portions extending laterally of the loop, and



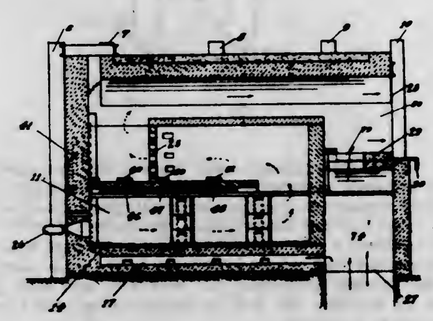
said laterally extending end portions disposed beneath the said pressed-up portions of the mounting member and securing the loops to the mounting member.

1,902,948. WELDING ELECTRODE. ALFRED C. CASTLE, Lake Forest, Ill., assignor to A. M. Castle & Co., a Corporation of Illinois. Filed Aug. 14, 1931. Serial No. 557,010. 5 Claims. (Cl. 219—8.)



2. A welding electrode comprising a metallic rod composed principally of ferrous material, coating attached directly to the surface of said rod, said coating comprising carbon not over 1% of the mass, silica approximately 30% of the mass, magnesium and sodium carbonate each less than 1% of the mass, all in a finely divided state, and ferrotite as a binder.

1,902,949. COMBINED WINDOW GUARD AND SCREEN. JOSEPH P. CONDON, Omaha, Nebr. Filed Aug. 8, 1932. Serial No. 627,849. 1 Claim. (Cl. 20—71.)



In a grid for a window frame provided with channels and parting-strips, a grid having a frame adapted to be fitted into the window frame, a locking-bar rigid with one end of the grid for engaging in a channel and having a projection for engaging a parting-strip, a locking-bar mounted to have a swinging movement on the opposite end of the grid for entering a channel of the window frame and having a projection for engaging a parting-strip, and means on the last named locking-bar for preventing a swinging movement thereof.

1,902,950. COMBINED REPRODUCING AND RECORDING DEVICE. ROY DALLY, Racine, Wis., assignor to Webster Electric Company, Racine, Wis., a Corporation of Wisconsin. Filed Oct. 29, 1931. Serial No. 571,727. 4 Claims. (Cl. 179—100.4.)

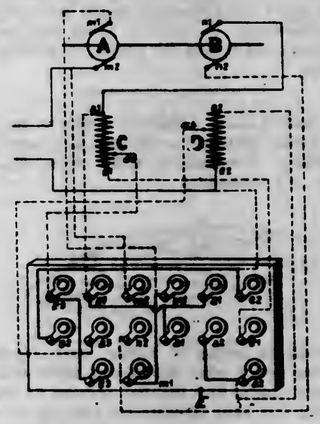
1. A combined reproducer and recorder comprising an amplifier, a speaker, a microphone, and a pick-up having windings adapted to be substituted for said microphone for reproduction and having windings adapted to be substituted for said speaker for recording.

1,902,951. FURNACE EQUIPMENT. WILLIAM A. DARRAH, Chicago, Ill. Filed Jan. 7, 1929, Serial No. 330,870. Renewed Aug. 12, 1932. 25 Claims. (Cl. 263—19.)

22. In a gas heater a combustion chamber, a housing surrounding said chamber, a duct in said housing directing a portion of the flow of gas being heated in contact with said combustion chamber, and a duct located in said housing and arranged to bypass said directing duct.

1,902,952. ARCH SUPPORT. JOHN H. GOLDEN, Porterville, Calif., assignor of one-half to Chester M. Sewell, Porterville, Calif. Filed July 6, 1931. Serial No. 548,861. 1 Claim. (Cl. 36—71.)

An arch support comprising: a flexible inner sole having a pocket underlying the ball of the foot; a rubber cushion incorporated in the inner sole, forming a longitudinally extending arch support tapering laterally downward from the outer longitudinal side of the foot towards the inner longitudinal side of the foot; a flange integral with the inner sole extending upward along the outer longitudinal side of the inner sole adjacent said arch; and a plurality of rubber disks of different diameters in

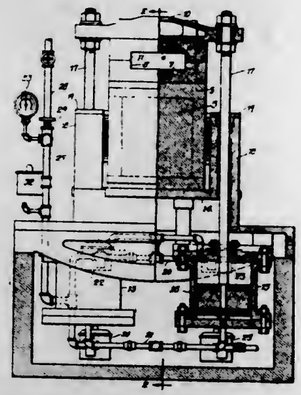


said pocket of the inner sole, said disks being cemented together face to face in concentric relation and arranged in a progressive series with the smallest disk uppermost.

1,902,953. METHOD AND APPARATUS FOR THE MANUFACTURE OF FILAMENTARY MATERIAL. EARDLEY HAZELL, New York, N. Y., assignor to Revere Rubber Company, Providence, R. I., a Corporation of Rhode Island. Filed Mar. 11, 1931. Serial No. 521,641. 15 Claims. (Cl. 18—8.)

1. The process of making rubber filaments from an aqueous dispersion of rubber which comprises streaming said dispersion through an orifice having outwardly concave sides and cusped corners.

1,902,954. SMALL VARIABLE POTENTIAL ELECTRIC MOTOR. ARNO HOCHFELD, Berlin, Germany, assignor to Deutsche Telephonwerke und Kabelindustrie Aktiengesellschaft, Berlin, Germany, a Corporation. Filed Jan. 30, 1930, Serial No. 424,543, and in Germany July 9, 1929. 13 Claims. (Cl. 172—276.)

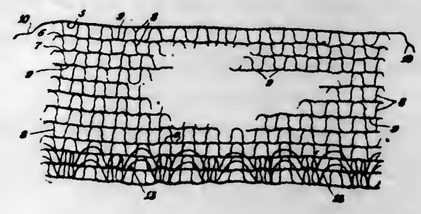


1. A small variable potential electric motor, comprising a field structure and an armature structure, windings thereon, a terminal board with contact devices thereon

connected to said field and armature windings, said contact devices being so arranged that a set of jumpers of given relative position applied to said terminal board will connect the motor windings for one voltage or another according to the position in which such set of jumpers is placed upon the board, and a connector embodying jumpers in said given relative position adapted to be placed in different positions on the terminal board and to cooperate with the contact devices thereon to establish different connections in each different position.

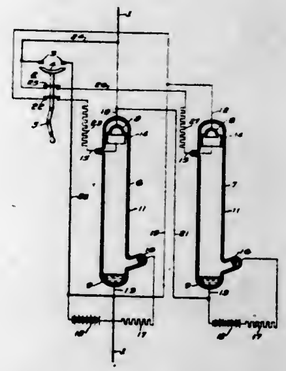
2. An electric motor comprising two armature windings, two field windings, two current-supply connections one of which leads to one end of one of the field windings and the other to one end of one of the armature windings, a connection from one end of the other field winding to one end of the other armature winding, and means for variably connecting the field windings and the other ends of said armature windings.

1,902,955. WELDING APPARATUS. HENRY S. HOLMES, Brooklyn, N. Y., assignor, by mesne assignments, to Metropolitan Engineering Company, a Corporation of New York. Filed Sept. 24, 1928. Serial No. 307,886. 13 Claims. (Cl. 219—4.3.)



6. A welding machine comprising a movable electrode, fluid pressure cylinders for operating the same, pipes communicating with the upper ends of the cylinders and with their lower ends respectively, a solenoid-operated admission valve and a solenoid-operated exhaust valve in each of said pipes and automatic means for operating said valves simultaneously to raise or lower the electrode, a second electrode and means for passing a current between the electrodes.

1,902,956. METALLIC AIRFOIL. EDWIN A. HUGHES, Seattle, Wash., assignor to Boeing Airplane Company, Seattle, Wash. Filed May 6, 1930. Serial No. 450,149. 9 Claims. (Cl. 244—31.)

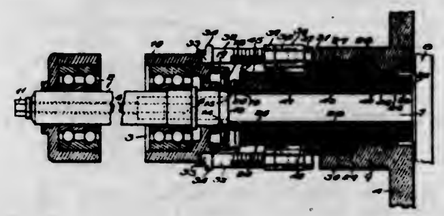


1. An airfoil including a frame work consisting of front and rear spars, ribs notched at their upper edges to receive said spars, and secured thereto an upper and lower covering for said framework, said upper covering being one continuous sheet and cap strips disposed above the upper covering, across the notches receiving the spars, and secured through the upper covering to the rib beneath, at each side of such notch.

1,902,957. VEIL. MILTON J. HINLEIN, Philadelphia, Pa. Filed May 18, 1932. Serial No. 611,976. 5 Claims. (Cl. 66—171.)

5. A resilient open meshwork face veil formed of weather-proof threads of pyroxaline, the threads running in the same direction in the fabric being interlooped so as to maintain the open meshwork arrangement but permit temporary shaping of the veil to the face without taking a permanent set.

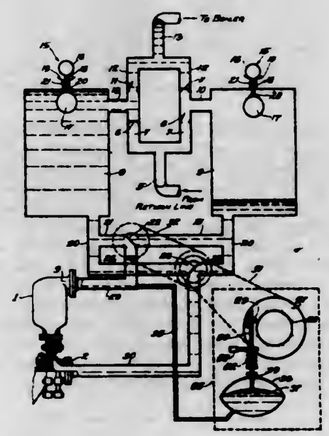
1,902,958. CIRCUIT BREAKER. RAY P. JACKSON, Berkeley, Calif., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Aug. 14, 1929. Serial No. 385,879. 5 Claims. (Cl. 175—294.)



1. In an alternating-current circuit, the combination with a circuit interrupter therefor, of two rectifiers oppositely disposed in parallel circuit relation to each other and to said circuit interrupter a "keep-alive circuit" for said rectifiers, a grid disposed in the current path through each rectifier and means responsive to the open position of said circuit interrupter for rendering said grid negative to interrupt the flow of current after said circuit interrupter is opened.

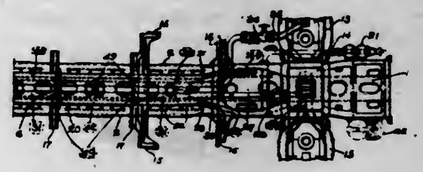
1,902,959. UNFERMENTED ACIDOPHILUS MILK. ROBERT P. MYERS, Baltimore, Md., assignor to Research Laboratories of National Dairy Products Corporation, Inc., Baltimore, Md., a Corporation of Maryland. Filed Apr. 16, 1930. Serial No. 444,864. 18 Claims. (Cl. 99—11.)

1. A sweet unfermented *Lactobacillus acidophilus* milk of milk-like consistency, and comprising sweet milk and *Lactobacillus acidophilus* present in numbers to give a therapeutically effective product.



9. The process of preparing Lactobacillus milk which comprises adding to sweet milk *Lactobacillus acidophilus* in numbers to give a therapeutically effective product and maintaining the milk at a temperature sufficiently low to inhibit growth of the organisms and formation of lactic acid and prevent souring of the milk.

1,902,960. PACKING GLAND. HARRY E. LA BOUR, Chicago Heights, Ill. Filed Oct. 6, 1927. Serial No. 224,849. 17 Claims. (Cl. 286—7.)

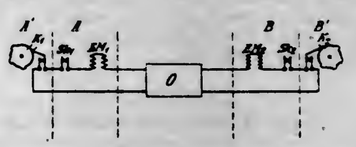


1. In combination, a hollow boss adapted to receive a compressible packing, a rotatable shaft extending loosely through said boss and having a flat flange, a rigid antifriction ring embracing the shaft and having contact therewith and having a flat end face engaging said flat flange, said engaging faces maintaining a tight joint for rotary motion and for motion of translation between them, yielding means for holding said faces in engagement, a compressible packing for sealing the space between the ring and the boss, and means in the shaft embracing face of said ring for holding a sealing fluid between said face and the shaft.

1,902,961. PUMPING SYSTEM. HARRY E. LA BOUR, Elkhart, Ind. Filed July 14, 1930. Serial No. 467,830. 22 Claims. (Cl. 103—165.)

1. The method of pumping a mixture of gas and liquid which comprises trapping said mixture in two separate bodies to separate the gas and liquid in each, pumping out the liquid from one body until gas passes over, pumping liquid from the second body and directing the same into said first body whereby to drive off the gas, continuing said pumping until gas passes over from the second body, reversing the pumping operation to again pump liquid from the first body into the second to drive off the gas therein, and continuing said pumping operation until gas passes over from the first body.

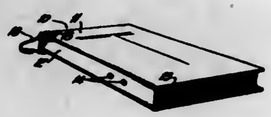
1,902,962. LOCOMOTIVE STRUCTURE. WILLIAM L. LENTS, Tuckahoe, N. Y., and HARRY M. PFLAGER, St. Louis, Mo., assignors to General Steel Castings Corporation, Granite City, Ill., a Corporation of Delaware. Filed Dec. 3, 1931. Serial No. 578,650. 37 Claims. (Cl. 105—172.)



1. A cradle for a locomotive underframe including spaced side elements, one of said elements being hollow and serving as a fluid conduit.

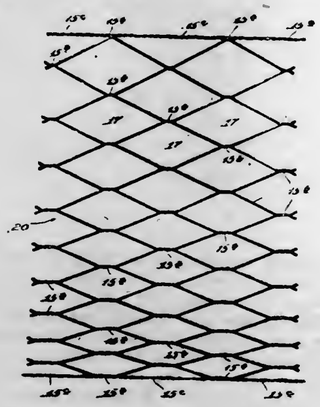
1,902,963. PACKAGE OPENER. FRANÇOIS LEPAGE and ANTOINE MARTINEAU, Montreal, Quebec, Canada. Filed Dec. 24, 1931. Serial No. 583,075. 3 Claims. (Cl. 229—11.)

1. In a package, the combination with an exterior package section and an interior section slidable within the exterior section, of an opening cord having one end attached to the interior section and slidably secured to the outside section, said cord being arranged on each section so that by predetermined pulling the fastening seal of the package will be severed, the interior container section slidably extended to a limited dispensing position and the top portion of the inner section swung from a covering to an open position.



1,902,964. SUPERVISORY DEVICE FOR TELEGRAPH APPARATUS. ERWIN LEISER, Berlin, and WILHELM KRUSE, Wilhelmshagen near Berlin, Germany, assignors to C. Lorenz A. G., Berlin, Germany. Filed Mar. 26, 1931, Serial No. 525,414, and in Germany Mar. 29, 1930. 8 Claims. (Cl. 178—2.)

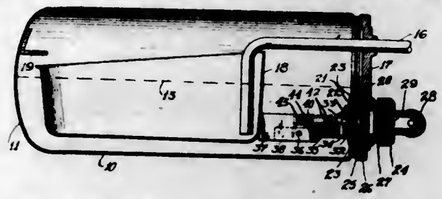
1. In a telegraph system, the combination of a calling station, a called station connected thereto, supervisory apparatus at the called station, and means at the calling sta-



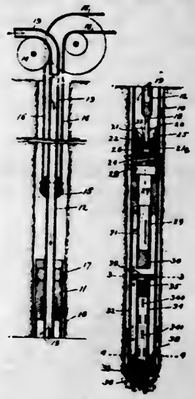
tion for causing said apparatus to send back station identification signal only if the called station remains conditioned for reception.

1,902,965. BINDER. JAMES J. LYNCH and ERNEST F. BARVOETS, Albany, N. Y., assignors to J. B. Lyon Company, Albany, N. Y., a Corporation of New York. Filed Aug. 20, 1931. Serial No. 558,250. 4 Claims. (Cl. 281—19.)

1. A binder comprising two covers joined by a back, an integral bar having a supporting portion secured to said back, and end of said bar being bent inwardly and then reversely with respect to the supporting portion adapting said reversely bent portion to be received between the leaves of a book, and means for clamping said covers against the sides of a book.



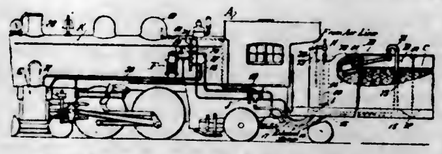
1,902,966. METHOD OF MAKING EXPANDED METAL FENCES. CHESTER M. MACCHESNEY, Chicago, Ill., assignor to Acme Steel Company, Chicago, Ill., a Corporation of Illinois. Filed Aug. 7, 1929. Serial No. 384,225. 9 Claims. (Cl. 164—6.5.)



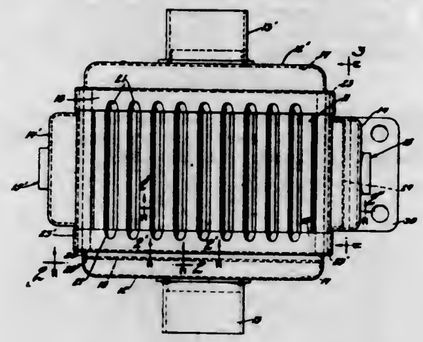
8. The method of forming expanded metal fencing which consists in providing a metal sheet with a plurality of transverse series of longitudinal parallel slits increasing in length progressively from one edge of the sheet toward the other and having the ends of the slits of each series overlapping the ends of the slits of the next adjacent series, the extent of overlap increasing progressively from one edge of the sheet toward the other, then expanding said sheet transversely to the length of the slits to form a plurality of meshes increasing in area from one side of the expanded sheet toward the other, and then contracting to a progressively decreasing extent from said first-mentioned edge of said sheet toward the other edge those walls of said meshes which extend substantially parallel to the longitudinal edges of the sheet.

1,902,967. FLOAT VALVE STRUCTURE. HAROLD ROY MCPHAIL, Detroit, Mich., assignor to Norge Corporation, Detroit, Mich., a Corporation of Michigan. Filed Feb. 17, 1930. Serial No. 428,877. 5 Claims. (Cl. 137—104.)

8. An evaporator header tank for refrigerating apparatus, comprising a float chamber closed at one end, a head sealingly engaging the other end thereof, a shouldered float valve body projecting inwardly through a shouldered aperture in said head, the shoulders on the body and in the aperture serving to locate said valve body, a retaining member abutting against said valve body, an external packing gland for clamping said retainer member and valve body shoulder against the aperture shoulder, a valve seat aligned with a valve guide apertuse in said valve body, a valve stem engaging in one position against said seat, and float mechanism for actuating said valve stem.

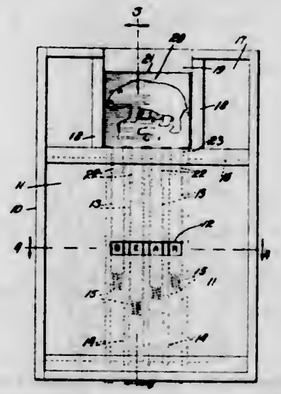


1,902,968. EARTH BORING APPARATUS. JAMES F. MELLOR, El Dorado, Ark. Filed Apr. 2, 1927. Serial No. 180,528. 5 Claims. (Cl. 121—18.)



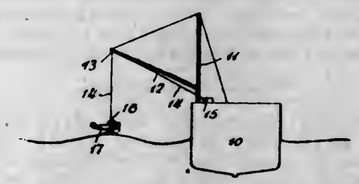
1. The combination in a motor of a longitudinally movable cylinder element, a pipe for the supply of fluid under pressure extending into the cylinder element, valve mechanism within the cylinder subject to fluid pressure in the cylinder and adapted to open under a predetermined pressure comprising two parts with outwardly directed contacting surfaces, one of which is supported by said pipe, said two parts being relatively movable to open and close a passage between them, and means to maintain them in a closed position until a predetermined extent of movement of the cylinder has taken place said cylinder having a pressure-receiving head spaced from said valve mechanism between which and said valve mechanism fluid is received for the exertion of pressure thereon.

1,902,969. FEED WATER HEATER FOR LOCOMOTIVES. WALTER PARKS, Denver, Colo. Filed June 3, 1929. Serial No. 368,048. 3 Claims. (Cl. 122—434.)



1. In combination with a locomotive boiler and feed water tank, a partition dividing the tank into cold and hot water compartments which communicate below the bottom of the said partition, there being a well extending below the bottom of the compartments into which the partition projects, means for introducing exhaust steam into the hot water compartment at a constant distance below the surface of the water in the tank, means for withdrawing water from the hot water compartment and introducing the same into the boiler, a thermostat arranged in the hot water compartment near the water outlet and mechanism actuated thereby for controlling the flow of exhaust steam to said hot water compartment.

1,902,970. OIL COOLER. WALTER R. RAMSAUR, Lockport, N. Y., and THERON P. CHASE, Detroit, Mich., assignors to General Motors Research Corporation, Detroit, Mich., a Corporation of Delaware. Filed Nov. 16, 1929. Serial No. 407,730. 24 Claims. (Cl. 257—242.)



1. In a tubular-core oil cooler: a set of parallel tubes arranged in rows; a pair of side plates engaging end portions of said tubes; and a pair of oil headers so engaging end rows of said tubes and end portions of said plates as to compel oil, advancing between said headers, to pass in streams whose thinness is determined by the cross-sectional configuration and spacing of said tubes.

1,902,971. TOY. FRANCIS FELIX CLAUDE RIPPON, New York, N. Y. Filed Aug. 18, 1932. Serial No. 629,275. 6 Claims. (Cl. 35—9.)

1. A new toy comprising a container having a window, a movable element in the container bearing a series of indicia exposable one at a time through the window, means for initially and displaceably positioning said movable element to conceal said indicia, an operating element bearing an indicium and having a key adapted to displace said movable element so as to expose through the window a predetermined indicium thereon related to the indicium on the operating element.

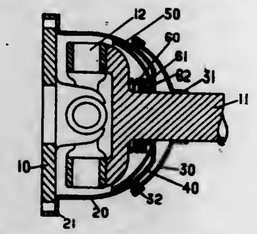
1,902,972. MOORING AND HOISTING APPARATUS. WARREN E. ROUAN, Waterbury, Conn., assignor to The Waterbury Tool Company, Waterbury, Conn., a Corporation of Connecticut. Filed Apr. 29, 1932. Serial No. 606,181. 16 Claims. (Cl. 9—22.)

1. In a device of the kind described including a rotatable drum, and a cable attached to an object floating in water subject to the rise and fall through wave action and leading to said drum, that improvement which comprises pressure fluid actuated means for operating said drum, and means for by-passing said pressure fluid to automatically regulate and control the volume operatively effective upon said motor in predetermined accordance with the rise and fall of said floating object whereby said drum is operated to automatically maintain said cable against slack in harmony with the rising and falling movements of said object.

1,902,973. WINDOW CONSTRUCTION. WILLIAM A. SCHOMMING, Chicago, Ill. Filed July 2, 1931. Serial No. 548,844. 8 Claims. (Cl. 20—49.)

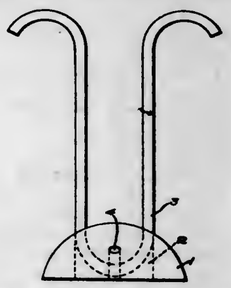
1. A window construction comprising the combination with a window frame having vertical side grooves, of runners slidable in said grooves, a window sash pivoted to said runners to swing vertically into open or closed positions, means for assisting swinging movement of the sash to closed position, and means interposed between the sash and runners for holding the sash in various open positions against the action of said assisting means.

1,902,974. CAR TRUCK. WILLIAM M. SHEEHAN, St. Louis, Mo., and WILLIAM S. MCGILVRAY, Granite City, Ill., assignors to General Steel Castings Corporation, Granite City, Ill., a Corporation of Delaware. Filed May 23, 1930, Serial No. 455,017, and in Italy Apr. 15, 1930. 15 Claims. (Cl. 105—208.)



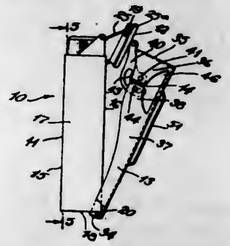
1. In a truck of the class described, a frame, swinging links suspended from said frame, a spring plank having rectangular openings extending vertically through its end portions and receiving and surrounding the lower ends of said swinging links, and pivot pins extending through said links and the adjacent walls of said openings.

1,902,975. METHOD OF AND APPARATUS FOR MAKING EXTRUDED SEAMLESS METAL SHAPES. STANLEY W. SPARKS, Brooklyn, N. Y., assignor to Charles H. Bickell, trustee. Filed May 11, 1929. Serial No. 362,255. 21 Claims. (Cl. 207—2.)



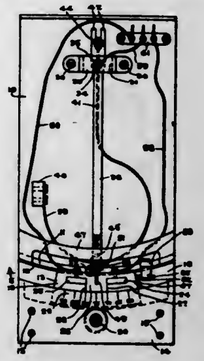
1. The method of extruding tubular shapes of ferrous metal which consists in heating a mass of metal, of sufficient cubical content to form a tubular shape of the desired length, to a plastic condition and well below the melting point thereof, quickly introducing the same into a die, then inserting said die into a die-pot having an exit orifice of a diameter corresponding to the external diameter of the shape desired, subjecting the metal while confined in said die-pot to a pressure sufficient to effect the extrusion thereof through said orifice while simultaneously opposing the free passage of metal through said orifice by subjecting the metal during the extrusion to a centrifugal forming action of a rapidly rotating arbor of an external diameter corresponding to the internal diameter of the desired tubular shape, whereby the shape is extruded over said arbor, withdrawing said arbor, while still rotating, from said shape, cutting off the desired length of the tubular shape and recovering the severed length thereof so obtained.

1,902,976. CASING FOR UNIVERSAL JOINTS. CLARENCE WINFRED SPICER, Plainfield, and GURDON LUCIUS TARBOX, North Plainfield, N. J. Filed Apr. 10, 1929. Serial No. 354,087. 7 Claims. Cl. 64—89.)



1. A casing for a universal joint comprising an inner and outer casing, the latter being partly spherical, the inner casing provided with a bell shaped mouth, the extreme edge thereof adapted to ride on the inside surface of the partly spherical casing, said bell shaped mouth set at a permanent acute angle to the tangent at the point of contact with the casing and contacting only through its edge with the inside of the partly spherical casing.

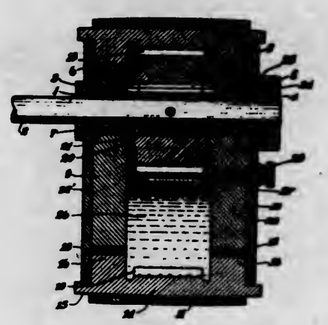
1,902,977. MOLD FOR CAST STONE AND PROCESS OF USING THE SAME. PETER TAMAGNO, Natick, Mass. Filed Feb. 26, 1932. Serial No. 595,358. 5 Claims. (Cl. 25—128.)



3. A pocket pattern and eye holding member for use with a mold for semi-fluid material comprising a member of yielding and elastic material with an eye holding aperture and an aperture for a pattern securing means therein.

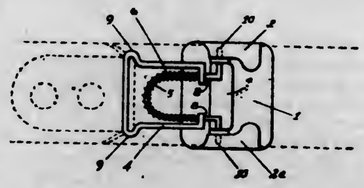
1,902,978. RECEPTACLE. ARTHUR VON FRANKENBERG, New York, N. Y. Filed Jan. 10, 1929. Serial No. 331,489. 14 Claims. (Cl. 206—38.)

1. In a water tight receptacle, a container, a cover hinged thereto, and means for clamping said cover to said container, said means comprising a detachable member having a portion for pivotally engaging said container and a portion for slidably engaging said cover.



1,902,979. THERMOSTAT. FRANK A. WHITELEY, Minneapolis, Minn. Filed Mar. 18, 1932. Serial No. 599,617. 12 Claims. (Cl. 200—138.)

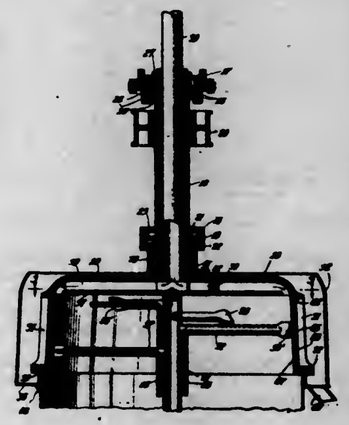
1. A thermostat, comprising a contact piece having a plane surface formed with limits comprising segments of concentric circles, means to move said piece in the arcs of said circles to adjust temperature limits, a swinging arm pivoted at the center of said circles, a contact member pivoted to said arm to move transversely to the plane



of movement of the arm, a spring holding said contact member in constant yielding engagement with the surface of the piece, and a thermostatic member supported independently of the arm to move the arm.

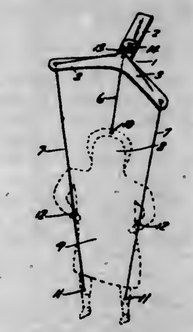
1,902,980. BELT TIGHTENING PULLEY. HAROLD F. WILHELM, East Orange, N. J., assignor, by mesne assignments, to Wearn's Inventions, Ltd., Auckland, New Zealand, a Corporation of New Zealand. Filed May 24, 1927, Serial No. 193,773. Renewed Aug. 23, 1932. 7 Claims. (Cl. 64—5.)

1. A power transmitting wheel comprising a supporting shaft, a first gear affixed to said shaft, an eccentric sheave loosely mounted on said shaft, an annular gear having an outer band supporting surface and internal teeth having driving relation with the teeth on said first gear, said annular gear also having a bearing surface rotatably mounted on said sheave.



1,902,981. BELT BUCKLE. DORSEY M. WIRTH, Bucyrus, Ohio. Filed Aug. 25, 1932. Serial No. 630,386. 3 Claims. (Cl. 24—168.)

1. A belt buckle of the class described comprising a buckle body having flanges thereon, and a belt connector assembly, said connector assembly comprising a yoke having the ends of the member forming the yoke connected with the flanges of the buckle body, a belt connector having one end carried by the yoke, and a belt connecting portion at the other end of the connector, a spring on the yoke cooperating with the belt connector for resisting longitudinal movement of the connector on the yoke, and a belt engaging jaw carried by said assembly for cooperating with said buckle body for retaining the free end of the belt.

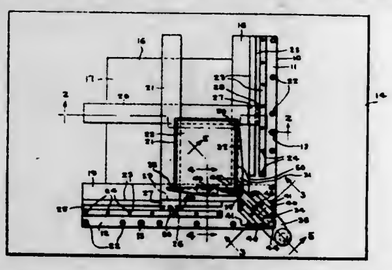


1,902,982. CENTRIFUGAL FILTERING DEVICE. HARRY W. ABBOTT, Chicago, Ill. Filed July 24, 1930. Serial No. 470,287. 5 Claims. (Cl. 210—69.)

1. In a centrifugal filtering device, a rotatable head having a perforated side wall, a top plate having means for admitting material to the wall, the lower end of the wall being open, a plurality of arms extending into close proximity to said perforated wall, means for supplying a blast of air through said arms, and shares carried by

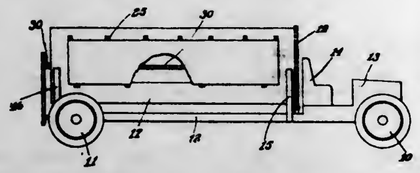
the arms and through which the air blast is delivered for aiding in turning over the material collected on said wall, and removed therefrom by said air blasts.

1,902,983. MARIONETTE CONTROL FRAME AND CORD WIND-UP. STELLA ADLER and CORA BARNES BLANK, St. Louis, Mo. Filed Mar. 4, 1932. Serial No. 596,736. 17 Claims. (Cl. 46—40.)



1. In a device of the kind described, a frame having three cord apertures pierced therethrough at points triangularly positioned relative to one another, three separate cords loosely strung through said apertures, and means upon the frame for drawing up said cords through said apertures.

1,902,984. ADJUSTABLE MASK FOR PHOTOPRINTING MACHINES. JOSEPH L. BARBER, Greeley, Colo. Filed Sept. 5, 1931. Serial No. 561,898. 25 Claims. (Cl. 95—79.)



1. An adjustable mask for photographic printing machines, comprising a pair of fixedly carried negative supporting members arranged perpendicularly to each other and a pair of adjustably carried negative supporting members also arranged perpendicularly to each other and constituting, together with said fixedly carried negative supporting members, an expansible and contractible negative

support of rectangular configuration, and an element of unitary structure, including arms arranged in perpendicular relation to each other, constituting an adjustable,

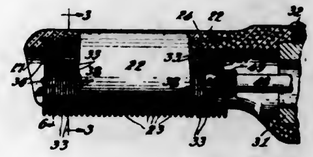
releasable holder for said negative, said unitary element also constituting an adjustable guide and margin adjuster for the printing paper.

1,902,985. REFUSE DISPOSAL TRUCK. JOHN BAJI, New York, N. Y. Filed Mar. 5, 1931. Serial No. 520,185. 4 Claims. (Cl. 214—67.)

1. In a device of the class described, a rotating cylinder, means for rotating said cylinder, said cylinder having an opening therein adapted to receive and discharge refuse, and a blade rotatably mounted inside said cylinder on the axis thereof dividing said cylinder into two equal compartments.

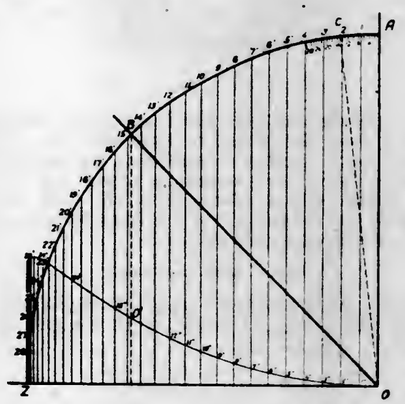
1,902,986. PROCESS OF PRODUCING ACTIVATED CHARCOAL FROM CHARCOAL FINES. MAURICE E. BARKER, Edgewood Arsenal, Md. Filed Dec. 22, 1930. Serial No. 504,205. 20 Claims. (Cl. 252—3.) (Granted under the act of Mar. 3, 1883, as amended Apr. 30, 1928; 370 O. G. 757.)

1. A process for forming primary charcoal comprising wetting a mixture of charcoal fines and wood flour with an acid solution containing a dehydrating agent and carbonaceous material, drying the wetted mass, compressing the mass into briquettes, and heating the briquettes until thoroughly carbonized.



20. A carbonaceous adsorbent produced from a mixture of wood flour and charcoal fines wetted with a solution of zinc chloride and a carbonaceous binder, dried, compressed into briquettes, and heated until thoroughly carbonized.

1,902,987. SAFETY GLASS SEALING INSTRUMENT. FRANK H. BELL, Detroit, Mich., assignor to General Motors Corporation, Detroit, Mich., a Corporation of Delaware. Filed Sept. 15, 1931. Serial No. 562,929. 3 Claims. (Cl. 18—3.5.)

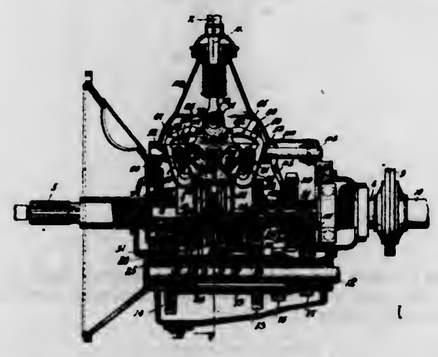


1. An instrument for the purpose set forth comprising a nozzle having a transverse parallel sided guide groove the walls of which are of yieldable material and a duct opening into the groove.

1,902,988. SHAVING MACHINE. GEORGE R. BOTT, Stamford, Conn. Filed Mar. 7, 1931. Serial No. 520,795. 24 Claims. (Cl. 30—12.)

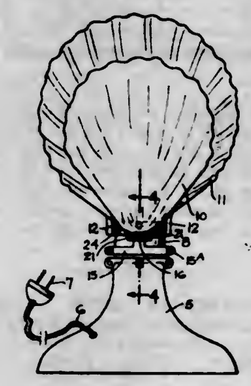
2. Shearing means comprising a molded body having an open gap along one side thereof, together with a series of members molded in said body in fixed spaced-apart relation and curving across said open gap, and the inside faces of said members being ground to provide shearing edges.

1,902,989. ANGLE MULTISECTOR. STUART E. BRAY, U. S. Navy. Filed Sept. 29, 1931. Serial No. 565,808. 2 Claims. (Cl. 33—1.) (Granted under the act of Mar. 3, 1883, as amended Apr. 30, 1928; 370 O. G. 757.)



2. An article of manufacture known as an angle multisector, consisting of a draftman's curve, for use in dividing an angle into "n" equal parts, "n" being any integer, which comprises a straight-edged base of convenient length and a curved edge which is the locus of points determined by the inersections of perpendiculars to a first side from points on the arc of an associated quadrant and arcs of radii equal to the radius of the quadrant with centers which mark one "nth" of the arcs intervening between a second side of the quadrant and the points from which the respective perpendiculars are dropped substantially as herein shown and described.

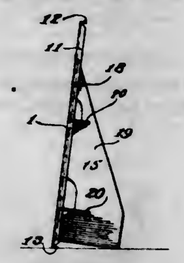
1,902,990. CLUTCH MECHANISM. LEON J. CAMPBELL, Buchanan, Mich., assignor to Hand's Constant Mesh Transmission Company, Chicago, Ill., a Corporation of Illinois. Original application filed Aug. 23, 1930, Serial No. 477,362. Divided and this application filed Feb. 9, 1931. Serial No. 514,668. 15 Claims. (Cl. 192—53.)



1. In a clutch mechanism, the combination with a driving shaft, of a driven shaft disposed in alinement therewith, and means for coupling said shafts including a friction clutch having a driving member positively rotated by the driving shaft and a driven member splined to the driven shaft, a ring normally disengaged from the driven shaft and positively rotatable by the driving shaft, said ring being movable longitudinally relative to the driven shaft and connected with the driven clutch member to

bodily move therewith into and out of positive clutching engagement with the driven shaft, and means for first bodily moving the driven clutch member into frictional engagement with the driving clutch member to synchro-

nize said shafts and for subsequently moving the driven clutch member out of engagement with the driving clutch member and for bodily moving the ring into positive engagement with the spline of the driven shaft.

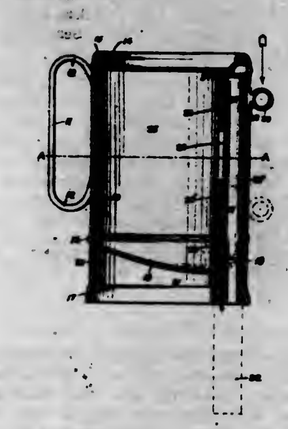


1,902,991. SHELL LAMP. HENRY CARDON, Hillsdale, N. J. Filed Oct. 1, 1930. Serial No. 485,595. 1 Claim. (Cl. 240—108.)

The combination with a lamp comprising a light bulb support, of separable, semi-circular clamp rings arranged to be positioned about said support, means for securing the clamp rings together, an upstanding hinge eye formed on each of said rings, a hinge pin in each of the eyes, a bracket pivoted on each of said pins, a decorative translucent shade on each of said brackets, one of said shades fitting partly within the other shade to substantially conceal said light bulb, ears on said brackets, and springs connecting the brackets of opposite sides to draw the shades toward each other and a screw in each of the brackets for engaging the bulb support for limiting the movement of the shades toward each other.

1,902,992. DISPLAY CARD. ELBERT C. CHITTUM, Catonsville, Md. Filed Dec. 20, 1932. Serial No. 648,054. 7 Claims. (Cl. 40—146.)

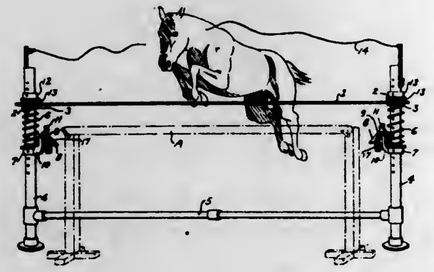
1. The method of making a display card of a single piece of material which consists in printing the subject matter to be displayed on a coardboard of a thickness which can be handled in a cylinder press, cutting the card from the printed surface inwardly toward the back and part way through only, the said cuts forming lines near



to and substantially parallel to the edges to provide hinged edge fins, and turning the fins backwardly to hold the card in flat condition substantially as described.

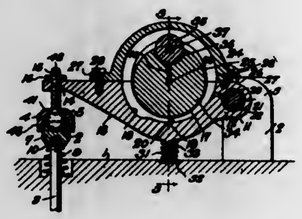
1,902,993. METHOD OF FORMING CELLULAR PRODUCTS. WILLIAM L. ELLERBECK, Salt Lake City, Utah. Filed May 5, 1930. Serial No. 450,066. 2 Claims. (Cl. 106—84.)

1. A method of producing cellular gypsum comprising the addition of perborate salts and water to the gypsum to produce a cellular slow crystallization product.



1,902,994. OIL CAN. WILLIAM T. FAUX, Santa Barbara, Calif. Filed July 26, 1930. Serial No. 470,790. 1 Claim. (Cl. 221—27.)

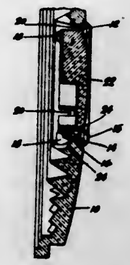
In a device as described the combination of an oil can formed upon one side with an elongated slot, a tubular casing secured against the inner circumference of the can so as to bear in tight contact with the slotted portion thereof, laterally of the medial part of the can, said tubular casing extending practically the full length of the can, being closed at its upper end and open at its lower end, a slide tube snugly and frictionally telescoping in said casing and of a co-extensive length therewith, an eyelet-shaped handle carried by the upper end of the tube, said casing having a slot thru which the handle slidably projects, as the tube is moved downwardly so that its open lower end may project below the can and provide an oil-pouring spout, a floor extending transversely in said can above the lower end thereof, and inclining downwardly towards said casing, said casing being formed with a lateral opening in a plane with said floor, said tube being also formed with a lateral opening of a length



greater than the lateral opening of the casing, the bottom edge of the two slots being located at such a point that when the handle rests thereupon, when the tube is pushed downwardly, the upper part of the lateral opening of the tube will register with the opening of the casing while the lower part thereof will be below the floor of the can.

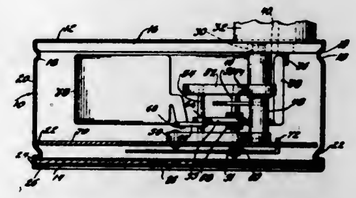
1,902,995. JUMP-TRAINING DEVICE. PAUL B. FLYNN, St. Louis, Mo. Filed Mar. 11, 1932. Serial No. 598,105. 7 Claims. (Cl. 119—1.)

1. A jump-training device for animals, comprising an upwardly movable bar, means for actuating said bar upwardly, and control means operable during the jump of said animal over said bar for controlling the upward movement of said bar by said actuating means.



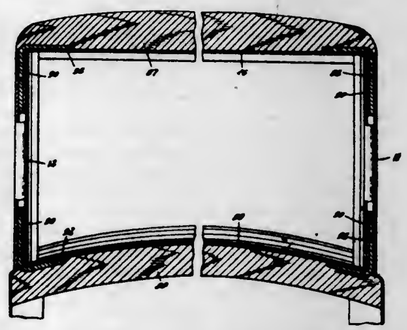
1,902,996. VALVE ACTUATING MECHANISM FOR INTERNAL COMBUSTION ENGINES. PAUL GERARD, Laurel, Mont. Filed Mar. 14, 1930. Serial No. 435,976. 7 Claims. (Cl. 123—90.)

1. A valve actuating mechanism comprising a lever means for flexibly mounting the lever with a valve body means for pivotally mounting the lever resilient means normally urging said lever upwardly, a shaft extending transversely of the lever, a collar carried by the lever and surrounding said shaft, collars carried by said shaft surrounding said shaft and enclosing said collar which is a part of said lever, a cam roller carried by said shaft which is adapted to be surrounded by said collar which is a part of said lever, a cam surface forming a part of said collar which is a part of said lever and adapted to be engaged by said roller.



1,902,997. LENS MOUNTING. CHARLES E. GODLEY, Ypsilanti, Mich., assignor to General Motors Research Corporation, Detroit, Mich., a Corporation of Delaware. Filed Nov. 21, 1931. Serial No. 576,446. 8 Claims. (Cl. 240—151.)

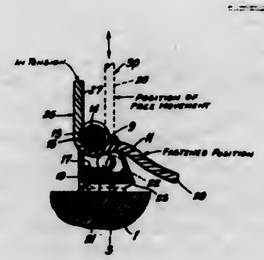
1. An annular lens, a bezel fitted in the aperture in the lens, and having a portion engaging one face of the lens to limit its insertion in the aperture, a lens in the bezel, said bezel being provided with tabs extending between the lenses, said lenses being provided with opposed notches opposite said tabs and having upwardly inclined faces, said tabs being twisted in spiral fashion so as to



cause portions thereof to engage said inclined faces drawing said lense and bezel into tight engagement with each other and holding them there.

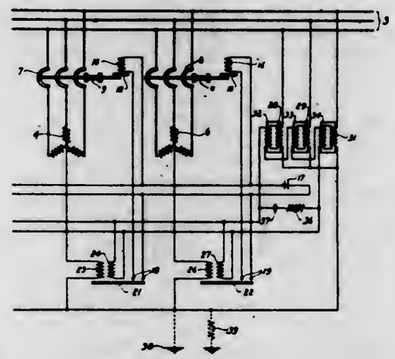
1,902,998. GAUGE. EDMUND E. HANS, Detroit, Mich., assignor to A C Spark Plug Company, Flint, Mich., a Company of Michigan. Filed Feb. 17, 1928. Serial No. 255,060. 11 Claims. (Cl. 73—109.)

6. In a gauge having a pointer and a Bourdon tube, a base plate, a plurality of supporting plates supported from said base plate by a common post mounted near the edge of the base plate, and means connected to said tube and mounted by said plates for operating said pointer, said means including a member having a substantially straight line motion on a line passing through the tube end and the post.



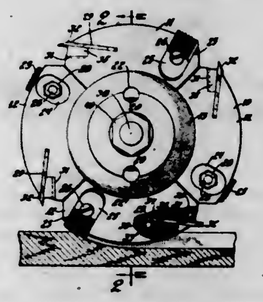
1,902,999. AUTOMOBILE BODY. FRANK HUMER, Detroit, Mich., assignor to General Motors Corporation, Detroit, Mich., a Corporation of Delaware. Filed July 8, 1929. Serial No. 375,781. 4 Claims. (Cl. 296—28.)

1. In a body construction for vehicles having a windshield, hollow door posts at opposite sides of said windshield, a cross brace extending between said posts, and bent ends on said brace received and secured in the hollow of said posts.



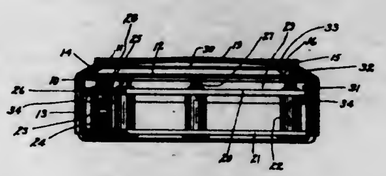
CARNEGIE LIBRARY OF ATLANTA

1,903,000. FASTENER. ACHILLES E. JANNOPOULO, Webster Groves, Mo. Filed June 6, 1932. Serial No. 615,574. 4 Claims. (Cl. 24—136.)



1. A fastener comprising a body member having spaced walls, a grooved roller rotatable between said walls having a cord in said groove, one reach of which cord is normally tensioned and the other of which is normally loose, a member inclined toward said roller and located between said walls, a second member angularly located with respect to said inclined member, a ball imprisoned between the said walls and said angularly located members and the roller, said normaly loose reach of the cord being clear of the ball in one range of positions and engaging the ball in the normally loose position to cause the ball to approach the grooved roller and grip the cord upon incipient movement thereof.

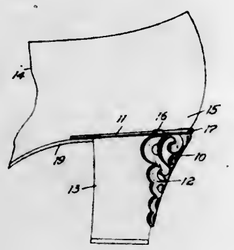
1,903,001. PROTECTIVE SYSTEM. JULIUS JONAS, Baden, Switzerland, assignor to Aktiengesellschaft Brown Boveri & Cie., Baden, Switzerland, a Joint-Stock Company of Switzerland. Filed Jan. 18, 1930, Serial No. 421,677, and in Germany Jan. 21, 1929. 9 Claims. (Cl. 175—294.)



1. In a system for selectively protecting electrical devices from short circuits, a polyphase line, a plurality of polyphase electrical devices each having a neutral point, said devices each being connected to said line, and common means connected between the neutral point of each of said devices and said line for selectively causing the disconnection from said line of any one said devices upon the occurrence of a fault therein.

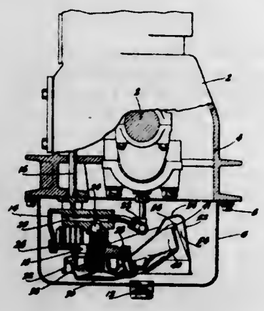
1,903,002. GAINING HEAD. THOMAS J. JOHNSON, Flint, Mich. Filed Sept. 6, 1928. Serial No. 304,800. 1 Claim. (Cl. 144—218.)

In a device of the class described, a body portion including two parts each of which includes a substantially circular central portion, diametrically opposite projections extending outwardly from each of the central portions and adapted to interfit with the projections on the other central portion to form a substantially circular head, axial recesses formed in the juxtaposed faces of the two central portions, a boss extending axially from one of said central portions and into an axial bore in the other of said central portions, an adjusting member located in said recesses and in screw-threaded engagement with said boss, gear teeth on the periphery of said adjusting member, and a bore through one of said central portions through which a key having gear teeth thereon is adapted to be inserted to engage the teeth thereof with the teeth on the adjusting member to adjust the two parts of the body portion axially.



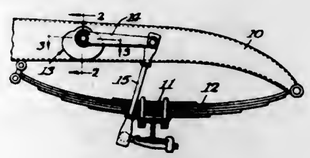
1,903,003. WATCH. ARTHUR L. MANSFIELD, Bristol, Conn., assignor to The E. Ingraham Company, Bristol, Conn., a Corporation. Filed Apr. 28, 1930. Serial No. 447,858. 2 Claims. (Cl. 58—127.)

1. In a watch, the combination with the case-shell formed with an integral inwardly-turned crystal-retaining flange; of a crystal seated against the said flange; a move-



ment installed in the said case-shell; a dial-plate also installed in the said shell; means carried by the said movement independently of the case-shell for supporting the said dial-plate in spaced relation with respect to said movement; and a ring secured to the said movement within the said case-shell, engaging the upper surface of the said dial-plate for retaining the same in place, and formed with an inturned crystal-retaining flange complementing the crystal-retaining flange of the said case-shell for holding the said crystal in place thereagainst.

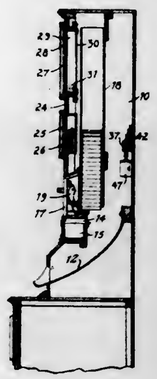
1,903,004. SHOE HEEL ORNAMENT. PAUL MARIANI, New York, N. Y. Filed Oct. 13, 1930. Serial No. 488,286. 2 Claims. (Cl. 41—10.)



1. A shoe heel ornament as characterized, comprising an attaching means for a pendant, said attaching means comprising wire-like material flattened so as to have a less height than width thereby obtaining rigidity in the direction of greatest width and enabling the attaching means to rest entirely between the last of a shoe and an attached part by virtue of the flattening of said material.

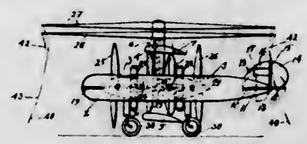
1,903,005. OIL PUMP SCREEN. CHARLES LE ROY MCCUEN, Lansing, Mich., assignor to General Motors Corporation, Detroit, Mich., a Corporation of Delaware. Filed Nov. 20, 1930. Serial No. 496,928. 4 Claims. (Cl. 184—6.)

1. In combination with an oil receptacle and an oil pump located therein, a screen between the pump inlet and the oil receptacle, said screen having a portion thereof extending above the oil level in the receptacle, and means for causing the oil to flow over said portion to the inlet when the screen becomes impervious to oil.



1,903,006. SHOCK ABSORBER. GEORGE KENNETH MCKEE, Cincinnati, Ohio. Filed June 15, 1931. Serial No. 544,423. 14 Claims. (Cl. 188—89.)

1. A hydraulic shock absorber comprising a casing and a piston therein and having a restricted by-pass and an auxiliary passage for the flow of liquid around the piston, and a pressure-operated valve normally closing said auxiliary passage and arranged to gradually restrict the flow through said passage as the valve is moved away form its normal closed position.

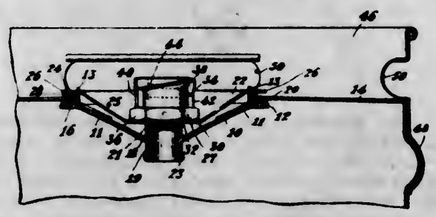


1,903,007. [WITHDRAWN.]

1,903,008. VENDING MACHINE SIGN ILLUMINATING MECHANISM. STEPHEN MICHLIK, Brooklyn, and CHARLES L. O'REILLY, New York, N. Y., assignors to Sanitary Automatic Candy Corporation, a Corporation of New York. Filed Feb. 28, 1930. Serial No. 432,028. 3 Claims. (Cl. 40—130.)

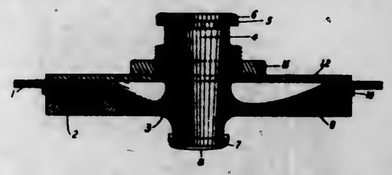
1. In a vending machine, a sign to be illuminated, electric lighting units to illuminate the same, a circuit supplying current to said units and means to control the energising of the same, said means including a second circuit, a solenoid therein, a switch actuated by the solenoid and included in said first circuit to make and break the same, and means actuated by the operation of the vending mechanism to energize said second circuit.

1,903,009. FLYING MACHINE. GEORGE FRANCIS MYERS, New York, N. Y. Original application filed Nov. 4, 1926, Serial No. 146,092. Divided and this application filed Jan. 22, 1931. Serial No. 510,873. 29 Claims. (Cl. 244—15.)



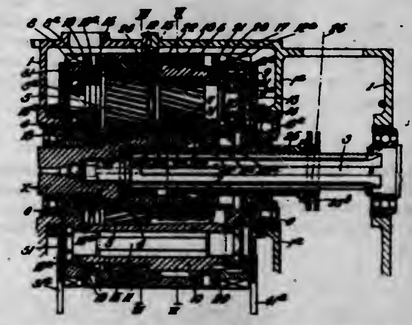
1. In combination with a flying machine, of a helicopter propeller, and a tail unit comprising an elevator, a stabilising plane, a fixed fin, an airplane rudder, and a helicopter rudder mounted longitudinally in line with the said airplane rudder and contiguous thereto.

1,903,010. HEAD RETAINER FOR DRUMS AND THE LIKE. CHARLES H. ROLLASON, Wheeling, W. Va., assignor to Wheeling Steel Corporation, Wheeling, W. Va., a Corporation of Delaware. Filed May 18, 1931, Serial No. 536,971. Renewed June 3, 1932. 14 Claims. (Cl. 220—61.)



1. A head retaining device for metal containers, comprising a split resilient ring adapted to be contacted into and expanded out of embracing relation to relatively seated rim portions of the drum and its head, a saddle plate pivoted at its rear end on one of the meeting ends of said ring and movable vertically into and out of overlying seated relation to the opposite end, and a lever having a pivotal mounting on said ring and a pivotal connection to said saddle plate, said lever being vertically shiftable for effecting contraction and expansion of said ring.

1,903,011. CLOSURE FOR METAL CONTAINERS. EMILIO ROSENBLUETH, Mexico, Mexico, assignor, by mesne assignments, to A. Gusmer, Inc., Woodbridge, N. J. Filed Oct. 22, 1931, Serial No. 570,379, and in Mexico Nov. 18, 1930. 3 Claims. (Cl. 220—25.)

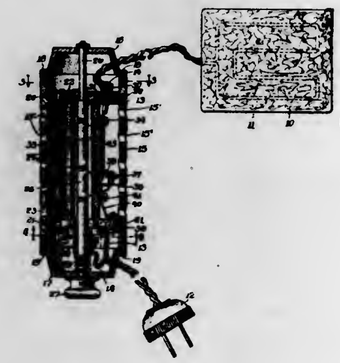


1. In combination with a shipping container having a clean out opening in its wall, an outwardly flanged outer closure plate for said opening arranged within the container and provided with a central opening therethrough and oppositely disposed recesses in the flanged portions thereof, an outwardly flanged inner curvate plate for the opening arranged in contact with the inner wall around the opening, a threaded tube extending through the center of the inner plate and the opening of the outer plate, a ring attached at right angles to the plane surface of the inner plate, a pair of oppositely disposed lugs projecting from the inner marginal edge of the flanged portion of the inner plate and contained by the recesses of the outer plate, a gasket surrounding the ring and lying intermediate the inner plate and all around the opening of the container thereof, and threaded removable means for engagement with the tube whereby to draw the plates in clamping position against the wall of the container around the opening of said container to effect a leakage proof closure.

1,903,012. CLOSURE FOR METALLIC BARRELS OR CONTAINERS. EMILIO ROSENBLUETH, Mexico, Mexico. Filed May 10, 1930, Serial No. 451,218, and in Mexico Apr. 21, 1930. 3 Claims. (Cl. 220—24.)

1. In a barrel or container, a closure device comprising a lower plate having an upper and lower extension with a bored portion protruding above and below said plate, an upper plate with an opening container the upper extension of the lower plate, said upper extension being threaded, and means for making engagement with the threaded portion of the extension whereby to bring the plates in close contact against the barrel or container wall.

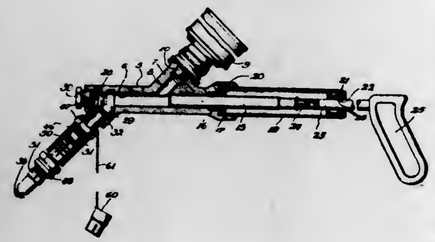
1,903,013. POWER TRANSMISSION MECHANISM. PIERO MARIANO SALERNI, Westminster, England. Filed Oct. 7, 1930, Serial No. 486,997, and in Great Britain Oct. 16, 1929. 34 Claims. (Cl. 74—34.)



1. In power transmission mechanism or epicyclic gearing of the kind in which there is a rotatable member which is adapted to reverse its direction of rotation and adapted to be held against such reversal rotation in order to establish a driving connection, means for engaging and locking the member to be held against such rotation, means adapted to be operated to permit the said locking means to engage with the said member when the said member starts to reverse its direction of rotation, and means whereby the locking means are caused to engage with the said member at or about the instant when its rotation reverses.

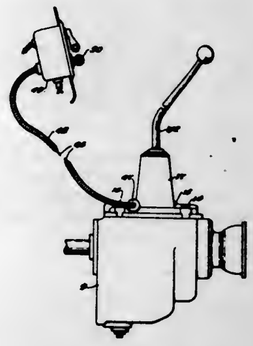
1,903,014. UNFERMENTED MILK PRODUCT. ROBERT P. MYERS, Baltimore, Md., assignor to Research Laboratories of National Dairy Products Corp. Inc., Baltimore, Md., a Corporation of Maryland. Filed Oct. 21, 1931. Serial No. 570 258. 2 Claims. (Cl. 99—11.)

1. The process of making a sweet unfermented acidophilus milk of milk-like consistency which comprises homog-



enizing sweet milk, pasteurising, and suspending in the homogenised, pasteurized milk *Lactobacillus acidophilus* in numbers to produce a therapeutically effective product and maintaining the milk at a temperature sufficiently low to inhibit growth of the organisms and formation of lactic acid and prevent souring of the milk.

1,903,015. ELECTRIC HEATING PAD AND CONTROL THEREFOR. GODFREY STEBBUP, Maywood, Ill., assignor to Seric Products Company, Chicago, Ill., a Partnership consisting of Henry L. Charbonneau and Francis J. Dashner. Filed Sept. 29, 1930. Serial No. 485,028. 4 Claims. (Cl. 219—46.)



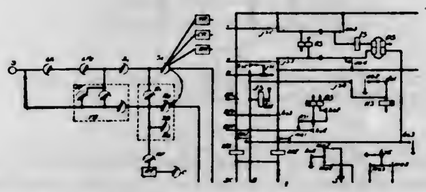
1. The combination with a pad having a heating element, of a normally open thermostatic switch in the circuit of said heating element and outside of said pad, and a heating resistor for closing said switch connected in series with said heating element, said switch being arranged to short circuit said heating resistor, and said resistor, when in circuit, reducing the flow of current through said heating element.

1,903,016. DECARBONIZING APPARATUS. GEORGE F. THOMAS, Berwyn, Ill., assignor to Alemite Corporation, Chicago, Ill., a Corporation of Delaware. Filed June 17, 1930. Serial No. 461,812. 11 Claims. (Cl. 299—99.)

7. In a device for supplying a carbon removing liquid to the combustion chamber of an internal combustion engine, a discharge nozzle adapted to enter the spark plug port of a combustion engine, means for supplying liquid to said nozzle, and an adjustable sleeve frictionally engaging said nozzle and having a shoulder for limiting the depth at which such nozzle shall be lowered into the combustion chamber.

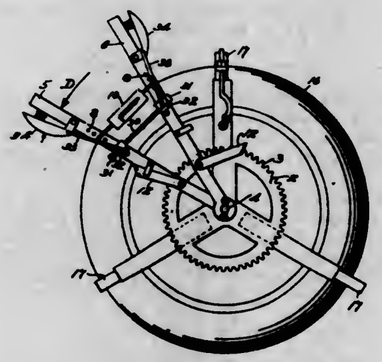
1,903,017. TRANSMISSION LOCK. EDWARD F. WARREN and HERMAN SCHWARZE, Birmingham, Mich., assignors to General Motors Corporation, Detroit, Mich., a Corporation of Delaware. Filed Nov. 30, 1927. Serial No. 236,832. 23 Claims. (Cl. 70—127.)

1. A cover for a change-speed mechanism case, a supporting plate secured to the cover, a shifter-plate slidably mounted on the supporting plate, means for operating the shifter plate, a channel-shaped locking member adapted to be moved upon movement of the shifter plate in one direction, and means to lock the locking member against movement.



1,903,018. MOPSTICK HEAD. JOSEPH W. WOHLHIETER, East Orange, N. J., assignor to Keystone Stamping Corporation, a Corporation of New Jersey. Filed Mar. 25, 1931. Serial No. 525,066. 5 Claims. (Cl. 15—147.)

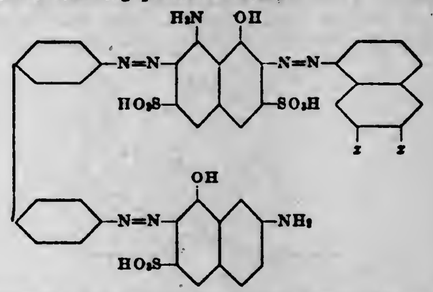
1. In a mopstick head construction, the combination of a head member having a securing portion by which it may be attached to a handle stick and having a projecting terminal socket portion of substantially rectangular cross section, said socket portion having two parallel walls and two outwardly flaring walls, each of said parallel walls being provided with a longitudinal slot, a pair of T-shaped mop-gripping members the T-heads of which form parallel gripping jaws and the stems of which extend into said socket portion respectively adjacent to its flaring walls, pivot means connecting the inner ends of said stems and slidable in said slots, the edge portions of said flaring walls and the adjacent outer sides of said stems forming cooperating cam elements which draw said gripping jaws together when said pivot means is retracted along said slots, a spring acting to retract said pivot



means along the said slots for causing said jaws to grip the mop, and manually operable means for releasing said spring and for thereafter moving said pivot means outwardly along said slots for thereby permitting said gripping jaws to open.

1,903,019. AUTOMATIC OR SEMIAUTOMATIC TELEPHONE EXCHANGE SYSTEM. EDMOND PHILIP GOODWIN WRIGHT and GEORGE CLIFFORD HARTLEY, Aldwych, London, England, assignors to International Standard Electric Corporation, New York, N. Y. Filed Jan. 6, 1931, Serial No. 506,884, and in Great Britain Jan. 7, 1930. 18 Claims. (Cl. 179—18.)

1. In a telephone system comprising a plurality of exchanges and junction lines interconnecting said exchanges, the combination of register translators at said exchanges, means independent of said register translators for establishing a direct connection between one exchange and another, means for establishing an indirect connection between said exchanges under control of said register translators, and means whereby calls over said direct connection may be set up independently of said register translators under direct control of a calling party.

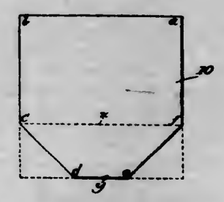


1,903,020. BRAKE TESTER. JOHN ZENZ and HOMER R. KENNEDY, Los Angeles, Calif.; said Zenz assignor to said Kennedy. Filed Feb. 24, 1931. Serial No. 517,783. 5 Claims. (Cl. 265—1.)

3. A brake tester of the class described and having a pair of levers, a force indicator connecting the levers, and manually operative means to lock and operate the levers together without function of the indicator and releasable at will while the levers are in action to throw the indicator into effect.

1,903,021. TRISAZO DYE. FRITHJOF ZWILGMEYER, Hamburg, N. Y., assignor to National Aniline and Chemical Company, Inc., New York, N. Y., a Corporation of New York. Filed Apr. 18, 1930. Serial No. 445,527. 2 Claims. (Cl. 260—72.)

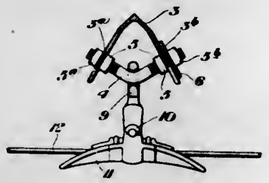
1. A trisazo dye which in the free state corresponds with the following probable formula:



wherein one *a* is a hydrogen atom and the other *a* is a sulfo-group, said dyestuff in the dried and pulverised state in the form of its sodium salt being a black powder soluble in water, and soluble in concentrated sulfuric acid to give a blue solution; and dyeing cotton gray to blue-black shades.

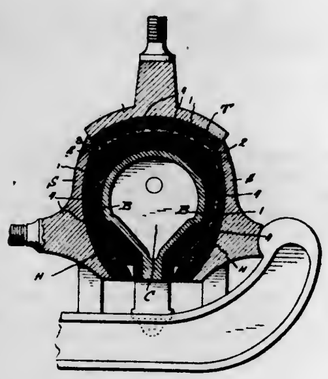
1,903,022. PLUNGER TYPE PEN. GERALD L. BASSETT, Toledo, Ohio, assignor to The Conklin Pen Company, Toledo, Ohio, a Corporation of Ohio. Filed Apr. 20, 1931, Serial No. 531,568. Renewed Sept. 21, 1932. 10 Claims. (Cl. 120—47.)

1. In a fountain pen, a barrel presenting a tubular reservoir, a piston reciprocable in said reservoir, a pair of telescoping interconnected screw members, and a telescoping non-rotatable connection between one of said screw members and said piston.



1,903,023. BUILDING COVERING. EDWARD ROSCOE BLACK, Chicago, Ill., assignor to Black Systems, Inc., Chicago, Ill., a Corporation of Illinois. Filed Aug. 20, 1931. Serial No. 558,236. 3 Claims. (Cl. 108—8.)

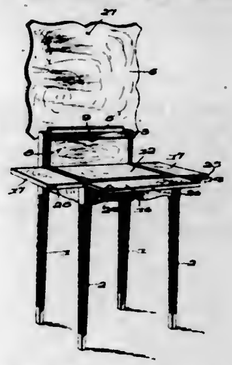
1. A building covering unit comprising a sheet of weather-proof material defined by six straight edges arranged to form six enclosing angles, two of said angles



being of substantially ninety degrees each and the remaining four angles being of substantially one hundred thirty-five degrees each, and the length and breadth of the unit being substantially equal.

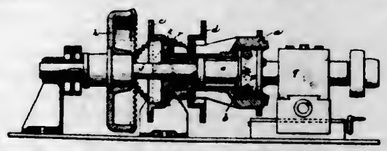
1,903,024. SUSPENSION HANGER. WILLIAM M. BROCK, East Windsor, Ontario, Canada. Filed Nov. 26, 1932. Serial No. 644,528. 4 Claims. (Cl. 248—31.)

1. A suspension hanger comprising an angle beam having a hole in one flange thereof, a slot in the other flange of said angle beam disposed opposite said hole, a bolt extending through said hole and said slot, a pair of nuts on said bolt, one on either side of said hole, a nut on said bolt adjacent said slot, a plate having a hole through which the bolt extends from said slot, a nut on the end of said bolt and in abutment with said plate, and means to secure said plate to said flange.



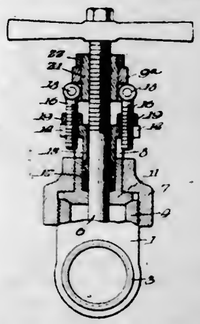
1,903,025. TIRE REPAIR VULCANIZER. JAMES H. BROWNE, East Liverpool, Ohio. Filed July 10, 1931. Serial No. 550,031. 5 Claims. (Cl. 18—18.)

1. As a new article of manufacture, a deformable cushion adapted to be disposed over the inner face of the pressure plate of a vulcanizer, said cushion being provided with a pocket, a potential heating means carried by the cushion and arranged at the base of the pocket, a flexible heating pad made of heat conductive material arranged within the pocket and having portions directly contacting with the potential heating means.



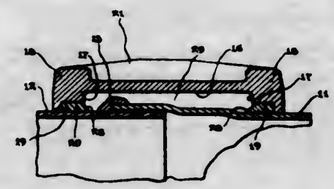
1,903,026. COMBINATION TABLE. LEO J. BUCKLEY, Binghamton, N. Y. Continuation of application Serial No. 533,742, filed Apr. 29, 1931. This application filed Feb. 4, 1932. Serial No. 590,954. 15 Claims. (Cl. 45—70.)

1. In a cabinet, the combination of a shelf, a back, and front walls, and sides, a top hinged to the back wall and arranged for closing the walls and sides and for raising to an elevated position, and a hinge for the lower



edge of the front wall arranged to lower said wall to an approximately horizontal position.

1,903,027. APPARATUS FOR FORMING SINE TRACKS. HENRI CAPDET, Toulouse, France. Original application filed Nov. 29, 1929, Serial No. 410,591, and in France Nov. 12, 1929. Divided and this application filed Nov. 25, 1930. Serial No. 498,195. 6 Claims. (Cl. 90—13.4.)

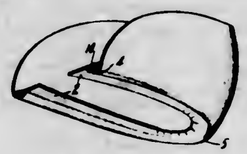


1. An apparatus for cutting a sine track at the end of a guide cylinder, comprising a tool having a stationary axis and adapted to cut the end portion of said cylinder, in combination with a rotary shaft adapted to rotate the cylinder about its axis, means for causing the cylinder to reciprocate on said shaft, a toothed crown integral with said shaft, two pinions meshing with said toothed crown, two cams having a circular edge and mounted each eccentrically on the axis of one pinion, two plates integral with said reciprocating cylinder, perpendicular to the axis thereof and adapted to bear on the edge of said cams, whereby a sinusoidal movement is given the cylinder while the tool cuts the sine track therein.

1,903,028. EXTERNALLY SUSPENDED GLAND STUD. RALPH G. CARLSON, Chicago, Ill., assignor to Crane Co., Chicago, Ill., a Corporation of Illinois. Filed Aug. 5, 1931. Serial No. 555,271. 2 Claims. (Cl. 286—31.)

2. In a valve structure, a body having a valve stem extending therethrough surrounded by a stuffing box, a packing gland arranged to compress the packing around said stem, a yoke extending from said body, a removable stem bushing secured to said yoke above said box, a pair of studs pivoted to said bushing and means thereon arranged to force the gland into said stuffing box.

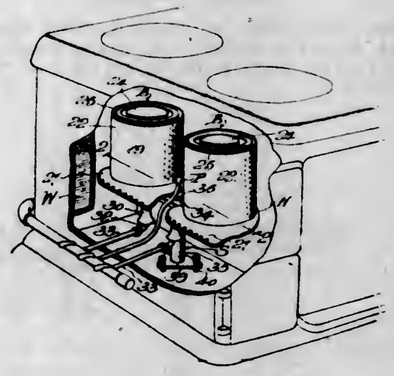
1,903,029. PIPE COUPLING. WILLIAM B. DAMSEL, New York, N. Y., assignor to Victaulic Company of America, New York, N. Y., a Corporation of New Jersey. Filed May 7, 1930. Serial No. 450,535. 4 Claims. (Cl. 285—99.)



1. A repair ring for pipe lines or the like, comprising a sectional sleeve encircling the pipe line, and endless gaskets bearing against the exterior of the pipe line and secured in position by said sections, each gasket having parti-circular side portions and portions connecting the side portions and extending axially of the ring.

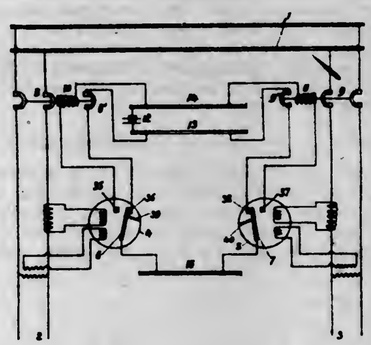
1,903,030. PROCESS FOR THE MANUFACTURE AND PURIFICATION OF PARANITRANILINE. ALEX BROOKING DAVIS, Cincinnati, Ohio, assignor to Monsanto Chemical Works, St. Louis, Mo., a Corporation of Missouri. Filed Jan. 18, 1929. Serial No. 333,528. 2 Claims. (Cl. 260—130.5.)

1. The process of removing dinitrodiphenylamines from commercial paranitraniline by dissolving the diphenylamine compounds out with hot aqua ammonia of approximately 1% ammonia strength.



1,903,031. COUNTER STIFFENER. MILTON L. DODGE, Newburyport, Mass. Filed Apr. 19, 1930. Serial No. 445,582. 4 Claims. (Cl. 36—68.)

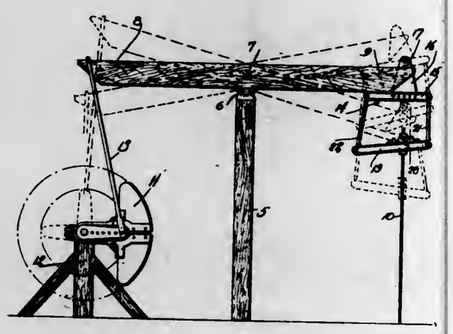
1. A counter stiffener having a sole-attaching flange, said flange having a thickened margin formed to present a substantially flat upper face and a downwardly extending bead extending a substantial distance inwardly of the inner side wall of the stiffener about its margin on its lower face.



1,903,032. BURNER. HOMER D. DUFAULT, Easthampton, Mass., assignor, by direct and mesne assignments, of one-sixth to Alderic Fugere, one-sixth to Euclide Fugere, one-sixth to Adam Boucher, one-sixth to Henry Bernier and one-sixth to Hiram Bernier, Easthampton, Mass. Filed Mar. 28, 1932. Serial No. 601,679. 3 Claims. (Cl. 158—116.)

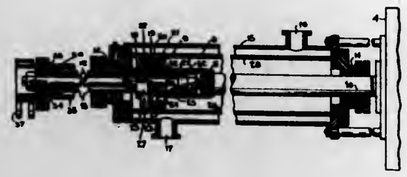
1. In a burner, a horizontal upwardly discharging burner ring, a short substantially straight horizontal fuel conduit joined to and communicating with said ring, said conduit being substantially tangential to the outer periphery of said ring and having fuel discharge means

adapted to outwardly discharge fuel for heating a waterback or the like, and a fuel inlet for said ring and conduit.



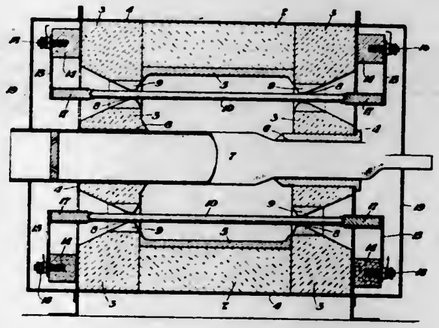
1,903,033. PROTECTING DEVICE FOR ELECTRIC DISTRIBUTING SYSTEMS. LUCIEN GEORGES DUPUIS and GEORGES TINEL, Paris, France, assignors to Union d'Electricite, Paris, France, a Company of France. Filed Nov. 3, 1927, Serial No. 230,874, and in France Mar. 5, 1927. 3 Claims. (Cl. 175—294.)

1. A protective device for electric distributing systems constituted by networks connected by groups of feeders working in parallel, comprising a circuit breaker at each end of each feeder, a trip coil adapted to open said circuit breaker, a directional watt-metrical relay including a working contact, a rest contact and a movable part adapted to come into contact with either of the first mentioned contacts, means normally retaining the movable part on the rest contact and acting to permit the movable part to engage the working contact when the feeder receives an amount of energy above a predetermined value; means connecting said relay with the corresponding feeder whereby the movable part may engage the working contact when the feeder receives energy by the considered end, a source of electric supply at each station for each group of feeders, a first and a second conductor connected each with one pole of said source, an auxiliary conductor, means connecting one end of the trip coils of the group of feeders with the first conductor, means connecting the second end of said trip coils with the auxiliary conductor when the movable part of the corresponding relay engages



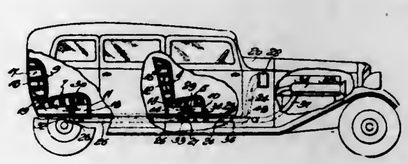
the working contact, means connecting the auxiliary conductor with the second conductor when the movable part of one at least of the relays is engaged with the rest contact.

1,903,034. STRAIGHT LIFT BEAM HANGER FOR OIL WELL PUMPING RIGS. CARL EURIT, Tulsa, Okla. Filed June 24, 1932. Serial No. 619,150. 10 Claims. (Cl. 74—5.)



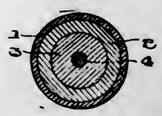
1. In a straight lift beam hanger for oil well pumping rigs, in combination, the pumping end of a walking beam, the upper end of a polish rod and a link frame structure interposed between the walking beam and polish rod and being of trapezium form, the link frame structure including upper and lower link members formed of spaced bars, a pivot block for the walking beam between the bars of the upper link member and notched blocks on the bars of the lower link member for the pivotal support of a polish rod clamp.

1,903,035. RETARDING DEVICE FOR MACHINERY. SYDNEY EDWARD THACKER EWING and ARTHUR LINDSEY EGAN, Johannesburg, Transvaal, Union of South Africa. Filed Aug. 17, 1931, Serial No. 557,686, and in Union of South Africa Aug. 18, 1930. 10 Claims. (Cl. 188—96.)



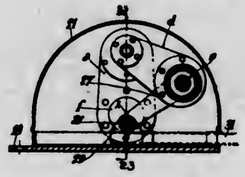
1. A braking device comprising a cylinder adapted to contain liquid, a piston reciprocable therein, a piston rod and tail rod of equal diameter extending from the piston through the cylinder ends, said piston comprising relatively rotatable units providing a passage through the piston the effective area of which is varied by relative rotation of the piston units, and said tail rod being rotatable and connected to one of said piston units to rotate the latter, and means for preventing rotation of another of said piston units.

1,903,036. CARBON COMBUSTION FURNACE. CHARLES B. FRANCIS, Pittsburgh, Pa. Filed July 14, 1931. Serial No. 550,778. 10 Claims. (Cl. 219—36.)



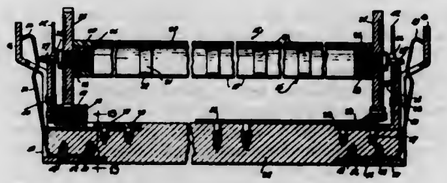
10. In a furnace of the kind described a mume tube having an end reduced to provide a shoulder bearing against a wall of the furnace, the reduced end extending out through said wall.

1,903,037. CAR HEATING, COOLING, AND VENTILATING MEANS. IVAN N. FRAVER, West Reading, Pa. Filed Aug. 14, 1931. Serial No. 557,179. 5 Claims. (Cl. 98—2.)



5. In combination with a motor driven car having a cowl, said cowl being provided with air admission openings in opposite sides and with vanes for directing air into said openings; an air conducting pipe having a branched end portion whose branches communicate at their outer ends with said openings, said branches extending downwardly to the body portion of the pipe, the latter extending rearwardly under the floor of the car and upwardly through said floor, and a power operable blower whose outlet communicates with said pipe between said branches.

1,903,038. FELT RUBBER ROLLER. TOKUTARO FUJII, Azabu Ku, Tokyo, Japan, assignor to Eijiro Yamamoto, Tokyo, Japan. Filed Sept. 29, 1930, Serial No. 485,333, and in Japan Dec. 10, 1929. 2 Claims. (Cl. 91—67.8.)

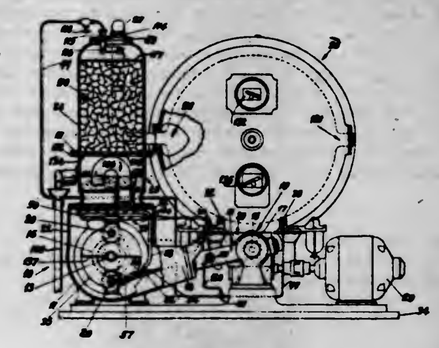


1. An inking roller comprising a stock, a layer of felt wound around the stock, a layer of spongy rubber on the felt layer, and a tubular felt covering impregnated with vulcanized rubber compound.

1,903,039. DEVICE FOR INTERLOCKING TWO MOVEMENTS. MARCEL LOUIS GIANOLI, Paris, France. Filed June 2, 1930, Serial No. 459,004, and in France June 7, 1929. 5 Claims. (Cl. 74—14.)

4. In a device for connecting two members journalled about the same axis, one of said members having a slide extending through and beyond its pivoting axis, a link pivoted at one end to the free end of the other member, a guide member carried by said link and engaging said slide, and means for moving the guide member into coaxial relation to the axis of rotation of said members to permit free rotation of the latter.

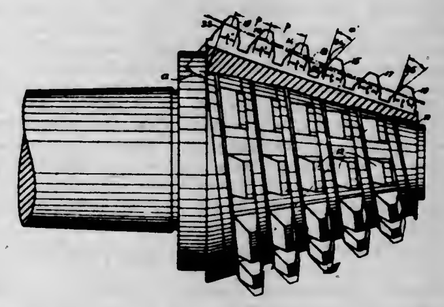
1,903,040. BEAM AND MOUNTING FRAME FOR AXMINSTER LOOMS. JOSEPH GOCH, Amsterdam, N. Y. Filed Apr. 22, 1932. Serial No. 606,996. 13 Claims. (Cl. 139—10.)



1. In a beam and mounting frame for Axminster machines, a beam of tubular formation longitudinally slotted along one side whereby the ends of yarn to be wound on the beam are adapted to be moved through the slot and confined within the tubular beam by frictional engagement with the walls thereof.

1,903,041. WATER TREATMENT. RALPH E. HALL and HENRY A. JACKSON, Mount Lebanon, Pa., assignors to John M. Hopwood, Dormont, Pa. Filed Nov. 28, 1929. Serial No. 409,416. 18 Claims. (Cl. 210—23.)

1. The process of treating the water in a steam boiler, which comprises supplying to the boiler water a chemical containing a molecularly dehydrated phosphate radical which is rehydrated in the water in the boiler to a condition of greater alkali-neutralising capacity.

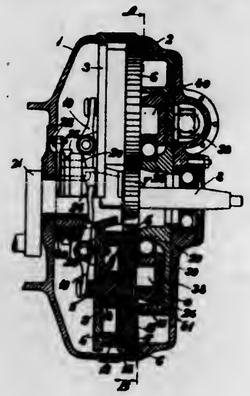


1,903,042. OIL GAS GENERATOR. LEONARD B. HARRIS, New York, N. Y., assignor to H. O. G. Holding Corp., New York, N. Y., a Corporation of New York. Filed Feb. 2, 1931. Serial No. 512,897. 14 Claims. (Cl. 48—94.)

1. In apparatus for generating oil gas, an oil gas generating chamber, a plurality of continuously heated heating elements rotatably mounted in said chamber, each heating element being alternately brought into an oil

spraying zone in said chamber and out of said zone into a non-spraying zone.

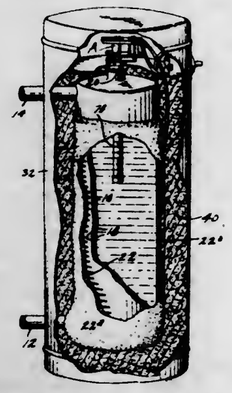
1,903,043. METHOD OF CUTTING GEARS. ERNEST C. HEAD, Rochester, N. Y., assignor to Gleason Works, Rochester, N. Y., a Corporation of New York. Original application filed Nov. 28, 1928, Serial No. 322,498. Divided and this application filed July 16, 1930. Serial No. 468,353. 20 Claims. (Cl. 90—4.)



1. The method of cutting a tapered gear which comprises positioning a hob, whose teeth are arranged in a thread, the pitch of which conforms to a definite law, but in which some of the teeth measured on a surface of revolution coaxial with the hob vary in thickness from the normal thickness of corresponding teeth of a thread of the selected pitch, so that said hob extends diagonally across the face of the tapered blank from the outer to the inner end of the tooth zone thereof and rotating said hob and blank continuously in intermeshing engagement.

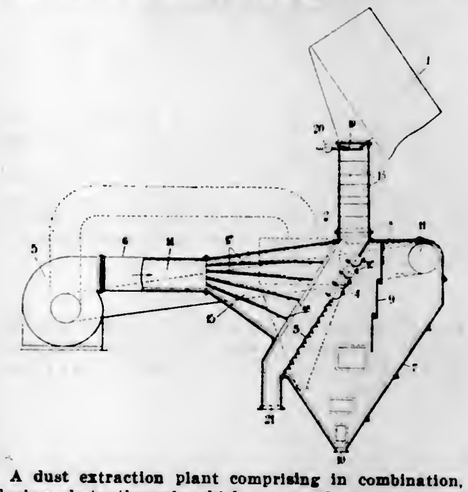
16. The method of cutting a tapered gear which comprises positioning a taper hob, having teeth arranged in a continuous thread, which are of uniform thickness measured lengthwise of the hob along a circular arc, and which have cutting edges of varying pressure angle from one end of the hob to the other, so that said hob extends diagonally across the face of a tapered gear blank from the outer to the inner end of the tooth zone thereof, and rotating the hob and blank continuously in intermeshing engagement.

1,903,044. POWER TRANSMISSION MECHANISM. CHARLES EDOUARD HENRIOD, Areuse, Switzerland. Filed Feb. 4, 1931, Serial No. 513,411, and in France Feb. 17, 1930. 4 Claims. (Cl. 74—54.)



1. In a progressive change speed mechanism, the combination of a drive shaft, a flywheel on the drive shaft and

having one face provided with a series of rings, a driven shaft in axial alignment with the drive shaft and carrying a sun wheel, a planetary wheel mounted on each of said rings on the flywheel and being guided in rotation by the exterior surface of the ring, a disc carrying a crank pin mounted and guided in rotation in the interior of each of said rings, a member slidable in parallel direction to the axis of said shafts in the center of each planetary wheel and disc and extending through the flywheel, a lever for each slidable member oscillatably mounted on the flywheel and operatively connected to said slidable member, means acted upon by each said sliding member

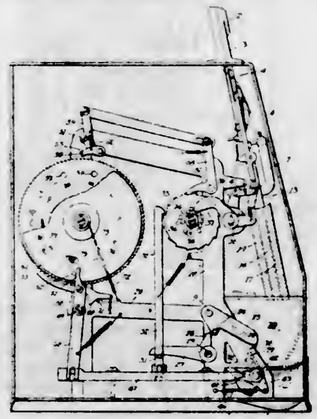


for locking each said planetary wheel to each said disc provided with the crank pin, a disc movable about an axis parallel to the axis of said shafts, an operating shaft connected to said disc, a ring movable on said disc and forming an annular passageway engaging the crank pin of the disc mounted in the interior of each of said rings on the flywheel, a cam arranged to coact with said levers and rotatable around the central axis of the flywheel, means for operatively connecting the cam with the operating shaft, an axially movable cam adapted to act on said lever, and means for operatively connecting said second mentioned cam to the operating shaft.

1,903,045. METHOD OF MANUFACTURING AN ELECTRIC WATER HEATER. LEE WALLIS HODGES, Defiance, Ohio, assignor, by mesne assignments, to Lectrolite Corporation, Defiance, Ohio, a Corporation of Ohio. Filed May 23, 1932. Serial No. 612,975. 1 Claim. (Cl. 219—39.)

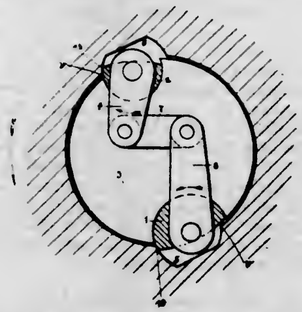
The method of making a water heater comprising applying a coat of initially plastic, heat conducting insulating material to the outside of the tank, the material having the property of drying rough and hard, drying the coat until it is hard, tightly winding around the coated tank a flexible electric coil which retains its wound shape and its position by virtue of the relative friction between the coat and the coil, applying a second coat of initially plastic material outside the first coat and the coil, and drying the second coat, the second coat, in drying, adhering to the first coat in a manner to protect the coil and the first coat.

1,903,046. PLANT OR INSTALLATION FOR EXTRACTING DUST FROM MINERALS SUCH AS COAL. SHERWOOD HUNTER, Newlyn, Penzance, England. Filed Nov. 17, 1930, Serial No. 496,275, and in Great Britain Nov. 21, 1929. 1 Claim. (Cl. 209—135.)



A dust extraction plant comprising in combination, a sloping chute through which passes the material to be freed from dust, louvres in one wall of said chute, a fan producing an air blast, a first divergent chamber for said air blast, such chamber having parallel horizontal top and bottom walls and divergent side walls, partitions arranged within said chamber, a second divergent chamber arranged in series with the first chamber, and having parallel vertical side walls and divergent top and bottom walls, partitions in such chamber arranged at right angles to the partitions in the first chamber, the small end of such first chamber being connected to the fan, the larger end of the second chamber forming one wall of the said chute.

1,903,047. SIGNAL FOR USE ON COMMERCIAL AND OTHER RECORDS. FRANCIS LEVITT IMPEY, Northfield, Birmingham, England, assignor to Morland & Impey Limited, Birmingham, England. Filed Mar. 31, 1932, Serial No. 602,311, and in Great Britain May 4, 1931. 6 Claims. (Cl. 40—1.)

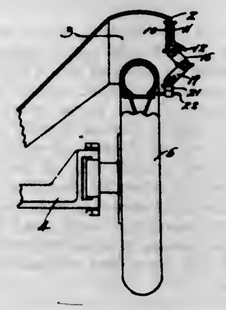


1. A device of the character described comprising a thin flat signal magnetic on one surface and carrying an adhesive on its opposite surface, a stick magnetized sufficiently to lift the loose signal but insufficiently to lift the signal when the adhesive side is stuck to a sheet of paper.

1,903,048. COIN CONTROLLED DEVICE. ODE D. JENNINGS, Palatine, and EMERY MIHALEK, Chicago, Ill., assignors to O. D. Jennings & Company, Chicago, Ill., a Corporation of Illinois. Filed Feb. 20, 1931. Serial No. 517,289. 5 Claims. (Cl. 194—1.)

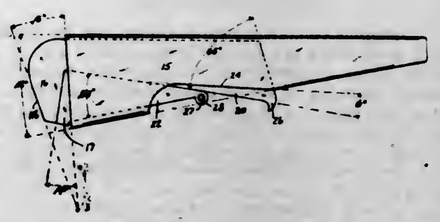
1. In a coin controlled device, a coin chute, a hopper arranged to receive coins from said chute, a plurality of receptacles arranged to receive coins from said hopper, means for varying the position of said hopper to cause it to deliver coins to each of said receptacles in predetermined order, and means for varying the order of delivery from said hopper, said latter means comprising a wheel arranged to be rotated through a certain arc at each operation of the device, pins projecting from said wheel at varying radial distances from the axis of said wheel, a pivoted arm engaging said pins and connections from said pivoted arm to said hopper, whereby the position of said hopper is controlled by the engagement of said arm with said pins.

1,903,049. ROTARY KEY CLUTCH. FERDINAND JOHN, Dusseldorf-Oberkassel, Germany. Filed Mar. 11, 1927, Serial No. 174,614, and in Germany Nov. 23, 1925. 10 Claims. (Cl. 192—29.)



1. A rotary key clutch comprising a driving member, a driven member, and a driving key for establishing and interrupting a driving connection between said driving member and said driven member, a locking member for the driven member, and elements connecting the driving key with the locking member, said elements being adapted to transmit motion from the driving key to the locking member with increased amplitude.

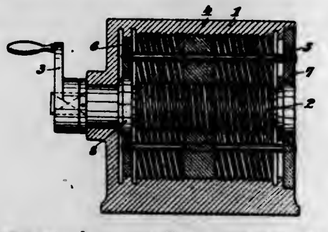
1,903,050. COUNTER STIFFENER AND METHOD OF FORMING IT. HUGH A. JORDAN, Newburyport, Mass., assignor to Milton L. Dodge, Newburyport, Mass. Filed May 11, 1931. Serial No. 536,365. 4 Claims. (Cl. 12—146.)



1. A counter stiffener having an attaching flange, said flange having an external marginal bead, said bead at the heel end of said stiffener being of substantially solid cross section and being formed from gathered flange material.

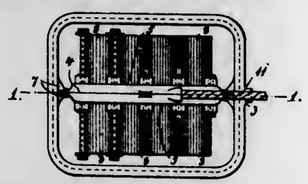
1,903,051. WHEEL ALIGNING GAUGE. HOMER R. KENNEDY, Los Angeles, Calif. Filed Nov. 5, 1930. Serial No. 493,581. 4 Claims. (Cl. 33—203.)

1. A vehicle wheel alignment gauge comprising, in combination, a clamp device with jaws adapted to be closed on the flange or rim of the fender of such vehicle so as to permit adaptation of the gauge conveniently to the upper outside of the wheel to be tested, and an articulated arm pivotally attached to said clamp and provided with a scribing device to engage the wheel.



1,903,052. WRENCH. JAMES R. KERLIN, Los Angeles, Calif. Filed Sept. 11, 1930. Serial No. 481,191. 3 Claims. (Cl. 81—154.)

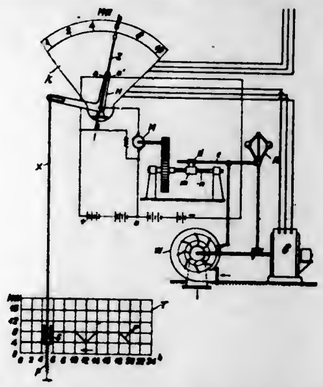
1. A wrench comprising a hollow handle tapered on its narrow sides from its open to its closed end, and with a longitudinal recessed slot in one of the narrow sides thereof between its ends, an outer jaw with its shank increasing in width from the jaw and slidable in said handle, an inner jaw with a tapering shank slidable in said handle and engaging the edge of the shank of the outer jaw, so that the portions of the jaw shanks not ex-



tending out beyond the large end of the handle will be enveloped by the handle for their full length, a hooked lug integral with the inner end of the outer jaw shank adapted to be limited in movement by the inner end wall of said slot and whereby the outer jaw may be moved by the thumb in either direction, a lug integral with the end of the inner jaw shank, and a pin extending transversely through said lug adapted to contact with the outer end wall of said slot to limit the movement of said shank out of said handle.

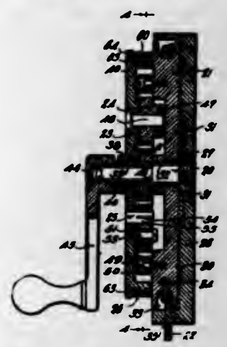
1,903,053. SCREW GEAR. FRANZ KUBA, Vienna, Austria. Filed Dec. 11, 1931, Serial No. 580,417, and in Austria Dec. 11, 1930. 4 Claims. (Cl. 74—40.)

1. Screw gear for converting a rotary movement into a rotary movement of different speed, comprising in combination a case with an internal screw thread, a rotatable but axially immovable screw shaft axially passing through said case, the pitch of said screw shaft differing from the pitch of said internal screw thread, an annular disk rotatably mounted at each side of said internal screw thread, a collar fixed at each side of the screw threaded part of said shaft and rotatably mounted in said disk, an internally and externally screw threaded nut rotatable on said shaft and co-operating with said internal screw thread of the case, means passing through holes in said nut and fixed to said disks, and means on said shaft for rotating the same.



1,903,054. LOADING COIL BOX. TORBERN LAURENT, Stockholm, Sweden, assignor to Telefonaktiebolaget L. M. Ericsson, Stockholm, Sweden, a Company of Sweden. Filed Apr. 24, 1931, Serial No. 532,682, and in Sweden May 5, 1930. 4 Claims. (Cl. 178—46.)

1. A loading coil arrangement comprising in combination, a distribution box formed on the outside with a supporting plate, a plurality of loading coils divided into groups, a plurality of cylindrical protecting coverings enclosing each one of said groups of coils and bearing with their flat bases against the plane supporting plate of said box, means for detachably securing the cylindrical coverings to the box, and external sheathed junction cables extending through said supporting plate and connecting the groups of coils individually with the distribution box.

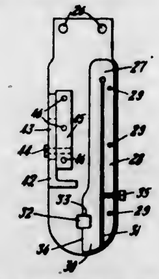


1,903,055. SYSTEM OF AUTOMATIC CONTROL. JOSEF LEONPACHER, Munich, Germany, assignor to Aktiengesellschaft Brown, Boveri and Cie., Baden, Switzerland. Filed June 7, 1928, Serial No. 283,697, and in Germany June 11, 1927. 1 Claim. (Cl. 171—312.)

Means for controlling the output of an electric generating plant comprising a strip of sheet material the width of which at any point corresponds to a given power output, a following device adapted to follow variations in the width of said strip, means for conveying said strip past said following device, a pair of relatively fixed contacts adapted to be moved by said following device, a third contact situated between said relatively fixed contacts, means

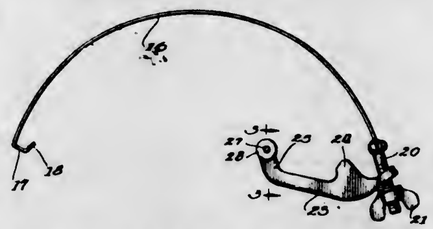
for moving the third contact in accordance with the output of the plant and means for increasing the output of the plant when the third contact contacts with one of the said relatively fixed contacts and decreasing the output of the plant when the third contact contacts with the other relatively fixed contact.

1,903,056. CLOSURE OPERATING DEVICE. THOMAS B. MATTINGLY, Huntington Park, Calif. Filed Oct. 15, 1930. Serial No. 488,868. 11 Claims. (Cl. 268—129.)



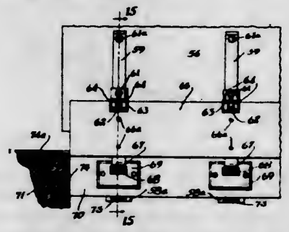
1. A device for operating a slidable closure, including a sheave for reeling a line attached to the closure, manually operable means for rotating the sheave in one direction to wind the line onto the sheave to operate the closure, a rotatable element, releasable brake means normally holding the element against rotation including a friction brake band surrounding the element, and means connecting the sheave with the element to normally hold the sheave against rotation in the other direction and to cause it to rotate therewith in the said other direction when the brake means is released.

1,903,057. BLIND STITCH BUTTON SEWING MACHINE. MICHAEL MCCANN, St. Albans, N. Y., assignor to Frederick Osann Company, New York, N. Y., a Corporation of New York. Filed Apr. 15, 1930. Serial No. 444,867. 10 Claims. (Cl. 112—110.)



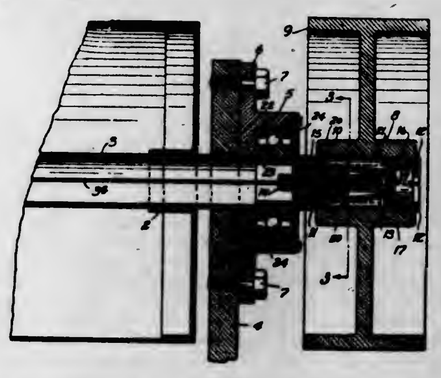
1. In combination, a cloth plate, a gage projecting from the upper face of said cloth plate and against which the folded edge of cloth may be placed, a clamp for

holding a button above the work with one stitching hole above the work and another stitching hole beyond said folded edge, said button clamp having a foot positioned to clamp the cloth against the work plate when said but-



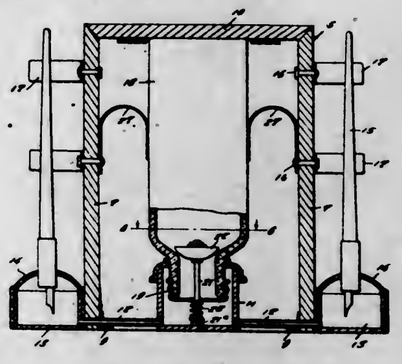
ton is so held, and means for passing stitches alternately through said holes in the button, said stitches passing through the work when through the hole in the button thereabove.

1,903,058. MEANS AND METHOD FOR APPLYING BRAKE SHOE LININGS. NORRIS F. MCNAUGHT and EDWARD H. PETERSON, Chicago, Ill., assignors to Duro Metal Products Company, Chicago, Ill., a Corporation of Illinois. Filed Feb. 27, 1932. Serial No. 595,488. 5 Claims. (Cl. 29—84.)



1. In an apparatus for use in applying a lining to a brake shoe having a convex surface to be lined, a flexible metal band adapted to overlie a lining disposed on the convex surface of such a shoe, said flexible metal band being provided with a plurality of apertures through which the lining may be drilled and riveted, and a hook at one end of the band adapted to engage one end of the shoe, a threaded stem at the other end of the band, a bracket having an opening through which said threaded stem extends, means for securing said bracket to the shoe, and a wing nut threaded on said stem adapted to cooperate with said bracket to place said band under tension while the said hook and bracket are in engagement with the shoe.

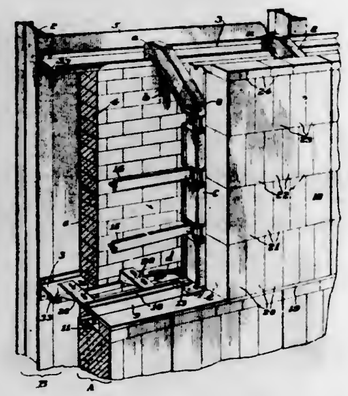
1,903,059. HINGE. EWALD MEININGHAUS, Lancaster, N. Y. Filed Aug. 15, 1929. Serial No. 386,105. 2 Claims. (Cl. 16—135.)



1. A hinge comprising a horisontal fixed hinge member, a movable hinge member pivoted to said fixed hinge member, a latch bar pivoted to said movable member and adapted to engage a catch on said fixed hinge member when said hinge is opened and hold said hinge members open and a deflector secured to said latch bar whereby any substance moving toward said fixed hinge member will be deflected away therefrom.

1,903,060. SHAFT MOUNTING FOR ROTATABLE CYLINDERS. ORVILLE MITCHELL, Dallas, Tex. Filed June 18, 1931. Serial No. 545,218. 5 Claims. (Cl. 287—58.)

1. In combination with a tube having a split end, means for expanding the end portion of the tube into binding engagement with a surrounding body, comprising a cylindrical member in two parts inserted in the end of said tube having substantially the diameter of the bore of said tube, at its outer end having a flange engaging the outer end of said tube, and near its outer end having an interior seat, each of said parts having an interior tapered surface, a nut tapered to engage the tapered surfaces of said member, and a screw engaging said nut and having a head monnted in the end of said member and engaging the seat thereof.

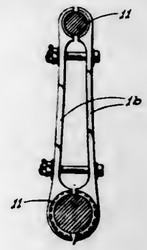


1,903,061. INKSTAND. RAY W. NEWMAN, Wagner, S. Dak. Filed May 18, 1932. Serial No. 612,107. 1 Claim. (Cl. 120—59.)

An inkstand comprising a cabinet, a well in the cabinet, dipping wells exteriorly of the cabinet, ducts connecting the first named well with the dipping wells, an ink container in the form of a bottle having a neck portion adapted to extend into the first named well, a yieldable apertured cap arranged upon the neck portion of said bottle and fitting over the open upper end of said first-named well for properly positioning said neck portion in said first-named well, a valve member for said neck of the bottle, a stem extended from said valve through the neck

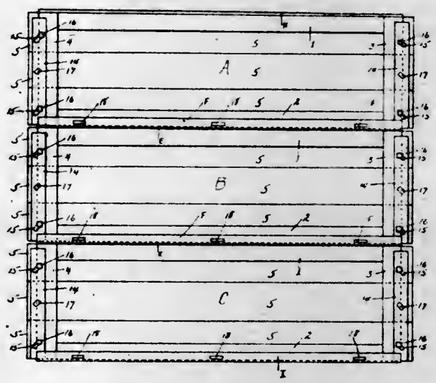
and adapted to engage against the bottom of the first named well, and means for moving said valve into a closed position relative to the neck when the bottle is removed from the cabinet in an inverted position.

1,903,062. FURNACE WALL. OSCAR NYGAARD, Saugus, Mass. Filed Feb. 3, 1930. Serial No. 425,448. 19 Claims. (Cl. 72—101.)



6. A furnace wall comprising front and rear wall sections with an air space between them, a structural steel frame in said rear section, said frame including horizontal beams, a plurality of hangers suspended on said beams, a plurality of horizontal bars connecting the members of each adjacent pair of hangers and supported by them, the hangers having sockets in which the ends of said bars are removably positioned, and refractory blocks located in and forming part of the front section of said wall and held in alinement by their engagement with said bars.

1,903,063. DRYING DEVICE FOR WOOD, BRICK, POTTERY, ETC., PROVIDED WITH HEAT RECOVERING DEVICES. JOHAN GUSTAF OLSSON, Lidingon, and FRANS IVAR EUGÉN STENFORS, Alsten, Sweden, assignors to Aktiebolaget Svenska Fläktfabriken, Stockholm, Sweden. Filed May 1, 1930, Serial No. 448,971, and in Sweden May 7, 1929. 6 Claims. (Cl. 34—46.)

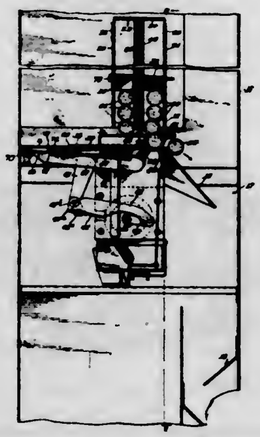


3. Drying device of the class described including a canal for the material to be dried, heat supplying means at one part of the canal, heat exchange tubes at another part of the same and an air-preheater placed independently of the canal, air propelling means adapted to drive drying air repeatedly into contact with the tubes and with the heat supplying means, said tubes and air-preheater being connected in series to each other and to the warmest part of the canal to lead off moist air from the canal, whereby the tubes transfer heat from said moist air to the contacting air, said air-preheater being connected to the tubes with one canal system and to the drying canal with another canal system and being adapted to transfer heat from the moist air exhausted from the canal, to the fresh air to be supplied to the canal.

1,903,064. CONNECTING ROD. JACOB T. ONSTOTT, Yuba City, Calif. Filed Oct. 6, 1930. Serial No. 486,609. 1 Claim. (Cl. 74—17.)

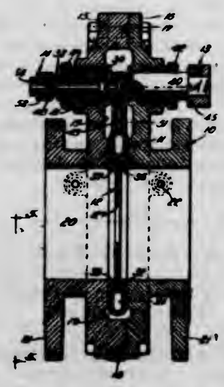
A connecting rod comprising a pair of separate resilient web members, means to connect the webs and adjustably pull their ends together against the spring tension of the webs, opposed and cooperating hub sections at one end of the webs, and segmental cooperating bushing elements in the hub sections, each hub section and its bushing being less than semicircular in extent with their opposite ends disposed in substantially a common plane longitudinally of the rod.

1,903,065. SECTIONAL DOOR. CHARLES EDWARD PAGET, Huntsville, Ontario, Canada. Filed Aug. 29, 1931. Serial No. 560,116. 12 Claims. (Cl. 20—16.)



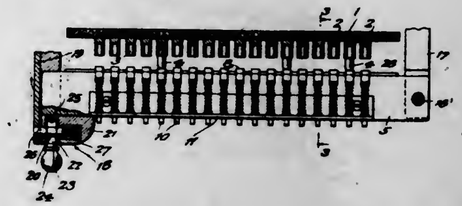
9. A sectional door comprising a plurality of units superposed in edge to edge relation and vertically and laterally adjustable locking plates at each end of each unit.

1,903,066. HAIR CURLING DEVICE. ROCCO PEZZELLA, Washington, D. C. Filed Jan. 9, 1932. Serial No. 585,775.. 14 Claims. (Cl. 132—33.)



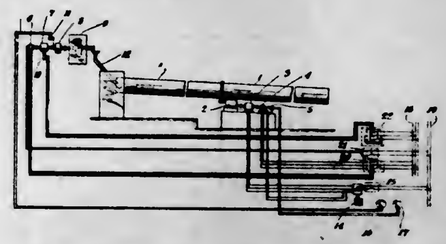
1. A mandrel for curling hair and on which the hair is to be wound, said mandrel having a transverse recessed hair-receiving seat at one end, a holding tongue pivoted to the mandrel and having a reversely disposed hair-receiving seat coacting with the seat of the mandrel, and means for locking the tongue against pivotal movement and with the seats in opposing coacting relation.

1,903,067. VENDING MACHINE. MYRON H. RICHARDSON, Chicago, and ALBERT E. GEBERT, Wilmette, Ill., assignors to Advance Machine Company, Chicago, Ill., a Corporation of Illinois. Filed June 29, 1929. Serial No. 374,873. 8 Claims. (Cl. 312—47.)



1. A vending machine embodying means for holding a pair of containers having therein the articles to be vended, said containers being open at their bottom, a platform beneath the containers to receive the articles therefrom, means fixed against bodily movement with relation to the containers and projectable above the platform between the articles from the two containers for maintaining the articles separated, an ejector for ejecting the articles, and means whereby the last said means will be responsive in its operation to the actuation of said ejector.

1,903,068. CONSTRUCTION FOR ORIFICE METER FITTINGS. HENRY H. ROBINSON, Los Angeles, Calif., assignor to Robinson Orifice Fitting Company, Los Angeles, Calif., a Corporation of Nevada. Filed Mar. 4, 1931. Serial No. 520,098. 21 Claims. (Cl. 137—75.)

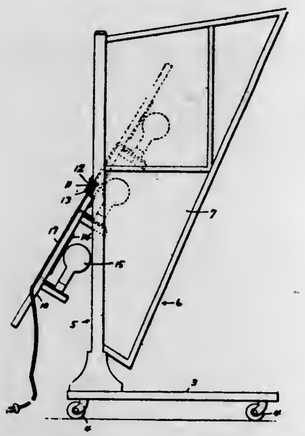


3. An orifice meter fitting including, a body having a fluid passage, spaced opposed seats in the body around the passage, an expandible sealing member for co-operating with the seats, means for mounting an orifice disc on the member, and fluid pressure means for expanding the member.

1,903,069. ELECTRIC CIRCUIT CONTROL. ARTHUR ROSS, Lynbrook, N. Y., assignor to Warner Bros. Pictures, Inc., New York, N. Y., a Corporation of Delaware. Filed Mar. 24, 1930. Serial No. 438,491. 1 Claim. (Cl. 200—46.)

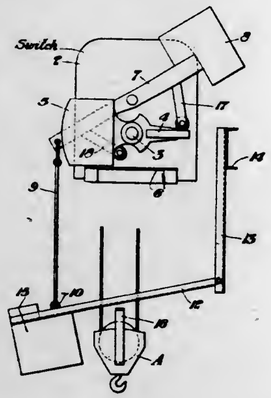
Switching mechanism, comprising the combination of a coordinate array of contacts, the contacts in each row being electrically connected together, and a linear array of contacts relatively movable with respect to said coordinate array of contacts and extending thereacross, and means for supporting said linear array of contacts, comprising a cross-bar of insulating material, each of the contacts supported thereby comprising a pivoted contact member having an inclined contact face for sliding engagement with a linear array of said coordinate contacts, a stop member mounted on said cross-bar and common to said pivoted contacts thereon for limiting the movement of said linear array of contacts toward said coordinate array of contacts, a tail member for each of said pivoted contacts, a spring on each of said tail members for urging said pivoted contacts toward said stop member, and an apertured backbar attached to said crossbar, the apertures in said backbar cooperating with said tail member for guiding purposes and for electrically connecting said pivoted contacts, and an electrical terminal for one of said pivoted contacts.

1,903,070. CONTROL SYSTEM FOR ROTARY KILNS AND THE LIKE. VIGGO SAHMEL, Forest Hills, N. Y., assignor to F. L. Smidth & Co., New York, N. Y., a Corporation of New Jersey. Filed Feb. 18, 1930. Serial No. 429,251. 4 Claims. (Cl. 222—7.)



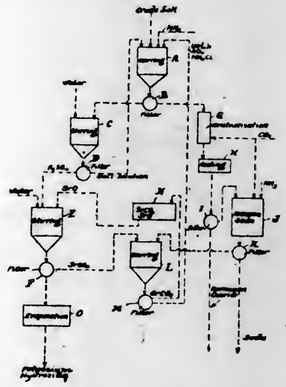
1. The combination with a rotary kiln of an alternating current generator, operating devices for the generator whereby the frequencies of the current generated are a direct function of the speed of the kiln, a feeding mechanism for the kiln, an alternating current motor for the feeding mechanism operated in substantial synchronism with the generator, electrical connections between the generator and the motor, whereby the feeding mechanism is driven at a speed proportionate to the speed of rotation of the kiln, and independent means for controlling the rate of feed of the feeding mechanism.

1,903,071. PHOTOGRAPHY LIGHT REFLECTOR. FRANK SIMPSON, Fort Worth, Tex. Filed Jan. 23, 1932. Serial No. 588,378. 1 Claim. (Cl. 240—1.3.)



In a structure of the class described, a portable base, an upright carried thereby, a forwardly projecting multiple

walled light concentrating shield carried by said upright, a panel mounted on horizontal axes in said upright for tiltable adjustment with respect to the shield, the reflecting surface of said panel being coated with aluminum, a

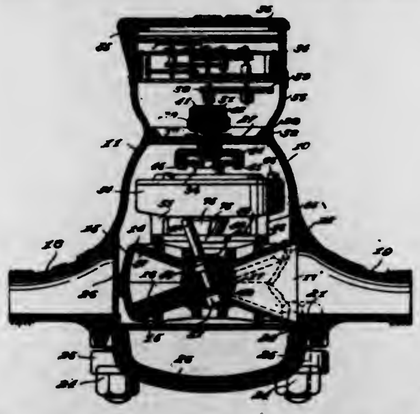


plurality of vertically spaced horizontal rows of mirrors mounted on the aluminum coated surface of the panel, and a plurality of distinguishable electric bulbs carried by the panel each bulb being arranged in spaced relation in front of a mirror.

1,903,072. LIMIT STOP. ROBERT STERRETT, Ambridge, Pa. Filed Feb. 23, 1932. Serial No. 594,584. 2 Claims. (Cl. 192—142.)

1. The combination with a crane having a hoisting mechanism including a hoist sheave block, of a limit switch and means operated by said sheave block for actuating said switch, said means comprising a counterweighted arm fixedly mounted intermediate its ends to an actuating shaft of said switch, a counterweighted rocking arm pivotally mounted on said switch at a point above said first named arm, depending actuating legs carried by said rocking arm and adapted to engage the end of said first named arm opposite its counterweight whereby said rocking arm is moved about its pivotal mounting so as to lift said first named arm against its counterweight, and means normally tending to hold said rocking arm in one position against the pull of the counterweight of said arm, said means being actuated by the movement of said hoist sheave block to release said rocking arm to the pull of its counterweight.

1,903,073. PROCESS FOR THE PRODUCTION OF SODA AND POTASSIUM HYDROXIDE. CARL THEODOR THORSELL, Kassel, Germany. Original application filed July 3, 1930, Serial No. 465,798, and in Germany July 13, 1929. Divided and this application filed June 24, 1931. Serial No. 546,673. 1 Claim. (Cl. 23—184.)



A process of producing soda and potassium hydroxide while simultaneously obtaining ammonium chloride from sylvinitic crude potassium salts, ammonia and carbonic acid by passing alkaline-earth sulfate in a cyclic process through the following stages: First, a solution containing ammonium chloride and ammonium bicarbonate obtained when carrying out the process is stirred up with alkaline-earth sulfate also obtained during the process and separating the alkaline-earth carbonate formed; second, the mother liquor obtained from the first stage is then stirred up with sylvinitic crude potassium salt and ammonia added whereupon the resulting precipitate consisting of glaserite and potassium chloride is separated and decomposed with cold water to potassium sulfate; third, the mother liquors obtained from the second stage are combined and the free ammonia removed, whereupon the mother liquors are cooled for the purpose of separating a part of the ammonium chloride contained therein; fourth, the remaining mother liquor is worked up into sodium bicarbonate and soda respectively according to the ammonia-soda-process, whereby the solution containing the ammonium chloride and ammonium bicarbonate indicated in the first step is formed; fifth, the alkaline-earth carbonate obtained from the first stage is converted into alkaline-earth oxide and alkaline-earth hydroxide respectively according to known processes and decomposed in water with the potassium sulfate, obtained from the second stage, whereby a solution of potassium hydroxide and alkaline-earth sulfate is obtained, and finally the separated alkaline-earth sulfate is treated, as in the first stage, and potassium hydroxide is obtained from the solution by evaporation.

1,903,074. METER. HARRY G. WEYMOUTH, Pittsburgh, Pa., assignor to Pittsburgh Equitable Meter Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Apr. 6, 1929. Serial No. 353,186. 4 Claims. (Cl. 73—98.)

4. A liquid meter having a supporting casing; a measuring chamber rigidly positioned therein; a registering mechanism rigidly positioned in said casing in fixed cooperative relation to said measuring chamber; a train of five sets of reduction gears disposed in said casing between said measuring chamber and said registering mechanism, and having driving and driven shafts associated therewith; a housing formed of a cup shaped container and a cover completely enclosing said reduction gears fixedly mounted in said casing between said registering

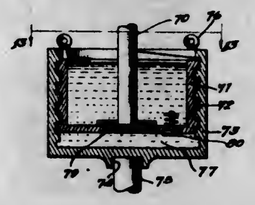
mechanism and said measuring chamber, said housing and gears therein being readily insertible into a meter having a lesser number of sets of reduction gears; said driving shaft extending through the bottom of said container; an

elongated bushing carried solely by said container and supporting said driving shaft; said driven shaft extending through said cover, and an elongated bushing carried solely by said cover and supporting said driven shaft.

1,903,075. ELECTRICAL TRANSFORMER. PETER WILLIAM WILLANS, Towcester, and MARK WARD, London, England, assignors to Radio Corporation of America, a Corporation of Delaware. Filed Nov. 11, 1924, Serial No. 749,128, and in Great Britain Dec. 17, 1923. 4 Claims. (Cl. 179—171.)

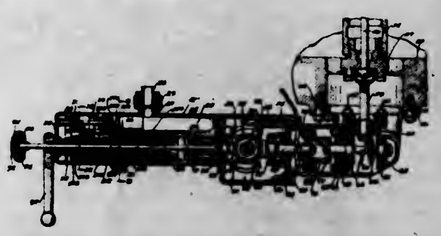
2. The combination of a pair of valves and a low frequency coupling therebetween, said low frequency coupling comprising a winding in the output circuit of one of said valves that has an impedance which is large compared to the impedance of that valve whereby substantially uniform amplification is obtained over the audio frequency range and a winding in the input circuit of the other one of said valve that has an impedance which is large compared to the impedance of the first mentioned winding when said first mentioned winding is open-circuited whereby a substantial step-up of voltage is possible and which is small compared to the impedance of the first mentioned winding when said first mentioned winding is short-circuited whereby tight coupling is attained.

1,903,076. WOOD PLATE. KURT WINKLER, Finsterwalde, Niederlausitz, Germany. Filed July 7, 1930, Serial No. 466,260, and in Germany July 1, 1929. 1 Claim. (Cl. 20—91.)



A plate of wood comprising a plurality of joined boards arranged side by side and provided in their abutting faces with more than two slits, the slits in one board being displaced relatively to the slits in the other board and the slits of one board being covered by the plane edge surface of the adjacent board, said slits forming passages through the boards to admit air to glue joining the boards and to uniformly dry said glue.

1,903,077. METHOD OF UNITING DISSIMILAR METALS. HARRY R. WOLF, Detroit, Mich., assignor to General Motors Research Corporation, Detroit, Mich., a Corporation of Delaware. Filed Dec. 22, 1930. Serial No. 503,994. 3 Claims. (Cl. 76—101.)

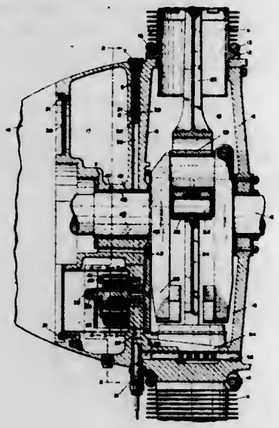


1. The method of securing a tantalum carbide cutting member to its tool comprising in cleaning the tool at the place of receiving the member, cleaning and then coating the member with copper, placing the copper coated member at the cleaned place, then heating the tool and member in a hydrogen gas until the copper is melted.

1,903,078. VALVE MECHANISM. NELSON E. WOOLMAN, Hermosa Beach, Calif., assignor to General Motors Research Corporation. Filed Jan. 8, 1929. Serial No. 331,110. 9 Claims. (Cl. 123—90.)

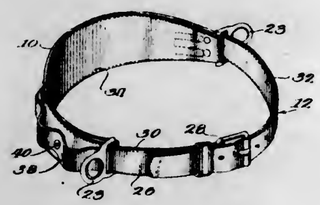
1. In a poppet valve operating mechanism, a pair of coaxial, threadedly connected members, means acting to produce an axial force along both members, means for producing a rotational force between them, and means providing a liquid buffer between the members.

1,903,079. INTERNAL COMBUSTION ENGINE. LIONEL M. WOOLSON, Detroit, Mich., assignor to Packard Motor Car Company, Detroit, Mich., a Corporation of Michigan. Filed Sept. 8, 1929. Serial No. 390,072. 41 Claims. (Cl. 60—44.)



1. In a gun starter device for internal combustion engines, a barrel member having a cartridge receiving chamber, a breech member aligned with the barrel, said breech member having an interior chamber, a firing pin reciprocable in the breech chamber and adapted to fire a cartridge in the barrel chamber when released, a trigger in the breech chamber adapted to hold the firing pin in retracted position, means in said breech chamber urging said firing pin into extended firing position, trigger release means extending through said barrel and into said breech chamber, and engine actuated means associated with the release means beyond the barrel to cause a pin releasing movement thereof.

7. In combination with cylinders and the crankshaft of an internal combustion engine, a gun starter device

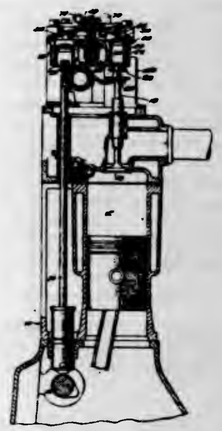


comprising a barrel member having a plurality of cartridge receiving chambers, means connecting each of said barrel chambers with the interior of an engine cylinder, and means for firing a cartridge in each of the barrel chambers, said means being actuated manually to fire the first cartridge and then being actuated from the engine crankshaft to fire the other cartridges.

1,903,080. INTERNAL COMBUSTION ENGINE. LIONEL M. WOOLSON, Detroit, Mich., assignor to Packard Motor Car Company, Detroit, Mich., a Corporation of Michigan. Filed Dec. 19, 1928. Serial No. 326,917. 14 Claims. (Cl. 184—6.)

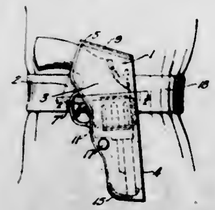
1. In an engine, a crank case, a partition separating said casing into compartments, shaft bearing means formed with said partition and extending through one of the compartments, a hollow crank shaft extending through the bearing, said bearing and partition being formed with the passage through which lubricant is conducted from one of the compartments to the interior of the crank case, and pump means associated with the partition for moving the lubricant from the compartment through the passage in the partition and bearing.

1,903,081. LINEMAN'S BELT. HENRY H. WOTHERSPOON, Lawrence, Mass., assignor to Mathias Klein & Sons, Chicago, Ill., a Corporation of Illinois. Filed Aug. 7, 1931. Serial No. 555,716. 7 Claims. (Cl. 227—8.)



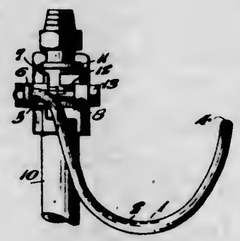
1. A lineman's belt comprising a strap having a tapering widened mid-portion adapted to fit about the back of the wearer, a back support of relative soft, porous material secured inside said widened portion of said strap, said back support being of substantially the same shape as the widened portion of the strap, and fastening means secured at the ends of said back support whereby a substantial part of the strain placed upon the belt is sustained by said back support.

1,903,082. NOVELTY TOY. SOREN S. ADAMS, Asbury Park, N. J. Filed Sept. 12, 1932. Serial No. 632,652. 4 Claims. (Cl. 46—40.)



1. In a surprise toy, a toy snake or the like which is adapted to be released upon opening of the toy, means for defining an enclosed space in the toy apart from said snake or the like and a plurality of freely movable sound producing elements in the enclosed space for creating a sound effect upon the shaking of the toy closely simulating that which would be obtained if the toy actually held the contents which it is represented to enclose.

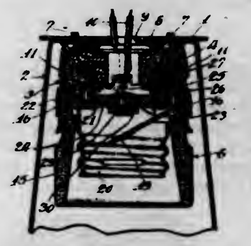
1,903,083. HYDRAULIC MECHANISM. JOHN O. ALMEN, Royal Oak, Mich., assignor to General Motors Research Corporation, Detroit, Mich., a Corporation of Delaware. Filed Dec. 22, 1927. Serial No. 241,949. 16 Claims. (Cl. 123—90.)



8. Hydraulic valve mechanism comprising an hydraulic chamber, operating and operated members working in the chamber, a supply chamber, and a fitting provided with a passage establishing communication between the upper portion of the hydraulic chamber and the supply chamber for the discharge of air from the former, said fitting being accessible from outside said chambers and readily removable therefrom for replacement or repair, and thermally operated means for controlling said passage.

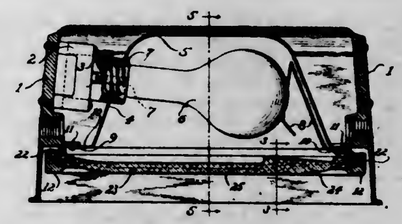
1,903,084. PISTOL HOLSTER. ISIDOR ARTH, Oakland, Calif., assignor to Isidor Arth & Son, Oakland, Calif., a Copartnership composed of Isidor Arth and Raymond Arth. Filed July 2, 1930. Serial No. 465,326. 2 Claims. (Cl. 224—2.)

1. In a holster, an elongated casing like body closed at its ends and open only along one side thereof whereby a gun may be inserted into the holster and removed therefrom through said open side, said body being arranged to house a gun therein with the handle and trigger guard projecting laterally through said open side and exposed for the gripping thereof with the hand exteriorly of said housing, and a snap fastener to releasably hold said open side closed at a point beneath the portion thereof through which the trigger guard extends, and arranged to be forced apart by pressure of the gun upon withdrawal thereof from the holster.



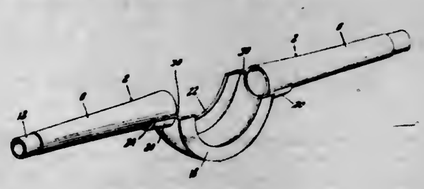
1,903,085. HOSE RACK. WILFRED BARNES, Jr., Glenolden, Pa. Filed July 28, 1932. Serial No. 625,443. 1 Claim. (Cl. 248—28.5.)

In a device of the character stated, a hose supporting member formed of a continuous element deflected to form two parallel U-shaped members integral at their front ends and having their rear ends permanently secured to a transverse bar, a coupling adapted to engage a water outlet, said U-shaped members adapted to receive a coiled hose having one end thereof engaging said coupling, bolts carried by said transverse bar, and a sectional clamp carried by and adapted to be tightened by said bolts around the end of said hose engaging said coupling member.



1,903,086. SHOCK ABSORBING SOCKET. REUBEN B. BENJAMIN, Chicago, Ill., assignor to Benjamin Electric Mfg. Co., Des Plaines, Ill., a Corporation of Illinois. Filed Oct. 19, 1929. Serial No. 400,811. 9 Claims. (Cl. 173—342.)

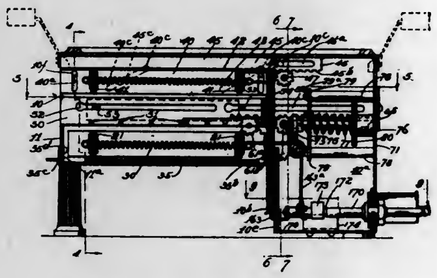
2. An electrical receptacle construction comprising a spring socket-supporting yoke having spring arms for embracing a socket therebetween, an insulating supporting member detachably secured between the upper portions of the spring arms of the yoke, a wiring terminal and contact mounted thereon, and an insulating housing



member surrounding said contact, and covering said wiring terminal and detachably mounted between the lower ends of said spring arms.

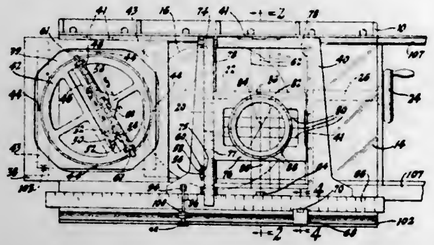
1,903,087. LIGHTING CONSTRUCTION. REUBEN B. BENJAMIN and JOHN H. WATERBURY, Chicago, Ill., assignors to Benjamin Electric Manufacturing Company, Des Plaines, Ill., a Corporation of Illinois. Filed July 2, 1931. Serial No. 548,390. 7 Claims. (Cl. 240—1.)

2. A lighting construction to be installed in the ceiling of a tunnel adjacent the side wall thereof comprising an elongated dished reflector to be installed in the ceiling with its open side down and extending in a transverse direction, a housing for said reflector, a lamp socket adjacent one end of the reflector and mounted on said housing for supporting a lamp in substantially horizontal position in said rflector, and a lens lying in a general horizontal plane across the open side of said dished reflector, said lens having a first zonal portion nearest the side wall of the tunnel provided with a prismatic formation for causing the light rays passing therethrough to diverge forwardly and rearwardly along the side wall of the tunnel to prevent vertical light streaks.



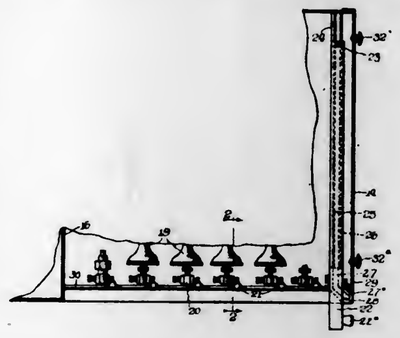
1,903,088. AXLE HOUSING AND METHOD OF MAKING THE SAME. LLOYD BLACKMORE, Detroit, Mich., assignor to General Motors Corporation, Detroit, Mich., a Corporation of Delaware. Filed Sept. 8, 1930. Serial No. 480,438. 3 Claims. (Cl. 29—153.1.)

8. The method of making a banjo-type axle consisting of forming from flat stock two similar tubular end sections, welding the seams of said end sections, forming from flat



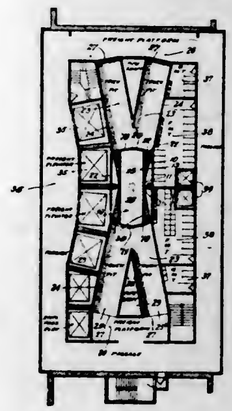
stock two similar channelled semi-circular mid-section halves with end extensions, fitting said mid-section halves in abutting position with the end extensions enveloping the inner ends of said tube sections, and welding said center sections toegther.

1,903,089. AUTOMATICALLY TIMED APPARATUS FOR HEAT TREATMENT. GEORGE BROWNING, Wilmette, Ill., assignor to Chicago Flexible Shaft Company, Chicago, Ill., a Corporation of Illinois. Original application filed Aug. 15, 1927. Serial No. 213,179. Divided and this application filed Sept. 25, 1929. Serial No. 395,100. 2 Claims. (Cl. 53—5.)



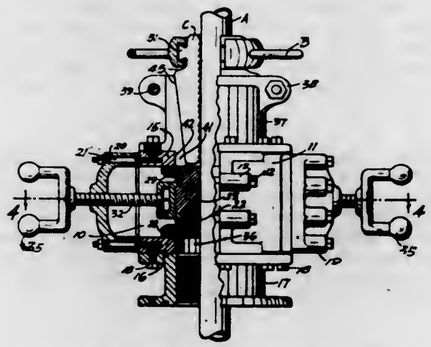
1. In a construction for the purpose stated comprising a heating means and a carrier for contents to be heat-treated mounted for movement to and reverse movement from heat treatment position, the heating means consisting of two heating elements positioned for entrance of the carrier and its contents between them, one of said heating elements being mounted for movement toward and from the other, means for guiding the movable element in such movement consisting of transversely extending slots in opposite lateral members of said movable element, side plates for enclosing said heat treating device having abutments engaging said slots, and means for causing movement of said movable heating element consisting of a longitudinally moving member having oblique slots, abutments protruding from said side plates engaging said oblique slots, and means for moving said longitudinally moving member at will; whereby the oblique slots serve as cams to propel the heating element directly in the direction of said transverse guide slots.

1,903,090. MEASURING DEVICE. THEODORE E. CLARK, Redford, Mich., assignor to General Motors Corporation, Detroit, Mich., a Corporation of Delaware. Filed Apr. 26, 1930. Serial No. 447,560. 20 Claims. (Cl. 88—14.)



5. In a measuring device, a frame, a shiftable measuring slide mounted on said frame, a flat image-reflecting means spaced from and mounted parallel with said slide and receiving the object to be measured, said slide being shiftable over said means, and measuring means on said slide reflected in said reflecting means to measure the object on the reflecting means.

1,903,091. COOK STOVE. WILLIAM L. COOPER, Kankakee, Ill. Filed Apr. 6, 1931. Serial No. 527,990. 5 Claims. (Cl. 126—37.)

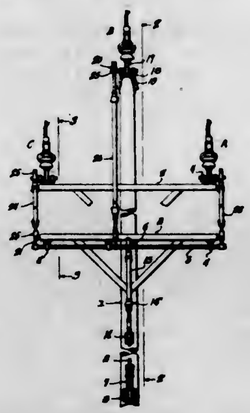


1. In a stove having a substantially flat face, the combination of a burner box having an open forward face and top, bottom and side walls, one of said side walls terminating short of said flat face of the stove, a door for closing said open face adapted when in its closed position to overlie and conceal the forward end of said one of said side walls, pins at the top and bottom of said door adjacent one end thereof, and guide members having slots therein engaging said pins to permit pivotal and sliding movement of the door relative to said members, said members extending into said burner box along said one of the side walls to guide said door for sliding movement into said box, and the forward ends of said slots being formed to extend angularly toward the plane of said one of the side walls to permit movement of the end of said door into concealing relation to the forward end of the wall.

1,903,092. INDUSTRIAL ELEVATOR ARRANGEMENT. RUSSELL G. CORY, Montclair, and WALTER M. CORY, Mahwah, N. J. Filed Oct. 12, 1929, Serial No. 399,196. Renewed Aug. 6, 1932. 21 Claims. (Cl. 104—29.)

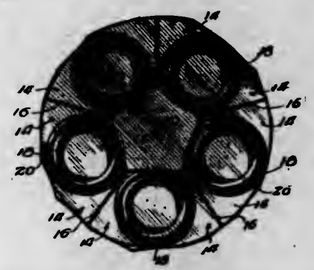
1. In a building of the class described, having a plurality of floors, a truck elevator serving the various floors, and having a fixed floor dimensioned with minimum total horizontal area to receive a truck in any of several angular positions, and restricted truck landing spaces on various of the floors at one end of the elevator and dimensioned to receive trucks in various positions in substantial alignment with their positions on the elevator.

1,903,093. OIL SAVER. CHARLES S. CRICKMER, Dallas, Tex., assignor to The Guiberson Corporation, Dallas, Tex., a Corporation of Delaware. Filed Mar. 24, 1930. Serial No. 438,597. 4 Claims. (Cl. 288—1.)



1. A packing member for an oil saver including, a semi-circular elastic member having upper and lower arcuate lips extending from its rear side, said lips being flat, and a metallic cage having upper and lower rearwardly extending flanges embedded within said lips.

1,903,094. PROCESS OF TREATING PETROLEUM OILS. MARIUS S. DARROW, St. Louis, Mo., and LEO S. SWEENEY, Granite City, Ill. Filed May 3, 1928. Serial No. 274,957. 1 Claim. (Cl. 196—33.)

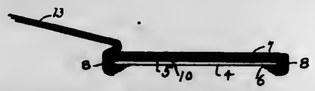


The continuous process of treating oils which consists in simultaneously neutralizing the acid bodies in the oil and filtering the discoloring bodies from the oil by passing the oil stock through a filter bed including fuller's earth, sodium hydroxide and lead oxide compounded in the following proportions by weight: fuller's earth 48 7/8 percent; sodium hydroxide, 28 7/8 percent; and lead oxide 22 1/4 percent.

1,903,095. GANG OPERATED SWITCH. JOHN J. DESMOND, Hubbard Woods, Ill., assignor to Line Material Company, South Milwaukee, Wis., a Corporation of Delaware. Filed Apr. 5, 1930. Serial No. 441,797. 2 Claims. (Cl. 200—48.)

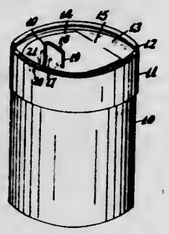
1. A gang operated switch comprising a plurality of switch units, an insulating structure supporting said switch units in laterally and vertically spaced relation, each switch unit having a blade carried by a rock shaft distinct and separate from the rock shaft of each of the remaining switch units, and each switch unit having a rock arm carried by its rock shaft, a metallic rock shaft spaced from each switch unit and provided with a plurality of rock arms, insulating links joining said last mentioned rock arms with the rock arms of the said switch units, and means spaced from said last mentioned rock shaft for operating said rock shaft.

1,903,096. DISPLAY PACKAGE. JOHN R. DOW, Kansas City, Mo., assignor to Interstate Bakeries Corporation, Kansas City, Mo., a Corporation of Delaware. Filed Apr. 29, 1932. Serial No. 608,204. 10 Claims. (Cl. 206—46.)



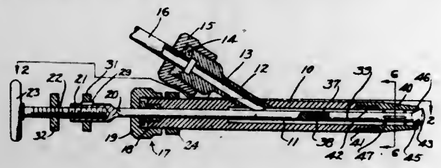
1. A display package for food articles comprising a central top wall adapted to receive advertising matter, and walls forming a plurality of open-top and open-ended receptacles arranged around said top wall, some of said walls being substantially radially disposed partitions between adjacent ones of the compartments, each compartment having a bottom wall, and a wrapper of substantially transparent material around the package and being folded over upon the bottom of the device and there secured to hold the wrapper in position.

1,903,097. WEEDER. RAY E. DUNFORD and ELI W. F. MCMILLAN, Everett, Wash. Filed Feb. 15, 1932. Serial No. 593,098. 3 Claims. (Cl. 55—148.)



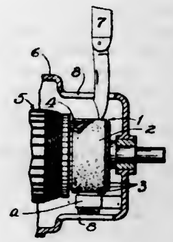
1. A weeder comprising a handle, a strip secured to the lower portion thereof, a substantially circular portion formed with said strip, a blade disposed at an inclination and being formed with the substantially circular portion, toothed members journaled on the substantially circular portion, pins extending from the toothed members, means for operating the toothed members and receiving the pins, a stem included in the operating means, an ear formed with the strip for receiving the stem for slidable movement therein, a lever pivotally secured at the upper end of the handle and having connection with the stem for operating the toothed members for disposing the teeth thereof in cooperative association with respect to each other and with the blade respectively.

1,903,098. CARD HOLDER. WILL J. ECKER, Jr., St. Louis, Mo. Filed July 13, 1931. Serial No. 550,493. 2 Claims. (Cl. 206—57.)



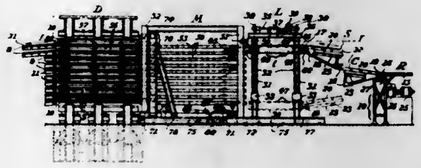
1. In combination with a plate, a card, said card positioned on said plate, a sheet of tissue paper positioned above said card, a second card positioned on said sheet of tissue paper, and a second sheet of tissue paper positioned on said second card, said sheets of tissue paper secured to each other, and to said plate, thereby detachably securing said cards between said sheets of tissue paper, and securing said cards detachably to said plate.

1,903,099. CONTAINER CLOSURE. JOHN W. ERHARD and ANTONETTE ERHARD, New York, N. Y. Filed July 29, 1931. Serial No. 553,726. 4 Claims. (Cl. 229—5.5.)



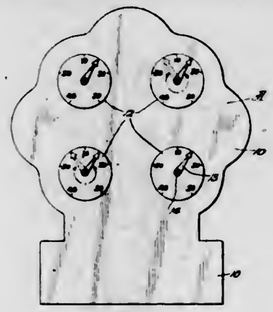
1. A container closure, comprising a container top having an encircling rolled edge and a flap cut from the top adapted to assume opened and closed position, and means on said flap for coacting with the rolled edge to keep the flap closed, comprising a swivelled member on said flap engageable below a portion of said rolled edge, and said portion of the rolled edge being in the form of a tongue movable out of the path of motion of said swivelled member.

1,903,100. OIL BURNER. WILLIAM M. ESTERLING, Long Beach, Calif., assignor of forty-five per cent to Robert S. Hay, and ten per cent to Raymond E. Spencer, San Pedro, Calif. Filed June 30, 1930. Serial No. 464,807. 2 Claims. (Cl. 299—130.)



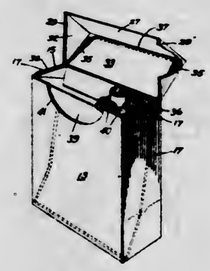
1. A fuel burner comprising a tubular body having a central cylindrical bore therein, a nozzle tip detachably secured to the outer end of the body and having a central bore in longitudinal alignment with that of the body, the outer end of the bore of the nozzle tip being outwardly tapered, a frusto conical valve member disposed at the outer end of said body and having its tapered wall parallel to the outwardly flaring mouth of the nozzle tip, a valve rod connected with the valve member extending longitudinally through the bore of the body, packing means at the rear of the body to accommodate said rod, a saddle secured to the rear of the body and through which the body extends, a cross-tie plate in spaced relation to the saddle, parallel guide rods securing the cross-tie plate and the saddle to each other and being disposed upon opposite sides of the longitudinal center of the burner, a crosshead disposed between the saddle and the cross-tie and slidably mounted upon the guides, a head formed at the outer end of the valve rod and splined through the crosshead, and an adjusting screw threaded through the cross-tie plate and threaded into the head of the valve stem with reverse threads from those in the portion extending through the crosshead whereby rotation of the adjusting screw will produce reciprocation of the cross-head and the valve rod.

1,903,101. METHOD OF AND MEANS FOR SANDING-IN ARMATURE BRUSHES FOR GENERATORS, MOTORS, MOTOR-GENERATORS, OR STARTERS AND THE LIKE. LLOYD T. FALEY, Hermosa Beach, Calif.; Garnet Faley, administratrix of said Lloyd T. Faley, deceased, assignor of one-half to Arthur F. Larrabee, Los Angeles, Calif. Filed Apr. 29, 1926. Serial No. 105,615. 4 Claims. (Cl. 51—185.)



4. The method of sanding-in armature brushes and the like, which method comprises securing an extensible and contractible band having an abrasive associated therewith to the commutator of an armature, and which band is extended to receive the commutator and will automatically secure itself to the commutator by its natural contractibility; then assembling the armature in its respective housing so that the armature brushes rest upon said band; then rotating said armature to sand-in said brushes; and then removing said band from said commutator.

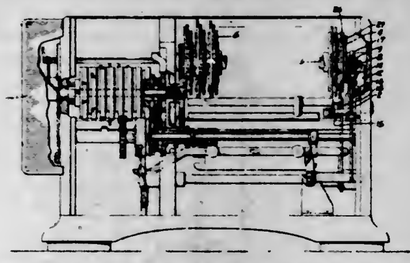
1,903,102. FIBER BOARD MANUFACTURE AND APPARATUS THEREFOR. FRANCIS S. FARLEY, Trenton, N. J., assignor to Daniel Manson Sutherland, Jr., Morrisville, Pa. Filed Oct. 31, 1930. Serial No. 492,474. 10 Claims. (Cl. 34—48.)



1. An improvement in the manufacture of fiber board from raw fiber pulp sheets produced in succession and treated in batches in a multi-plate drier; which improvement comprises skin-drying and thereby hardening the raw sheets sufficiently to stiffen them for handling, and thereafter introducing the hardened sheets into the multi-plate drier.

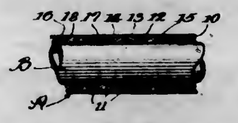
1,903,103. ADVERTISING DEVICE. FRED D. FISHER, Chicago, Ill., assignor to Scientific Brake Service Laboratories, Inc., Chicago, Ill., a Corporation of Delaware. Filed May 21, 1932. Serial No. 612,736. 8 Claims. (Cl. 40—126.)

1. An advertising device comprising two boards, each having a plurality of dials, a shaft extending from each dial on one face to a dial on the other face, a pointer on each end of each shaft adapted to move over said dial, and means for moving said pointers in unison.



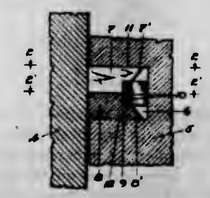
1,903,104. CONTAINER. FRANCESCO FORTUNA and SABATINO GIANNANGELO, Niagara Falls, N. Y. Filed June 25, 1931. Serial No. 546,848. 14 Claims. (Cl. 206—41.)

1. A cigarette box comprising outer bottom and side walls, an inner side wall lying adjacent one of said side walls and providing a space therebetween, a cover hinged to one of said side walls, and resilient means within said space and connected to the cover for normally retaining it in closed position, said inner side wall acting to protect the contents of the box from the resilient means.



1,903,105. CALCULATING MACHINE. CARL M. F. FRIDEN, Oakland, Calif., assignor to Marchant Calculating Machine Company, Emeryville, Calif., a Corporation of California. Filed Nov. 7, 1928. Serial No. 317,734. 10 Claims. (Cl. 235—79.)

1. In a calculating machine having an overdraft control, an actuating member, stop operating mechanism normally out of operative relation with the actuating member, means controlled by an overdraft registration in the register for positively moving the operating mechanism into



operative relation with the actuating member and means for positively removing said stop operating mechanism from said operative relation.

1,903,106. WATERPROOF HEAT INSULATING TAPE. WILLIAM R. GILLIES, Chicago, Ill., assignor to Union Asbestos & Rubber Company, Chicago, Ill., a Corporation of Illinois. Filed Aug. 7, 1931. Serial No. 555,738. 12 Claims. (Cl. 154—44.)

1. In a heat insulated pipe, the combination of a member to be insulated with a spirally wrapped tape of asbestos insulating tape and a layer of waterproofing material protected from said member by said insulating tape and carried by said tape, said waterproofing material extending across one side of the tape and over the edges sufficiently to engage the waterproofing material on adjacent turns of tape with the edges of said waterproofing material in contacting relation to form a substantially continuous waterproof layer with a dead air space between said member and said waterproof layer.

1,903,107. COMPRESSION RING. GERALD M. M. GRANT, Los Angeles, Calif. Filed Oct. 18, 1932. Serial No. 638,293. 4 Claims. (Cl. 74—109.)

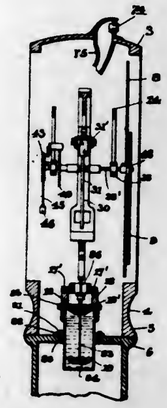
1. A compression ring of the character referred to having formed in its inner side a spring-receiving seat of rectangular form in cross section and having an inner side beveled inwardly to the inner edge of the bottom horizontal wall of said seat, and a spring of rectangular form in cross section to fit into said seat, said beveled edge operating to guide said spring into said seat as the ring and spring are placed in a piston groove.

1,903,108. LIQUID DISPLACEMENT GAS COMPRESSOR. DONALD G. GRISWOLD, Los Angeles, Calif. Filed Dec. 14, 1931. Serial No. 580,869. 12 Claims. (Cl. 230—90.)

1. A gas compressor of the class described embodying: a housing having a main compressing chamber and an

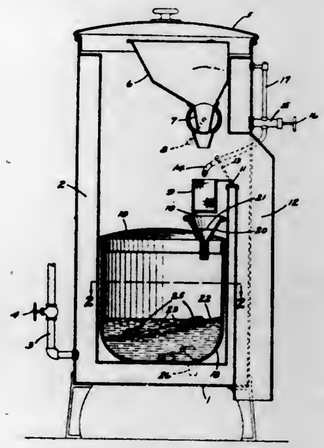
auxiliary float and outlet chamber; a check valve between said chambers; a liquid inlet and a liquid outlet in said main compressing chamber; an air inlet in said main

compressing chamber; valve means in said liquid inlet and said liquid outlet; and float means in said chambers for controlling the actuation of said liquid inlet and said outlet valves.



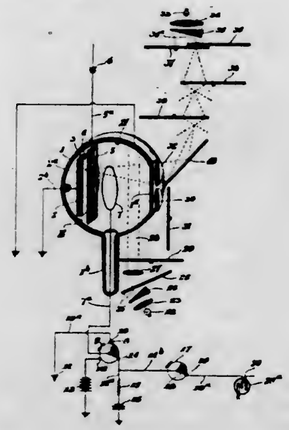
1,908,109. SPEAR. AUDREY L. HAMPTON, Houston, Tex. Filed Feb. 8, 1932. Serial No. 591,518. 8 Claims. (Cl. 294—86.)

1. A spear comprising a mandrel, a sectional expander around the mandrel, said mandrel being connected to the sections of the expander by reversely pitched threads, an expansible pipe engaging means on the expander connected to the upper section thereof, means interconnecting the said section to permit their relative longitudinal movement but to prevent the relative rotation.



1,903,110. COIN-CONTROLLED WEIGHING MACHINE. HARLAN A. HADLEY, St. Johnsbury, Vt., assignor to E. and T. Fairbanks and Company, a Corporation of Vermont. Filed Dec. 30, 1927. Serial No. 243,576. 7 Claims. (Cl. 194—47.)

1. In a device of the character described, the combination with a weighing mechanism and an indicator assembly including an indicator shaft, actuating means for the said shaft, a ratchet wheel fixed to said shaft and having a radially extending pin thereon, a locking mechanism comprising a pivotally mounted trip arm carrying a locking pawl substantially intermediate the ends of the said trip arm and adapted to engage the said ratchet wheel and radial pin thereon, and coin-actuated means for temporarily holding the said trip arm and the coin pan in their inoperative position upon a coin leaving the pan comprising a heart-shaped cam pivotally mounted on the upper end of the said trip arm having its side co-operating with the periphery of a tripping wheel when the locking mechanism is in its operative position and its apex resting in engagement with the periphery of the said tripping

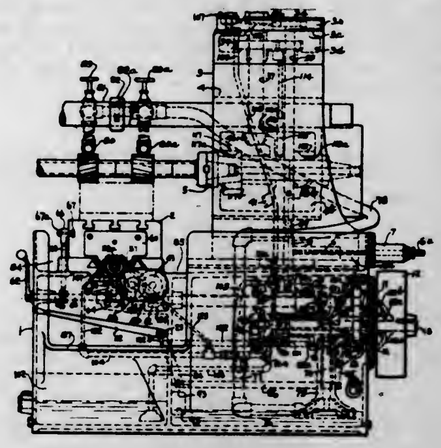


wheel when the locking mechanism is temporarily released, the said weighing mechanism comprising cooperating pivoted levers including a shelf lever, and means for operating the said tripping wheel under control of the shelf lever of the weighing mechanism, whereby the tripping wheel is turned and the cam caused to move into its operative position and thus permit the arm to drop and the locking pawl to engage the said ratchet wheel and radial pin and thus lock the said indicator assembly.

1,903,111. COFFEE MAKING MACHINE. HARRY HARPER, Minneapolis, Minn. Filed Dec. 8, 1930. Serial No. 500,846. 4 Claims. (Cl. 53—3.)

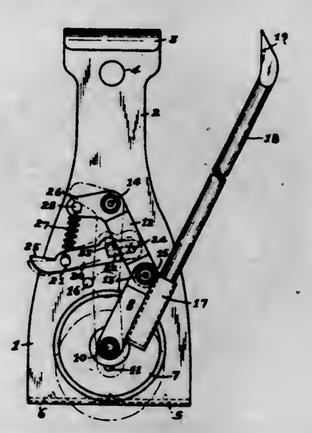
1. In a coffee making machine, a receptacle adapted to receive successive charges of fresh liquid coffee, and a removable partition in said receptacle spaced from the bottom thereof and normally immersed in said liquid coffee for temporarily separating a succeeding charge from the residue of a previous charge remaining in said receptacle, said partition having an unrestricted aperture therein establishing communication between the space in said receptacle above said partition and the space below the same.

1,903,112. TELEVISION. FRANÇOIS CHARLES PIERRE HENROTEAU, Ottawa, Ontario, Canada. Filed May 29, 1929, Serial No. 367,084. Renewed Aug. 18, 1931. 6 Claims. (Cl. 178—6.)



1. Television apparatus comprising a photoelectric cell having therein only an anode and a cathode with a photosensitive surface, means for projecting an image of a view on said cathode, means for interrupting the projecting of said image, means for thereafter scanning said cathode by a beam of light to cause the photosensitive surface of the latter to emit electrons and means for causing said anode to absorb a number of electrons, said member varying solely by reason of the potential of the elements from which the electrons were emitted.

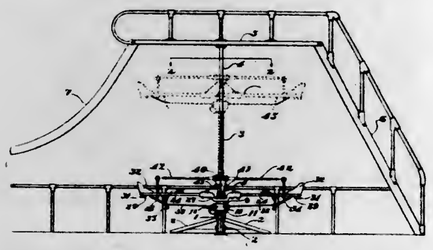
1,903,113. TELEVISION. FRANÇOIS CHARLES PIERRE HENROTEAU, Ottawa, Ontario, Canada. Original application filed May 29, 1929, Serial No. 367,084, and in Canada May 16, 1929. Divided and this application filed Sept. 8, 1930. Serial No. 480,480. 13 Claims. (Cl. 178—6.)



1. In a television process, the steps which comprise projecting an image upon a photoelectric screen then interrupting the light beam forming the image on the screen and then scanning the screen.

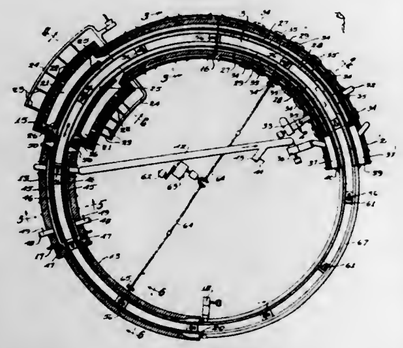
1,903,114. MACHINE TOOL. EDWARD J. KEARNEY and JOSEPH B. ARMITAGE, Wauwatosa, Wis., assignors to Kearney & Trecker Corporation, West Allis, Wis., a Corporation of Wisconsin. Original application filed Sept. 16, 1929, Serial No. 392,805. Divided and this application filed June 1, 1931. Serial No. 541,300. 4 Claims. (Cl. 184—6.)

2. In a milling machine the combination of a supporting structure, a table supported therefrom for horisontally reciprocatory movement, bearing surfaces associated with said structure for establishing the path of table movement and defined between longitudinally extended side portions, a lubricant reservoir associated with said structure, a power driven pump, a closed channel for the circulation of lubricant fluid between said reservoir and said bearing surfaces and including said pump, and means substantially preventing escape of fluid laterally from said bearing surfaces including a plurality of elements respectively longitudinally extended adjacent different of said side portions and each adapted to prevent movement of fluid past the element in a direction transverse to the extension thereof.



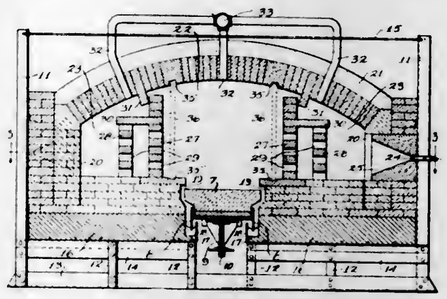
1,903,115. CONVEYING JACK. ALBERT L. KERN, Jackson, Mich. Filed Oct. 13, 1931. Serial No. 568,549. 2 Claims. (Cl. 280—44.)

1. A load conveying jack comprising a supporting member provided with an oblong slot, a load engaging element carried at the lower end of said supporting member, a



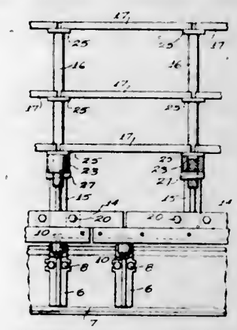
pair of bearing arms, a wheel mounted between said bearing arms, a bearing bolt pivotally connecting said wheel to the lower end of said pair of bearing arms and shiftably engaging in said slot, a connecting arm having its upper end pivotally connected to said supporting member, the lower end of said connecting arm having a toggle joint connection with the upper ends of said pair of bearing arms, said pair of bearing arms and said connecting arm bearing operable for projecting a portion of said wheel below said load engaging element and for releasing said wheel above the latter, and means for limiting the movements of said bearing and connecting arms when shifting to their projecting positions.

1,903,116. AMUSEMENT DEVICE. KILLIAN KOSCHKA, St. Paul, Minn. Filed July 30, 1932. Serial No. 626,765. 3 Claims. (Cl. 272—30.)



1. An amusement device of the character described, comprising a vertical threaded post, a rotatable threaded member having threaded engagement therewith, a seat supporting member rotatably mounted on said post to rest on said threaded member to be supported thereby and to normally be free for relative rotation with respect to said threaded member, lock means to secure said seat support member to said threaded member, a beam tiltably mounted on said seat support at approximately the center of said beam, a seat mounted on each end of said beam, releasable means mounted to lock said beam against tilting with respect to said seat support member, and actuating means operatively engaging said post and positioned to extend adjacent said seats to permit rotation of said seats with respect to said post.

1,903,117. KILN. LESTER L. LADD, Lockport, Ill. Filed Sept. 28, 1931. Serial No. 565,501. 16 Claims. (Cl. 25—142.)

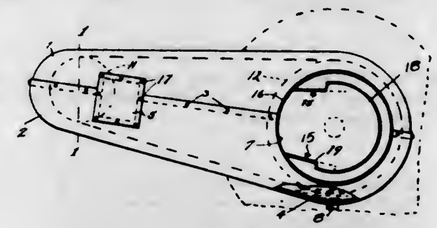


1. A tunnel kiln comprising a tunnel having a central ware passage and defining a preheating zone, a firing zone, and a cooling zone through which the ware travels successively, said tunnel having a combustion chamber in the firing zone and having an air chamber in the preheating zone, said air chamber communicating with said combustion chamber and with said ware passage, and exhaust means communicating with said air chamber for withdrawing some of the air and combustion gases from said preheating zone.

1,903,118. KILN. LESTER L. LADD, Lockport, Ill. Filed Sept. 28, 1931. Serial No. 565,502. 4 Claims. (Cl. 25—142.)

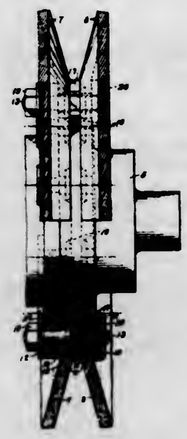
1. A kiln comprising a tunnel having a ware passage and a contiguous combustion chamber communicating with each other at their lower ends, a substantially imperforate baffle separating the upper portions of said ware passage and combustion chamber from each other, and means at the upper end of said combustion chamber for withdrawing the lighter combustion gases.

1,903,119. KILN FURNITURE. LESTER L. LADD, Lockport, Ill. Filed Sept. 28, 1931. Serial No. 565,503. 5 Claims. (Cl. 25—142.)



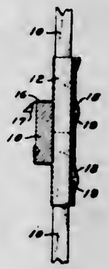
1. Kiln furniture comprising a horizontal shelf having openings therein, and a plurality of standards extending through said openings for supporting said shelf, said standards being appreciably smaller in cross section than said openings to permit said shelf to move longitudinally and transversely relative to said standards.

1,903,120. GUARD FOR TRUCK CHAINS. JOHN F. LAFFERTY, Haddon Heights, N. J. Filed July 23, 1930. Serial No. 470,018. 1 Claim. (Cl. 74—56.)



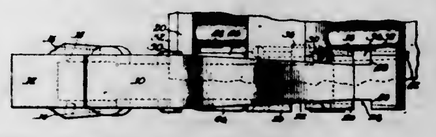
A guard for motor truck drive chains comprising two similar sections, the meeting edges of which telescope and are fastened together, the outer wall having an opening therein to fit the rear brake drum and also provided with an access opening, a flange surrounding the first mentioned opening, a cover plate removably mounted across the access opening, the inner wall having a circular opening to fit over the bearing of the drive sprocket shaft

and an irregular longitudinal opening to fit the radius rod and rear wheel housing, an outwardly projecting flange surrounding the circular opening, an inwardly projecting



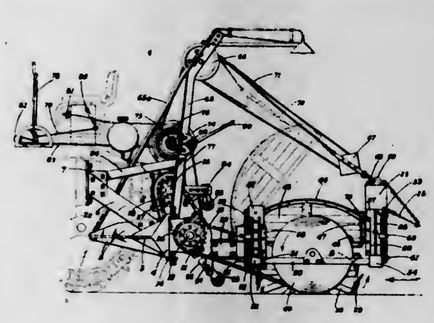
flange surrounding the irregular opening, and means to rigidly fasten the guard to the radius rod and rear wheel housing.

1,903,121. DUAL WHEEL STRUCTURE. ALPHONSE LARRAINE LUSSIER, Springfield, Mass. Filed June 25, 1932. Serial No. 619,338. 4 Claims. (Cl. 301—36.)



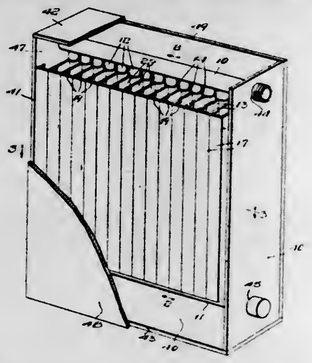
2. The combination of a wheel-hub having an apertured flange, threaded bolts secured in the apertures of said flange, two wheel-discs each having eccentric bolt-holes through which said bolts extend, said wheel-discs each having V-shaped annular grooves around its respective bolt-holes, centrally apertured and internally threaded spacing and securing units each having V-shaped annular ridges normally fitting in the respective annular grooves of said wheel-discs while the internal threads thereof are engaged with the threads of the respective bolts and combined with said bolts for clamping one of said wheel-discs against said flange, and means combining with said bolts for clamping the other one of said wheel-discs against said spacing and securing units.

1,903,122. KNOCKDOWN ASSEMBLAGE. OTTO H. MERK, West Allis, RAYMOND A. ARNDT, Wauwatosa, and CARL B. LANGE, Racine, Wis., assignors to Convertible Door Mfg. Co., West Allis, Wis., a Corporation of Wisconsin. Filed Nov. 16, 1931. Serial No. 575,282. 10 Claims. (Cl. 47—47.)



4. A trellis-work comprising, end coacting alined strips, a strip extending across the end plane of said end coacting strips, and a single fastener for rigidly connecting all of said strips.

1,903,123. DIPPER. DANIEL HENRY MEYER, Wilmington, Ill., assignor to American Manganese Steel Company, Chicago, Ill., a Corporation of Maine. Filed July 26, 1930. Serial No. 470,785. 9 Claims. (Cl. 37—141.)



2. A tooth base for dippers including a pair of prongs so spaced as to straddle a dipper front, and a forwardly facing shoulder on each of said prongs extending laterally therefrom.

1,903,124. ROTARY GROUND WORKING IMPLEMENT. TONY S. MILLER, LOOK L. CHONG, JUE L. CHONG, and SAM L. CHONG, Isleton, Calif. Filed May 17, 1932. Serial No. 611,840. 16 Claims. (Cl. 97—40.)

1. An earth working implement comprising a frame, a digging unit mounted therein, and a hood mounted on the frame over the upper portion of the unit; said hood comprising strips of resilient material disposed in close side by side relation.

1,903,125. RADIATOR. ARTHUR B. MODINE, Racine, Wis., assignor to Modine Manufacturing Company, Racine, Wis., a Corporation of Wisconsin. Filed Dec. 26, 1930. Serial No. 504,717. 8 Claims. (Cl. 257—141.)

2. In a device of the kind described, the combination of a plurality of tubular elements providing passages for a heating media, a manifold arranged at the opposite ends of said tubular elements, members providing indirect heat transferring surfaces, said members being arranged longitudinally of said tubular elements and having an edge thereof in direct engagement therewith, with the opposite edge extended therefrom, and engaging an adjacent member and providing a wall of an air duct bounded by said indirect heat transferring members and fins engaging said tubes providing air passages located in said ducts.

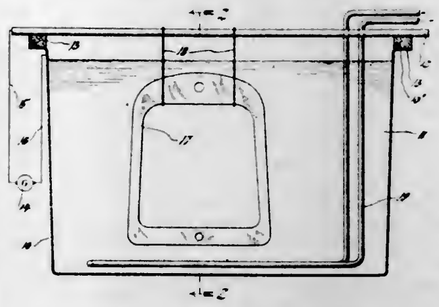
1,903,126. ANTIOXIDANT FOR FATS AND OILS. ROY C. NEWTON and DONALD P. GRETTIE, Chicago, Ill., assignors to Swift and Company, Chicago, Ill., a Corporation of Illinois. Filed Apr. 11, 1932. Serial No. 604,649. 16 Claims. (Cl. 99—11.)

9. An improved stabilized oil and/or fat containing a small amount of natural resin, gum guaiac.

1,903,127. INSULATING HOLDER FOR COOPER-HEWITT TUBES AND INERT GAS TUBES GENERALLY. LAWRENCE O'ROURKE, San Francisco, Calif. Filed June 1, 1931. Serial No. 541,258. 2 Claims. (Cl. 240—52.)

1. An insulating bracket comprising a curved base bearing bolt-openings, a body portion extending rightangularly from the front edge of said base and ending in a semi-circular seat having upon its either side and adjacent thereto a bolt-opening, and a section bearing a semi-circular concavity having bolt-openings upon either side thereof and adjacent thereto and adapted to register with the aforementioned bolt-openings for the accommodation of retaining bolts, said section being hingedly connected to the semi-circular seat section borne by the body portion, one of said bolts serving as a hinge pintle and the other as a locking means.

1,903,128. RECORDING LAMP. CHARLES A. PACKARD, Dallas, Tex. Filed Mar. 1, 1929. Serial No. 343,809. 1 Claim. (Cl. 176—124.)

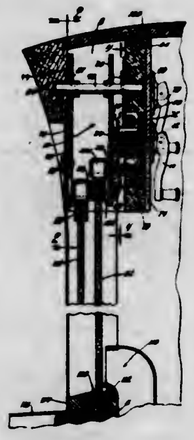


A lamp of the character described including a gas filled, transparent tube having a pair of electrodes therein, one of which consists of a spiral winding of fine resistance wire closely adjacent and parallel to the other electrode, means for maintaining potential gradient in said illuminable electrode and means connecting said electrodes for maintaining a potential difference between the same.

1,903,129. COTTER KEY. JOHN W. PETERSON, Cairo, Ill. Filed Jan. 29, 1932. Serial No. 589,576. 14 Claims. (Cl. 74—8.)

1. A cotter key comprising a pair of leg portions conjoined by a head portion and elastically constrained toward a spread relationship, and a latching member carried adjacent the end of a leg portion independently of the other leg portion whereby the leg portions may be latched, under elastic tension, in positions relatively close together.

1,903,130. CHROMIUM PLATING PROCESS. WILLIAM M. PHILLIPS, Birmingham, Mich., assignor to General Motors Corporation, Detroit, Mich., a Corporation of Delaware. Filed Jan. 15, 1927. Serial No. 161,349. 2 Claims. (Cl. 204—1.)

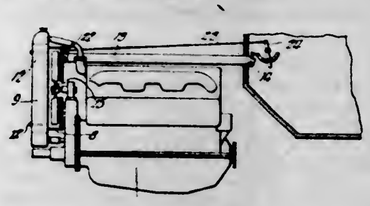


2. The process of treating a bath for depositing chromium electrolytically, said bath containing chromic acid and a compound recoverable upon analysis in the form of Cr_2O_3, and in which bath is employed an iron or steel anode, comprising passing current through the bath in a direction opposite to that employed for depositing chromium, the iron or steel anode becoming cathode and another anode being used with such relation to the cathode as to oxidize the reduced chromium.

1,903,131. AERIAL ADVERTISING DEVICE. JOHN PICCO, New York, N. Y. Filed Apr. 18, 1931. Serial No. 531,219. Renewed July 30, 1932. 8 Claims. (Cl. 40—127.)

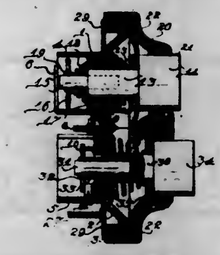
4. The combination with an aerial vehicle having a body, of a roller mounted on the body, winding drums on the ends of the roller, cables trained over the winding drums, means for winding one of said cables and unwinding the other cable, a display sheet constructed to display an advertisement carried thereby, cables connected to the ends of the display sheet and connected to the roller, and stiffening means extending across the display sheet.

1,903,132. ADJUSTABLE SUN VISOR. HARRY A. PLATT, Detroit, Mich., assignor to General Motors Corporation, Detroit, Mich., a Corporation of Delaware. Filed Jan. 31, 1930. Serial No. 424,844. 3 Claims. (Cl. 296—95.)



1. In an automotive vehicle: a stationary header organization supported by posts and providing a pocket; a windshield plate slidable relatively to said pocket to vary an opening therebelow; a visor plate movable to and from said pocket; and positioning means for each of said plates, including separate handles accessible from within said vehicle and mechanical trains housed within said pocket and extending from said handles to said plates,—said plates being of substantially equal length and provided with substantially parallel guides carried by said posts; and one of said trains including a shaft which extends across said pocket above the range of movement of said plates.

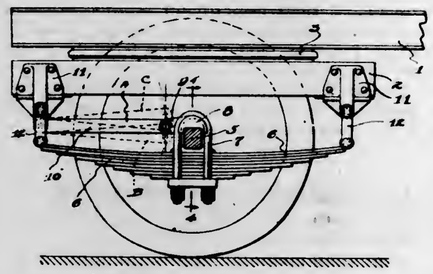
1,903,133. GAME. HOLLAND R. POLAK, St. Louis, Mo. Filed Sept. 20, 1930. Serial No. 483,199. 8 Claims. (Cl. 273—129.)



1. A device for playing a game comprising an effigy of a golf player having an upper body portion and a lower body portion, a shaft mounted for rotation in the lower portion and secured to the upper portion, a leg section secured to the shaft and separated from the remaining part of the bottom portion, and a club secured to the upper portion whereby the club may be moved to strike a ball positioned in front of the device by manual manipulation of the said leg section.

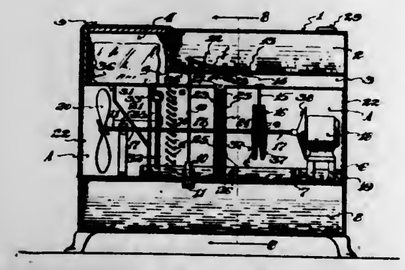
1,903,134. AUTOMOBILE HEATING SYSTEM. ARTHUR REAM, Chicago, Ill. Filed Mar. 21, 1930. Serial No. 437,654. 2 Claims. (Cl. 128—174.)

1. A device for use with an automobile having a radiator and a fan therefor, comprising an open faced drum-like casing for closely enclosing the back and sides of the fan and adapted to be mounted against the inside face of radiator whereby the fan may create a pressure in the casing by air drawn through the radiator, a manually rotatable multiple opening shutter mounted upon the rear wall of the casing to control the amount of air admitted through the radiator to control the temperature thereof, and a conduit connected to the casing and adapted to lead ino the automobile body to heat the interior thereof.



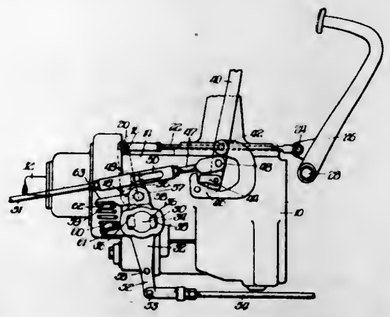
1,903,135. PUSH BUTTON ELECTRIC SWITCH. MACKWORTH G. REES, Detroit, Mich. Filed Feb. 6, 1930. Serial No. 426,283. 2 Claims. (Cl. 200—159.)

2. In a switch, a housing having a bottom wall, a pair of fixed contacts carried by said housing beneath said wall, a head push button having a sliding fit in said housing and wall, a movable contact carried by said button and adapted to engage said fixed contacts, a gasket snugly surrounding said push button between said head and wall, a



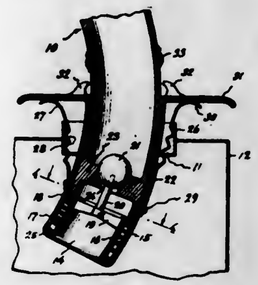
washer loosely surrounding said push button beneath said wall, a compressed conical coiled spring surrounding said push button between said wall and gasket, another compressed conical coiled spring surrounding said push button between said movable contact and washer, whereby said springs press said gasket and washer respectively against said head and wall, said springs being adapted to be compressed into a substantially flat condition.

1,903,136. RADIUS ROD AND AXLE CONSTRUCTION. FREDERICK MALCOLM REID, Detroit, Mich., assignor to Fruehauf Trailer Company, Detroit, Mich., a Corporation of Michigan. Filed Dec. 31, 1926. Serial No. 158,310. 2 Claims. (Cl. 280—1065.)



1. In a trailer, the combination of a trailer frame, a relatively short subframe underneath one end of the trailer frame for supporting the same, a fifth wheel between the trailer frame and the subframe whereby the subframe is dirigible, an axle, a spring connected to the axle with its two ends connected to the subframe substantially at the front and rear ends of the subframe and with its ends movable relative to the subframe, said spring being adapted to flex under load, a radius rod having one end pivotally connected to the axle and its other end pivotally connected to the subframe for positioning the axle with respect to the subframe, one end of the radius rod moving in an arc with respect to the other and upon flexing of the spring, said radius rod being so positioned that under normal load it lies substantially parallel with the subframe so that in the flexing of the spring due to road irregularities or the like the longitudinal movement of the axle with respect to the subframe is divided into forward and rearward components of the arcing movement whereby the total amount of longitudinal movement of the axle with respect to the frame is reduced to a minimum.

1,903,137. AIR CONDITIONING APPARATUS. LOUIS P. REISS, Dallas, Tex. Filed June 11, 1931. Serial No. 543,574. 7 Claims. (Cl. 261—90.)

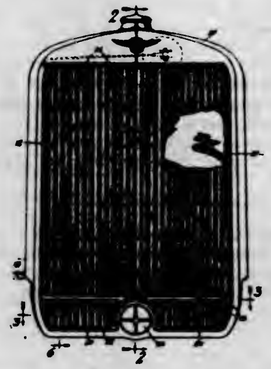


1. An air conditioning machine including a housing, a fluid reservoir and a superimposed fluid receptacle, a shaft, means carried by said shaft for transferring fluid from said reservoir to said receptacle in a continuous circular stream, a diffusing disc also carried by said shaft, means for continuously feeding fluid by gravity to said diffusing disc during rotation of said shaft, a fan carried by said shaft and means disposed between said fan and said fluid transferring means for separating moisture from the air currents during their passage through said machine.

1,903,138. BRAKE OPERATING MECHANISM. EDWARD A. ROCKWELL, Chicago, Ill. Filed Jan. 31, 1930. Serial No. 424,791. 13 Claims. (Cl. 188—204.)

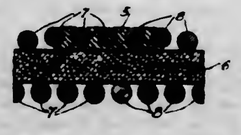
1. In combination a primary power brake unit, means for actuating said power brake, secondary front and rear wheel brakes, non-resilient connections from the power brake unit to the front wheel brakes, resiliently limited connections to the rear wheel brakes and independent means for actuating said front and rear brakes without operation of the power brake unit through non-resilient connections.

1,903,139. NOZZLE. DAVID TROMPETER, Amityville, N. Y., assignor to Miriam Sugerman, Baldwin, Long Island, N. Y. Filed Dec. 5, 1930. Serial No. 500,839. 5 Claims. (Cl. 251—115.)



2. A discharge nozzle for hose lines and the like including a tubular body and valve means for controlling the flow of liquid through said body, said valve means including a tubular nosepiece surrounding the end of said body, said nosepiece having a stem extending inwardly within said body, a valve supported on said stem, said body including an endpiece beneath said valve and surrounding said stem, said endpiece having a seat for said valve, means effective between said body and said nosepiece to urge said nosepiece away from the end of said body to maintain said valve on its seat, frictional gripping members on said nosepiece adapted to engage the wall of a tank filling opening, means to limit the penetration of said nozzle in said filling opening, and means cooperating with said nosepiece and said body to releasably retain said nozzle body in a forward valve opening position.

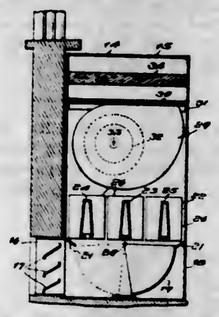
1,903,140. TERTIARY XANTHATE FLOTATION PROCESS. LUDWIG ROSENSTEIN, San Francisco, Calif., assignor to Shell Development Company, San Francisco, Calif., a Corporation of Delaware. Filed Feb. 1, 1932. Serial No. 590,322. 7 Claims. (Cl. 209—166.)



1. A method of recovering minerals from ores which comprises: subjecting an ore to a froth flotation operation in the presence of a salt of a tertiary xanthic acid as a promoter.

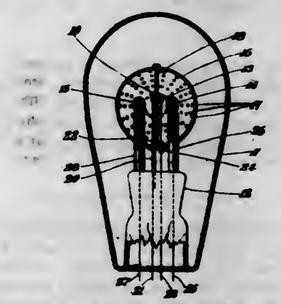
1,903,141. RADIATOR. ERNEST W. SEAHOLM and GUY E. PARKER, Detroit, Mich., assignors to General Motors Corporation, Detroit, Mich., a Corporation of Delaware. Filed Mar. 31, 1928. Serial No. 266,317. 11 Claims. (Cl. 257—132.)

1. A radiator assembly comprising a shell, a core in the shell, vertically arranged shutters mounted in front of the core, the shell being apertured, a removable finishing plate covering said aperture, said plate being provided with an inwardly extending flange serving as a support for the pivots of the shutters.



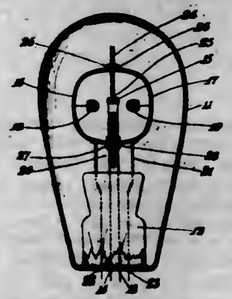
1,903,142. RESISTANCE STRIP AND METHOD OF MAKING SAME. NEWTON C. SCHELLENGER, Elkhart, Ind., assignor to Chicago Telephone Supply Company, Elkhart, Ind., a Corporation of Indiana. Filed Apr. 30, 1930. Serial No. 448,520. 8 Claims. (Cl. 201—63.)

5. A resistance element comprising, an insulating strip, a resistance wire space wound thereon and a piece of lead of varying cross-section engaging the end few turns of the wire, said lead being partly disposed in the spaces between those turns to hold the wire on the strip, and to taper the resistance value per turn as the end of the element is approached.



1,903,143. UNIT VENTILATOR. WILFRED SHURTLEFF, Moline, Ill., assignor to The Herman Nelson Corporation, Moline, Ill., a Corporation of Illinois. Filed Oct. 3, 1930. Serial No. 486,202. 11 Claims. (Cl. 257—137.)

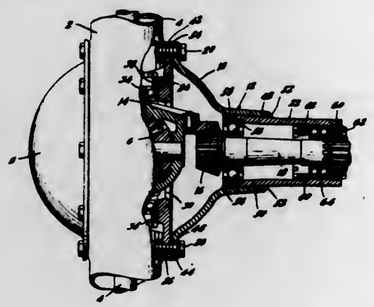
4. A unit device of the class described, comprising a casing provided with an inlet for air and with an outlet for the discharge of air therefrom in the top portion of the casing, a sheet-metal-extended-surface radiator group consisting of a plurality of at least three relatively shallow sections, each extending substantially from end to end of the casing and the group substantially filling the space crosswise of the casing, regulating steam valve means for controlling the selective heating of one or more of



the radiator sections, and suction means for inducing a flow of air through the radiator sections and through the outlet.

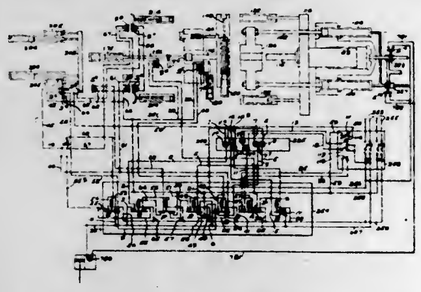
1,903,144. RECTIFYING TUBE. HANS J. SPANNER, Berlin, Germany, and ULRICH DOMRING, New York, N. Y., assignors to Electrons, Inc., a Corporation of Delaware. Filed Mar. 11, 1929, Serial No. 346,119, and in Germany June 19, 1928. 8 Claims. (Cl. 250—27.5.)

1. A gas filled rectifying device comprising a tube, a heatable cathode positioned therein, a pair of anodes disposed on opposite sides of the cathode, and a small inclosing shell surrounding said cathode and anodes and having a partition separating the anodes, said partition having an opening in which is disposed the cathode.



1,903,145. RECTIFYING TUBE. HANS J. SPANNER, Berlin, Germany, and ULRICH DOMRING, New York, N. Y., assignors to Electrons, Inc., a Corporation of Delaware. Filed Mar. 11, 1929, Serial No. 346,120, and in Germany June 19, 1928. 11 Claims. (Cl. 250—27.5.)

1. A gas filled rectifying device comprising a tube, a heatable cathode positioned therein, a conducting shell surrounding and substantially inclosing the cathode and di-

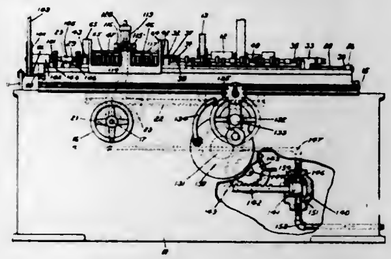


vided into a plurality of parts, each part forming an independent anode for cooperation with said cathode, and a partition separating adjacent anodes, said partition being formed of insulating material that retains its insulating properties and does not emit gases throughout the temperature range to which it is subjected, and a metallic plate embedded in the inner portion of said partition.

1,903,146. REAR AXLE CARRIER. CLAUDE H. STERLING, Syracuse, N. Y., assignor to General Motors Corporation, Detroit, Mich., a Corporation of Delaware. Filed June 9, 1930. Serial No. 459,918. 3 Claims. (Cl. 74—56.)

1. In an axle carrier comprising a pressed steel bowl portion, a pressed steel barrel portion welded to said bowl portion, a bearing ring secured at the junction of said bowl and barrel portion, said carrier having formed therein a lubricant opening at said ring and a forged saddle portion secured to said bowl portion.

1,903,147. POWER CONTROL APPARATUS. DAVID L. SUMMEY, Waterbury, Conn.; The Colonial Trust Company and Richard P. Weeks Summey executors of said David L. Summey, deceased. Original application filed Mar. 12, 1926, Serial No. 94,334. Divided and this application filed Sept. 21, 1928. Serial No. 307,541. 8 Claims. (Cl. 60—97.)

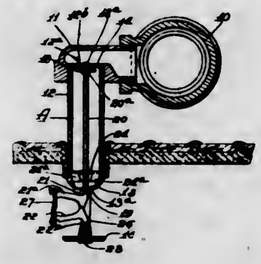


1. In combination, mechanism including a plurality of cooperating devices for performing different operations in a production cycle, a fluid pressure power unit for actuating each of said devices, means including a solenoid for controlling the operation of each power unit, a circuit including the coil of said colenoid and terminals for a contactor, a solenoid-operated contactor cooperating with said terminals, a circuit including the coil of said contactor solenoid, a switch in said last-named circuit, an actuating element for said switch, and a second make-and-break device in said last-named circuit whereby the closing of such circuit by said switch depends upon the prior closing thereof by said make-and-break device.

1,903,148. ROPE CLAMP. SAMUEL C. SWISHER, San Jose, Calif. Filed Feb. 3, 1932. Serial No. 590,622. 1 Claim. (Cl. 24—115.)

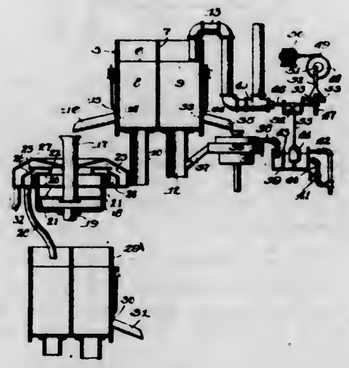
A rope clamp of the character indicated comprising, a pair of grooved members adapted to encompass a cable, one member having a pair of stop fingers formed thereon adjacent each end thereof and adapted to embrace the other member, and having a pair of spaced eyes formed on one side thereof and a pair of spaced hooks formed on the other side thereof in offset relation to said eyes, and the other member having a pair of spaced eyes formed thereon in offset relation to the hooks on the first member when the parts are in an operative position and having a hook formed thereon between said eyes but on the opposite side of the member and an eye formed thereon aligning with said hook, and a cable passing through said eyes and having its two ends permanently secured to corresponding ends of said members but on opposite sides thereof.

1,903,149. CAM GRINDING APPARATUS. CHARLES G. TREFETHEN, Worcester, Mass., assignor to Norton Company, Worcester, Mass., a Corporation of Massachusetts. Filed May 16, 1930. Serial No. 452,932. 9 Claims. (Cl. 51—101.)



1. A cam grinding machine comprising a grinding wheel and a support for a set of cam blanks movable relative thereto, master cams and cam followers which are relatively movable, means associated therewith for moving the cam blanks and wheel relatively in accordance with the relative movement between a master cam and its follower to grind a desired cam contour, said master cams being arranged as two sets, each set having a follower co-acting therewith, and mechanism for automatically indexing one of the followers longitudinally relative to its set of cams while the other remains inoperative and thereafter indexing the second follower while the first remains inoperative.

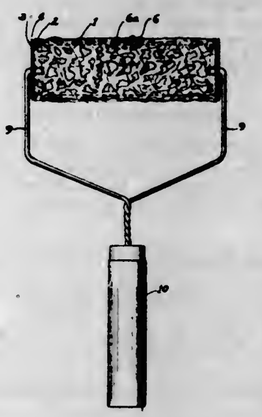
1,903,150. PENDANT SPRINKLER SYSTEM. EMIL TYDEN, Hastings, Mich. Filed Apr. 4, 1932. Serial No. 602,938. 8 Claims. (Cl. 169—17.)



1. A discharge head for a fire extinguishing system arranged to be mounted dependently from the water pipe of the system and comprising a conduit element of substantial length having a valve-controlled inlet port at the upper end, and a continuously downward flow passage from end to end, and a downwardly opening discharge nozzle terminal at the lower end; an upwardly seating valve at the inlet port; a valve operating stem extending from connection with said inlet valve through the flow passage and protruding from the nozzle discharge; a stop member carried by the pipe element unobstructingly with respect to the nozzle discharge and spaced downwardly

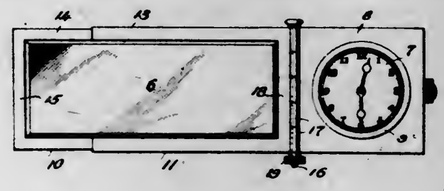
therefrom in alignment with the protruding end of the stem at the position of said stem for holding the valve seated; means displaceably interposed between the end of the stem and said stop member at valve-seating position of the stem, whereby upon displacement of said interposed

means the valve is released for opening under pressure in the system water pipe, and water flows in continuously downward course for discharge at the nozzle, and an upwardly facing spreader carried by the pipe element interposed in the path of discharge from the nozzle.



1,903,151. APPARATUS FOR FEEDING PULP OR FIBER TO PAPER MAKING MACHINERY. ARTHUR G. WAKEMAN, Appleton, Wis. Filed Apr. 23, 1932. Serial No. 607,042. 5 Claims. (Cl. 92—46.)

1. Mechanism for feeding pulp or fiber to paper making machinery comprising a chamber for mixing pulp stock or fiber and water and water, a conduit leading from said mixing chamber, a receiving tube co-operatively related with said conduit, a rotor for generating centrifugal action axially related with said receiving tube, baffles associated with said rotor, annular chambers co-operating with said baffles to respectively receive the baffled and unbaffled discharge from said rotor, and conduits leading from said respective annular channels to a paper making machine and the stock supply for said mixing chamber.



1,903,152. MURAL DECORATION. GEORGE V. E. WATSON and ROBERT O. STUBBINS, Seattle, Wash. Filed June 29, 1931. Serial No. 547,749. 2 Claims. (Cl. 41—5.5.)

2. A stippling tool comprising a frame, a roller rotatably carried by said frame, metal disks having a sharpened serrated periphery secured to the ends of the roller, the serrated portion projecting beyond the roller a predetermined distance to engage the surface to be stippled, and

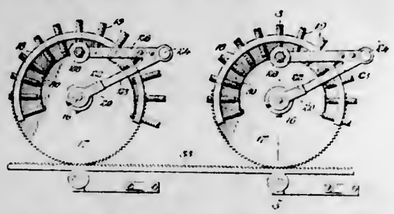
strips of sponge material wound spirally around the roller, the surface of the sponge extending slightly beyond the outer edge of the serrated portion of the disks.

1,903,153. CLOCK AND MIRROR HOLDER. JAMES B. WEIR, New Dorp, N. Y., assignor, by mesne assignments, to Standard Mirror Company, Inc., Buffalo, N. Y., a Corporation of New York. Filed May 27, 1929. Serial No. 366,473. 1 Claim. (Cl. 45—97.)

A panel and instrument holder comprising a back plate made in two sections, each section having inturned flanges at opposite edges to grip a panel, said flanges being slidable one within the other to adjust the length of the plate, and one of the sections being bent over at its ends to form hinge ears, a plate having an opening to receive an instrument, and a hinge pintle connecting the last mentioned plate to said ears, said pintle being provided with a nut to hold the plates at adjustment.

1,903,154. ELECTROMAGNET. WICHARD W. WULLERT and WILLIAM E. BENNETT, Bend, Oreg. Filed Jan. 19, 1932. Serial No. 587,530. 3 Claims. (Cl. 175—367.)

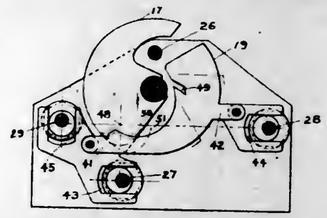
1. In a device of the class described, the combination of a core, heads fixedly secured to the oppositely disposed ends of the core, the head forming the inner end of the



core being elongated, reduced and internally threaded to facilitate its attachment to a handle, a hollow handle threadably attachable to the core, an electric conductor extending longitudinally within the handle and terminating in a magnetic coil disposed about the core, a non-magnetic jacket disposed about the head assembly and so secured thereto as to form a liquid tight head, and a switch disposed in the conductor and adjacent the outer end of the handle.

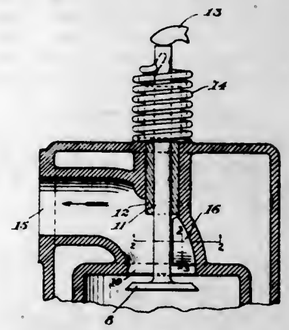
1,903,155. LICENSE PLATE. OLIVER H. ANDERSON, Superior, Ariz., assignor to Safeway Auto License System, Inc., a Corporation of Tennessee. Filed Oct. 8, 1932. Serial No. 636,915. 10 Claims. (Cl. 40—125.)

1. A license plate or the like comprising a plate having characters thereon, openings in the plate adjacent one or more of the characters, a character plate having portions receivable through the openings so as to position the character plate in relation to the other characters, and spring means engaged with the back of the plate and having portions offset away from the back of the plate for engaging the portions of the character plate which are extended through the openings, for holding the character plate in place.



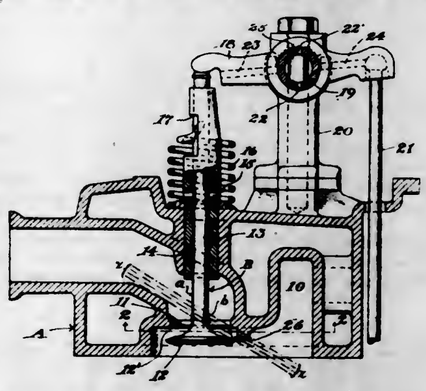
1,903,156. RADIO APPARATUS. DORSEY F. ASBURY, Broomes Island, Md. Filed Mar. 16, 1926. Serial No. 95,138. 2 Claims. (Cl. 175—41.5.)

1. In mechanism of the class described consisting of a plurality of instrumentalities in cooperative relation and adapted to be adjusted from a single point of control, a main rotatable controlling element adapted to impart movement in equal degree to each of said instrumentalities, rotatable members comprised in each of said instrumentalities and connected with said main controlling element and adapted to be rotated in equal degree by movement imparted therefrom, complementary elements cooperating with said rotatable elements and connections therefor, said connections comprising in each instance an individually adjustable cam track and a member cooperating therewith and adapted to impart independent compensatory movements to the complementary elements in an amount variably determined by the configuration of the cam track, substantially as described.



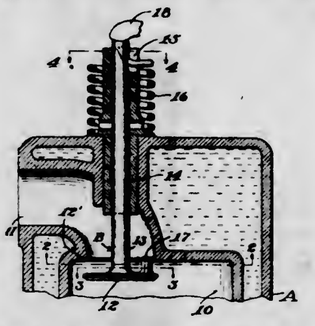
1,903,157. VARIABLE CONDENSER. DORSEY F. ASBURY, Broomes Island, Md. Filed Aug. 14, 1929. Serial No. 385,839. 4 Claims. (Cl. 175—41.5.)

1. A condenser, comprising in combination, a plate, a second plate and means for moving it in its own plane to produce amounts of overlapping area between it and the first said plate, and means whereby the first said plate may be moved back and forth in each of three different directions to respectively find and establish the



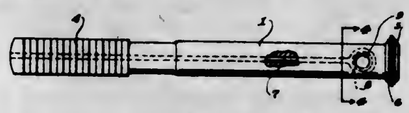
desired amounts of overlapping area between the plates for three certain amounts of movement of the said second plate.

1,903,158. EXHAUST VALVE STEM SHIELD. DORSEY F. ASBURY, Broomes Island, Md. Filed May 6, 1931. Serial No. 535,525. 4 Claims. (Cl. 123—177.)



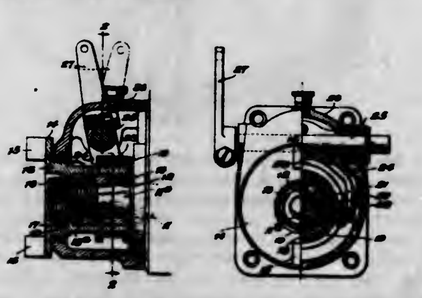
1. In a gas engine structure, a cylinder including a gas port having entrance and discharge ends, a poppet valve controlling the entrance end of the port, said valve including a head and a stem with the latter having a length thereof exposed to gas current in the port, and means shielding from the gas current only that side of the exposed length of the stem which is remote from the discharge end of the port.

1,903,159. INTERNAL COMBUSTION ENGINE. DORSEY F. ASBURY, Broomes Island, Md. Filed Nov. 20, 1931. Serial No. 576,388. 3 Claims. (Cl. 123—191.)



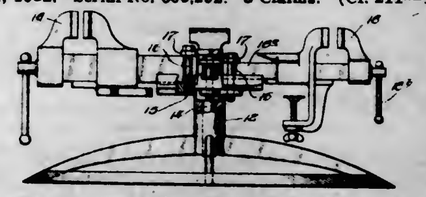
1. In a gas engine structure, a cylinder including a gas port having entrance and discharge ends, a poppet valve controlling the entrance end of the port, said valve including a head and a stem with the latter having a length thereof exposed to gas current in the port, and means inside the combustion chamber shielding from the gas current only that side of the exposed length of the stem which is remote from the discharge end of the port.

1,903,160. INTERNAL COMBUSTION ENGINE STRUCTURE. DORSEY F. ASBURY, Broomes Island, Md. Filed May 13, 1932. Serial No. 611,199. 4 Claims. (Cl. 123—191.)



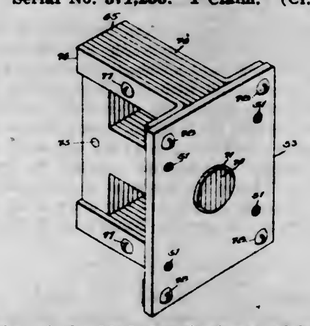
1. In a gas engine structure, a cylinder including a gas port having entrance and discharge ends, a poppet valve controlling the entrance end of the port, said valve including a head and a stem with the latter having a length thereof exposed to gas current in the port, and means on the valve head shielding from the gas current only that side of the exposed length of the stem which is remote from the discharge end of the port.

1,903,161. TOOTHBRUSH. IRVING BARKAN, Philadelphia, Pa. Filed Aug. 19, 1931. Serial No. 558,126. 2 Claims. (Cl. 15—188.)



1. In a brush of the class described, the combination of a handle, of a disk at the outside of said handle, and a series of pointed teeth on the periphery of said disk for cleaning the crevices between the teeth of the user.

1,903,162. SHAFT COUPLING. OTTMAR BAUR, Stuttgart, and HERMANN LEMPP, Feilbach, Germany, assignors to Robert Bosch Aktiengesellschaft, Stuttgart, Germany. Filed Jan. 17, 1930. Serial No. 421,514. 5 Claims. (Cl. 64—90.)

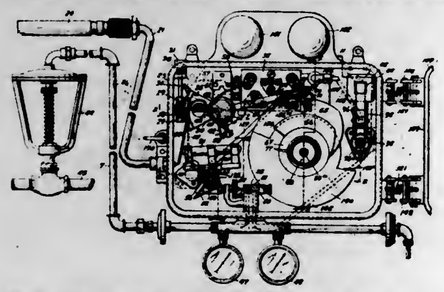


1. A coupling comprising two members one rotatably but non-slidably mounted on the other, a shaft, a single screw element for releasably connecting both of said members to said shaft, a third member slidably mounted on the outer of the first two members and formed with inwardly extending projections passing through slots having sides parallel to the axis of the coupling formed in said outer member and engaging helically disposed recesses in the inner of the first two members and means for moving said third member axially with respect to the first two members to vary the angular relationship between the latter.

1,903,163. VISE DISPLAY STAND. WARREN U. BOTSFORD, Moline, Ill., assignor to Rock Island Mfg. Co., Rock Island, Ill., a Corporation of Illinois. Filed Mar. 21, 1932. Serial No. 600,292. 3 Claims. (Cl. 211—13.)

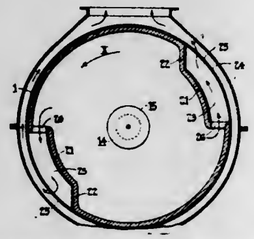
1. A base; a supporting member rotatably mounted on the base, said supporting member including a part with radial troughs having holes in their inner ends; and means for holding the ends of the beams of vises in said troughs, said means including clamping members adapted to engage the upper surfaces of the ends of said beams and co-operating with the holes in the troughs.

1,903,164. LOUD SPEAKER. HAROLD KARL BOUVIER, La Grange, Ill., assignor to Temple Corporation, Chicago, Ill., a Corporation of Delaware. Filed June 15, 1929. Serial No. 371,285. 1 Claim. (Cl. 179—115.5.)



A device of the kind described comprising a substantially E-shaped magnet member formed entirely of flat laminations superimposed upon each other, the arms of said magnet member being rectangular in cross-section and the middle arm having its free end formed into a cylindrical pole tip, a plate secured to said E-shaped magnet member and apertured to surround said pole tip, said apertured plate and said pole tip co-operating to provide an annular magnetic field, a diaphragm, and means re-acting with said magnetic field for actuating said diaphragm.

1,903,165. INSTRUMENT FOR CONTROLLING TEMPERATURES. ROY W. BROWN, Akron, Ohio, assignor to The Firestone Tire & Rubber Company, Akron, Ohio, a Corporation of Ohio. Original application filed July 17, 1924, Serial No. 726,611, Patent No. 1,768,349, dated June 24, 1930. Divided and this application filed Apr. 9, 1930. Serial No. 442,802. 8 Claims. (Cl. 161—1.)



1. Apparatus of the class described comprising a clock, a cam member driven by said clock, an electrically operated means for resetting said cam member, a contactor,

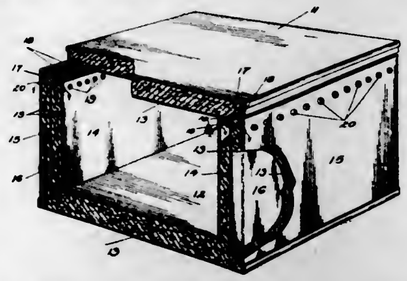
a remote control switch connected in an electrical circuit with said means and said contactor, and means actuated

by said clock for operating said contactor, said contactor being adapted to automatically break the circuit to the switch as the cam member is reset.

1,903,166. MILL FOR PULVERIZING AND THE LIKE. DAVID YULE BRYANT, Sarnia, Ontario, Canada. Filed Aug. 3, 1931. Serial No. 554,910. 2 Claims. (Cl. 83—9.)

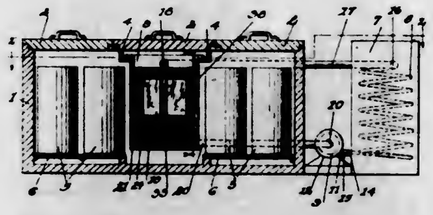
1. In an apparatus for grinding, blending or the like, a rotatable drum having a deflector member on the interior surface thereof, said member comprising a partially cylindrical wall coaxial with the drum, and an integral wall connecting said cylindrical wall with said drum at the forward or leading end thereof, said deflector member forming a pocket which is open at its rearward or trailing end and which encloses an opening in the drum, said integral wall being arranged at a steep angle with respect to the interior surface of the drum so as to form a ledge from which the material being treated periodically cascades.

1,903,167. PRESSURE VESSEL FOR SOLID CARBON DIOXIDE. ALMON J. CORDREY, Detroit, Mich., assignor to Zero Ice Corporation, a Corporation of Michigan. Filed Mar. 12, 1931. Serial No. 522,112. 5 Claims. (Cl. 62—91.5.)



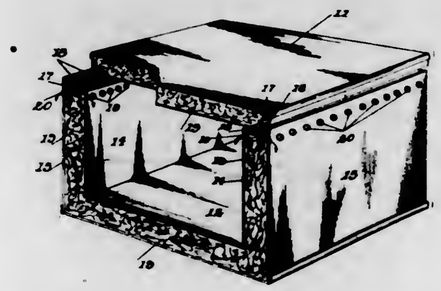
1. A pressure vessel for liquefying solid carbon dioxide, comprising an elongated hollow body having an end charging opening of lesser size than the interior of the body, and a rack in said vessel of substantially greater length than width, the width of said rack being greater than the size of said opening whereby it cannot be removed from said pressure vessel without deformation.

1,903,168. PRESSURE VESSEL FOR SOLID CARBON DIOXIDE. ALMON J. CORDREY, Detroit, Mich., assignor to Zero Ice Corporation, a Corporation of Michigan. Filed Mar. 20, 1931. Serial No. 524,171. 6 Claims. (Cl. 220—24.)



1. A pressure vessel for liquifying solid carbon dioxide and the like comprising a tubular receptacle having an open end, a closure plug adapted to engage within said end and removable therefrom, means secured to said receptacle for retaining said plug in position, a sealing member on the inner side of said plug having a peripheral flange, a packing means between the flange and plug, and means for drawing said member towards said plug to compress said packing means against the inner wall of said receptacle, said sealing member being free to move toward said plug to further compress said packing means when pressed by gas pressure generated within the receptacle.

1,903,169. INSULATED CONTAINER FOR SOLID CARBON DIOXIDE. ALMON J. CORDREY, Detroit, Mich., assignor to Zero Ice Corporation, a Corporation of Michigan. Filed Apr. 16, 1931. Serial No. 530,622. 4 Claims. (Cl. 220—9.)

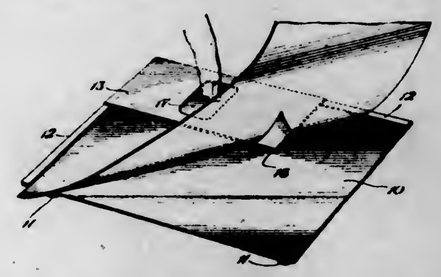


1. An insulated receptacle for a substance vaporizable by heat, comprising a side wall having inner and outer gas tight faces, the inner face being perforated at the top to permit passage of gas from within the receptacle into the intervening wall space, porous insulation in said intervening space, and a sheet-like baffle extending downward from the top edge of said wall and terminating above the lower edge thereof, said baffle dividing the insulation into layers communicating at their lower edges, and perforations in the outer wall face to permit escape of gas from said intervening space.

1,903,170. SOLID-CO_2 REFRIGERATING SYSTEM. ALMON J. CORDREY, Detroit, Mich., assignor to Zero Ice Corporation, a Corporation of Michigan. Filed Dec. 21, 1931. Serial No. 582,410. 21 Claims. (Cl. 62—91.5.)

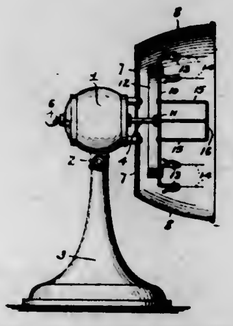
1. A method of refrigeration comprising circulating a low-freezing liquid refrigerant in heat transfer relation with a space to be cooled, submerging solid-CO_2 in a portion of said refrigerant to produce the cooling effect desired, and controlling the temperature of the refrigerant by the effective exposure of the solid-CO_2 to said refrigerant.

1,903,171. SOLID CO_2 RECEPTACLE. ALMON J. CORDREY, Detroit, Mich., assignor to Zero Ice Corporation, a Corporation of Michigan. Filed Jan. 7, 1932. Serial No. 585,352. 9 Claims. (Cl. 62—91.5.)



1. An insulated receptacle for a substance vaporizable into a gas denser than air, having a removable closure and comprising side walls having inner and outer gas tight faces oppositely perforated near the top to permit the passage of gas freely into and out of the entire intervening wall space, thereby displacing less dense gases from the wall space and permitting convection circulation of the gas within the side wall space.

1,903,172. PROCESS OF PREPARING SOYA BEAN PROTEIN CONTAINING MATERIAL FOR THE MANUFACTURE OF AN ADHESIVE, AND THE PRODUCT THEREOF. LEO W. EILERTSEN, CHARLES N. CONE, GLENN DAVIDSON, IRVING F. LAUCKS, and HARRY P. BANKS, Seattle, Wash., assignors to I. F. Laucks Inc., Seattle, Wash., a Corporation of Washington. Filed June 14, 1926. Serial No. 116,010. 3 Claims. (Cl. 87—17.)

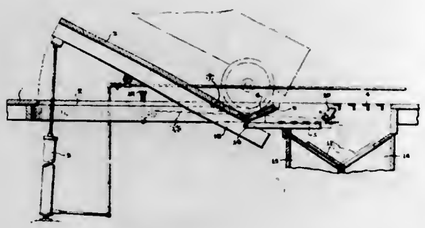


1. In the process of preparing soya bean protein containing material for the manufacture of an adhesive, the steps of reducing the cake, derived by removing the oil content in whole or in part by pressure or by solvents, to the form of a coarse meal; drying the same; treating in heater to live steam; and storing the product for further gradual processing.

1,903,173. TEAR-OFF DEVICE. JOHN B. EUTH, Chicago, Ill., assignor to United Autographic Register Co., Chicago, Ill., a Corporation of Illinois. Filed Mar. 30, 1931. Serial No. 526,480. 2 Claims. (Cl. 33—33.)

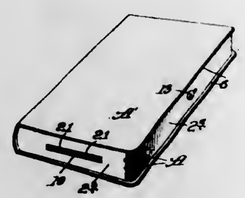
1. In combination: a base-plate provided with supporting legs, and having guide-strips on at least two of its marginal edge-portions to facilitate positioning of a paper-sheet on said base-plate; and a top-plate fixedly mounted on said guide-strips in spaced relation to said base-plate so as to overlie a sheet resting thereon, the edges of said top-plate which extend over said sheet being sharpened to form tear-off edges, and said top-plate being provided with a finger-opening through which the sheet may be gripped during a tearing-operation.

1,903,174. FILM DEVELOPER AND DRIER. JAMES WALTER FERGUSON, Marion, Ill. Filed July 25, 1931. Serial No. 553,185. 6 Claims. (Cl. 95—100.)



1. A developer and drier for photographic films comprising a frame, a clip on the frame adapted to grasp a film, a supporting member associated with the frame of a height slightly greater than the combined length of the film and clip whereby the frame may be supported in a bath with the film depending almost to the bottom of the bath, and means for removably associating the frame with a rotary shaft.

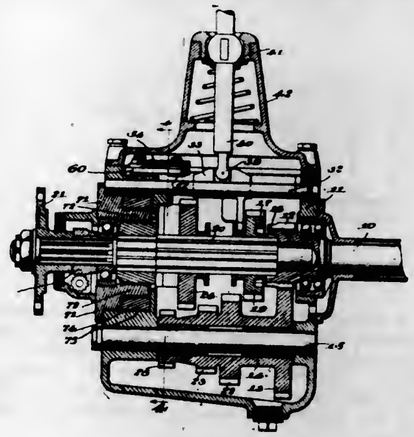
1,903,175. DYEING ANIMAL FIBERS. ALFRED FISCHER, Frankfort-on-the-Main-Fechenheim, Germany, assignor to General Aniline Works, Inc., New York, N. Y., a Corporation of Delaware. Filed Aug. 4, 1930, Serial No. 473,124, and in Germany Sept. 2, 1929. 3 Claims. (Cl. 8—5.)



2. Process which comprises dyeing animal fibers, which are previously dyed and partially coated with a wax-resist, in the cold with a bath containing sulfuric acid ester salts of leuco compounds of vat dyestuffs, an alkali of the group consisting of alkali metal carbonates and triethanol-amine and formaldehyde sulfoxylate and developing the dyeing with a bath containing an acid and oxidising agents of the group consisting of persulfate and chromate.

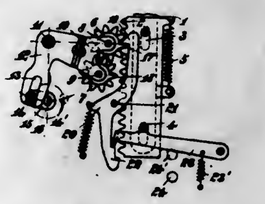
1,903,176. VEHICLE DUMP. LESLIE D. FISKIN, Darrousett, Tex. Filed Sept. 22, 1931. Serial No. 564,451. 5 Claims. (Cl. 214—49.)

1. In a vehicle dump and in combination with the dumping platform, a grate pivoted to the discharge end of the dumping platform to move therewith and drop to a position lower than said platform as the platform tilts to clear the vehicle and prevent injury to the equipment thereof, means for limiting the drop of the grate, and latch means for supporting the grate in normal position.



1,903,177. SAVINGS BANK. ALBERT C. GRUNWALD, Chicago, Ill., assignor to The Automatic Recording Safe Company, Chicago, Ill., a Corporation of Illinois. Original application filed Aug. 23, 1930, Serial No. 477,431. Divided and this application filed Mar. 21, 1932. Serial No. 600,259. 2 Claims. (Cl. 232—55.)

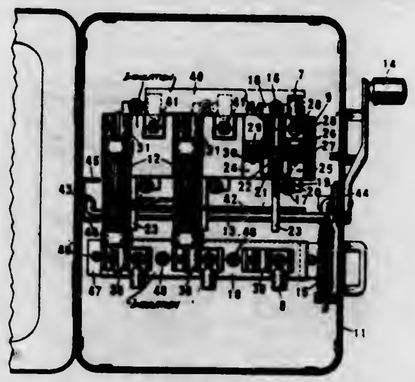
1. A savings bank comprising a casing having one wall provided with a coin-slot and having another wall at right angles thereto; a bracket comprising a flange secured to said second-mentioned wall and a bowed spring-portion having a free extremity disposed adjacent to said first-mentioned wall; and a slot-guard having an angular head portion confined between the free end of the spring and said second-mentioned wall, and having a slot-guard portion extending through a recess in the extremity of said spring.



1,903,178. DEVICE FOR PREVENTING RETROGRADE MOVEMENT OF AN AUTOMOBILE. JOHN LOUIS GONARD, Englewood Cliffs, N. J. Filed Oct. 22, 1931. Serial No. 570,438. 7 Claims. (Cl. 192—4.)

1. In a transmission mechanism for power driven vehicles, means associated with the transmission mechanism for preventing retrograde movement of the vehicle during neutral and forward speeds and comprising a driven shaft, a one-way brake element on the shaft, a lever for releasing the brake, a gear shifting element in the transmission for controlling the low and reverse speed provided with a pin, a lever pivotally mounted at one end, means connecting the free ends of the levers together, the second lever being provided with a slot intermediate the ends thereof and having a straight portion in line with the movement of the shifting element, receiving the pin during neutral and forward speeds, and retaining the brake lever against movement, one end of the slot being extended laterally to receive the pin when the shifting

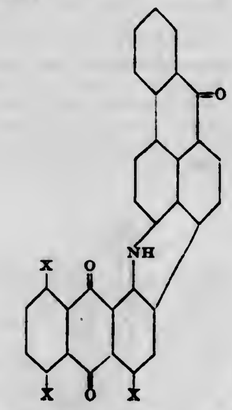
element is moved to reverse position for rocking both levers to release said brake to permit retrograde movement of the vehicle.



1,903,179. CALCULATING MACHINE. JOHN EMIL WILLIAM GREVE, Chemnitz, Germany, assignor to Astrawerke Aktiengesellschaft, Chemnitz, Germany. Filed July 15, 1931, Serial No. 550,956, and in Austria May 23, 1931. 2 Claims. (Cl. 235—60.)

1. Counting mechanism for calculating and registering machines, comprising tens carrying levers, a pair of counting wheels, one for addition and one for subtraction, co-operating with one another upon several axes as a reversing gear, driving means for the counting wheels, means to bring either of the counting wheels into engagement with the driving means at will, a carrying cam on each of the counting wheels, and a single carrying nose upon the tens carrying lever adapted to be directly operated by the carrying cam on whichever of the counting wheels is for the time being engaged by the driving means.

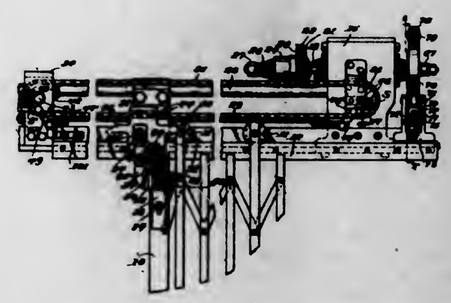
1,903,180. ELECTRIC SWITCH. HERMAN J. HAMMERLY, New Britain, Conn., assignor to The Trumbull Electric Manufacturing Company, Plainville, Conn., a Corporation of Connecticut. Filed Aug. 6, 1932. Serial No. 627,692. 12 Claims. (Cl. 200—114.)



1. An electric switch including a box, an actuating crank shaft pivoted in opposite sides of the box, an insulating block mounted in the box at one side of the crank shaft and a second block mounted in the box at the opposite side of the crank shaft, one of said blocks having a passage extending through it at right angles to the crank shaft and a contact chamber at one end of said passage, a stationary contact mounted within said chamber at each side of said passage, an insulating plate slidable in said passage and carrying a switch member adapted to connect said contacts, said plate having a slot open at one edge in which said crank shaft loosely fits, means for actuating said crank shaft and the associated switch

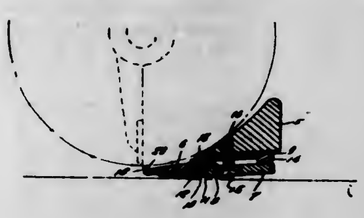
member, each block having a fuse clip mounted thereon and a fuse mounted in said clips and extending over the crank shaft between the blocks.

1,903,181. PROCESS OF MAKING NITROGENOUS VAT DYESTUFFS OF THE ACRIDINE SERIES. ERNST HONOLD, Frankfort-on-the-Main-Fechenheim, and GEORG BOEHNER, Friedrichsfeld in Baden, Germany, assignors to General Aniline Works, Inc., New York, N. Y., a Corporation of Delaware. Filed June 15, 1931, Serial No. 544,702, and in Germany July 1, 1930. 4 Claims. (Cl. 260—86.)



1. A process for producing nitrogenous vat dyestuffs which comprises condensing a product corresponding to the general formula

wherein two X's means hydrogen and one X represents the amino-group, with an aromatic compound which contains in its molecule at least one replaceable halogen or nitro group.

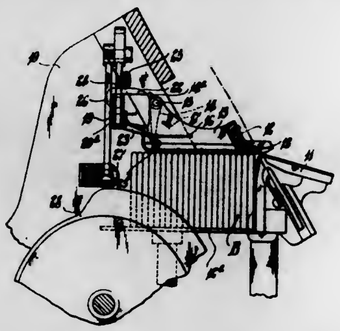


1,903,182. DOOR OPERATING MECHANISM. CHARLES W. HORTON, Miami, Fla. Filed Jan. 26, 1931. Serial No. 511,402. 5 Claims. (Cl. 187—52.)

2. An operating mechanism for an elevator door comprising a motor carried by the elevator and in open circuit with a source of electric supply, a transmission device connected with the motor, a friction clutch interposed between the motor and transmission device, a track rail leading from the transmission device, a carriage movable upon the track rail and carrying the elevator door, means operatively connecting the transmission device with the carriage, switches located at the ends of the path of movement of the carriage and including terminals electrically connected with the motor and terminals electrically

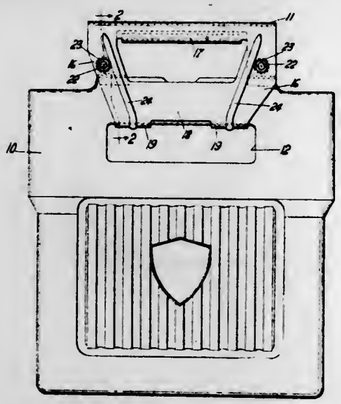
ly connected with a source of electric supply and circuit closers engageable with said terminals, and arms carried by the carriage and adapted to engage the circuit closers and move them to open positions when the carriage arrives at the ends of its path of movement.

1,903,183. MOWER BLADE. STEPHEN C. JESSUP, Salem, Ohio. Filed May 22, 1931. Serial No. 539,355. 2 Claims. (Cl. 56—294.)



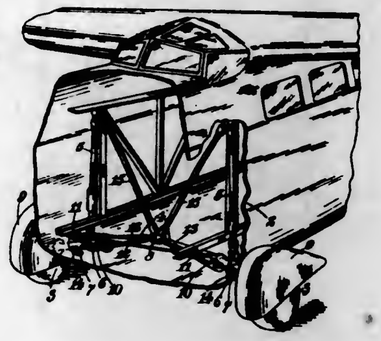
1. In a structure of the class described, a mower blade having an elongated body abruptly reduced at each longitudinal edge portion thereof to define shoulders and extensions less in thickness than the thickness of the major portion of the body, said extensions being extended upwardly and downwardly respectively in spaced parallel relation to said shoulders to cooperate with the shoulders in the formation of grooves immediately in back of the extensions, and clamping plates engaging the upper and lower surfaces of said body, one of said clamping plates having a groove therein for the insertion of one of the extensions.

1,903,184. METHOD OF AND MECHANISM FOR MECHANICALLY EXTRACTING THE INTERCONNECTING THREADS BETWEEN STITCHED BOOKS. OSCAR KLEINSCHMIT and OSKAR MÜLLER, Leipsig-Plagwitz, Germany, assignors to Firm Gebruder Brehmer, Leipsig-Plagwitz, Germany. Filed Feb. 11, 1931, Serial No. 515,068, and in Germany Oct. 29, 1930. 16 Claims. (Cl. 112—252.)



1. A method of extracting, by mechanical means, the severed interlooped terminal threads of the adjacent books of a stitched book-pad, which comprises engaging the fore-

most book of the book-pad with a separating member, severing the requisite thread during the movement of the separating member, and forcing the foremost book away

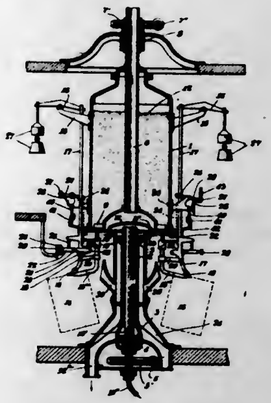


from the remainder of the book-pad by means of the separating member to effect the extraction of the severed thread.

1,903,185. RECEPTACLE HAVING A HANDLE. ROBERT H. LEWIS, Akron, Ohio, assignor to Firestone Battery Company, Akron, Ohio, a Corporation of Delaware. Filed Mar. 31, 1931. Serial No. 526,609. 1 Claim. (Cl. 16—114.)

The combination with a battery box having an upwardly extending portion above an upper edge thereof and a recess on an outer face thereof below said upwardly extending portion, said recess defining a shoulder, of a handle comprising a metallic loop provided with downwardly extending inner and outer leg members, said members being spaced apart, said inner leg member having a shoulder thereon for seating on the upper edge of said upwardly extending portion and having a downwardly extending portion below the shoulder on said inner leg member for engaging the inner face of said upwardly projecting portion above the upper edge of the box, said outer leg member having a portion thereon for engaging below the shoulder on the outer face of the box, and bolts extending through the leg members above said upwardly projecting portion for drawing said legs toward each other tightly against the box, said leg members being spaced apart sufficiently to permit tightening of said bolts so as to spring said leg members without contacting one another whereby the handle will not rattle on the box and whereby the bolts will not loosen under vibrations.

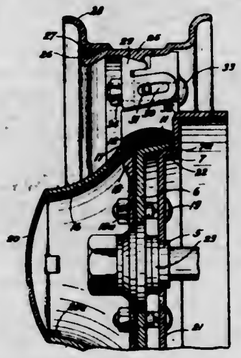
1,903,186. LANDING GEAR FOR AIRCRAFT. JOHN LLOYD, Coventry, England, assignor to Sir W. G. Armstrong Whitworth Aircraft Limited, Coventry, England. Filed Aug. 6, 1931, Serial No. 555,616, and in Great Britain Aug. 22, 1930. 4 Claims. (Cl. 244—2.)



3. In combination with an aircraft body, a landing gear comprising a landing member, an axle supporting said landing member exteriorly of the body, said axle extending through an opening in the wall of the body, means universally supporting the inner end of said axle within the body, an oleo-leg connected to said axle.

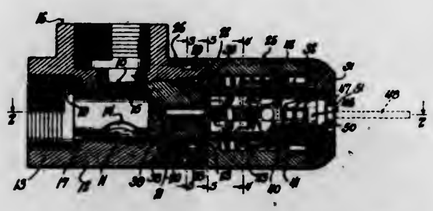
1,903,187. PREPARED SILICA AND PROCESS OF MAKING SAME. FRANCIS M. MCCLENAHAN, Monmouth, Ill. Filed Sept. 16, 1929. Serial No. 393,122. 6 Claims. (Cl. 23—182.)

1. A process of treating ammonium-silico-fluoride, comprising adding ammonium-hydroxide to a water solution of ammonium-silico-fluoride, precipitating silicic acid, and quickly furnacing said precipitated product not substantially below 500° C.



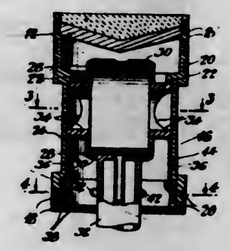
1,903,188. PACKING MACHINE FOR PULVERULENT MATERIAL. KRISTIAN MIDDELBOE, Copenhagen, Denmark, assignor to F. L. Smidth & Co., New York, N. Y., a Corporation of New Jersey. Filed Mar. 24, 1931, Serial No. 524,799, and in Great Britain Apr. 7, 1930. 5 Claims. (Cl. 249—59.)

1. In a machine for filling bags with a definite weight of pulverous material the combination with a filling tank rotatable about a vertical axis, of a number of filling spouts



extending from the lower part of the said filling tank and each adapted to serve as a carrier and feeding device for a bag, and each provided with an individual weighing mechanism supported by the tank for weighing the contents of the bag carried by the spout and with a cut-off for the material fed by the spout into the bag, said cut-off being controlled by the said weighing mechanism.

1,903,189. MOTOR VEHICLE WHEEL. PHILIP M. MILLER, Cleveland, Ohio, assignor to Miller Devices Inc., New York, N. Y., a Corporation of New York. Filed Mar. 14, 1930. Serial No. 435,815. 6 Claims. (Cl. 301—6.)

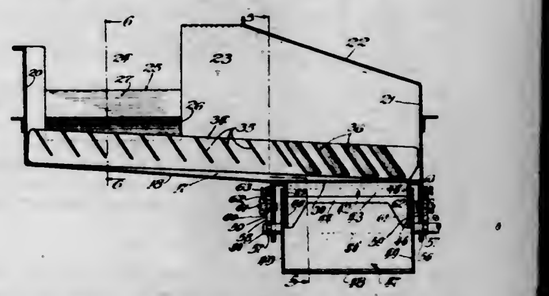


1. A wheel assembly for motor vehicles comprising a hub formed with an annular disk-like radial wall which terminates in a tapered peripheral flange, a spoked spider member mounted on the outer face of said flange, means for clamping the spider member in position on the flange, and a drum member having a driving connection with the hub and formed with an annular shoulder which fits against the inner face of said flange and reinforces the latter.

1,903,190. VALVE LOCK. STEPHEN W. NELDNER, Milwaukee, Wis. Filed Nov. 24, 1930. Serial No. 497,764. 3 Claims. (Cl. 70—124.)

1. In a device of the character described the combination of a housing, a member movable therein, a second member outside of said housing for operating said member, a recess in one of said members, an element permanently engaged with the other of said members and engageable in said recess to form an operating connection between said members, yieldable means urging said element out of engagement with said recess to render said connection ineffective, and lock controlled yieldable means for advancing said element into engagement with said recess to thereby render said connection effective.

1,903,191. PISTON AND WRIST PIN CONSTRUCTION. CHARLES A. NEVINS, New York, N. Y., assignor to Doherty Research Company, New York, N. Y., a Corporation of Delaware. Filed July 17, 1931. Serial No. 551,345. 2 Claims. (Cl. 74—108.)

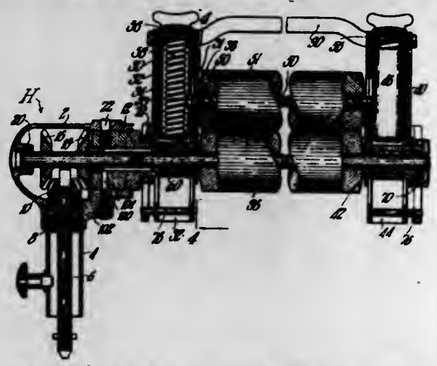


1. The combination with a piston having a chamber therein provided with an open end, a wrist pin seat in the wall of said chamber facing said open end, a pin having ends seated upon said seat, a collar having a portion for embracing said ends to hold the same to said seat and fastening means adjacent the open end of said piston for holding said collar in position.

1,903,192. ALLOY OF NICKEL, SILVER, TIN, AND COPPER. RUDOLF OLBERGER, Vienna, Austria. Filed Dec. 21, 1929, Serial No. 415,788, and in Germany Dec. 22, 1928. 2 Claims. (Cl. 75—1.)

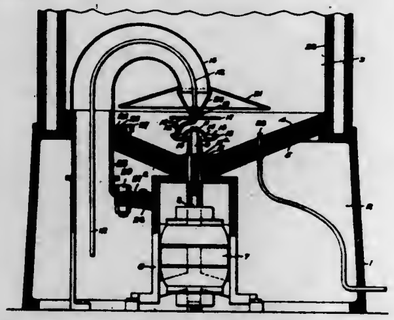
1. An alloy comprising copper, nickel, tin and silver, the copper predominating and being over ninety percent by weight, the nickel 0.1–3.8 percent by weight, the tin 6–9 percent by weight, and the silver 0.1–1.8 percent by weight.

1,903,193. MILK DUMPING DEVICE. WALTER H. PAULSON, Chicago, Ill., assignor to Harry D. Lathrop, Chicago, Ill. Filed Dec. 13, 1929. Serial No. 413,796. 15 Claims. (Cl. 221—69.)



1. The herein described milk handling device comprising a receiving hopper having an inclined bottom provided with an outlet opening at the lower end thereof, a flow-checking baffle in said hopper adjacent to the bottom thereof, and a reversible deflector arranged cooperatively beneath the outlet opening of said hopper, whereby to direct the milk discharged through said outlet opening to either side of a median line with respect thereto.

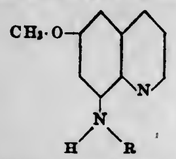
1,903,194. WRINGER. JULIAN L. PERKINS, West Springfield, Mass. Filed Apr. 6, 1931. Serial No. 528,094. 22 Claims. (Cl. 68—32.)



1. A wringer construction comprising in combination, a support, a shaft having a free end extending therefrom, guides associated with said free end of the shaft disposed in a spaced relation, connections between said guides to hold them against relative movements, carriers slidable

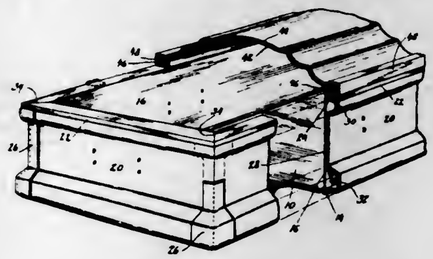
in said guides, levers oscillatably associated with said guides having cam surfaces, parts on said carriers adapted to be releasably engaged by said cam surfaces whereby

the said guides and carriers are held against movement in one direction and means associated with said carriers tending to urge them in another direction.



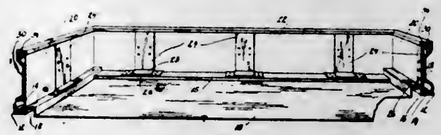
1,903,195. OIL BURNER. FREDERICK A. ROBINSON, Boston, Mass., assignor to Sarah L. Robinson, Boston, Mass. Filed May 7, 1931. Serial No. 535,611. 1 Claim. (Cl. 158—4.)

An oil burning apparatus comprising, in combination, a combustion chamber, a rotatable oil holding cup, an air passage beneath the cup leading into the chamber, a cool air duct over the cup, an oil feed pipe therein, a hood over the cup acting with the bottom of the combustion chamber to compel intimate contact of the air and gas to promote ignition and a perforated flame and cool air spreader over the cup.



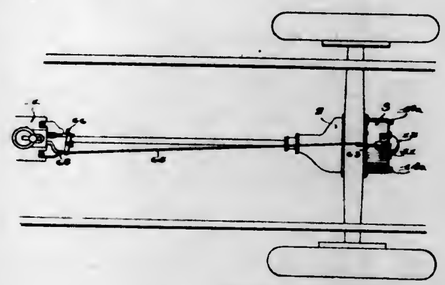
1,903,196. SUBSTITUTED AMINO QUINOLINES AND PROCESS OF MAKING THE SAME. WERNER SCHULEMANN, Vohwinkel near Elberfeld, and FRITZ SCHÖNHÖFER and AUGUST WINGLER, Elberfeld, Germany, assignors to Winthrop Chemical Company, Inc., New York, N. Y., a Corporation of New York. Filed Dec. 16, 1927, Serial No. 240,620, and in Germany Dec. 20, 1926. 14 Claims. (Cl. 260—88.)

1. The compounds of the general formula



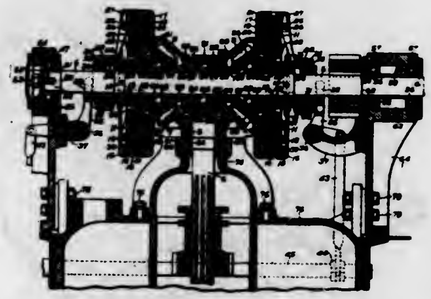
wherein R represents a hydroaromatic radical which is substituted by secondary or tertiary amino groups being suitable for pharmaceutical purposes.

1,903,197. CASKET. ALLISON F. H. SCOTT, Detroit, Mich., assignor to Woodall Industries Incorporated, a Corporation of Michigan. Filed Nov. 18, 1930. Serial No. 496,439. 6 Claims. (Cl. 27—3.)



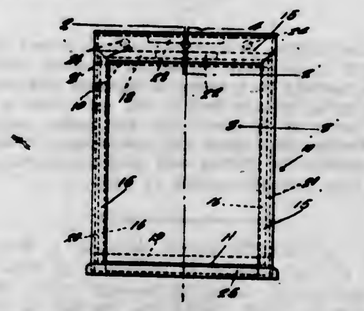
1. A casket comprising, in combination, a continuous surfaced rigid frame, and an outer covering of molded thermo-plastic material secured thereto, the securing means therefor including a portion of the continuous surfaced rigid frame.

1,903,198. CASKET. ALLISON F. H. SCOTT, Detroit, Mich., assignor to Woodall Industries Incorporated, a Corporation of Michigan. Filed Nov. 18, 1930. Serial No. 496,440. 12 Claims. (Cl. 27—3.)



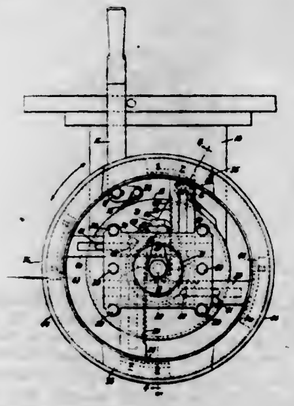
1. A casket comprising, in combination, a rigid bottom, rigid side and end walls, the outer periphery of said bottom being turned upwardly to form a flange, a U-shaped channel extending adjacent each edge of said bottom spaced from said flange, and an outer covering secured along its bottom edge between said channel and said flange.

1,903,199. AUTOMATIC SAFETY REVERSE MOTION LOCK. ALFRED B. SMALL, Miami, Fla. Filed Mar. 5, 1930. Serial No. 433,333. 6 Claims. (Cl. 192—4.)



1. In a one-way brake for use on rotatable shafts, a freely rotatable friction ring positioned about said shaft having notches, means engageable with said friction ring and actuated by said shaft for stopping rotation of said shaft in one direction, a plunger for engaging said notches to fix said ring against rotation, a cam follower integral with said plunger and a cam adapted to engage said follower for reciprocating said plunger.

1,903,200. REVERSING MECHANISM. FREDERICK O. SNOW, Jr., Winchester, Mass., assignor to Mead-Morrison Manufacturing Company, East Boston, Mass., a Corporation of Maine. Filed Dec. 2, 1929. Serial No. 410,897. 1 Claim. (Cl. 74—59.)



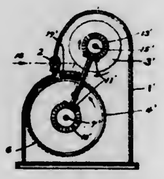
In a reversing mechanism, the combination of a driven shaft, a driving shaft extending across one end of said driven shaft, a bevel gear secured to said driven shaft, two bevel pinions meshing with said bevel gear and coaxial with said driving shaft, two clutches by which power may be transmitted from said driving shaft to either of said pinions, thereby to cause said driven shaft to be driven in either direction, said clutches comprising driving members secured to said driving shaft and driven members between said driving member and having driving connection with said pinions, respectively, two bearings which afford support for said pinions, respectively, on and about said driving shaft between said driving members, a frame presenting a fixed support between said driving members, two bearings deriving support from and held against axial movement with relation to said fixed support and in turn afford support for said pinions, respectively, and holding said pinions against axial movement, an intermediate bearing deriving support from said fixed support and in turn supporting said driving shaft between said pinions, said driving members cooperating with said intermediate bearing and said support to restrain said driving shaft against axial movement, and two end bearings deriving support from said frame and affording floating supports for the outer ends of said driving shaft.

1,903,201. SOUND MODIFYING DEVICE. JACQUES B. STEUR and CHARLES H. BROWN, San Francisco, Calif. Filed Sept. 8, 1932. Serial No. 632,286. 5 Claims. (Cl. 181—30.)

1. A sound modifying and noise minimizing device of the class described comprising a substantially open front enclosure, an interior lining for said enclosure including a plurality of sound deadening walls attached to corresponding walls of the enclosure and spaced therefrom, the top wall of the lining being spaced from the top of the enclosure and formed with a central opening to define a sound trapping chamber, said chamber being provided with air circulation and sound wave relief holes.

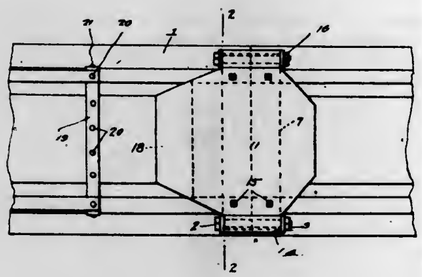
1,903,202. COLLAPSIBLE TIRE FORM. HORACE D. STEVENS, Akron, Ohio, assignor to The Firestone Tire & Rubber Company, Akron, Ohio, a Corporation of Ohio. Filed Mar. 11, 1931. Serial No. 521,644. 14 Claims. (Cl. 154—9.)

1. In a collapsible tire building form, the combination of a pair of key sections and a pair of intermediate sections constituting an annular form, respective racks secured to each of said sections, and pinions engaging said racks, said pinnions being adapted for concurrent rotary movement, and so constructed as successively to move the key sections and the intermediate sections radially inward in a predetermined definite sequence.



3. In a collapsible tire-building form, the combination of a plurality of arcuate form-sections constituting an annular form, means for moving one of said sections radially inward, and means connected to said moving means for moving other of said sections radially inward after said first section has moved inward to a predetermined degree.

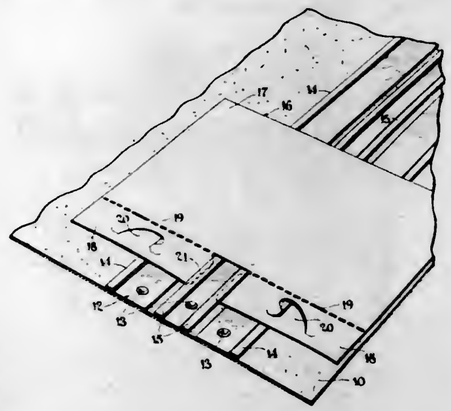
1,903,203. COMBINED PENCIL AND LIGHTER. ARTHUR G. STEVENSON, Rochester, N. Y. Filed Nov. 22, 1929. Serial No. 409,031. 6 Claims. (Cl. 67—7.1.)



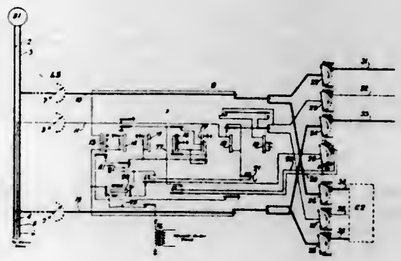
2. In a device of the character described, a container element, a reinforcing cap at one end of the container element, a pair of fasteners disposed at diametrically opposite points relative to the container element and the cap for fastening the cap to the container element, said fasteners having outwardly projecting ends, and a closure cap mounted by means of the projecting ends of said pins for longitudinal and pivotal movements between covering and uncovering positions with respect to the end of the container element.

1,903,204. PHOTOGRAPHING DEVICE FOR HIGH SPEED MOVING PICTURES. TOYOTARO SUHARA, Tokyo, Japan. Filed Feb. 15, 1928, Serial No. 254,532, and in Japan Mar. 8, 1927. 4 Claims. (Cl. 88—16.8.)

2. A high speed moving picture photographing device comprising a revolving mirror composed of successively angled reflecting surfaces of a truncated convex polygonal body, a disc mounted on a revolving shaft which is parallel to the revolving axis of said mirror for attaching the film around its periphery in such a manner that said film is made to cooperate with the successive reflecting surfaces of said mirror, a lens secured to the camera in such relative position that the light projected therethrough onto said mirror focuses on the film, and means for driving said mirror and said film carrying disc in substantially such direction and at the same peripheral speed that there is no relative speed between the film and the images focused thereon.



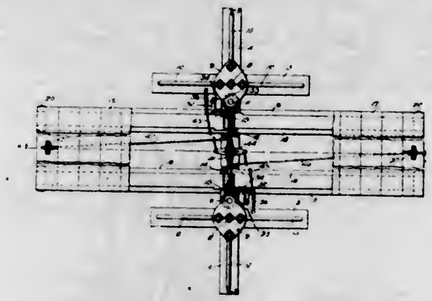
1,903,205. ATTACHMENT FOR PREVENTING BUCKLING OF COAL CONVEYER TROUGHS. JOHN VALKO, Aguilar, Colo. Filed Sept. 24, 1931. Serial No. 564,906. 4 Claims. (Cl. 198—220.)



1. An anti-buckling attachment for a conveyer having trough sections formed with sleeves on the sides thereof at adjacent ends, and bolt and nut means engaging alined sleeves to secure the said ends jointed together; said anti-buckling device comprising a plate adapted to bridge the joint between the ends of the sections and provided at its side edges with channels receiving said sleeves, and rings fixed at the ends of the channels alining with the sleeves and accommodating the bolts.

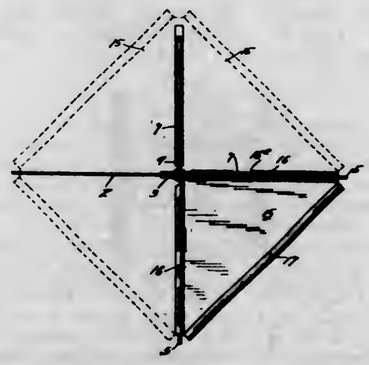
1,903,206. INDEX. FRANK LLOYD WASSELL, Buffalo, N. Y., assignor to Remington Rand Inc., Buffalo, N. Y. Filed Feb. 17, 1931. Serial No. 516,472. 10 Claims. (Cl. 129—16.)

7. In an index or file, the combination of a panel, a support mounted on the panel, an index or reference card having a reference-bearing portion and stub portions hinged to one margin thereof, and a plurality of support-engaging means on each stub portion for detachably engaging the support.



1,903,207. TELEPHONE SYSTEM. JOHN WICKS, Oak Park, RODNEY G. RICHARDSON, Chicago, and JOHN I. BELLAMY, Brookfield, Ill., assignors, by mesne assignments, to Associated Electric Laboratories, Inc., Chicago, Ill., a Corporation of Delaware. Filed Mar. 2, 1931, Serial No. 519,310. Renewed June 10, 1932. 35 Claims. (Cl. 179—18.)

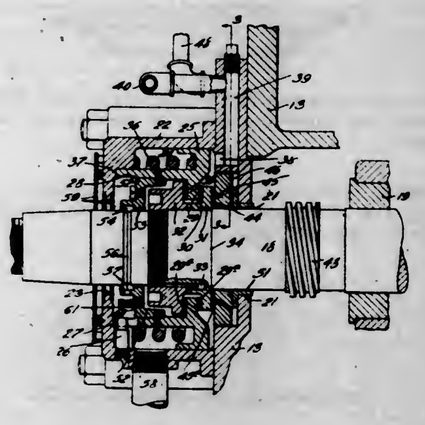
2. In combination, an automatic switch, groups of lines terminating in the bank thereof, said switch being arranged to respond to a series of impulses and being of a fast-operating type so that it will move over a group of lines during an impulse cycle, and means responsive to each impulse of a series and independent of the end of such impulse for driving said switch into association with the next succeeding group of lines.



1,903,208. AUTOMATIC GATE. ARMAND A. WILLIAMS, Ghent, W. Va., assignor of one-fourth to Louis Fink and one-fourth to George K. Sweeney, Ghent, W. Va. Filed Aug. 11, 1932. Serial No. 628,389. 6 Claims. (Cl. 39—55.)

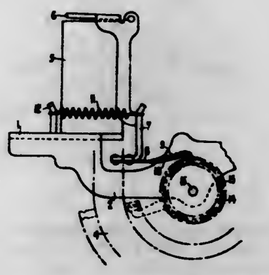
6. In a vehicle actuated gate, vertical posts rotatably mounted in spaced relation to each to define a gateway, gates carried by said posts to extend across and close the gateway, treadles approaching the gateway from opposite directions, said treadles being pivotally mounted at their outer ends and having their inner ends terminating close to each other in the gateway, a horizontal rod extending between said posts and yieldably supported in an elevated position, arms carried by inner ends of said treadles and engaging said rod to depress the rod when either treadle is swung downwardly by a vehicle moving over the same towards the gateway and cause the treadles to move in unison, said posts being each provided with a track

having branches extending spirally about the posts and intersecting at their upper ends, and ends of the rod being engaged in the tracks to rotate the posts and swing said gates into and out of a closed position when the treadles are moved.



1,903,209. COLLAPSIBLE CAMP TABLE AND COVER STRUCTURE. WILLIAM H. BUTLER, Monrovia, Calif. Filed Feb. 15, 1932. Serial No. 592,996. 4 Claims. (Cl. 45—116.)

2. A camp table comprising a collapsible stand including extensible legs and table arms which are pivotally attached to the legs, and means for securing the same in relatively extended and closed positions, and a set of independent table sections applicable to the extended arms and forming a table top thereon.



1,903,210. SEALING AND THRUST BALANCING MEANS. WILLIS H. CARRIER, Essex Fells, N. J., assignor to Carrier Engineering Corporation, Newark, N. J. Filed Feb. 28, 1929. Serial No. 343,398. 4 Claims. (Cl. 286—9.)

1. The combination with a rotary shaft and a casing having a shaft opening through which said shaft extends, of means for sealing said shaft opening comprising a sealing member rotatable with said shaft, a sealing chamber in which said sealing member rotates and at one end of which is an opposing seat for said sealing member, an annular piston movable axially in said sealing chamber and engaging said sealing member, said piston fitting closely in said sealing chamber and having a portion closely surrounding said shaft at the opposite end of said sealing member from said seat, and means for admitting to the sealing chamber liquid under pressure which acts

on said piston to move and hold said sealing member out of contact with said seat and maintains liquid under pressure in said sealing chamber and in the interior of said piston to provide a seal for said shaft opening.

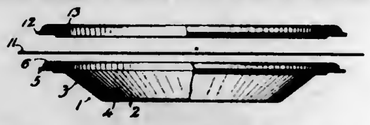
1,903,211. ELECTROMAGNETIC SWITCH. DAVID ADAM CHRISTIAN, London, England, assignor to Siemens Brothers & Company Limited, London, England. Filed Sept. 21, 1931, Serial No. 563,953, and in Great Britain Oct. 8, 1930. 15 Claims. (Cl. 179—18.)

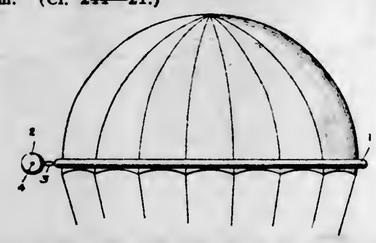
1. In an automatic switch, two sets of wipers, two banks associated with said two sets of wipers, respectively, each bank comprising a plurality of sets of bank contacts, common driving means for said wiper sets, and means controlled by said driving means for moving said wiper sets to connect each set of contacts in one bank to every set of contacts in the other bank.

1,903,212. PIE PACKAGE. GEORGE S. FROST, Baldwin, N. Y., assignor to New York Pie Baking Co., New York, N. Y., a Corporation of New York. Filed Aug. 3, 1931. Serial No. 554,931. 3 Claims. (Cl. 206—44.)

1. A package for a food product comprising a plate having a compartment to receive a food product and having a flange around said plate, said flange having a bead around the same, a sheet of transparent material adapted to cover the top of the food product and extending over

said plate flange, an annular member or flange having a bead adapted to nest with the bead of said plate flange, said annular member being adapted to be secured to said





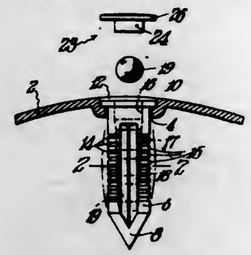


plate flange with the outer portion of said sheet clamped between said flanges, and means for securing said flanges together.

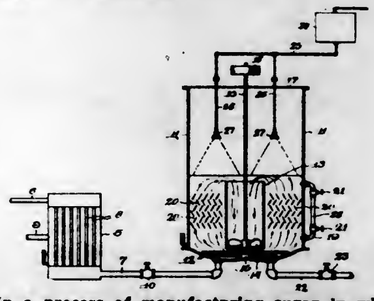
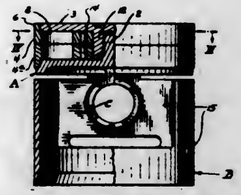
1,903,213. PARACHUTE. WILLIAM J. GLEASON, Houston, Tex. Filed Aug. 14, 1930. Serial No. 475,213. 1 Claim. (Cl. 244—21.)



A new and useful improvement in the pneumatic type of opening device for parachutes, comprising a light metal tank or container for air or gas to be attached directly with a nipple and valve to the rubber tube mounted on the periphery of the canopy of the parachute.

1,903,214. ANCHORING DEVICE. OSCAR F. GORANSSON, Springfield, Mass. Filed Oct. 21, 1930. Serial No. 490,142. 2 Claims. (Cl. 94—1.5.)

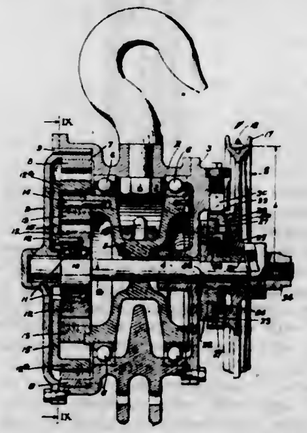


1. The combination of a marking plate for a roadway or the like provided with a central opening therethrough and a recess therearound in the upper face thereof with an anchoring device for securing said plate to a roadway comprising in combination, a bolt having a unitary body portion for extending downwardly through the opening in the plate and adapted to be driven into a roadway, a head on said bolt receivable in said recess, the said bolt being pointed at its lower end and provided with a continuous stepped axial bore extending downwardly from the upper side thereof and terminating adjacent the lower pointed end, the said bore having alternate connected straight and tapering portions and the said straight portions decreasing successively in diameter downwardly from the upper end of the bore, the said body portion having longitudinally spaced corrugations on its outer side and being provided with spaced longitudinal slots in its sides opening into said bore and terminating at a distance from the lower and upper ends thereof, a wedge member having a curved surface and adapted to slip through the uppermost straight portion of the bore and being of greater size than successive portions of the bore so that it may be driven downwardly in said bore into a certain straight portion thereof to expand the sides of the body between its opposite ends, whereby the body is bulged between its ends to cause the said certain straight portion of the bore to contract above said wedge member and lock the same in said certain straight portion.

1,903,215. METHOD FOR THE PURIFICATION OF SOLUTIONS. WALTON C. GRAHAM, Denver, Colo., assignor to Gilchrist & Company, a Corporation of Delaware. Filed Feb. 13, 1925. Serial No. 9,030. 13 Claims. (Cl. 127—48.)

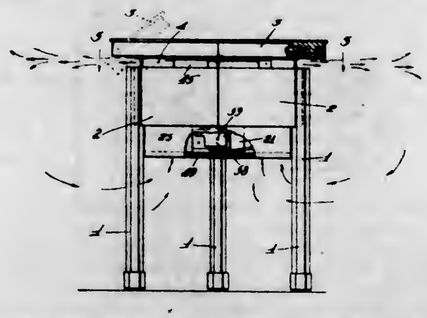
9. In a process of manufacturing sugar in which the sugar bearing juice is treated to precipitate impurities, the step which comprises agitation of the treated juice for a period sufficient to obtain substantially complete flocculation and at a rate adequate to maintain a substantially uniform suspension of all flocs but insufficient to prevent the formation and maintenance of flocs of substantially maximum size.

1,903,216. PISTON. WILLIAM R. HEWITT, New York, N. Y. Filed Jan. 12, 1931. Serial No. 508,017. 3 Claims. (Cl. 74—108.)



1. In a piston of the character described a ring comprising a disc-shaped member having a central opening formed therein, an annular flange formed on the peripheral edge of the disc, said disc having openings formed therein between the central opening and the flange, said flange and disc being split radially to permit expansion and contraction of the ring, and a combination supporting and expanding member insertable in the central opening.

1,903,217. BALL BEARING. GEORGE O. HODGE, Plainville, Conn., assignor to Standard Steel and Bearings Incorporated, Plainville, Conn., a Corporation of Delaware. Filed Oct. 10, 1929. Serial No. 398,762. 2 Claims. (Cl. 308—187.)

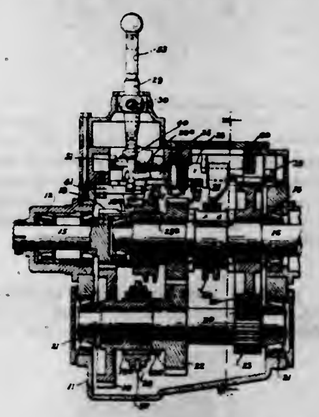


1. In a ball bearing, inner and outer rings with balls therebetween, a lubricant retainer of sheet metal of annular form supported by its periphery from said outer ring and projected inwardly towards the axis so as to overhang the inner ring, the overhanging portion of said retainer being constructed and arranged to prevent escape of lubricant from the bearing under operating conditions, said retainer being provided with a perforation of such small diameter to permit of being plugged by lubricating material under such operating conditions and being sufficiently large to permit of passage of lubricant for charging the bearing under pressure conditions and the border walls of said perforation being pressed outwardly in conical form so as to facilitate cooperation with a lubricant charging device and to reinforce said border walls.

1,903,218. CHAIN BLOCK. ELIAS KNIGHT, San Francisco, Calif. Filed Aug. 31, 1931. Serial No. 560,387. 4 Claims. (Cl. 192—15.)

1. In a chain block of the character described, a drive shaft, a friction clutch keyed to the shaft, spring means normally maintaining contact between the friction faces of said clutch, a pull chain sprocket rotatable with relation to the clutch and the shaft, and means whereby rotation of the sprocket in one direction is transmitted through the clutch to form a driving connection between the sprocket and the drive shaft and rotation of the sprocket in the opposite direction causes slipping of the friction clutch.

1,903,219. ELECTRIC HEATER. HUGH G. LANDIS, Los Angeles, Calif. Filed Aug. 17, 1928, Serial No. 300,334. Renewed Aug. 2, 1932. 23 Claims. (Cl. 219—39.)

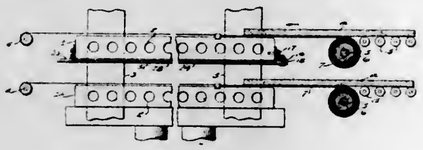


1. An electric heater comprising a central air passage, a fan mounted to rotate horizontally above said passage and constructed to discharge air laterally, horizontal guiding means for discharging air, and a humidifier surrounding said passage and having an exposed evaporating surface forming part of said guiding means and being in contact with the air discharged by the fan.

1,903,220. FLANGE PROTECTOR. LOUIS J. LEMERT, Beverly, N. J., assignor to United States Pipe & Foundry Company, Burlington, N. J., a Corporation of New Jersey. Filed Nov. 25, 1931. Serial No. 577,217. 2 Claims. (Cl. 137—91.)

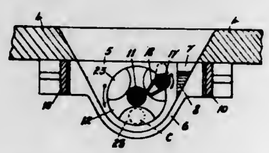
1. A flange protector for conduits consisting of a flat plate adapted to extend over the face of the flange, having bendable lugs extending from the outer edge of the flat plate and adapted to extend over the edge of the flange and be bent under the inner face thereof and a separable cylindrical ring adapted to surround and protect the edge of the flange and to be held in place by the bendable lugs.

1,903,221. AUTOMOTIVE TRANSMISSION. PHILIP MACKENZIE, Oakland, Calif., assignor of one-fourth to Robert Mann, Oakland, Calif., and one-fourth to Joseph Mann, Berkeley, Calif. Filed Aug. 6, 1929. Serial No. 383,934. 7 Claims. (Cl. 74—59.)



1. A transmission including a casing, a drive shaft projecting into the casing, a driven shaft journalled in the casing in alignment with the drive shaft, a countershaft in the casing arranged parallel to the drive and driven shafts, a drive gear fixed on the drive shaft, a first gear rotatable on the countershaft and in constant mesh with the drive gear, a compound gear and a driven gear rotatably mounted on the driven shaft, a second gear and a third gear fixed on the countershaft in constant mesh with the compound gear and the driven gear, a clutch on the driven shaft operatively associated with the compound gear and with the driven gear, a clutch associated with the countershaft and the first countershaft gear, a shift lever operatively connected with said clutches whereby a transverse shift of said lever in one direction from neutral position will clutch the compound gear to the driven shaft, and a transverse shift in the other

CARNEGIE LIBRARY OF ATLANTA

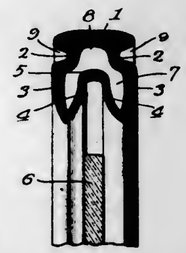


direction from neutral position will clutch the driven gear to the driven shaft, and a longitudinal shift after the lever has assumed one transverse position will engage the clutch associated with the countershaft gear.

1,903,222. PRESS. WILLIAM H. MASON, Laurel, Miss., assignor to Masonite Corporation, Laurel, Miss., a Corporation of Delaware. Filed Apr. 24, 1929. Serial No. 357,737. 10 Claims. (Cl. 34—16.)

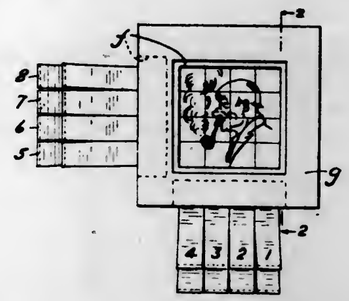
1. In a press, a wire mesh screen for supporting material to be pressed, and means for drawing said support into said press comprising a transverse bar, a flexible tension member applied to either end thereof, and means for moving said tension members.

1,903,223. MEANS FOR CIRCULATING GLASS IN GATHERING BASINS. ALEXANDER FRANCIS MCNISH, Perth, Scotland, assignor of one-half to John Moncrieff Limited, Perth, Scotland. Filed Sept. 3, 1931, Serial No. 560,980, and in Great Britain Sept. 19, 1930. 19 Claims. (Cl. 49—56.)



6. The combination with a glass furnace, of a gathering basin open to the furnace, a series of conveying means having a scoop-like effect open laterally for the reception of the glass, means for successively moving said conveying means stepwise all around in the gathering basin in an orbital path and a wiping device for wiping the glass out of the conveying means after they have left the gathering position.

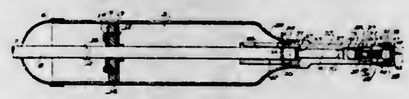
1,903,224. SPRING AND MATTRESS CONSTRUCTION. ERNEST A. OEHRL, Grand Rapids, Mich. Filed Apr. 28, 1930. Serial No. 447,845. 1 Claim. (Cl. 5—75.)



In a construction having a frame and a head rest pivoted thereto the combination of means for supporting the head rest at different positions comprising, a depending bar pivotally connected to the underside of the head rest and having a pin through its lower end, a stirrup secured to and extending inwardly from the adjacent end of the frame between the sides of which the bar passes, and a retaining plate pivotally mounted on said stirrup having an opening through which the bar snugly passes, said stirrup and retaining plate being provided with cooperating wedging surfaces, said pin abutting against the retaining plate when the head rest is elevated to a predetermined position whereby the said wedging surfaces come into engagement and thus hold the said plate in its upper position.

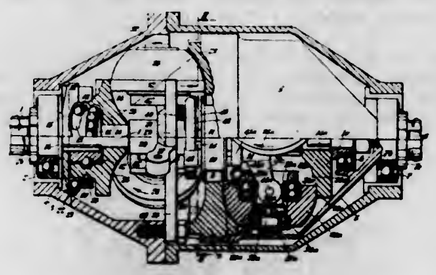
1,903,225. RUBBER WEATHER-STRIP. FREDERICK C. PALENSKE, St. Joseph, Mich., assignor to Industrial Rubber Goods Company, St. Joseph, Mich., a Corporation of Michigan. Filed Aug. 11, 1931. Serial No. 556,345. 7 Claims. (Cl. 296—44.5.)

1. A hollow rubber weather strip for the edge of a glass window or other movable member, having its longitudinal interior air space normally closed at all points in the length thereof, comprising, in the normal condition or shape thereof, when viewed in cross-section, an integral base portion for attaching the strip in stationary position to a suitable support, outer side walls integrally connected with said base, free to bend toward and away from each other, and inner side walls normally spaced from and integral with the outer edges of said outer side walls, forming an outwardly flaring channel between them, said inner side walls being normally spaced a distance from said base, and adapted to engage the inner and outer surfaces of the window or other member, thereby in effect forming flexible hollow side portions with their interiors normally intercommunicating and with a channel between them to receive the edge portion of said member, each double wall side portion thus provided remaining hollow with an air space therein while said member is between them, as well as when said member is withdrawn, but with the interior of one side portion cut off from communication with the interior of the other side portion when said member is between them.



1,903,226. MULTIPLE PICTURE AMUSEMENT DEVICE. HARRY LAWSON PERRY, Jamaica, N. Y. Filed Aug. 8, 1930. Serial No. 473,840. 2 Claims. (Cl. 46—37.)

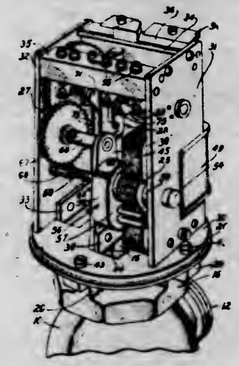
1. An amusement device comprising two series of independent strips, the strips of each series being in parallel relation, the strips of one series extending at an angle to



the strips of the other series and being interwoven therewith by extending alternately thereover and thereunder, each strip being provided with areas containing picture units adapted, when grouped with other picture units of other strips of the same series and with picture units of strips of the other series, to form different complete pictures, said strips being longitudinally movable independently of each other to visually expose different combinations of picture units.

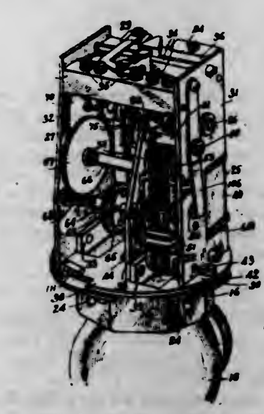
1,903,227. GREASE GUN. JOHN LINCOLN SNODGRASS, Chicago, Ill., assignor to Alemite Corporation, Chicago, Ill., a Corporation of Delaware. Filed Sept. 2, 1925. Serial No. 53,982. 25 Claims. (Cl. 221—47.4.)

1. In a lubricating device, in combination, a chamber for containing a lubricant, a cylinder communicating with said chamber having two portions of different diameters, and an outlet from one of said portions, and flexibly connected pistons operable in said cylinder portions.



1,903,228. FRICTIONAL GEARING. BERNARD THOMSON, Woldingham, England, assignor to General Motors Corporation, Detroit, Mich., a Corporation of Delaware. Filed Oct. 1, 1928, Serial No. 309,650, and in Great Britain Oct. 21, 1927. 27 Claims. (Cl. 74—26.)

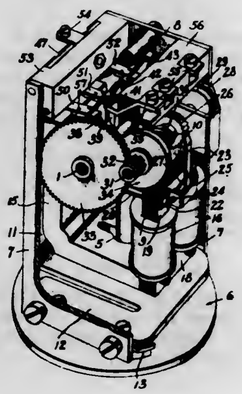
1. In friction gearing, a shaft, disk-like members coaxially arranged in relation to said shaft and acting as driving and driven members, one of said members being connected to said shaft to rotate therewith and another being rotatable relatively thereto, intermediate roller members between said disk-like members, a spider, the arms of which space said roller members, said spider having a hub concentric with said shaft and relatively rotatable disk-like member, a control sleeve concentric with said shaft and passing thru said relatively rotatable disk-like member, means coacting with said sleeve for positioning said intermediate roller members to vary the gear ratio, and means for moving said sleeve in order to effect a ratio change.



1,903,229. ELECTRIC VALVE OPERATOR. HOWARD D. COLMAN and DUNCAN J. STEWART, Rockford, Ill.; said Stewart assignor to said Colman. Filed Jan. 2, 1930. Serial No. 417,989. 26 Claims. (Cl. 137—139.)

1. An electrically driven operator for radiator control valves and the like comprising, in combination with a valve casing having a valve member movable axially toward and from a seat in the casing, a rotatably mounted shaft disposed transversely of and substantially intersecting the axis of the valve member, an electric motor having a torque-multiplying driving connection with said shaft, an actuating device comprising a reciprocatory member and an actuating element fast on the shaft and operable upon said member in the operation of the motor in one direction to impart positive movements of fixed length to said member in opposite directions, a yieldable lost-motion connection between said reciprocatory member and said valve member through which the valve member is opened and closed in the reciprocation of said mem-

ber, and a controlling switch mechanism for the motor actuated in the rotation of said shaft to define successive valve opening and closing cycles, said lost-motion connection including a spring, and said actuating device being operable during the valve closing cycle first to move the valve member into engagement with its seat and then in the continued movement of said reciprocatory member to tension said spring, and said device being further operable through said spring upon the termination of the closing cycle to hold the valve member to its seat with a predetermined pressure.



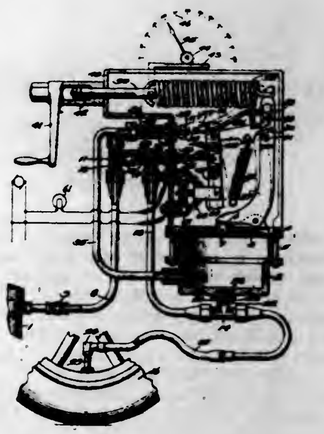
1,903,230. ELECTRIC VALVE OPERATOR. DUNCAN J. STEWART, Rockford, Ill., assignor to Howard D. Colman, Rockford, Ill. Filed July 18, 1929. Serial No. 378,118. 10 Claims. (Cl. 137—139.)

1. An electric valve operator comprising, in combination with a valve having a reciprocable operating stem projecting axially from the casing, a main frame comprising a base plate adapted to be secured to said casing and having a central aperture through which said valve operating

stem projects, said frame further comprising a pair of laterally spaced substantially parallel side plates secured at their lower ends to said base plate, a main operating shaft having its opposite ends mounted in said plates in parallel relation to the base plate but spaced a substantial distance therefrom, a reciprocable actuator connected to and axially alined with said valve stem, said actuator having an operative connection with said main operating shaft so as to be reciprocable in the rotation of said shaft, an electric motor comprising a stator in the form of a substantially flat open frame with a rotor mounted transversely of one side member of the frame and an energizing coil mounted on an opposite side member, said motor being disposed within said main frame between said actuator and one of said side plates, a multiplying gear connection between the rotor and said operating shaft, and a controlling switch mechanism supported between the upper ends of the side plates and above the motor, said operating shaft having means for actuating said switch mechanism.

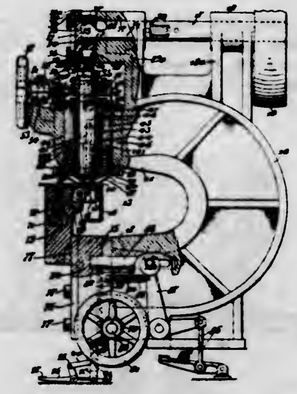
1,903,231. ELECTRIC CONTROL UNIT. HOWARD D. COLMAN and DUNCAN J. STEWART, Rockford, Ill.; said Stewart assignor to said Colman. Filed Feb. 15, 1929, Serial No. 340,217. Renewed May 2, 1932. 9 Claims. (Cl. 172—126.)

3. An electrically driven control device comprising a frame, a shaft journaled in said frame, a member yieldably mounted in the frame, an electromagnet carried by said member, an armature for said magnet also mounted on said member for vibratory movements relative to the magnet, a rotary element operatively connected with said shaft and journaled in said member, and means operable in the vibratory movements of the armature to impart rotational movement to said element.



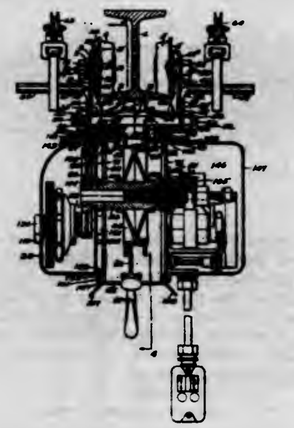
1,903,232. DEEP WELL DRILL. RUSSELL GIESEY, Oklahoma City, Okla., assignor to Reed Roller Bit Company, Houston, Tex., a Corporation of Texas. Filed Oct. 10, 1932. Serial No. 637,018. 7 Claims. (Cl. 255—72.)

1. A drill having a stem; a bit to which fluid may be pumped through said stem; a core barrel in said stem and having an open flared upper end communicating with the interior of said stem; a valve guiding member in said stem above said core barrel; a float valve having a stem movable in said member; a spring surrounding said valve stem and serving to yieldably hold said float valve closed; a relief valve releasably secured to said float valve; a relief valve releasing pin movable in said valve stem; a spring surrounding said pin and serving to yieldably hold said pin in its inactive position; and a pin actuator



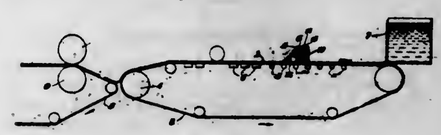
movable downwardly in said stem to move said pin into its active position to permit movement of said relief valve into said opening.

1,903,233. APPARATUS FOR SUPPLYING AIR UNDER PRESSURE. GEORGE W. GILLE, Bryan, Ohio, assignor to Service Station Equipment Company, Bryan, Ohio, a Corporation of Delaware. Filed Feb. 16, 1928. Serial No. 254,803. 1 Claim. (Cl. 50—5.)



In apparatus for supplying air under pressure to a receiver, a source of air under comparatively high pressure, a conduit leading from said source and adapted to be connected with a receiver, a main valve between said source and said conduit, an expansible chamber connected to said passage by a restricted opening, means actuated by the expansion and contraction of said chamber to close and open said main valve, a relief valve for said chamber and means for opening the relief valve when the chamber contracts to a predetermined volume and for closing said relief valve upon the completeion of the contraction of said chamber.

1,903,234. CUTTING MACHINE. CHARLES B. GRAY, Millbourne, Pa. Filed Sept. 30, 1930. Serial No. 485,448. 14 Claims. (Cl. 164—47.)

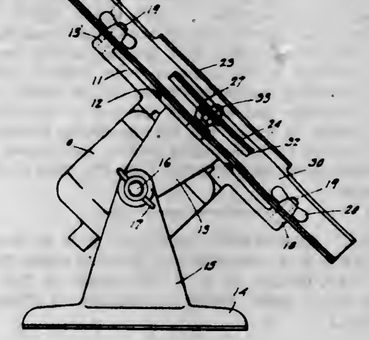


1. In a cutting or slotting machine of the punch type, a frame having upper and lower arms, a vertical bearing carried by the upper arm, a head fitting the bearing and provided with a ram bore, a ram fitting the bore, a tool carried by the ram, a die cooperating with the tool and carried by the lower arm, an arm, means for clamping the arm to the ram above the head in any desired angular position, an upwardly-extending head projection, means providing a spline-like connection between the arm and the projection, and means for rotarily adjusting the head.

1,903,235. HOISTING APPARATUS. WILLARD A. HUMMEL, Philadelphia, Pa., assignor to American Engineering Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed May 18, 1929. Serial No. 364,239. 6 Claims. (Cl. 212—124.)

1. In a hoist, a motor housing, a supporting member therefor having an aperture affording one end of said motor housing a seat, a second supporting member provided with an aperture through which said motor housing extends, and means for securing said motor housing in position on said supporting members.

1,903,236. PAPER MANUFACTURE. BJARNE JOHNSEN, Erie, Pa., assignor to Hammermill Paper Company, Erie, Pa., a Corporation of Pennsylvania. Filed Sept. 18, 1930. Serial No. 482,687. 6 Claims. (Cl. 92—40.)

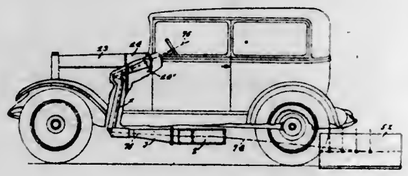


1. That improvement in the art of paper manufacture which comprises adding sizing material to paper stock during the travel of the latter on a Fourdrinier wire.

1,903,237. METHOD OF PRODUCING A CARBONIZED FUEL BRIQUETTE. LEMUEL M. JOHNSTON, Parco, Wyo. Filed Feb. 27, 1926. Serial No. 91,268. 2 Claims. (Cl. 202—15.)

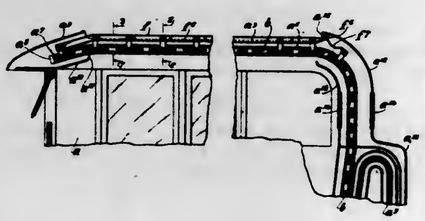
1. The method of producing a hard fuel briquette, which includes mixing pulverized petroleum coke containing heavy mineral oil with water to form a thick paste, pressing the paste into coherent briquettes, destructively distilling the briquettes in the presence of steam to drive off volatiles and carbonise heavy mineral oils in the coke and form dense, hard briquettes.

1,903,238. ROLL AND BUN SPLITTER. SVEN P. LARSON, Berkeley, Calif. Filed July 29, 1932. Serial No. 625,826. 2 Claims. (Cl. 146—73.)



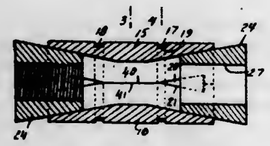
1. A roll splitter comprising a base, a bracket hingedly supported by said base for varying the angular relation therebetween, a motor having a shaft and mounted on, and depending from said bracket, a rotary knife adjustably secured on said shaft, a chute having sides and mounted on said bracket in a plane parallel to said knife, means for adjusting the width of the chute.

1,903,239. REAR AND PARKING VIEW ATTACHMENT. PAUL W. LEEFLAND, Arlington, Tex. Filed July 9, 1929. Serial No. 376,979. 10 Claims. (Cl. 88—1.)



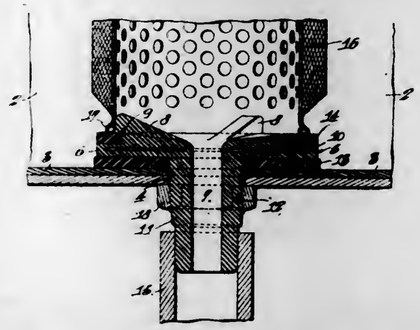
4. A rear view attachment for an automobile machine comprising a series of casing sections connected together and disposed at angles with relation to each other, the initial casing sections extending forwardly from the instrument board of the automobile machine and the ter-

minal casing section being located under the body of the machine and disposed rearwardly, mirrors located in the casing sections and disposed across the apices of



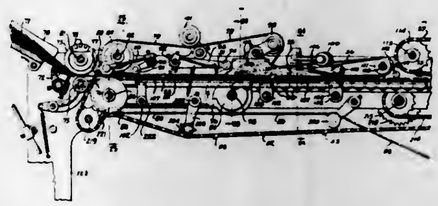
the angles, a mirror pivotally mounted in the terminal casing section and manually operable means for turning the last mentioned mirror upon the pivot.

1,903,240. CONVERTIBLE VEHICLE TOP. HEINRICH MAYER, Arbon, Switzerland, assignor to Société Anonyme Adolphe Saurer, Arbon, Switzerland, a Corporation of Switzerland. Filed Dec. 4, 1930, Serial No. 499,896, and in Germany June 17, 1930. 6 Claims. (Cl. 296—105.)



1. In combination with a motor vehicle body having fore and aft top supporting members, a flexible top, guide means for the top at each side of the body, a plurality of guide engaging means movable in each guide, bowed spacing means mounted between the opposed guide engaging means in the respective guides, said spacing means having recessed portions in the opposite ends thereof, tensioning strips extending outwardly from the recessed portions, means to secure the sides of the top to the tensioning strips, means to mount the spacing means movably with respect to the guide engaging means, and means to urge the tensioning strips outwardly from the sides of the spacing means.

1,903,241. EXPANSION SHIELD. ROY E. MCINTOSH, New York, N. Y., assignor to J. Edward Ogden Company, Inc., East Orange, N. J., a Corporation of New Jersey. Filed Oct. 7, 1930. Serial No. 486,920. 7 Claims. (Cl. 85—2.8.)

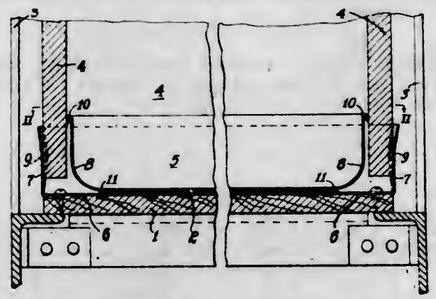


6. An expansion shield comprising a pair of sections and a pair of expanding elements longitudinally movable therein, each of said elements being less than half the length of said sections and having an outer surface with opposite portions tapered in one plane and other opposite portions parallel to each other, said sections having inner surfaces, less than half the length of said sections and corresponding in shape and taper to the outer surfaces of the respective expanding elements, and fully contacting therewith in all positions of engagement of the expanding elements with said shield, each of said sections being substantially crescent shaped in transverse sections through the tapered portions thereof.

1,903,242. SEALING MEANS. OSCAR O. OPPENLAENDER, Elizabethton, and RALPH H. CARTER, Johnson City, Tenn., assignors to American Glanzstoff Corporation, New York, N. Y., a Corporation of Delaware. Filed Aug. 20, 1931. Serial No. 558,310. 2 Claims. (Cl. 8—19.)

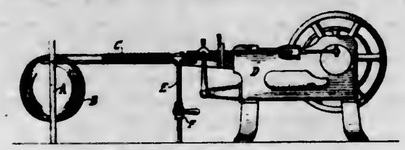
1. A sealing means for use in the liquid treatment of a tier of spools, including a circular base member upon which the bottom spool of the tier rests, a centrally formed bore in said base, a plurality of spaced upstanding spool centering lugs extending from the bore toward the periphery of the base member; the said lugs and the surfaces of the base member therebetween sloping downwardly from the periphery to the bore.

1,903,243. MACHINE FOR MAKING COLLAPSED CARTONS. FRANK GUY PECK, New Haven, Conn., assignor, by mesne assignments, to The Guardian Trust Company, Cleveland, Ohio, a Corporation of Ohio, trustee. Filed Mar. 23, 1931. Serial No. 524,427. 8 Claims. (Cl. 93—49.)



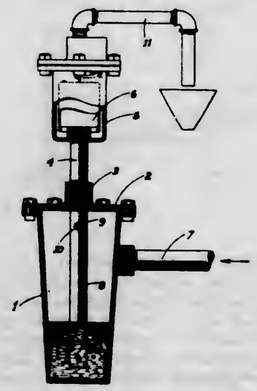
1. In a paper products machine, means to feed a blank through the machine, a pair of side cams for initially deflecting selected side portions of the blank out of the line of travel of the blank, stationary inclined guide rods for further deflecting said side portions as the feeding progresses, a pair of folding belts, one on each side moving with said feeding means to turn said side portions against the body of the blank.

1,903,244. METALLIC BASEBOARD ELEMENT. HENRY M. REED, Jr., Louisville, Ky., assignor to Standard Sanitary Manufacturing Company, a Corporation of New Jersey. Filed Aug. 1, 1931. Serial No. 554,590. 4 Claims. (Cl. 189—85.)



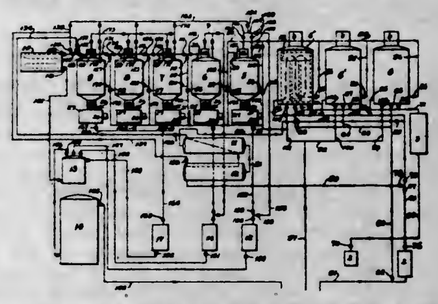
1. A metallic mold board for sheet metal wall construction having a base, a longitudinally extending upstanding member along one edge of said base and having an

inwardly projecting shoulder intermediate of its height, and a longitudinally extending upstanding member along the opposite edge of said base and being gradually curved



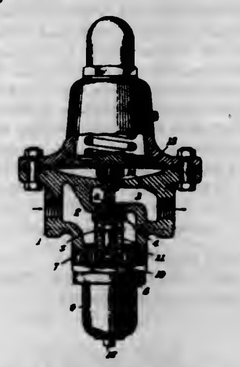
inwardly from said base to the top thereof, said members being spaced apart to form a panel-receiving recess therebetween.

1,903,245. MANUFACTURE OF BLANKS AND SIMILAR ARTICLES WITH JUMPED HEADS. MAX OTTO RUSKA, Voerde, near Hagen, Germany. Filed Apr. 29, 1930, Serial No. 448,273, and in Germany May 1, 1929. 1 Claim. (Cl. 10—27.)



In a process of making screw blanks and similar articles, the steps of continuously heating a portion of a wire made of a non-rusting acid-proof and seawater-proof metal alloy which is unworkable in a cold state of the type comprising Delta metal and Selva metal to a temperature ranging between 250° C. and 350° C., operating on the end of the heated portion in a one blow press and then cutting off a piece of the heater portion, the cut off piece being cooled after the last-mentioned step.

1,903,246. STEAM CONDENSING WELL. LOUIS E. SANDERS, Sacramento, Calif. Filed Apr. 5, 1932. Serial No. 603,260. 2 Claims. (Cl. 137—103.)



1. In combination with a steam trap having a steam inlet, a well below the trap, said well being closed on top, a conduit extending upwardly from inside the well and through the top thereof to a connection with the steam inlet of the trap, said conduit being open at the bottom and terminating a short distance from the bottom of the well, and a steam inlet passage to the well toward the top; the conduit having a steam bleed opening therein within the well but above the plane of the steam inlet.

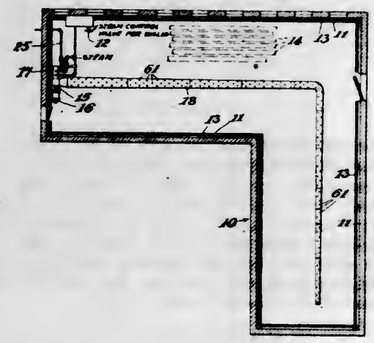
1,903,247. METHOD FOR THERMAL DECOMPOSITION OF NATURAL GAS. CHARLES EDWARD STARR, Omaha, Nebr. Filed Sept. 2, 1930. Serial No. 479,293. 12 Claims. (Cl. 134—60.)

1. The method of cracking natural gas which method comprises pre-heating natural gas; then subjecting such pre-heated natural gas to a cracking temperature to crack the same; then passing such cracked stock through a series of chambers each having a temperature lower than the cracking temperature; then shocking such cracked stock in each chamber, the shocking medium in some of the chambers being cool hydrogen gas; and then removing carbon black from such shocked stock.

1,903,248. VALVE. PAULSEN SPENCE, Orange, N. J. Filed Mar. 12, 1929. Serial No. 346,347. 4 Claims. (Cl. 50—23.)

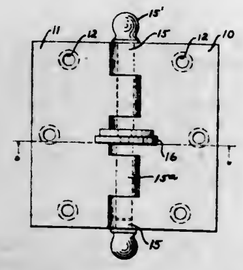
1. In a valve, a valve seat member, a valve member cooperating therewith, said valve member having a passageway therethrough, a removable member secured to said valve and having a restricted passageway in communication with said first mentioned passageway, whereby when said valve is off its seat pressure fluid may pass between said valve and seat and be throttled through said restricted passageway in said removable member.

1,903,249. HAIR CLAMP FOR PERMANENT HAIR WAVING. KARL GEORG STRÖHER, Rothenkirchen, Germany. Filed Aug. 27, 1930. Serial No. 478,188. 3 Claims. (Cl. 132—36.1.)



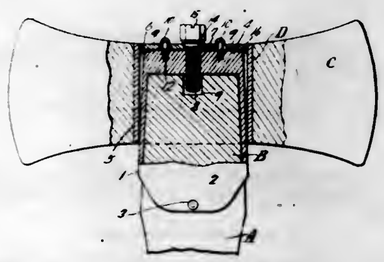
1. A hair clamp for permanent hair waving, comprising a pair of hingedly connected arms, a pair of insulating

jackets enclosing said arms, means connected with said arms for closing the clamp, parts of the exterior surfaces of said jackets being adapted to come in contact with each



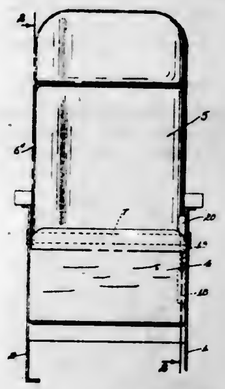
other when the clamp is closed, and grooves formed on other parts of the exterior surfaces of said jackets to provide for a circulation of air.

1,903,250. AIR CONDITIONING APPARATUS. DWIGHT TENNEY, Montclair, N. J. Filed Nov. 11, 1930. Serial No. 494,841. 6 Claims. (Cl. 257—8.)



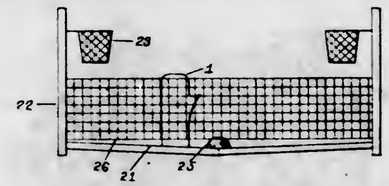
1. Apparatus for maintaining the air of a chamber at a predetermined temperature which comprises heat-delivery means located along the walls of the chamber, said heat-delivery means being of sufficient capacity to supply a major portion of the required heat, insulating shields disposed on the chamber side of the heat-delivery means, an air conditioning duct through which air from the chamber is circulated, auxiliary heating means for supplying the remainder of the required heat to the air passing through the conditioning duct, and a thermostat disposed to automatically control the auxiliary heating means according to the temperature of the main body of air of the chamber.

1,903,251. HINGE CONSTRUCTION. HARRY E. AHRENS, Pasadena, Calif. Filed Nov. 23, 1931. Serial No. 576,763. 5 Claims. (Cl. 16—191.)



1. In a hinge construction, a pair of plates having interfitting knuckles, a pintle pin passing through said knuckles, a locking member having means to prevent rotation between said locking member and said one hinge plate and a stop member including a shoulder adapted to engage the other plate and means to restrain said stop member to move with said locking member, said means being removable.

1,903,252. TOOL. CHARLES WILLMAN, Retsil, Wash. Filed Dec. 7, 1931. Serial No. 579,370. 4 Claims. (Cl. 306—30.)



1. In a device of the kind described, in combination with a handle and a tool having a straight socket, a tapered cap secured to the end of the handle and adapted to enter the said socket in the tool, and means on the end of the cap for engaging the said socket to hold the tool on the handle, the said means comprising dogs slidably mounted on the cap, and a screw threaded in the cap and adapted to force the dogs outward against the inner side of the said socket in the tool.

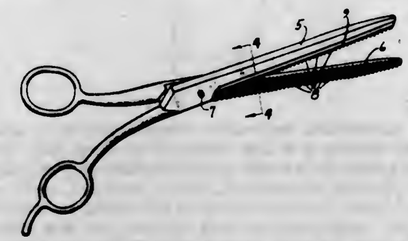
1,903,253. CHAIR. DWIGHT E. AUSTIN, PERCY R. BISSELL, and EDWARD W. CRUTCHFIELD, Los Angeles, Calif. Filed Aug. 4, 1930. Serial No. 472,796. 12 Claims. (Cl. 155—161.)

1. In a chair of the class described, a supporting means, a seat in connection therewith, a back pivotally supported from said supporting means with its lower portion adjacent to the back of the seat, a friction rod connected to the lower portion of the back and extending forwardly, a locking lever pivotally mounted on the supporting means, and a pair of opposed friction jaws pivotally mounted relative to each other on the lever and receiving therebetween one end of the friction rod, the shifting of the lever causing angular shifting of the jaws relative to the lever and causing variation of the space between the jaws.

1,903,254. BASKET BALL GAME. ALOIS STANLEY BISHOP, Kohler, Wis. Filed Oct. 16, 1930. Serial No. 489,130. 7 Claims. (Cl. 273—85.)

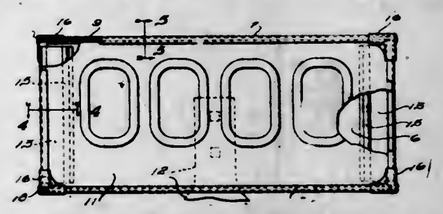
6. In a game apparatus, the combination of a playing floor, a plurality of playing positions defined on said playing floor and a projector independent of said playing floor and adapted to be positioned at any of the aforesaid playing positions.

1,903,255. ANTIKNOCK FUEL. FRANK E. L. BUSCH, Erie, Pa. Filed July 15, 1929. Serial No. 378,582. 1 Claim. (Cl. 44—19.)



As an anti-knock fuel suitable for use in internal combustion engines, a mixture of gasoline and para-cymene, the latter substance being present in a proportion of more than 2% by volume of the total mixture.

1,903,256. ARTIFICIAL BAIT. JULES W. CATARAU, Seattle, Wash. Filed Oct. 23, 1931. Serial No. 570,571. 4 Claims. (Cl. 43—41.)

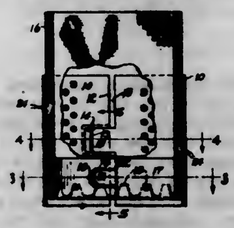


1. A body member for an artificial bait, said body member including a container for scent material, said container being positioned intermediate the ends of body member, and having upper and lower walls each of which is curved outwardly from the longitudinal axis of the container and has slits, one of said slits being of greater width than the others to permit the scent material to be inserted into the container.

1,903,257. SHEARS. CHARLES DAHL, Fernwood, Idaho. Filed Feb. 23, 1932. Serial No. 594,429. 1 Claim. (Cl. 30—13.)

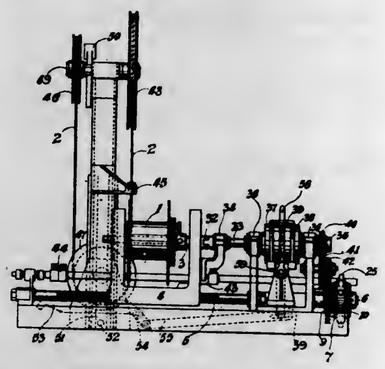
A pair of shears having two pivotally connected blades, teeth extending transversely of the inner faces of both blades, said teeth arcuately disposed concentric with the pivotal connection of the blades, the inner ends of the teeth projecting beyond the inner edges of the blades, small grooves extending longitudinally of the blades across the outer projecting edges of the teeth, and the teeth on one blade arranged to mesh with the teeth on the other blade when the blades are closed.

1,903,258. AUTOMOBILE LICENSE PLATE HOLDER. CLARENCE R. DAVIS, Detroit, Mich., assignor to Davis Tool & Engineering Company, Detroit, Mich., a Corporation of Michigan. Filed Jan. 12, 1932. Serial No. 586,186. 10 Claims. (Cl. 40—125.)



1. An automobile license plate holder including a back plate having longitudinal flanged edge portions, a plurality of independent end members each having a flanged edge portion, said flanged portion corresponding in size and shape to the flanged portion of said longitudinal flanged edges of said back plate, a plurality of corner members adapted to telescope over the flanged portions of the edges of said back portion and the flanged portion of said end members, and means concealed within said longitudinal flanged edges and extending through said corner members for securing the said end members in place, and means secured to said back plate for securing said holder to an automobile.

1,903,259. SHOULDER STRAP RETAINER. JENNIE FRIEDMAN, New York, N. Y. Filed Apr. 8, 1932. Serial No. 604,070. 1 Claim. (Cl. 24—78.)

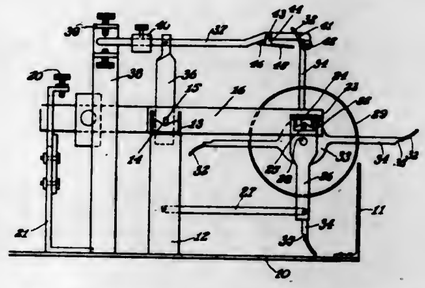


A shoulder strap retainer of the class described comprising a safety pin adapted for connection with an outer garment, the stationary bar of said pin having a substantially U-shaped portion intermediate its ends, the bight of which is of considerable length, a small link of substantially ring shape slidably arranged on said stationary bar and engaging the bight portion of the U-shaped part, a snap fastener part formed with a marginal flange having an opening therein through which the said link passes, a shoulder strap receiving loop and a second snap fastener part permanently fastened to a portion of the loop and adapted to engage the first part to connect the loop to the pin.

1,903,260. WICK CARRYING MEANS. NATHAN F. FRETTER, Cleveland Heights, Ohio. Filed Aug. 18, 1930. Serial No. 475,932. 10 Claims. (Cl. 67—69.)

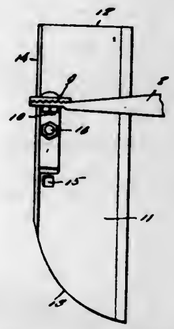
2. In combination, a perforated cylindrical sleeve, a wick carrier comprising a split resilient ring adapted to have a wick attached thereto, and projections on said carrier adapted to engage the perforations of said sleeve and thereby hold the carrier and wick in position within the sleeve.

1,903,261. BOBBIN OR SPOOL WINDING MACHINE. THOMAS CHARLES HUGHES, Newcastle-upon-Tyne, England, assignor to Larmuth & Bulmer Limited, Manchester, England. Filed Aug. 29, 1931, Serial No. 560,110, and in Great Britain Sept. 27, 1930. 1 Claim. (Cl. 242—43.)



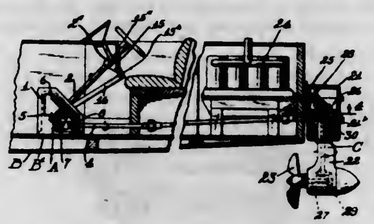
In a winding machine, a direction reversing mechanism for laying windings side by side in superposed layers, comprising in combination, a reversing shaft a bevel wheel secured to the said shaft to rotate therewith, a bevel wheel mounted loose on the said shaft, a driven gear wheel provided on the second named bevel wheel for driving the same direct, a carrier disc mounted loose on the said shaft between the said bevel wheels, a bevel pinion rotatably mounted on the disc and in constant mesh with both of the said bevel wheels, a ring mounted on the periphery of the carrier disc and circularly displaceable thereon, a tooth fixed to the ring for engaging and locking the bevel pinion against rotation, spring means on the ring for yieldingly holding the tooth in locking engagement with the bevel pinion, external stops on the ring, and a displaceable abutment on the mechanism for cooperation with the said stops in positively locking the ring against rotary movement and thereby disengaging the said tooth against the action of the spring means.

1,903,262. TABLE OR SHELF FOR A STOVE. BILTON B. GOINGS, Export, Pa. Filed Sept. 20, 1932. Serial No. 634,069. 1 Claim. (Cl. 126—332.)



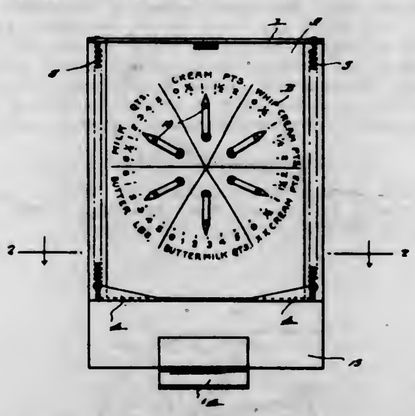
An attachment for a stove comprising a table, hook members connected to one side of the table and having their hook portions engaging parts of the stove, a pair of strips connected with the under side of the table and each having a depending part provided with a longitudinally extending row of holes, a pair of brace members, each of substantially U-shape, and having a substantially straight vertically arranged bight and the limbs extending upwardly and outwardly from the bight with one limb longer than the other and both limbs having their free ends bent to engage certain holes in the strips, the bight portions resting against a side of the stove and a bar having bent ends engaging the lower limbs of the U-shaped members for holding said members together in spaced relation.

1,903,263. WEIGHING AND DELIVERY MACHINE. FRANK MUSCH, New York, N. Y. Filed Nov. 19, 1931. Serial No. 576,027. 4 Claims. (Cl. 249—19.)



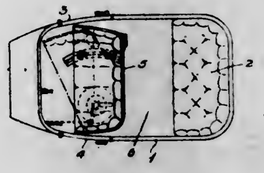
1. A device of the class described comprising a beam, a pivot supporting said beam intermediate its length, means rotatably mounted on one end of said beam, adjustable weights on the other end of said beam, shelves extending from said rotatable means, means normally preventing rotation of said rotatable means, means on said rotatable means normally engaging said means for preventing rotation, said shelves being adapted to receive slices of a material being sliced, the weight of the slices thus received being predetermined by adjusting the said weights, said beam being tilted downward on the side containing the rotatable means when the weight of the received slices equals said predetermined weight, said downward movement causing disengagement of said normally engaging means from the means for preventing rotation and thereby allowing rotation of the rotatable means by the weight of received slices on said shelves, and means for removing the received slices from said shelves.

1,903,264. HOE, MULCHER, AND WEED DESTROYER. FRED C. PALIN, Newton, Ind. Filed Apr. 27, 1931. Serial No. 533,291. 1 Claim. (Cl. 306—17.)



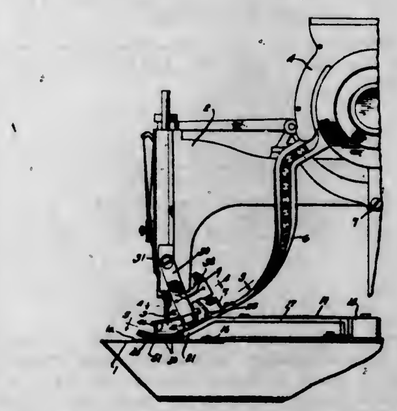
An agricultural implement comprising a blade having a major portion and also having at the back edge of the major portion a straight flange disposed at right angles to the plane of the major portion, a handle, a right angle shank having a portion joined to the handle in fixed relation and also having an arm or free limb extending at right angles to said portion and disposed against one side of the major portion of the blade and also disposed at the inner side of and against the blade flange, the major portion of the blade being provided with a series of apertures adjacent to the flange and the said arm or free limb of the shank being provided with an aperture at an intermediate point in the length of the arm or free limb and adapted to be registered with any one of the apertures of the blade, a headed bolt constituting the sole connection between said shank and blade, said bolt being disposed in the registered apertures of the blade portion and the arm or free limb of the shank, and a nut threaded on said bolt and arranged against the arm or free limb of the shank.

1,903,265. STEERING MECHANISM FOR BOATS. ELMER E. PECK, Long Beach, Calif. Filed June 16, 1930. Serial No. 461,568. 4 Claims. (Cl. 115—35.)



1. In a steering mechanism of the class described, a pair of shafts, one of said shafts having a steering wheel mounted thereon, sets of gears in connection with said shafts, said sets of gears being of different ratios, one gear of one of said sets of gears being slidable longitudinally on one of the shafts, said slidable gear having a clutch portion on one end thereof for engaging a corresponding clutch portion on one of the gears of another set, means for sliding said slidable gear longitudinally of said shaft, and means for non-rotatably connecting said slidable gear to said shaft.

1,903,266. BOX FOR MILK BOTTLES AND OTHER ARTICLES. DANIEL S. KOCH and WAYNE NEWBERRY, St. Paul, Minn. Filed Apr. 2, 1932. Serial No. 602,806. 2 Claims. (Cl. 232—41.)

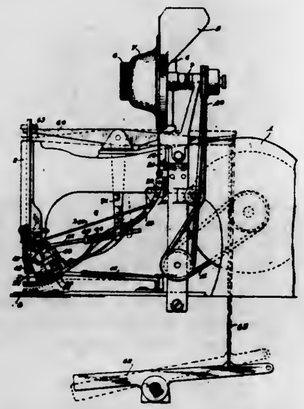


1. A device of the class described comprising a box having its upper and lower ends open, a downwardly opening door hingedly connected to the rear of the box, for closing the lower end of the box, an upwardly opening door hingedly connected to the rear of the box at the top thereof for closing the upper end of the box, springs connecting the two doors together and located exteriorly of the box and holding both doors in closed position, insulated strips arranged adjacent one side of the box, within the same, with one strip adjacent the upper end of the box and the other strip adjacent the lower end thereof, a spring plunger carried by each strip, said plungers engaged by the doors when said doors are closed, for moving portions of the plungers away from the strips, and contacts on each strip engaged by said portions when the plungers are disengaged by the doors.

1,903,267. AUTOMOBILE SEAT. CLARK L. ROBERTS, Nampa, Idaho. Filed May 4, 1931. Serial No. 534,927. 2 Claims. (Cl. 155—95.)

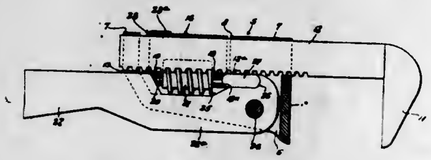
1. A vehicle seat mounting including a hollow standard having an upper bearing surface, a bearing plate fixed to the bottom of the seat and engaging the upper bearing surface of the standard, a pin keyed to the bearing plate and extending through the standard, means for rotating said pin, an arcuate track, a bracket secured to the seat and having enlarged extremities engaging said track, and spring means for holding said seat in its normal position.

1,903,268. MACHINE AND METHOD FOR SEWING BUTTONS ONTO FABRIC OR THE LIKE. FREDERICK N. ROSS, Detroit, Mich., assignor to Patent Button Company, Waterbury, Conn., a Corporation of Connecticut. Filed Feb. 21, 1928. Serial No. 255,944. 6 Claims. (Cl. 112—113.)



1. The method of positioning buttons to a sewing machine for attaching the buttons to a fabric or the like, which comprises attaching one button, and simultaneously feeding another button to position and rotating this other button to properly position the eyes thereof, by removal of the said attached button from attaching position.

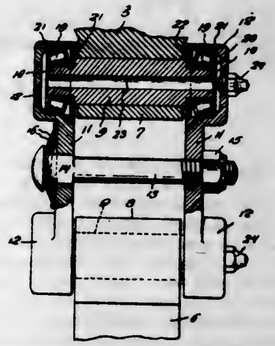
1,903,269. MACHINE FOR ATTACHING BUTTONS. FREDERICK N. ROSS, Detroit, Mich., and FRANKLIN R. WHITE, Waterbury, Conn., assignors to The Patent Button Co., Waterbury, Conn., a Corporation of Connecticut. Filed Jan. 12, 1931. Serial No. 508,088. 16 Claims. (Cl. 112—113.)



1. In a button attaching machine, the combination of a sewing head, supporting means therefor extending to the rear of the sewing head away from the side of the sewing head where an operator is adapted to sit, a button hopper having a base and having a rotatable hopper part disposed on a horizontal axis substantially paralleling said sewing head support and extending toward and away from the

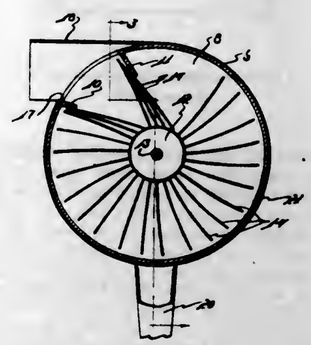
operator and with the rotatable part positioned toward the operator, said hopper being arranged to feed the buttons so that the buttons lie in a substantially vertical plane substantially perpendicular to said axis and direct-

ly before the operator, and a twisted chute extending from the hopper to a point near sewing position for turning the buttons substantially through 180° as they pass through the chute.



1,903,270. WRENCH. ROLLEN SANDOZ, The Dalles, Oreg. Filed May 16, 1932. Serial No. 611,731. 2 Claims. (Cl. 81—126.)

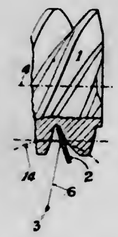
1. A wrench comprising a main hollow body provided with a jaw, a jaw complementing the first named jaw and provided with a shank extending through said body; an auxiliary hollow body surrounding the shank and working in an opening formed in the main body, and also provided with longitudinally spaced alined bearing lugs; a worm, a supporting pin for the worm journalled in the bearing lugs; teeth on said shank and with which the worm is engaged; a spring mounted on the auxiliary body member and having a bifurcated end straddling said shank and bearing against an adjacent part of said main body; a handle having a head pivoted within the main body and provided with a shoulder normally alined with the bearing lugs; and a link interposed between said shoulder and an adjacent one of said bearing lugs.



1,903,271. SPRING SHACKLE. RUDOLPH SCHIAVULLI, Providence, R. I. Filed May 13, 1931. Serial No. 537,134. 1 Claim. (Cl. 267—54.)

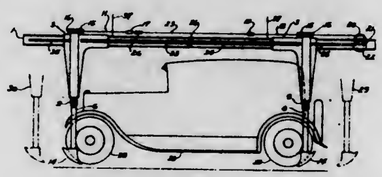
A device of the character described comprising in combination with a vehicle frame and spring having end bearings, of shafts fixed in said end bearings and having reduced ends, shackle plates at the ends of said bearings having cup-shaped end portions arranged over the reduced ends of the shafts, said cup-shaped end portions having internal shoulders spaced from the bottoms thereof, roller bearings between the reduced ends of the shafts and the cup-shaped portions of the shackle plates, each bearing comprising an inner tapered race fitted on the reduced portion of the adjacent shaft and an outer tapered race tightly fitted within and against the internal shoulder of the adjacent cup-shaped portion of the associated shackle plate, washer closing the inner side of each cup-shaped portion and fitted on the adjacent reduced end portion of the shaft between the inner bearing race and the shoulder provided by reducing the adjacent end of the shaft, an assembly bolt passing through the intermediate portions of and connecting the shackle plates and having

an angular stem portion, and an elongated outwardly curved spring plate carried by said assembly bolt and interposed between the outer side of one shackle plate and the head of said assembly bolt to yieldingly draw the shackle plates together and thereby automatically and uniformly adjust the roller bearings to compensate for wear, said spring plate and one of the shackle plates having an angular opening to engage the angular stem portion of the assembly bolt to prevent relative turning thereof, the opening of the spring plate being elongated longitudinally of the latter to prevent breaking of said spring plate when compressed toward a straight condition.



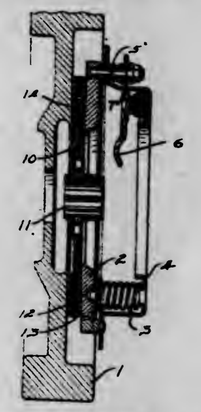
1,903,272. TOY ANIMATION PICTURE DEVICE. SILAS B. TEBEAU, East Detroit, Mich. Filed Mar. 2, 1931. Serial No. 519,371. 2 Claims. (Cl. 88—19.)

1. A device of the class described, comprising: a drum-like housing having oppositely disposed side walls; a circular wall spacing said side walls apart; radially inturned



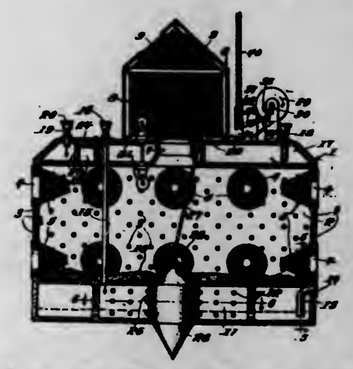
ends on said circular wall, one of said ends being turned in a distance greater than the other; a spool in said housing; a spindle carried by said spool and journaled in the oppositely disposed side walls of said housing, one end of said spindle projecting beyond said housing; a handle mounted on said projecting end for rotating said spool; a plurality of display members swingably mounted at one end of the periphery of said spool and spaced around said spool, said display members being engageable successively with said inturned ends.

1,903,273. WORM GEARING. HARRY WALKER, Milnrow, near Rochdale, England, assignor of one-half to John Holroyd & Company Limited, Milnrow, near Rochdale, England. Filed Nov. 30, 1931, Serial No. 578,045, and in Great Britain Feb. 20, 1931. 3 Claims. (Cl. 74—41.)



1. Worm gearing comprising a worm of the parallel type having a worm thread profile which is such as would be produced, whilst the worm rotates, by a straight line which turns about an external axis traversed along a path parallel with the axis of the worm and lies in a plane which is offset from the worm axis.

1,903,274. GARAGE HANDLING MECHANISM. ARCHIE S. WATSON, Highland Park, Mich. Filed Sept. 10, 1930. Serial No. 481,028. 20 Claims. (Cl. 294—67.)



1. In a garage handling mechanism, the combination of members for supporting a motor vehicle, means for moving said members into engagement with said motor vehicle, and means for controlling the engaging pressure of said members with said motor vehicle, said means comprising members automatically operated to contactual and non-contactual positions relative to one another.

1,903,275. CLUTCH. ERNEST E. WEMP, Detroit, Mich. Filed Jan. 18, 1930. Serial No. 421,690. 14 Claims. (Cl. 192—52.)

9. A pressure plate for a clutch comprising a one-piece ring-like member having one face thereof machined to present a frusto-conical surface, said plate being distortable so that under packing pressure in a cultch said frusto-conical surface is caused to take a position substantially perpendicular to the axis of the plate.

1,903,276. FISH TRAP. ELEUTERIO SUSI YANGA, Valladolid, Occidental Negros, P. I. Filed Sept. 6, 1932. Serial No. 631,911. 7 Claims. (Cl. 43—102.)

1. A fish trap comprising a body having a main compartment provided with entrances to permit fish to enter said compartment while the body is submerged in water, means to prevent the escape of fish from said compartment by way of said entrances, a cage carried by the body and having communication with the main compartment, means to prevent the return of fish from the cage to the main compartment, and means to cause submerging of the body and the automatic ascent thereof to the surface of the water after the expiration of a period of time.

LIST OF TRADE-MARK APPLICANTS

PUBLISHED FOR OPPOSITION

[Act of Feb. 20, 1905, Sec. 6, as amended Mar. 2, 1907]

Alumni Association of the Massachusetts Institute of Technology, Cambridge, Mass. Magazine. Serial No. 334,341; Apr. 4. Class 38.

American Optical Company, Southbridge, Mass. Prescription ophthalmic lenses. Serial No. 319,196; Apr. 4. Class 26.

Anchor Cap & Closure Corporation, Long Island City, N. Y. Closure caps. Serial No. 334,342; Apr. 4. Class 50.

Ansley Radio Corporation, New York, N. Y. Electric phonograph. Serial No. 334,588; Apr. 4. Class 36.

Arcady Laboratories, Inc., Chicago, Ill. Medicinal preparations for animals and poultry. Serial No. 334,630; Apr. 4. Class 6.

Arechabala, José, S. A., Cardenas, Cuba. Rum, brandy, cognac, etc. Serial Nos. 333,177–8; Apr. 4. Class 49.

Argus Manufacturing Company, Chicago, Ill. Handcuffs or manacles. Serial No. 334,631; Apr. 4. Class 25.

Auto-Car-A-Van Trailer Co. (See Lewis, Joseph.)

B-B Chemical Works, Inc., Atlanta, Ga. Preparation for cleaning, mending, and repairing of radiators, etc. Serial No. 333,787; Apr. 4. Class 6.

Baby Bear Products Corporation, Buffalo, N. Y. Bread. Serial No. 333,870; Apr. 4. Class 46.

Baker, C. W., & Sons, Aberdeen, Md. Canned vegetables. Serial No. 334,594; Apr. 4. Class 46.

Bastian-Morley Co., doing business as Gas and Electric Heater Co., La Porte, Ind. Oil water heaters. Serial No. 331,273; Apr. 4. Class 34.

Bauer, Beatrice M., doing business as The Pinx Company, Burbank, Calif. Stomach medicine and breath purifier. Serial No. 333,817; Apr. 4. Class 6.

Blue Bird Malt Company, Brooklyn, N. Y. Malt syrup. Serial No. 277,992; Apr. 4. Class 46.

Bluman Engineering Corp., Brooklyn, N. Y. Electric fuse plugs. Serial No. 335,178; Apr. 4. Class 21.

Bonta, Vincent J., Brooklyn, N. Y. Oranges, grapefruit, and lemons. Serial No. 334,346; Apr. 4. Class 46.

Burton, W., & Co., Inc., Brooklyn, N. Y. Flavoring extracts and imitations thereof. Serial No. 316,762; Apr. 4. Class 46.

Buttonless Tire Cover Company, The, Canton, Ohio. Embossed textile fabrics. Serial No. 323,809; Apr. 4. Class 50.

Candy Products Corporation, Owosso, Mich. Candies. Serial No. 332,989; Apr. 4. Class 46.

Carlson, James A., doing business as Redicide Co., Minneapolis, Minn. Insecticides. Serial No. 328,660; Apr. 4. Class 6.

Champion Hardware Company, The, Geneva, Ohio. Sash lifts, push plates, spring hinges, etc. Serial No. 330,447; Apr. 4. Class 13.

Chemosan-Union und Fritz-Pesoldt A. G., Vienna, Austria. Bay-active ointment. Serial No. 334,485; Apr. 4. Class 6.

Chic Manufacturing Company, Peoria, Ill. Dresses, pajamas, uniforms, etc. Serial No. 333,965; Apr. 4. Class 39.

Clemson Bros., Inc., Middletown, N. Y. Saws and saw blades. Serial No.323,029; Apr. 4. Class 23.

Climax Tube Company, Mystic, Conn. Paper tubes or cores. Serial No. 334,954; Apr. 4. Class 2.

Crown Products Corporation, San Francisco, Calif. Salad oil, vinegar, syrup, etc. Serial Nos. 333,921–2; Apr. 4. Class 46.

Curtis Lighting, Inc., Chicago, Ill. Glass reflectors. Serial No. 332,876; Apr. 4. Class 33.

Dawson, Francis E., Decatur, Ill. Health powder for cattle. Serial No. 333,785; Apr. 4. Class 6.

Dill Co., The, Norristown, Pa. Insect spray. Serial No. 334,556; Apr. 4. Class 6.

Du Pont, Adele, Inc., New York, N. Y. Face creams. Serial No. 333,702; Apr. 4. Class 6.

Edeleanu Gesellschaft m. b. H., Berlin, Germany. Gasoline and oil. Serial No. 325,821; Apr. 4. Class 15.

Empire Twine & Yarn Co., Inc., New York, N. Y. Thread and yarn. Serial No. 330,340; Apr. 4. Class 43.

Endurette Corporation of America, New York, N. Y. Chemically translucent silk and sateen piece goods. Serial No. 328,577; Apr. 4. Class 50.

Equalizer Company. (See Watkins, Ann.)

Essex Rubber Company, Trenton, N. J. Rubber heels. Serial Nos. 334,432–3; Apr. 4. Class 39.

Filtrol Company of California, Los Angeles, Calif. Chemically treated colloidal clay. Serial No. 334,434; Apr. 4. Class 6.

Garfinkel & Ritter, New York, N. Y. Slips. Serial Nos. 334,332–3; Apr. 4. Class 39.

Gas and Electric Heater Co. (See Bastian-Morley Co.)

General Fire Extinguisher Company, Providence, R. I. Automatic sprinkler systems. Serial No. 334,794; Apr. 4. Class 13.

General Mills, Inc., Minneapolis, Minn. Wheat flour and cereal breakfast foods. Serial No. 326,469; Apr. 4. Class 46.

General Motors Corporation, Detroit, Mich. Ventilating windows for automobiles, busses, trucks, etc. Serial Nos. 332,880–1; Apr. 4. Class 19.

Glaser, Isaac, doing business as H. Glaser & Son, Boston, Mass. Hosiery, underwear, shirts, etc. Serial No. 334,602; Apr. 4. Class 39.

Glatfelter, P. H., Company, Spring Grove, Pa. Writing and printing paper. Serial No. 334,962; Apr. 4. Class 37.

Globe Envelope & Printing Company, Inc., The, Richmond, Va. Church collection envelopes. Serial No. 334,870; Apr. 4. Class 37.

Golden, Asher, New York, N. Y. Ball and roller bearings. Serial No. 334,796; Apr. 4. Class 23.

Gorman-Nathan Co. Inc., New York, N. Y. Suits, overcoats, and topcoats. Serial No. 330,744; Apr. 4. Class 39.

Graham, W. L., Salt Lake City, Utah; Seattle, Wash.; and Portland, Oreg. Special kind of fried chicken sandwich, chicken pie, etc. Serial Nos. 333,419–20; Apr. 4. Class 46.

Grossman, Isidore, doing business as Grossman Clothing Co., New York, N. Y. Suits, overcoats, trousers, etc. Serial No. 334,559; Apr. 4. Class 39.

Gulbransen Company, Chicago, Ill. Table board game. Serial No. 334,560; Apr. 4. Class 22.

Gum, Inc., Philadelphia, Pa. Chewing gum. Serial No. 334,837; Apr. 4. Class 46.

Hamilton Machine Company, The. (See Wolfe, Graff F.)

Hamilton Rubber Manufacturing Company, Trenton, N. J. Power transmission belts. Serial No. 334,461; Apr. 4. Class 35.

Harper Company. (See Personeni, Harry.)

Helm, Ray P., doing business as The Helm Company, Benton Harbor, Mich. Antiseptic vaginal suppositories. Serial No. 334,750; Apr. 4. Class 6.

Holloway, M. J., & Company, Chicago, Ill. Candy. Serial No. 334,751; Apr. 4. Class 46.

Houghton, E. F., & Co., Philadelphia, Pa. Leather belting. Serial No. 333,725; Apr. 4. Class 35.

Household Paper Products, Detroit, Mich. Sanitary napkins. Serial No. 332,531; Apr. 4. Class 44.

Howard Jackley Company, The, Philadelphia, Pa. Laxatives. Serial No. 330,298; Apr. 4. Class 6.

Indiana Breweries, Inc., Indianapolis, Ind. Malt beverage. Serial No. 334,709; Apr. 4. Class 45.

Iorns, Clifford L., doing business as VIPro Corporation, St. Louis, Mo. Soy oleum. Serial No. 334,823; Apr. 4. Class 46.

Ishibashi, Shojiro, Kurume, Japan. Rubber tires, tubes, patches, etc. Serial No. 319,250; Apr. 4. Class 35.

Johns-Manville Corporation, New York, N. Y. Packing. Serial No. 330,299; Apr. 4. Class 35.

Johnson, Johnson & Johnson, Hartford, Conn. Squeegees. Serial No. 333,707; Apr. 4. Class 23.

Juvenile Shoe Corporation of America, The, Aurora, Mo. Shoes and slippers. Serial No. 334,567; Apr. 4. Class 39.

Karreth, August, doing business as Lultpold-Werk, Chemisch-pharmazeutische Fabrik, Munich, Germany. Nerve tonics. Serial No. 331,862; Apr. 4. Class 6.

Kinkade, James G., Pasadena, Calif. Brushes. Serial No. 330,094; Apr. 4. Class 29.

Klein Brothers, New York, N. Y. Silk, satin, linen, etc. Serial No. 334,362; Apr. 4. Class 42.

Krich Products Corporation, Vineland, N. J. Cubes or tablets for aiding the digestion, etc. Serial No. 325,104; Apr. 4. Class 6.

Lea Manufacturing Company, The, Waterbury, Conn. Abrasive composition. Serial No. 334,533; Apr. 4. Class 4.

Lewis, Joseph, doing business as Auto Car-A-Van Trailer Co., Detroit, Mich. Automobile camp trailer and coach. Serial No. 330,414; Apr. 4. Class 19.

Lithographic Technical Foundation, Inc., New York, N. Y. Material adapted for the treatment and preservation of the plates and parts of printing and lithographing presses. Serial No. 330,751; Apr. 4. Class 6.

Lultpold-Werk, Chemisch-pharmazeutische Fabrik. (See Karreth, August.)

MacDowell Brothers, Ogdensburg, N. Y. Yeast. Serial No. 333,358; Apr. 4. Class 46.

Magic Flote Novelty Corp., Chicago, Ill. Pneumatic toys. Serial No. 334,925; Apr. 4. Class 22.

Maguire, Fred, San Francisco, Calif. Toilet tissue. Serial Nos. 329,963–4; Apr. 4. Class 37.

Maison Jeurelle, Inc., Chicago, Ill. Perfume. Serial No. 334,611; Apr. 4. Class 6.

Manhattan Soap Company, Inc., New York, N. Y. Toilet soaps. Serial No. 334,109; Apr. 4. Class 4.

Marcus & Wiesen, Inc., New York, N. Y. Sanitary aprons, pads, napkins, etc. Serial No. 333,978; Apr. 4. Class 44.

LIST OF TRADE-MARK APPLICANTS

PUBLISHED FOR OPPOSITION

[Act of Feb. 20, 1905, Sec. 6, as amended Mar. 2, 1907]

Mars, Incorporated, Chicago, Ill. Candy. Serial No. 332,136; Apr. 4. Class 46.
Marshall, James, (Glasgow) Limited, Glasgow, Scotland. Oat flour, semolina, rice flour, etc. Serial No. 333,162; Apr. 4. Class 46.
Meyers, Louis, & Son, Incorporated, New York, N. Y. Leather gloves. Serial No. 333,598; Apr. 4. Class 39.
Moorman, Albert S., West Englewood, N. J. Card game. Serial No. 333,809; Apr. 4. Class 22.
National Funeral Directors' Association of the United States, Inc., Cincinnati, Ohio. Periodicals. Serial No. 335,095; Apr. 4. Class 38.
National Grange Feeds, Inc., Buffalo, N. Y. Animal feeds. Serial No. 315,364; Apr. 4. Class 46.

Chase and Sanborn's Seal Brand Tender Leaf Orange Pekoe and Pekoe. For Tea Balls. Standard Brands Incorporated. 41,905; Apr. 4.
Class 1 Butter. For Butter. R. F. Leslie. 41,892; Apr. 4.
Comet Targets. For Targets. Diamond Springs Lime Company. 41,882; Apr. 4.
Cross Country Motor Oil. For Motor Oil. Sears, Roebuck and Co. 41,899; Apr. 4.
Crossbuck. For Sweaters. Columbia Knitting Mills. 41,881; Apr. 4.
Globe "A1" Complete Biscuit Flour. For Complete Biscuit Flour. Globe Grain and Milling Company. 41,884; Apr. 4.
Golden Brand Mayonnaise. For Mayonnaise. Golden Brand Food Products Co. 41,885; Apr. 4.
Haven's Elixir. For an Elixir for Use as an Aid to Indigestion and for Treating Sour Stomach, Heartburn, Sour Eructations, Etc. G. B. Havens. 41,887; Apr. 4.
Hood River Brand. For Apples. Apple Growers Association. 41,876; Apr. 4.
Jaeger's Old Kentucky Sausage Seasoning. For Sausage Seasoning. J. E. Jaeger. 41,889; Apr. 4.
Larson's Peptomint Gum. For Chewing Gum. L. P. Larson Jr. Company. 41,891; Apr. 4.
Leed's. For Footwear. Bird & Sons, Inc. 41,878; Apr. 4.
Mount Hope. For Tomatoes. Economy Wholesale Grocery Company. 41,883; Apr. 4.
Page & Shaw Lolly-Ettes. For Lolly-Ettes (a Form of Lolly-pop). Page & Shaw, Inc. 41,895; Apr. 4.

Peerless Rubber Typewriter Keys Protects Finger Nails Makes Typing Easier. For Rubber Typewriter Keys. Peerless Key Company. 41,896; Apr. 4.
Rays of Health in Kimball Tablets. For Stomach Tablets. H. B. Kimball. 41,890; Apr. 4.
Safety Matches. For Safety Matches. Northam Trading Corporation. 41,894; Apr. 4.
Spartan. For Canned Salmon. P. E. Harris & Co. 41,886; Apr. 4.
Stearns' Electric Rat and Roach Paste. For Rat and Roach Paste. Stearns' Electric Paste Company. 41,906; Apr. 4.
Sturdy Fut. For Boxes. Hoague-Sprague Corporation. 41,888; Apr. 4.
Tasty-Malt. For Chocolate Flavored Healthful Malted Drink. Superior Packing Corp. 41,907; Apr. 4.
Thrif T (Yellow and Red Plaid Label—Orange Pekoe and Pekoe). For Tea. Royal Estates Tea Co. 41,898; Apr. 4.
True Values. For Footwear. Bird & Son, Inc. 41,877; Apr. 4.
Unge's Shrimp. For Canned Shrimp. E. L. Unges. 41,908; Apr. 4.
Wrigley's Licorice Gum. For Licorice Gum. Wm. Wrigley Jr. Company. 41,909–11; Apr. 4.
Yankee Base Ball Puzzle. For Base Ball Puzzle. W. H. Nicolay. 41,893; Apr. 4.

LIST OF PRINTS

Drink Orange-Crush and the Other Fresh Fruit Crushes. For Delicious Cooling Vitamin Drinks. Orange-Crush Company. 14,128; Apr. 4.
Flying Iron. For Electric Heated Sad-Irons and Stands. S. A. Duvall. 14,125; Apr. 4.
New Sunbrite Cleanser. For Cleansing and Scouring Powder. Swift & Company. 14,129; Apr. 4.
Pocket Packets Kleenex Disposable Tissues. For Pocket Packets of Disposable Tissue Handkerchiefs. Kleenex Company. 14,127; Apr. 4.
Sunshine Chamois. For Chamois Leather. Hoyt & Worthen Tanning Corp. 14,126; Apr. 4.
The American Farmer. For Nitrate of Soda. Barrett Company. 14,124; Apr. 4.
Wrigley's Licorice Gum. For Licorice Gum. Wm. Wrigley Jr. Company. 14,130; Apr. 4.

LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 4TH DAY OF APRIL, 1933

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). Includes patents, reissues, and designs.

Abrams, Theodore, Woodhaven, N. Y., assignor to Studio Couch Patents Co. Inc. Combination furniture. 1,903,404; Apr. 4.

Albright, Ida, administratrix. (See Albright, William.)

Albright, William, deceased, New York, N. Y., I. Albright, administratrix. Race track starter barrier gate and stall. 1,903,414; Apr. 4.

Alphonso, Peter R., Longview, Tex., assignor to The Argent Corporation, Shreveport, La. Liquid lift pump. 1,903,331; Apr. 4.

American Coating Mills. (See Colbert, C. C., and Preston, assignors.)

American Laundry Machinery Company, The. (See McDermott, Harry H., assignor.)

American Laundry Machinery Company, The. (See Reese, L. V., and Johnson, assignors.)

American Laundry Machinery Company, The. (See Staley, Alonso D., assignor.)

American Laundry Machinery Company, The. (See Wallace, George B., assignor.)

Ames, Warren, Waltham, Mass. Measuring gauge. 1,903,322; Apr. 4.

Amling, Albert J. and E. C., Orange, assignors to Amling Brothers, Santa Ana, Calif. Hybrid tea rose. Pl. Pt. 59; Apr. 4.

Amling Brothers. (See Amling, Albert J. and E. C., assignors.)

Amling, Ernst C. (See Amling, Albert J. and E. C.)

Anderson, Grover C., Gateway, Mont. Aerial bomb. 1,903,348; Apr. 4.

Animated Roboquin Display Company, The. (See Connor, James G., assignor.)

Argent Corporation, The. (See Alphonso, Peter R., assignor.)

Armstrong, L. E., Realty & Investment Co. (See Currie, Clare H., assignor.)

Backus, Oscar E., Milwaukee, Wis. Nozzle. 1,903,354; Apr. 4.

Barbiers, Ferdinand S., Lancaster, Ohio, assignor to The Diamond Match Company, Baltimore, Md. Combined match and ash tray or similar article. Des. 89,563; Apr. 4.

Barnes, Brien F., Hartford, Conn. Sink cleaning utensil. 1,903,277; Apr. 4.

Bassel, Rita, New Orleans, La., assignor to M. B. Klaholt, Kirkwood, Mo., as Provincial of and as representing the Central Province of the Ursulines of the Roman Union in the United States, and her successors. Finger ring. Des. 89,564; Apr. 4.

Battle Creek Bread Wrapping Machine Company. (See Littlefield, Carl, assignor.)

Bazzoni, Lewis J., Swampscott, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Heel-covering apparatus. 1,903,278; Apr. 4.

Beard, Elmer E., Olympia, Wash. Producing linotype pellets from linotype slugs. 1,903,329; Apr. 4.

Beatty, George W. (See Dabrasky, A., and Beatty.)

Becket, Frederick M., New York, N. Y. Making iron-chromium nickel alloys. 1,903,409; Apr. 4.

Bellar, Charles J., and C. R. Yirava, Cleveland, Ohio. Attachment for dispensing and measuring pumps. 1,903,332; Apr. 4.

Berger, Joseph A., Chicago, Ill. Puncture sealing fluid container. 1,903,355; Apr. 4.

Bessom, Earl A., Marblehead, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Rotary cutter. 1,903,279; Apr. 4.

Bessom, Earl A., Marblehead, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Making rotary cutters. 1,903,280; Apr. 4.

Bitney, Dewey H., assignor to Union Steel Products Company, Albion, Mich. Reenforce chair. 1,903,356; Apr. 4.

Botel, Charles, New York, N. Y. Plumbing and leveling instrument. 1,903,333; Apr. 4.

Bowman, Samuel B., Zanesville, Ohio, assignor to Hazel-Atlas Glass Co., Wheeling, W. Va. Leer. 1,903,281; Apr. 4.

Bowman, Samuel B., Zanesville, Ohio, assignor to Hazel-Atlas Glass Co., Wheeling, W. Va. Leer. 1,903,282; Apr. 4.

Bramberry, Harry M., Newcastle, Ind., assignor to Piston Research Corporation, Norfolk, Va. Piston and piston ring therefor. 1,903,396; Apr. 4.

Brauer, Elijah, Jersey City, N. J. Apparatus for unhairing skins. 1,903,363; Apr. 4.

Breed, Charles W., Western Springs, and G. R. Burkhardt, Chicago, Ill. Railway joint bar. Re18,786; Apr. 4.

Briggs & Stratton Corporation. (See Nicholson, Stanley W., assignor.)

Brödl, Jacob, Munich, Germany. Insole. 1,903,323; Apr. 4.

Brogden, Ernest M., and M. L. Trowbridge, Pomona, Calif., assignors to Brogdex Company, Winter Haven, Fla. Preparation of fresh fruit for market. 1,903,283; Apr. 4.

Brogdex Company. (See Brogden, E. M., and Trowbridge, assignors.)

Brown, Jack, and W. F. Reuter, Otoe, Nebr. Sickle grinder. 1,903,369; Apr. 4.

Buhrke, E. H., Company. (See Hester, Allen F., assignor.)

Burkhardt, George R. (See Breed, C. W., and Burkhardt.)

Burton, Stanley H., Detroit, Mich. Doorlock. 1,903,284; Apr. 4.

Campbell, Donald J., Muskegon Heights, Mich. Tire. 1,903,405; Apr. 4.

Capell, Carl F., and E. H. Pendleton, assignors to Pencap Corporation, Santa Monica, Calif. Electrical current controlling mechanism. 1,903,285; Apr. 4.

Carbide and Carbon Chemicals Corporation. (See Cox, Henry L., assignor.)

Cecil, William, New York, N. Y. Pipe rack. 1,903,410; Apr. 4.

Celanese Corporation of America. (See Dreyfus, C., and Platt, assignors.)

Celanese Corporation of America. (See Roberts, R. P., Dean, and Gregory, assignors.)

Chain Belt Company. (See Lindow, Rudolph F., assignor.)

Chicago Bridge & Iron Company. (See Griffin, Alvah M., assignor.)

Chicago Bridge & Iron Company. (See Williams, Djalma D., assignor.)

Chrystal, Joan O. (See Pierce, Maurice W., assignor.)

Codling, Allen B., Seattle, Wash. Electric broiler. 1,903,324; Apr. 4.

Colbert, Charles C., and G. E. Preston, assignors to American Coating Mills, Elkhart, Ind. Paper coating method and apparatus. 1,903,325; Apr. 4.

Connor, James G., assignor to The Animated Roboquin Display Company, Kansas City, Kans. Mechanical figure. 1,903,371; Apr. 4.

Continental Can Company. (See McKinnis, Ronald B., assignor.)

Continental-Divco Company. (See Nicol, John, assignor.)

Cooke, Bee, Davy, W. Va. Mine door. 1,903,334; Apr. 4.

Copell, Daniel, Atlantic City, N. J. Key holder. 1,903,372; Apr. 4.

Coty, Thomas E., Watertown, N. Y. Bag and forming the same. 1,903,286; Apr. 4.

Cowgill, Frank M. (See Symons, F. E., and Cowgill.)

Cox, Henry L., South Charleston, W. Va., assignor to Carbide and Carbon Chemicals Corporation. Corrosion inhibitor. 1,903,287; Apr. 4.

Crawley, Theodore B., West Point, Ky. Front sight for rifles. 1,903,326; Apr. 4.

Crowley, John C., Cleveland Heights, assignor to The Dill Manufacturing Company, Cleveland, Ohio. Valve stem and adapter. 1,903,392; Apr. 4.

Crowley, John C., Cleveland Heights, assignor to The Dill Manufacturing Company, Cleveland, Ohio. Valve stem. 1,903,395; Apr. 4.

Currie, Clare H., Webster City, assignor, by mesne assignments, to L. E. Armstrong Realty & Investment Co., Fort Dodge, Iowa. Sewer pipe. Re18,785; Apr. 4.

Cushman Chuck Company, The. (See Sloan, H. E. and Highberg, assignors.)

Cuthbert, Thomas J., assignor to The Stetson Shoe Company, Inc., Weymouth, Mass. Shoe making. 1,903,374; Apr. 4.

Dabrasky, August, Washington, D. C., and G. W. Beatty, Decatur, Ill. Cartridge feed mechanism. 1,903,288; Apr. 4.

Dampier, Leon E., San Jose, and R. H. Dampier, San Mateo, Calif. Cabinet shelving. 1,903,334; Apr. 4.

Dampier, Roly H. (See Dampier, Leon E. and R. H.)

Dasso, Jerry H., New York, N. Y. Awning outrigging. 1,903,289; Apr. 4.

Dean, I. R. (See Roberts, R. P., Dean, and Gregory.)

Dennis, Alfred A., Grand Rapids, Mich. Veneer joining machine. 1,903,373; Apr. 4.

Detroit Steel Products Company. (See Kelly, Clyde W., assignor.)

Diamond Match Company, The. (See Barbiers, Ferdinand S., assignor.)

Dietrich, Fred. (See Mercier, C., and Dietrich.)

Dill Manufacturing Company, The. (See Crowley, John C., assignor.)

Dorner, Hermann I. A., Hanover, Germany, assignor to Packard Motor Car Company, Detroit, Mich. Internal combustion engine. 1,903,276; Apr. 4.
Dreyfus, Camille, New York, N. Y., and H. Platt, Cumberland, Md., assignors to Celanese Corporation of America. Treating cellulose derivative material and product thereof. 1,903,290; Apr. 4.
Eaton Manufacturing Company. (See Howe, James M., assignor.)
Eaton Manufacturing Company. (See Reid, James S., assignor.)
Eaton Manufacturing Company. (See Snell, Lyle K., assignor.)
Ellis, Bertie, New York, N. Y. Corn cure package. 1,903,312; Apr. 4.
Falkiner Cane Harvester Corporation of America. (See Falkiner, Ralph S., assignor.)
Falkiner, Ralph S., Melbourne, Australia, assignor to Falkiner Cane Harvester Corporation of America. Cane harvesting machinery. 1,903,335; Apr. 4.
Fifield, Albert F., St. Catherines, Ontario, Canada. Harmonic balancer. 1,903,336; Apr. 4.
Fish, Gilbert D., Pelham, N. Y., assignor to F. S. Lyon, Minneapolis, Minn. Suspended railway switch. 1,903,386; Apr. 4.
Fitzgerald Manufacturing Company, The. (See Fitzgerald, Patrick J., assignor.)
Fitzgerald, Patrick J., assignor to The Fitzgerald Manufacturing Company, Torrington, Conn. Food mixing, juice extracting and grinding apparatus. Des. 89,565; Apr. 4.
Framburg, Henry A., Chicago, Ill. Lighting fixture. Des. 89,566; Apr. 4.
Frazier, Robert T., assignor to Tennessee Furniture Corporation, Chattanooga, Tenn. Refrigerator. Des. 89,567; Apr. 4.
Friedman, William, assignor to Lupé, Inc., New York, N. Y. Container. 1,903,357; Apr. 4.
Gahagan, Orren M., Oklahoma City, Okla. Cathead. Re18,789; Apr. 4.
Garr, Joseph M., Calumet City, Ill., assignor to Peoples Voting Machine Corporation, Knox, Ind. Voting machine. 1,903,400; Apr. 4.
Garr, Joseph M., Calumet City, Ill., assignor to Peoples Voting Machine Corporation, Knox, Ind. Voting machine. 1,903,401; Apr. 4.
Gillio, Battista Giovanni, Worcester, Mass. Electricity generating apparatus. 1,903,307; Apr. 4.
Globe Machine & Stamping Company, The. (See Green, Lee B., assignor.)
Gould, John H., assignor to McCord Radiator & Mfg. Co., Detroit, Mich. Heating system for motor vehicles. 1,903,349; Apr. 4.
Government and the People of the United States of America, The. (See Rabak, Frank, assignor.)
Grant, Winfield S., and F. H. Shoop, Detroit, Mich. Oil burner. 1,903,364; Apr. 4.
Gray, Daniel M., assignor to Hazel-Atlas Glass Co., Wheeling, W. Va. Liner for receptacle closures. 1,903,319; Apr. 4.
Green, Lee B., Lakewood, assignor to The Globe Machine & Stamping Company, Cleveland, Ohio. Radiator shell front. Des. 89,568; Apr. 4.
Greenberg, Irving, Union City, N. J. Slide fastener. 1,903,415; Apr. 4.
Gregory, Louis W. (See Roberts, R. P., Dean, and Gregory.)
Grimm, Alvah M., Los Angeles, Calif., assignor to Chicago Bridge & Iron Company, Chicago, Ill. Floating deck. 1,903,291; Apr. 4.
Groetchen, Richard. (See Klein, Carl F., assignor.)
H & E Standard Auto Parts et al. (See Patterson, Richard B., assignor.)
Hage, Louis, San Jose, Calif. Operating adding machines and the like. 1,903,337; Apr. 4.
Hall, Bicknell, Gloucester, Mass. Hanging door. 1,903,379; Apr. 4.
Haskins, Howard B., Highland Park, and E. G. Simpson, assignors to Ternstedt Manufacturing Company, Detroit, Mich. Combination dovetail and door bumper. 1,903,365; Apr. 4.
Hazel-Atlas Glass Co. (See Bowman, Samuel B., assignor.)
Hazel-Atlas Glass Co. (See Gray, Daniel M., assignor.)
Heeter, Allen F., Chicago, Ill., assignor to R. H. Buhrke Company. Golf club. Des. 89,569; Apr. 4.
Hercules Powder Company. (See Stuart, Joseph, 2d, assignor.)
Highberg, George A. (See Sloan, H. E., and Highberg.)
Hoe, R., & Co. (See Zuckerman, Adolph M., assignor.)
Holswarth Gas Turbine Co. (See Holzwarth, Hans, assignor.)
Holzwarth, Hans, Dusseldorf, Germany, assignor to Holswarth Gas Turbine Co., San Francisco, Calif. Explosion turbine. 1,903,292; Apr. 4.
Horne, Burchard E., Andover, Mass. Pressure regulating and relief valve. 1,903,338; Apr. 4.
Howe, James M., Cleveland Heights, assignor to Eaton Manufacturing Company, Cleveland, Ohio. Automobile heater. 1,903,387; Apr. 4.
Hulbert, William R., Chicago, Ill. Combustion device. 1,903,308; Apr. 4.
Humbert, Jacob Z., North Canton, Ohio. Lid straightening and sealing tool. 1,903,388; Apr. 4.
I. G. Farbenindustrie Aktiengesellschaft. (See Söll, Julius, assignor.)
I-T-E Circuit Breaker Co. (See Maple, Roy H., assignor.)
Isaacson, Max, Dayton, Ohio. Fluid brake. 1,903,293; Apr. 4.
Jacobs, Charles B., Baltimore, Md. Slip-on garment. 1,903,403; Apr. 4.
Johnson, George W. (See Reese, L. V., and Johnson.)
Johnson, William G., Milwaukee, Wis. Scotch marine boiler construction. 1,903,313; Apr. 4.
Jones & Laughlin Steel Corporation. (See Littler, Carl W., assignor.)
Karnes, James C., Buffalo, N. Y. Sound locating apparatus. 1,903,294; Apr. 4.
Kehoe, Thomas J., Perrysburg, Ohio. Air conditioner. 1,903,389; Apr. 4.
Kelly, Clyde W., assignor to Detroit Steel Products Company, Detroit, Mich. Window construction. 1,903,309; Apr. 4.
Kennedy, Harry E., Berkeley, Calif. Internal combustion engine. 1,903,381; Apr. 4.
Kerr, Alva L., Mansfield, Ohio. Latching mechanism. 1,903,327; Apr. 4.
Kessenich, Gregory J., Madison, Wis. Composite gun barrel. 1,903,295; Apr. 4.
Klaholt, Mary B. (See Bassel, Rita, assignor.)
Klein, Carl F., assignor to R. Groetchen, Chicago, Ill. Top for a game table or similar article. Des. 89,570; Apr. 4.
Kohut, Alexander, assignor to William Willheim Co., Inc., New York, N. Y. Textile fabric or similar article. Des. 89,571; Apr. 4.
Krebs Pigment and Color Corporation. (See Mechlenburg, Werner, assignor.)
Landrum, John P., Birmingham, Ala. Transmission for outboard motors. 1,903,350; Apr. 4.
La Susa, Salvatore J., and W. Sambur, Jamaica, N. Y. Kitchen cabinet. Des. 89,572; Apr. 4.
La Susa, Salvatore J., and W. Sambur, Jamaica, N. Y. Kitchen cabinet. Des. 89,573; Apr. 4.
Launderville, Harold E., Ogdensburg, N. Y. Steam cooker. 1,903,310; Apr. 4.
Lindow, Rudolph F., assignor to Chain Belt Company, Milwaukee, Wis. Concrete mixing apparatus. 1,903,416; Apr. 4.
Lipman, Carl E. L., assignor to Lipman Patents Corporation, Chicago, Ill. Evaporator. 1,903,351; Apr. 4.
Lipman Patents Corporation. (See Lipman, Carl E. L., assignor.)
Littlefield, Carl, assignor to Battle Creek Bread Wrapping Machine Company, Battle Creek, Mich. Conveyer mechanism. 1,903,375; Apr. 4.
Littler, Carl W., assignor to Jones & Laughlin Steel Corporation, Pittsburgh, Pa. Apparatus for tube manufacture. 1,903,296; Apr. 4.
Locke, Sanford J., Syracuse, assignor to United States Hoffman Machinery Corporation, New York, N. Y. Garment press. 1,903,402; Apr. 4.
Lupé, Inc. (See Friedman, William, assignor.)
Lyon, Frank S. (See Fish, Gilbert D., assignor.)
Maple, Roy H., Indianapolis, Ind., assignor, by mesne assignments, to I-T-E Circuit Breaker Co. Self-soldering circuit breaker. Re18,784; Apr. 4.
McCord Radiator & Mfg. Co. (See Gould, John H., assignor.)
McCullough, Charles, Canonsburg, Pa. Bracket. 1,903,340; Apr. 4.
McDermott, Harry H., Chicago, Ill., assignor to The American Laundry Machinery Company, Cincinnati, Ohio. Garment pressing machine. 1,903,320; Apr. 4.
McDonnell, Frank S., Milton, Mass. Dandy. 1,903,311; Apr. 4.
McKinnis, Ronald B., Pittsburgh, Pa., assignor to Continental Can Company, Inc., New York, N. Y. Roasted coffee product and making same. 1,903,362; Apr. 4.
Mecklenburg, Werner, Moscow, Union of Soviet Socialist Republics, assignor, by mesne assignments, to Krebs Pigment and Color Corporation, Newark, N. J. Production of titanium dioxides. Re18,790; Apr. 4.
Mercier, Clifford, and F. Dietrich, Lowell, Mass. Detachable sink strainer. 1,903,366; Apr. 4.
Mill Engineering and Supply Company. (See Winquist, Victor H., assignor.)
Miller, Pansy H., et al. (See Patterson, Richard B., assignor.)
Mitchell, Wayne B., Quebec, Quebec, Canada. Combination sliding subbase and scraper for auto jacks. 1,903,341; Apr. 4.
Moorhouse, Alfred, assignor to Packard Motor Car Company, Detroit, Mich. Hydraulic shock absorber. 1,903,377; Apr. 4.
Moorhouse, Alfred, assignor to Packard Motor Car Company, Detroit, Mich. Combination clutch and brake control mechanism. 1,903,378; Apr. 4.
Myers, Florence B., Los Angeles, Calif. Hose leak stop. Des. 89,584; Apr. 4.
Nicholson, Stanley W., assignor to Briggs & Stratton Corporation, Milwaukee, Wis. Window regulator. 1,903,358; Apr. 4.

Nicol, John, assignor to Continental-Diveo Company, Detroit, Mich. House-to-house delivery vehicle body. Des. 89,574; Apr. 4.
Noble, Warren, Detroit, Mich. Hydraulic valve gear. 1,903,328; Apr. 4.
Nordberg Manufacturing Company. (See Talboys, Henry H., assignor.)
Ornberg, Arvid, Chicago, Ill. Windshield heater. 1,903,314; Apr. 4.
Packard Motor Car Company. (See Dorner, Hermann I. A., assignor.)
Packard Motor Car Company. (See Moorhouse, Alfred, assignor.)
Packard Motor Car Company. (See Woolson, Lionel M., assignor.)
Patterson, Richard B., assignor of one-half to P. H. Miller and one-half to H & E Standard Auto Parts, Chicago, Ill. Ratchet wrench. 1,903,297; Apr. 4.
Pencap Corporation. (See Capell, C. F., and Pendleton, assignors.)
Pendleton, Edwin H. (See Capell, C. F., and Pendleton.)
Peoples Voting Machine Company. (See Garr, Joseph M., assignor.)
Petzke, Franklin J., Minneapolis, Minn. Food warmer. Des. 89,575; Apr. 4.
Pew, Arthur E., jr., Bryn Mawr, assignor to Sun Oil Company, Philadelphia, Pa. Preparing crude oil for distillation into lubricating oils. 1,903,407; Apr. 4.
Piercey, Maurice W., Norbury, London, England, assignor to Joan O. Chrystal, Summit, N. J. Gear. 1,903,390; Apr. 4.
Piston Research Corporation. (See Bramberry, Harry M., assignor.)
Platt, Herbert. (See Dreyfus, C., and Platt.)
Pollack, Walter. (See Young, A. M., and Pollack.)
Post, Claude L., Chicago, Ill. Feeding device. 1,903,361; Apr. 4.
Preston, George E. (See Colbert, C. C., and Preston.)
Priebe, Arthur W., assignor to A. O. Smith Corporation, Milwaukee, Wis. Pipe joint. 1,903,315; Apr. 4.
Putvin, George F., Munising, Mich. Seam for drier felts and making same. 1,903,406; Apr. 4.
Rabak, Frank, Washington, D. C., assignor to the Government and the People of the United States of America. Coating and sealing red cedar lumber to prevent the escape of cedar aroma. 1,903,342; Apr. 4.
Ralston Steel Car Company. (See Symons, F. E., and Cowgill, assignors.)
Ramsey, George M., Amarillo, Tex. Handgrip testing machine. 1,903,352; Apr. 4.
Reese, Lemuel V., and G. W. Johnson, assignors to The American Laundry Machinery Company, Cincinnati, Ohio. Safety device for paper pulp extractors. 1,903,367; Apr. 4.
Reid, James S., Cleveland Heights, assignor, by mesne assignments, to Eaton Manufacturing Company, Cleveland, Ohio. Closure. 1,903,389; Apr. 4.
Reuter, William F. (See Brown, J., and Reuter.)
Rewald, Bruno, Hamburg, Germany. Separating fatty constituents from oleaginous materials. 1,903,397; Apr. 4.
Ritley, Joseph, Cleveland, Ohio. Combination poker and clinker tongs. 1,903,316; Apr. 4.
Roach, John P. (See Snowden, F. E., and Roach.)
Roberts, Eugene, Hastings, N. Y. Centrifugal machine. 1,903,298; Apr. 4.
Roberts, Robert P., R. I. R. Dean, and L. W. Gregory, Spondon, near Derby, England, assignors to Celanese Corporation of America. Production of artificial materials from cellulose derivatives. 1,903,299; Apr. 4.
Roberts, William P., Greensburg, Ind. Pinhole grinding or honing tool. 1,903,343; Apr. 4.
Rogers, Lore A., Washington, D. C. (dedicated to the free use of the Public). Valve. 1,903,344; Apr. 4.
Rollason, Charles H., assignor to Wheeling Steel Corporation, Wheeling, W. Va. Sheet metal container and head therefor. 1,903,300; Apr. 4.
Rosenow, Edward C., Rochester, Minn. Float and safety valve. Re18,788; Apr. 4.
Roy, Kurt H., and R. R. Sweaney, Los Angeles, Calif. Book end. Des. 89,576; Apr. 4.
Sambur, William. (See La Susa, S. J., and Sambur.)
Schiller, Sigge, Elisabeth, assignor to Traffic Signs & Signals, Inc., Paterson, N. J. Reflecting unit. 1,903,385; Apr. 4.
Schrader, Joseph, Cleveland, Ohio. Lamp. Des. 89,577; Apr. 4.
Sessions, Frank L., Lakewood, Ohio. Method of and apparatus for electric welding and heating of metals. 1,903,359; Apr. 4.
Shoop, Francis H. (See Grant, W. S., and Shoop.)
Simpson, Emory G. (See Haskins, H. B., and Simpson.)
Sloan, Harry E., Hartford, and G. A. Highberg, West Hartford, assignors to The Cushman Chuck Company, Hartford, Conn. Chuck. Re18,787; Apr. 4.
Smith, A. O., Corporation. (See Priebe, Arthur W., assignor.)
Snell, Lyle K., Detroit, Mich., assignor to Eaton Manufacturing Company, Cleveland, Ohio. Closure. 1,903,391; Apr. 4.
Snowden, Frederic E., and J. P. Roach, Los Angeles, Calif. Air cooler and humidifier. 1,903,301; Apr. 4.
Söll, Julius, Frankfort-on-the-Main-Schwanheim, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Preparing hydrofluoric acid. 1,903,408; Apr. 4.
Staley, Alonso D., assignor to The American Laundry Machinery Company, Cincinnati, Ohio. Unloading apron and drain trough for washers. 1,903,321; Apr. 4.
Steinmann, Frank, sr., De Soto, Mo. Flying machine. 1,903,345; Apr. 4.
Stetson Shoe Company, The. (See Cuthbert, Thomas J., assignor.)
Stormonth, James, Epping, New South Wales, Australia. Reclaiming oils. 1,903,370; Apr. 4.
Stuart, Joseph, 2d., assignor to Hercules Powder Company, Wilmington, Del. Package for blasting caps. 1,903,302; Apr. 4.
Studio Couch Patents Co. Inc. (See Abrams, Theodore, assignor.)
Sun Oil Company. (See Pew, Arthur E., jr., assignor.)
Sweaney, Ross R. (See Roy, K. H., and Sweaney.)
Symons, Francis E., and F. M. Cowgill, assignors to Ralston Steel Car Company, Columbus, Ohio. Filter press. 1,903,368; Apr. 4.
Talboys, Henry H., assignor to Nordberg Manufacturing Company, Milwaukee, Wis. Endless track vehicle. 1,903,380; Apr. 4.
Taylor Instrument Companies. (See Teague, Walter D., assignor.)
Teague, Walter D., Forest Hills, assignor to Taylor Instrument Companies, Rochester, N. Y. Combined thermometer and bracket. Des. 89,578; Apr. 4.
Tennessee Furniture Corporation. (See Frazier, Robert T., assignor.)
Ternstedt Manufacturing Company. (See Haskins, H. B., and Simpson, assignors.)
Tibbot, Guy B., Santa Cruz, Calif. Burner. 1,903,317; Apr. 4.
Tilling, Reinhold, Osnabruck, Germany. Flying rocket. 1,903,303; Apr. 4.
Townsley, Hugh B., Spokane, Wash. Vehicle wheel. 1,903,398; Apr. 4.
Traffic Signs & Signals, Inc. (See Schiller, Sigge, assignor.)
Trowbridge, Miles L. (See Brogden, E. M., and Trowbridge.)
Union Steel Products Company. (See Bitney, Dewey H., assignor.)
United Shoe Machinery Corporation. (See Bassoni, Lewis J., assignor.)
United Shoe Machinery Corporation. (See Bessom, Earl A., assignor.)
United States Hoffman Machinery Corporation. (See Locke, Sanford J., assignor.)
Van Horn, Arthur H. (See Vicek, Adolph A., assignor.)
Vicek, Adolph A., Cleveland, assignor of one-half to A. H. Van Horn, Lakewood, Ohio. Measuring instrument. 1,903,393; Apr. 4.
Vreeland Corporation. (See Vreeland, Frederick K., assignor.)
Vreeland, Frederick K., Montclair, assignor to Vreeland Corporation, Hoboken, N. J. Radiofrequency amplifier. 1,903,394; Apr. 4.
Walt, Clinton F., Pine Bluff, Ark. Levee machine. 1,903,399; Apr. 4.
Wallace, George B., Grantwood, N. J., assignor to The American Laundry Machinery Company, Cincinnati, Ohio. Loading apparatus for laundry washers and the like. 1,903,305; Apr. 4.
Weber, Walter B., Merwood Park, Pa. Office partition. Des. 89,579; Apr. 4.
Welsch, Gottlieb, Sheboygan, Wis. Composition for refinishing enameled surfaces. 1,903,346; Apr. 4.
Wensel, Edwin H., Whitefish Bay, Wis. Feeding hopper for pneumatic conveyers. 1,903,304; Apr. 4.
Wheeling Steel Corporation. (See Rollason, Charles H., assignor.)
Whelan, Joseph A., Greenwich, Conn. Mortar box. 1,903,347; Apr. 4.
Wildhaber, Ernest, Brooklyn, N. Y. Worm gearing. 1,903,318; Apr. 4.
Will, Harold N., Kettle Falls, Wash. Internal combustion engine starter mechanism. 1,903,360; Apr. 4.
Willheim, William, New York, N. Y. Textile fabric or similar article. Des. 89,580; Apr. 4.
Willheim, William, New York, N. Y. Textile fabric or similar article. Des. 89,581; Apr. 4.
Willheim, William, Co. (See Kohut, Alexander, assignor.)
Williams, Djalma D., Dallas, Tex., assignor to Chicago Bridge & Iron Company, Chicago, Ill. Sealing construction for tanks. 1,903,306; Apr. 4.
Wingard, Charles L., Portland, Oreg. Means for holding together parts having telescopic engagement. 1,903,353; Apr. 4.
Winquist, Victor H., assignor to Mill Engineering and Supply Company, Seattle, Wash. Conveyer drive means. 1,903,383; Apr. 4.

Winter, Curt O., Saylesville, R. I. Safety razor. Des. 89,582; Apr. 4.
Woolson, Emma F., executrix. (See Woolson, Lionel M.)
Woolson, Lionel M., assignor to Packard Motor Car Company, Detroit, Mich. Internal combustion engine. 1,903,411; Apr. 4.
Woolson, Lionel M., deceased, Detroit, by E. F. Woolson, executrix, Bloomfield Village, assignor to Packard Motor Car Company, Detroit, Mich. Internal combustion engine. 1,903,412; Apr. 4.
Woolson, Lionel M., deceased, Detroit, by E. F. Woolson, executrix, Bloomfield Village, assignor to Packard Motor Car Company, Detroit, Mich. Internal combustion engine. 1,903 413; Apr. 4.
Wooster, Philip A., San Francisco, Calif. Soap dispenser. Des. 89,583; Apr. 4.
Yirava, Charles R. (See Bellar, C. J., and Yirava.)
Young, Albert M., Brooklyn, and W. Pollack, Richmond Hill, N. Y. Multiple display lamp. 1,903,330; Apr. 4.
Zuckerman, Adolph M., assignor to R. Hoe & Co., Inc., New York, N. Y. Folding mechanism. 1,903,382; Apr. 4.

LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 4TH DAY OF APRIL, 1933

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). Includes patents, reissues, and designs.

Acid, Preparing hydrofluoric. J. Sill. 1,903,408; Apr. 4.
Adding machines and the like, Operating. L. Hage. 1,903,337; Apr. 4.
Air conditioner. T. J. Kehoe. 1,903,339; Apr. 4.
Air cooler and humidifier. F. E. Snowden and J. P. Roach. 1,903,301; Apr. 4.
Alloys, Making iron-chromium nickel. F. M. Becket. 1,903,409; Apr. 4.
Apron and drain trough for washers, Unloading. A. D. Staley. 1,903,321; Apr. 4.
Automobile heater. J. M. Howe. 1,903,387; Apr. 4.
Awning outrigging. J. H. Darno. 1,903,289; Apr. 4.
Bag and forming the same. T. E. Coty. 1,903,286; Apr. 4.
Bar: *See*—
Joint bar.
Boiler construction, Scotch marine. W. G. Johnson. 1,903,313; Apr. 4.
Box: *See*—
Mortar box.
Bomb, Aerial. G. C. Anderson. 1,903,348; Apr. 4.
Book end. K. H. Roy and R. E. Sweaney. Des. 89,576; Apr. 4.
Bracket. C. McCullough. 1,903,340; Apr. 4.
Brake: *See*—
Fluid brake.
Broiler, Electric. A. B. Codling. 1,903,324; Apr. 4.
Burner: *See*—
Oil burner.
Burner. G. B. Tibbot. 1,903,317; Apr. 4.
Cabinet, Kitchen. S. J. La Susa and W. Sambur. Des. 89,572–3; Apr. 4.
Cane harvesting machinery. R. S. Falkiner. 1,903,335; Apr. 4.
Cartridge feed mechanism. A. Dabrasky and G. W. Beatty. 1,903,288; Apr. 4.
Cathead. O. M. Gahagan. Re18,789; Apr. 4.
Cellulose derivative material and product thereof, Treating. C. Dreyfus and H. Platt. 1,903,290; Apr. 4.
Centrifugal machine. E. Roberts. 1,903,298; Apr. 4.
Chair: *See*—
Reenforce chair.
Chuck. H. E. Sloan and G. A. Highberg. Re18,787; Apr. 4.
Circuit breaker, Self-soldering. R. H. Maple. Re18,784; Apr. 4.
Closure. J. S. Reid. 1,903,389; Apr. 4.
Closure. L. K. Snell. 1,903,391; Apr. 4.
Clutch and brake control mechanism, Combination. A. Moorhouse. 1,903,378; Apr. 4.
Coffee product and making same, Roasted. R. B. McKinnis. 1,903,362; Apr. 4.
Combustion device. W. R. Hulbert. 1,903,308; Apr. 4.
Composition for refinishing enameled surfaces. G. Welsch. 1,903,346; Apr. 4.
Concrete mixing apparatus. R. F. Lindow. 1,903,416; Apr. 4.
Container: *See*—
Fluid container.
Container. W. Friedman. 1,903,357; Apr. 4.
Container and head therefor, Sheet metal. C. H. Rollason. 1,903,300; Apr. 4.
Conveyer drive means. V. H. Winquist. 1,903,393; Apr. 4.
Conveyer mechanism. C. Littlefield. 1,903,375; Apr. 4.
Cooker, Steam. H. E. Launderville. 1,903,310; Apr. 4.
Corn cure package. B. Ellis. 1,903,312; Apr. 4.
Corrosion inhibitor. H. L. Cox. 1,903,287; Apr. 4.
Current controlling mechanism, Electrical. C. F. Capell and E. H. Pendleton. 1,903,285; Apr. 4.
Cutter: *See*—
Rotary cutter.
Cutters, Making rotary. E. A. Bessom. 1,903,280; Apr. 4.
Dandy. F. S. McDonnell. 1,903,311; Apr. 4.
Deck, Floating. A. M. Griffin. 1,903,291; Apr. 4.
Door, Hanging. B. Hall. 1,903,379; Apr. 4.
Doorlock. S. H. Burton. 1,903,284; Apr. 4.
Door, Mine. B. Cooke. 1,903,384; Apr. 4.
Dovetail and door bumper, Combination. H. B. Haskins and E. G. Simpson. 1,903,365; Apr. 4.
Electricity generating apparatus. B. G. Gillio. 1,903,307; Apr. 4.
Engine: *See*—
Internal combustion engine.
Engine starter mechanism, Internal combustion. H. N. Will. 1,903,360; Apr. 4.
Evaporator. C. L. Lipman. 1,903,351; Apr. 4.
Fastener: *See*—
Slide fastener.
Fatty constituents from oleaginous materials, Separating. B. Rewald. 1,903,397; Apr. 4.
Feeding device. C. L. Post. 1,903,361; Apr. 4.
Figure, Mechanical. J. G. Connor. 1,903,371; Apr. 4.
Filter press. F. E. Symons and F. M. Cowgill. 1,903,368; Apr. 4.
Finger ring. R. Bassel. Des. 89,564; Apr. 4.
Float and safety valve. E. C. Rosenow. Re17,788; Apr. 4.
Fluid brake. M. Isaacson. 1,903,293; Apr. 4.
Fluid container, Puncture sealing. J. A. Berger. 1,903,355; Apr. 4.
Flying machine. F. Steinmann, sr. 1,903,345; Apr. 4.
Folding mechanism. A. M. Zuckerman. 1,903,382; Apr. 4.
Food mixing, juice extracting and grinding apparatus. P. J. Fitzgerald. Des. 89,565; Apr. 4.
Fruit for market, Preparation of fresh. E. M. Brogden and M. L. Trowbridge. 1,903,283; Apr. 4.
Furniture, Combination. T. Abrams. 1,903,404; Apr. 4.
Garment press. S. J. Locke. 1,903,402; Apr. 4.
Garment pressing machine. H. H. McDermott. 1,903,320; Apr. 4.
Garment, Slip-on. C. B. Jacobs. 1,903,403; Apr. 4.
Gate and stall, Race track starter barrier. W. Albright. 1,903,414; Apr. 4.
Gauge: *See*—
Measuring gauge.
Gear: *See*—
Valve gear.
Gear. M. W. Piercey. 1,903,390; Apr. 4.
Gearing, Worm. E. Wildhaber. 1,903,318; Apr. 4.
Golf club. A. F. Heeter. Des. 89,569; Apr. 4.
Grinder, Sickle. J. Brown and W. F. Reuter. 1,903,369; Apr. 4.
Grinding or honing tool, Pinhole. W. P. Roberts. 1,903,343; Apr. 4.
Gun barrel, Composite. G. J. Kessenich. 1,903,295; Apr. 4.
Harmonic balancer. A. F. Fifield. 1,903,336; Apr. 4.
Heater: *See*—
Automobile heater. Windshield heater.
Heating system for motor vehicles. J. H. Gould. 1,903,349; Apr. 4.
Heel-covering apparatus. L. J. Bassoni. 1,903,278; Apr. 4.
Holder: *See*—
Key holder.
Hopper for pneumatic conveyers, Feeding. E. H. Wensel. 1,903,304; Apr. 4.
Hose leak stop. F. B. Myers. Des. 89,584; Apr. 4.
Insole. J. Brödl. 1,903,328; Apr. 4.
Internal combustion engine. H. I. A. Dorner. 1,903,276; Apr. 4.
Internal combustion engine. H. R. Kennedy. 1,903,281; Apr. 4.
Internal combustion engine. L. M. Woolson. 1,903,411–13; Apr. 4.
Jacks, Combination sliding subbase and scraper for auto. W. B. Mitchell. 1,903,341; Apr. 4.
Joint: *See*—
Pipe joint.
Joint bar, Railway. C. W. Breed and G. R. Burkhardt. Re18,786; Apr. 4.
Key holder. D. Copell. 1,903,372; Apr. 4.
Lamp. J. Schrader. Des. 89,577; Apr. 4.
Lamp, Multiple display. A. M. Young and W. Pollack. 1,903,330; Apr. 4.
Latching mechanism. A. L. Kerr. 1,903,327; Apr. 4.
Leer. S. B. Bowman. 1,903,281–2; Apr. 4.
Levee machine. C. F. Wait. 1,903,399; Apr. 4.
Lid straightening and sealing tool. J. Z. Humbert. 1,903,333; Apr. 4.
Lighting fixture. H. A. Framburg. Des. 89,566; Apr. 4.
Liner for receptacle closures. D. M. Gray. 1,903,319; Apr. 4.
Linotype pellets from linotype slugs, Producing. E. E. Beard. 1,903,329; Apr. 4.
Liquid lift pump. P. R. Alphonso. 1,903,331; Apr. 4.
Loading apparatus for laundry washers and the like. G. B. Wallace. 1,903,305; Apr. 4.
Lumber to prevent the escape of cedar aroma, Coating and sealing red cedar. F. Rabak. 1,903,342; Apr. 4.
Materials from cellulose derivatives, Production of artificial. E. P. Roberts, E. I. E. Dean, and L. W. Gregory. 1,903,299; Apr. 4.
Measuring gauge. W. Ames. 1,903,322; Apr. 4.
Measuring instrument. A. A. Vicek. 1,903,393; Apr. 4.
Mortar box. J. A. Whelan. 1,903,347; Apr. 4.
Nozzle O. E. Backus. 1,903,354; Apr. 4.
Oil burner. W. S. Grant and F. H. Shoop. 1,903,364; Apr. 4.
Oil for distillation into lubricating oils, Preparing crude. A. E. Pew, jr. 1,903,407; Apr. 4.

Oils, Reclaiming. J. Stormonth. 1,903,370; Apr. 4.
Package for blasting caps. J. Stuart, 2d. 1,903,302; Apr. 4.
Paper coating method and apparatus. C. C. Colbert and G. E. Preston. 1,903,325; Apr. 4.
Partition, Office. W. B. Weber. Des. 89,579; Apr. 4.
Parts having telescopic engagement, Means for holding together. C. L. Wingard. 1,903,353; Apr. 4.
Pipe: *See*—
  Sewer pipe.
Pipe joint. A. W. Priebe. 1,903,315; Apr. 4.
Pipe rack. W. Cecil. 1,903,410; Apr. 4.
Piston and piston ring therefor. H. M. Bramberry. 1,903,396; Apr. 4.
Plumbing and leveling instrument. C. Botel. 1,903,333; Apr. 4.
Press: *See*—
  Filter press. Garment press.
Pressure regulating and relief valve. B. E. Horne. 1,903,338; Apr. 4.
Pump: *See*—
  Liquid lift pump. Reciprocating pump.
Pumps, Attachment for dispensing and measuring. C. J. Beller and C. R. Yirava. 1,903,332; Apr. 4.
Rack: *See*—
  Pipe rack.
Radiator shell front. L. B. Green. Des. 89,568; Apr. 4.
Radiofrequency amplifier. F. K. Vreeland. 1,903,394; Apr. 4.
Railway switch, Suspended. G. D. Fish. 1,903,386; Apr. 4.
Ratchet wrench. R. B. Patterson. 1,903,297; Apr. 4.
Razor, Safety. C. O. Winter. Des. 89,582; Apr. 4.
Reenforce chair. D. H. Bitney. 1,903,356; Apr. 4.
Reflecting unit. S. Schiller. 1,903,385; Apr. 4.
Refrigerator. R. T. Frasier. Des. 89,567; Apr. 4.
Regulator: *See*—
  Window regulator.
Rifles, Front sight for. T. B. Crawley. 1,903,326; Apr. 4.
Rocket, Flying. R. Tilling. 1,903,303; Apr. 4.
Rose, Hybrid tea. A. J. and E. C. Amling. Pl. Pt. 59; Apr. 4.
Rotary cutter. E. A. Bessom. 1,903,279; Apr. 4.
Safety device for paper pulp extractors. L. V. Reese and G. W. Johnson. 1,903,367; Apr. 4.
Sealing construction for tanks. D. D. Williams. 1,903,306; Apr. 4.
Seam for drier felts and making same. G. F. Putvin. 1,903,406; Apr. 4.
Sewer pipe. C. H. Currie. Re18,785; Apr. 4.
Shelving, Cabinet. L. E. and R. H. Dampier. 1,903,334; Apr. 4.
Shock absorber, Hydraulic. A. Moorhouse. 1,903,377; Apr. 4.
Shoe making. T. J. Cuthbert. 1,903,374; Apr. 4.
Skins, Apparatus for unhairing. E. Brauer. 1,903,363; Apr. 4.
Slide fastener. I. Greenberg. 1,903,415; Apr. 4.
Soap dispenser. P. A. Wooster. Des. 89,583; Apr. 4.
Sound locating apparatus. J. C. Karnes. 1,903,294; Apr. 4.
Strainer, Detachable sink. C. Mercier and F. Dietrich. 1,903,366; Apr. 4.
Switch: *See*—
  Railway switch.
Testing machine, Handgrip. G. H. Ramsey. 1,903,352; Apr. 4.
Textile fabric or similar article. A. Kohut. Des. 89,571; Apr. 4.
Textile fabric or similar article. W. Willheim. Des. 89,580–1; Apr. 4.
Thermometer and bracket, Combined. W. D. Teague. 89,578; Apr. 4.
Tire. D. J. Campbell. 1,903,405; Apr. 4.
Titanium dioxides, Production of. W. Mecklenburg. Re18,790; Apr. 4.
Tongs, Combination poker and clinker. J. Ritley. 1,903,316; Apr. 4.
Tool: *See*—
  Grinding or honing tool.
  Lid straightening and sealing tool.
Top for a game table or similar article. C. F. Klein. Des. 89,570; Apr. 4.
Transmission for outboard motors. J. P. Landrum. 1,903,350; Apr. 4.
Tray or similar article, Combined match and ash. F. S. Barbiers. Des. 89,563; Apr. 4.
Tube manufacture, Apparatus for. C. W. Littler. 1,903,296; Apr. 4.
Turbine, Explosion. H. Holzwarth. 1,903,292; Apr. 4.
Utensil, Sink cleaning. B. F. Barnes. 1,903,277; Apr. 4.
Valve: *See*—
  Float and safety valve.
  Pressure regulating and relief valve.
Valve. L. A. Rogers. 1,903,344; Apr. 4.
Valve gear, Hydraulic. W. Noble. 1,903,328; Apr. 4.
Valve stem. J. C. Crowley. 1,903,395; Apr. 4.
Valve stem and adapter. J. C. Crowley. 1,903,392; Apr. 4.
Vehicle body, House-to-house delivery. J. Nicol. Des. 89,574; Apr. 4.
Vehicle, Endless track. H. H. Talboys. 1,903,380; Apr. 4.
Vehicle wheel. H. B. Townsley. 1,903,398; Apr. 4.
Veneer joining machine. A. A. Dennis. 1,903,373; Apr. 4.
Voting machine. J. M. Garr. 1,903,400–1; Apr. 4.
Warmer, Food. F. J. Petzke. Des. 89,575; Apr. 4.
Welding and heating of metals, Method of and apparatus for electric. F. L. Sessions. 1,903,359; Apr. 4.
Wheel: *See*—
  Vehicle wheel.
Window construction. C. W. Kelly. 1,903,309; Apr. 4.
Window regulator. S. W. Nicholson. 1,903,358; Apr. 4.
Windshield heater. A. Ornberg. 1,903,314; Apr. 4.
Wrench: *See*—
  Ratchet wrench.

CLASSIFICATION OF PATENTS

ISSUED APRIL 4, 1933

NOTE.—First number—class, second number—subclass, third number—patent number

2—	74: 1,903,403	50—	23: 1,903,338	82—	91: 1,903,329	144—	279: 1,903,373	198—	20: 1,903,375	340—	10: 1,903,320
4—	292: 1,903,366	51—184.1:	1,903,343	87—	6: 1,903,307	149—	8: 1,903,363	200—	116: R. 18,784	344—	14: 1,903,345
5—	17: 1,903,404		222: 1,903,360	88—	1: 1,903,385	152—	12: 1,903,305	202—	41: 1,903,408		18: 1,903,308
8—	20: 1,903,300		280: 1,903,346	89—	16: 1,903,295		13: 1,903,355	206—	47: 1,903,312	346—	209: 1,903,294
12—	31.5: 1,903,279	53—	1: 1,903,310		33: 1,903,286		17: 1,903,405	210—	74: 1,903,296	352—	5: 1,903,327
	42: 1,903,278		5: 1,903,324	91—	68: 1,903,319		21: 1,903,366		188: 1,903,365	354—	1: 1,903,341
	142: 1,903,374	56—	60: 1,903,335		1,903,325	156—	24: 1,903,340	211—	144: 1,903,334		178: R. 18,789

Whisky. Slater Rodger & Company Limited. 302,284; Apr. 11; Serial No. 331,997; published Jan. 31, 1933.

CLASS 50

Advertising sign frames. C. Farrow. 302,348; Apr. 11; Serial No. 312,908; published Jan. 24, 1933.
Monument stones, Finished. S. Goldstein Monument Works, Inc. 302,288; Apr. 11; Serial No. 331,371; published Jan. 24, 1933.
Monuments and statues. Burton Preston & Co. 302,360; Apr. 11.
Shoe straighteners. Shu-Saver Co. 302,367; Apr. 11.

LIST OF LABELS

Applekrit. For Apple Jelly. P. H. Boergermann. 41,915; Apr. 11.
Certified Mineral Spring Water. For Mineral Spring Water. Manitowoc Products Co. 41,921; Apr. 11.
Genesee. For Eggs. Genesee County Fresh Egg Producers Association. 41,918; Apr. 11.
Il Primo. For Tonno. Il Primo Olive Oil & Producers Company. 41,920; Apr. 11.
Interiall. For Washable Finish for All Interiors. Backus Paint Products, Inc. 41,913; Apr. 11.
Kwik-Soder. For Solder for Leaky Radiators and Cracks in Blocks and Cylinder Heads. B-B Chemical Works, Inc. 41,912; Apr. 11.
Sea Beach. For Canned Shrimp. Biloxi Canning & Packing Co. 41,914; Apr. 11.
Snowflake Kolor Kloth. For Colored Cotton Piece Goods. M. Snower & Company. 41,922; Apr. 11.
Sturdy Fut. For Boxes. Hoague-Sprague Corporation. 41,919; Apr. 11.
Sweet Cream Butter. For Sweet Cream Butter. Floodwood Cooperative Creamery Association. 41,017; Apr. 11.
Swift's. For Gelatin. Swift and Company. 41,923; Apr. 11.
Swift's Superwhip. For Gelatin. Swift and Company. 41,924; Apr. 11.
Upholsterers', Carpet and Linoleum Mechanics' International Union of North America. For Awnings. Upholsterers', Carpet and Linoleum Mechanics' International Union of North America. 41,925; Apr. 11.
Wart Remedy. For Wart Remedy. E. F. Vaughan. 41,926; Apr. 11.
Windex. For Liquid Cleaner for Vitreous Surfaces. Drackett Chemical Company. 41,916; Apr. 11.

LIST OF PRINTS

Dairylea—Direct From our Farms to You. For Milk, Cream, and Buttermilk. Dairymen's League Co-Operative Association, Inc. 14,131; Apr. 11.
Kester Junior Mender. For Solder. Kaster Solder Company. 14,133; Apr. 11.
Knocord Electric Iron. For Electric Heated Sadirons. S. A. Duvall. 14,132; Apr. 11.
Tube O. For Icing. Tube-O Food Products Co. 14,134; Apr. 11.

LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 11TH DAY OF APRIL, 1933

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). Includes patents, reissues, and designs.

Abbe, Edward J., assignor to The Elwell Parker Electric Company, Cleveland, Ohio. Industrial truck. 1,903,431; Apr. 11.

Adey, Horace W., London, England. Radio receiving and transmitting apparatus. 1,903,665; Apr. 11.

Agfa Ansco Corporation. (See Bornmann, Carl A., assignor.)

Akashi, Kaoru, Los Angeles, Calif. Surgical thermometer. 1,903,432; Apr. 11.

Aktiebolaget Papyrus. (See Wendel, Reinhold M., assignor.)

Aktiengesellschaft Brown, Boveri & Cie. (See Greco, Alfredo, assignor.)

Aktiengesellschaft Brown, Boveri & Cie. (See Roebel, Ludwig, assignor.)

Alexander, Harry H., deceased, Westfield, and A. W. Carroll; H. L. Wheeler, jr., Elizabeth, N. J., executor, assignor to said Harry H. Alexander. Metallurgy of copper. 1,903,497; Apr. 11.

Allen-Bradley Company. (See Wilms, Gustav O., assignor.)

Allen, William D., Kosse, Tex. Automatic nozzle or faucet. 1,903,605; Apr. 11.

Allendorff, Fritz, assignor to Robert Bosch Aktiengesellschaft, Stuttgart, Germany. Interrupter for ignition devices. 1,903,641; Apr. 11.

Alvey-Ferguson Company, The. (See Walter, J. C., and Vogt, assignors.)

Ambrose, Clyde B. (See Woolums, W. H., and Ambrose, assignors.)

American Lead Pencil Company. (See Reckford, Louis J., assignor.)

American Lurgi Corporation. (See von Girsewald, C. B., Weidmann, and Roesner, assignors.)

Anderson, Carl E., Brooklyn, N. Y. Rotary pump. 1,903,606; Apr. 11.

Andrews, Henry J., Fort Wayne, Ind., assignor, by mesne assignments, to Black Clawson Company, Hamilton, Ohio. Apparatus for reducing paper stock. 1,903,526; Apr. 11.

Andrus, Waddel P. (See Sturgis, Charles E., assignor.)

Annico, Joseph, Renaix, Belgium. Device for treating fabrics by means of a circulating bath. 1,903,585; Apr. 11.

Arnold, Heinrich, Waiblingen, E. Lutscher, Ravensburg, assignors to Robert Bosch Aktiengellschaft, Stuttgart, Germany. Switch control means for vehicle lamps. 1,903,586; Apr. 11.

Art Institute of Chicago, The. (See Smetko, Michael, assignor.)

Atlantic Elevator Company. (See Mechling, William H., assignor.)

Automatic Water Softener Company. (See Dotterweich, Andrew J., assignor.)

Auto Research Corporation. (See Bijur, Joseph, assignor.)

Avery, True M., Glens Falls, assignor to Union Bag & Paper Corporation, Hudson Falls, N. Y. Moisture-proof covered bag. 1,903,666; Apr. 11.

Avery, True M., Glens Falls, assignor to Union Bag & Paper Corporation, Hudson Falls, N. Y. Transparent covered tray. 1,903,734; Apr. 11.

Badma, Alex, Buffalo, N. Y. Radio receiving system. 1,903,420; Apr. 11.

Bailey Company. (See Bailey, David C., assignor.)

Bailey, David C., assignor to Bailey Company, Inc., Amesbury, Mass. Window glass channels. 1,903,541; Apr. 11.

Band, Charles E., Los Angeles, Calif. Trap-shooting apparatus or layout. 1,903,667; Apr. 11.

Barber, Alfred W., Boonton, N. J. Audion amplifier. 1,903,542; Apr. 11.

Barbour, Perley E. (See Barbour, Walter G., assignor.)

Barbour Walter G., assignor to P. E. Barbour, Quincy, doing business as Barbour Welting Company, Brockton, Mass. Making welting. 1,903,498; Apr. 11.

Barbour Welting Company. (See Barbour, Walter G.)

Barns, Frederick B. (See Laboon, J. F., and Barns.)

Barnhisel, Walter B., Los Angeles, Calif. Straining and pulp making machine. 1,903,527; Apr. 11.

Bartels, Ernst, Bandoeng, Java, Dutch East Indies. Leaf turner. 1,903,727; Apr. 11.

Bateson, Richard G., Princes Risborough, Bucks, England. Hygrometer. 1,903,617; Apr. 11.

Baule, Marie E. A., Chaville, France. Dynamometric log. 1,903,713; Apr. 11.

Beck, Leo L., Westfield, N. J., assignor, by mesne assignments, to General Tube Lights Corporation, New York, N. Y. White light tube. 1,903,494; Apr. 11.

Beck, Leo L., Westfield, N. J., assignor, by mesne assignments, to General Tube Lights Corporation, New York, N. Y. White light. 1,903,495; Apr. 11.

Beck, Leo L., Westfield, N. J., assignor, by mesne assignments, to General Tube Lights Corporation, New York, N. Y. Lighting system. 1,903,496; Apr. 11.

Beck, Leo L., Westfield, N. J., and A. E. Noble, Lynbrook, assignors, by mesne assignments, to General Tube Lights Corporation, New York, N. Y. Gas discharge light. 1,903,493; Apr. 11.

Belts, John S. (See Levin, N. D., and Belts.)

Bendel, Arthur F., Reading, Pa. Feeder and waterer. 1,903,742; Apr. 11.

Bensa, Felice. (See Pongratz, A., and Zinke, assignors.)

Bernhardt, Otto, Cassel-Wilhelmshohe, and E. Vormann, Cassel, Germany. Top member for fastening illuminating bodies to ceilings. 1,903,421; Apr. 11.

Bertin, Charles F. M. (See Marti, P. A. D., Bertin, and Nandillon.)

Bijur, Joseph, New York, N. Y., assignor to Auto Research Corporation. Lubricating installation and apparatus. 1,903,499; Apr. 11.

Birbeck, Francis V., Aromas, Calif. Crate. 1,903,560; Apr. 11.

Bjering, Helge, Buenos Aires, Argentina. Carburetor. 1,903,433; Apr. 11.

Black Clawson Company. (See Andrews, Henry J., assignor.)

Black & Decker Manufacturing Company, The. (See Preston, Henry C., assignor.)

Blair, Russell M. (See Jarvis, K. W., and Blair.)

Bogdany, Estanislao. (See Gaston, A., and Bogdany.)

Booth, William N., assignor to Kelsey-Hayes Wheel Corporation, Detroit, Mich. Vehicle wheel. 1,903,567; Apr. 11.

Bornmann, Carl A., assignor to Agfa Ansco Corporation, Binghamton, N. Y. Combined view finder and catch for cameras. 1,903,434; Apr. 11.

Bosch, Robert, Aktiengesellschaft. (See Allendorff, Fritz, assignor.)

Bosch, Robert, Aktiengesellschaft. (See Arnold, H., and Lutscher, assignors.)

Boyer, Frederick G. L., Dayton, Ohio. Air dashpot. 1,903,435; Apr. 11.

Briggs Manufacturing Company. (See Ross, Frederick N., assignor.)

Brintnall, Frank W., Detroit, Mich., assignor, by mesne assignments, to National Automotive Fibres, Inc., Wilmington, Del. Plait forming apparatus. 1,903,618; Apr. 11.

Brock, Jack F., Scio, Oreg. Automobile heater. 1,903,653; Apr. 11.

Brown, Edmund, Palmyra, N. J. Manufacture of pipe fittings. 1,903,436; Apr. 11.

Buchel, Jules, assignor of one-half to the Estate of C. Louque, one-twentieth to L. H. Rayner, and one-twentieth to J. F. Dupuy, New Orleans, La. Refrigerating device. 1,903,437; Apr. 11.

Bulls Eye Road Marker Company. (See Woolums, W. H., and Ambrose, assignors.)

Bunting Brass & Bronse Company, The. (See Yager, G. F., and Heath, assignors.)

Burney, Charles D., Westminster, England. Motor road vehicle. 1,903,693; Apr. 11.

Burney, Charles D., Westminster, England. Motor road vehicle. 1,903,694; Apr. 11.

Byerlein, Arthur A., Detroit, Mich., assignor to General Machinery Corporation, Hamilton, Ohio. Press. 1,903,438; Apr. 11.

Byfield, Ernest L., assignor to College Inn Food Products Company, Chicago, Ill. Dispensing container. Des. 89,601; Apr. 11.

Cain, John W., Chicago, Ill. Window wiper. 1,903,439; Apr. 11.

Calcott, William S., Penns Grove, F. B. Downing, Carneys Point, and D. H. Powers, Penns Grove, N. J., assignors to E. I. du Pont de Nemours & Company, Wilmington, Del. Synthetic rubber and its manufacture. 1,903,500; Apr. 11.

Calcott, William S., Penns Grove, N. J., A. S. Carter, Wilmington, Del., and F. B. Downing, Carneys Point, N. J., assignors to E. I. du Pont de Nemours & Company, Wilmington, Del. Hydrogenation of hydrocarbons. 1,903,501; Apr. 11.

Callsen, Jürgen, Wuppertal-Elberfeld, Germany, assignor to Winthrop Chemical Company, Inc., New York, N. Y. Manufacture of halogen alcohols. 1,903,587; Apr. 11.

Cambridge, Walter R., Fort Bidwell, Calif. Helicopter device. 1,903,440; Apr. 11.

Campbell, Charles A., Watertown, N. Y., assignor to The New York Air Brake Company. Air brake valve housing. 1,903,441; Apr. 11.
Campbell, Donald. (See Laboon, J. F., and Barns, assignors.)
Campbell, Malcolm D., Detroit, Mich. Optical perimeter. 1,903,502; Apr. 11.
Campbell, William S. (See Dugan, F. F., and Campbell.)
Canfield, Leo D., assignor to Superior Felt & Bedding Company, Chicago, Ill. Mattress. 1,903,619; Apr. 11.
Carbide & Carbon Chemicals Corporation. (See Cox, H. L., and Greer, assignors.)
Carroll, Alexander W. (See Alexander, H. H., and Carroll.)
Carter, Albert S. (See Calcott, W. S., Carter, and Downing.)
Carter, Russell, Washington, D. C. Cracking and distilling fuels. 1,903,749; Apr. 11.
Central Engineering & Sales Company. (See Uhri, William C., jr., assignor.)
Chamberlain, Alfred J., Milwaukee, Wis. Dispensing container. 1,903,442; Apr. 11.
Chance Brothers and Co. Limited. (See Spaink, Johann H. A., assignor.)
Chemische Fabrik Kalk Gesellschaft mit beschränkter Haftung. (See Oehme, Hermann, assignor.)
Cheney Brothers. (See Mouton, Paul, assignor.)
Cheru, Marcelo. (See Frias, P. J., Jones, and Cheru.)
Chobert, Jacques F. G., St.-Etienne, France. Adjustable turnbuckle. 1,903,695; Apr. 11.
Claude, Georges, Boulogne sur Seine, France, assignor to Claude Neon Lights, Inc., New York, N. Y. Luminescent tube. 1,903,492; Apr. 11.
Claude Neon Lights, Inc. (See Claude, Georges, assignor.)
Climax Motorenwerke und Schiffswerft Linz A. G. (See Mandler, Eugen, assignor.)
College Inn Food Products Company. (See Byfield, Ernest L., assignor.)
Columbus Dental Manufacturing Company, The. (See Gillespie, Robert H., assignor.)
Conn, Wallace T., Washington, D. C., assignor to the Government of the United States. Extracting oil and moisture from "fish press cake." 1,903,503; Apr. 11.
Container Corporation of America. (See Keller, Ira C., assignor.)
Continental Can Company. (See Kratz, Henry, assignor.)
Continental Divoo Company. (See Maurer, E. R., and Ferguson, assignors.)
Continental Motors Corporation. (See Meyer, Andre J., assignor.)
Cox, Henry L., South Charleston, and P. S. Greer, Charleston, W. Va., assignor to Carbide & Carbon Chemicals Corporation. Preservation of ethyl ether. 1,903,642; Apr. 11.
Cretcher, Leonard H. (See Karns, G. M., and Cretcher.)
Curle, Charles W., San Francisco, Calif. Combined slug gauge and thickness trimmer. 1,903,528; Apr. 11.
Curtis, Katheryn B. (See Partrick, M. H., and Curtis.)
Deck, Howard S., Dover, N. J. Apparatus for melting explosives. 1,903,504; Apr. 11.
Decker, George, assignor to The Philad Company, Cleveland, Ohio. Apparatus for hair waving. 1,903,743; Apr. 11.
Demag Aktiengesellschaft. (See Heetkamp, Heinrich, assignor.)
Dethier, Joseph, Brussels, Belgium. Regulator for winding on installations. 1,903,588; Apr. 11.
Deutsch, Hans, assignor to the Firm Alex Friedmann, Vienna, Austria. Preheater or economizer for locomotives. 1,903,696; Apr. 11.
Deutsch, Hans, assignor to Firm: Alex Friedmann, Vienna, Austria. Boiler feed apparatus with exhaust steam preheater. 1,903,697; Apr. 11.
Diamond Power Specialty Corporation. (See Snow, Norman L., assignor.)
Diamond Power Specialty Corporation. (See Snow, N. L., and Thomas, assignors.)
Dobson, William A., Bridgeport, Conn., assignor to Underwood Elliott Fisher Company, New York, N. Y. Typewriting machine. 1,903,505; Apr. 11.
Doering, Albert L., assignor to J. S. Thorn Company, Germantown, Pa. Roof deck. 1,903,543; Apr. 11.
Dolmage, Mihran M., Washington, D. C. Negative inductance. 1,903,610; Apr. 11.
Dotterweich, Andrew J., assignor to Automatic Water Softener Company, Pittsburgh, Pa. Water softening apparatus. 1,903,611; Apr. 11.
Dotterweich, Andrew J., assignor to Automatic Water Softener Company, Pittsburgh, Pa. Water softening apparatus. 1,903,612; Apr. 11.
Dotterweich, Andrew J., assignor to Automatic Water Softener Company, Pittsburgh, Pa. Water softening apparatus. 1,903,613; Apr. 11.
Dowald, Eugen, Wuppertal-Elberfeld, Germany. Spindle for wire covering machines. 1,903,698; Apr. 11.
Downing, Frederick B. (See Calcott, W. S., Carter, and Downing.)
Downing, Frederick B. (See Calcott, W. S., Downing, and Powers.)
Drzewiecki, Joseph, Detroit, Mich. Vehicle wheel and mounting therefor. 1,903,443; Apr. 11.
Dugan, Ferdinand F., and W. S. Campbell, Akron, Ohio. Display rack. Des. 89,585; Apr. 11.
Du Pont, E. I., de Nemours & Company. (See Calcott, W. S., Carter, and Downing, assignors.)
Du Pont, E. I., de Nemours & Company. (See Calcott, W. S., Downing, and Powers, assignors.)
Dupuy, Joseph F., et al. (See Buchek, Jules, assignor.)
Dux, Walter. (See Scheiber, Johannes, assignor.)
Earle, Theodore, Denver, Colo. Milling machine. 1,903,444; Apr. 11.
Edwards, William C., Battle Creek, Mich. Tire pressure responsive switch. 1,903,589; Apr. 11.
Ehresmann, Adam, and L. Streibel, Karlsruhe, Germany. Soling machine. 1,903,422; Apr. 11.
Ellen, Samuel. (See Zullig, Emil G., assignor.)
Elwell Parker Electric Company, The. (See Abbe, Edward J., assignor.)
Ernst, Clemens J., Minster, Ohio. Hose and pipe coupling. 1,903,445; Apr. 11.
Esslinger, Frederick J., Petroleum, Hubbard Township, Trumbull County, Ohio, assignor to The Petroleum Iron Works Co. of Ohio, Sharon, Pa. Weldrod coating. 1,903,620; Apr. 11.
Etablissements Ed. Jaeger. (See Planiol, René J. H., assignor.)
Evans Case Company. (See Lawrence, Cecil H., assignor.)
Farnsworth, Hiland R., assignor to The Paper & Textile Machinery Company, Sandusky, Ohio. Wire guide. 1,903,506; Apr. 11.
Favorite, William P., and H. A. Moler, Detroit, Mich. Traffic marker. Des. 89,606; Apr. 11.
Fehrle, Alfred. (See Streitwolf, K., Fehrle, and Herrmann.)
Ferguson, Donald M. (See Maurer, E. R., and Ferguson.)
Ferro Machine & Foundry Company, The. (See Hinz, Walter, assignor.)
Finch, Fred E., Reading, Pa. Count checking device for packaged coins. 1,903,621; Apr. 11.
Firestone, David, Canton, Ohio. Support for shade rollers and curtain and drapery rods. 1,903,728; Apr. 11.
Firth, David, assignor to Marvel Carburetor Company, Flint, Mich. Automatic control of exhaust gases for mixture heating. 1,903,446; Apr. 11.
Flintkote Corporation, The. (See Limburg, Hyman, assignor.)
Florman, Irving, New York, N. Y. Cigar lighter. 1,903,729; Apr. 11.
Fontaine, Eugene H., Pittsburgh, Pa. Machine for making chaplets and the like. 1,903,668; Apr. 11.
Forges & Ateliers de Constructions Electriques de Jeumont. (See Letrilliart, Pierre, assignor.)
Forgrove Machinery Company Limited, The, et al. (See Grover, Frederick, assignor.)
Foster, Claud H., Wickliffe, Ohio. Shock absorber. 1,903,423; Apr. 11.
Foster, Claud H., Wickliffe, Ohio. Shock absorber. 1,903,447; Apr. 11.
Frias, Pastor J., C. Jones, and M. Cheru, Buenos Aires, Argentina. System for the transmission of rotary motion. 1,903,714; Apr. 11.
Friedmann, Alex, the Firm. (See Deutsch, Hans, assignor.)
Frolander, Frank C., Elizabeth, N. J., assignor to Mergenthaler Linotype Company. Printing unit. 1,903,507; Apr. 11.
Furtney, John E., Detroit, Mich. Battery. 1,903,448; Apr. 11.
Garr, Joseph M., Calumet City, Ill., assignor to Peoples Voting Machine Corporation, Knox, Ind. Voting machine. 1,903,544; Apr. 11.
Gastón, Angela, and Estanislao Bogdány, Barcelona, Spain. Purification of lubricating oil. 1,903,731; Apr. 11.
Gath, Kenneth E., Harrisburg, Pa. Flight indicator. 1,903,449; Apr. 11.
General Aniline Works, Inc. (See Schweitzer, Hugo, assignor.)
General Machinery Corporation. (See Byerlein, Arthur A., assignor.)
General Tube Lights Corporation. (See Beck, Leo L., assignor.)
General Tube Lights Corporation. (See Beck, L. L., and Noble, assignors.)
Gifford-Wood Company. (See Peebles, Frank B., assignor.)
Gillespie, Robert H., Little Rock, Ark., assignor to The Columbus Dental Manufacturing Company, Columbus, Ohio. Divisible tooth. 1,903,730; Apr. 11.
Glass, Leo, Brooklyn, N. Y. Bracelet. Des. 89,586; Apr. 11.
Goldsbrough, Robert E., Slough, England. Production of benzines, benzenes, and other hydrocarbons from coal tars and oils. 1,903,568; Apr. 11.
Goodman, Leslie B., Port Arthur, Tex. Cigarette container. 1,903,450; Apr. 11.
Gordon, Le-Roy V., Cleveland, and L. L. Williams, Cleveland Heights, Ohio. Upholstery pad. 1,903,424; Apr. 11.
Gordon, Le-Roy V., Cleveland, Ohio. Padding guide for sewing machines. 1,903,425; Apr. 11.
Gottlieb, Joseph, Jersey City, N. J. Clock case. Des. 89,587; Apr. 11.
Government of the United States. (See Conn, Wallace T., assignor.)
Grant, John A., Atlanta, Ga. Headlight. 1,903,417; Apr. 11.
Greco, Alfredo, Zurich, assignor to Aktiengesellschaft Brown Boveri & Cie., Baden, Switzerland. Protective system for electric current rectifiers. 1,903,451; Apr. 11.

Greene, Curtis, San Diego, Calif. Yieldable door stop and catch. 1,903,669; Apr. 11.
Greer, Paul S. (See Cox, H. L., and Greer.)
Gresham, F. M. (See Robertson, Ivy B., assignor.)
Grimn, William M., assignor to Wayne Company, Fort Wayne, Ind. Fluid dispensing apparatus. Des. 89,588; Apr. 11.
Grimth, Earl G., Huntington Park, Calif. Box delivery device. 1,903,561; Apr. 11.
Grigsby-Grunow Company. (See Taylor, Joseph, assignor.)
Grison, Joseph, New York, N. Y. Air conditioning device. 1,903,452; Apr. 11.
Grover, Frederick, assignor to The Forgrove Machinery Company Limited, Leeds, and John Mackintosh & Sons Limited, Halifax, England. Mechanism for wrapping machines. 1,903,670; Apr. 11.
Groves, E. E., et al. (See Tatlock, Roberts, assignor.)
Gruman, Horace F., assignor to Lewis Invisible Stitch Machine Company, St. Louis, Mo. Stitch forming mechanism for sewing machines. 1,903,590; Apr. 11.
Grumbach, Louis J., et al., executors and trustees. (See Reckford, Louis J.)
Gunn, Earl G., Racine, Wis. Shock absorber. 1,903,453; Apr. 11.
Gyrorector G. m. b. H., the Firm. (See Stöhr, Erich, assignor.)
Hacket, Ralph P., Allentown, Pa. Attachment for sewing machines. 1,903,671; Apr. 11.
Haimbaugh, Raymond C., and A. F. Hoesel, assignors to Peerless Ice Machine Company, Chicago, Ill. Flooded type refrigeration unit. 1,903,591; Apr. 11.
Hampton, Alvah T., Coulee, Wash. Current motor. 1,903,545; Apr. 11.
Harris, De Witt C., Lakeland, Fla. Record carrying or memorandum device. 1,903,454; Apr. 11.
Hauge, Andrew, Michigan City, Ind., assignor to Sullivan Machinery Company. Loading machine. 1,903,672; Apr. 11.
Hauge, Andrew, Michigan City, Ind., assignor to Sullivan Machinery Company. Loading machine. 1,903,673; Apr. 11.
Hauge, Andrew, Michigan City, Ind., assignor to Sullivan Machinery Company. Coal loader. 1,903,674; Apr. 11.
Hauge, Andrew, Michigan City, Ind., assignor to Sullivan Machinery Company. Loading machine. 1,903,675; Apr. 11.
Heald Machine Company, The. (See Heald, R. N., and Taylor, assignors.)
Heald, Roger N., and E. M. Taylor, assignors to The Heald Machine Company, Worcester, Mass. Grinding machine. 1,903,562; Apr. 11.
Heath, Oliver J. (See Yager, G. F., and Heath.)
Heavey, Thomas J., U. S. Army, Fort Riley, Kans. Mounting for machine guns. 1,903,508; Apr. 11.
Heetkamp, Heinrich, assignor to Demag Aktiengesellschaft, Duisburg, Germany. Rolling mill for widening out tubes. 1,903,676; Apr. 11.
Heinrich, Walter A., St. Louis, Mo. Electric switch. 1,903,455; Apr. 11.
Heltzel, John N., Warren, Ohio. Concrete joint. 1,903,456; Apr. 11.
Henderson, William F., assignor to The Visking Corporation, Chicago, Ill. Producing cellulose articles. 1,903,622; Apr. 11.
Herrmann, Walter. (See Streitwolf, K., Fehrle, and Herrmann.)
Heusser, Julius, and L. Tulgren, Clear Lake, Wis. Card deck holder. 1,903,744; Apr. 11.
Heyer, Benjamin F. W., Belleville, N. J. Combined charging and testing apparatus and stock stand. Des. 89,589; Apr. 11.
Hinz, Walter, East Cleveland, assignor to The Ferro Machine & Foundry Company, Cleveland, Ohio. Valve. 1,903,426; Apr. 11.
Hoesel, Anthony F. (See Haimbaugh, R. C., and Hoesel.)
Hojda, Henry, Moravska-Ostrava, Czechoslovakia. Parachute. 1,903,563; Apr. 11.
Holmes, Morris P., Claremont, N. H., assignor to Sullivan Machinery Company. Drilling mechanism. 1,903,648; Apr. 11.
Holstein, Adolph M., Syracuse, N. Y. Frictionally securing two parts together. 1,903,457; Apr. 11.
Hookless Fastener Company. (See Perrault, Joseph E., assignor.)
Hookless Fastener Company. (See Smith, Roscoe J., assignor.)
Horn, Emil A., Jamaica, assignor to Russell & Stoll Company, Inc., New York, N. Y. Electrical connecter. 1,903,715; Apr. 11.
Howe, Walter S., Ontario, Calif. Garbage holder for sinks. 1,903,628; Apr. 11.
Howland, Herbert H., Jeffersonville, Ind. Combined electric lamp and picture frame. Des. 89,590; Apr. 11.
Hunt, Franklin B., assignor to The Liquid Carbonic Corporation, Chicago, Ill. Refrigerating system. Re18,795; Apr. 11.
Hurley, Roy T., Dobbs Ferry, assignor, by mesne assignments, to Moto Meter Gauge & Equipment Corporation, Long Island City, N. Y. Motor fuel. 1,903,624; Apr. 11.
Hutchison, Miller R., jr., East Orange, N. J., assignor to Pioneer Instrument Company, Incorporated, New York, N. Y. Logarithmic gearing. 1,903,677; Apr. 11.
Imperial Chemical Industries Limited. (See Smith, Christopher C., assignor.)
Inland Steel Company. (See Sykes, Wilfred, assignor.)
International Pavement Company, The. (See Morrison, Robert F., assignor.)
Iodine Educational Bureau, Inc. (See Karns, G. M., and Cretcher, assignors.)
Jacobsson, Fritz M., assignor to Telefonaktiebolaget L. M. Ericsson, Stockholm, Sweden. Integrating meter for graded measurements. 1,903,418; Apr. 11.
Jameson, Charles V., Chicago, Ill. Scalp treating device. 1,903,646; Apr. 11.
Jarvis, Kenneth W., Cincinnati, and E. M. Blair, Norwood, Ohio. Electron tube. 1,903,569; Apr. 11.
Jeffrey Manufacturing Company, The. (See Levin, Nils D., assignor.)
Jeffrey Manufacturing Company, The. (See Levin, N. D., and Belts, assignors.)
Jensen, Louis, assignor to United Autographic Register Co., Chicago, Ill. Duplicating machine. 1,903,625; Apr. 11.
Johansson, Carl A., Gottenborg, Sweden. Air operated vehicle control. 1,903,699; Apr. 11.
Johnsen, Finn, Fuur, Denmark. Remedy for combating plant diseases and for the protection of plants against attacks from fungi and insects. 1,903,626; Apr. 11.
Johnson, Frank L., Akron, Ohio. Collapsible core. 1,903,458; Apr. 11.
Johnsson, Emil T., Chicago, Ill. Controlling apparatus. 1,903,459; Apr. 11.
Jones, Clemente. (See Frias, P. J., Jones, and Cheru.)
Jones, Harry W., Webster Groves, Mo., assignor to Sanford Investment Company, Wilmington, Del. Railway car. 1,903,509; Apr. 11.
Jones, Walter L., East Tawas, Mich. Antiskid device. 1,903,460; Apr. 11.
Källe, Torsten, Saffe, Sweden. Moisture indicator for paper making machines and pulp collecting machines and in similar apparatus. 1,903,716; Apr. 11.
Karns, George M., and L. H. Cretcher, Pittsburgh, Pa., assignor to Iodine Educational Bureau, Inc. Disinfecting solution. 1,903,614; Apr. 11.
Kaufmann, Joseph, Cleveland, Ohio. Combined clearer, waxer, and tension device. 1,903,546; Apr. 11.
Keller, Adolph, St. Louis, Mo. Combination table top and rotatable tray. 1,903,419; Apr. 11.
Keller, Ira C., Winnetka, assignor, by mesne assignments, to Container Corporation of America, Chicago, Ill. Shipping and display box. 1,903,461; Apr. 11.
Kelly, William W., Cleveland Heights, Ohio, assignor to The Nut Products Company. Toasting and storage cabinet. 1,903,547; Apr. 11.
Kelsey-Hayes Wheel Corporation. (See Booth, William N., assignor.)
Klös, Heinrich. (See Mietzsch, F., and Klös.)
Knox, William A., Los Angeles, Calif. Headlight attachment for automobiles. 1,903,462; Apr. 11.
Koch, Frank, Sebewaing, Mich. Fish elevator. 1,903,627; assignor.)
Koch, Lydia B. (See Oliver, Ruth, assignor.)
Koch, William C., Cheviot, Ohio. Lighting fixture. 1,903,463; Apr. 11.
Konans, Herman J., Grantwood, N. J. Collapsible tube. 1,903,464; Apr. 11.
Koppitz, Carl G., and H. B. Massey, assignors to Railway and Industrial Engineering Company, Greensburg, Pa. Electric switch. 1,903,643; Apr. 11.
Kratz, Henry, Baltimore, Md., assignor to Continental Can Company, Inc., New York, N. Y. Sheet feeding device. 1,903,678; Apr. 11.
Kreis, Harry G., Cleveland, Ohio. Slide hammer. 1,903,548; Apr. 11.
Kremmling, Aribert, Hemersleben near Oschersleben, Germany. Apparatus for depositing plastic or semifluid substances. 1,903,570; Apr. 11.
Krieger, Ernest, Winnipeg, Manitoba, Canada. Pipe washing and cleanout pump. 1,903,735; Apr. 11.
Kruse, Hermann, Bremen-Sebaldsbruck, Germany. Nailing machine. 1,903,700; Apr. 11.
Kubista, Charles L., Le Sueur, Minn. Ink fountain or dip well. 1,903,465; Apr. 11.
Kurckchee, David, Schenectady, N. Y. Bed spring. 1,903,679; Apr. 11.
Laboon, John F., Pittsburgh, Pa., and F. B. Barns, New York; said Barns assignor to D. Campbell, New York, N. Y. Plant construction. 1,903,510; Apr. 11.
Lacell, Elisa, executrix. (See Lacell, Harold G.)
Lacell, Harold G., deceased; by Elisa Lacell, executrix, Finchley, London, England. Dehydration of Magnesium chloride. 1,903,592; Apr. 11.
Landrum, John P., assignor of one-half to P. R. McCormack, Birmingham, Ala. Airplane propeller. 1,903,628; Apr. 11.
Lange, Aage L., Copenhagen, Denmark. Heat consumption meter. 1,903,717; Apr. 11.
Lasster, John J., St. Albans, N. Y., assignor to George T. Ritchings, Maplewood, N. J. Nonreusable coupling. 1,903,736; Apr. 11.
Lawler, James J., Mount Vernon, N. Y. Automatic humidifying apparatus. 1,903,745; Apr. 11.
Lawrence, Cecil H., Attleboro, assignor to Evans Case Company, North Attleboro, Mass. Hand mirror. Des. 89,602; Apr. 11.
Leatherless Plunger Pump Corporation. (See Ruthven, Albert F., assignor.)
Lesage, Aaron D. (See Shreffler, E. O., and Lesage.)

Letrilliart, Pierre, assignor to Forges & Ateliers de Constructions Electriques de Jeumont, Paris, France. Alternating current generator. 1,903,680; Apr. 11.
Levin, Nils D., and J. S. Belts, assignors to The Jeffrey Manufacturing Company, Columbus, Ohio. Electric equipment for mining machines. 1,903,701; Apr. 11.
Levin, Nils D., assignor to The Jeffrey Manufacturing Company, Columbus, Ohio. Electrical control system for mining machinery. 1,903,702; Apr. 11.
Levin, Nils D., assignor to The Jeffrey Manufacturing Company, Columbus, Ohio. Electric equipment for mining machines. 1,903,703; Apr. 11.
Levin, Nils D., and J. S. Belts, assignor to The Jeffrey Manufacturing Company, Columbus, Ohio. Electric equipment for mining machines. 1,903,704; Apr. 11.
Lewis Invisible Stitch Machine Company. (See Gruman, Horace F., assignor.)
Limburg, Hyman, Amsterdam, Netherlands, assignor, by mesne assignments, to The Flintkote Corporation, Boston, Mass. Purifying sulphonic acids. 1,903,466; Apr. 11.)
Linn, Holman H., assignor to The Linn Manufacturing Corporation, Morris, N. Y. Vehicle brake. 1,903,629; Apr. 11.
Linn Manufacturing Corporation, The. (See Linn, Holman H., assignor.)
Liquid Carbonic Corporation, The. (See Hunt, Franklin B., assignor.)
Lively, James M., Gold Hill, Oreg. Smelting process and apparatus. 1,903,733; Apr. 11.
Locreille, Claude, Fauquez, Belgium. Process and apparatus for printing glass sheets. 1,903,718; Apr. 11.
Louque, Charles, Estate of, et al. (See Buchel, Jules, assignor.)
Lowitz, Frank. (See Richter, M. N., and Lowitz.)
Lutscher, Eugen. (See Arnold, H., and Lutscher.)
Luts, William H., San Francisco, Calif. Necktie support. 1,903,746; Apr. 11.
MacClatchie, John W., Compton, Calif. Protector for drill pipe and the like. 1,903,467; Apr. 11.
Mackintosh, John, & Sons Limited, et al. (See Grover, Frederick, assignor.)
Mandler, Eugen, assignor to the Firm Climax Motorenwerke und Schiffswerft Linz A. G., Vienna, Austria. Multicylinder internal combustion engine. 1,903,719; Apr. 11.
Manning, Joseph A., Pawtucket, R. I. Eye mounting for dolls. 1,903,549; Apr. 11.
Marti, Pierre, A D., Montbeliard, and C. F. M. Bertin, and A. E. G. Nandillon, Toulon, France. Emitting or receiving vibration device for submarine sounding. 1,903,720; Apr. 11.
Martin Brothers Electrical Company, The. (See Martin, Wendell L., assignor.)
Martin, Karl, Rathenow, Germany. Eyeglasses. 1,903,593; Apr. 11.
Martin, Wendell L., assignor to The Martin Brothers Electric Company, Cleveland, Ohio. Drier. 1,903,427; Apr. 11.
Marvel Carbureter Company. (See Firth, David, assignor.)
Massey, Hemsley B. (See Koppit Z, C. G., and Massey.)
Matt, Peter P., St. Louis, Mo. Shade sewing device. 1,903,468; Apr. 11.
Matter, Oskar, Cologne Marienburg, Germany. Preparing explosive charges. 1,903,594; Apr. 11.
Maurer, Edwin R., Detroit, and D. M. Ferguson, Highland Park, assignors, by mesne assignments, to Continental-Divco Company, Detroit, Mich. Drop center delivery vehicle. 1,903,529; Apr. 11.
McCarthy, John J., Malden, Mass. Engine. 1,903,511; Apr. 11.
McCormack, Perry R. (See Landrum, John P., assignor.)
McDougall Company. (See Miller, Leo L., assignor.)
McLaughlin, William I., Piedmont, and R. G. Wedemeyer, Palo Alto, said Wedemeyer assignor to Standard Oil Company of California, San Francisco, Calif. Instrument for recording inclination. 1,903,512; Apr. 11.
McManaman, Patrick J., Cleveland, Ohio. Electric switch. 1,903,428; Apr. 11.
McTwiggan, James N., U. S. Navy. Mercury contact switch. 1,903,513; Apr. 11.
Meader, Albert W., assignor of one-half to R. Mitchell, Detroit, Mich. Upholstery attaching device. 1,903,469; Apr. 11.
Mechling, William H., Whitemarsh, assignor to Atlantic Elevator Company, Philadelphia, Pa. Elevator braking system and actuating the same. 1,903,550; Apr. 11.
Meinderama, Wigger, Wassenaar, Netherlands. Fin propeller. 1,903,551; Apr. 11.
Mendel, William, Beverly, N. J. Making articles from celluloid and the like. 1,903,530; Apr. 11.
Merchant, Paul W., Port Arthur, Tex. Mixing device. 1,903,429; Apr. 11.
Mergenthaler Linotype Company. (See Frolander, Frank C., assignor.)
Merliss, Reuben, Detroit, Mich. Syringe. 1,930,681; Apr. 11.
Merriman, Henry H., Kalamazoo and F. W. Piché, Detroit, Mich. Wrench. 1,903,514; Apr. 11.
Merritt, Andrew J., Walseburg, Colo. Crate. 1,903,722; Apr. 11.
Meston, Archibald F., Middlesex, N. J., assignor to Research Corporation, New York, N. Y. Concentrated field precipitator. 1,903,644; Apr. 11.
Meyer, Andre J., assignor to Continental Motors Corporation, Detroit, Mich. Internal combustion engine. 1,903,531; Apr. 11.
Meyer, Andre J., assignor to Continental Motors Corporation, Detroit, Mich. Engine. 1,903,532; Apr. 11.
Meyer, Friedrich W., Vienna, Austria. Chain guiding device for portable motor tree saws. 1,903,571; Apr. 11.
Mietzsch, Fritz and H. Klöe, Elberfeld, Germany, assignors to Winthrop Chemical Company, Inc., New York, N. Y. Making 8-hydroxyquinoline compounds. 1,903,470; Apr. 11.
Miller, Leo L., assignor to McDougall Company, Frankfort, Ind. Kitchen cabinet. 89,591; Apr. 11.
Milnes, Albert V., West New Brighton, N. Y. Burial vault. 1,903,747; Apr. 11.
Minor, John C., New Canaan, Conn., assignor to William Wharton, Jr., & Company, Incorporated, Easton, Pa. Manufacture of gas cylinders. 1,903,630; Apr. 11.
Mitchell, Robert. (See Meader, Albert W., assignor.)
Moler, Harry A. (See Favorite, W. P., and Moler.)
Monroe, William S., Chicago, Ill. Boiler. 1,903,515; Apr. 11.
Moore, Emma E., Warren, Ohio. Pie sealer. 1,903,682; Apr. 11.
Moorhouse, Alfred, assignor to Packard Motor Car Company, Detroit, Mich. Motor vehicle. 1,903,595; Apr. 11.
Moorhouse, Alfred, assignor to Packard Motor Car Company, Detroit, Mich. Internal combustion engine. 1,903,607; Apr. 11.
Morrison, Alfred J., Denver, Colo. Collapsible table. 1,903,631; Apr. 11.
Morrison, Robert F., Yonkers, assignor to The International Pavement Company, New York, N. Y. Apparatus for and method of treating asphalt blocks. 1,903,741; Apr. 11.
Moscato, Francis, Central Park, N. Y. Safety switch. 1,903,737; Apr. 11.
Moto Meter Gauge & Equipment Corporation. (See Hurley, Roy T., assignor.)
Motor Products Corporation. (See Pritchard, William S., assignor.)
Mouton, Jacques, administrator. (See Mouton, Paul.)
Mouton, Paul, deceased, by J. Mouton, administrator, Paris, France, assignor to Cheney Brothers, New York, N. Y. Textile fabric. Des. 89,603; Apr. 11.
Mouton, Paul, deceased, by J. Mouton, administrator, Paris, France, assignor to Cheney Brothers, New York, N. Y. Textile fabric. Des. 89,604; Apr. 11.
Mueller, William N., Fredericksburg, Iowa. Air forcing apparatus for air furnaces. 1,903,552; Apr. 11.
Munn Corporation, The. (See Munn, Elvin R., assignor.)
Munn, Elvin R., Humansville, Mo., assignor to The Munn Corporation. Pump. 1,903,721; Apr. 11.
Munro, Alfred J., et al. (See Stocks, Harry B., assignor.)
Munson, Harry, Wantagh, assignor to Van Kannel Revolving Door Company, New York, N. Y. Silencer and regulator. 1,903,738; Apr. 11.
Murphy, Mortimer T., Imlay, Nev. Fluid heat exchange system. 1,903,471; Apr. 11.
Naamlooze Vennootschap; Vennootschap tot Exploitatie van Strijk-en Persmachine Octrooien (V. E. S. P. O.) (See Tol, Hermanus F., assignor.)
Nandillon, Albert E. G. (See Marti, P. A. D., Bertin, and Nandillon.)
National Automotive Fibres, Inc. (See Brintnall, Frank W., assignor.)
Nerger, Hans J., assignor to The Schwarzenbach Huber Co., New York, N. Y. Textile fabric or the like. Des. 89,592; Apr. 11.
New York Air Brake Company, The. (See Campbell, Charles A., assignor.)
Nikaido, Yasujuro, Bay City, Mich. Production of carbon of high activity and covering power. 1,903,705; Apr. 11.
Noble, Aubrey E. (See Beck, L. L., and Noble.)
Nut Products Company, The. (See Kelly, William W., assignor.)
Nute, George A., Sommerville, assignor of one-half to David H. Young, Willimansett, Mass. Pedestal for traffic signals or the like. 1,903,683; Apr. 11.
O. & S. Bearing Co. (See Skillman, Newton, assignor.)
O'Brien Varnish Company. (See Reece, Floyd M., assignor.)
Oehme, Hermann, Cologne, assignor to Chemische Fabrik Kalk Gesellschaft mit beschränkter Haftung, Cologne-Kalk, Germany. Extraction of ethylene glycol or its homologues. 1,903,472; Apr. 11.
Oestricher, Henry G., Los Angeles, Calif. Voltage amplifier. 1,903,654; Apr. 11.
Older, Clifford, Wilmette, Ill. Expansion joint, method and apparatus for the installation of the same. 1,903,608; Apr. 11.
Oliver, Ruth, assignor to L. B. Koch, New York, N. Y. Paper container. 1,903,632; Apr. 11.
Olson, Samuel, & Company. (See Olson, Samuel, assignor.)
Olson, Samuel, Oak Park, assignor to Samuel Olson & Company, Inc., Chicago, Ill. Remote control conveyer switching system. 1,903,473; Apr. 11.
Oppenheim, Charles, Chicago, Ill. Watchcase. Des. 89,593; Apr. 11.

Osgood, Charles F., Claremont, N. H., assignor to Sullivan Machinery Company. Mining apparatus. 1,903,649; Apr. 11.
Packard Motor Car Company. (See Moorhouse, Alfred, assignor.)
Packard Motor Car Company. (See Vincent, Jesse G., assignor.)
Page, Albert E., Brooklyn, assignor to Scott & Williams, Incorporated, New York, N. Y. Knitted fabric. 1,903,706; Apr. 11.
Palazzo, Fortunato. (See Palazzo, Francesco C. and F.)
Palazzo, Francesco C. and F., Florence, Italy. Simultaneous production of precipitated dicalcium phosphate and nitrates. 1,903,684; Apr. 11.
Palmer, Frank C., West Palm Beach, Fla. Mechanical friction brake ensemble. 1,903,723; Apr. 11.
Paper & Textile Company, The. (See Farnsworth, Hiland R., assignor.)
Parel, Karl, assignor to Telephon- und Telegraphenfabriks-A. G. Kapsch U. Söhne, Vienna, Austria. Telephone. 1,903,707; Apr. 11.
Parkin, Theodore D., et al. (See Stocks, Harry B., assignor.)
Parsons Paper Company. (See Perkins, Lester C., assignor.)
Partrick, Marion H., and K. B. Curtis, Tampa, Fla. Shredding palmetto and product produced thereby. 1,903,553; Apr. 11.
Peebles, Frank B., assignor to Gifford-Wood Company, Hudson, N. Y. Gate. 1,903,633; Apr. 11.
Peerless Ice Machine Company. (See Haimbaugh, R. C., and Hoesel, assignors.)
Peoples Voting Machine Corporation. (See Garr, Joseph M., assignor.)
Perkins, Lester C., assignor to Parsons Paper Company, Holyoke, Mass. Making paper. 1,903,655; Apr. 11.
Perrault, Joseph E., Watertown, Mass., assignor, by mesne assignments, to Hookless Fastener Company. Manipulating multiple fasteners. Re18,793; Apr. 11.
Petroleum Iron Works Co. of Ohio, The. (See Esslinger, Frederick J., assignor.)
Philad Company, The. (See Decker, George, assignor.)
Phillips Petroleum Company. (See Turner, Barry F., assignor.)
Piché, Frank W. (See Merriman, H. H., and Piché.)
Pioneer Instrument Company. (See Hutchinson, Miller R., jr., assignor.)
Planiol, René J. H., Paris assignor to Etablissements Ed. Jaeger, Levallois-Perret, France. Speed indicator. 1,903,685; Apr. 11.
Pongratz, Alfred, and A. Zinke, Graz, Austria, assignors to Felice Bensa, Genoa, Italy. Manufacturing vat dyestuffs of the perylene series. 1,903,708; Apr. 11.
Poston, George R., et al. (See Tatlock, Roberts, assignor.)
Powers, Donald H. (See Calcott, W. S., Downing, and Powers.)
Preston, Henry C., Baltimore County, assignor to The Black & Decker Manufacturing Company, Towson, Md. Valve seat reamer sleeve. 1,903,533; Apr. 11.
Pritchard, William S., assignor to Motor Products Corporation, Detroit, Mich. Lubricating system. 1,903,554; Apr. 11.
Railway and Industrial Engineering Company. (See Koppitz, C. G., and Massey, assignors.)
Rayner, Lester H., et al. (See Buchel, Jules, assignor.)
Reckford, John K., et al., executors and trustees. (See Reckford, Louis J.)
Reckford, Louis J., deceased, New York, N. Y.; L. K. Reckford, J. K. Reckford, and L. J. Grumbach, executors and trustees, assignors to American Lead Pencil Company, Hoboken, N. J. Eraser attachment for lead pencils. 1,903,474; Apr. 11.
Reckford, Louise K., et al., executors and trustees. (See Reckford, Louis J.)
Reece, Floyd M., assignor to O'Brien Varnish Company, South Bend, Ind. Nondrying oil and product thereof. 1,903,656; Apr. 11.
Reece, Floyd M., assignor to O'Brien Varnish Company, South Bend, Ind. Treatment of china wood oil to produce a liquid ungelled oil and product thereof. 1,903,686; Apr. 11.
Reed, William L., Miami, Fla. Cartridge. 1,903,657; Apr. 11.
Renault, Louis. (See Saives, Léon, assignor.)
Research Corporation. (See Meston, Archibald F., assignor.)
Research Corporation. (See Wintermute, Harry A., assignor.)
Revis, Solomon N., assignor to V. E. Revis, Ashland, Nebr. Corn sheller. 1,903,516; Apr. 11.
Revis, Vernon E. (See Revis, Solomon N., assignor.)
Rhodes, Charles J., Wakefield, England. Press for drawing sheet metal. 1,903,475; Apr. 11.
Richards, Curtis H., San Francisco, Calif. Convertible sled and wheeled coaster. 1,903,596; Apr. 11.
Richter, Maurice N., and F. Lowitz, New York, N. Y. Calendar mechanism. 1,903,430; Apr. 11.
Rime, Gilbert A., Northwood, N. Dak. Wind driven electric power plant. 1,903,534; Apr. 11.
Ritchings, George T. (See Lauster, John J., assignor.)
Roberson, Willard D., New York, N. Y. Textile fabric or the like. Des. 89,594; Apr. 11.
Robertson, Ivy B., assignor of one-half to F. M. Gresham, Charlotte, N. C. Pump. 1,903,555; Apr. 11.
Robinson, Robert T., Penetanguishene, Ontario, Canada. Grate. 1,903,634; Apr. 11.
Roebel, Ludwig, Mannheim, Germany, assignor to Aktiengesellschaft Brown, Boveri & Cie., Baden, Switzerland. Circuit-breaking apparatus. 1,903,476; Apr. 11.
Roesner, Gerhard. (See von Grisewald, C. B., Weidmann, and Roesner.)
Rohn, Wilhelm, Hanau-on-the-Main, Germany. Multihigh rolling mechanism. 1,903,724; Apr. 11.
Rolfson, Maude M., Portland, Oreg. Electric oven. 1,903,477; Apr. 11.
Ross, Frederick N., assignor, by mesne assignments, to Briggs Manufacturing Company, Detroit, Mich. Adjustable main conveyer. 1,903,478; Apr. 11.
Rumohr, Ernest C., Seattle, Wash. Tree sawing device. 1,903,479; Apr. 11.
Russell & Stoll Company. (See Horn, Emil A., assignor.)
Ruth Company, The. (See Ruth, Joseph P., jr., assignor.)
Ruth, Joseph P., jr., assignor to The Ruth Company, Denver, Colo. Cell construction for flotation machines. 1,903,517; Apr. 11.
Ruthven, Albert F., assignor to Leatherless Plunger Pump Corporation, Amarillo, Tex. Reciprocating pump. Re18,791; Apr. 11.
Ruwoldt, Johann A. L., Kewell, Victoria, Australia. Air cleaner for internal combustion engines. 1,903,597; Apr. 11.
Ryan, Herbert E., Clayton, Mo. Game apparatus. 1,903,480; Apr. 11.
Ryder, Frank P., Niagara Falls, N. Y. Pea threshing machine. 1,903,658; Apr. 11.
Saives, Léon, assignor to L. Renault, Billancourt, France. Operating locomotives having internal combustion engines. 1,903,635; Apr. 11.
Sanford Investment Company. (See Jones, Harry W., assignor.)
Schacht, Clifford A., Huntington, Ind. Sliding caster. 1,903,687; Apr. 11.
Schacht, Clifford A., Huntington, Ind. Sliding caster. 1,903,688; Apr. 11.
Schacht, Clifford A., Huntington, Ind. Sliding caster. 1,903,689; Apr. 11.
Schacht, Clifford A., Huntington, Ind. Sliding caster cup. 1,903,690; Apr. 11.
Schelber, Johannes, Leipzig, assignor to Walter Dux, Hanover, Germany. Shellac substitute. 1,903,598; Apr. 11.
Schoen, Murk J., Zaandam, Netherlands. Tightening composition. 1,903,709; Apr. 11.
Schröder, Johannes N., Leeuwarden, Netherlands. Machine for working, molding, and shaping dough. 1,903,572; Apr. 11.
Schultze, Willi, Halle-on-the-Saale, Germany. Distillation process. 1,903,573; Apr. 11.
Schwarzenbach Huber Co. (See Nerger, Hans J., assignor.)
Schweisthal, Fred G., assignor to Stewart-Warner Corporation. Chicago, Ill. Engine-operated pump. 1,903,481; Apr. 11.
Schweitzer, Hugo, Leverkusen-Wiesdorf, Germany, assignor to General Aniline Works, Inc., New York, N. Y. Monoazodyestuffs. 1,903,599; Apr. 11.
Schweitzer, Hugo, Leverkusen-Wiesdorf, Germany, assignor to General Aniline Works, Inc., New York, N. Y. Azo dyestuffs. 1,903,600; Apr. 11.
Schweizer, Jack, assignor to William Willheim Co., Inc., New York, N. Y. Textile fabric or similar article. Des. 89,595; Apr. 11.
Scott, George T., Los Angeles, Calif. Cash drawer alarm device. 1,903,535; Apr. 11.
Scott & Williams, Incorporated. (See Page, Albert E., assignor.)
Senseney, Harvey G., jr., Florence, S. C. Portable road sign. 1,903,482; Apr. 11.
Shaffner, Samuel C., Chicago, Ill. Washing machine. 1,903,564; Apr. 11.
Shakespeare Company. (See Shakespeare, William, jr., assignor.)
Shakespeare, William, jr., assignor to Shakespeare Company, Kalamazoo, Mich. Fishing reel. 1,903,559; Apr. 11.
Shoemaker, Alvin H., Seattle, Wash. Automobile tire. 1,903,574; Apr. 11.
Shoemaker, Alvin H., Seattle, Wash. Radial cord pneumatic tire. 1,903,575; Apr. 11.
Shreffler, Elwyne O., and A. D. Lesage, Manteno, Ill. Vacuum controlled clutch and brake operating mechanism. 1,903,556; Apr. 11.
Simmons, John A. (See Simmons, Joseph W. and J. A.)
Simmons, Joseph W. and J. A., Salisbury, N. C. Stone saw. 1,903,518; Apr. 11.
Skeel, Lewis, and J. A. Spohr, Meadville, Pa. Floating tool. 1,903,576; Apr. 11.
Skelly Oil Company. (See Watkins, Walter G., assignor.)
Skillman, Newton, Highland Park, assignor to O. & S. Bearing Co., Detroit, Mich. Shaft mounting. 1,903,483; Apr. 11.
Skinner, Fred B., Coffeyville, Kans. Stretcher. 1,903,536; Apr. 11.
Smetko, Michael, Cicero, assignor to The Art Institute of Chicago, Chicago, Ill. Display cabinet. 1,903,484; Apr. 11.
Smith, Christopher C., Norton-on-Tees, assignor to Imperial Chemical Industries Limited, London, England. Production of solid calcium nitrate. 1,903,636; Apr. 11.
Smith, Edmund O. (See Winther, William A., assignor.)

Smith, George W., jr., assignor to The White Motor Company, Cleveland, Ohio. Internal combustion engine. 1,903,485; Apr. 11.
Smith, James H. (See Smith, Joseph B. and J. H.)
Smith, Joseph B. and J. H., Emporium, Pa. Wrench. 1,903,660; Apr. 11.
Smith, Roscoe J., Glen Ridge, N. J., assignor to Hookless Fastener Company. Machine and method for applying fastener elements. 1,903,659; Apr. 11.
Smolko, Matthew, Chicago, Ill. Iron stand. 1,903,601; Apr. 11.
Snider, Guido, Milan, Italy. Apparatus for the commercial preparation of coffee beverages. 1,903,519; Apr. 11.
Snow, Norman L., assignor to Diamond Power Specialty Corporation, Detroit, Mich. Boiler cleaner. 1,903,486; Apr. 11.
Snow, Norman L., New Canaan, Conn., and W. P. Thomas, assignors to Diamond Power Specialty Corporation, Detroit, Mich. Blower for air heaters. 1,903,650; Apr. 11.
Snyder, Jay C., Toledo, Ohio. Sound recording and reproducing apparatus. 1,903,487; Apr. 11.
Soreng, Edgar M., assignor to Soreng-Manegold Company, Chicago, Ill. Portable water softener. Des. 89,596; Apr. 11.
Soreng-Manegold Company. (See Soreng, Edgar M., assignor.)
Spaink, Johann H. A., assignor to Chance Brothers and Co. Limited, West Smethwick, England. Automatic electric current generating apparatus. 1,903,712; Apr. 11.
Spohr, John A. (See Skeel, L., and Spohr.)
Standard Oil Company of California. (See McLaughlin, W. I., and Wedemeyer, assignors.)
Steel-Bound Container Corporation. (See Warren, Harold M., assignor.)
Stewart-Warner Corporation. (See Schweisthal, Fred G., assignor.)
Stibbs, Harry, Philadelphia, Pa. Conveyer system. 1,903,488; Apr. 11.
Stocks, Harry B., South Tottenham, assignor to A. J. Munro and T. D. Parkin, London, England. Reproduction of sounds. 1,903,637; Apr. 11.
Stöhr, Erich, assignor to the Firm Gyrorector G. m. b. H., Berlin, Germany. Gyroscopically stabilized pendulum. 1,903,710; Apr. 11.
Storey, William H., Southend-on-Sea, England. Appliance for playing games. 1,903,661; Apr. 11.
Strasberger, Max J., Brooklyn, N. Y. Combination indicator and score keeping device for bridge games or similar article of manufacture. Des. 89,597; Apr. 11.
Streibel, Ludwig. (See Ehresmann, A., and Streibel.)
Streitwolf, Karl, Frankfort-on-the-Main, A. Fehrle, Bad Soden on Taunus, and W. Herrmann, Frankfort-on-the-Main, Germany, assignors to Winthrop Chemical Company, Inc., New York, N. Y. Benzimidazolone-stibonic acids. 1,903,602; Apr. 11.
Streitwolf, Karl, Frankfort-on-the-Main, A. Fehrle, Bad Soden on Taunus, and W. Herrmann, Frankfort-on-the-Main, Germany, assignors to Winthrop Chemical Company, Inc., New York, N. Y. Crotonyl-aminobenzene-arsonic acids and salts thereof. 1,903,645; Apr. 11.
Struever, Henry, Faulkton, S. Dak. Pick-up for combine harvesters. 1,903,577; Apr. 11.
Stukes, Horace A., San Antonio, Tex. Fuel feeding tank. Des. 89,598; Apr. 11.
Sturgis, Charles E., assignor of one-half to W. P. Andrus, Rochester, N. Y. Abrading brush. 1,903,520; Apr. 11.
Sullivan Machinery Company (See Hauge, Andrew, assignor.)
Sullivan Machinery Company. (See Holmes, Morris P., assignor.)
Sullivan Machinery Company. (See Osgood, Charles F., assignor.)
Sullivan, Theodore G., Rutherford, N. J. Making of rubber coloring material. 1,903,578; Apr. 11.
Superior Felt & Bedding Company. (See Canfield, Leo D., assignor.)
Sutliffe, Frank C., San Francisco, Calif. Illuminated sign. 1,903,537; Apr. 11.
Sweeney Bros. (See Sweeney, James T., assignor.)
Sweeney, James T., assignor to Sweeney Bros., Scranton, Pa. Road guard. 1,903,725; Apr. 11.
Swoyer, Fred, Silver Grove, Ky. Spike and nail extractor. 1,903,557; Apr. 11.
Sykes, Wilfred, assignor to Inland Steel Company, Chicago, Ill. Stretching machine. 1,903,638; Apr. 11.
Taggart, James M., Port Washington, N. Y. Furnace. 1,903,521; Apr. 11.
Taplin, Harold J., Wembley, London, England. Transfer press. 1,903,689; Apr. 11.
Tatlock, Roberts, assignor to E. E. Groves and George R. Poston, Gastonia, N. C. Depressible traffic signal. 1,903,739; Apr. 11.
Taylor, Edward M. (See Heald, R. N., and Taylor.)
Taylor, Joseph, assignor to Grigsby-Grunow Company, Chicago, Ill. Radiocabinet. Des. 89,599; Apr. 11.
Taylor, Rolland W., Remus, Mich. Artificial bait. 1,903,558; Apr. 11.
Taylor, William F. F., Norfolk, Va. Coin controlled chair and canopy. 1,903,579; Apr. 11.
Telefonaktiebolaget L. M. Ericsson. (See Jacobsson, Fritz M., assignor.)
Telephon- und Telegraphenfabriks-A. G. Kapsch U. Söhne. (See Parel, Karl, assignor.)
Thirlwell, Thomas W., St. Albans, W. Va. Automatic switch. 1,903,580; Apr. 11.
Thorn, J. S., Company. (See Doering, Albert L., assignor.)
Thorsen, Karl K. A., San Francisco, Calif. Tire vulcanizing machine. 1,903,538; Apr. 11.
Tol, Hermanus F., assignor to Naamlooze Vennootschap: Vennootschap tot Exploitatie van Strijk-en Persmachine Octrooien (V. E. S. P. O.) The Hague, Netherlands. Ironing machine. 1,903,691; Apr. 11.
Toledo Metal Furniture Company, The. (See Uhl, Clement R., assignor.)
Towt, Charles W., Lindsay, Calif., assignor to C. W. Towt and D. G. Towt, as trustees of The Charles Warren Towt Holding Company. Apparatus for preventing frost damage to vegetation. 1,903,615; Apr. 11.
Towt, Donald G., trustee. (See Towt, Charles W., assignor.)
Tulgren, Lester. (See Heusser, J., and Tulgren.)
Turner, Barry F., Holdenville, assignor to Phillips Petroleum Company, Bartlesville, Okla. Valve lock and housing. 1,903,581; Apr. 11.
Uhl, Clement R., assignor to The Toledo Metal Furniture Company, Toledo, Ohio. Glider for furniture legs. 1,903,609; Apr. 11.
Uhri, William C., jr., assignor to Central Engineering & Sales Company, St. Louis, Mo. Apparatus for producing a stream of atomized liquid. 1,903,522; Apr. 11.
Underwood Elliott Fisher Company. (See Dobson, William A., assignor.)
Union Bag & Paper Corporation. (See Avery, True M., assignor.)
United Autographic Register Co. (See Jensen, Louis, assignor.)
Usher, David T., deceased, Mountairy, N. C.; G. B. Usher administratrix. Fruit and vegetable container. 1,903,647; Apr. 11.
Usher, Geraldine B., administratrix. (See Usher, David T.)
Van Alstine, Bonnie E., San Francisco, Calif. Copy and book holder. 1,903,523; Apr. 11.
Van Kannel Revolving Door Company. (See Munson, Harry, assignor.)
Vartanian, Frank D., Portland, Me. Support for telephone head-sets. 1,903,565; Apr. 11.
Vincent, Jesse G., assignor to Packard Motor Car Company, Detroit, Mich. Internal combustion engine. 1,903,603; Apr. 11.
Visking Corporation, The. (See Henderson, William F., assignor.)
Vogt, Rudolph. (See Walter, J. C., and Vogt.)
Von Girsewald, Conway B., H. Weidmann, and G. Roesner, Frankfort-on-the-Main, Germany, assignors to American Lurgi Corporation, New York, N. Y. Production of alkali phosphates from metal phosphorus compounds. 1,903,582; Apr. 11.
Vormann, Ernst. (See Bernhardt, O., and Vormann.)
Wagenhorst, James H., Detroit, Mich. Rim end connecting device. 1,903,566; Apr. 11.
Walter, John C., and R. Vogt, Cincinnati, assignors to The Alvey-Ferguson Company, Oakley, Cincinnati, Ohio. Conveyer. 1,903,782; Apr. 11.
Warner, Edward, Union City, N. J. Implement for playing the game of cat. 1,903,539; Apr. 11.
Warren, Charles W., Towt Holding Company, The. (See Towt, Charles W., assignor.)
Warren, Harold M., assignor to Steel-Bound Container Corporation, St. Petersburg, Fla. Container. Re18,792; Apr. 11.
Watkins, Walter G., assignor to Skelly Oil Company, El Dorado, Kans. Method and apparatus for producing fixed carbureted air gas. 1,903,583; Apr. 11.
Wayne Company. (See Griffin, William M., assignor.)
Webb, Samuel N., Johnstown, Pa., assignor to Roy Withers. Directional signal. 1,903,692; Apr. 11.
Webster, Henry L., assignor to Wm. Wrigley Jr. Company, Chicago, Ill. Package mailing card. 1,903,540; Apr. 11.
Webster, Robert A., Santa Monica, Calif. Hardness testing device. 1,903,524; Apr. 11.
Wedemeyer, Rupert G. (See McLaughlin, W. I., and Wedemeyer.)
Weidmann, Hans. (See Von Girsewald, C. B., Weidmann, and Roesner.)
Weitzman, Morris A., Chicago, Ill. Hat cleaning machine. 1,903,489; Apr. 11.
Wendel, Reinhold M., Hafverud, assignor to Aktiebolaget Papyrus, Molndal, Sweden. Manufacture of duplex or multiplex paper with different appearance on various spots. 1,903,711; Apr. 11.
Wettengel, George A., St. Louis, Mo. Automobile theft device. 1,903,584; Apr. 11.
Wharton, William, Jr., & Company. (See Minor, John C., assignor.)
Wheeler, Albert M., Catlettsburg, Ky. Blade sharpener. 1,903,651; Apr. 11.
Wheeler, Henry L., jr., executor. (See Alexander, H. H., and Carroll.)
White Motor Company, The. (See Smith, George W., jr., assignor.)
Whitlow, John B., Lexington, Ky. Transmission mechanism. 1,903,662; Apr. 11.
Wiegand, Edwin L., Pittsburgh, Pa. Forming electrical heating elements. 1,903,604; Apr. 11.

Willheim, William, New York, N. Y. Textile fabric or similar article. Des. 89,605; Apr. 11.
Willheim, William, Co. (See Schweizer, Jack, assignor.)
Williams, Leo L. (See Gordon, Le-R. V., and Williams.)
Wilms, Gustav O., assignor, by mesne assignments, to Allen-Bradley Company, Milwaukee, Wis. Motor protective apparatus. 1,903,491; Apr. 11.
Wilson, Samantha A., Bell, Calif. Ice cream freezer. 1,903,652; Apr. 11.
Wintermute, Harry A., Plainfield, N. J., assignor to Research Corporation, New York, N. Y. Electrical precipitator. 1,903,640; Apr. 11.
Winther, William A., assignor to Edmund P. Smith, Menominee, Mich. Stencil printing device. 1,903,740; Apr. 11.
Winthrop Chemical Company, Inc. (See Callsen, Jürgen, assignor.)
Winthrop Chemical Company, Inc. (See Mietzsch, F., and Klös, assignors.)
Winthrop Chemical Company, Inc. (See Streitwolf, K., Fehrle, and Herrmann, assignors.)
Wise, Leslie M., McKeesport, Pa. Automatic feed control for carbide generators. 1,903,726; Apr. 11.
Withers, Roy. (See Webb, Samuel N., assignor.)
Wood, Cyrus B., Takoma Park, D. C. Bleaching compound. 1,903,525; Apr. 11.
Woodings, Emanuel, Oakmont, assignor to Woodings-Verona Tool Works, Verona, Pa. Splice bar. Re18,794; Apr. 11.
Woodings-Verona Tool Works. (See Woodings, Emanuel, assignor.)
Woolums, William H., and C. B. Ambrose; said Ambrose assignor to Bulls Eye Road Marker Company, Washington, D. C. Road marker. 1,903,748; Apr. 11.
Wrigley, Wm., Jr. Company. (See Webster, Henry L., assignor.)
Yager, George F., and O. J. Heath, assignors to The Bunting Brass & Bronze Company, Toledo, Ohio. Sprue forming and table locking mechanism. 1,903,616; Apr. 11.
Young, David H. (See Nute, George A., assignor.)
Yutts, Ralph, Miami, Fla. Fabric duster. 1,903,663; Apr. 11.
Yutts, Ralph, Miami, Fla. Duster and handle. 1,903,664; Apr. 11.
Zinke, Alois. (See Pongratz, A., and Zinke.)
Zullig, Emil G., Bergenfield, N. J., assignor to S. Ellen, New York, N. Y. Embroidered textile fabric trimmings. Des. 89,600; Apr. 11.

LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 11TH DAY OF APRIL, 1933

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). Includes patents, reissues, and designs.

Acids and salts thereof, Crotonyl-aminobenzene-arsonic. K. Streitwolf, A. Fehrle and W. Herrmann. 1,903,645; Apr. 11.
Acids, Benzimidazolone-stibonic. K. Streitwolf, A. Fehrle, and W. Herrmann. 1,903,602; Apr. 11.
Acids, Purifying sulphonic. H. Limburg. 1,903,466; Apr. 11.
Air cleaner for internal combustion engines. J. A. L. Ruwoldt. 1,903,597; Apr. 11.
Air conditioning device. J. Grison. 1,903,452; Apr. 11.
Air forcing apparatus for air furnaces. W. N. Mueller. 1,903,552; Apr. 11.
Airplane propeller. J. P. Landrum. 1,903,628; Apr. 11.
Alarm device, Cash drawer. G. T. Scott. 1,903,535; Apr. 11.
Alcohols, Manufacture of halogen. J. Callsen. 1,903,587; Apr. 11.
Alkali phosphates from metal phosphorus compound, Production of. C. B. von Girsewald, H. Weidmann, and G. Roesner. 1,903,582; Apr. 11.
Amplifier, Audion. A. W. Barber. 1,903,542; Apr. 11.
Antiskid device. W. L. Jones. 1,903,460; Apr. 11
Appliance for playing games. W. H. Storey. 1,903,661; Apr. 11.
Articles from celluloid and the like, Making. W. Mendel. 1,903,530; Apr. 11.
Asphalt blocks, Apparatus for and method of treating. R. F. Morrison. 1,903,741; Apr. 11.
Automatic switch. T. W. Thirlwell. 1,903,580; Apr. 11.
Automobile heater. J. F. Brock. 1,903,653; Apr. 11.
Automobile theft device. G. A. Wettengel. 1,903,584; Apr. 11.
Bag: *See*—
  Moisture-proof covered bag.
Bait, Artificial. R. W. Taylor. 1,903,558; Apr. 11.
Bar: *See*—
  Splice bar.
Battery. J. E. Furtney. 1,903,448; Apr. 11.
Bed spring. D. Kurkchee. 1,903,679; Apr. 11.
Benzines, benzenes, and other hydrocarbons from coal tars and oils. R. E. Goldsbrough. 1,903,568; Apr. 11.
Bleaching compound. C. B. Wood. 1,903,525; Apr. 11.
Blower for air heaters. N. L. Snow and W. P. Thomas. 1,903,650; Apr. 11.
Boiler. W. S. Monroe. 1,903,515; Apr. 11.
Boiler cleaner. N. L. Snow. 1,903,486; Apr. 11.
Boiler feed apparatus with exhaust steam preheater. H. Deutsch. 1,903,697; Apr. 11.
Box: *See*—
  Shipping and display box.
Box delivery device. E. G. Griffith. 1,903,561; Apr. 11.
Bracelet. L. Glass. Des. 89,586; Apr. 11.
Brake: *See*—
  Vehicle brake.
Brake ensemble, Mechanical friction. F. C. Palmer. 1,903,723; Apr. 11.
Brush, Abrading. C. E. Sturgis. 1,903,520; Apr. 11.
Cabinet, Display. M. Smetko. 1,903,484; Apr. 11.
Cabinet, Kitchen. L. L. Miller. Des. 89,591; Apr. 11.
Cabinet, Toasting and storage. W. W. Kelly. 1,903,547; Apr. 11.
Calcium nitrate, Production of solid. C. C. Smith. 1,903,636; Apr. 11.
Calendar mechanism. M. N. Richter and F. Lowitz. 1,903,430; Apr. 11.
Cameras, Combined view finder and catch for. C. A. Bornmann. 1,903,434; Apr. 11.
Car, Railway. H. W. Jones. 1,903,509; Apr. 11.
Carbon of high activity and covering power, Production of. Y. Nikaido. 1,903,705; Apr. 11.
Carburetor. H. Bjering. 1,903,433; Apr. 11.
Card deck holder. J. Heusser and L. Tulgren. 1,903,744; Apr. 11.
Card, Package mailing. H. L. Webster. 1,903,540; Apr. 11.
Cartridge. W. L. Reed. 1,803,657; Apr. 11.
Caster cup, Sliding. C. A. Schacht. 1,903,690; Apr. 11.
Caster, Sliding. C. A. Schacht. 1,903,687-9; Apr. 11.
Celloconstruction for flotation machines. J. P. Ruth, jr. 1,903,517; Apr. 11.
Cellulose articles, Producing. W. F. Henderson. 1,903,622; Apr. 11.
Chain guiding device for portable motor tree saws. F. W. Meyer. 1,903,571; Apr. 11.
Chair and canopy, Coin controlled. W. F. Taylor. 1,903,579; Apr. 11.
Charging and testing apparatus and stock stand, Combined. B. F. W. Heyer. Des. 89,589; Apr. 11.
Cigarette container. L. B. Goodman. 1,903,450; Apr. 11.
Circuit-breaking apparatus. L. Roebel. 1,903,476; Apr. 11.

Cleaner: *See*—
  Boiler cleaner.
Clearer, waxer, and tension device, Combined. J. Kaufmann. 1,903,546; Apr. 11.
Clock case. J. Gottlieb. Des. 89,587; Apr. 11.
Clutch and brake operating mechanism, Vacuum controlled. E. O. Shreffler and A. D. Lesage. 1,903,556; Apr. 11.
Coal loader. A. Hauge. 1,903,674; Apr. 11.
Coffee beverages, Apparatus for the commercial preparation of. G. Snider. 1,903,519; Apr. 11.
Collapsible table. A. J. Morrison. 1,903,631; Apr. 11.
Collapsible tube. H. J. Konanz. 1,903,464; Apr. 11.
Coloring material, Making of rubber. T. G. Sullivan 1,903,578; Apr. 11.
Concrete joint. J. N. Heltzel. 1,903,456; Apr. 11.
Connecter: *See*—
  Electrical connecter.
Container: *See*—
  Cigarette container. Paper container.
  Dispensing container.
  Fruit and vegetable container.
Container. H. M. Warren. Re18,792; Apr. 11.
Control of exhaust gases for mixture heating, Automatic. D. Firth. 1,903,446; Apr. 11.
Controlling apparatus. E. T. Johnsson. 1,903,459; Apr. 11.
Conveyer. J. C. Walter and R. Vogt. 1,903,732; Apr. 11.
Conveyer, Adjustable main. F. N. Ross. 1,903,478; Apr. 11.
Conveyer switching system, Remote control. S. Olson. 1,903,473; Apr. 11.
Conveyer system. H. Stibbs. 1,903,488; Apr. 11.
Copper, Metallurgy of. H. H. Alexander and A. W. Carroll. 1,903,497; Apr. 11.
Copy and book holder. B. E. Van Alstine. 1,903,523; Apr. 11.
Core, Collapsible. F. L. Johnson. 1,903,458; Apr. 11.
Count checking device for packaged coins. F. E. Finch. 1,903,621; Apr. 11.
Coupling: *See*—
  Hose and pipe coupling. Nonreusable coupling.
Crate. F. V. Birbeck. 1,903,560; Apr. 11.
Crate. A. J. Merritt. 1,903,722; Apr. 11.
Current generating apparatus, Automatic electric. J. H. A. Spaink. 1,903,712; Apr. 11.
Current generator, Alternating. P. Letrilliart. 1,903,680; Apr. 11.
Current motor. A. T. Hampton. 1,903,545; Apr. 11.
Cylinders, Manufacture of gas. J. C. Minor. 1,903,630; Apr. 11.
Dashpot, Air. F. G. L. Boyer. 1,903,435; Apr. 11.
Direction signal. S. N. Webb. 1,903,692; Apr. 11.
Disinfecting solution. G. M. Karns and L. H. Cretcher. 1,903,614; Apr. 11.
Dispensing container. E. L. Byfield. Des. 89,601; Apr. 11.
Dispensing container. A. J. Chamberlain. 1,903,442; Apr. 11.
Display rack. F. F. Dugan and W. S. Campbell. Des. 89,585; Apr. 11.
Distillation process. W. Schultze. 1,903,573; Apr. 11.
Drier. W. L. Martin. 1,903,427; Apr. 11.
Drilling mechanism. M. P. Holmes. 1,903,648; Apr. 11.
Duplicating machine. L. Jensen. 1,903,625; Apr. 11.
Duster and handle. R. Yutts. 1,903,664; Apr. 11.
Duster, Fabric. R. Yutts. 1,903,663; Apr. 11.
Dyestuffs, Azo. H. Schweitzer. 1,903,600; Apr. 11.
Dyestuffs of the perylene series, Manufacturing vat. A. Pongratz and A. Zinke. 1,903,708; Apr. 11.
8-hydroxyquinoline compounds, Making. F. Mietzsch and H. Klös. 1,903,470; Apr. 11.
Electric equipment for mining machines. N. D. Levin and J. S. Beltz. 1,903,701; Apr. 11.
Electric equipment for mining machines. N. D. Levin. 1,903,703; Apr. 11.
Electric equipment for mining machines. N. D. Levin and J. S. Beltz. 1,903,704; Apr. 11.
Electric switch. W. A. Heinrich. 1,903,455; Apr. 11.
Electric switch. C. G. Koppitz and H. B. Massey. 1,903,643; Apr. 11.
Electric switch. P. J. McManaman. 1,903,428; Apr. 11.
Electrical connecter. E. A. Horn. 1,903,715; Apr. 11.
Electrical control system for mining machinery. N. D. Levin. 1,903,702; Apr. 11.
Electrical heating elements, Forming. E. L. Wiegand. 1,903,604; Apr. 11.
Electrical precipitator. H. A. Wintermute. 1,903,640; Apr. 11.
Electron tube. K. W. Jarvis and R. M. Blair. 1,903,569; Apr. 11.

Elevator: *See*—
  Fish elevator.
Elevator braking system and actuating the same. W. H. Mechling. 1,903,550; Apr. 11.
Engine: *See*—
  Internal combustion engine.
Engine. J. J. McCarthy. 1,903,511; Apr. 11.
Engine. A. J. Meyer. 1,903,532; Apr. 11.
Engine-operated pump. F. G. Schweisthal. 1,903,481; Apr. 11.
Eraser attachment for lead pencils. L. J. Reckford. 1,903,474; Apr. 11.
Ethyl ether, Preservation of. H. L. Cox and P. S. Greer. 1,903,642; Apr. 11.
Explosive charges, Preparing. O. Matter. 1,903,594; Apr. 11.
Explosives, Apparatus for melting. H. S. Deck. 1,903,504; Apr. 11.
Extractor: *See*—
  Spike and nail extractor.
Eye mounting for dolls. J. A. Manning. 1,903,549; Apr. 11.
Eyeglasses. K. Martin. 1,903,593; Apr. 11.
Fabric: *See*—
  Knitted fabric.
Fabrics by means of a circulating bath, Device for treating. J. Annicq. 1,903,585; Apr. 11.
Fasteners, Manipulating multiple. J. E. Perrault. Re18,793; Apr. 11.
Feed control for carbide generators, Automatic. L. M. Wise. 1,903,726; Apr. 11.
Feeder and waterer. A. F. Bendel. 1,903,742; Apr. 11.
Field precipitator, Concentrated. A. F. Meston. 1,903,644; Apr. 11.
Fin propeller. W. Meindersma. 1,903,551; Apr. 11.
Fish elevator. F. Koch. 1,903,627; Apr. 11
Fishing reel. W. Shakespeare, jr. 1,903,559; Apr. 11.
Flight indicator. K. E. Gath. 1,903,449; Apr. 11.
Floating tool. L. Skeel and J. A. Spohr. 1,903,576; Apr. 11.
Fluid dispensing apparatus. W. M. Griffin. Des. 89,588; Apr. 11.
Freezer, Ice cream. S. A. Wilson. 1,903,652; Aug. 11.
Frost damage to vegetation, Apparatus for preventing. C. W. Towt. 1,903,615; Apr. 11.
Fruit and vegetable container. D. T. Usher. 1,903,647; Apr. 11.
Fuel feeding tank. H. A. Stukes. Des. 89,598; Apr. 11.
Fuel, Motor. R. T. Hurley. 1,903,624; Apr. 11.
Fuels, Cracking and distilling. R. Carter. 1,903,749; Apr. 11.
Furnace. J. M. Taggart. 1,903,521; Apr. 11.
Game apparatus. H. E. Ryan. 1,903,480; Apr. 11.
Gas discharge light. L. L. Beck and A. E. Noble. 1,903,493; Apr. 11.
Gas, Method and apparatus for producing fixed carbureted air. W. G. Watkins. 1,903,583; Apr. 11.
Gate. F. B. Peebles. 1,903,633; Apr. 11.
Gauge and thickness trimmer, Combined slug. C. W. Curle. 1,903,528; Apr. 11.
Gearing, Logarithmic. M. R. Hutchison, jr. 1,903,677; Apr. 11.
Generator: *See*—
  Current generator.
Glass sheets, Process and apparatus for printing. C. Locreille. 1,903,718; Apr. 11.
Glider for furniture legs. C. R. Uhl. 1,903,609; Apr. 11.
Glycol or its homologues, Extraction of ethylene. H. Oehme. 1,903,472; Apr. 11.
Grate. R. T. Robinson. 1,903,634; Apr. 11.
Grinding machine. R. N. Heald and E. M. Taylor. 1,903,562; Apr. 11.
Guard, Road. J. T. Sweeney. 1,903,725; Apr. 11.
Hair waving, Apparatus for. G. Decker. 1,903,743; Apr. 11.
Hammer, Slide. H. G. Kreis. 1,903,548; Apr. 11.
Hardness testing device. R. A. Webster. 1,903,524; Apr. 11.
Harvesters, Pickup for combine. H. Struever. 1,903,577; Apr. 11.
Hat cleaning machine. M. A. Weitzman. 1,903,489; Apr. 11.
Headlight. J. A. Grant. 1,903,417; Apr. 11.
Headlight attachment for automobiles. W. A. Knox. 1,903,462; Apr. 11.
Heat consumption meter. A. L. Lange. 1,903,717; Apr. 11.
Heat exchange system, Fluid. M. T. Murphy. 1,903,471; Apr. 11.
Heater: *See*—
  Automobile heater.
Helicopter device. W. R. Cambridge. 1,903,440; Apr. 11.
Holder: *See*—
  Card deck holder. Copy and book holder.
Holder for sinks, Garbage. W. S. Howe. 1,903,623; Apr. 11.
Hose and pipe coupling. C. J. Ernst. 1,903,445; Apr. 11.
Housing, Air brake valve. C. A. Campbell. 1,903,441; Apr. 11.
Humidifying apparatus, Automatic. J. J. Lawler. 1,903,745; Apr. 11.
Hydrocarbons, Hydrogenation of. W. S. Calcott, A. S. Carter, and F. B. Downing. 1,903,501; Apr. 11.
Hygrometer. R. G. Bateson. 1,903,617; Apr. 11.
Illuminated sign. F. C. Sutliffe. 1,903,537; Apr. 11.
Implement for playing the game of cat. E. Warner. 1,903,539; Apr. 11.
Indicator: *See*—
  Flight indicator. Speed indicator.
Indicator and score keeping device for bridge games or similar article of manufacture, Combination. M. J. Strasberger. Des. 89,597; Apr. 11.
Ink fountain or dip well. C. L. Kubista. 1,903,465; Apr. 11.
Instrument for recording inclination. W. I. McLaughlin and R. G. Wedemeyer. 1,903,512; Apr. 11.
Internal combustion engine. A. J. Meyer. 1,903,531; Apr. 11.
Internal combustion engine. A. Moorhouse. 1,903,607; Apr. 11.
Internal combustion engine. G. W. Smith, jr. 1,903,485; Apr. 11.
Internal combustion engine. J. G. Vincent. 1,903,608; Apr. 11.
Internal combustion engine, Multicylinder. E. Mandler. 1,903,719; Apr. 11.
Interrupter for ignition devices. F. Allendorff. 1,903,641; Apr. 11.
Iron stand. M. Smolko. 1,903,601; Apr. 11.
Ironing machine. H. F. Tol. 1,903,691; Apr. 11.
Joint: *See*—
  Concrete joint.
Joint, method and apparatus for the installation of the same, Expansion. C. Older. 1,903,608; Apr. 11.
Knitted fabric. A. E. Page. 1,903,706; Apr. 11.
Lamp and picture frame, Combined electric. H. H. Howland. Des. 89,590; Apr. 11.
Leaf turner. E. Bartels. 1,903,727; Apr. 11.
Light: *See*—
  Gas discharge light. White light.
Lighter, Cigar. I. Florman. 1,903,729; Apr. 11.
Lighting fixture. W. C. Koch. 1,903,463; Apr. 11.
Lighting system. L. L. Beck. 1,903,496; Apr. 11.
Liquid, Apparatus for producing a stream of atomised. W. C. Uhri, jr. 1,903,522; Apr. 11.
Loading machine. A. Hauge. 1,903,672; Apr. 11.
Loading machine. A. Hauge. 1,903,673; Apr. 11.
Loading machine. A. Hauge. 1,903,675; Apr. 11.
Locomotives having internal combustion engines, Operating. L. Saives. 1,903,635; Apr. 11.
Log, Dynamometric. M. E. A. Baule. 1,903,718; Apr. 11.
Lubricating installation and apparatus. J. Bijur. 1,903,499; Apr. 11.
Lubricating system. W. S. Pritchard. 1,903,554; Apr. 11.
Luminescent tube. G. Claude. 1,903,492; Apr. 11.
Machine and method for applying fastener elements. R. J. Smith. 1,903,659; Apr. 11.
Machine for making chaplets and the like. E. H. Fontaine. 1,903,668; Apr. 11.
Machine for working, molding, and shaping dough. J. N. Schröder. 1,903,572; Apr. 11.
Magnesium chloride, Dehydration of. H. G. Lacell. 1,903,592; Apr. 11.
Marker, Road. W. H. Woolums and C. B. Ambrose. 1,903,748; Apr. 11.
Marker, Traffic. W. P. Favorite and H. A. Moler. Des. 89,606; Apr. 11.
Mattress. L. D. Canfield 1,903,619; Apr 11.
Mercury contact switch. J. N. McTwiggan. 1,903,513; Apr. 11.
Meter: *See*—
  Heat consumption meter.
Meter for graded measurements, Integrating. F. M. Jacobsson. 1,903,418; Apr. 11.
Mill for widening out tools, Rolling. H. Heetkamp. 1,903,676; Apr. 11.
Milling machine. T. Earle. 1,903,444; Apr. 11.
Mining apparatus. C. F. Osgood. 1,903,649; Apr. 11.
Mirror, Hand. C. H. Lawrence. Des. 89,602; Apr. 11.
Mixing device. P. W. Merchant. 1,903,429; Apr. 11.
Moisture indicator for paper making machines and pulp collecting machines and in similar apparatus. T. Kille. 1,903,716; Apr. 11.
Moisture-proof covered bag. T. M. Avery. 1,803,666; Apr. 11.
Monoazodyestuffs. H. Schweitzer. 1,903,599; Apr. 11.
Motor: *See*—
  Current motor.
Motor protective apparatus. G. O. Wilms. 1,903,491; Apr. 11.
Mounting for machine guns. T. J. Heavey. 1,903,506; Apr. 11.
Mounting, Shaft. N. Skillman. 1,903,483; Apr. 11.
Multihigh rolling mechanism. W. Rohn. 1,903,724; Apr. 11.
Nailing machine. H. Kruse. 1,903,700; Apr. 11.
Necktie support. W. H. Lutz. 1,903,746; Apr. 11.
Negative inductance. M. M. Dolmage. 1,903,610; Apr. 11.
Nonreusable coupling. J. J. Lauster. 1,903,736; Apr. 11.
Nozzle or faucet, Automatic. W. D. Allen. 1,903,605; Apr. 11.
Oil and moisture from "fish press cake", Extracting. W. T. Conn. 1,903,503; Apr. 11.
Oil and product thereof, Nondrying. F. M. Reece. 1,903,656; Apr. 11.
Oil, Purification of lubricating. A. Gastón and E. Bogdány. 1,903,731; Apr. 11.

Oil to produce a liquid ungelled oil and product thereof, Treatment of China wood. F. M. Reece. 1,903,686; Apr. 11.
Optical perimeter. M. D. Campbell. 1,903,502; Apr. 11.
Oven, Electric. M. M. Rolfson. 1,903,477; Apr. 11.
Pad: *See*—
Upholstery pad.
Palmetto and poduct produced thereby, Shredding. M. H. Partrick and K. B. Curtis. 1,903,553; Apr. 11.
Paper container. R. Oliver. 1,903,632; Apr. 11.
Paper making. L. C. Perkins. 1,903,655; Apr. 11.
Paper stock, Apparatus for reducing. H. J. Andrews. 1,903,526; Apr. 11.
Paper with different appearance on various spots, Manufacture of duplex or multiplex. R. M. Wendel. 1,903,711; Apr. 11.
Parachute. H. Hojda. 1,903,563; Apr. 11.
Pea threshing machine. F. P. Ryder. 1,903,658; Apr. 11.
Pedestal for traffic signals or the like. G. A. Nute. 1,903,683; Apr. 11.
Pendulum, Gyroscopically stabilized. E. Stöhr. 1,903,710; Apr. 11.
Phosphate and nitrates, Simultaneous production of precipitated dicalcium. F. C. and F. Palazzo. 1,903,684; Apr. 11.
Pie sealer. E. E. Moore. 1,903,682; Apr. 11.
Pipe fittings, Manufacture of. E. Brown. 1,903,436; Apr. 11.
Pipe washing and clean out pump. E. Krieger. 1,903,735; Apr. 11.
Plait forming apparatus. F. W. Brintnall. 1,903,618; Apr. 11.
Plant construction. J. F. Laboon and F. B. Barns. 1,903,510; Apr. 11.
Plastic or semi-fluid substances, Apparatus for depositing. A. Kremmling. 1,903,570; Apr. 11.
Power plant, Wind driven electric. G. A. Rime. 1,903,534; Apr. 11.
Preheater or economizer for locomotives. H. Deutsch. 1,903,696; Apr. 11.
Press: *See*—
Transfer press.
Press. A. A. Byerlein. 1,903,438; Apr. 11.
Press for drawing sheet metal. C. J. Rhodes. 1,903,475; Apr. 11.
Printing unit. F. C. Frolander. 1,903,507; Apr. 11.
Protective system for electric current rectifiers. A. Greco. 1,903,451; Apr. 11.
Protector for drill pipe and the like. J. W. MacClatchie. 1,903,467; Apr. 11.
Pump: *See*—
Engine-operated pump. Rotary pump.
Pipe washing and cleaning pump.
Pump. E. R. Munn. 1,903,721; Apr. 11.
Pump. I. B. Robertson. 1,903,555; Apr. 11.
Radiocabinet. J. Taylor. Des. 89,599; Apr. 11.
Radio receiving and transmitting apparatus. H. W. Adey. 1,903,665; Apr. 11.
Radio receiving system. A. Badma. 1,903,420; Apr. 11.
Reciprocating pump. A. F. Ruthven. Re18,791; Apr. 11.
Record carrying or memorandum device. D. C. Harris. 1,903,454; Apr. 11.
Reel: *See*—
Fishing reel.
Refrigerating device. J. Buchel. 1,903,437; Apr. 11.
Refrigerating system. F. B. Hunt. Re18,795; Apr. 11.
Refrigeration unit, Flooded type. R. C. Haimbaugh and A. F. Hoesel. 1,903,591; Apr. 11.
Regulator for winding on installations. J. Dethier. 1,903,588; Apr. 11.
Remedy for combating plant diseases and for the protection of plants against attacks from fungi and insects. F. Johnsen. 1,903,626; Apr. 11.
Rim end connecting device. J. H. Wagenhorst. 1,903,566; Apr. 11.
Road sign, Portable. H. G. Senseney, jr. 1,903,482; Apr. 11.
Roof deck. A. L. Doering. 1,903,548; Apr. 11.
Rotary motion, System for the transmission of. P. J. Frias, C. Jones, and M. Cheru. 1,903,714; Apr. 11.
Rotary pump. C. E. Anderson. 1,903,606; Apr. 11.
Rubber and its manufacture, Synthetic. W. S. Calcott, F. B. Downing, and D. H. Powers. 1,903,500; Apr. 11.
Safety switch. F. Moscato. 1,903,737; Apr. 11.
Saw, Stone. J. W. and J. A. Simmons. 1,903,518; Apr. 11.
Scalp treating device. C. V. Jameson. 1,903,646; Apr. 11.
Securing two parts together, Frictionally. A. M. Holstein. 1,903,457; Apr. 11.
Sewing machines, Attachment for. R. P. Hacket. 1,903,671; Apr. 11.
Sewing machines, Padding guide for. Le-R. V. Gordon. 1,903,425; Apr. 11.
Sewing machines, Stitch forming mechanism for. H. F. Gruman. 1,903,590; Apr. 11.
Shade sewing device. P. P. Matt. 1,903,468; Apr. 11.
Sharpener, Blade. A. M. Wheeler. 1,903,651; Apr. 11.
Sheet feeding device. H. Kratz. 1,903,678; Apr. 11.
Shellac substitute. J. Scheiber. 1,903,598; Apr. 11.
Sheller, Corn. S. N. Revis. 1,903,516; Apr. 11.
Shipping and display box. I. C. Keller. 1,903,461; Apr. 11.
Shock absorber. C. H. Foster. 1,903,423; Apr. 11.
Shock absorber. C. H. Foster. 1,903,447; Apr. 11.
Shock absorber. E. G. Gunn. 1,903,453; Apr. 11.
Sign: *See*—
Illuminated sign. Road sign.
Signal: *See*—
Direction signal. Traffic signal.
Silencer and regulator. H. Munson. 1,903,738; Apr. 11.
Sled and wheeled coaster, Convertible. C. H. Richards. 1,903,596; Apr. 11.
Smelting process and apparatus. J. M. Lively. 1,903,733; Apr. 11.
Soling machine. A. Ehresmann and L. Streibel. 1,903,422; Apr. 11.
Sound recording and reproducing apparatus. J. C. Snyder. 1,903,487; Apr. 11.
Sound, Reproduction of. H. B. Stocks. 1,903,637; Apr. 11.
Speed indicator. R. J. H. Planiol. 1,903,685; Apr. 11.
Spike and nail extractor. F. Swoyer. 1,903,557; Apr. 11.
Spindle for wire covering machines. E. Dowald. 1,903,698; Apr. 11.
Splice bar. E. Woodings. Re18,794; Apr. 11.
Spring: *See*—
Bed spring.
Sprue forming and table locking mechanism. G. F. Yager and O. J. Heath. 1,903,616; Apr. 11.
Stand: *See*—
Iron stand.
Stencil printing device. W. A. Winther. 1,903,740; Apr. 11.
Stop and catch, Yieldable door. C. Greene. 1,903,669; Apr. 11.
Straining and pulp making machine. W. B. Barnhisel. 1,903,527; Apr. 11.
Stretcher. F. B. Skinner. 1,903,536; Apr. 11.
Stretching machine. W. Sykes. 1,903,638; Apr. 11.
Support: *See*—
Necktie support.
Support for shade rollers and curtain and drapery rods. D. Firestone. 1,903,728; Apr. 11.
Support for telephone head-sets. F. D. Vartanian. 1,903,565; Apr. 11.
Switch: *See*—
Automatic switch. Mercury contact switch.
Electric switch. Safety switch.
Tire pressure responsive switch.
Switch control means for vehicle lamps. H. Arnold and E. Lutscher. 1,903,586; Apr. 11.
Syringe. R. Merliss. 1,903,681; Apr. 11.
Table: *See*—
Collapsible table.
Table top and rotatable tray, Combination. A. Keller. 1,903,419; Apr. 11.
Telephone. K. Parel. 1,903,707; Apr. 11.
Textile fabric. P. Mouton. Des. 89,603–4; Apr. 11.
Textile fabric or similar article. J. Schweizer. Des. 89,595; Apr. 11.
Textile fabric or similar article. W. Willheim. Des. 89,605; Apr. 11.
Textile fabric or the like. H. J. Nerger. Des. 89,592; Apr. 11.
Textile fabric or the like. W. D. Roberson. Des. 89,594; Apr. 11.
Textile fabric trimming, Embroidered. E. G. Zulling. Des. 89,600; Apr. 11.
Thermometer, Surgical. K. Akashi. 1,903,432; Apr. 11.
Tightening composition. M. J. Schoen. 1,903,709; Apr. 11.
Tire, Automobile. A. H. Shoemaker. 1,903,574; Apr. 11.
Tire pressure responsive switch. W. C. Edwards. 1,903,589; Apr. 11.
Tire, Radial cord pneumatic. A. H. Shoemaker. 1,903,575; Apr. 11.
Tire vulcanizing machine. K. K. A. Thorsen. 1,903,538; Apr. 11.
Tool: *See*—
Floating tool.
Tooth, Divisible. R. H. Gillespie. 1,903,730; Apr. 11.
Top member for fastening illuminating bodies to ceilings. O. Bernhardt and E. Vormann. 1,903,421; Apr. 11.
Traffic signal, Depressible. R. Tatlock. 1,903,739; Apr. 11.
Transfer press. H. J. Taplin. 1,903,639; Apr. 11.
Transmission mechanism. J. B. Whitlow. 1,903,662; Apr. 11.
Trap-shooting apparatus or layout. C. E. Band. 1,903,667; Apr. 11.
Tray, Transparent covered. T. M. Avery. 1,903,734; Apr. 11.
Tree sawing device. E. C. Rumohr. 1,903,479; Apr. 11.
Truck, Industrial. E. J. Abbe. 1,903,431; Apr. 11.
Tube: *See*—
Collapsible tube. Luminescent tube.
Electron tube. White light tube.
Turnbuckle, Adjustable. J. F. G. Chobert. 1,903,695; Apr. 11.
Typewriting machine. W. A. Dobson. 1,903,505; Apr. 11.
Upholstery attaching device. A. W. Meader. 1,903,469; Apr. 11.
Upholstery pad. Le-R. V. Gordon and L. L. Williams. 1,903,424; Apr. 11.
Valve. W. Hinz. 1,903,426; Apr. 11.
Valve lock and housing. B. F. Turner. 1,903,581; Apr. 11.

Valve seat reamer sleeve. H. C. Preston. 1,903,533; Apr. 11.
Vault, Burial. A. V. Milnes. 1,903,747; Apr. 11.
Vehicle brake. H. H. Linn. 1,903,629; Apr. 11.
Vehicle control, Air operated. C. A. Johansson. 1,903,699; Apr. 11.
Vehicle, Drop center delivery. E. R. Maurer and D. M. Ferguson. 1,903,529; Apr. 11.
Vehicle, Motor. A. Moorhouse. 1,903,595; Apr. 11.
Vehicle, Motor road. C. D. Burney. 1,903,693; Apr. 11.
Vehicle, Motor road. C. D. Burney. 1,903,694; Apr. 11.
Vehicle wheel. W. N. Booth. 1,903,567; Apr. 11.
Vibration device for submarine sounding, Emitting or receiving. P. A. D. Marti, C. F. M. Bertin and A. E. G. Nandillon. 1,903,720; Apr. 11.
Voltage amplifier. H. G. Oestricher. 1,903,654; Apr. 11.
Volting machine. J. M. Garr. 1,903,544; Apr. 11.
Washing machine. S. C. Shaffner. 1,903,564; Apr. 11.
Watchcase. C. Oppenheim. Des. 89,593; Apr. 11.
Water softener, Portable. E. M. Soreng. Des. 89,596; Apr. 11.
Water softening apparatus. A. J. Dotterweich. 1,903,611–13; Apr. 11.
Weldrod coating. F. J. Esslinger. 1,903,620; Apr. 11.
Welting, Making. W. G. Barbour. 1,903,498; Apr. 11.
Wheel: *See*—
Vehicle wheel.
Wheel and mounting therefor, Vehicle. J. Drzewiecki. 1,903,443; Apr. 11.
White light. L. L. Beck. 1,903,495; Apr. 11.
White light tube. L. L. Beck. 1,903,494; Apr. 11.
Window glass channel. D. C. Bailey. 1,903,541; Apr. 11.
Wiper, Window. J. W. Cain. 1,903,439; Apr. 11.
Wire guide. H. R. Farnsworth. 1,903,506; Apr. 11.
Wrapping machines, Mechanism for. F. Grover. 1,903,670; Apr. 11.
Wrench. H. H. Merriman and F. W. Piche. 1,903,514; Apr. 11.
Wrench. J. B. and J. H. Smith. 1,903,660; Apr. 11.

CLASSIFICATION OF PATENTS

ISSUED APRIL 11, 1933

NOTE.—First number—class, second number—subclass, third number—patent number

1— 15: 1,903,700
4— 190: 1,903,623
256: 1,903,735
5— 82: 1,903,536
202: 1,903,679
351: 1,903,619
8— 2: 1,903,525
18: 1,903,555
10— 156: 1,903,668
12— 146: 1,903,498
15— 200: 1,903,520
225: 1,903,663
226: 1,903,664
251: 1,903,439
16— 42: 1,903,609
1,903,687
1,903,688
1,903,689
18— 18: 1,903,538
50: 1,903,578
51: 1,903,530
57: 1,903,622
19— 5: 1,903,553
22— 21: 1,903,616
23— 91: 1,903,592
102: 1,903,636
106: 1,903,582
250: 1,903,642
24— 64: 1,903,746
25— 1: 1,903,741
28— 70: 1,903,546
29— 88: 1,903,548

LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 18TH DAY OF APRIL, 1933

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). Includes patents, reissues, and designs.

A. B. C. Metal Corp. (See Manhan, John, assignor.)
A/S Farmakon. (See Aagaard, T. B., Samdahl, and Hopstock, assignors.)
Aagaard, Thorvald B., and B. Samdahl, Oslo, and F. P. Hopstock, assignors to A/S Farmakon, Kragero, Norway. Preparation of a product containing all opium alkaloids. 1,903,770; Apr. 18.
Aanenson, Christ J., Magnolia, Minn. Radio ground. 1,904,773; Apr. 18.
Abbott, Charles C., Pittsfield, Mass., assignor to General Electric Company. Electric heater. 1,904,594; Apr. 18.
Abercrombie, James S. (See Benson, Arthur C., assignor.)
Achard, Jean, Paris, France. Device for the control of electric arc welding machines. 1,904,112; Apr. 18.
Activated Sludge, Inc. (See Coombs, James A., assignor.)
Adams, James L., jr., assignor of nine-tenths to Graver Corporation, East Chicago, Ill. Metal fabricating machine. 1,904,913; Apr. 18.
Adams, Lester V., Schenectady, N. Y., assignor to General Electric Company. Resinous composition. 1,904,595; Apr. 18.
Adams, Royal E., assignor to E. Pederson, trustee, Los Angeles, Calif. Electrical control means for brakes. 1,903,801; Apr. 18.
Adams, Walter A., Rochester, N. Y. Workbench. 1,904,708; Apr. 18.
Adamson, Andrew G., assignor to W. M. Still & Sons Limited, London, England, and himself. Film for photographic purposes. 1,904,113; Apr. 18.
Adler, Rudolf, Karlsbad, Czechoslovakia. Purifying and sterilising water. 1,903,889; Apr. 18.
Asmisegger, Jean, Bergenfield, N. J., assignor to The American Fabrics Company, Bridgeport, Conn. Embroidered textile fabric. Des. 89,622; Apr. 18.
Aerol Engine Corporation. (See Hehr, Frederick G., assignor.)
Agerell, William C., Chicago, Ill. Internal combustion engine. 1,903,802; Apr. 18.
Agfa Ansco Corporation. (See Frankenburger, W., and Roesaler, assignors.)
Agfa Ansco Corporation. (See Hagedorn, Max, assignor.)
Agfa Ansco Corporation. (See Matheson, Avery A., assignor.)
Agfa Ansco Corporation. (See Ollendorff, Gerhard, assignor.)
Ahnström, Erik. (See Engberg, Axel O.)
Ainsworth, Chester D., Wollaston, assignor to Condit Electrical Manufacturing Corporation, South Boston, Mass. Electric switch. 1,904,897; Apr. 18.
Air Reduction Company. (See Anderson, James L., assignor.)
Air-Way Electric Appliance Corporation. (See Riebel, Frederick, jr., assignor.)
Ajax Electrothermic Corporation. (See Northrup, Edwin F., assignor.)
Aki, Shozaburo, Mill Hill, London, England. Brush. 1,904,260; Apr. 18.
Aktiebolaget Svenska Kullagerfabriken. (See Palmgren, Per G., assignor.)
Aktiebolaget Svenska Kullagerfabriken. (See Rydbeck, Patrik S., assignor.)
Aktiebolaget Svenska Kullagerfabriken. (See Wistrand, Gunnar, assignor.)
Aktiengesellschaft Brown Boveri & Cie. (See Widmer, Stefan, assignor.)
Albert, George G., New York, N. Y. Cementing machine. 1,904,812; Apr. 18.
Alberts, Walter, Duisburg-Ruhrort, assignor to the Firm Vereinigte Stahlwerke Aktiengesellschaft, Dusseldorf, Germany. Arch, particularly for use in metallurgical furnaces. 1,904,596; Apr. 18.
Aldrich, Ralph N., assignor to Standard Stations, Inc., San Francisco, Calif. Combined building column and display case. Des. 89,607; Apr. 18.
Aldrich, Ralph N., assignor to Standard Stations, Inc., San Francisco, Calif. Combined building column and display case. Des. 89,608; Apr. 18.
Aldrich, Ralph N., assignor to Standard Stations, Inc., San Francisco, Calif. Combined building column and display case. Des. 89,609; Apr. 18.
Alex, Max, Alhambra, Calif., assignor to York Water Corporation, Ltd. Olla shell. Des. 89,667; Apr. 18.
Allen-Bradley Company. (See Bradley, Lynde, assignor.)
Allen, John M., Toronto, Ontario, Canada, assignor to Scott & Williams, Incorporated, New York, N. Y. Seamless hosiery and making same. 1,904,036; Apr. 18.
Allgrunn, Carl G. (See Knapp, E., and Allgrunn.)
Allin, Edwin F., Oklahoma City, Okla., assignor to American Hard Rubber Company, New York, N. Y. Comb. 1,904,705; Apr. 18.
Allis-Chalmers Manufacturing Company. (See Marples, Derek B., assignor.)
Allyne, Edmund E., Lantana, Fla. Refrigerating apparatus. 1,904,597; Apr. 18.
Almond, Lester L., North Troy, R. Herrington, Troy, N. Y., and F. A. Matthews, Kitchener, Ontario, Canada, assignors to Cluett, Peabody & Co., Inc., Troy, N. Y. Method of and apparatus for sewing seams. 1,904,898; Apr. 18.
Alpern, Maxwell, assignor to American Engineering Company, Philadelphia, Pa. Automatic fluid control system. 1,904,846; Apr. 18.
Altek Compagnie d'Etude et d'Exploitation d'Appareils Frigorifiques pour le Transport. (See Thomson, Arthur Lindsay, assignor.)
Althor, Joseph G. (See Morrell, J. C., and Althor.)
Aluminium Industrie Aktiengesellschaft. (See von Zeerleder, Alfred, assignor.)
Amann, William. (See Schulze, A., and Amann.)
Ambrosius, Julius R., Mexico, Mexico. Luggage carrier for motor vehicles. 1,904,114; Apr. 18.
Amer, Donald F. (See Christie, J., and Amer.)
American Brass Company, The. (See Dinkler, A. M., and Smith, assignors.)
American Brass Company, The. (See Smith, Cyril S., assignor.)
American Can Company. (See Hothersall, John M., assignor.)
American Chain Company. (See Lashar, Walter B., assignor.)
American Engineering Company. (See Alpern, Maxwell, assignor.)
American Engineering Company. (See Weingartner, Anthony E., assignor.)
American Fabrics Company, The. (See Aemisegger, Jean, assignor.)
American Face Brick Corporation. (See Lee, Sherman Q., assignor.)
American Fork & Hoe Company, The. (See Dennis, Charles H., assignor.)
American Fork & Hoe Company, The. (See Withington, Winthrop, assignor.)
American Hard Rubber Company. (See Allin, Edwin F., assignor.)
American Hard Rubber Company. (See Boyer, Edwin S., assignor.)
American Mills Company, The. (See Vacher, John, assignor.)
American Optical Company. (See Cozzens, Charles O., assignor.)
American Propeller Company, The. (See Heath, Spencer, assignor.)
American Smelting and Refining Company. (See Swarts, C. E., and Phillips, assignors.)
American Telephone and Telegraph Company. (See Henneberger, Thomas C., assignor.)
American Telephone and Telegraph Company. (See Holden, W. H. T., assignor, and Jutson.)
American Telephone and Telegraph Company. (See Matte, Andrew L., assignor.)
American Telephone and Telegraph Company. (See Mitchell, Doren, assignor.)
American Telephone and Telegraph Company. (See Taylor, Edmund R., assignor.)
American Telephone and Telegraph Company. (See Wright, S. B., and Mitchell, assignors.)
American Tobacco Company, The. (See Molins, W. E., and Chalmers, assignors.)
Andersen, Poul S. R., Copenhagen, Denmark. Exposure and copying of photographs and cinematographic records in natural colors. 1,904,600; Apr. 18.
Anderson, Albert & J. M., Manufacturing Company. (See Huse, Ralph L., assignor.)
Anderson, Alexander, Fullerton, Calif. Bore hole surveying apparatus. 1,903,969; Apr. 18.
Anderson, Arthur W. (See Wideman, L., Anderson, and Rider.)
Anderson, Frithiof B., Rutherford, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Testing system. 1,904,598; Apr. 18.
Anderson, Homer A., Brooklyn, N. Y. Radio apparatus. 1,904,668; Apr. 18.
Anderson, James L., Tenafly, N. J., assignor to Air Reduction Company, Incorporated, New York, N. Y. Wire feed device. 1,903,953; Apr. 18.
Anderson, James L., Tenafly, N. J., assignor to Air Reduction Company, Incorporated, New York, N. Y. Method of welding and apparatus therefor. 1,904,599; Apr. 18.
Anderson, James W. (See Snyder, Louis M., assignor.)

Anderson, Ren M., Cincinnati, Ohio. Combined animated and changeable sign. 1,904,966; Apr. 18.
Andrews, James A., Augusta, Me. Support for clearer rolls. 1,904,344; Apr. 18.
Anheuser, Ernest A., and G. S. Remiker, Milwaukee, Wis. Molding flask. 1,904,037; Apr. 18.
Anthes, Eugen. (See Krauch, C., Pier, and Anthes.)
Anthony Company, The. (See Anthony, W. C., and Wachter, assignors.)
Anthony, William C., and L. Wachter, assignors to The Anthony Company, Streator, Ill. Hydraulic hoist dumping body. 1,904,845; Apr. 18.
Anzelewitz, Abraham, Far Rockaway, N. Y. Cigar and cigarette holder. 1,904,814; Apr. 18.
Aoki, Koichi, Tokyo, Japan, assignor to General Electric Company. Constant level lubricating device. 1,904,601; Apr. 18.
Apple, Vincent G., Dayton, Ohio, assignor to Bendix Brake Company, South Bend, Ind. Electric controller. 1,904,813; Apr. 18.
Apple, Vincent G., and W. H. Petit, Dayton, Ohio, assignor to Bendix Brake Company, South Bend, Ind. Vehicle control mechanism. 1,904,943; Apr. 18.
Archea, Walter D., assignor to The Cincinnati Milling Machine Company, Cincinnati, Ohio. Milling machine collet. 1,904,641; Apr. 18.
Arlt, John L., assignor to F. W. Stork and J. L. Arlt, doing business as Ideal Manufacturing Company, Saginaw, Mich. Washtub. 1,903,908; Apr. 18.
Armacost, Wilbur H., assignor to The Superheater Company, New York, N. Y. Superheater arrangement for cylindrical shell boilers. 1,903,970; Apr. 18.
Armspear Manufacturing Company. (See Pixley, J. S., and Bender, assignors.)
Artisan Shoe Company. (See Rizzo, Samuel, assignor.)
Arvey Corporation. (See Horwath, Julius, assignor.)
Asch, Abraham B. (See Laughlin, W. C., and Ashe.)
Ashworth, Fred, Wenham, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Heel breasting machine. 1,904,346; Apr. 18.
Asmussen, August J., assignor, by mesne assignments, to Kelvinator Corporation, Detroit, Mich. Refrigerating mechanism. 1,903,848; Apr. 18.
Associated Electric Laboratories, Inc. (See Richardson, Rodney G., assignor.)
Associated Electric Laboratories, Inc. (See Saunders, N. H., and Lomax, assignors.)
Associated Electric Laboratories, Inc. (See Tharp, V. S., and Lomax, assignors.)
Atchison Revolving Door Co., The. (See Uhrich, Burns H., assignor.)
Atlantic Refining Company. (See Birkhimer, Edwin R., assignor.)
Audiffren Refrigerating Machine Company. (See Karr, A. D., and Perkins, assignors.)
Aue, Herbert D., Bloomfield, N. J. Traveler for kite strings. 1,904,938; Apr. 18.
Austin, Stanley H. (See Perks, George W., assignor.)
Auto Research Corporation. (See Kocher, Edward H., assignor.)
Automatic Burner Corporation. (See Perry, Stanley, assignor.)
Automatic Devices, Inc. (See Burkholder, John D., assignor.)
Automatic Switch Company. (See Hurlburt, Wilbur F., assignor.)
Automotive Engineering Corporation. (See Rayburn, Alden G., assignor.)
Avery, B. F., & Sons. (See Ray, Charles T., assignor.)
Avery, True M., Glens Falls, N. Y., and W. M. Seitzinger, Chicago, Ill., assignors to Union Bag and Paper Corporation, Hudson Falls, N. Y. Printing attachment for bag making machines. 1,904,709; Apr. 18.
Axe, Roy T., assignor, by mesne assignments, to The Syracuse Trust Company, Syracuse, N. Y. Window sash holder and window construction. 1,904,602; Apr. 18.
Ayers, Cecil L., et al. (See Clark, Carl W., assignor.)
B-L Electric Manufacturing Company, The. (See Hambuechen, Carl, assignor.)
Babbitt, Bethel J., Riverside, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Electromagnetic device. 1,904,847; Apr. 18.
Babcock, Walter F., Detroit, Mich., assignor to The Foote-Burt Company, Cleveland, Ohio. Metal cutting machine and control system therefor. 1,904,975; Apr. 18.
Babcock & Wilcox Company, The. (See Jones, William A., assignor.)
Babcock & Wilcox Company, The. (See Miller, Benjamin H., assignor.)
Bacher, Rollin L., Lakewood, and P. I. Schultz, assignors to The United States Air Compressor Company, Cleveland, Ohio. Grease gun. 1,903,750; Apr. 18.
Backes, Peter. (See Hentrich, W., Hardtmann, Backes, and Stötter.)
Bacon, Charles F., Brattleboro, Vt., assignors to Millers Falls Company, Millers Falls, Mass. Hydraulic jack. 1,904,115; Apr. 18.
Bacon, Raymond F., Bronxville, and I. Bencowitz, New York, N. Y.; said Bencowitz assignor to said Bacon. Recovery of sulphur. 1,904,608; Apr. 18.
Baden, William, Stockton, Calif. Valve cooling device. 1,904,669; Apr. 18.
Bader, Kaspar, Berlin-Grunewald, Germany. Device for feeding the casting pots of linotype and similar machines working with soft metals. 1,903,751; Apr. 18.
Baehr, Hans, Ludwigshafen-on-the-Rhine, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Producing ammonium sulphate. 1,904,604; Apr. 18.
Bailey, Ervin G., Easton, and R. M. Hardgrove, Bethlehem, assignors to Fuller Lehigh Company, Fullerton, Pa. Retaining furnace wall blocks against tubes. 1,904,189; Apr. 18.
Bailey, William C., Los Angeles, Calif. Combination thermometer casing. 1,904,776; Apr. 18.
Baker, Albert E., Mount Vernon, Ohio, assignor of one-third to P. J. Scott and one-third to B. A. Hileman, Richmond, Va. Floor and wall brush. 1,904,774; Apr. 18.
Baker, Thomas T., Middlesex, assignor to Spicers Limited, London, England. Color photography. 1,903,971; Apr. 18.
Baker Perkins Company Inc. (See Macfarlane, R. F., and Prescott, assignors.)
Baker-Raulang Company, The. (See Bemde, Edward H., assignor.)
Bally, Oscar, Basel, assignor to Society Chemical Industry in Basle, Basel, Switzerland. Printing acetate silk or materials containing an organic cellulose ether or ester. 1,904,815; Apr. 18.
Balthaser, Harry B., Philadelphia, Pa. Surgical claw scissors. 1,904,399. Apr. 18.
Bangs, Ralph L., Wakefield, and W. A. Hermanson, Brighton, Mass. Box. 1,904,400; Apr. 18.
Banker, Oscar H., Philadelphia, Pa. Ink roll for printing presses. 1,904,764; Apr. 18.
Barclay, Robert E., assignor to Federal Electric Company, Chicago, Ill. Sign. 1,904,347; Apr. 18.
Barclay, Robert E., assignor to Federal Electric Company, Chicago, Ill. Making multibore tubes. 1,904,348; Apr. 18.
Barden, William S., Stapleton, N. Y., assignor to Radio Corporation of America. Crystal rejector circuit. 1,904,605; Apr. 18.
Barder, Byron R., assignor to The Biggs Boiler Works Company, Akron, Ohio. Pipe joint and making same. 1,904,967; Apr. 18.
Barkan, Irvin, Philadelphia, Pa. Nipple. 1,904,710; Apr. 18.
Barker, Maurice E., Edgewood, Md. Catalyst for oxidizing carbon monoxide in exhaust gases. 1,903,803; Apr. 18.
Barlow, Samuel, Sydney, New South Wales, Australia. Visible record card holder. 1,904,349; Apr. 18.
Barnes, John J. (See Parr, W. V., Love, and Barnes.)
Barrett, Charles E., assignor to Alexander Smith & Sons Carpet Company, Yonkers, N. Y. Loom for weaving tufted fabric and weaving. 1,904,939; Apr. 18.
Barrett Company, The. (See Craver, Augustus E., assignor.)
Barrett Company, The. (See Hess, Raymond W., assignor.)
Barrett Company, The. (See Hess, R. W., and Leaper, assignors.)
Barrett Company, The. (See Miller, Stuart B., assignor.)
Barrett Company, The. (See Moses, F. G., Hess, and Perkins, assignors.)
Bartholomew, Gilbert A., Cleveland, Ohio. Engine. 1,904,775; Apr. 18.
Bartley, Charles B., Pittsburgh, Pa., assignor to Western Electric Company, Incorporated, New York, N. Y. Telephone system. 1,903,972; Apr. 18.
Bauch, William H., Shelbyville, assignor to Sono Equipment Corporation, Indianapolis, Ind. Resilient support for photo-electric cell exciter. 1,904,038; Apr. 18.
Bauch, William H., Shelbyville, assignor of one-half to O. R. Platter, North Vernon, and one-half to Sono Equipment Corporation, Indianapolis, Ind. Method and apparatus for reproducing sound. 1,904,711; Apr. 18.
Bauer, Gustav, Hamburg, and J. N. Klep, Altona-Hochkamp, Germany. Hydraulic power transmitter. 1,904,606; Apr. 18.
Baum, Reinhold, assignor to Felten & Guilleaume Carlswerk Actiengesellschaft, Cologne-Mulheim, Germany. Steel aluminium cable. 1,904,116; Apr. 18.
Baumann, Fritz. (See Bayer, O., and Baumann.)
Baumé, Edwall J., Long Beach, Calif. Lock. 1,904,763; Apr. 18.
Bausch & Lomb Optical Company. (See Kurtz, Henry F., assignor.)
Bausch & Lomb Optical Company. (See Powell, John R., assignor.)
Bayer, Otto, Frankfort-on-the-Main, and F. Baumann, Leverkusen-on-the-Rhine, Germany, assignors to General Aniline Works, Inc., New York, N. Y. Vat dyestuffs of the anthrapyridone and the anthrapyrimidone series. 1,903,857; Apr. 18.
Beam, Lois M., Short Hills, N. J., assignor to Hendrick Manufacturing Company. Grille or the like. Des. 89,623; Apr. 18.
Beam, Lois M., Short Hills, N. J., assignor to Hendrick Manufacturing Company. Grille or the like. Des. 89,624; Apr. 18.
Beaudry, George P., Montreal, Quebec, Canada. Internal combustion engine. 1,904,816; Apr. 18.

Beavers, Roy J., Brookfield, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Material working machine. 1,904,848; Apr. 18.
Becher, Willy, Bussum, Netherlands. Manufacturing chlorine dioxide. 1,904,190; Apr. 18.
Becker, Gabriel, Berlin-Charlottenburg, Germany. Starting device for internal combustion engines. 1,904,117; Apr. 18.
Becker, Joseph, assignor to The Koppers Company, Pittsburgh, Pa. Cooking retort oven. 1,904,191; Apr. 18.
Becket, Frederick M., New York, N. Y., assignor to Electro Metallurgical Company. Stain resisting cobalt alloy. 1,904,712; Apr. 18.
Bedford, Leslie H., London, England, assignor to Western Electric Company, Incorporated, New York, N. Y. Indirectly heated cathode. 1,904,261; Apr. 18.
Begeman, Myron L., St. Louis, Mo., assignor to Mississippi Glass Company, New York, N. Y. Manufacture of wire glass. 1,904,118; Apr. 18.
Behr-Manning Corporation. (See Schacht, Elmer C., assignor.)
Beisser, Harry, assignor to Oscar Shorr, Detroit, Mich. Cleaning and washing brush. 1,904,940; Apr. 18.
Bek, Ernst Gideon. (See Brunhübner, Georg, assignor.)
Belissi, Vincent, Bronx, N. Y. Airplane. 1,903,752; Apr. 18.
Belknap, Franklin S., Kansas City, Mo. Brake tester. 1,904,713; Apr. 18.
Bell Telephone Laboratories, Incorporated. (See Anderson, Frithiof B., assignor.)
Bell Telephone Laboratories, Incorporated. (See Buckley, Oliver E., assignor.)
Bell Telephone Laboratories, Incorporated. (See Burns, Robert M., assignor.)
Bell Telephone Laboratories, Incorporated. (See Burton, Everett T., assignor.)
Bell Telephone Laboratories, Incorporated. (See Chase, Charles A., assignor.)
Bell Telephone Laboratories Incorporated. (See Coffman, Joe W., assignor.)
Bell Telephone Laboratories, Incorporated. (See Cousins, Van Meter, assignor.)
Bell Telephone Laboratories, Incorporated. (See Dickinson, Allan B., assignor.)
Bell Telephone Laboratories, Incorporated. (See Flammer, Howard A., assignor.)
Bell Telephone Laboratories, Incorporated. (See Gilbert, John J., assignor.)
Bell Telephone Laboratories, Incorporated. (See Harper, Robert W., assignor.)
Bell Telephone Laboratories, Incorporated. (See Holden, W. H. T., and Jutson, assignors.)
Bell Telephone Laboratories, Incorporated. (See Hollingsworth, Lowell M., assignor.)
Bell Telephone Laboratories, Incorporated. (See Hoyt, Frederick A., assignor.)
Bell Telephone Laboratories, Incorporated. (See Mallina, Rudolph F., assignor.)
Bell Telephone Laboratories, Incorporated. (See Robb, Theodore D., assignor.)
Bell Telephone Laboratories, Incorporated. (See Tebo, Julian D., assignor.)
Bell Telephone Laboratories, Incorporated. (See Ulrich, Horace W., assignor.)
Bellis, Arthur E., Branford, Conn. Heat treating metals. 1,904,706; Apr. 18.
Bencowitz, Isaac. (See Bacon, R. F., and Bencowitz.)
Bender, Martin. (See Pixley, J. S., and Bender.)
Bendix Aviation Corporation. (See Straussler, Nicholas, assignor.)
Bendix Brake Company. (See Apple, Vincent G., assignor.)
Bendix Brake Company. (See Apple, V. G., and Petit, assignors.)
Bendix Brake Company. (See Bendix, V., assignor, and La Brie.)
Bendix, Vincent, Chicago, Ill., and L. E. La Brie, South Bend, Ind., said Bendix assignor to Bendix Brake Company, South Bend, Ind. Brake. 1,904,262; Apr. 18.
Benjamin, Reuben B., Chicago, Ill., assignor, by mesne assignments, to H. H. Eby, Philadelphia, Pa. Socket for vacuum tubes. 1,904,662; Apr. 18.
Bennett, Dennis H., Door, assignors of one-third to D. Halford and one-third to W. E. Ihling, Kalamazoo, Mich. Cutter mechanism for mowing machines. 1,903,753; Apr. 18.
Benson, Arthur C., assignor to J. S. Abercrombie, Houston, Tex. Clutch for hoisting drums. 1,904,350; Apr. 18.
Benson, Melvin B., Corporation. (See Benson, Melvin B.)
Benson, Melvin B., New York, N. Y., assignor, by mesne assignments, to Melvin B. Benson Corporation and M. B. Benson. Sign. 1,904,192; Apr. 18.
Bens, Johannes, Dusseldorf, Germany. Butter and like molding device. 1,904,714; Apr. 18.
Berg, Charles E., Vero Beach, Fla. Package holder. 1,904,193; Apr. 18.
Berge, Joseph, Montclair, assignor to The National Lock Washer Company, Newark, N. J. Nut and washer assembly. 1,904,263; Apr. 18.
Berger, Friedrich W. F., Berlin, Germany, assignor to The National Cash Register Company, Dayton, Ohio. Cash register. 1,904,976; Apr. 18.
Berger Manufacturing Company. (See Vignos, Paul, assignor.)
Bergman, John and M., Poulsbo, Wash. Loom. 1,904,715; Apr. 18.
Bergman, Margaret. (See Bergman, John and M.)
Bernat, Henri. (See Bernat, Raoul and H.)
Bernat, Raoul and H., Bordeaux, France. Refrigerating plant. 1,904,817; Apr. 18.
Berssenbrugge, William H., Whitefish Bay, Wis. Table. 1,904,401; Apr. 18.
Berthold, Erich. (See Kuns, M. A., Koeberle, and Berthold.)
Berthold, Rudolf G., Berlin-Siemensstadt, and W. Stockmeyer, Finkenkrug, near Berlin, assignors to Siemens-Schuckertwerke Aktiengesellschaft, Berlin-Siemensstadt, Germany. Support for electrodes in vacuum vessels. 1,904,119; Apr. 18.
Berthon, Rodolphe, Neuilly, France, assignor, by mesne assignments, to Kislyn Corporation, New York, N. Y. Copying goffered films. 1,904,671; Apr. 18.
Berthon, Rodolphe, Neuilly, France, assignor, by mesne assignments, to Kislyn Corporation, New York, N. Y. Process and device for reproducing goffered films. 1,904,672; Apr. 18.
Berthon, Rodolphe, Neuilly, France, assignor, by mesne assignments, to Kislyn Corporation, New York, N. Y. Printing of films for color cinematography. 1,904,673; Apr. 18.
Bertsche, William H., et al. (See Ellington, Cornwallis D., assignor.)
Bessemer Cement Corporation, The. (See Wasson, Orie E., assignor.)
Bethenod, Joseph, Paris, France. Stray and atmospherics eliminating system. 1,904,607; Apr. 18.
Bettini, David, assignor to Locke Insulator Corporation, Baltimore, Md. Insulator finishing brushing machine. 1,904,608; Apr. 18.
Bets, William C., assignor to The Fafnir Bearing Company, New Britain, Conn. Spring shackle. 1,904,264; Apr. 18.
Bianchi, Alfred A., Worcester, Mass. Broken belt detector and safety device. 1,904,851; Apr. 18.
Biggs Boiler Works Company, The. (See Barder, Byron R., assignor.)
Biggs, William E., Knoxville, Tenn. Underfeed stoker. 1,904,716; Apr. 18.
Birkhimer, Edwin R., assignor to The Atlantic Refining Company, Philadelphia, Pa. Treatment of hydrocarbon oils. 1,904,402; Apr. 18.
Bissell, Marion H., Chicago, Ill. Cleaning apparatus. 1,904,818; Apr. 18.
Bixer, Edmond P., New York, N. Y. Curtain heading. 1,904,194; Apr. 18.
Bixer, A. Victor. (See Papadopoulos, Georgebeys P., assignor.)
Bjornsson, Carl A. (See Clark, C. P., and Bjornsson.)
Black & Decker Manufacturing Company, The. (See Schouten, Frank, assignor.)
Blanton, William B., Merrick, assignor to The Western Union Telegraph Company, New York, N. Y. Automatic operator indicator for busy lines at central offices. 1,904,265; Apr. 18.
Bleadon, Samuel B., San Francisco, Calif. Container for toothbrushes. 1,904,609; Apr. 18.
Bliss, E. W., Company. (See Strout, Robert W., assignor.)
Bloch Freres, Inc. (See Tansley, Thomas W., assignor.)
Blodgett, George R., assignor to Moto Meter Gauge & Equipment Corporation, Toledo, Ohio. Pressure and flow control device for combustion indicators. 1,904,819; Apr. 18.
Blum, Emil, Newark, N. J. Optical polygraph. 1,903,890; Apr. 18.
Blumenthal, Abraham S., Amityville, N. Y. Combined graphic outline and work locating template for building models. 1,904,674; Apr. 18.
Blumenthal, Louis, Brooklyn, N. Y. Folding table and chair. 1,903,954; Apr. 18.
Boabands Limited. (See Bradley, Daniel A., assignor.)
Bol, Cornelis, Eindhoven, Netherlands, assignor to Radio Corporation of America. Electric discharge tube. 1,904,195; Apr. 18.
Bolles, Seward B., Elizabeth, N. J., assignor to Standard Oil Development Company. Apparatus for treating hydrocarbons. 1,904,196; Apr. 18.
Bommer, Emil, Brooklyn, N. Y. Door hinge. 1,904,120; Apr. 18.
Bond Electric Corporation. (See Pratt, Goodrich B., assignor.)
Bond Electric Corporation. (See Stimson, Frank G., assignor.)
Bond, William G., Wilmington, Del. Cork manufacture. 1,904,197; Apr. 18.
Bonsieur, Le, assignor to The General Industries Company, Elyria, Ohio. Fish line reel. 1,904,849; Apr. 18.
Bosch, Robert, Aktiengesellschaft. (See Seiling, Otto, assignor.)
Boughton, Edward B., London, England. Brake for use on vehicles. 1,903,978; Apr. 18.
Boutillion, Henri, Suresnes, France. Automatic liquid measuring and delivering apparatus. 1,904,610; Apr. 18.
Bowes, Charles E. (See Bowes, Robert M. and C. E.)
Bowes, Robert M. and C. E., Indianapolis, Ind. Filling tire casing cuts. 1,904,403; Apr. 18.

Bowling, Wilbur S. (See Cope, F. T., Vaughan, and Bowling.)
Bowman, A. M. (See Hamaker, Rex G., assignor.)
Bowman, Newton K., Bowdil, Ohio. Cutter-chain block. 1,903,771; Apr. 18.
Bowman, Newton K., Bowdil, Ohio. Core-breaker. 1,903,772; Apr. 18.
Boyce, James, Laketown Township, Allegan County, Mich., and R. F. Hancock, Marion, Ind., assignors to Chicago Glass Novelty Corporation. Sign. 1,904,850; Apr. 18.
Boyer, Edwin S., Plainfield, N. J., assignor to American Hard Rubber Company, New York, N. Y. Pipe. 1,904,675; Apr. 18.
Boyette Air Electric Car, Inc. (See Boyette, William E., assignor.)
Boyette, William E., Jacksonville, Fla., assignor to Boyette Air Electric Car, Inc. Automotive vehicle. 1,904,611; Apr. 18.
Boykow, Johann. (See von Hofe, C., and Boykow.)
Bradbury, Clifford C., et al., trustee. (See Stokes, Charles L., assignor.)
Bradley, Daniel A., assignor to Boabands Limited, London, England. Tightening and sealing device. 1,904,914; Apr. 18.
Bradley, Lynde, assignor, by mesne assignments, to Allen-Bradley Company, Milwaukee, Wis. Electrical resistor. 1,904,352; Apr. 18.
Bragg, Caleb S., Palm Beach, Fla., and V. W. Kliesrath, Port Washington, assignors, to Bragg-Kliesrath Corporation, Long Island City, N. Y. Brake mechanism for automotive vehicles. 1,904,266; Apr. 18.
Bragg, Caleb S., Palm Beach, Fla., and V. W. Kliesrath, Port Washington, assignors to Bragg-Kliesrath Corporation, Long Island, N. Y. Brake system for automotive vehicles. 1,904,267; Apr. 18.
Bragg-Kliesrath Corporation. (See Bragg, C. S., and Kliesrath, assignors.)
Braham, W. Walter. (See Hendrix, Joel H., assignor.)
Bramson, Morgens L., London, England. Shaving brush and like brush. 1,904,612; Apr. 18.
Brand, Harry R., New York, N. Y. Dish handling mechanism. 1,904,198; Apr. 18.
Brandau, Walter R., Los Angeles, Calif. Siphonic air-life trap. 1,903,773; Apr. 18.
Braren, Cornelius T., Jamaica, N. Y., assignor, by mesne assignments, to Standard-Knapp Corporation. Article-collecting machine. 1,904,613; Apr. 18.
Bresaden, Carroll E., assignor to Dayton Scale Company, Dayton, Ohio. Weighing scale. 1,904,614; Apr. 18.
Bredin, Lewis L., assignor to Chamberlin Metal Weather-strip Co., Detroit, Mich. Automobile window screen. 1,904,968; Apr. 18.
Bresnahan, William H., Lynn, Mass., assignor, by mesne assignments, to Compo Shoe Machinery Corporation, New York, N. Y. Making footwear. 1,904,851; Apr. 18.
Brewer, Francis T., assignor to General Motors Radio Corporation, Dayton, Ohio. Inductance. 1,904,199; Apr. 18.
Brewer, Stanley H., Dundalk, Md. Reversible window hinge. 1,904,717; Apr. 18.
Bridgeport Metal Goods Manufacturing Company, The. (See Fullmer, Giles C., assignor.)
Brightman, Rainald, Manchester, England, assignor to Imperial Chemical Industries, Limited. Azo dye. 1,904,820; Apr. 18.
Brightman, Rainald, Manchester, assignor to Imperial Chemical Industries Limited, Westminster, England. Disazo dyestuffs and preparing same. 1,904,821; Apr. 18.
Brightman, Rainald, Manchester, assignor to Imperial Chemical Industries, Limited, Westminster, England. Azo dyestuffs and preparing same. 1,904,822; Apr. 18.
Brillo Manufacturing Company. (See Field, Crosby, assignor.)
Brillo Manufacturing Company. (See Field, C., and Campbell, assignors.)
Brink, Henry A., Spring Lake, Mich. Fountain structure. 1,903,974; Apr. 18.
Bristol, Carlton W., and A. Noble, Naugatuck, assignors to The Bristol Company, Waterbury, Conn. Fitting for measuring elements. 1,904,615; Apr. 18.
Bristol Company, The. (See Bristol, C. W., and Noble, assignors.)
Brodsky, Michel, Paris, France, assignor to Cheney Brothers, New York, N. Y. Textile fabric or the like. Des. 89,672; Apr. 18.
Bronson, Fred L., New York, N. Y. Manufacture of formed articles. 1,904,268; Apr. 18.
Brooks, Benjamin T., Greenwich, Conn., assignor, by mesne assignments, to Standard Alcohol Company, Wilmington, Del. Producing and distilling aqueous sulphuric acid solutions of secondary and tertiary alcohols. 1,904,200; Apr. 18.
Brose, Walter. (See Klep, J. N., and Brose.)
Brown Bag Filling Machine Company, The. (See Chandler, Austin S., assignor.)
Brown Company. (See Richter, George A., assignor.)
Brown & Sharpe Mfg. Co. (See Rich, Charles A., assignor.)
Bruck, Walter, Mannheim, Germany, assignor to General Aniline Works, Inc., New York, N. Y. Halogenated anthraquinoneacridones and making same. 1,903,891; Apr. 18.
Bruder, Emil A., Los Angeles, Calif. Body exercising apparatus. 1,904,039; Apr. 18.
Brügmann, William F., Chicago, Ill. Printer's register hook. 1,903,804; Apr. 18.
Brunhübner, Georg, assignor to E. G. Bek, Pforzheim, Germany. Soldering. 1,904,616; Apr. 18.
Brushaway Products, Incorporated. (See Evans, George V., assignor.)
Brzezicki, John K., assignor of one-half to M. Herbert, Moon Run, Pa. Combined tobacco box and cigarette paper holder. 1,904,777; Apr. 18.
Buchanan, Stephen N., Elizabeth, N. J. Cable connecter. 1,904,617; Apr. 18.
Buckeye Blower Company. (See Ewald, Warren, assignor.)
Buckley, John P., Washington, D. C. Toy. 1,903,805; Apr. 18.
Buckley, Oliver E., Maplewood, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Submarine signaling cable. 1,903,975; Apr. 18.
Budd Wheel Company. (See Rosenberg, Ralph H., assignor.)
Buffalo Electric Furnace Corporation. (See Scott, Donald M., assignor.)
Builders Iron Foundry. (See Smith, Ed S., jr., assignor.)
Burdick, Ralph V., Albany, N. Y. Making metal boxes. 1,904,778; Apr. 18.
Burk, Michael F., Swampscott, assignor to T. T. Greenwood, Boston, Mass. Building construction. 1,904,404; Apr. 18.
Burkholder, John D., assignor to Automatic Devices, Inc., Harrisonburg, Va. Automatic tire gauge. 1,904,823; Apr. 18.
Burns, Robert M., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Making concrete. 1,903,976; Apr. 18.
Burr, Augustus, Oaklynne, N. J. Pipe holder. 1,904,779; Apr. 18.
Burrell, Benjamin S., East Chicago, Ind. Screener equipped pipe line. 1,903,774; Apr. 18.
Burton, Everett T., Millburn, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Telegraph system. 1,904,618; Apr. 18.
Burton, Robert N. (See Hynan, Arthur C., assignor.)
Butler, Jay H., Newark, Ohio. Delivery truck control. 1,903,977; Apr. 18.
Buxton, Incorporated. (See Buxton, Warner R., assignor.)
Buxton, Warner R., Longmeadow, Mass. Flexible pocket receptacle. 1,904,353; Apr. 18.
Buxton, Warner R., Longmeadow, assignor to Buxton, Incorporated, Springfield, Mass. Key case. 1,904,354; Apr. 18.
Byerlein, Arthur A., Detroit, Mich., assignor to General Machinery Corporation, Hamilton, Ohio. Power press control. 1,904,676; Apr. 18.
Byers, John, et al. (See Watson, Claude G., assignor.)
Caesar, George V., New York, N. Y., assignor to Stein, Hall & Company, Inc. Adhesive and making same. 1,904,619; Apr. 18.
Caggiano, Anthony, Springfield, Mass. Template for splitting leather soles. 1,904,405; Apr. 18.
Caillet, Robert. (See Mutrux, M., and Caillet.)
Cain, John R., Washington, D. C., and S. W. Yates, Cincinnati, assignors to The Richardson Company, Lockland, Ohio. Iron sulphide material and making the same. 1,904,915; Apr. 18.
Caisson Contracting Company. (See Powell, Charles L., assignor.)
Caisson Contracting Company. (See Powell, C. L., and Smith, assignors.)
Callahan, Michael J., Parlin, N. J., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Reducing the solution viscosity of cellulose. 1,904,406; Apr. 18.
Cameron, Hugh M., Woodhaven, assignor of one-half to Edward A. Judge, New York, N. Y., and one-half to J. E. Seederer, Bloomfield, N. J. Scale. 1,903,955; Apr. 18.
Camp, S. H., & Company. (See LeMay, Ariel M., assignor.)
Campbell, Charles A., Watertown, N. Y., assignor to The New York Air Brake Company. Automotive brake system. 1,903,978; Apr. 18.
Campbell, Clinton L. (See Field, C., and Campbell.)
Campbell, Norman R., Watford, assignor to The General Electric Company Limited, London, England. Manufacture of photo-electric cathodes. 1,904,895; Apr. 18.
Cannon, Harry B., Bradford, Pa. Signal and trouble-finder. 1,904,300; Apr. 18.
Caplan, Moses, Boston, Mass. Pocket for pot holder. Des. 89,627; Apr. 18.
Caplan, Solomon, Brooklyn, assignor to Combustion Utilities Corporation, New York, N. Y. Manufacture of low boiling tar acids. 1,904,269; Apr. 18.
Cappa, Giulio C., assignor of one-half to Società Anonima Automobili Ansaldo, Turin, Italy. Air-cooled internal combustion engine. 1,903,979; Apr. 18.
Cappa, Giulio C., assignor of one-half to Società Anonima Automobili Ansaldo, Turin, Italy. Oil cooling arrangement for air cooled internal combustion engines. 1,904,407; Apr. 18.

Carbide & Carbon Chemical Corporation. (See Reid, E. W., and Lewis, assignors.)
Carbonfix, Société à Responsabilité Limitée. (See Marek, John I., assignor.)
Carey, Philip, Manufacturing Company, The. (See Fischer, Albert C., assignor.)
Carley, Leonard R., Watertown, assignor to The Patent Button Company, Waterbury, Conn. Button. Des. 89,625; Apr. 18.
Carney, Ephriam L., Murfreesboro, Tenn. Tank cap. 1,903,892; Apr. 18.
Carpenter, James W., assignor to The McKay Company, Pittsburgh, Pa. Magazine rack. Des. 89,626; Apr. 18.
Carson, Oswald B., Greenburg, N. Y. Spectacles. 1,904,852; Apr. 18.
Carter, Herbert F., Roselle Park, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Method of and apparatus for preparing and handling molten materials. 1,904,853; Apr. 18.
Carter, William T., Chicago, Ill. Automobile servicing machine. 1,903,905; Apr. 18.
Case, J. I., Company. (See Crawford, John F., assignor.)
Cavano, John P., and G. Vondicakis, Cleveland, Ohio. Serving and washing tray. 1,904,969; Apr. 18.
Cedar Rapids Engineering Company. (See Dunn, Allen I., assignor.)
Celanese Corporation of America. (See Cope, Ernest C., assignor.)
Celanese Corporation of America. (See Dreyfus, C., and Schneider, assignors.)
Celanese Corporation of America. (See Dreyfus, C., and Whitehead, assignors.)
Celanese Corporation of America. (See Ewing, H., and Roberts, assignors.)
Centrifugal Machine Company. (See Snyder, Clay M., assignor.)
Chain Belt Company. (See Longenecker, Charles I., assignor.)
Chalmers, John W. (See Molina, W. E., and Chalmers.)
Chamberlin Metal Weatherstrip Co. (See Bredin, Lewis L., assignor.)
Chandler, Austin S., assignor to The Brown Bag Filling Machine Company, Fitchburg, Mass. Capping table. 1,903,980; Apr. 18.
Chapin, Charles H., Chicago, Ill. Shock absorber. 1,904,040; Apr. 18.
Chapman, Lyman B., assignor to Scovill Manufacturing Company, Waterbury, Conn. Detachable snap fastener for articles to be laundered. 1,904,122; Apr. 18.
Chapman, William J., Virginia, Minn. Reversible and quick-changing runner and shoe. 1,904,201; Apr. 18.
Charette, Odilon, Fitchburg, Mass. Ice skate. 1,904,270; Apr. 18.
Charlin, André M. B., Paris, France. Needle securing device for talking machines. 1,904,408; Apr. 18.
Chase, Charles A., assignor to Bell Telephone Laboratories, Inc., New York, N. Y. Submarine cable anchorage. 1,904,271; Apr. 18.
Chase, Clyde H., et al. (See Nichols, Horace E., assignor.)
Chemical Treatment Company. (See Fink, Colin G., assignor.)
Chemical Works formerly Sandoz. (See Rheiner, Alfred, assignor.)
Chemical Works formerly Sandoz. (See Stoll, A., and Rothlin, assignors.)
Cheney Brothers. (See Brodsky, Michel, assignor.)
Chicago Electric Manufacturing Co. (See Gough, James J., assignor.)
Chicago Electric Manufacturing Co. (See Preston, Edward S., assignor.)
Chicago Glass Novelty Corporation. (See Boyce, J., and Hancock, assignors.)
Chicago Pneumatic Tool Company. (See Nell, Gustave M., assignor.)
Chicago Pneumatic Tool Company. (See Scott, George, assignor.)
Christian, Frank T., assignor to Eclipse Machine Company, Elmira, N. Y. Automatic starting mechanism. 1,904,202; Apr. 18.
Christie, John, Sunderland, and D. F. Amer, Jarrow, assignors to A. Reyrolle & Company Limited, Hebburn-on-Tyne, England. High voltage electric switch gear. 1,903,956; Apr. 18.
Christopher, Frank E., Morgantown, W. Va. Air spring and cushion. 1,903,775; Apr. 18.
Church, Lewis H., Roselle, assignor to The Thomas & Betts Co., Elizabeth, N. J. Cable connector. 1,904,409; Apr. 18.
Ciccarelli, Ostilio, assignor to The E. Ingraham Company, Bristol, Conn. Radiocabinet. Des. 89,628; Apr. 18.
Cincinnati Grinders Incorporated. (See Hunt, Charles G., assignor.)
Cincinnati Milling Machine Company, The. (See Archea, Walter D., assignor.)
Cincinnati Milling Machine Company, The. (See Ernst, H., and Nenninger, assignors.)
Cincinnati Milling Machine Company, The. (See Nenninger, Lester F., assignor.)
Clancy, Leo V. (See Croce, Alphonse U., assignor.)
Clark Bros. Co. (See Clark, C. P., and Bjornsson, assignors.)
Clark, Carl W., Bethesda, assignor of one-fourth to C. L. Ayers, St. Clairsville, and one-fourth to S. T. Vaughn, Bethesda, Ohio. Piston ring. 1,904,410; Apr. 18.
Clark, Charles P., Olean, and C. A. Bjornsson, Wellsville, N. Y., assignors to Clark Bros. Co., Olean, N. Y. Double acting internal combustion engine. 1,904,854; Apr. 18.
Clark, George H., and J. I. Deters, assignors to The Formica Insulation Company, Cincinnati, Ohio. Securing a bearing within a pulley. 1,903,776; Apr. 18.
Clark, Thomas B., Rockford, Ill., assignor, by mesne assignments, to The Permutit Company, Wilmington, Del. Water softening system and means for controlling operation thereof. 1,903,957; Apr. 18.
Clark, Thomas B., Rockford, Ill., assignor, by mesne assignments, to The Permutit Company, Wilmington, Del. Water softener. 1,903,958; Apr. 18.
Clarkson, John L., Nashville, Ill. Power loader. 1,904,855; Apr. 18.
Clarkson, Russell, Deptford, London, England. Packing machinery. 1,903,959; Apr. 18.
Clay Reduction Company. (See Svendsen, Svend S., assignor.)
Clayton, Bert A., Kewanee, Ill. Oil burner. 1,903,858; Apr. 18.
Clayton, Joseph, New York, N. Y. Winding mechanism. 1,904,411; Apr. 18.
Clemencon, Claude, Clauire-on-the-Rhone, France. Manufacturing crepes with threads of cellulose acetate artificial silk. 1,904,123; Apr. 18.
Climax Engineering Company, The. (See Mallory, Edward B., assignor.)
Clouse, William L., assignor to The National Machinery Company, Tiffin, Ohio. Lubricant cooler. 1,904,412; Apr. 18.
Cluett, Peabody & Co., Inc. (See Almond, Lester L., Herrington, and Matthews, assignors.)
Cochrane, John D., jr., assignor to The Formica Insulation Company, Cincinnati, Ohio. Decorated laminated product and producing same. 1,904,718; Apr. 18.
Cockrell, William D., Schenectady, N. Y., assignor to General Electric Company. Stroboscope. 1,904,124; Apr. 18.
Coffman, Joe W., Jackson Heights, assignor to Bell Telephone Laboratories Incorporated, New York, N. Y. Motion picture film. 1,903,981; Apr. 18.
Cofrin, Austin E., Green Bay, Wis. Smoothing stock on Fourdrinier wire. 1,904,780; Apr. 18.
Coin, George W., Manhattan, Kans. Air refrigerating device. 1,903,777; Apr. 18.
Colen, Bernard D. (See Strongson, Herman L., assignor.)
Collingbourne, Albert B., Elgin, Ill. String holder. Des. 89,629; Apr. 18.
Collins, John E., Alton, Ill., assignor to Owens-Illinois Glass Company. Machine for making glass stoppers and the like. 1,904,977; Apr. 18.
Collyer, Julius P., Old Greenwich, Conn. Telephone dial actuator. 1,904,413; Apr. 18.
Combustion Machinery Company. (See Cronin, Arthur D., assignor.)
Combustion Utilities Corporation. (See Caplan, Solomon, assignor.)
Compo Shoe Machinery Corporation. (See Bresnahan, William H., assignor.)
Condit Electrical Manufacturing Corporation. (See Ainsworth, Chester D., assignor.)
Cone, Carroll, assignor to Libbey-Owens-Ford Glass Company, Toledo, Ohio. Apparatus for the manufacture of sheet glass. 1,904,978; Apr. 18.
Conklin, David L., Independence, assignor of one-third to F. O. True, Kansas City, Mo. Display grease chart. 1,904,356; Apr. 18.
Conner, James E. (See McLavy, R. B., and Conner.)
Conroy, Marcus F., assignor to Luserne Motor Company, Luserne, Pa. Etching process and composition for use therein. 1,903,778; Apr. 18.
Consolidated Packaging Machinery Corp. (See Cundall, Robert N., assignor.)
Contact Filtration Company. (See Fuller, Ira K., assignor.)
Continental Can Company. (See Fink, H. A., and Schmidt, assignors.)
Cook, Everett J., assignor to The Dura Company, Toledo, Ohio. Doorlatch. 1,904,970; Apr. 18.
Cook, George E., New York, N. Y. Mixing device. 1,904,758; Apr. 18.
Cook, Leon W., Roselle, N. J., assignor to The Texas Company, New York, N. Y. Preparation of chlorhydrins. 1,904,677; Apr. 18.
Coombs, James A., London, England, assignor to Activated Sludge, Inc., Chicago, Ill. Activated sludge process of sewage and other impure liquid purification. 1,904,916; Apr. 18.
Cope, Ernest C., Spondon, near Derby, England, assignor to Celanese Corporation of America. Bearing and application thereof. 1,904,203; Apr. 18.
Cope, Frank T., A. H. Vaughan, and W. S. Bowling, assignors to The Electric Furnace Company, Salem, Ohio. Rotary heat treating furnace. 1,903,909; Apr. 18.
Coppus, Frans H. C., assignor to A. M. C. Wechsberg, V. L. Wood, and F. H. C. Coppus, as trustees, Worcester, Mass. Smoke disposal and draft inducing apparatus. 1,904,357; Apr. 18.

Cordy, Ivor, Washington, Pa., assignor to Hazel-Atlas Glass Company, Wheeling, W. Va. Jar. Des. 89,630; Apr. 18.
Corhart Refractories Company. (See Schroeder, Frederic W., assignor.)
Cottrell, Calvert B., 3d, assignor to C. B. Cottrell & Sons Company, Westerly, R. I. Bed and cylinder printing press. 1,904,855; Apr. 18.
Cottrell, Calvert B., 3d, assignor to C. B. Cottrell & Sons Company, Westerly, R. I. Bed and cylinder printing press. 1,904,856; Apr. 18.
Cottrell, C. B., & Sons Company. (See Cottrell, Calvert B., 3d., assignor.)
Cour d'Alene Hardware & Foundry Company. (See Haugen, Edward, assignor.)
Cousins, Van Meter, Lyndhurst, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Vacuum tube amplifier circuit. 1,904,272; Apr. 18.
Cozzens, Charles O., assignor to American Optical Company, Southbridge, Mass. Bridge for an opthalmic mounting. Des. 89,610; Apr. 18.
Craik, William, Paauilo, Hawaii. Shaft coupling. 1,903,982; Apr. 18.
Craver, Augustus E., Brooklyn, assignor to The Barrett Company, New York, N. Y. Production of aromatic aldehydes. 1,904,414; Apr. 18.
Crawford, Gertrude H., Milliken, Colo. Pastry confection. Des. 89,611; Apr. 18.
Crawford, John F., assignor to J. I. Case Company, Racine, Wis. Furnace. 1,904,781; Apr. 18.
Crighton, Peter F. (See Fraser, H. A., and Crighton.)
Croce, Alphonse U., assignor to Leo V. Clancy, Brockton, Mass. Channeling machine. 1,904,415; Apr. 18.
Crompton & Knowles Loom Works. (See Holmes, E. B., and Payne, assignors.)
Crompton & Knowles Loom Works. (See Wattle, W. M., and Whitten, assignors.)
Cronin, Arthur D., Detroit, Mich., assignor to Combustion Machinery Company, Wilmington, Del. Grate. 1,903,779; Apr. 18.
Cross, Frank L., Port Washington, N. Y., assignor to Cross Paper Feeder Company, Boston, Mass. Sheet separator for paper feeding machines. 1,904,416; Apr. 18.
Cross Paper Feeder Company. (See Cross, Frank L., assignor.)
Crouset, Nicolas, Buenos Aires, Argentina. Cabinet for keeping sound records. 1,904,824; Apr. 18.
Crowl, Charles A., assignor, by mesne assignments, to S. P. Foltz, New Castle, Pa. Heat exchanger. 1,904,857; Apr. 18.
Crowley, Charley A., Nashville, Tenn. Holder for reknitting fabrics. 1,903,893; Apr. 18.
Crowley, Henry L., & Company, Inc. (See Crowley, Henry L., assignor.)
Crowley, Henry L., assignor to Henry L. Crowley & Co., Inc., East Orange, N. J. Producing an article of manufacture. 1,904,273; Apr. 18.
Crowley, Henry L., East Orange, assignor to Henry L. Crowley & Company, Inc., West Orange, N. J. Grinding apparatus. 1,904,274; Apr. 18.
Crystler, Frank M., Lansing, Mich., assignor to Jones-Dabney Co. Finishing process. 1,904,417; Apr. 18.
Cundall, Robert N., East Hamburg, assignor to Consolidated Packaging Machinery Corp., Buffalo, N. Y. Weighing and filling machine. 1,904,652; Apr. 18.
Cureton, James G. (See Griffin, J. T., Deane, and Cureton.)
Currie, Eugene, Minneapolis, Minn. Sanitary brush. 1,904,917; Apr. 18.
Czechoslovak Company: Actiengesellschaft C. P. Goerz Optische Anstalt Actiova Spolecnost K. P. Goerz Opticky Ustav. (See von Hofe, C., and Boykow, assignors.)
Daggett, John D., Shafer, Minn. Bird's house. Des. 89,631; Apr. 18.
Dahlberg, Arthur O., Lake Worth, Fla., assignor to The Parker Pen Company, Janesville, Wis. Fountain pen. 1,904,358; Apr. 18.
D'Annunzio, George, Jersey City, assignor to Shoup-Owens, Inc., Hoboken, N. J. Pasteboard box. 1,904,125; Apr. 18.
Dantzsen, Christian, Schenectady, N. Y., assignor to General Electric Company. Insulation. 1,904,418; Apr. 18.
Davis, Augustine, jr. (See Haupt, Walter H., assignor.)
Davis, Augustine, jr. (See Shield, P. S., and Haupt, assignors.)
Davis, Bernard H., Fullerton, Calif. Bridging block for wells. 1,904,275; Apr. 18.
Davis, Ernest, assignor to The Prosperity Company Inc., Syracuse, N. Y. Shirt pressing machine with laterally movable head. 1,904,858; Apr. 18.
Davis, Eugene H., and W. F. Johnston, Philadelphia, assignors of one-fourth to N. Walker, Somerton, Pa., and one-fourth to J. H. Thompson, Trenton, N. J. Oil pump. 1,904,653; Apr. 18.
Davis, Frank L., jr., Kenilworth, assignor to The Watson-Stillman Co., Roselle, N. J. Lead extrusion apparatus. 1,904,419; Apr. 18.
Dawson, Oliver H. (See Edmonds, W. J., and Dawson.)
Dayton Scale Company. (See Breaden, Carroll E., assignor.)
Dayton Scale Company. (See Gumprich, William, assignor.)
Dayton Scale Company. (See Haskins, Clifford B., assignor.)
Dean, Reginald S., Washington, D. C., assignor to Western Electric Company, Incorporated, New York, N. Y. Ferrous alloy. 1,904,859; Apr. 18.
Deane, John P. (See Griffin, J. T., Deane, and Cureton.)
De Asis, Paul, Burbank, Calif. Dishwashing machine. 1,903,780; Apr. 18.
De Beaumarchais, Charles, assignor to Le Materiél Electrique S. W., Paris, France. Recording apparatus. 1,904,719; Apr. 18.
De Boer, Jan H., W. C. Van Geel, and H. Emmens, assignors to N. V. Philips' Gloeilampenfabrieken, Eindhoven, Netherlands. Dry rectifier. 1,904,276; Apr. 18.
De Bothezat, George, New York, N. Y. Ventilating system. 1,903,988; Apr. 18.
De Bucci, Romeo A., Providence, R. I. Coat and trouser hanger. 1,903,277; Apr. 18.
Decker, James W., New York, N. Y. Stock quotation projecting machine. 1,903,806; Apr. 18.
Delafon, Jean M. J., Samoreau-sur-Seine, France. Machine for perforating slow emulsion films while they are being shown on the screen. 1,904,801; Apr. 18.
De Lancey, Warren H., Springfield, assignor to Gilbert & Barker Manufacturing Company, West Springfield, Mass. Liquid dispensing system. 1,904,302; Apr. 18.
De Laney, Wallace W., assignor to The Seamless Rubber Company, Inc., New Haven, Conn. Heating pad or similar article. Des. 89,612; Apr. 18.
Delco Products Corporation. (See Teeter, Wilford H., assignor.)
Delery, Edna F. (See Delery, Eugene F., assignor.)
Delery, Eugene F., deceased, New Orleans, La.; assigned by Decree of Distribution to Mrs. E. F. Delery. Fluid control valve. 1,904,204; Apr. 18.
Demers, Octave F., Bristol, Conn. Can opener. 1,903,984; Apr. 18.
Dennis, Charles H., Jackson, Mich., assignor to The American Fork & Hoe Company, Cleveland, Ohio. Rake. 1,904,860; Apr. 18.
De Riccio, Eduardo R., Berlin, Germany. Electric heating and cooking appliance. 1,904,205; Apr. 18.
De Sherbinin, William N., Hastings-upon-Hudson, N. Y. Lamp shade supporting device. 1,903,985; Apr. 18.
Des Rosiers, John B., Providence, R. I. Controlling means for vehicle wheel brakes. 1,904,359; Apr. 18.
Deters, John L. (See Clark, G. H., and Deters.)
Dickhaut, Charles A., New York, N. Y., assignor to John Waldron Corporation, New Brunswick, N. J. Web tensioning mesns. 1,904,420; Apr. 18.
Dickinson, Allan B., Brooklyn, assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Message register circuit for telegraph exchanges. 1,903,278; Apr. 18.
Diebenkorn, Richard C., assignor to Dohrmann Hotel Supply Co., San Francisco, Calif. Sherbet glass or similar article. Des. 89,613; Apr. 18.
Diebenkorn, Richard C., assignor to Dohrmann Hotel Supply Co., San Francisco, Calif. Tumbler or similar article. Des. 89,614; Apr. 18.
Diggles, George L. (See Garms, P., and Diggles.)
Dijksterhuis, Popko R. (See Strutt, M. J. O., and Dijksterhuis.)
Dinkler, August M., Waterbury, and C. S. Smith, Cheshire, Conn., assignors to The American Brass Company, Waterbury, Conn. Brazing solder. 1,904,360; Apr. 18.
Dixon, Israel K., Johnstown, Pa. Tongue switch. 1,904,206; Apr. 18.
Doble Steam Motors Corporation. (See Doble, Warren, assignor.)
Doble, Warren, Emeryville, Calif., assignor to Doble Steam Motors Corporation, Wilmington, Del. Boiler. 1,903,807; Apr. 18.
Dobos, Ladislaus, Binghamton, N. Y. Headlight for automobiles. 1,904,896; Apr. 18.
Doherty Research Company. (See Lindberg, Lawrence W., assignor.)
Doherty Research Company. (See Merley, S. R., and Spring, assignors.)
Doherty Research Company. (See Morgan, John D., assignor.)
Dohrmann Hotel Supply Co. (See Diebenkorn, Richard C., assignor.)
Donadeu, Ramon, Buenos Aires, Argentina. Hinge. 1,904,207; Apr. 18.
Donaldson, John S., St. Albans, N. Y. Piston. 1,904,126; Apr. 18.
Donle, Harold P., Meriden, Conn., assignor to Radio Inventions, Inc. Television reception. 1,903,986; Apr. 18.
Donnelly, Joseph F., South Bellingham, Wash. Lifting jack. 1,904,279; Apr. 18.
Doohan, William P. (See Stratford, R. K., and Doohan.)
Dooley Bros. (See Fellay, Louis J., assignor.)
Doran, John H., Scotia, N. Y., assignor to General Electric Company. Bucket wheel. 1,904,421; Apr. 18.
Doremus, Cornelius W., Washington, D. C. Electrical terminal. 1,903,808; Apr. 18.
Doughnut Machine Corporation. (See Hunter, Herbert T., assignor.)
Douglass, Royal, South Bellingham, Wash. Can unloader. 1,904,720; Apr. 18.
Dow, Jennings B., Alexandria, Va. Variable inductance system. 1,904,208; Apr. 18.
Doyle, John P., Lolo, Mont. Self-cleaning fish gate. 1,903,754; Apr. 18.

Dreyfus, Camille, New York, N. Y. Fabric and sheet material and the manufacture thereof. 1,903,960; Apr. 18.
Dreyfus, Camille, New York, N. Y., and George Schneider, Montclair, N. J., assignors to Celanese Corporation of America. Removing combined sulphur from cellulose acetate. 1,903,961; Apr. 18.
Dreyfus, Camille, New York, N. Y., and W. Whitehead, Cumberland, Md., assignors to Celanese Corporation of America. Making artificial filaments and product thereof. 1,904,209; Apr. 18.
Dreyfus, Henry, London, England. Manufacture of cellulose or cellulosic products. 1,903,962; Apr. 18.
Duff-Norton Manufacturing Company, The. (See Schwerin, Frank H., assignor.)
Duncan, Lee N., Oklahoma City, Okla. Sprinkling device. 1,904,292; Apr. 18.
Dunlop Rubber Company, Limited. (See Twiss, D. F., and Gorham, assignors.)
Dunn, Allen I., assignor to Cedar Rapids Engineering Company, Cedar Rapids, Mich. Valve reseating tool driver. 1,904,941; Apr. 18.
Dunn, Edward L. (See Lindquist, D. L., Dunn, and Larson.)
Du Pont, E. I. de Nemours & Company. (See Callahan, Michael J., assignor.)
Du Pont, E. I., de Nemours & Company. (See Gubelmann, Ivan, assignor.)
Du Pont, E. I., de Nemours & Company. (See Gubelmann, I., Welland, and Stallmann, assignors.)
Du Pont, E. I., de Nemours & Company. (See Handforth, Stanley L., assignor.)
Du Pont, E. I., de Nemours and Co. (See Jones, D. T., and Moore, assignors.)
Dura Company, The. (See Cook, Everett J., assignor.)
Duryea, O. C., Corporation. (See Duryea, Otho C., assignor.)
Duryea, Otho C., Waterbury, Conn., assignor to O. C. Duryea Corporation, Wilmington, Del. Car construction. 1,904,293; Apr. 18.
Duryea, Otho C., Waterbury, Conn., assignor to O. C. Duryea Corporation, Wilmington, Del. Car construction. 1,904,294; Apr. 18.
Dybvig, Henry G., assignor to General Motors Radio Corporation, Dayton, Ohio. Electrical apparatus. 1,904,422; Apr. 18.
Dysart, William L., Louisville, Ky. Antiglare device. 1,903,917; Apr. 18.
Eby, Eugene D., Pittsfield, Mass., assignor to General Electric Company. Indicator for reservoirs for liquid filled cables. 1,904,423; Apr. 18.
Eby, Hugh H. (See Benjamin, Reuben B., assignor.)
Eby, Hugh H. (See MacFadden, Wilford C., assignor.)
Eclipse Aviation Corporation. (See Nowodielski, Edward B., assignor.)
Eclipse Textile Devices, Inc. (See Hasbrouck, Louis B., assignor.)
Eclipse Machine Company. (See Christian, Frank T., assignor.)
Eclipse Machine Company. (See Wertz, Daniel L., assignor.)
Eclipse Machine Company. (See Whiteny, Maurice P., assignor.)
Eddy, E. B., Company. (See Saunders, Alec L., assignor.)
Edison, Thomas A., Incorporated. (See Matsner, Hyman, assignor.)
Edmonds, William J., and O. H. Dawson, Baytown, Tex., assignor to Standard Oil Development Company. Removal of hydrogen sulphide from gas mixtures and for the recovery of elemental sulphur. 1,904,424; Apr. 18.
Edwards, Frank W., assignor to The Ohio Injector Company of Illinois, Chicago, Ill. Lubrication assembly. 1,904,295; Apr. 18.
Edwards, Thomas J., Hawthorn, Victoria, Australia. Lawn mower. 1,904,280; Apr. 18.
Efcolite Corporation. (See von Nessen, Walter, assignor.)
Egan, John J., Brooklyn, N. Y., assignor to Electro Metallurgical Company. Nitriding ferrous alloys. 1,904,425; Apr. 18.
Egloff, Gustav, assignor to Universal Oil Products Company, Chicago, Ill. Conversion of hydrocarbon gases. 1,904,362; Apr. 18.
Egloff, Gustav, and L. A. Mekler, assignors to Universal Oil Products Company, Chicago, Ill. Method and apparatus for utilising radiant heat energy. 1,904,361; Apr. 18.
Ehemann, Joseph J. (See Singer, B. F., and Ehemann.)
Eichel, John V., jr., assignor to H. S. Getty and Company, Incorporated, Philadelphia, Pa. Lock. 1,904,210; Apr. 18.
Eisele, Harry T., West Dover, Ohio. Ratchet guide and support. 1,903,781; Apr. 18.
Eisenhut, Otto, Heidelberg, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Production of acetylene and hydrogen. 1,904,426; Apr. 18.
Eisenmann, Karl. (See Punga, W., and Eisenmann.)
Eisner, Hans, Berlin-Tempelhof, and H. Vollmer, Berlin-Halensee, Germany. Procedure in the production of a perfume or cosmetic. 1,904,211; Apr. 18.
Electric Furnace Company, The. (See Cope, F. T., Vaughan, and Bowling, assignors.)
Electrical Research Products Inc. (See Reynolds, John L., assignor.)
Electrical Testing Laboratories. (See Garms, P., and Diggles, assignors.)
Electro Metallurgical Company. (See Becket, Frederick M., assignor.)
Electro Metallurgical Company. (See Egan, John J., assignor.)
Electrolux Servel Corporation. (See Munters, Carl G., assignor.)
Electrons, Inc. (See von Wedel, Carl J. R. H., assignor.)
Ellington, Cornwallis D., assignor of one-half to A. E. Schwingel and W. H. Bertsche, Great Falls, Mont. Aircraft. 1,904,281; Apr. 18.
Elliott-Fisher Company. (See Foothorap, Harry A., assignor.)
Ellis, Carleton, Montclair, N. J., assignor to Ellis-Foster Company. Making phenol-formaldehyde resins containing an alkaline earth metal base. 1,903,809; Apr. 18.
Ellis, Edward D. (See Hasson, P. R., and Ellis.)
Ellis-Foster Company. (See Ellis, Carleton, assignor.)
Ellison Bronze Company, Inc. (See Ellison, Edward H., assignor.)
Ellison, Edward H., Jamestown, assignor to Ellison Bronze Company, Inc., Falconer, N. Y. Ventilator. 1,904,654; Apr. 18.
Else, Walter C., Forest Hills, assignor to Hauck Manufacturing Company, Brooklyn, N. Y. Forge. 1,904,427; Apr. 18.
Emeth Financial Corporation. (See Goodman, Abraham, assignor.)
Emmens, Hendrik. (See De Boer, J. H., Van Geel, and Emmens.)
Emrick, George W., assignor to Etteo Tool Co., Inc., Brooklyn, N. Y. Multiple disk clutch. 1,903,963; Apr. 18.
Enemark, Hans J. P., Stapleton, N. Y. Spraying device. 1,904,428; Apr. 18.
Engberg, Axel O., and E. Ahnström, Stockholm, Sweden, assignors to Inventia Patent-Verwertungs-Gesellschaft, Schaffhausen, Switzerland. Washing machine. 1,903,987; Apr. 18.
Engelhardt, Rudolf. (See Lommel, W., and Engelhardt.)
Engineering Development Company, The. (See Maxon, G., jr., and Ord, assignors.)
Ern, Robert, Solingen, Germany. Polishing apparatus, specially for knives, forks, and spoons. 1,904,282; Apr. 18.
Ernst, Hans, and L. F. Nenninger, assignors to The Cincinnati Milling Machine Company, Cincinnati, Ohio. Milling machine. 1,904,971; Apr. 18.
Esterow, Harry, New York, N. Y. Fountain pen clip. 1,904,212; Apr. 18.
Etteo Tool Co., Inc. (See Emrick, George W., assignor.)
Ettinger, Joe J., assignor to Zimmer Manufacturing Company, Warsaw, Ind. Surgical splint. 1,904,863; Apr. 18.
Ettl, Joseph, Plainfield, N. J., assignor to Potdevin Machine Company, Brooklyn, N. Y. Tape handling apparatus. 1,904,861; Apr. 18.
Evans, Earle W., Linden, N. J., assignor to Standard Oil Development Company. Temperature control in lubricating oil systems. 1,904,429; Apr. 18.
Evans, George V., assignor to Brushaway Products, Incorporated, Cleveland, Ohio. Cleaning brush. 1,904,041; Apr. 18.
Everedy Company, The. (See Lebbers, Harry J., assignor.)
Everts, Floyd A., Detroit, Mich. Tool holder. 1,904,042; Apr. 18.
Ewald, Warren, assignor, by mesne assignments, to Buckeye Blower Company, Columbus, Ohio. Heating and ventilating apparatus. 1,904,918; Apr. 18.
Ewing, Charles R., Toronto, Ontario, and T. Montgomery, Sarnia, Ontario, Canada, assignors to Standard Oil Development Company. Method and apparatus for distilling oil. 1,904,218; Apr. 18.
Ewing, Henry, and R. P. Roberts, Spondon, near Derby, England, assignors to Celanese Corporation of America. Dynamometer. 1,904,678; Apr. 18.
Ewing, James L., and R. R. Tobias, New Orleans, La. Feeding device for type casting machines. 1,903,904; Apr. 18.
Eyring, Adolf G., Pittsburgh, Pa. Combined window ventilator and sash fastener. 1,903,782; Apr. 18.
Fabrice, Edward H., Chicago, Ill. Bottle. Des. 89,632; Apr. 18.
Fabrik Elektrothermischer Apparate A. G. Lusern. (See Schwander, Max, assignor.)
Fabrik Explosionssicherer Gefässe Salzkotten G. m. b. H. (See Huribrink, Ernst, assignor.)
Fafnir Bearing Company, The. (See Betz, William C., assignor.)
Fagan, Charles D., Sharon, and R. W. Swank, assignors to Sharpsville Boiler Works Co., Sharpsville, Pa. Flow indicator. 1,904,283; Apr. 18.
Fagan, Charles D., Sharon, and R. W. Swank, assignors to Sharpsville Boiler Works Co., Sharpsville, Pa. Pump. 1,904,284; Apr. 18.
Fagan, George F., Pueblo, Colo. Automotive tool. 1,903,755; Apr. 18.
Fagan, James M., Maplewood, N. J., assignor to Westinghouse Lamp Company. Device for high frequency induction heating. 1,904,214; Apr. 18.
Fairbanks, Morse & Co. (See Hobart, Franklin G., assignor.)

Fairweather, David A. W., Falkirk, and J. Thomas, Polmont, Scotland, assignors to Imperial Chemical Industries Limited. Manufacture of sulphuric esters of anthra-hydroquinones. 1,904,721; Apr. 18.

Falcone, Peter, and R. E. Winton, San Jose, Calif. Hair waving clamp. 1,904,979; Apr. 18.

Farley, Francis S., Trenton, N. J., assignor, by mesne assignments, to Johns-Manville Corporation, New York, N. Y. Method and machinery for the manufacture of acoustical board and the like. 1,904,285; Apr. 18.

Farmers Manufacturing Company. (See Steel, John B., assignor.)

Fausse. Joseph, Melrose, assignor to The Littleway Process Company, Lynn, Mass. Holding shoe uppers in lasted position. 1,904,303; Apr. 18.

Faust, Claus W., Elmwood, Conn., assignor, by mesne assignments, to The Hess-Bright Manufacturing Company, Philadelphia, Pa. Spring chuck. 1,903,964; Apr. 18.

Faust, Otto. (See Hottenroth, V., and Faust.)

Federal Electric Company. (See Barclay, Robert E., assignor.)

Fegley, Thomas J., and G. O. Leopold, assignors to North Bro's M'f'g. Co., Philadelphia, Pa. Push drill. 1,904,679; Apr. 18.

Fellay, Louis J., assignor to Dooley Bros., Peoria, Ill. Mining drill mounting. 1,904,655; Apr. 18.

Fellay, Louis J., assignor to Dooley Bros., Peoria, Ill. Mining drill post. 1,904,656; Apr. 18.

Fellay, Louis J., assignor to Dooley Brothers, Peoria, Ill. Mining drill. 1,904,657; Apr. 18.

Felten & Guilleaume Carlswerk Actiengesellschaft. (See Baum, Reinhold, assignor.)

Fenton, Paul E., Thomaston, assignor to Scovill Manufacturing Company, Waterbury, Conn. Separable fastener. 1,904,722; Apr. 18.

Ferguson Brothers Manufacturing Company. (See Tinsley, Milton L., assignor.)

Ferrando, Amedeo, and A. Zanzi, assignors to Ditta Giovanni Zanzi, Ivrea, Italy. Making valves for explosion engines. 1,904,430; Apr. 18.

Ferry, William J., assignor, by mesne assignments, to Ferry's Incorporated, Oakland, Calif. Radial cam type internal combustion engine. 1,904,680; Apr. 18.

Ferry's Incorporated. (See Ferry, William J., assignor.)

Fertsch, Friedrich K., assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Producing vinyl chloride. 1,903,894; Apr. 18.

Fettsaure- und Glycerin-Fabrik G. m. b. H. (See Kantorowicz, H., and Köhler, assignors.)

Fickett, Ernest L., Fitchburg, Mass., assignor to Manning, Maxwell & Moore, Inc., New York, N. Y. Cutter for cutting spiral bevel gears. 1,903,988; Apr. 18.

Fiedler, Sébastien, O. A., assignor to l'Auxiliaire des Chemins de Fer et de l'Industrie, Paris, France. Feed water heating plant. 1,904,431; Apr. 18.

Field, Crosby, Brooklyn, N. Y., assignor to Brillo Manufacturing Company, Inc. Reel. 1,904,027; Apr. 18.

Field, Crosby, Brooklyn, and C. L. Campbell, Scarsdale, N. Y., assignors to Brillo Manufacturing Company, Inc. Manufacture of resilient pads. 1,904,026; Apr. 18.

Fink, Colin G., New York, N. Y., assignor to Chemical Treatment Company, Inc. Electrodepositing chromium. 1,904,432; Apr. 18.

Fink, Henry A., New York, N. Y., and J. E. Schmidt, Chicago, Ill., assignors to Continental Can Company, Inc., New York, N. Y. Control mechanism for clinching machine. 1,903,989; Apr. 18.

Firestone Tire & Rubber Company, The. (See Karl, William A., assignor.)

Fischer, Albert C., Chicago, Ill., assignor, by mesne assignments, to The Philip Carey Manufacturing Company. Expansion joint for concrete roads. 1,903,756; Apr. 18.

Fischer, Herbert G. M., Westfield, and C. E. Gustafson, Elizabeth, N. J., assignors to Standard Oil Development Company. Hydrocarbon oils and making the same. 1,904,433; Apr. 18.

Fisher, Frances E., Twin Falls, Idaho. Educational device. 1,904,723; Apr. 18.

Fisk, Gustav Leonard, assignor to Mesta Machine Company, Pittsburgh, Pa. Cooling bed. 1,904,434; Apr. 18.

Fitzgerald Manufacturing Company, The. (See Fitzgerald, Martin D., assignor.)

Fitzgerald, Martin D., assignor to The Fitzgerald Manufacturing Company, Torrington, Conn. Gasket. 1,903,990; Apr. 18.

Flammer, Howard A., Newark, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Indicator device. 1,904,435; Apr. 18.

Flanders, Ralph E., assignor to Jones & Lamson Machine Company, Springfield, Vt. Method and machine for grinding chasers. 1,904,304; Apr. 18.

Flannagan, Samuel H., Richmond, Va. Refrigerator water cooler. 1,904,782; Apr. 18.

Flexlume Corporation. (See Madine, John J., assignor.)

Florido, Pablo V., Annapolis, Md. Faucet structure. 1,903,757; Apr. 18.

Florman, Irving, New York, N. Y. Ash tray or the like. Des. 89,633; Apr. 18.

Foltz, Stewart P. (See Crowl, Charles A., assignor.)

Foote-Burt Company, The. (See Babcock, Walter F., assignor.)

Foothorap, Harry A., Harrisburg, Pa., assignor to Elliott-Fisher Company. Automatic electric writing-computing machine. 1,904,127; Apr. 18.

Foothorap, Harry A., Harrisburg, Pa., assignor to Elliott-Fisher Company. New York, N. Y. Toll posting machine. 1,904,862; Apr. 18.

Ford, Hannibal C., Jamaica, assignor to Ford Instrument Company, Inc., Long Island City, N. Y. Artillery computing system. 1,904,215; Apr. 18.

Ford Instrument Company. (See Ford, Hannibal C., assignor.)

Formica Insulation Company, The. (See Clark, G. H., and Deters, assignors.)

Formica Insulation Company, The. (See Cochrane, John D., jr., assignor.)

Forward, Chauncey B., Urbana, Ohio, assignor to Forward Process Company, Dover, Del. Apparatus for refining oil. 1,903,810; Apr. 18.

Forward, Chauncey B., Urbana, Ohio, assignor, by mesne assignments, to Forward Process Company, Dover, Del. Steam generator and superheater and operation thereof. 1,904,216; Apr. 18.

Forward Process Company. (See Forward, Chauncey B., assignor.)

Foster Wheeler Corporation. (See Wexler, Meyer, assignor.)

Fowler, Charles H., Leeds, England. Ridging implement on tilling machines. 1,903,991; Apr. 18.

Fowler, John, & Co., (Leeds) Ltd. (See Hasson, P. R., and Ellis, assignors.)

Fox, Martin, assignor to The Seng Company, Chicago, Ill. Metal fixture for typewriter desks. 1,904,217; Apr. 18.

Franceway, James A., Baton Rouge, La., assignor to Standard Oil Development Company. Restoring the activity of hydrogenation catalysts. 1,904,218; Apr. 18.

Frank, Henry, Brooklyn, N. Y. Drafting pen. 1,903,965; Apr. 18.

Frank, John. (See Frank, Mary and J.)

Frank, Mary and J., New York, N. Y. Marcelling device. 1,904,043; Apr. 18.

Frankenburger, Walter, and G. Roessler, Ludwigshafen-on-the-Rhine, Germany, assignors to Agfa Ansco Corporation, Binghamton, N. Y. Production and application of layers sensitive to light. 1,903,783; Apr. 18.

Franklin, Charles Samuel, London, England, assignor to Radio Corporation of America. Thermionic tube. 1,904,436; Apr. 18.

Franklin Simon & Company, Inc. (See Hennessy, Mary C., assignor.)

Frants, Grover C., Harrisburg, Pa., assignor, by mesne assignments, to J. A. Sexauer Mfg. Co., Inc., New York, N. Y. Spring connection. 1,904,681; Apr. 18.

Fraser, Henry A., and P. F. Crighton, London, England. Chair or settee bedstead. 1,903,918; Apr. 18.

Frederics, E., Inc. (See Frederics, Ernest O., assignor.)

Frederics, Ernest O., assignor to E. Frederics, Inc., New-York, N. Y. Electrical treating apparatus. 1,904,437; Apr. 18.

Freeman, Ernest H., Wilmette, Ill., assignor to Republic Flow Meters Co., Chicago, Ill. Integrating meter. 1,904,438; Apr. 18.

Freer, Phelps M., Detroit, Mich. Piston. 1,904,305; Apr. 18.

Freezidor Syndicate. (See Wright, Leonard K., assignor.)

French & Hecht, Incorporated. (See Hecht, Joseph L., assignor.)

Freund, Hugo A., et al. (See Nichols, Horace E., assignor.)

Freyermuth, George H. (See Young, P. L., Hanks, and Freyermuth.)

Freyermuth, George H., Elizabeth, N. J., assignor to Standard Oil Development Company. Production of hydrogen from hydrocarbon gases. 1,904,439; Apr. 18.

Freyermuth, George H., Elizabeth, N. J., and W. V. Hanks, Baton Rouge, La., assignors to Standard Oil Development Company. Reactivation of catalyst used in the preparation of hydrogen. 1,904,440; Apr. 18.

Freyermuth, George H., Elizabeth, N. J., and J. K. Small and W. V. Hanks, Baton Rouge, La., assignor to Standard Oil Development Company. Production of hydrogen from refinery and other hydrocarbon gases. 1,904,441; Apr. 18.

Fr. Hesser, Maschinenfabrik-Aktiengesellschaft. (See Gangler, Paul, assignor.)

Friberg, Carl A., Malmo, Sweden. Method and apparatus for edge rolling of crepe paper. 1,904,825; Apr. 18.

Fried Krupp Aktiengesellschaft. (See Wolf, Peter, assignor.)

Friedman Manufacturing Company, The. (See Keating, Clarence S., assignor.)

Frigidaire Corporation. (See Hull, Harry B., assignor.)

Fromm, George J., assignor to Hickok Manufacturing Company, Inc., Rochester, N. Y. Belt buckle. Des. 89,634; Apr. 18.

Fromm, George J., assignor to Hickok Manufacturing Company, Inc., Rochester, N. Y. Belt buckle. Des. 89,635; Apr. 18.

Fromm, George J., assignor to Hickok Manufacturing Company, Inc., Rochester, N. Y. Belt buckle. Des. 89,636; Apr. 18.

Fuller, Charles E.. (See Shoop, Fred M., assignor.)

Fuller, Ira K., Olean, N. Y., assignor, by mesne assignments, to Contact Filtration Company. Decolorizing oils. 1,904,682; Apr. 18.

Fuller, James W., Catasauqua, Pa., assignor, by mesne assignments, to Fuller Lehigh Company. Burning fuel. 1,904,128; Apr. 18.

Fuller Lehigh Company. (See Bailey, E. G., and Hardgrove, assignors.)

Fuller Lehigh Company. (See Fuller, James W., assignor.)

Fuller Lehigh Company. (See Kerr, Howard J., assignor.)

Fuller Lehigh Company. (See Lucke, Charles E., assignor.)

Fullmer, Giles C., assignor to The Bridgeport Metal Goods Manufacturing Company, Bridgeport, Conn. Holder for cosmetics and the like. 1,904,364; Apr. 18.

Fulton Bag & Cotton Mills, et al. (See Hancock, R. J., and Garrison, assignors.)

G & G Atlas Systems, Inc. (See Stoetzel, Joseph J., assignor.)

Gagnier, George E. (See Place, Bion C., assignor.)

Gangler, Paul, Esslingen, assignor to Firm Fr. Hesser, Maschinenfabrik-Aktiengesellschaft, Stuttgart-Cannstadt, Germany. Combined machine for making, filling, and closing bags. 1,904,131; Apr. 18.

Garms, Peter, New York, and G. L. Diggles, Flushing, assignors to Electrical Testing Laboratories, New York, N. Y. Thermostatic radiation indicator. 1,904,129; Apr. 18.

Garms, Peter, New York, and G. L. Diggles, Flushing, assignors to Electrical Testing Laboratories, New York, N. Y. Thread testing and recording device. 1,904,130; Apr. 18.

Garrison, John L. L. (See Hancock, R. J., and Garrison.)

Garrity, John G., and E. L. McCarthy, Pittsburgh, Pa. Electric automatic recording apparatus. 1,904,783; Apr. 18.

Garrity, John G., and E. L. McCarthy, Pittsburgh, Pa. Electric automatic recording scale. 1,904,784; Apr. 18.

Gartland, Michael J., Washington, D. C. Jig-saw puzzle holder. 1,904,724; Apr. 18.

Gas Fuel Corporation. (See Russell, Robert H., assignor.)

Gasiorowski, Ernst, Berlin-Hermsdorf, Germany, assignor to General Electric Company. High tension switch plant. 1,904,442; Apr. 18.

Gaskill, Kenneth W., Cleveland, Ohio. Gear-shifting mechanism. 1,903,758; Apr. 18.

Gaterman, W., Mfg. Co. (See Kind, Frederick H., assignor.)

Gay, Norman H., Los Angeles, Calif. Liquid level gauge for volatile liquids. 1,904,785; Apr. 18.

Gebhard, Louis A., Washington, D. C., assignor to Wired Radio, Inc., New York, N. Y. Control apparatus. 1,903,759; Apr. 18.

Gebhard, Louis A., and R. R. Meyer, Washington, D. C. Antenna system. 1,903,811; Apr. 18.

Gebhard, Louis A., and C. F. Rudolph, Washington, D. C., assignors to Wired Radio, Inc., New York, N. Y. Shock-proof mounting for a high power frequency amplifier system. 1,903,812; Apr. 18.

Geiss, Willy. (See Van Liempt, J. A. M., and Geiss.)

Geist, William J., Lockport, Ill. Collapsible receptacle. 1,904,365; Apr. 18.

General Aniline Works, Inc. (See Bayer, O., and Baumann, assignors.)

General Aniline Works, Inc. (See Bruck, Walter, assignor.)

General Aniline Works, Inc. (See Kuns, M. A., Koeberle, and Berthold, assignors.)

General Aniline Works, Inc. (See Laska, L., and Haller, assignors.)

General Aniline Works, Inc. (See Mieg, W., and Heidenreich, assignors.)

General Aniline Works, Inc. (See Sander, Ludwig, assignor.)

General Atlas Carbon Company. (See Keller, Theodore P., assignor.)

General Cable Corporation. (See Kent, Moss A., assignor.)

General Cable Corporation. (See Potter, Frank M., assignor.)

General Carbonalpha Company, The. (See Willekens, Jacobus J. C., assignor.)

General Electric Company. (See Abbott, Charles C., assignor.)

General Electric Company. (See Adams, Lester V., assignor.)

General Electric Company. (See Aoki, Koichi, assignor.)

General Electric Company Limited, The. (See Campbell, Norman R., assignor.)

General Electric Company. (See Cockrell, William D., assignor.)

General Electric Company. (See Dantzisen, Christian, assignor.)

General Electric Company. (See Doran, John H., assignor.)

General Electric Company. (See Eby, Eugene D., assignor.)

General Electric Company. (See Gasiorowski, Ernst, assignor.)

General Electric Company. (See Hardy, Arthur C., assignor.)

General Electric Company. (See Haseltine, Louis A., assignor.)

General Electric Company. (See Hilliard, John D., assignor.)

General Electric Company. (See Horowitz, Eugen, assignor.)

General Electric Company. (See Hoyt, Samuel L., assignor.)

General Electric Company. (See Kissing, Friedrich, assignor.)

General Electric Company. (See Kobayashi, K., assignor.)

General Electric Company. (See Kubach, William L., assignor.)

General Electric Company. (See Livingston, Orrin W., assignor.)

General Electric Company. (See Lyon, C. L., and Jagger, assignors.)

General Electric Company. (See McDavitt, Carlisle N., assignor.)

General Electric Company. (See McLenegan, David W., assignor.)

General Electric Company. (See Nordlander, Birger W., assignor.)

General Electric Company. (See Paul, William E., assignor.)

General Electric Company. (See Rice, Chester W., assignor.)

General Electric Company. (See St. Clair, Byron W., assignor.)

General Electric Company. (See Sandelowsky, Sally, assignor.)

General Electric Company. (See Standerwick, Reginald G., assignor.)

General Electric Company. (See Steenstrup, Christian, assignor.)

General Electric Company. (See Swanson, Ernest G., assignor.)

General Electric Company. (See Taylor, George F., assignor.)

General Electric Company. (See Tobey, H. W., and May, assignors.)

General Electric Company. (See Uebermuth, Werner, assignor.)

General Electric Company. (See Van Liempt, J. A. M., and Geiss, assignors.)

General Electric Company. (See Van Nordstrand, Robert D., assignor.)

General Industries Company, The. (See Bonsieur, Le., assignor.)

General Machinery Corporation. (See Byerlein, Arthur A., assignor.)

General Motors Radio Corporation. (See Brewer, Francis T., assignor.)

General Motors Radio Corporation. (See Dybvig, Henry G., assignor.)

Gerhold, Alfred, London, England. Stand for plates and the like. 1,904,725; Apr. 18.

Gerrard Company, The. (See Spoor, Ivan H., assignor.)

Getty, H. S., and Company. (See Eichel, John V., jr., assignor.)

Gibson Art Company, The. (See Wells, M. R., and Hillix, assignors.)

Gilbert & Barker Manufacturing Company. (See De Lancey, Warren H., assignor.)

Gilbert, John J., Douglaston, assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Submarine cable loading coil. 1,903,992; Apr. 18.

Gillican-Chipley Company. (See Hitch, Arthur R., assignor.)

Girard, James B., Phoenix, Ariz. Dam and making same. 1,903,760; Apr. 18.

Giuliano, Anthony P., Newark, N. J. Detecting metallic objects in hides and skins. 1,904,826; Apr. 18.

Glascodine, Richard T., London, England. Rolling stock. 1,903,859; Apr. 18.

Glatzner, Louis O., Bristol, Pa. Changeable illuminated display. 1,904,132; Apr. 18.

Gleason Works. (See Head, Ernest C., assignor.)

Gleason Works. (See Wildhaber, Ernest, assignor.)

Gleichmann, Hans, Falkenhain near Spandau, assignor to Siemens-Schuckertwerke Aktiengesellschaft, Berlin-Siemensstadt, Germany. Steam plants. 1,904,443; Apr. 18.

Glenn, Arthur B., Los Angeles, Calif. Engraver's mat. 1,903,813; Apr. 18.

Gockel, Heinrich, Leverkusen-on-the-Rhine, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Preparation of metallic coatings. 1,903,860; Apr. 18.

Goehring, William F., Baltimore, Md. Clutch. 1,903,993; Apr. 18.

Gohr, Edwin J., Elizabeth, N. J., assignor to Standard-I. G. Company. Treating hydrocarbons. 1,904,133; Apr. 18.

Goldman, Jacob S., Port Huron, Mich. Ash trays for card tables. 1,903,994; Apr. 18.

Good, Harper A., assignor to Landis Tool Company, Waynesboro, Pa. Mechanism for producing curved axial surface on rolls. 1,904,827; Apr. 18.

Goodman, Abraham, Brooklyn, N. Y., assignor to Emeth Financial Corporation. Hair waver. 1,904,444; Apr. 18.

Gookin, Sylvester L., Quincy, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Fastener inserting machine. 1,904,306; Apr. 18.

Gorham, Walter G. (See Twiss, D. F., and Gorham.)

Goss Printing Press Company. (See Laycock, Kenneth G., assignor.)

Goss Printing Press Company. (See Richter, Charles J., assignor.)
Gossner, Joseph, et al. (See Parrett, Dent, assignor.)
Gottschick, George D., et al. (See Watson, Claude G., assignor.)
Gough, James J., assignor to Chicago Electric Manufacturing Co., Chicago, Ill. Electric toaster. Des. 89,637; Apr. 18.
Gough, James J., assignor to Chicago Electric Manufacturing Co., Chicago, Ill. Electric toaster. Des. 89,638; Apr. 18.
Graff, George U., Washington, D. C. Pyrotechnic starter composition. 1,903,814; Apr. 18.
Graham, Clarence R., North Tonawanda, N. Y. Amusement device. 1,903,995; Apr. 18.
Granges, Louis, Paris, France. Vehicle suspension device. 1,903,966; Apr. 18.
Graton & Knight Company. (See Kullman, Alfred, assignor.)
Graver Corporation. (See Adams, James L., jr., assignor.)
Gray, Daniel M., assignor to Hazel-Atlas Glass Co., Wheeling, W. Va. Plastic composition. 1,904,445; Apr. 18.
Gray, Frank, assignor to Western Electric Company, Incorporated, New York, N. Y. Protective device. 1,903,996; Apr. 18.
Gray, William H. and W. J., Rochester, N. Y. Eavestrough hanger. 1,903,861; Apr. 18.
Gray, William J. (See Gray, William H. and W. J.)
Green, Charles E., assignor to Pawtucket Screw Company, Pawtucket, R. I. Thermoelectric sprinkler head. 1,904,828; Apr. 18.
Greenberg, Mandel, Brooklyn, N. Y. Combination sprayer and sweeper. 1,903,896; Apr. 18.
Greene, Albert E., Medina, Wash. Combustion-arc process and apparatus. 1,904,683; Apr. 18.
Greene, Albert E., Medina, Wash. Melting. 1,904,684; Apr. 18.
Greenwood, T. T. (See Burk, Michael F., assignor.)
Gribojedoff, Nicolai, Putney, London, England. Winding machine. 1,904,726; Apr. 18.
Griffin, James T., Oak Park, J. P. Deane, Berwyn, and J. G. Cureton, Chicago, Ill., assignors to Western Electric Company, Incorporated, New York, N. Y. Device for fastening the end of a coiled member to a supporting structure. 1,904,863; Apr. 18.
Grimes, Herbert V., assignor to W. Taylor, Elizabeth, N. J. Radio station selector. 1,904,219; Apr. 18.
Griswold, Walter R., assignor to Packard Motor Car Company, Detroit, Mich. Internal combustion engine. 1,903,919; Apr. 18.
Grossmann, Paul, assignor to the Firm Society of Chemical Industry in Basle, Basel, Switzerland. Eliminating sulphonic acid groups from dihydroxydiaminoanthraquinonedisulfonic acid. 1,903,862; Apr. 18.
Grubs, Frank, Larchmont, N. Y., assignor to La Valle, Inc., New York, N. Y. Shoe. Des. 89,615; Apr. 18.
Gruetter, John R., Cleveland, Ohio, assignor to The Liquid Carbonic Corporation, Chicago, Ill. Bottle rinsing mechanism. 1,904,685; Apr. 18.
Gubelmann, Ivan, South Milwaukee, Wis., assignor, by mesne assignments, to E. I. du Pont de Nemours & Company. 7.7'-dichloro flavanthrone and making same. 1,904,367; Apr. 18.
Gubelmann, Ivan, H. J. Weiland, and O. Stallmann, South Milwaukee, Wis., assignors, by mesne assignments, to E. I. du Pont de Nemours & Company. Organic acid of the diphenyl-methane series and preparing the same. 1,904,366; Apr. 18.
Guettner, Frank, jr., Shiner, Tex. Automatic electric starter for internal combustion engines. 1,903,761; Apr. 18.
Guild, Waldo J., assignor to The Heald Machine Company, Worcester, Mass. Mechanism for reciprocating grinding wheel spindles. 1,904,044; Apr. 18.
Gullett Gin Company. (See Wallace, Jeffrey J., assignor.)
Gumprich, William, Brooklyn, N. Y., assignor to Dayton Scale Company, Dayton, Ohio. Positioning means for poise weights. 1,904,446; Apr. 18.
Günzler, Heinrich, and O. Neubert, Elberfeld, near Cologne, Germany, assignors to Winthrop Chemical Company, Inc., New York, N. Y. New colloidal mercurized aromatic hydroxy compounds. 1,903,895; Apr. 18.
Gustafson, Clifford E. (See Fischer, H. G. M., and Gustafson.)
Gaupkaytie, Matt, Baltimore, Md. Vehicle spring and shock absorber. 1,904,220; Apr. 18.
H & W Kite Co. (See Hahn, John, assignor.)
Haas, Frederick S., Cincinnati, Ohio, assignor, by mesne assignments, to The Heald Machine Company, Worcester, Mass. Grinding machine. 1,904,045; Apr. 18.
Hagedorn, Max, Dessau in Anhalt, Germany, assignor, by mesne assignments, to Agfa Ansco Corporation, Binghamton, N. Y. Protective layer on photographic film. 1,904,221; Apr. 18.
Hagle, George W. (See Hampden, W. R., and Hagle.)
Hahn, John, assignor to H & W Kite Co., Decatur, Ill. Kite. 1,904,727; Apr. 18.
Hahn, John, assignor to H & W Kite Co., Decatur, Ill. Kite. 1,904,728; Apr. 18.
Halbach, Robert Mc., Jersey City, N. J. Culture bottle. 1,904,222; Apr. 18.
Halford, Dean, et al. (See Bennett, Dennis H., assignor.)
Hall-Brown, Archibald, London, England. Propulsion of aircraft. 1,904,134; Apr. 18.
Haller, Oskar. (See Laska, L., and Haller.)
Hamaker, Rex G., assignor of one-half to A. M. Bowman, Houston, Tex. Jack post. 1,904,807; Apr. 18.
Hambuechen, Carl, Belleville, Ill., assignor to The B-L Electric Manufacturing Company, St. Louis, Mo. Rectifier. 1,904,447; Apr. 18.
Hampden, Wellesley R., Reedville, and G. W. Hagle, Hillsboro, Oreg. Newspaper box. 1,904,448; Apr. 18.
Hancock, Ralph J., Marietta, and J. L. L. Garrison; said Garrison assignor to Fulton Bag & Cotton Mills, Atlanta, and said Hancock assignor to Southern Ice Supply Company, Marietta, Ga. Ice delivery bag. 1,904,729; Apr. 18.
Hancock, Raymond F. (See Boyce, J., and Hancock.)
Handforth, Stanley L., Woodbury, N. J., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Production of nitrites. 1,903,815; Apr. 18.
Hanique, Alfred, Paris, France. Machine for ascertaining the volume of loads of granular material. 1,904,223; Apr. 18.
Hankins, Cyrus, Washington, D. C. Brake rigging for railway cars. 1,903,997; Apr. 18.
Hankins, Cyrus, Washington, D. C. Brake rigging for railway cars. 1,904,135; Apr. 18.
Hanks, William V. (See Freyermuth, G. H., and Hanks.)
Hanks, William V. (See Freyermuth, G. H., Small, and Hanks.)
Hanks, William V. (See Young, P. L., and Hanks.)
Hanks, William V. (See Young, P. L., Hanks, and Freyermuth.)
Hanny, Charles E., Unionville, assignor to Trumbull Electric Manufacturing Company, Plainville, Conn. Residence panel board. 1,904,136; Apr. 18.
Hanson, Estyle D. (See Johnson, F. V., Hanson, and Waters.)
Hanson, Larry A., and C. F. Osner, Altoona, Pa. Float valve. 1,903,816; Apr. 18.
Hanson, Nathan E., assignor to Union Special Machine Company, Chicago, Ill. Feeding mechanism for sewing machines. 1,903,762; Apr. 18.
Hardgrove, Ralph M. (See Bailey, E. G., and Hardgrove.)
Hardtmann, Max. (See Hentrich, W., Hardtmann, Backes, and Stötter.)
Hardy, Arthur C., Wellesley, Mass., assignor to General Electric Company. Sound record film and film printing apparatus. 1,904,449; Apr. 18.
Hargrove, Clarence A., Acton, Ind. Electromagnetic tool. 1,904,224; Apr. 18.
Harmon, Kenneth A., Springfield, assignor to Wico Electric Company, West Springfield, Mass. Magneto. 1,904,808; Apr. 18.
Harnly, David H., Chicago, Ill. Weather-proofing structure for doors. 1,904,868; Apr. 18.
Harper, Robert W., West Orange, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Telephone exchange system. 1,903,998; Apr. 18.
Harrington, John W., assignor to Harrington & Richardson Arms Company, Worcester, Mass. Cylinder construction for firearms. 1,904,730; Apr. 18.
Harrington & Richardson Arms Company. (See Harrington, John W.)
Harris, Charles Roberts, Niagara Falls, assignor to The Roessler & Hasslacher Chemical Company, New York, N. Y. Stabilization of halogenated hydrocarbons. 1,904,450; Apr. 18.
Harris, Edward M., San Diego, Calif. Wire reel. 1,904,286; Apr. 18.
Harris, George H., Auckland, New Zealand. Golf bag. 1,904,731; Apr. 18.
Harris, Henry, London, England. Apparatus for casting metals. 1,903,897; Apr. 18.
Hartford-Empire Company. (See Peller, Karl E., assignor.)
Hartwig, William G., assignor to Railway Utility Company, Chicago, Ill. Electric terminal connecter. 1,904,919; Apr. 18.
Hasbrouck, Louis B., assignor to Eclipse Textile Devices, Inc., Elmira, N. Y. Dyeing apparatus. 1,904,137; Apr. 18.
Haseltine, Stacy B., assignor to W. H. Miner, Inc., Chicago, Ill. Hand brake. 1,904,369; Apr. 18.
Haskins, Clifford B., assignor to Dayton Scale Company, Dayton, Ohio. Bearing. 1,904,451; Apr. 18.
Haslam, Robert T., Westfield, N. J., assignor to Standard Oil Development Company. Fatty acids and preparing same. 1,904,452; Apr. 18.
Hasson, Paul R., and E. D. Ellis, assignors to John Fowler & Co., (Leeds) Ltd., Leeds, England. Ridging implement on rotary tilling machines. 1,904,138; Apr. 18.
Hauck Manufacturing Company. (See Else, Walter G., assignor.)
Haueisen, Batist R., and J. C. Patten, Indianapolis, Ind.; said Haueisen assignor to said Patten; M. L. Patten, executrix of said J. C. Patten, deceased. Alloy plated iron and steel and making the same. 1,904,732; Apr. 18.
Haugen, Edward, Wallace, assignor to Coeur d'Alene Hardware & Foundry Company, Wallace, Idaho. Dump car. 1,904,453; Apr. 18.
Haupt, Walter H. (See Shield, Paul S., and Haupt.)
Haupt, Walter H., Ludlow, Ky., assignor to Augustine Davis, jr., Cincinnati, Ohio. Dispenser of the twin chamber type. 1,904,454; Apr. 18.

Hawaiian Pineapple Company. (See Tachi, Tadao, assignor.)
Hawk, Watson L., Long Beach, Calif. Torque control and automatic drill control. 1,904,765; Apr. 18.
Hawkins, Luty, Mount Vernon, Ill. Heating device. 1,904,786; Apr. 18.
Hayden, Howard A., Detroit, Mich. Connecting rod end. 1,903,863; Apr. 18.
Hayes, Frank A., Middletown, N. J. Variable speed power transmission mechanism. 1,904,046; Apr. 18.
Haynes Stellite Company. (See Wissler, William A., assignor.)
Hazel-Atlas Glass Company. (See Cordy, Ivor, assignor.)
Hazel-Atlas Glass Co. (See Gray, Daniel M., assignor.)
Hazel-Atlas Glass Co. (See Stenhouse, David, assignor.)
Hazel-Atlas Glass Co. (See Stenhouse, Thomas and D., assignors.)
Hazel-Atlas Glass Co. (See Williams, John J., assignor.)
Haseltine Corporation. (See Wheeler, Harold A., assignor.)
Hazeltine, Louis A., Hoboken, N. J., assignor to General Electric Company. Method and apparatus for converting electric power. 1,904,455; Apr. 18.
Head, Ernest C., assignor to Gleason Works, Rochester, N. Y. Grinding apparatus. 1,903,967; Apr. 18.
Heald Machine Company, The. (See Guild, Waldo J., assignor.)
Heald Machine Company, The. (See Haas, Frederick S., assignor.)
Hesly, John F., assignor to Piggly Wiggly Corporation, Cincinnati, Ohio. Price tag and holder. 1,904,456; Apr. 18.
Healy, John F., assignor to Piggly Wiggly Corporation, Cincinnati, Ohio. Price tag and holder. 1,904,457; Apr. 18.
Heath, Spencer, Elkridge, assignor to The American Propeller Company, Baltimore, Md. Propeller. 1,904,733; Apr. 18.
Hecht, Joseph L., Davenport, Iowa, assignor to French & Hecht, Incorporated. Making tension wheels. 1,904,458; Apr. 18.
Hedlund, Nels J. (See Solie, H. L., and Hedlund.)
Hefti, Wilhelm, assignor to the Firm Sulzer Freres Societe Anonyme, Winterthur, Switzerland. Cylinder for internal combustion engines. 1,904,459; Apr. 18.
Hehr, Frederick G., Hempstead, assignor to Aerol Engine Corporation, New York, N. Y. Hydraulic pump. 1,904,707; Apr. 18.
Heidenreich, Rudolf M. (See Mieg, W., and Heidenreich.)
Heigl, Ludwig, Weiden, Germany, assignor of one-fourth to F. Zeisel and J. S. Kendall, Knox County, Tex. Surgical leg-stretching device. 1,904,942; Apr. 18.
Hendrick Manufacturing Company. (See Beam, Lois M., assignor.)
Hendrix, Joel H., assignor of one-half to W. W. Braham, New Castle, Pa. Key for locks. 1,904,225; Apr. 18.
Henkel & Cie. Gesellschaft mit beschrankter Haftung. (See Weber, H., and Pape, assignors.)
Henkel, Wilhelm, and F. Meyer, assignors to the Firm Carl Zeiss, Jena, Germany. Making selenium cells. 1,904,139; Apr. 18.
Henneberger, Thomas C., Bloomfield, N. J., assignor to American Telephone and Telegraph Company. Cable maintenance apparatus. 1,904,226; Apr. 18.
Henneberger, Thomas C., Caldwell, N. J., assignor to American Telephone and Telegraph Company. Gas pressure alarm system for cables. 1,904,227; Apr. 18.
Hennessy, Mary C., assignor to Franklin Simon & Company, Inc., New York, N. Y. Panties. 1,904,228; Apr. 18.
Henning, Malcolm E., assignor to Penn Electric Switch Co., Des Moines, Iowa. Control switch structure. 1,904,309; Apr. 18.
Henning, Malcolm E., assignor to Penn Electric Switch Co., Des Moines, Iowa. Stack temperature actuated control device. 1,904,310; Apr. 18.
Henning, Malcolm E., assignor to Penn Electric Switch Co., Des Moines, Iowa. Defroster. 1,904,658; Apr. 18.
Henschel, Charles J., Rutherford, N. J. Signaling instrument. Des. 89,616; Apr. 18.
Hentrich, Winfrid, and M. Hardtmann, Wiesdorf, P. Backes, Cologne, Deutz, and H. Stötter, Leverkusen-on-the-Rhine, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Textile pest proofing media. 1,903,864; Apr. 18.
Hentrich, Winfrid, Leverkusen-on-the-Rhine, and J. Hilger, Cologne-Mulheim, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. 2.4di(nitrophenyl)-6-halogen-1.3.5-triazines and making the same. 1,904,229; Apr. 18.
Hentschel, Ernest R., deceased, Washington, D. C.; J. Olson, administrator, assignor to Wired Radio, Inc., New York, N. Y. Frequency control apparatus. 1,904,140; Apr. 18.
Hentschel, Ernest R., deceased; J. Olson, administrator, assignor to Wired Radio, Inc., New York, N. Y. Constant frequency control apparatus. 1,904,771; Apr. 18.
Herbert, Martin. (See Brzezicki, John K., assignor.)
Heritage, Clark C., Buffalo, assignor to National Aniline & Chemical Co., Inc., New York, N. Y. Reducing a nitro compound by means of a metal. 1,904,047; Apr. 18.
Herklots, Johannus G. M., Koeniagan, Cheribon, Java, Dutch East Indies. Record strip for sound reproducing machines. 1,904,944; Apr. 18.
Hermanson, William A. (See Banga, R. L., and Hermanson.)
Herrington, Rolland. (See Almond, L. L., Herrington, and Matthews.)
Hess-Bright Manufacturing Company. (See Faust, Claus W., assignor.)
Hess, Raymond W. (See Moses, F. G., Hess, and Perkins.)
Hess, Raymond W., Buffalo, assignor to The Barrett Company, New York, N. Y. Concentration of minerals by flotation. 1,904,461; Apr. 18.
Hess, Raymond W., and J. M. F. Leaper, Buffalo, assignors to The Barrett Company, New York, N. Y. Flotation of minerals. 1,904,462; Apr. 18.
Hickok Manufacturing Company. (See Fromm, George J., assignor.)
Hildebrand, Emil C., Irvington, assignor to Krementz & Company, Newark, N. J. Fastener for wrist watch straps. 1,904,230; Apr. 18.
Hileman, Hittle A., et al. (See Baker, Albert B., assignor.)
Hilger, Josef. (See Hentrich, W., and Hilger.)
Hill, Matthew E., assignor to The Holfast Rubber Company, Atlanta, Ga. Belt fitter. 1,904,048; Apr. 18.
Hilliard, John D., Glens Falls, N. Y., assignor to General Electric Company. Circuit interrupting apparatus. 1,904,463; Apr. 18.
Hillix, Foster F. (See Wells, M. R., and Hillix.)
Hitch, Arthur R., Brunswick, Ga., assignor, by mesne assignments, to Gillican-Chipley Company. Producing high grade rosin. 1,904,464; Apr. 18.
Hitsler, Joseph, Frankfort-on-the-Main, and F. C. J. Merz, Frankfort-on-the-Main-Rodelheim, Germany. Device for shrinking leather. 1,904,787; Apr. 18.
Hobart, Franklin G., Beloit, Wis., assignor to Fairbanks, Morse & Co., Chicago, Ill. Fluid pressure switch. 1,904,311; Apr. 18.
Hodge, Lloyd. (See Nelson, J. F., and Hodge.)
Hodgman, Frederick A., Yonkers, N. Y. Golf club assembly. 1,904,231; Apr. 18.
Hoe, R., & Co. (See Tomlin, John R., assignor.)
Hoffman, Carl R., Berwyn, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Wire drawing apparatus. 1,904,232; Apr. 18.
Hoge, William L. (See Trube, Carl E., assignor.)
Hogue, James E., Hot Springs, Ark. Ice cream or confection container. 1,903,764; Apr. 18.
Holbrook, A. W., & Sons, Inc. (See Travis, Albert C., jr., assignor.)
Holden, William H. T., Brooklyn, and R. P. Jutson, Yonkers; said Holden assignor to American Telephone and Telegraph Company and said Jutson assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Regulating system. 1,903,999; Apr. 18.
Holfast Rubber Company, The. (See Hill, Matthew E., assignor.)
Hollingsworth, Lowell M., East Orange, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Producing magnetic bodies. 1,904,233; Apr. 18.
Holmes, Elbridge R., and O. V. Payne, assignors to Crompton & Knowles Loom Works, Worcester, Mass. Dobby pattern chain. 1,904,812; Apr. 18.
Holmes, Jesse H., assignor to Thomas Young Nurseries, Inc., Bound Brook, N. J. Display of cut flowers. 1,904,788; Apr. 18.
Hoover Company, The. (See Hoover, Howard E., assignor.)
Hoover Company, The. (See Smellie, Donald G., assignor.)
Hoover Company, The. (See Willis, Olo C., assignor.)
Hoover, Howard E., Glencoe, Ill., assignor to The Hoover Company, North Canton, Ohio. Suction cleaner. 1,904,974; Apr. 18.
Hopstock, Frants P. (See Aagaard, T. B., Samdahl, and Hopstock.)
Hopwood, John M. (See Peebles, Thomas A., assignor.)
Horowitz, Eugen, Halensee, Germany, assignor to General Electric Company. Electrical regulator. 1,904,465; Apr. 18.
Horwath, Julius, assignor to Arvey Corporation, Chicago, Ill. Display card. 1,904,659; Apr. 18.
Hoskin, George Clarence. (See Hoskin, Harriet M. and G. C.)
Hoskin, Harriet M. and G. C., Brookfield, Ill. Measuring scale. 1,904,234; Apr. 18.
Hosmer, Warren S., Bartow, Fla. Tractor. 1,903,968; Apr. 18.
Hothersall, John M., Brooklyn, assignor to American Can Company, New York, N. Y. Apparatus for forming sheet metal caps. 1,904,920; Apr. 18.
Hott, Ion V. K., assignor to The Joyce-Cridland Company, Dayton, Ohio. Hydraulic lifting mechanism. 1,903,763; Apr. 18.
Hottenroth, Valentin, Mannheim, and O. Faust, Mannheim-Neuostheim, assignors to Zellstoffabrik Waldhof, Mannheim-Waldhof, Germany. Improving cellulose raw material of all kinds. 1,904,235; Apr. 18.
Howell, Joseph C., Fort Lee, N. J. Adjustable arch support. 1,904,789; Apr. 18.
Howell, Joseph C., Fort Lee, N. J. Arch support for shoes. 1,904,790; Apr. 18.

Hoyt, Frederick A., East Orange, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Reeling device. 1,904,000; Apr. 18.
Hoyt, Samuel L., Schenectady, N. Y., assignor to General Electric Company. Diamond charged cutting tool bit. 1,904,049; Apr. 18.
Huber, Eugen. (See Stintzing, H., and Huber.)
Hudepohl, Fred H. (See Krueger, F. G., and Hudepohl.)
Hueber, Henry, assignor to Trico Products Corporation, Buffalo, N. Y. Fluid pressure horn. 1,904,759; Apr. 18.
Hull, Harry B., assignor to Frigidaire Corporation, Dayton, Ohio. Refrigerating apparatus. 1,904,980; Apr. 18.
Humphrey, Don B., assignor to McHenry-Millhouse Manufacturing Company, South Bend, Ind. Roofing. Des. 89,639; Apr. 18.
Humphreys, Hoxie H., Phoenix, Ariz. Cooling system. 1,904,686; Apr. 18.
Hunt, Charles G., assignor to Cincinnati Grinders Incorporated, Cincinnati, Ohio. Grinding machine. 1,904,642; Apr. 18.
Hunt, Rodney, Machine Company. (See Jefferson, Eugene D., assignor.)
Hünten, Alfred T., deceased, Koppern in the Taunus, by Gertrud Hünten, administratrix, Frankfort-on-the-Main, Germany. Automatic machine for the manufacture of soap bars. 1,903,920; Apr. 18.
Hünten, Gertrud, administratrix. (See Hünten, Alfred T.)
Hunter, Herbert T., Baltimore, Md., assignor to Doughnut Machine Corporation, New York, N. Y. Automatic cooking apparatus. 1,904,370; Apr. 18.
Hupp Motor Car Corporation. (See Watts, Frank E., assignor.)
Hurlbrink, Ernst, Berlin-Westend, assignor to the Firm Fabrik Explosionssicherer Gefässe Salzkotten G. m. b. H., Salzkotten I. W., Germany. Liquid delivery and measuring device. 1,904,829; Apr. 18.
Hurlburt, Wilbur F., East Orange, N. J., assignor to Automatic Switch Company, New York, N. Y. Magnetic switch. 1,904,141; Apr. 18.
Huse, Ralph L., Boston, assignor to Albert & J. M. Anderson Manufacturing Company, South Boston, Mass. Lighting unit. 1,904,643; Apr. 18.
Hyde, William James, London, England. Closure-holding and return spring. 1,903,923; Apr. 18.
Hygienic Manufactures and Supplies Company Limited, The. (See Nielsen, Heinrich V., assignor.)
Hyland, Lawrence A., Washington, D. C., assignor to Wired Radio, Inc., New York, N. Y. Electron discharge device circuit arrangement. 1,904,142; Apr. 18.
Hynan, Arthur C., assignor to R. N. Burton, Chicago, Ill. Demountable wheel lock. 1,904,371; Apr. 18.
I. G. Farbenindustrie Aktiengesellschaft. (See Baehr, Hans, assignor.)
I. G. Farbenindustrie Aktiengesellschaft. (See Eisenhut, Otto, assignor.)
I. G. Farbenindustrie Aktiengesellschaft. (See Fertsch, Friedrich K., assignor.)
I. G. Farbenindustrie Aktiengesellschaft. (See Gockel, Heinrich, assignor.)
I. G. Farbenindustrie Aktiengesellschaft. (See Hentrich, W., Hardtmann, Backes, and Stötter, assignors.)
I. G. Farbenindustrie Aktiengesellschaft. (See Hentrich, W., and Hilger, assignors.)
I. G. Farbenindustrie Aktiengesellschaft. (See Krauch, C., Pier, and Anthes, assignors.)
I. G. Farbenindustrie Aktiengesellschaft. (See Lenz, W., and Jochum, assignors.)
I. G. Farbenindustrie Aktiengesellschaft. (See Lommel, W., and Engelhardt, assignors.)
I. G. Farbenindustrie Aktiengesellschaft. (See Pungs, W., and Eisenmann, assignors.)
I. G. Farbenindustrie Aktiengesellschaft. (See Schultze, Hermann, assignor.)
I. G. Farbenindustrie Aktiengesellschaft. (See Winkler, K., and Wissel, assignors.)
Ibling, Walter E., et al. (See Bennett, Dennis H., assignor.)
Ideal Manufacturing Company. (See Arlt, John L., assignor.)
Imperial Chemical Industries Limited. (See Brightman, Rainald, assignor.)
Imperial Chemical Industries Limited. (See Fairweather, David A. W., and Thomas, assignors.)
Imperial Typewriter Company Limited. (See Pateman, Arthur, assignor.)
Im Schlaa, Friedrich, Iserlohn, Germany. Machine for rolling rings. 1,904,734; Apr. 18.
Independent Pneumatic Tool Co. (See Norling, Reinhold A., assignor.)
Indestro Mfg. Co. (See Rice, Harold G., assignor.)
Ingersoll Milling Machine Company, The. (See Johnson, John R., assignor.)
Ingersoll-Rand Company. (See Metzgar, Chester W., assignor.)
Ingersoll-Rand Company. (See Prellwitz, William, assignor.)
Ingraham, E., Company, The. (See Ciccarelli, Ostilio, assignor.)
International Scale Company. (See Schaper, Harry C., assignor.)
Inventia Patent-Verwertungs-Gesellschaft. (See Engberg, A. O., and Ahnström, assignors.)
Irwin, Davis L. (See Plummer, H. L., and Irwin.)
Irwin, Lawrence C., assignor to Charles J. Taglialatela Mfg. Co., Brooklyn, N. Y. Automatic control switch. 1,903,924; Apr. 18.
Irwin, William J., Wilkinsburg, Pa. Heat regenerator. 1,904,236; Apr. 18.
Irwin, William J., Wilkinsburg, Pa. Regenerative chamber. 1,904,237; Apr. 18.
Isco Chemical Company. (See Ladd, Edward T., assignor.)
Isherwood, Joseph W. and W., Raggles Wood, Chislehurst, England. Hatch cover. 1,904,735; Apr. 18.
Isherwood, Joseph W. and W., Raggles Wood, Chislehurst, England. Cover for hatches. 1,904,736; Apr. 18.
Isherwood, William. (See Isherwood, Joseph W. and W.)
Jacob, Francis M., Columbus, Miss. Combined seesaw and merry-go-round. 1,904,687; Apr. 18.
Jaedike, Henry, Brooklyn, N. Y. Holding and dispensing device for collapsible tubes. 1,904,050; Apr. 18.
Jaeger, Adolph C., Port Chester, N. Y. Textile fabric or similar article. Des. 89,640; Apr. 18.
Jagger, Claude A. (See Lyon, C. L., and Jagger.)
Jahn, Albert, Berlin-Lichterfelde, Germany. Fountain pen. 1,904,660; Apr. 18.
James Manufacturing Company. (See Kreutzer, Frederic J., assignor.)
Janson, Joseph A., Providence, R. I. Waste eliminator for ice cream cabinets. 1,903,910; Apr. 18.
Javery, Frank B., Worcester, assignor to Warp Compressing Machine Company, Worcester, Mass. Holder for yarn packages. 1,904,737; Apr. 18.
Jeavons, Charles F. R., Leicester, England, assignor to United Shoe Machinery Corporation, Paterson, N. J. Fastening inserting machine. 1,904,313; Apr. 18.
Jefferson, Eugene D., Waban, assignor to Rodney Hunt Machine Company, Orange, Mass. Kier. 1,904,921; Apr. 18.
Jeffrey Manufacturing Company. (See Levin, Nils D., assignor.)
Jennings, Willis A., Chicago, Ill. Soap dispenser. 1,904,238; Apr. 18.
Jochum, Kurt. (See Lenz, W., and Jochum.)
Johns-Manville Corporation. (See Farley, Francis S., assignor.)
Johns, Wilbert R., Chicago, Ill. Poster support. 1,903,766; Apr. 18.
Johnson, Alfred, Uniontown, Pa. Closure and lock. 1,903,765; Apr. 18.
Johnson, Alfred H., assignor to National-Standard Company, Niles, Mich. Tire bead reenforcing element. 1,903,925; Apr. 18.
Johnson, Arthur S., Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Fastening inserting machine. 1,904,314; Apr. 18.
Johnson, Frank L., Akron, Ohio. Collapsible tire building form. 1,903,945; Apr. 18.
Johnson, Fred V., Irvington, N. J., E. D. Hanson, Westmont, and D. V. Waters, Oak Park, Ill., assignors to Western Electric Company, Incorporated. Molding machine. 1,904,239; Apr. 18.
Johnson, Henry, Beatrice, Nebr. Grave marker. 1,904,738; Apr. 18.
Johnson, John R., assignor to The Ingersoll Milling Machine Company, Rockford, Ill. Machine tool slide and lubricator therefor. 1,903,865; Apr. 18.
Johnson, Nelson V., Philadelphia, Pa. Propeller balance. 1,903,817; Apr. 18.
Johnston, William F. (See Davis, E. H., and Johnston.)
Jones-Dabney Co. (See Crystler, Frank M., assignor.)
Jones, David T., and F. J. Moore, Saltcoats, Scotland, assignors to E. I. du Pont de Nemours and Co., Wilmington, Del. Manufacture of electric detonators, percussion caps, and like articles. 1,904,240; Apr. 18.
Jones & Lamson Machine Company. (See Flanders, Ralph E., assignor.)
Jones & Lamson Machine Company. (See Lovely, John E., assignor.)
Jones, Lester L., Oradell, N. J. Soldering iron. 1,904,051; Apr. 18.
Jones, William A., Westerleigh, N. Y., assignor to The Babcock & Wilcox Company, Bayonne, N. J. Furnace and boiler. 1,904,466; Apr. 18.
Jongedyk, Ralph, Hinsdale, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Material working apparatus. 1,904,864; Apr. 18.
Joyce-Cridland Company. (See Hott, Ion V. K., assignor.)
Judge, Edward A., et al. (See Cameron, Hugh M., assignor.)
Jungersen, Thoger G., Milwaukee, Wis. Dump body operating mechanism. 1,904,922; Apr. 18.
Junkune, Stephen, jr., Chicago, Ill. Burial casket. Des. 89,668; Apr. 18.
Jutson, Robert P. (See Holden, W. H. T., and Jutson.)
Jutting, Bernhard G., Jersey City, N. J. Wing lift system for aircraft. 1,903,818; Apr. 18.
Kadel, Byers W. (See Wine, W. E., and Kadel, assignors.)
Kaffer, Hans, Duisburg-Meiderich, Germany. Production of motor driving spirits. 1,904,880; Apr. 18.
Kahrs, Henry, deceased, Brooklyn, N. Y., by Mary D. Wright, executrix. Folding table top. 1,904,897; Apr. 18.
Kammerer, Erwin, Pforzheim, Germany. Compound metal stock. 1,904,241; Apr. 18.

Kane, Peter W., Buffalo, N. Y. Pneumatic shock absorber. 1,904,372; Apr. 18.
Kantorowicz, Hans, Berlin-Wilmersdorf, and A. Köhler, Spandau, near Berlin, assignors to Fettsaure-und Glycerin-Fabrik G. m. b. H., Mannheim, Germany. Making sulphonated products. 1,904,791; Apr. 18.
Karl, William A., assignor to The Firestone Tire and Rubber Company, Akron, Ohio. Tire construction. 1,904,981; Apr. 18.
Karnath, Kurt, Zweibrucken, Germany. Valve. 1,904,467; Apr. 18.
Karr, Alfred D., Newark, N. J., and K. D. Perkins, assignors to Audiffren Refrigerating Machine Company, New York, N. Y. Method and apparatus for conditioning air. 1,904,468; Apr. 18.
Karst, Henry C., Sonoma, Calif. Drinking fountain for poultry. 1,903,767; Apr. 18.
Kats, Alexander S., Brooklyn, N. Y. Shelving construction. 1,904,052; Apr. 18.
Katz, Alexander S., Brooklyn, N. Y. Lock. 1,904,053; Apr. 18.
Keating, Clarence S., assignor to The Friedman Manufacturing Company, Chicago, Ill. Compotier. Des. 89,617; Apr. 18.
Keller, Theodore P., Elizabeth, N. J., assignor to General Atlas Carbon Company, Dover, Del. Production of carbon black. 1,904,469; Apr. 18.
Kelley, Daniel J., Great Neck, N. Y. Auto-plate. Des. 89,641; Apr. 18.
Kelman, David J., Brooklyn, N. Y. Wreath and making same. 1,904,470; Apr. 18.
Kelman, David J., Brooklyn, N. Y. Decorative material. 1,904,471; Apr. 18.
Kelvinator Corporation. (See Asmussen, August J., assignor.)
Kempthorne, James L., Montclair, N. J. Engine. 1,904,373; Apr. 18.
Kempthorne, James L., Montclair, N. J. Engine. 1,904,374; Apr. 18.
Kendall, James S., et al. (See Heigi, Ludwig, assignor.)
Kennedy, Albert H., Rockport, Ind. Flush valve. 1,904,898; Apr. 18.
Kennedy, Edward, New York, N. Y. Testing device for water systems. 1,904,688; Apr. 18.
Kennedy, Edward, New York, N. Y. Testing device for water systems. 1,904,689; Apr. 18.
Kennedy, Paul S., assignor to Murphy Varnish Company, Newark, N. J. Wood filler and related materials. 1,903,768; Apr. 18.
Kent, Moss A., Rome, assignor to General Cable Corporation, New York, N. Y. Electrical cable. 1,904,472; Apr. 18.
Kenway, Percy N., Newton, Mass. Pipe hanger. 1,904,315; Apr. 18.
Kerr, Howard J., Westfield, N. J., assignor to Fuller Lehigh Company, Fullerton, Pa. Steam boiler. 1,904,473; Apr. 18.
Kersten, Jacob, Kalamazoo, Mich. Toy. 1,904,028; Apr. 18.
Kessler, Johannes, Long Island City, N. Y. Boat propelling system. 1,904,792; Apr. 18.
Ketchum, Karl E. (See Lacaprara, D., and Ketchum.)
Keuffel, Adolf W., Montclair, assignor to Keuffel & Esser Co., Hoboken, N. J. Slide rule. 1,904,474; Apr. 18.
Keuffel, Adolf W., Montclair, assignor to Keuffel & Esser Co., Hoboken, N. J. Drawing board. 1,904,899; Apr. 18.
Keuffel & Esser Co. (See Keuffel, Adolf W., assignor.)
Keup, Albert, Gelsenkirchen, Germany. Apparatus for casting hollow bodies in chill molds rotatable about vertical axes. 1,904,831; Apr. 18.
Kleckheafer, Henry F., Hammond, Ind. Center locating device. 1,904,242; Apr. 18.
Klep, Johann N. (See Bauer, G., and Klep.)
Klep, Johann N., Altona-Hochkamp, and W. Brose, Hamburg, Germany. Hydraulic coupling. 1,904,054; Apr. 18.
Kimmel, Joseph G., Sarasota, Fla. Method and apparatus for controlling the temperature of the soil. 1,904,001; Apr. 18.
Kind, Frederick H., assignor to W. Gaterman Mfg. Co., Manitowoc, Wis. Tapping and drilling machine. 1,904,375; Apr. 18.
King, Barnwell R., Kalamazoo, Mich. Shield for ignition coils. 1,903,784; Apr. 18.
King, Currie, Rutherford, Tenn. Seed gatherer for mowing machines. 1,903,769; Apr. 18.
King, George A., assignor to Scovill Manufacturing Company, Waterbury, Conn. Detachable fastener. 1,904,055; Apr. 18.
Kippe, Otto, Osnabruck, assignor of one-half to Klockner-Werke A.-G., Castrop-Rauxel, Germany. Producing calcium nitrate from dolomite while simultaneously obtaining magnesia. 1,904,946; Apr. 18.
Kirby, Charles H., assignor to Marvel Carbureter Company, Flint, Mich. Carburetor. 1,904,002; Apr. 18.
Kislyn Corporation. (See Berthon, Rodolphe, assignor.)
Kissing, Friedrich, Berlin-Charlottenburg, Germany, assignor to General Electric Company. Valve control mechanism. 1,904,475; Apr. 18.
Kissinger, Raymond J., Fort Myers, Fla. Battery support. 1,904,620; Apr. 18.
Kizer, Howard W., South Orange, N. J., assignor to The Texas Company, New York, N. Y. Motor driven tank truck. Des. 89,642; Apr. 18.
Kjaer, Viggo A., Copenhagen, Denmark. Reversible rotary blower or pump. 1,904,056; Apr. 18.
Kleinschmidt, Edward E., et al. (See Morton, S., Krum, and Kleinschmidt.)
Kliesrath, Victor W. (See Bragg, C. S., and Kliesrath.)
Klockner-Werke A.-G. (See Kippe, Otto, assignor.)
Knapp, Edgar, deceased, and Carl G. Allgrunn, Middleport, N. Y.; George F. Thompson, executor. Tractor power coupling mechanism. 1,904,832; Apr. 18.
Knauer, Berthold. (See Ogden, J. W., and Knauer.)
Knobloch, Carl, Akron, Ohio. Speedometer for marine craft. 1,904,865; Apr. 18.
Knopp, Otto A., Oakland, Calif. Method and apparatus for recording electrical quantities. 1,904,029; Apr. 18.
Kobayashi, Keishiro, Tokyo, Japan, assignor to General Electric Company. Flash lamp. 1,904,057; Apr. 18.
Kocher, Edward H., New York, N. Y., assignor to Auto Research Corporation. Pipe fitting. 1,903,819; Apr. 18.
Koeberle, Karl. (See Kuns, M. A., Koeberle, and Berthold.)
Koehring Company. (See Yohe, Perry P., assignor.)
Kohl, Julius, Berlin, Germany. Process and plant for extracting glue from glue-containing material. 1,904,003; Apr. 18.
Köhler, Arnold. (See Kantorowicz, H., and Köhler.)
König, Kasper. (See Sander, O., and König.)
Koos, Arendt R., Elizabeth, N. J. Gauge device. 1,904,143; Apr. 18.
Koppers Company, The. (See Becker, Joseph, assignor.)
Kosken, Wilho A., Inc. (See Kosken, Wilho A., assignor.)
Kosken, Wilho A., New York, N. Y., assignor to Wilho A. Kosken, Inc. Prism carrier for projection machines. 1,903,820; Apr. 18.
Kotouc, John, Philadelphia, Pa. Grinding apparatus. 1,904,058; Apr. 18.
Kounovsky, Albert J., Stanton, Nebr. Ratchet device. 1,904,621; Apr. 18.
Krislein, Georg, Frankfort-on-the-Main-Hochst, and R. Samestreuther, Butzbach, Germany. Heat exchange device. 1,903,898; Apr. 18.
Krauch, Carl, Ludwigshafen-on-the-Rhine, and M. Pier, Heidelberg, Germany, assignors, by mesne assignments, to Standard I. G. Company, Linden, N. J. Conversion of solid fuels and products derived therefrom or other materials into valuable liquids. 1,904,476; Apr. 18.
Krauch, Carl, Ludwigshafen-on-the-Rhine, M. Pier, Heidelberg, and E. Anthes, Ludwigshafen-on-the-Rhine, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Production of valuable organic products. 1,904,477; Apr. 18.
Kreidel, Hans, Wiesbaden, Germany. Joint for pipes. 1,904,866; Apr. 18.
Krements & Company. (See Hilfebrand, Emil C., assignor.)
Krick, George W. (See Rodriques, Juan P., assignor.)
Kriegsheim, Heinrich, assignor to The Permutit Company, New York, N. Y. Control of the saline content of boiler waters. 1,904,900; Apr. 18.
Krueger, Fred G., Norwood, and F. H. Hudepohl, St. Bernard, Ohio. Stereopticon operating device. 1,904,622; Apr. 18.
Kruetzer, Frederic J., Elmira, N. Y., assignor to James Manufacturing Company, Fort Atkinson, Wis. Farm building. Des. 89,643; Apr. 18.
Kreutzer, Frederic J., Elmira, N. Y., assignor to James Manufacturing Company, Fort Atkinson, Wis. Farm building. Des. 89,644; Apr. 18.
Kreutzer, Frederic J., Elmira, N. Y., assignor to James Manufacturing Company, Fort Atkinson, Wis. Farm building. Des. 89,645; Apr. 18.
Kroen, August F., Beaver Falls, Pa. Closure for containers. 1,904,739; Apr. 18.
Kruckemeyer, Charles G., Jennings, Mo. Gang-mower. 1,904,876; Apr. 18.
Krum, Howard L., et al. (See Morton, S., Krum, and Kleinschmidt.)
Kubach, William L., East Cleveland, Ohio, assignor to General Electric Company. Method and apparatus for testing incandescent lamps and similar articles. 1,904,059; Apr. 18.
Kuhl, Paul E., Elizabeth, N. J., assignor to Standard Oil Development Company. Apparatus for fractionating liquids. 1,904,144; Apr. 18.
Kuhn, Ray C., Warsaw, Ohio. Banquet table. 1,904,060; Apr. 18.
Kullman, Alfred, assignor to Graton & Knight Company, Worcester, Mass. Picker for fly shuttle looms. 1,904,316; Apr. 18.
Kuns, Max A., Mannheim, and K. Koeberle and R. Berthold, Ludwigshafen-on-the-Rhine, Germany, assignors to General Aniline Works Inc., New York, N. Y. Halogenation of aromatic compounds. 1,904,145; Apr. 18.
Kurlash Company, Inc., The. (See Tuttle, W. E., and Stickel, assignors.)
Kurts, Henry F., assignor to Bausch & Lomb Optical Company, Rochester, N. Y. Röntgenological reproduction. 1,904,867; Apr. 18.
Kurts, Henry F., assignor to Bausch & Lomb Optical Company, Rochester, N. Y. Stereoscope. 1,904,868; Apr. 18.

L. A. B. Company, The. (See Laughlin, W. C., and Asch, assignors.)
La Brie, Ludger E. (See Bendix, V., and La Brie.)
Lacaprara, Donato, Dearborn, and K. E. Ketchum, Detroit, Mich. Tunneling equipment. 1,903,866; Apr. 18.
Ladd, Edward T., Lewiston, assignor to Isco Chemical Company, Inc., Niagara Falls, N. Y. Apparatus for making bleaching powder. 1,904,478; Apr. 18.
Lamont, Boyd Neil Robert, Feltham, England, assignor to Simplifix Patents Limited, Teddington, Middlesex, England. Coupling for joining pipes, rods, wires, and the like. 1,903,926; Apr. 18.
Landecker, Max, Barmen, Germany. Molding powder and method of molding. 1,904,243; Apr. 18.
Landecker, Max, Barmen, Germany. Plastic mass and making same. 1,904,244; Apr. 18.
Landis Machine Company. (See Mathias, Samuel W., assignor.)
Landis Tool Company. (See Good, Harper A., assignor.)
Larkin, John J., St. Louis, Mo. Well casing shoe. 1,904,317; Apr. 18.
Larsen, Einer W., Chicago, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Wire drawing apparatus. 1,904,146; Apr. 18.
Larsen, Einer W., Chicago, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Wire drawing machine. 1,904,147; Apr. 18.
Larsen, Einer W., Chicago, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Indicating and control device for material receiving apparatus. 1,904,869; Apr. 18.
Larson, David C. (See Lindquist, D. L., Dunn, and Larson.)
Larson, Louis, Katonah, N. Y. Pet's bed. Des. 89,646; Apr. 18.
Larson, Sigfrid, Portland, Oreg. Hose coupling. 1,904,061; Apr. 18.
Lashar, Walter B., Fairfield, Conn., assignor to American Chain Company. Reenforced chain and making the same. 1,904,479; Apr. 18.
Laska, Leopold, and O. Haller, Offenbach-on-the-Main, Germany, assignors to General Aniline Works, Inc., New York, N. Y. Carboxylic acid arylides of the benzene series and making same. 1,903,899; Apr. 18.
Laughlin, William C., Glendale, Calif., and A. B. Asch, assignors to The L. A. B. Company, New York, N. Y. Discharge apparatus. 1,904,062; Apr. 18.
L'Auxiliaire des Chemins de Fer et de l'Industrie. (See Fiedler, Sébastien O. A. assignor.)
La Valle, Inc. (See Grube, Frank, assignor.)
Lavoie, Louis, Quebec, Quebec, Canada. Outlet control for liquid containers. 1,904,798; Apr. 18.
Lawrence, Harry W., Denver, Colo. Electric light fixture. 1,904,901; Apr. 18.
Lawson, Robert H. (See Smith, W. L., jr., and Lawson.)
Laycock, Kenneth G., Shavertown, Pa., assignor to Goss Printing Press Company, Chicago, Ill. Web controlling mechanism. 1,904,870; Apr. 18.
Leaper, Joseph M. F. (See Hess, R. W., and Leaper.)
Leathers, Ward, Haworth, N. J., assignor to The Quadrex Corporation. Double filter for vacuum cleaners. 1,904,690; Apr. 18.
Lebbers, Harry J., assignor to The Everedy Company, Frederick, Md. Bottle capper. 1,903,822; Apr. 18.
Lee, Sherman Q., Madison, Wis., assignor, by mesne assignments, to American Face Brick Research Corporation. Promoting the bloating of earthy materials. 1,903,821; Apr. 18.
Leech, Jacob T., assignor to Union Drawn Steel Company, Beaver Falls, Pa. Wire drawing machine. 1,904,947; Apr. 18.
Leffert, Sol C., Brighton, N. Y. Tether for children. 1,904,480; Apr. 18.
Lefland, Paul W., Arlington, Tex. Support for parasitic growths. 1,904,287; Apr. 18.
Legerlotz, Helmut, Berlin, Germany, assignor to Frederick Stearns & Company, Detroit, Mich. Manufacture of secondary aromatic amino-alcohols. 1,903,927; Apr. 18.
Lehere, Henry H., Akron, Ohio. Frame. 1,904,318; Apr. 18.
Lehmann, Franz, Zurich, Switzerland. Vacuum cleaner. 1,903,867; Apr. 18.
Lehn, John U. (See Zahm, J. D., and Lehn.)
Leitz, Ernst, Optische Werke. (See Pliez, Heinrich, assignor.)
Le Materiel Electrique S. W. (See de Beaumarchais, Charles, assignor.)
Le May, Ariel M., Chicago, Ill., assignor, by mesne assignments, to S. H. Camp & Company, Jackson, Mich. Bust uplift. 1,904,644; Apr. 18.
Lenander, Nils E., Lokken Verk, Norway, assignor, by mesne assignments, to Texas Gulf Sulphur Company, Houston, Tex. Recovering sulphur from sulphide minerals. 1,904,481; Apr. 18.
Lenander, Nils E., Lokken Verk, Norway, assignor, by mesne assignments, to Texas Gulf Sulphur Company, Houston, Tex. Production of elemental sulphur. 1,904,482; Apr. 18.
Lenander, Nils E., Lokken Verk, Norway, assignor, by mesne assignments, to Texas Gulf Sulphur Company, Houston, Tex. Production of elemental sulphur from gaseous sulphur compounds. 1,904,483; Apr. 18.
Lenz, Wilhelm, Wiesbaden-Biebrich, and K. Jochum, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Accelerating the retting of flax. 1,904,148; Apr. 18.
Leonard, Anthon A., Forest Hills, N. Y., assignor, by mesne assignments, to Transitone Automobile Radio Corporation, Philadelphia, Pa. Eliminating the effects on radio circuits of sparking in the ignition system of an internal combustion engine. 1,904,149; Apr. 18.
Leopold, George O. (See Fegley, T. J., and Leopold.)
Leupold, Mathias, et al. (See Farrett, Dent.)
Levin, Nils D., assignor to The Jeffrey Manufacturing Company, Columbus, Ohio. Coal cutting machine. 1,904,488; Apr. 18.
Levin, Nils D., assignor to The Jeffrey Manufacturing Company, Columbus, Ohio. Coal mining apparatus. 1,904,489; Apr. 18.
Levine, Bernhard, Bronx, N. Y. Bookmaking machine attachment. 1,904,645; Apr. 18.
Levy, Stanley I., Kingston Hill, England. Removing arsenic and chlorine from sulphur. 1,904,484; Apr. 18.
Lewis, Albert O., White Hall, Glais, Wales. Hair waver. 1,904,150; Apr. 18.
Lewis, Donald C. (See Reid, E. W., and Lewis.)
Lewis, Harold R., assignor to Sprague-Sells Corporation, Hoopeston, Ill. Corn silker. 1,904,740; Apr. 18.
Lewis Invisible Stitch Machine Company. (See Mueller, Charles W., assignor.)
Lewis, Orval M., Shelton, Wash. Brake equaliser. 1,904,004; Apr. 18.
Leyes, Louis, City Island, N. Y. Mechanical movement. 1,904,151; Apr. 18.
Libbey Glass Manufacturing Company, The. (See Nash, Arthur D., assignor.)
Libbey-Owens-Ford Glass Company. (See Cone, Carroll, assignor.)
Lichtig, Abraham J., Oakland, Calif. Clothes bag. Re18,799; Apr. 18.
Lilleberg, Tideman M., assignor to The Nye Tool & Machine Works, Chicago, Ill. Die holding means. 1,903,786; Apr. 18.
Lillig, Nicholas R., assignor to Tice Lock-Washer Manufacturing Co., Portland, Oreg. Manufacturing lock washers. 1,903,785; Apr. 18.
Lindberg, Lawrence W., Brooklyn, assignor to Doherty Research Company, New York, N. Y. Multiple expansion engine. 1,904,871; Apr. 18.
Lindquist, David L., Hartsdale, N. Y., E. L. Dunn, East Orange, N. J., and D. C. Larson, Yonkers, N. Y., assignors to Otis Elevator Company, Jersey City, N. J. Elevator system. 1,904,646; Apr. 18.
Lindquist, David L., Hartsdale, N. Y., E. L. Dunn, East Orange, N. J., and D. C. Larson, Yonkers, N. Y., assignor to Otis Elevator Company, Jersey City, N. J. Elevator system. 1,904,647; Apr. 18.
Liquid Carbonic Corporation, The. (See Gruetter, John R., assignor.)
Littleway Process Company, The. (See Fausse, Joseph, assignor.)
Liva, Henry, assignor of one-half to Angelo Sebastianelli, Scranton, Pa. Permanent and temporary brake lock. 1,904,794; Apr. 18.
Livingston, Orrin W., Schenectady, N. Y., assignor to General Electric Company. Control system. 1,904,485; Apr. 18.
Locke Insulator Corporation. (See Bettini, David, assignor.)
Lockhart, George R., Providence, assignor to Manville Jenckes Company, Pawtucket, R. I. Manufacture of rayon. 1,904,877; Apr. 18.
Lodge, William C., Montreal, Quebec, Canada, assignor to Manson Chemical Company. Paper product and making same. 1,903,787; Apr. 18.
Logan Co., Inc. (See Posey, Herbert D., assignor.)
Lomax, Clarence E. (See Saunders, N. H., and Lomax.)
Lomax, Clarence E. (See Tharp, V. S., and Lomax.)
Lommel, Wilhelm, Leverkusen-Wiesdorf, and R. Engelhardt, Leverkusen-I. G.-Werk, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Preparing alkyl esters of carboxylic acids. 1,903,868; Apr. 18.
Longenecker, Charles I., Wauwatosa, assignor to Chain Belt Company, Milwaukee, Wis. Plunger pump. 1,904,486; Apr. 18.
Lorber, Charles, Louisville, Ky. Packeting dough. 1,904,741; Apr. 18.
Lorens, Fred C., Chicago, Ill. Gas water heater control. 1,903,788; Apr. 18.
Lougheed, Victor, Washington, D. C. Aerodynamic surface. 1,903,823; Apr. 18.
Love, Charles A. (See Parr, W. V., Love, and Barnes.)
Lovely, John E., assignor to Jones & Lamson Machine Company, Springfield, Vt. Work holding mechanism. 1,904,152; Apr. 18.
Löwenstein, Walter H., Cologne-Kalk, Germany. Device for drying razor blades. 1,904,661; Apr. 18.
Lucke, Charles E., New York, N. Y., assignor, by mesne assignments, to Fuller Lehigh Company. Heating combustion air for a furnace. 1,904,153; Apr. 18.
Lund, Rudolph O., New York, N. Y. Fire hose rack. 1,904,063; Apr. 18.
Luthet, Martin P., assignor to Super Safety Switch Co. Chicago, Ill. Electric switch. 1,903,824; Apr. 18.

Luserne Motor Company. (See Conroy, Marcus F., assignor.)
Lynds, Fred H., North Attleboro, Mass. Moving picture screen. 1,904,872; Apr. 18.
Lyon, Clinton L., Scotia, and C. A. Jagger, Schenectady, N. Y., assignors to General Electric Company. Resistance unit. 1,904,487; Apr. 18.
Mac Caskie, Thomas M., assignor to Hathaway Watson, Chicago, Ill. Aeroplane. 1,904,923; Apr. 18.
MacDonald, Hugh. (See MacDonald, William and H.)
MacDonald, William and H., Inverness, Scotland. Appliance for use in hair waving. 1,904,064; Apr. 18.
MacFadden, Wilford C., Fox Chase, assignor to H. H. Eby, Philadelphia, Pa. Socket for tubes. 1,904,670; Apr. 18.
MacFarlane, Robert F., Fulham, London, and W. H. Prescott, Willesden, London, England, assignors to Baker Perkins Company, Inc., Saginaw, Mich. Icing biscuits and the like. 1,904,742; Apr. 18.
Mackenzie, Kenneth G., Westport, Conn., assignor to The Texas Company, New York, N. Y. Lubricating oil. 1,904,065; Apr. 18.
Madine, John J., Cleveland, Ohio, assignor, by mesne assignments, to Flexlume Corporation, Tonawanda, N. Y. Electrode for discharge tubes. 1,904,154; Apr. 18.
Magee, James B., Nyack, N. Y. Attachment plug. 1,904,691; Apr. 18.
Malcolm, James A., Sheraden, and T. W. Wootton, Bellevue, Pa.; said Wootton assignor to said Malcolm. Apparatus for reproducing contours of surfaces. 1,904,625; Apr. 18.
Malec, Anthony, Brookfield, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Ejecting mechanism. 1,904,155; Apr. 18.
Mallina, Rudolph F., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Pneumatic sound reproducer. 1,904,156; Apr. 18.
Mallina, Rudolph F., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Turntable for phonographs. 1,904,490; Apr. 18.
Mallory, Edward B., Tenafly, N. J., assignor to The Climax Engineering Company, Clinton, Iowa. Refrigerating apparatus. 1,903,825; Apr. 18.
Mallory, Edward B., Tenafly, N. J., assignor to The Climax Engineering Company, Clinton, Iowa. Refrigerating apparatus. 1,903,826; Apr. 18.
Mallory, Edward B., Tenafly, N. J., assignor to The Climax Engineering Company, Clinton, Iowa. Refrigerating apparatus. 1,903,827; Apr. 18.
Malsbary, Job F., Fresno, Calif. Steam deflector and guard for dairy sinks. 1,904,743; Apr. 18.
Manhan, John, assignor to A. B. C. Metal Corp., New York, N. Y. Weather strip. 1,904,491; Apr. 18.
Mann, William F. H., New York, N. Y. Alarm for typewriters. 1,904,744; Apr. 18.
Manning, Maxwell & Moore, Inc. (See Fickett, Ernest L., assignor.)
Manson Chemical Company. (See Lodge, William C., assignor.)
Mantle Lamp Company of America, The. (See Schwarz, Eugene, assignor.)
Manuel, Charles J., LaCrosse, Wis., assignor, by mesne assignments, to Moto Meter Gauge & Equipment Corporation, Long Island City, N. Y. Bourdon lever type of pressure gauge. 1,904,492; Apr. 18.
Manville Jenckes Company. (See Lockhart, George R., assignor.)
Maranies, Rebecca S., assignor to S. Shapiro Co. Inc., New York, N. Y. Textile fabric or the like. Des. 89,669; Apr. 18.
Marek, John I., assignor to the Firm Carbonix Société, Paris, France. Manufacture of a coal substitute 1,904,883; Apr. 18.
Markuson, Oscar S., Hilton, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Electric cable. 1,904,873; Apr. 18.
Maroff, Albert E., Davenport, Iowa. Variable speed transmission. 1,904,319; Apr. 18.
Marples, Derek B., Bella Vista, Wettingen, Switzerland, assignor to Allis-Chalmers Manufacturing Company, Milwaukee, Wis. Pipeline booster system. 1,904,320; Apr. 18.
Marshall Furnace Company. (See Stout, Claude S., assignor.)
Martin, Charles W., Chicago, Ill. Table attachments for automobiles. 1,903,900; Apr. 18.
Martin, John F., assignor to United American Bosch Corporation, Springfield, Mass. Lighting generator. 1,904,692; Apr. 18.
Martin, Joseph E., assignor to F. E. Schwarzkopf, Baltimore, Md. Detergent dispensing device. 1,904,157; Apr. 18.
Marvel Carbureter Company. (See Kirby, Charles H., assignor.)
Mason, James, Deptford, London, England. Machine for applying bands, stamps, or the like to packets. 1,903,928; Apr. 18.
Masset, Edward, New York, N. Y. Saw guard. 1,904,005; Apr. 18.
Masslow, William C., assignor of one-half to A. E. Schultz, Forest Park, Ill. Bed. 1,903,901; Apr. 18.
Matheson, Avery A., assignor to Agfa Ansco Corporation, Binghamton, N. Y. Merchandising and display receptacle. 1,904,760; Apr. 18.
Mathias, Samuel W., assignor to Landis Machine Company, Waynesboro, Pa. Transfer mechanism. 1,904,493; Apr. 18.
Mathiesen Alkali Works, The. (See Taylor, M. C., and Richardson, assignors.)
Matte, Andrew L., Summit, N. J., assignor to American Telephone and Telegraph Company. Tuning fork generator. 1,904,494; Apr. 18.
Matthews, Alice C. (See Matthews, Harry.)
Matthews, Francis A. (See Almond, L. L., Herrington, and Matthews.)
Matthews, Harry, deceased, Tarentum, Pa., distributed by court to Alice C. Matthews, widow. Display container. 1,904,648; Apr. 18.
Matzner, Hyman, New York, N. Y., assignor to Thomas A. Edison, Incorporated, West Orange, N. J. Indicator for radioreceivers. Re18,796; Apr. 18.
Mauger, Jacques G., assignor to Société dite: Maison Camus-Duchermin Société Anonyme, Paris, France. Direct manufacture of ketones from impure volatile acids. 1,904,495; Apr. 18.
Maul, Johann. (See Meister, F., and Maul.)
Maw, Robert, Montreal, Quebec, Canada. Hydraulic transmission system. 1,904,496; Apr. 18.
Maxon, Gleaway, jr., and W. Ord, deceased, Chicago, Ill., by Harriet P. Ord, executrix, Hollywood, Calif., assignors to The Engineering Development Company, Cleveland, Ohio. Mechanical line grader. 1,904,948; Apr. 18.
May, Harold V. (See Tobey, H. W., and May.)
May Hosiery Mills. (See Smith, W. L., jr., assignor, and Lawson.)
Mayer, William H., jr., New York, N. Y. Textile fabric or similar article. Des. 89,647; Apr. 18.
McArthur, George G., Niagara Falls, N. Y. Book stock washer. 1,904,066; Apr. 18.
McCabe, Ira E., Chicago, Ill. Constant current ignition device. 1,904,878; Apr. 18.
McCaddam, Earl D., San Francisco, Calif. Agitating apparatus. 1,904,796; Apr. 18.
McCann, Charles J., Bay City, Mich. Dentist's mixing plate. 1,904,786; Apr. 18.
McCarthy, Edward L. (See Garrity, J. G., and McCarthy.)
McChesney, John S., Chicago, Ill. Flanged corrugated fastener. 1,904,288; Apr. 18.
McCoy, Ralph E. (See Scott, H. B., and McCoy.)
McDavitt, Carlisle N., Schenectady, N. Y., assignor to General Electric Company. Motor starter. 1,904,497; Apr. 18.
McFarland, Ernest L., Strasburg, Va. Combination table. 1,904,795; Apr. 18.
McGehee, Fred H., Okolona, Miss. Pencil display rack. 1,904,067; Apr. 18.
McGhee, Henry, Bumbcutters Bay, near Sydney, New South Wales, Australia. Roller particularly for use in textile machinery. 1,904,498; Apr. 18.
McGill Manufacturing Company. (See Popp, Rudolf, assignor.)
McGuire, Lee R., Newark, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Reel and assembling reels. 1,904,158; Apr. 18.
McHale, Michael J., Scranton, Pa. Flier construction. 1,904,624; Apr. 18.
McHenry-Millhouse Manufacturing Company. (See Humphrey, Don B., assignor.)
McIlvried, Edwin J., Cleveland, Ohio, assignor, by mesne assignments, to Western Electric Company, Incorporated, New York, N. Y. Wire drawing machine. 1,904,159; Apr. 18.
McKay Company, The. (See Carpenter, James W., assignor.)
McKee, Ralph H., Jersey City, and E. H. Morse, Nutley, N. J. Treating vegetable fibers. 1,903,828; Apr. 18.
McLaren, Chester, El Centro, Calif. Internal combustion engine. 1,904,499; Apr. 18.
McLaren, William W., Birmingham, Ala. Magnetic valve. 1,903,902; Apr. 18.
McLaughlin, John E., assignor to Owens-Illinois Glass Company, Toledo, Ohio. Glassware forming machine. 1,904,983; Apr. 18.
McLavy, Raymond B., and J. E. Conner, Columbine, Wyo. Gas burner. 1,903,903; Apr. 18.
McLenegan, David W., Schenectady, N. Y., assignor to General Electric Company. Electrical regulating system. 1,904,500; Apr. 18.
McLoughlin, Harold F., Solihull, England. Electrically welding metal tubing. 1,904,824; Apr. 18.
McManis, Charles N., Mitchell, S. Dak. Automobile differential. 1,904,797; Apr. 18.
Meacock, John Harper, Northampton, England. Conveyer, escalator, and the like. 1,904,068; Apr. 18.
Meader, Ralph L., Lynbrook, N. Y. Gumming tape on blanks. 1,904,874; Apr. 18.
Meador, Walter A., Gallatin, Tenn. Aerial navigator. 1,903,911; Apr. 18.
Means, Gardiner C., Poughkeepsie, N. Y. Pattern control mechanism. 1,904,006; Apr. 18.
Megley, Harley J., Chicago, Ill. Type bar machine. 1,903,829; Apr. 18.
Megros, Georges, Brouxville, assignor to The United Piece Dye Works, New York, N. Y. Textile fabric or the like. Des. 89,648; Apr. 18.
Megros, Georges, Brouxville, assignor to The United Piece Dye Works, New York, N. Y. Textile fabric or the like. Des. 89,649; Apr. 18.

Megros, Georges, Bronxville, assignor to The United Piece Dye Works, New York, N. Y. Textile fabric or the like. Des. 89,650; Apr. 18.

Meijer, Reinier, assignor to Naamlooze Vennootschap de Bataafsche Petroleum Maatschappij, The Hague, Netherlands. Process and apparatus for the manufacture of sweated paraffin from non-sweated paraffin and the like substances. 1,903,929; Apr. 18.

Meister, Franz, and J. Maul, Munich, Germany. Pillar or post standing in the street traffic. 1,903,869; Apr. 18.

Mekler, Lev A. (See Egloff, G., and Mekler.)

Melling, Herman W., Jackson, Mich. Lathe. 1,904,949; Apr. 18.

Mendel, William. (See Neidich, S. A., and Mendel.)

Merley, Sylvan R., Dover, N. J., and O. Spring, Okmulgee, Okla., assignors to Doherty Research Company, New York, N. Y. Manufacture of acetic acid. 1,904,160; Apr. 18.

Mers, Friedrich C. J. (See Hitzler, J., and Mers.)

Mesta Machine Company. (See Fisk, Gustav L., assignor.)

Metropolitan Engineering Company. (See Soehner, John D., assignor.)

Metzgar, Chester W., Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J. Heat exchanger. 1,904,875; Apr. 18.

Meyer, Frans. (See Henkel, W., and Meyer.)

Meyer, Joseph F., Orange, N. J. Knitting machine. 1,904,501; Apr. 18.

Meyer, Raymond B. (See Gebhard, Louis A.)

Michaels, Frank H., Dishman, Wash. Meat cutter. 1,903,789; Apr. 18.

Michelin, André J., Paris, assignor to Michelin et Cie. Clermont-Ferrand, France. Applying rubber to metal and other hard materials. 1,904,502; Apr. 18.

Michelon et Cie. (See Michelin, André J., assignor.)

Mieg, Walter, Opladen, and R. M. Heidenreich, Leverkusen-on-the-Rhine, Germany, assignors to General Aniline Works, Inc., New York, N. Y. Dyeing and printing textile fibers. 1,903,870; Apr. 18.

Mieg, Walter, Opladen, and R. M. Heidenreich, Leverkusen-on-the-Rhine, Germany, assignors to General Aniline Works, Inc., New York, N. Y. Dyeing and printing textile fibers. 1,903,871; Apr. 18.

Miller, Benjamin H., Wadsworth, Ohio, assignor to The Babcock & Wilcox Company, Bayonne, N. J. Chain grate stoker. 1,904,503; Apr. 18.

Miller, Charles Z., Fort Scott, Kans. Sled. 1,903,930; Apr. 18.

Miller, Peter, Chicago, Ill. Windshield visor. 1,904,069; Apr. 18.

Miller, Stephen J., Danbury, Conn. Hat flanging apparatus. 1,903,872; Apr. 18.

Miller, Stuart P., Englewood, N. J., assignor to The Barrett Company, New York, N. Y. By-product coke oven operation. 1,904,161; Apr. 18.

Miller, Stuart P., Englewood, N. J., assignor to The Barrett Company, New York, N. Y. Distillation of tar or pitch to coke and apparatus therefor. 1,904,504; Apr. 18.

Miller, Stuart P., Englewood, N. J., assignor to The Barrett Company, New York, N. Y. Distillation of tar or pitch. 1,904,505; Mar. 11.

Millers Falls Company. (See Bacon, Charles F., assignor.)

Milliken, Humphreys, Mount Royal, Montreal, Quebec, Canada. Electrical cable. 1,904,162; Apr. 18.

Mills, Lon A., Knoxville, and K. H. Mynatt, Fountain City, Tenn. Machine for distributing material on lawns, etc. 1,903,874; Apr. 18.

Miner, W. H., Inc. (See Haseltine, Stacy B., assignor.)

Miner, W. H., Inc. (See Miner, William H., assignor.)

Miner, William H., Chasy, N. Y., assignor to W. H. Miner, Inc., Chicago, Ill. Friction shock absorbing mechanism. 1,904,379; Apr. 18.

Mississippi Glass Company. (See Begeman, Myron L., assignor.)

Mitchell, Doren. (See Wright, S. B., and Mitchell.)

Mitchell, Doren, Martinsville, N. J., assignor to American Telephone and Telegraph Company. Transmission control. 1,903,875; Apr. 18.

Moffett, Myrtha, Fresno, Calif. Tool for tying fence wires. 1,903,830; Apr. 18.

Molins, Walter E., and J. W. Chalmers, Deptford, London, England, assignors to The American Tobacco Company, New York, N. Y. Package for cigarettes. 1,903,873; Apr. 18.

Molins, Walter E., and F. F. Ruan, Deptford, London, England. Apparatus for supplying tobacco to a cigarette making machine. 1,903,931; Apr. 18.

Monro, Randolph, Edgewood, Md. Drinking mask. 1,903,831; Apr. 18.

Montgomery, Thomas. (See Ewing, C. R., and Montgomery.)

Moore, Frederick Joseph. (See Jones, D. T., and Moore.)

Morden, Stephen R., San Francisco, Calif. Collar support. 1,904,506; Apr. 18.

Morgan, Harry B., et al. (See Prior, Walter, jr., assignor.)

Morgan, Henry W., Brighton, assignor to Morgan Machine Company, Inc., Rochester, N. Y. Nailing machine. 1,904,507; Apr. 18.

Morgan, John D., Maplewood, N. J., assignor to Doherty Research Company, New York, N. Y. Combustion engine with preheated air. 1,904,070; Apr. 18.

Morgan, John D., South Orange, N. J., assignor to Doherty Research Company, New York, N. Y. Reduction furnace. 1,904,508; Apr. 18.

Morgan Machine Company, Inc. (See Morgan, Henry W., assignor.)

Morrell, Jacque C., assignor to Universal Oil Products Company, Chicago, Ill. Refining of hydrocarbon oils. 1,904,381; Apr. 18.

Morrell, Jacque C., assignor to Universal Oil Products Company, Chicago, Ill. Sweetening hydrocarbon distillates containing mercaptans. 1,904,382; Apr. 18.

Morrell, Jacque C., and J. G. Alther, assignors to Universal Oil Products Company, Chicago, Ill. Apparatus for vapor fractionation. 1,904,380; Apr. 18.

Morris, Anderson F., Weir, Tex. Draft device. 1,904,163; Apr. 18.

Morris, Herbert N., Broxbourne, assignor to Rucel Limited, London, England. Improved abrasive coated materials. 1,904,663; Apr. 18.

Morse, Albert W., Forest Hills, N. Y. Nebulizer of liquids. 1,904,509; Apr. 18.

Morse, Earle H. (See McKee, R. H., and Morse.)

Morton, Sterling, H. L. Krum, and E. E. Kleinschmidt, assignors to Teletype Corporation, Chicago, Ill. Signaling system and apparatus therefor. 1,904,164; Apr. 18.

Moseley, Tomlinson I., San Francisco, Calif. Hair waver. 1,904,625; Apr. 18.

Mosely, William P., assignor to The Yale & Towne Manufacturing Company, Stamford, Conn. Safe deposit lock. 1,904,383; Apr. 18.

Moses, Frederick G., New York, R. W. Hess, Buffalo, and R. L. Perkins, East Aurora, assignors to The Barrett Company, New York, N. Y. Concentration of ores by flotation. 1,904,460; Apr. 18.

Moto Meter Gauge & Equipment Corporation. (See Blodgett, George R., assignor.)

Moto Meter Gauge & Equipment Corporation. (See Manuel, Charles J., assignor.)

Mott, Harriet J., Hollis, N. Y. Umbrella holder. 1,904,510; Apr. 18.

Mueller, Charles W., assignor to Lewis Invisible Stitch Machine Company, St. Louis, Mo. Adjustable throw eccentric. 1,903,932; Apr. 18.

Mueller, Charles W., assignor to Lewis Invisible Stitch Machine Company, St. Louis, Mo. Seam. 1,903,933; Apr. 18.

Mullner, Edmund, assignor to Telefunken Gesellschaft fur Drahtlose Telegraphie m. b. H., Berlin, Germany. Variable condenser. 1,904,165; Apr. 18.

Munson, Harry, Wantagh, assignor to Van Kannel Revolving Door Company, New York, N. Y. Speed regulator for revolving doors. 1,904,885; Apr. 18.

Munters, Carl G., Stockholm, Sweden, assignor to Electrolux Servel Corporation, New York, N. Y. Refrigeration. 1,903,934; Apr. 18.

Murphy Varnish Company. (See Kennedy, Paul S., assignor.)

Mutrux, Marcel, and R. Caillet, Vevey, Switzerland. Liquid heater. 1,904,511; Apr. 18.

Myers, LaFayette, and C. S. Preston, San Diego, Calif. Vehicle lifting device. 1,904,693; Apr. 18.

Myers, Louis, Chicago, Ill. Game apparatus. 1,903,790; Apr. 18.

Myers, Louis, Chicago, Ill. Ice cream ladle. 1,903,791; Apr. 18.

Mynatt, Kyle H. (See Mills, L. A., and Mynatt.)

N. V. Philips Gloeilampenfabrieken. (See Beerink, E. H., and Van Wijk, assignors.)

Naamlooze Vennootschap de Bataafsche Petroleum Maatschappij. (See Meijer, Reinier, assignor.)

Nakamura, Toshichi, Los Angeles, Calif. Life-saving device. 1,904,767; Apr. 18.

Nash, Arthur D., assignor to The Libbey Glass Manufacturing Company, Toledo, Ohio. Smoker's stand. Des. 89,651; Apr. 18.

Nash Engineering Company. (See Nash, Harold L., assignor.)

Nash, Harold L., assignor to Nash Engineering Company, South Norwalk, Conn. Hydroturbine pumping apparatus. 1,904,321; Apr. 18.

National Aniline & Chemical Co. (See Heritage, Clark C., assignor.)

National Carbon Company. (See Saurwein, Albert G., assignor.)

National Cash Register Company. (See Berger, Friedrich W. F., assignor.)

National Cash Register Company. (See Scott, H. B., and McCoy, assignors.)

National Cash Register Company, The. (See Von Pein, Edward J., assignor.)

National India Rubber Company. (See Polleys, Herbert R., assignor.)

National Lock Washer Company, The. (See Berge, Joseph, assignor.)

National Machinery Company, The. (See Clouse, William L., assignor.)

National Malleable and Steel Castings Company. (See Robinson, David, assignor.)

National-Standard Company. (See Johnson, Alfred H., assignor.)

Naugatuck Chemical Company, The. (See Tuley, William F., assignor.)

Naugle, Harry M., and A. J. Townsend, Canton, Ohio, assignors to Naugle & Townsend, Inc., Wilmington, Del. Centrifugal molding apparatus. 1,903,906; Apr. 18.

Naugle & Townsend, Inc. (See Naugle, H. M., and Townsend, assignors.)

Neckerman, William, M., assignor to Republic Steel Corporation, Youngstown, Ohio. Pipe facing tool. 1,904,950; Apr. 18.

Neidich, Samuel A., Edgewater Park, N. J. Manufacture of tapered tubes of celluloid and the like. 1,904,290; Apr. 18.

Neidich, Samuel A., Edgewater Park, and W. Mendel, Beverly, N. J. Manufacturing articles from celluloid and the like. 1,904,289; Apr. 18.

Neilson, Clarence C. (See Neilson, Vivian W. and C. C.)

Neilson, Vivian W. and C. C., Trout Creek, Utah. Latch for gates and the like. 1,904,291; Apr. 18.

Nell, Gustave M., Detroit, Mich., assignor to Chicago Pneumatic Tool Company, New York, N. Y. Fluid pressure tool. 1,904,694; Apr. 18.

Nelles, Lafayette H., New York, N. Y. Soap molding machine. 1,904,071; Apr. 18.

Nelson, John F., Charleroi, Pa., and L. Hodge, Kent, Ohio. Paper flower box. 1,904,072; Apr. 18.

Nenninger, Lester F. (See Ernst, H., and Nenninger.)

Nenninger, Lester F., assignor to The Cincinnati Milling Machine Company, Cincinnati, Ohio. Milling machinery. 1,904,649; Apr. 18.

Nesbitt, Frank T., Alton, Ill., assignor, by mesne assignments, to Owens-Illinois Glass Company, Toledo, Ohio. Leer. 1,904,983; Apr. 18.

Neubert, Oskar. (See Günsler, H., and Neubert.)

Neuhauss, Heinrich, Dusseldorf, Germany. Lining a furnace by freezing. 1,904,664; Apr. 18.

Newhouse, Walter F., Benton Harbor, Mich. Machine for making and inserting wire fasteners for basket covers. 1,904,384; Apr. 18.

New York Air Brake Company, The. (See Campbell, Charles A., assignor.)

New York Merchandise Co. Inc. (See Shaw, Milton M., assignor.)

Nicholee, B. L. & Company. (See Wilson, Louis, assignor.)

Nichols, Herbert E., Santa Ana, Calif. Brake dust guard. 1,903,935; Apr. 18.

Nichols, Horace E., Redford, assignor of one-third to C. H. Chase and one-third to H. A. Freund, Detroit, Mich. Constant speed mechanism. 1,903,882; Apr. 18.

Nielsen, Heinrich V., West Wharf, Cardiff, South Wales, assignor to The Hygienic Manufactures and Supplies Company Limited, London County, England. Machine for filling bottles and other vessels. 1,904,924; Apr. 18.

Nielsen, Joseph N., New York, N. Y. Wall outlet and fitting. 1,903,833; Apr. 18.

Noble, Alphonso. (See Bristol, C. W., and Noble.)

Nordlander, Birger W., Schenectady, N. Y., assignor to General Electric Company. Method and apparatus for preparing sulphur dioxide. 1,904,512; Apr. 18.

Nordlander, Birger W., Schenectady, N. Y., assignor to General Electric Company. Apparatus for preparing sulphur dioxide. 1,904,513; Apr. 18.

Norling, Reinhold A., Aurora, assignor to Independent Pneumatic Tool Co., Chicago, Ill. Stud setting tool. 1,904,322; Apr. 18.

North Bro's M'f'g Co. (See Fegley, T. J., and Leopold, assignors.)

Northrup, Edwin F., Princeton, assignor to Ajax Electrothermic Corporation, Ajax Park, N. J. Magnetic return circuit. 1,904,665; Apr. 18.

Nowosielski, Edward B., Bloomfield, assignor to Eclipse Aviation Corporation, East Orange, N. J. Yielding coupling. 1,904,745; Apr. 18.

Nunnery, Raymond B., Chickasha, Okla. Display rack. 1,903,936; Apr. 18.

Nurnberger, Joseph S., St. Albans, W. Va. Vise. 1,904,798; Apr. 18.

Nutt, William H., Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Machine for slotting heels. 1,904,823; Apr. 18.

Nye Tool & Machine Works, The. (See Lilleberg, Tideman M., assignor.)

O. & S. Beating Co. (See Skillman, Newton, assignor.)

Oberle, Alfred, Kansas City, Mo. Producing carbonaceous material. 1,903,834; Apr. 18.

O'Brien, Richard J., assignor to Waugh Equipment Co., Depew, N. Y. Journal cushion. 1,904,007; Apr. 18.

O'Connor, Louie E., and C. G. Starnes, Mount Vernon, Ga. Tire inflating device. 1,904,073; April 18.

Ogden, Jacob W. (See Wheeler, W. H., jr., and Ogden.)

Ogden, Jacob W., Springdale, and B. Knauer, East Norwalk, assignors to Pitney-Bowes Postage Meter Co., Stamford, Conn. Setting and locking mechanism for printing devices of postage meters. 1,904,626; Apr. 18.

Ohio Brass Company, The. (See Wolf, Fred L., assignor.)

Ohio Injector Company of Illinois, The. (See Edwards, Frank W., assignor.)

Ohnsorg, Charles R., assignor of one-half to Josie Ohnsorg, New York, N. Y. Rotary wing aircraft propeller. 1,904,746; Apr. 18.

Ohnsorg, Josie. (See Ohnsorg, Charles R., assignor.)

Okill, John, Birkenhead, England. Device for measuring and indicating fluid pressures. 1,904,747; Apr. 18.

Oldenburg, Alfred, Berlin-Charlottenburg, assignor to Siemens-Schuckertwerke Aktiengesellschaft, Berlin-Siemensstadt, Germany. Protection for armature windings. 1,904,514; Apr. 18.

Olevin, Adolph, Bronx, N. Y. Threadless fitting conduit. 1,904,627; Apr. 18.

Oliver, James O., New York, N. Y. Plastering support. 1,904,245; Apr. 18.

Ollendorff, Gerhard, Wolfen, near Bitterfeld, Germany, assignor to Agfa Ansco Corporation, Binghamton, N. Y. Photographic roll film spool. 1,903,937; Apr. 18.

Olson, John, administrator. (See Hentschel, Ernest R.)

Olson, Samuel, & Company. (See Olson, Samuel, assignor.)

Olson, Samuel, assignor to Samuel Olson & Company, Inc., Chicago, Ill. Selective unloader mechanism for elevators. 1,903,835; Apr. 18.

Ord, Harriet P., executrix. (See Maxon, G., jr., and Ord.)

Ornstein, Georg, Berlin, Germany. Treating sewage. 1,904,246; Apr. 18.

Osmer, Charles F. (See Hanson, L. A., and Osmer.)

Oswald, Alfred E., Hackensack, N. J., assignor to Underwood Elliott Fisher Company, New York, N. Y. Word counting register for typewriters. 1,904,516; Apr. 18.

Otis Elevator Company. (See Lindquist, D. L., Dunn, and Larson, assignors.)

Otto, Carl, Essen-Ruhr, Germany. Regenerative coke oven. 1,04,516; Apr. 18.

Owens-Illinois Glass Company. (See Collins, John E., assignor.)

Owens-Illinois Glass Company. (See McLaughlin, John E., assignor.)

Owens-Illinois Glass Company. (See Nesbitt, Frank T., assignor.)

Owens-Illinois Glass Company. (See Soubler, Leonard D., assignor.)

Packard Motor Car Company. (See Griswold, Walter R., assignor.)

Paesler, Hans, assignor to Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H., Berlin, Germany. Duplex system of telephony. 1,904,517; Apr. 18.

Palmer, Harry A., Boston, Mass., assignor to Palmer Inventions, Incorporated. Pump mechanism. 1,904,709; Apr. 18.

Palmer Inventions, Incorporated. (See Palmer, Harry A., assignor.)

Palmgren, Per G., assignor to Aktiebolaget Svenska Kullagerfabriken, Gottenborg, Sweden. Bearing mounting. 1,904,247; Apr. 18.

Papadopoulos, Georgebeys P., assignor of sixty-six and two-thirds per cent to A. V. Biser, Detroit, Mich. Hat block. 1,903,912; Apr. 18.

Pape, Wilhelm. (See Weber, H., and Pape.)

Paragon Revolute Corporation. (See Sullivan, Harry H., assignor.)

Park, Robert E., jr., Jersey City, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Making electrical condensers. 1,904,676; Apr. 18.

Parker Pen Company, The. (See Dahlberg, Arthur O., assignor.)

Parr, William V., C. A. Love, and J. J. Barnes, Minneapolis, Minn. Doorlock. 1,904,748; Apr. 18.

Parrett, Dent, St. Joseph, Mich., assignor to Joseph Gosner and M. Leupold, New York, N. Y. Axle structure. 1,903,918; Apr. 18.

Parrett, Dent, St. Joseph, Mich., assignor to Joseph Gosner and M. Leupold, New York, N. Y. Variable speed transmission. 1,903,914; Apr. 18.

Parsons, Harry H., Missoula, Montana. Indicating device. 1,903,938; Apr. 18.

Parvin, Edward G., Roselle, N. J. Radio circuit. 1,904,877; Apr. 18.

Pateman, Arthur, Leicester, assignor to Imperial Typewriter Company Limited, London, England. Typewriter. 1,904,518; Apr. 18.

Patent Button Company, The. (See Carley, Leonard R., assignor.)

Patten, James C. (See Haueisen, B. R., and Patten.)

Patten, Margaret L., executrix. (See Haueisen, B. R., assignor, and Patten.)

Paul, William E., Schenectady, N. Y., assignor to General Electric Company. Electric circuit interrupter. 1,904,519; Apr. 18.

Pawtucket Screw Company. (See Green, Charles E., assignor.)

Payne, Matt, Surbiton, England. Heating and ventilating apparatus. 1,903,939; Apr. 18.

Payne, Oscar V. (See Holmes, E. R., and Payne.)

Pederson, Edwin, trustee. (See Adams, Royal E., assignor.)

Peebles, Thomas A., Mount Lebanon, assignor to John M. Hopwood, Dormont, Pa. Water control apparatus. 1,904,324; Apr. 18.

Peelle Company, The. (See Peelle, Robert S., assignor.)

Peelle, Robert S., Hollis, assignor to The Peelle Company, Brooklyn, N. Y. Electrical interlock. 1,904,008; Apr. 18.

Peelle, Robert S., Hollis, assignor to The Peelle Company, Brooklyn, N. Y. Operator for counterbalanced elevator doors. 1,904,009; Apr. 18.

Peelle, Robert S., Hollis, assignor to The Peelle Company, Brooklyn, N. Y. Pass-type elevator door. 1,904,010; Apr. 18.

Peiler, Karl E., West Hartford, assignor to Hartford-Empire Company, Hartford, Conn. Rotary knife for severing molten glass. 1,904,325; Apr. 18.
Pelton, George E., Los Angeles, Calif., assignor to The George E. Pelton Company. Ink transfer member and making the same. 1,904,628; Apr. 18.
Pelton, George E., Company. (See Pelton, George E., assignor.)
Penn Electric Switch Co. (See Henning, Malcolm E., assignor.)
Penn Electric Switch Co. (See Penn, Ralph, assignor.)
Penn, Ralph, assignor to Penn Electric Switch Co., Des Moines, Iowa. Automatic controlling device. 1,904,326; Apr. 18.
People of the United States of America, The. (See Schuster, Carl E., assignor.)
Peoples, Earl R., Beardstown, Ill. Goal. 1,904,836; Apr. 18.
Perkins, Karl D. (See Karr, A. D., and Perkins.)
Perkins, Richard E., Everett, Mass. Corn harvester. 1,904,749; Apr. 18.
Perkins, Robert L. (See Moses, F. G., Hess, and Perkins.)
Perks, George W., assignor of one-half to Stanley H. Austin, Akron, Ohio. Frying pan. 1,904,925; Apr. 18.
Permutit Company, The. (See Clark, Thomas B., assignor.)
Permutit Company, The. (See Kriegsheim, Heinrich, assignor.)
Permutit Company, The. (See Sweeney, Orland R., assignor.)
Perry, Stanley, assignor to Automatic Burner Corporation, Chicago, Ill. Gas ignition device. 1,903,792; Apr. 18.
Peters, Fredus N., jr., Evanston, assignor to Quaker Oats Company, Chicago, Ill. Reduction of furfural acetone and furan derivatives. 1,903,850; Apr. 18.
Peters, Henry W., Boston, Mass. Finger ring or the like. 1,904,074; Apr. 18.
Peters, William C. H., Albert City, Iowa. Sanitary well top. 1,904,926; Apr. 18.
Peterson, Peter, Detroit, Mich. Punch. 1,904,951; Apr. 18.
Petit, William H. (See Apple, V. G., and Petit.)
Petrich, Anton J., Milwaukee, Wis. Scissors sharpener. 1,904,075; Apr. 18.
Phillips, Albert J. (See Swartz, C. E., and Phillips.)
Philips', N. V., Gloeilampenfabriken. (See De Boer, Jan H., Van Geel, and Emmens, assignors.)
Pickard, Frank C., Erie, Pa., assignor to The Standard Stoker Company, Incorporated. Stoker. 1,904,520; Apr. 18.
Pier, Mathias. (See Krauch, C., and Pier.)
Pier, Mathias. (See Krauch, C. Pier, and Anthes.)
Pier, Mathias, Heidelberg, and K. Winkler, Ludwigshafen-on-the-Rhine, Germany, assignors, by mesne assignments, to Standard-I. G. Company, Linden, N. J. Separation of oils from solid residues. 1,904,521; Apr. 18.
Piggly Wiggly Corporation. (See Healy, John F., assignor.)
Pilla, Tony, Trenton, N. J. Engine control. 1,903,876; Apr. 18.
Pippin, Haskel A., Okmulgee, Okla. Apparatus for drilling wells. 1,904,522; Apr. 18.
Pitney-Bowes Postage Meter Co. (See Ogden, J. W., and Knauer, assignors.)
Pitney-Bowes Postage Meter Co. (See Wheeler, W. H., jr., and Ogden, assignors.)
Pittman, George R., Wichita, Kans. Armrest. 1,904,800; Apr. 18.
Pixley, Judson S., New York, N. Y., and M. Bender, Glen Ridge, N. J., assignors to Armspear Manufacturing Company, New York, N. Y. Lantern. 1,904,248; Apr. 18.
Place, Bion C., assignor of one-half to G. E. Gagnier, Detroit, Mich. Securing trim panels. 1,904,076; Apr. 18.
Place, Bion C., assignor of one-half to G. E. Gagnier, Detroit, Mich. Securing trim panels. 1,904,077; Apr. 18.
Platter, Orval R., et al. (See Bauch, William H., assignor.)
Plies, Heinrich, Wetzlar, assignor to Ernst Leitz, Optische Werke, Wetzlar, Thuringia, Germany. Epidiascope. 1,904,695; Apr. 18.
Plummer, Herbert L., and D. L. Irwin, High Holborn, London, England. Construction of roofing, partitions, and the like. 1,904,080; Apr. 18.
Plutino, Nicola C., Welland, Ontario, Canada. Automatic Airplane and dirigible control apparatus. 1,904,801; Apr. 18.
Poling, Harry A., assignor of one-fourth to F. E. Symmonds, Kenosha, Wis. Grinding and polishing attachment for rolling mills. 1,904,885; Apr. 18.
Polleys, Herbert R., New Haven, Conn., assignor to National India Rubber Company, Bristol, R. I. Shoe tip and heel pressing machine. 1,904,166; Apr. 18.
Pontoppidan, Carl, Holte, Copenhagen, Denmark, assignor to F. L. Smidth & Co., New York, N. Y. Fine grinding of cement material. 1,904,523; Apr. 18.
Popp, Rudolf, assignor to McGill Manufacturing Company, Valparaiso, Ind. Switch mechanism. 1,904,927; Apr. 18.
Poppe, George W., Brooklyn, N. Y. Striker bar for bag machines. 1,904,078; Apr. 18.
Portnoff, Leo, Brooklyn, N. Y. Apparatus for instruction for stringed musical instrument playing. 1,904,928; Apr. 18.
Posey, Herbert D., Cleveland, Ohio, assignor to Logan Co., Inc., Louisville, Ky. Switching conveyer. 1,904,837; Apr. 18.
Post, Charles B., New London, Ohio. Fluting machine. 1,904,030; Apr. 18.
Posthumus, Klaas, Eindhoven, Netherlands, assignor to Radio Corporation of America. Amplifier. 1,904,524; Apr. 18.
Potdevin, Adolph, Garden City, assignor to Potdevin Machine Company, Brooklyn, N. Y. Machine for handling strip material. 1,904,878; Apr. 18.
Potdevin Machine Company. (See Ettl, Joseph, assignor.)
Potdevin Machine Company. (See Potdevin, Adolph, assignor.)
Potter, Frank M., Rome, assignor to General Cable Corporation, New York, N. Y. Cable. 1,904,525; Apr. 18.
Potter, Frank M., Rome, assignor to General Cable Corporation, New York, N. Y. Cable. 1,904,526; Apr. 18.
Potter, Frank M., Rome, assignor to General Cable Corporation, New York, N. Y. Cable. 1,904,527; Apr. 18.
Potter, William, New York, N. Y. Scraper. 1,903,877; Apr. 18.
Powell, Charles L., assignor to Caisson Contracting Company, New York, N. Y. Method and apparatus for forming foundation columns. 1,904,079; Apr. 18.
Powell, Charles L., New York, and H. R. Smith, Douglaston, assignors to Caisson Contracting Company, New York, N. Y. Earth boring apparatus. 1,904,249; Apr. 18.
Powell, John R., assignor to Bausch & Lomb Optical Company, Rochester, N. Y. Lens cutting machine. 1,904,879; Apr. 18.
Powers, Frank T., Douglaston, N. Y. Heater. 1,903,878; Apr. 18.
Powers, James B., Syracuse, N. Y. Air cooled internal combustion engine. 1,904,880; Apr. 18.
Pratt, Goodrich B., Grantwood, assignor to Bond Electric Corporation, Jersey City, N. J. Flash light. 1,904,902; Apr. 18.
Pratt, Goodrich B., assignor to Bond Electric Corporation, Jersey City, N. J. Flash light safety switch. 1,903,940; Apr. 18.
Pratt, Howell D., Chestnut Hill, Pa. Auxiliary wheel for automobiles. 1,904,081; Apr. 18.
Pratt & Whitney Company. (See Whitehead, Alexander G., assignor.)
Preilwitz, William, Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J. Portable compressor. 1,904,082; Apr. 18.
Prendergast, Charles S. and R. S., London, England. Variable speed gearing. 1,904,629; Apr. 18.
Prendergast, Richard S. (See Prendergast, Charles S. and R. S.)
Prenzel, Adam H., Halifax, Pa., assignor to United Shoe Machinery Corporation, Paterson, N. J. Apparatus for and method of attaching shoe linings. 1,904,327; Apr. 18.
Presbrey, Otis F., Brooklyn, N. Y. Sweeping machine. 1,904,881; Apr. 18.
Prescott, William E. (See Macfarlane, R. F., and Prescott.)
Preston, Clarence S. (See Myers, L., and Preston.)
Preston, Edward S., assignor to Chicago Electric Manufacturing Co., Chicago, Ill. Orange juice extractor. Des. 89,652; Apr. 18.
Priestson, Gustave A., Cliffside, N. J. Necktie and collar holder. 1,904,083; Apr. 18.
Prior, Walter, jr., South Orange, N. J., assignor of one-half to A. F. W. Viehweger, Poughkeepsie, and one-half to H. B. Morgan, Amenia, N. Y. Burglarproof lock. 1,904,882; Apr. 18.
Prosperity Company Inc., The. (See Davis, Ernest, assignor.)
Pulvis Aktiengesellschaft. (See Rudqvist, Carl A., assignor.)
Pungs, Wilhelm, and K. Eisenmann, Ludwigshafen-on-the-Rhine, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Lacquers, films, artificial masses, and the like. 1,904,528; Apr. 18.
Pungs, Wilhelm, and K. Eisenmann, Ludwigshafen-on-the-Rhine, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Manufacture of artificial masses. 1,904,529; Apr. 18.
Pure Carbonic Company of America. (See Purvis, Harry H., assignor.)
Purvis, Harry H., Port Jefferson, N. Y., assignor to Pure Carbonic Company of America. Automatic pressure sealing means. 1,904,250; Apr. 18.
Quadrex Corporation, The. (See Leathers, Ward, assignor.)
Quaker Oats Company. (See Peters, Fredus N., jr., assignor.)
Radio Corporation of America. (See Barden, William S., assignor.)
Radio Corporation of America. (See Bol, Cornelius, assignor.)
Radio Corporation of America. (See Franklin, Charles S., assignor.)
Radio Corporation of America. (See Posthumus, Klaas, assignor.)
Radio Corporation of America. (See Round, H. J., and Robb, assignors.)
Radio Corporation of America. (See Smith, Theodore A., assignor.)

Radio Corporation of America. (See Strutt, M. J. O., and Dijksterhuis, assignors.)
Radio Corporation of America. (See Weinberger, Julius, assignor.)
Radio Inventions, Inc. (See Doule, Harold P., assignor.)
Raffold Process Corporation. (See Rafton, Harold R., assignor.)
Rafton, Harold R., Andover, Mass., assignor to Raffold Process Corporation. Paper manufacture. 1,904,251; Apr. 18.
Railway Utility Company. (See Hartwig, William G., assignor.)
Ramsay, Wm. C. (See Schmuhl, Byron M., assignor.)
Rasbridge, Edward A., Lebanon, Pa. Card holder. 1,903,941; Apr. 18.
Ratajczak, Stephen. (See Stensy, August F. P., assignor.)
Rathbun, Sherrill S., Rockville Centre, N. Y. Power transmission. 1,904,530; Apr. 18.
Ray, Charles T., assignor to B. F. Avery & Sons, Louisville, Ky. Seed planter. 1,903,830; Apr. 18.
Rayburn, Alden G., Sausalito, Calif., assignor, by mesne assignments, to Automotive Engineering Corporation. Power transmission. 1,904,011; Apr. 18.
Raymond, Charles E., Boston, Mass. Dispensing container for tablets and the like. 1,904,386; Apr. 18.
Raymond, Thomas E., Zanesville, Ohio, assignor to Simplex Engineering Company. Hydraulic device for opening and closing filter presses and other pressure-applying mechanisms. 1,904,531; Apr. 18.
Reach, Milton B., Springfield, Mass., assignor to A. G. Spalding & Bros., New York, N. Y. Two-piece metal shaft for golf clubs. 1,904,750; Apr. 18.
Redler, Arnold, Gloucester, England, assignor to Redler Conveyor Company, Quincy, Mass. Conveyer. 1,904,167; Apr. 18.
Redler Conveyor Company. (See Redler, Arnold, assignor.)
Reerink, Engbert H., and A. Van Wijk, assignors to N. V. Philips' Gloeilampenfabrieken, Eindhoven, Netherlands. Preparing vitamin D. 1,904,751; Apr. 18.
Reeves, Elwin H., Toledo, Ohio. Vehicle body. 1,904,031; Apr. 18.
Reeves Manufacturing Company, The. (See Vogan, Frank M., assignor.)
Regina Corporation, The. (See Smith, Bernard P., assignor.)
Reichard, John F., assignor to United States Cigar Company, Inc., York, Pa. Converting tobacco stems into pulp. 1,903,942; Apr. 18.
Reichard, Willis E., assignor to The Worthington Ball Company, Elyria, Ohio. Golf ball. 1,904,012; Apr. 18.
Reichhardt, Herman C., Evanston, assignor to Star-Brite Corporation, Chicago, Ill. Glass lens for light reflector signal. Des. 89,670; Apr. 18.
Reid, Ernest W., Pittsburgh, and D. C. Lewis, Dormount, Pa., assignors to Carbide & Carbon Chemicals Corporation. Production of ethanol amines. 1,904,013; Apr. 18.
Reid, John, Oil City, Pa. Lubricating system and pump. 1,904,168; Apr. 18.
Reiss, Max, New York, N. Y. Book cover. 1,904,532; Apr. 18.
Remde, Edward H., assignor to The Baker-Raulang Company, Cleveland, Ohio. Industrial truck. 1,904,984; Apr. 18.
Remiker, George S. (See Anheuser, E. A., and Remiker.)
Remington Rand, Inc. (See Wolters, Carl F., assignor.)
Renfro, Pete D. (See Rollins, Levy J., assignor.)
Republic Flow Meters Co. (See Freeman, Ernest H., assignor.)
Republic Steel Corporation. (See Nechermann, William M., assignor.)
Reutter, Jean L., Paris, France. Torsion pendulum. 1,904,169; Apr. 18.
Reynolds, John L., Jackson Heights, assignor to Electrical Research Products Inc., New York, N. Y. Circuit for electric discharge devices. 1,904,533; Apr. 18.
Reyrolle, A., & Company Limited. (See Christie, J., and Amer, assignors.)
Rheiner, Alfred, assignor to the Firm "Chemical Works formerly Sandoz", Basel, Switzerland. Manufacture of emulsifying and wetting-out agents. 1,903,879; Apr. 18.
Rheinische Kampfer-Fabrik Gesellschaft mit beschrankter Haftung. (See Skrollkopf, K., and Serini, assignors.)
Rhodes, Leon Le Roy, Minneapolis, Minn. Coupling. 1,904,887; Apr. 18.
Rice, Chester W., Schenectady, N. Y., assignor to General Electric Company. Sound wave system. 1,904,534; Apr. 18.
Rice, Harold G., assignor to Indestro Mfg. Co., Chicago, Ill. Bottle capper. 1,904,328; Apr. 18.
Rice, Louis W., New York, N. Y., assignor to Bernard Rice's Sons Incorporated. Cocktail shaker or the like. Des. 89,653; Apr. 18.
Rice's, Bernard, Sons Incorporated. (See Rice, Louis W., assignor.)
Rich, Charles A., assignor to Brown & Sharpe Mfg. Co., Providence, R. I. Stock guide means for machine tools. 1,904,329; Apr. 18.
Richards, Willard F., Depew, N. Y. Pulley and mounting therefor. 1,904,535; Apr. 18.
Richardson, Chester N. (See Taylor, M. C., and Richardson.)
Richardson Company, The. (See Cain, J. R., and Yates.)
Richardson, Leon W., and A. D. Wassall, assignors to Sweeper-Vac Company, Worcester, Mass. Vacuum cleaner brush guard and adjusting roll assembly. 1,903,793; Apr. 18.
Richardson, Leon W., and A. D. Wassall, assignors to Sweeper-Vac Company, Worcester, Mass. Brush shaft holding and driving means for vacuum cleaners. 1,903,794; Apr. 18.
Richardson, Rodney G., assignor, by mesne assignments, to Associated Electric Laboratories, Inc., Chicago, Ill. Telephone system. 1,903,837; Apr. 18.
Richardson, Rodney G., assignor, by mesne assignments, to Associated Electric Laboratories, Inc., Chicago, Ill. Relay system. 1,904,929; Apr. 18.
Richter, Charles J., Berwyn, Ill., assignor to Goss Printing Press Company. Web supplying and controlling mechanism. 1,904,536; Apr. 18.
Richter, George A., assignor to Brown Company, Berlin, N. H. Cyclic process for the production of sulphite pulp. 1,904,170; Apr. 18.
Riddell, George A., Sheboygan, Wis. Collapsible terrace chair. 1,904,388; Apr. 18.
Rider, Phineas L. (See Wideman, L., Anderson, and Rider.)
Riebel, Frederick, jr., assignor to Air-Way Electric Appliance Corporation, Toledo, Ohio. Air-porous paper and making same. Re18,797; Apr. 18.
Riemenschneider, Edmund W., assignor to The Union Metal Manufacturing Company, Canton, Ohio. Metal pole with reenforcing pipes. 1,903,907; Apr. 18.
Rieschick, Reinhold, New York, N. Y. All metal key for piano-accordions. 1,904,768; Apr. 18.
Rigler, Richard W., Philadelphia, Pa. Centrifugal drier. 1,903,795; Apr. 18.
Rigney, William D., assignor to Russell, Burdsall & Ward Bolt & Nut Company, Port Chester, N. Y. Floating chuck for tapping machines. 1,904,883; Apr. 18.
Riley, Charles J., East Orange, N. J. Smoker's accessory. 1,904,084; Apr. 18.
Ringer, Ferdinand. Vienna, Austria. Ignitible stick. 1,903,888; Apr. 18.
Rizzo, Samuel, assignor to Artisan Shoe Company, Rochester, N. Y. Shoe and making the same. 1,904,085; Apr. 18.
Robb, John G. (See Round, H. J., and Robb.)
Robb, Theodore D., Ridgewood, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Telephone system. 1,904,252; Apr. 18.
Roberts, Benjamin F., Brasil, Ind. Apparatus for screening materials. 1,904,032; Apr. 18.
Roberts, Robert P. (See Ewing, H., and Roberts.)
Robertson, H. H. Company. (See Young, James H., assignor.)
Robinson, David, assignor to National Malleable and Steel Castings Company, Cleveland, Ohio. Car coupler. 1,904,171; Apr. 18.
Robinson, F., and Company, Limited. (See Robinson, Gilbert A., assignor.)
Robinson, Gilbert A., assignor to F. Robinson and Company, Limited, Hull, England. Tins, iron kegs and like metal containers. 1,904,630; Apr. 18.
Rochefort, François, Paris, France. Fuel supply process for internal combustion engine. 1,903,851; Apr. 18.
Rodriques, Juan P., assignor of one-half to G. W. Krick, Lake Worth, Fla. Propeller. 1,904,752; Apr. 18.
Roessler, Georg. (See Frankenburger, W., and Roessler.)
Roessler & Hasslacher Chemical Company, The. (See Harris, Charles E., assignor.)
Rollins, Levy J., assignor of one-half to Pete D. Renfro, Beaumont, Texas. Pipe joint. 1,903,852; Apr. 18.
Rouk, George T., Cedar Rapids, Iowa. Self-locking boom hoist. 1,904,930; Apr. 18.
Rosenberg, Heyman, New York, N. Y. Heat treating apparatus for metal work. 1,904,838; Apr. 18.
Rosenberg, Ralph H., Detroit, Mich., assignor to Budd Wheel Company, Philadelphia, Pa. Assembling metal members with rubber bushings. 1,904,931; Apr. 18.
Roetin, Hellodor, Berlin, Germany. Treating low boiling hydrocarbons. 1,904,172; Apr. 18.
Rothlin, Ernst. (See Stoll, A., and Rothlin.)
Round, Henry J., Muswell Hill, London, and J. G. Robb, Hendon, London, England, assignors to Radio Corporation of America. Loud speaker. 1,904,537; Apr. 18.
Round, Henry J., Muswell Hill, London, and J. G. Robb, Hendon, London, England, assignor to Radio Corporation of America. Loud speaker. 1,904,538; Apr. 18.
Roy, Gustave. Bellevue, France. Preparation of stable solutions of halogenated acetylcholin salts. 1,904,696; Apr. 18.
Royal, Thomas M., Philadelphia, Pa. Fastening attachment for paper bags. 1,903,889; Apr. 18.
Roye, Forrest C., Burkburnett, Tex. Stuffing box. 1,904,631; Apr. 18.
Royle, Vernon, Paterson, N. J. Extruding machine. 1,904,884; Apr. 18.
Royse, Grover C., Sacramento, Calif. Adjustable washer. 1,904,296; Apr. 18.
Ruau, Felix F. (See Molins, W. E., and Ruau.)
Rubber Service Laboratories Company. (See Sibley, Robert L., assignor.)
Rucel Limited. (See Morris, Herbert N., assignor.)
Rudolph, Corrie F. (See Gebhard, L. A., and Rudolph.)

Rudqvist, Carl A., Stockholm, Sweden, assignor to Pulvis Aktiengesellschaft, Glarus, Switzerland. Clutching device. 1,903,943; Apr. 18.

Ruff, Alonzo W., assignor to York Ice Machinery Corporation, York, Pa. Compressor control. 1,903,853; Apr. 18.

Ruff, De Witt C., St. Paul, Minn. Template for use in installing plumbing. 1,904,330; Apr. 18.

Rule, John F., Toledo, Ohio. Machine for forming hollow glassware. 1,904,985; Apr. 18.

Rupf, Ernest L., West New Brighton, N. Y. Lock nut and manufacture. 1,903,921; Apr. 18.

Rupf, Ernest L., West New Brighton, N. Y. Lock nut and manufacture. 1,903,922; Apr. 18.

Ruppel, Sigwart, Frankfort-on-the-Main, Germany. Method of and apparatus for gas blast circuit interruption. 1,904,539; Apr. 18.

Ruppel, Sigwart, Frankfort-on-the-Main, Germany. Switch. 1,904,540; Apr. 18.

Ruppert, Edward H., Brooklyn, N. Y. Safety draw-off apparatus for hot water systems. 1,904,697; Apr. 18.

Russell, Burdsall & Ward Bolt & Nut Company. (See Rigney, William D., assignor.)

Russell, Robert H., Cleveland, Ohio, assignor to Gas Fuel Corporation, New York, N. Y. Apparatus for making emulsified compounds including hydrocarbons. 1,904,952; Apr. 18.

Rutten, Peter, Osakis, Minn. Portable silo or the like. 1,904,932; Apr. 18.

Rydbeck, Patrik S., assignor to Aktiebolaget Svenska Kullagerfabriken, Gottenborg, Sweden. Bearing roller. 1,904,253; Apr. 18.

Sack, Hans, Leipzig, Germany. Apparatus for laying drain pipes or cables. 1,904,666; Apr. 18.

Sager, Solomon M., Glencoe, Ill. Fountain pen cap and ink guard. 1,904,014; Apr. 18.

St. Clair, Byron W., Lynn, Mass., assignor to General Electric Company. Electrical measuring instrument. 1,904,095; Apr. 18.

St. Clair, Byron W., Lynn, Mass., assignor to General Electric Company. Electrical instrument. 1,904,096; Apr. 18.

Saks, Ira, Cleveland, Ohio. Clutch or transmission plate. 1,904,953; Apr. 18.

Samdahl, Bjarne. (See Asgaard, T. B., Samdahl, and Hopstock.)

Samesreuther, Richard. (See Kränzlein, G., and Samesreuther.)

Sandelowsky, Sally, Hennigsdorf, Germany, assignor to General Electric Company. Automatic arc welding. 1,904,086; Apr. 18.

Sander, Ludwig, Frankfort-on-the-Main-Hochst, Germany, assignor to General Aniline Works, Inc., New York, N. Y. Esters of 2.3-amino-naphthoic acid and preparing them. 1,903,880; Apr. 18.

Sander, Otto, and K. König, assignor to Zeta-Bauweise G. m. b. H., Kassel, Germany. Wall structure and building block used therein. 1,903,881; Apr. 18.

Saunders, Alec L., Ottawa, Ontario, assignor to E. B. Eddy Company, Limited, Hull, Quebec, Canada. Paper cabinet. 1,904,297; Apr. 18.

Saunders, Norman H., Chicago, and C. E. Lomax, Oak Park, assignors, by mesne assignments, to Associated Electric Laboratories, Inc., Chicago, Ill. Telephone system. 1,904,933; Apr. 18.

Saurwein, Albert G., Cleveland, Ohio, assignor to National Carbon Company, Inc. Arc lamp mechanism. 1,904,541; Apr. 18.

Sayre, Kenneth H., assignor of forty-five per cent to J. C. Thorn, New York, N. Y. Device for transmitting and recording telephone messages. 1,904,298; Apr. 18.

Schacht, Elmer C., assignor to Behr-Manning Corporation, Troy, N. Y. Paper making process. 1,904,087; Apr. 18.

Schaper, Harry C., Columbus, Ohio, assignor to International Scale Company, New York, N. Y. Automatic weight indicating scales. 1,904,542; Apr. 18.

Schemmel, Robert C., Union City, Ind. Finishing welt. 1,904,543; Apr. 18.

Schillaci, Thomas. (See Stramaglia, N., and Schillaci.)

Schimmel, Hans, Komotau, Czechoslovakia. Apparatus for machining rolls for rolling mills and the like. 1,904,802; Apr. 18.

Schmidt, John E. (See Fink, H. A., and Schmidt.)

Schmied, Frans, Teplitz-Schonau, Czechoslovakia. Automatic lubricating device. 1,904,803; Apr. 18.

Schmied, James W., West Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Carrier wave signaling system. 1,904,544; Apr. 18.

Schmuhl, Byron M., Centerline, assignor of one-third to Wm. Cadsow Ramsay, Detroit, Mich. Battery post clamp. 1,904,954; Apr. 18.

Schneider, George. (See Dreyfus, C., and Schneider.)

Schneider, Hermann. (See Straub, F., and Schneider.)

Schneiderman, Joseph, Chicago, Ill. Protector for a nursing bottle and nipple thereof. Des. 89,654; Apr. 18.

Schnyder, Hans, Biel, Switzerland. Shaving cup. 1,903,882; Apr. 18.

Schöllkopf, Karl, Dusseldorf-Oberkassel, and A. Serini, Dusseldorf-Heerdt, assignors to Rheinische Kampfer-Fabrik Gesellschaft mit beschränkter Haftung-Dusseldorf-Oberkassel, Germany. Preparing pure optically inactive menthol. 1,904,545; Apr. 18.

Schouten, Frank, Glenarm, assignor to The Black & Decker Manufacturing Company, Towson, Md. Balanced spring hammer magnetic type. 1,904,965; Apr. 18.

Schrauth, Walther, Berlin-Dahlem, Germany. Producing stearine. 1,904,546; Apr. 18.

Schroeder, Frederic W., assignor to Corhart Refractories Company, Louisville, Ky. Casting of aluminum silicate refractories. 1,903,944; Apr. 18.

Schultz, August E. (See Masslow, William C., assignor.)

Schultz, Paul I. (See Bacher, R. L., and Schultz.)

Schultze, Hermann, Griesheim, Frankfort-on-the-Main, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Revolving tube furnace. 1,904,548; Apr. 18.

Schulze, Arno, Los Angeles, and W. Amann, Willowbrook, Calif. Combination billiard-table and bowling alley. 1,904,033; Apr. 18.

Schumann, Karl, Potsdam, assignor to Siemens-Schuckertwerke Aktiengesellschaft, Berlin-Siemensstadt, Germany. Cores for cables for communication circuits. 1,904,547; Apr. 18.

Schuster, Carl E., Corvallis, Oreg., assignor, by mesne assignments, to The People of the United States of America. Strawberry. Pl. Pt. 60; Apr. 18.

Schutz, Henri, Paris, France. Frame provided with cascistand. 1,904,088; Apr. 18.

Schwander, Max, assignor to Fabrik Electrothermischer Apparate A. G. Lusern, Lucerne, Switzerland. Electric cooking. 1,903,883; Apr. 18.

Schwarz, Eugene, Alexandria, Ind., assignor to The Mantle Lamp Company of America, Chicago, Ill. Lamp shade. Des. 89,655; Apr. 18.

Schwarzkopf, Frank E. (See Martin, Joseph R., assignor.)

Schwerin, Frank H., Bellevue, assignor to The Duff-Norton Manufacturing Company, Pittsburgh, Pa. Centrifugal brake. 1,904,089; Apr. 18.

Schweyer, Daniel H., Easton, Pa. Automatic train control. 1,904,804; Apr. 18.

Schwingel, Albert E., et al. (See Ellingston, Cornwallis D., assignor.)

Scognamillo, Salvatore, and David Schlaifer, Bronx, N. Y. Oil burner. 1,904,549; Apr. 18.

Scott, Donald M., assignor to Buffalo Electric Furnace Corporation, Buffalo, N. Y. Production of alloys. 1,904,761; Apr. 18.

Scott, George, London, England, assignor to Chicago Pneumatic Tool Company, New York, N. Y. Electric switch. 1,904,935; Apr. 18.

Scott, Howard B., and R. E. McCoy, assignors to The National Cash Register Company, Dayton, Ohio. Quenching machine. 1,904,936; Apr. 18.

Scott, Paul J., et al. (See Baker, Albert E., assignor.)

Scott & Williams, Incorporated. (See Allen, John M., assignor.)

Scovill Manufacturing Company. (See Chapman, Lyman B., assignor.)

Scovill Manufacturing Company. (See Fenton, Paul E., assignor.)

Scovill Manufacturing Company. (See King, George A., assignor.)

Scranton, D. G., Maplewood, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Apparatus for marking strand material. 1,904,254; Apr. 18.

Seamless Rubber Company, The. (See De Laney, Wallace W., assignor.)

Sebastianelli, Angelo. (See Liva, Henry, assignor.)

Seederer, Jacob E., et al. (See Cameron, Hugh M., assignor.)

Seeley, George A., Irvington, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Device for handling reels. 1,904,255; Apr. 18.

Seeley, George A., Baltimore, Md., assignor to Western Electric Company, Incorporated, New York, N. Y. Capstan. 1,904,885; Apr. 18.

Seitzinger, William M. (See Avery, T. M., and Seitzinger.)

Selling, Otto, assignor to Robert Bosch Aktiengesellschaft, Stuttgart, Germany. Electrical lead-in. 1,904,505; Apr. 18.

Selva, James, Laurelton, N. Y. Tap plate for dancing shoes. 1,904,886; Apr. 18.

Seng Company, The. (See Fox, Martin, assignor.)

Serini, Arthur. (See Schöllkopf, K., and Serini.)

Severance, Malvern W., assignor to Willard Storage Battery Company, Cleveland, Ohio. Battery handle. 1,904,987; Apr. 18.

Severance, Malvern W., assignor to Willard Storage Battery Company, Cleveland, Ohio. Battery handle. 1,904,988; Apr. 18.

Sexauer, J. A., Mfg. Co. (See Frantz, Grover C., assignor.)

Shapiro, S., Co. Inc. (See Maranian, Rebecca S., assignor.)

Sharpsville Boiler Works Co. (See Fagan, C. D., and Swank, assignors.)

Shaw, Milton M., assignor to New York Merchandise Co. Inc., New York, N. Y. Comb and accessories therefor. 1,904,090; Apr. 18.

Shee, Parke L., Berwyn, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Electric cable. 1,904,887; Apr. 18.

Sheldon, Waldo, South Norwalk, Conn. Drilling machinery. 1,904,256; Apr. 18.

Shell Petroleum Corporation. (See Smith, Sydney S., assignor.)

Shield, Paul S., Cincinnati, Ohio, and W. H. Haupt, Ludlow, Ky., assignors to Augustine Davis, jr., Cincinnati, Ohio. Air controlled lock for dispensers. 1,904,550; Apr. 18.

Shimizu, Rinjiro, Tokyo, Japan, assignor to Western Electric Company, Incorporated, New York, N. Y. Anode for water-cooled vacuum tubes. 1,903,945; Apr. 18.

Shlaifer, David. (See Scognamillo, S., and Shlaifer.)

Shoop, Fred M., assignor of one-fourth to C. E. Fuller, Burat Cabins, Pa. Sealing device for closed containers. 1,904,091; Apr. 18.

Shorr, Oscar. (See Beisser, Harry, assignor.)

Shoup-Owens, Inc. (See D'Annunzio, George, assignor.)

Sibley, Robert L., Nitro, W. Va., assignor to The Rubber Service Laboratories Company, Akron, Ohio. Retarder for use in rubber vulcanization process. 1,904,934; Apr. 18.

Sidebotham, Melvin H., West Newton, assignor to Specialty Automatic Machine Company, Chelsea, Mass. Shield for suspended wearing apparel. 1,904,092; Apr. 18.

Sidebotham, Melvin H., West Newton, assignor to Specialty Automatic Machine Company, Chelsea, Mass. Drinking cup. 1,904,231; Apr. 18.

Sidebotham, Melvin H., West Newton, assignor to Specialty Automatic Machine Company, Chelsea, Mass. Machine for printing round cans in multiple colors. 1,904,232; Apr. 18.

Siemens & Halske, Aktiengesellschaft. (See Steiner, Otto.)

Siemens-Schuckertwerke Aktiengesellschaft. (See Berthold, R. G., and Stockmeyer, assignors.)

Siemens-Schuckertwerke Aktiengesellschaft. (See Gleichmann, Hans, assignor.)

Siemens-Schuckertwerke Aktiengesellschaft. (See Oldenburg, Alfred, assignor.)

Siemens-Schuckertwerke Aktiengesellschaft. (See Schumann, Karl, assignor.)

Simcoe Manufacturing Company. (See Simons, Julius, assignor.)

Simmons, Oliver G., Lakewood, Ohio. Cutting the teeth of gears. 1,904,956; Apr. 18.

Simons, Aaron, Bronx, assignor to Morris Simons, New York, N. Y. Making drawing dies. 1,904,696; Apr. 18.

Simons, Julius, assignor to Simcoe Manufacturing Company, Philadelphia, Pa. Combined ink setter and static eliminator. 1,903,940; Apr. 18.

Simons, Morris. (See Simons, Aaron, assignor.)

Simplex Engineering Company. (See Raymond, Thomas E., assignor.)

Simplix Patents Limited. (See Lamont, Boyd N. R., assignor.)

Simpson, William R., Campbell, Calif. Spreader. 1,904,989; Apr. 18.

Singer, Benjamin F., and J. J. Eberman, Lancaster, Pa. Safety device. 1,904,015; Apr. 18.

Singmaster, James A., Bronxville, N. Y. Production of cement. 1,904,690; Apr. 18.

Skeel, Lewis, Meadville, Pa. Rotary cutter. 1,904,632; Apr. 18.

Skillman, Newton, Highland Park, assignor to O. & S. Bearing Co., Detroit, Mich. Shaft mounting. 1,904,769; Apr. 18.

Skillman, Newton, Highland Park, assignor to O. & S. Bearing Co., Detroit, Mich. Combined end thrust and self-aligning supporting bearing. 1,904,770; Apr. 18.

Small, James K. (See Freyermuth, G. H., Small, and Hanks.)

Smellie, Donald G., Canton, assignor to The Hoover Company, North Canton, Ohio. Suction cleaner. 1,904,973; Apr. 18.

Smidth, F. L., & Co. (See Pontoppidan, Carl, assignor.)

Smith, Alexander, & Sons Carpet Company. (See Barrett, Charles E., assignor.)

Smith, Bernard P., assignor to The Regina Corporation, Rahway, N. J. Apparatus for developing sensitized paper. 1,904,551; Apr. 18.

Smith, Conway B., Portsmouth, Va. License plate for motor vehicles. 1,904,093; Apr. 18.

Smith, Cyril S. (See Dinsdale, A. M., and Smith.)

Smith, Cyril S., Cheshire, assignor to The American Brass Company, Waterbury, Conn. Brazing solder. 1,904,889; Apr. 18.

Smith, Ed S., jr., assignor to Builders Iron Foundry, Providence, R. I. Orifice meter. 1,904,333; Apr. 18.

Smith, Herman R. (See Powell, C. L., and Smith.)

Smith, Loyd A., assignor to Truline, Incorporated, La Grange, Ga. Tufting machine attachment. 1,903,946; Apr. 18.

Smith, Ramsey, Oakridge, Roatan, Honduras. Pipe cleaning device. 1,904,015; Apr. 18.

Smith, Sydney S., Tulsa, Okla., assignor to Shell Petroleum Corporation. Rectifier. 1,904,234; Apr. 18.

Smith, Theodore A., Ridgewood, N. J., assignor to Radio Corporation of America. Automatic gain control. 1,904,552; Apr. 18.

Smith, William A., London, England. Air washing and the like. 1,904,867; Apr. 18.

Smith, William J., West Palm Beach, Fla. Radiator filling and draining device. 1,904,758; Apr. 18.

Smith, William L., jr., and R. H. Lawson, Pawtucket, R. I.; said Smith assignor to May Hosiery Mills, Rockville, Tenn. Dial and cylinder connection for knitting machines. 1,904,968; Apr. 18.

Smoot, Charles H., deceased, Maplewood, N. J.; Katherine Smoot executrix of said Charles H. Smoot. Feed water regulator. 1,904,553; Apr. 18.

Smoot, Charles H., deceased, Maplewood, N. J.; Katherine Smoot executrix of said Charles H. Smoot. Feed water regulator. 1,904,554; Apr. 18.

Smoot, Katherine, executrix. (See Smoot, Charles H., assignor.)

Smygel, Joseph M., St. Joseph, Mo. Broom rack. 1,903,796; Apr. 18.

Snyder, Clay M., assignor to Centrifugal Machine Company, Atlanta, Ga. Method and apparatus for molding concrete pipe. 1,904,094; Apr. 18.

Snyder, Louis M., Brooklyn, assignor, by mesne assignments, to J. W. Anderson, New York, N. Y. Manifolding material. 1,904,650; Apr. 18.

Società Anonima Automobili Ansaldo. (See Cappa, Giulio C., assignor.)

Société Dite Maison Camus Duchermin Société Anonyme. (See Mauger, Jacques G., assignor.)

Society of Chemical Industry in Basle. (See Bally, Oscar, assignor.)

Society of Chemical Industry in Basle. (See Grossmann, Paul, assignor.)

Society of Chemical Industry in Basle. (See Straub, F., and Schneider, assignors.)

Soehner, John D., St. Albans, N. Y., assigner, by mesne assignments, to Metropolitan Engineering Company. Radiator. 1,904,555; Apr. 18.

Sohn, Carl, Stratford, Conn. Hedge trimmer. 1,904,330; Apr. 18.

Solie, Harold L., and N. J. Hedlund, Minneapolis, Minn. Can washing machine. 1,904,391; Apr. 18.

Solum, Aksel, Lancaster, N. Y. Lamp mounting for bowling alleys. 1,904,016; Apr. 18.

Sommermeyer, August, Berlin-Rudow, Germany. Decomposition and separation apparatus. 1,904,556; Apr. 18.

Sono Equipment Corporation et al. (See Bauch, William H., assignor.)

Soubier, Leonard D., assignor to Owens-Illinois Glass Company, Toledo, Ohio. Glass furnace. 1,904,947; Apr. 18.

Soubier, Leonard D., assignor to Owens-Illinois Glass Company. Glassware forming machine. 1,904,958; Apr. 18.

Soubier, Leonard D., Toledo, Ohio, assignor to Owens-Illinois Glass Company. Glassware forming machine. 1,904,959; Apr. 18.

Soubier, Leonard D., Toledo, Ohio, assignor to Owens-Illinois Glass Company. Glass working tank. 1,904,960; Apr. 18.

Soubier, Leonard D., Alton, Ill., assignor to Owens-Illinois Glass Company. Machine for forming hollow glassware. 1,904,961; Apr. 18.

Southern Ice Supply Company, et al. (See Hancock, R. J., assignor, and Garrison.)

Spalding, A. G., & Bros. (See Reach, Milton B., assignor.)

Specialty Automatic Machine Company. (See Sidebotham, Melvin H., assignor.)

Spicers Limited. (See Baker, Thomas T., assignor.)

Spoor, Ivan H., La Grange, assignor to The Gerrard Company, Inc., Chicago, Ill. Loading of sewer pipe, building tile, etc., for railway shipment. 1,903,841; Apr. 18.

Sprague-Sells Corporation. (See Lewis, Harold E., assignor.)

Spring, Otto. (See Merley, S. R., and Spring.)

Stacey, Ernest W., Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Machine for operating on tennis shoes. 1,903,840; Apr. 18.

Stallmann, Otto. (See Gubelmann, L., Welland, and Stallmann.)

Standard Alcohol Company. (See Brooks, Benjamin T., assignor.)

Standard-I. G. Company. (See Gehr, Edwin J., assignor.)

Standard I. G. Company. (See Krauch, C., and Pier, assignors.)

Standard-I. G. Company. (See Pier, M., and Winkler, assignors.)

Standard-I. G. Company. (See Watts, Rhea N., assignor.)

Standard Oil Company. (See Voorhees, Vanderveer, assignor.)

Standard Oil Development Company. (See Young, P. L., Hanks, and Freyermuth, assignors.)

Standard Oil Development Company. (See Bolles, Seward R., assignor.)

Standard Oil Development Company. (See Rimmer, W. J., and Dawson, assignors.)

Standard Oil Development Company. (See Evans, Earle W., assignor.)

Standard Oil Development Company. (See Ewing, C. R., and Montgomery, assignors.)

Standard Oil Development Company. (See Fischer, H. G. M., and Gustafson, assignors.)

Standard Oil Development Company. (See Franceway, James A., assignor.)

Standard Oil Development Company. (See Freyermuth, George H., assignor.)

Standard Oil Development Company. (See Freyermuth, G. H., and Hanks, assignors.)
Standard Oil Development Company. (See Freyermuth, G. H., Small, and Hanks, assignors.)
Standard Oil Development Company. (See Haslam, Robert T., assignor.)
Standard Oil Development Company. (See Kuhl, Paul E., assignor.)
Standard Oil Development Company. (See Stratford, R. K., and Doohan, assignors.)
Standard Oil Development Company. (See Wells, Alfred A., assignor.)
Standard Oil Development Company. (See Young, P. L., and Hanks, assignor.)
Standard-Knapp Corporation. (See Braren, Cornelius T., assignor.)
Standard Stations, Inc. (See Aldrich, Ralph N., assignor.)
Standard Stoker Company, The. (See Pickard, Frank C., assignor.)
Standerwick, Reginald G., Marblehead, Mass., assignor to General Electric Company. Elastic fluid turbine. 1,904,557; Apr. 18.
Star-Brite Corporation. (See Reichhardt, Herman C., assignor.)
Starch, Benjamin S., assignor of one-half to A. W. Zeratsky, La Crosse, Wis. Striping device. 1,904,558; Apr. 18.
Starks, Zeston, Malvern, Ohio. Protector for plants. 1,904,700; Apr. 18.
Starnes, Cullen G. (See O'Connor, L. R., and Starnes.)
Stearns, Frederick, & Company. (See Legerlotz, Helmut, assignor.)
Steel, John D., assignor to Farmers Manufacturing Company, Norfolk, Va. Shipping basket. 1,903,797; Apr. 18.
Steenstrup, Christian, Schenectady, N. Y., assignor to General Electric Company. Refrigerating machine. 1,904,559; Apr. 18.
Steenstrup, Christian, Schenectady, N. Y., assignor to General Electric Company. Refrigerator evaporator. 1,904,560; Apr. 18.
Steenstrup, Christian, Schenectady, N. Y., assignor to General Electric Company. Refrigerating machine. 1,904,561; Apr. 18.
Stein, Hall & Company. (See Caesar, George V., assignor.)
Steiner, Otto, Berlin-Spandau, assignor to Siemens & Halske, Aktiengesellschaft, Siemensstadt, near Berlin, Germany. Film holder for photographic cameras. 1,904,097; Apr. 18.
Steinholz, Gertrude, Brooklyn, assignor to William Wilhelm Co., Inc., New York, N. Y. Textile fabric or similar article. Des. 89,618; Apr. 18.
Stenhouse, David. (See Stenhouse, Thomas and D.)
Stenhouse, David, Washington, Pa., assignor to Hazel-Atlas Glass Co., Wheeling, W. Va. Glass feeder. 1,904,754; Apr. 18.
Stenhouse, Thomas and D., Washington, Pa., assignors to Hazel-Atlas Glass Co., Wheeling, W. Va. Leer loader 1,903,916; Apr. 18.
Stensy, August F. P., assignor of one-half to Stephen Ratajczak, Baltimore, Md. Radio circuit. 1,904,839; Apr. 18.
Stetner, Joseph L., Brooklyn, N. Y. Bed lamp. 1,904,121; Apr. 18.
Stevens, George, Chicago, Ill. Tone bar. 1,904,335; Apr. 18.
Stickel, Charles W. (See Tuttle, W. R., and Stickel.)
Still, W. M., & Sons Limited. (See Adamson, Andrew G., assignor.)
Stimson, Frank G., Belleville, assignor to Bond Electric Corporation, Jersey City, N. J. Flash-light safety switch. 1,903,947; Apr. 18.
Stintsing, Hugo, Giessen, and E. Huber, Frankfort-on-the-Main, Germany. Joint for members provided in a wall separating spaces of different pressures. 1,904,392; Apr. 18.
Stirlen Engineering & Research Corporation, The. (See Stirlen, Eugene D., assignor.)
Stirlen, Eugene D., New Haven, Conn., assignor to The Stirlen Engineering & Research Corporation. Recorder for traffic signal systems. 1,904,562; Apr. 18.
Stockmeyer, Walter. (See Berthold, R. G., and Stockmeyer.)
Stockton, Jack P., Spring Lake, N. J. Theater. 1,903,948; Apr. 18.
Stoetzel, Joseph J., Queens Village, assignor to G & G Atlas Systems, Inc., New York, N. Y. Pneumatic dispatch system valve. 1,904,098; Apr. 18.
Stokes, Charles L., Los Angeles, Calif., assignor, by mesne assignments, to L. A. Williams, Evanston, and C. C. Bradbury, Glencoe, Ill., trustees. Combined primer and cylinder lubricator for internal combustion engines. 1,904,936; Apr. 18.
Stoll, Arthur, and E. Rothlin, assignors to the Firm of "Chemical Works formerly Sandoz", Basel, Switzerland. Supersaturated calcium gluconate solution. 1,904,257; Apr. 18.
Stork, Fred W., et al. (See Arit, John L., assignor.)
Stötter, Herman. (See Hentrich, W., Hardtmann, Backes, and Stötter.)
Stout, Claude S., assignor to Marshall Furnace Company, Marshall, Mich. Hot air heating system. 1,904,962; Apr. 18.
Stramaglia, Nicola, and T. Schiliaci, Chicago, Ill. Laundry machine. 1,904,099; Apr. 18.
Strara, Walter A., Baltimore, Md. Dress ensemble. Des. 89,656; Apr. 18.
Stratford, Reginald K., and W. P. Doohan, Sarnia, Ontario, Canada, assignors to Standard Oil Development Company. Removing corrosive sulphur from hydrocarbon oils. 1,904,173; Apr. 18.
Straub, Fritz, Basel, and H. Schneider, Rieben near Basel, assignors to Societe of Chemical Industry in Basle, Basel, Switzerland. Dyeing animal fibers fast tints. 1,903,884; Apr. 18.
Straussler, Nicholas, London, England, assignor to Bendix Aviation Corporation, Chicago, Ill. Charge forming device. 1,904,701; Apr. 18.
Strindlund, John, Tofte I Hurum, Norway. Barking drum. 1,904,937; Apr. 18.
Strongson, Herman L., assignor to Bernard D. Colen, New York, N. Y. Quick break plug connecter. 1,904,889; Apr. 18.
Strout, Robert W., assignor to E. W. Bliss Company, Brooklyn, N. Y. Positive-action clutch. 1,904,563; Apr. 18.
Strutt, Maximiliaan J. O., and P. R. Dijksterhuis, Eindhoven, Netherlands, assignors to Radio Corporation of American. Arrangement for transmitting wireless signals. 1,904,174; Apr. 18.
Sullivan, Harry H., assignor to Paragon Revolute Corporation, Rochester, N. Y. Print drier. 1,904,564; Apr. 18.
Sulphide Corporation. (See Wescott, Ernest W., assignor.)
Sulzer Freres Societe Anonyme. (See Hefti, Wilhelm, assignor.)
Sunnen, Joseph, Kirkwood, Mo. Honing device. 1,904,836; Apr. 18.
Superheater Company, The. (See Armacost, Wilbur H., assignor.)
Super Safety Switch Company. (See Luther, Martin P., assignor.)
Svendsen, Svend S., assignor to Clay Reduction Company, Chicago, Ill. Production of aluminum chloride and alumina. 1,904,762; Apr. 18.
Swank, Behl W. (See Fagan, C. D., and Swank.)
Swanson, Ernest G., Upper Darby, Pa., assignor to General Electric Company. Electrical apparatus. 1,904,565; Apr. 18.
Swanson, Selvlyor A., Chicago, Ill. Reproducing pneumatic operator for typewriters. 1,904,683; Apr. 18.
Swartz, Carl E., Highland Park, and A. J. Phillips, Metuchen, N. J., assignors to American Smelting and Refining Company, New York, N. Y. Cadmium-nickel alloy. 1,904,175; Apr. 18.
Swartz, Carl E., Highland Park, and A. J. Phillips, Metuchen, N. J., assignor to American Smelting and Refining Company, New York, N. Y. Cadmium-nickel alloy. 1,904,176; Apr. 18.
Sweeney, Orland R., Ames, Iowa, assignor, by mesne assignments, to The Permutit Company, Wilmington, Del. Regenerating base-exchange substances. 1,903,949; Apr. 18.
Sweeper-Vac Company. (See Richardson, L. W., and Wassall, assignors.)
Sweet, Agnes G., Pawtucket, R. I. Cigarette holder. 1,904,903; Apr. 18.
Swenson, John F., Duluth, Minn. Fence post anchor. 1,904,177; Apr. 18.
Symmonds, Frank S. (See Poling, Harry A., assignor.)
Syracuse Trust Company, The. (See Axe, Roy T., assignor.)
Szeliga, Anton, assignor of one-half to F. Tichy, New York, N. Y. Safety attachment for moving picture apparatus. 1,904,807; Apr. 18.
Tachi, Tadao, assignor to Hawaiian Pineapple Company, Limited, Honolulu, Hawaii. Fruit cutting machine. 1,903,854; Apr. 18.
Tagliabue, Charles J., Mfg. Co. (See Irwin, Lawrence C., assignor.)
Tansley, Thomas W., assignor to Bloch Freres, Inc., New York, N. Y. Handkerchief. Des. 89,657; Apr. 18.
Tansley, Thomas W., assignor to Bloch Freres, Inc., New York, N. Y. Handkerchief. Des. 89,658; Apr. 18.
Tansley, Thomas W., assignor to Bloch Freres, Inc., New York, N. Y. Handkerchief Des. 89,659; Apr. 18.
Tansley, Thomas W., assignor to Bloch Freres, Inc., New York, N. Y. Handkerchief. Des. 89,660; Apr. 18.
Tansley, Thomas W., assignor to Bloch Freres, Inc., New York, N. Y. Handkerchief. Des. 89,661; Apr. 18.
Tansley, Thomas W., assignor to Bloch Freres, Inc., New York, N. Y. Handkerchief. Des. 89,662; Apr. 18.
Tansley, Thomas W., assignor to Bloch Freres, Inc., New York, N. Y. Handkerchief. Des. 89,663; Apr. 18.
Tate, Alfred Orde, Toronto, Ontario, Canada. Apparatus for treating light and similar rays. 1,904,566; Apr. 18.
Taylor, Albert H., Washington, D. C., assignor to Wired Radio, Inc., New York, N. Y. Radio signaling system. 1,904,772; Apr. 18.
Taylor, Edmund R., New York, N. Y., assignor to American Telephone and Telegraph Company. Two-way telephone system. 1,904,567; Apr. 18.
Taylor, George F., Schenectady, N. Y., assignor to General Electric Company. Wheel dresser. 1,904,100; Apr. 18.

Taylor, George F., Schenectady, N. Y., assignor to General Electric Company. Disk-like cutting tool. 1,904,568; Apr. 18.
Taylor Instrument Companies. (See Teague, Walter D., assignor.)
Taylor, Maurice C., and C. N. Richardson, Niagara Falls, assignors to The Mathieson Alkali Works, New York, N. Y. Method and apparatus for carrying out chemical reactions. 1,904,101; Apr. 18.
Taylor, William. (See Grimes, Herbert V., assignor.)
Teague, Walter D., Forest Hills, assignor to Taylor Instrument Companies, Rochester, N. Y. Thermometer. Des. 89,619; Apr. 18.
Teague, Walter D., Forest Hills, assignor to Taylor Instrument Companies, Rochester, N. Y. Instrument casing. Des. 89,620; Apr. 18.
Teague, Walter D., Forest Hills, assignor to Taylor Instrument Companies, Rochester, N. Y. Thermometer. Des. 89,621; Apr. 18.
Tebo, Julian D., East Orange, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Protective device. 1,904,569; Apr. 18.
Teeter, Willford H., assignor, by mesne assignments, to Delco Products Corporation, Dayton, Ohio. Charge forming device. 1,904,624; Apr. 18.
Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H. (See Mullner, Edmund, assignor.)
Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H. (See Paessler, Hans, assignor.)
Teletype Corporation. (See Morton, S., Krum, and Kleinschmidt, assignors.)
Texas Company, The. (See Cook, Leon W., assignor.)
Texas Company, The. (See Kiser, Howard W., assignor.)
Texas Company, The. (See Mackenzie, Kenneth G., assignor.)
Texas Gulf Sulphur Company. (See Lesander, Nils E., assignor.)
Tharp, Victor S., Elmhurst, and C. E. Lomax, Oak Park, assignors, by mesne assignments, to Associated Electric Laboratories, Inc., Chicago, Ill. Automatic telephone system. 1,904,904; Apr. 18.
Thomas, Adolph A., New York, N. Y. Sound reproducing apparatus. 1,904,702; Apr. 18.
Thomas & Betts Co. (See Church, Lewis H., assignor.)
Thomas, John. (See Fairweather, David A. W., and Thomas.)
Thompson, Alva, Los Angeles, Calif. Automatic direction signal switch. 1,904,806; Apr. 18.
Thompson, Frank E., Winona, Minn. Chain fastener. 1,904,102; Apr. 18.
Thompson, George F., executor. (See Knapp, E., and Allgrunn.)
Thompson, James H., et al. (See Davis, E. H., and Johnston, assignors.)
Thomson, Arthur L., Milan, Italy, assignor to Altek Compagnie d'Etude et d'Exploitation d'Appareils Frigorifiques pour le Transport, Antwerp, Belgium. Apparatus for the ventilation of cooling plants. 1,904,570; Apr. 18.
Thordarson, Chester H., assignor to Thordarson Electric Manufacturing Company, Chicago, Ill. Coil forming device. 1,904,890; Apr. 18.
Thordarson Electric Manufacturing Company. (See Thordarson, Chester H., assignor.)
Thorens, Hermann, S. A., Firm. (See Weissenburger, Adolf, assignor.)
Thorington, Fletcher, Birmingham, Ala. Push-pull amplifier circuit. 1,904,103; Apr. 18.
Thorn, John C. (See Sayre, Kenneth H., assignor.)
Tice Lock-Washer Manufacturing Co. (See Lillig, Nicholas R., assignor.)
Tichy, Frederick. (See Szeliga, Anton, assignor.)
Tinsley, Milton L., Grantwood, assignor to Ferguson Brothers Manufacturing Company, Hoboken, N. J. Folding chair. 1,904,891; Apr. 18.
Titcomb, James M., Washington, D. C. Batch dividing and covering means. 1,904,905; Apr. 18.
Titcomb, James M., Washington, D. C. Batch dividing and covering means. 1,904,906; Apr. 18.
Titus, Court C., New York, N. Y. Aluminum alloy. 1,903,842; Apr. 18.
Titus, Court C., New York, N. Y. Aluminum alloy. 1,903,843; Apr. 18.
Tobey, Harry W., and H. V. May, Pittsfield, Mass., assignors to General Electric Company. Welding torch. 1,904,104; Apr. 18.
Tobias, Robin R. (See Ewing, J. L., and Tobias.)
Tomlin, John R., Brooklyn, assignor to R. Hoe & Co., Inc., New York, N. Y. Web renewing mechanism for printing machines. 1,904,571; Apr. 18.
Townsend, Arthur, Coogee, Sydney, New South Wales, Australia. Electrical vacuum cleaner. 1,903,855; Apr. 18.
Townsend, Arthur J. (See Naugle, H. M., and Townsend.)
Transitone Automobile Radio Corporation. (See Leonard, Anthon A., assignor.)
Travis, Albert C., jr., Jackson Heights, N. Y., assignor to A. W. Holbrook & Sons, Inc., Palmer, Mass. Steam trap. 1,904,998; Apr. 18.
Travis, William, Blackley, Manchester, England. Method and apparatus for extrusion of metal. 1,904,907; Apr. 18.
Trewhella, William, Trentham, Victoria, Australia. Permutation padlock. 1,903,865; Apr. 18.
Trico Products Corporation. (See Hueber, Henry, assignor.)
Trowbridge, Ira A., Wallace, Idaho. Cow tail hanger. 1,904,635; Apr. 18.
Truax, William T., assignor to United States Register Co., Battle Creek, Mich. Key operated warm air register. 1,904,696; Apr. 18.
Trube, Carl E., deceased, Ossining, N. Y.; S. M. Trube, administratrix, assignor of one-half to W. L. Hoge, Louisville, Ky. Rotary engine compressor and the like. 1,904,892; Apr. 18.
Trube, Sarah M., administratrix. (See Trube, Carl E.)
True, Fred O. (See Conklin, David L., assignor.)
Truline, Incorporated. (See Smith, Lloyd A., assignor.)
Trumbull Electric Manufacturing Company. (See Haney, Charles E., assignor.)
Trussell, Clarence D., assignor to Trussell Manufacturing Company, Poughkeepsie, N. Y. Loose leaf binder and holder for writing implements. 1,904,572; Apr. 18.
Trussell Manufacturing Company. (See Trussell, Clarence D., assignor.)
Tuley, William F., Nutley, N. J., assignor to The Naugatuck Chemical Company, Naugatuck, Conn. Vulcanization of rubber. 1,904,573; Apr. 18.
Turner, Edward T., Dayton, Ohio. Flow regulator. 1,904,337; Apr. 18.
Turner, Edwin B., Wellington, Ohio. Carrier case. 1,903,798; Apr. 18.
Turner, Simon W. H., New York, N. Y. Automobile headlight. 1,904,574; Apr. 18.
Tuttle, William R., and C. W. Stickel, assignors to The Kurlash Company, Inc., Rochester, N. Y. Eyelash curler. 1,904,575; Apr. 18.
Twiss, Douglas F., Wylde Green, and W. G. Gorham, Erdington, Birmingham, England, assignors to Dunlop Rubber Company, Limited. Waterproofing compositions. 1,904,576; Apr. 18.
Uebermuth, Werner, Berlin-Oberschoneweide, Germany, assignor to General Electric Company. Gas blast circuit interrupter. 1,904,577; Apr. 18.
Uhrich, Burns H., Independence, assignor to The Atchison Revolving Door Co., Independence, Kans. Cable lock for revolving doors. 1,904,106; Apr. 18.
Ulrich, Horace W., Newark, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Telephone system. 1,904,017; Apr. 18.
Underwood Elliott Fisher Company. (See Oswald, Alfred E., assignor.)
Union Bag and Paper Corporation. (See Avery, T. M., and Seltzinger, assignors.)
Union Chimique Belge, Societe Anonyme. (See Verpeaux, Paul E., assignor.)
Union Drawn Steel Company. (See Leech, Jacob T., assignor.)
Union Metal Manufacturing Company, The. (See Riemenschneider, Edmund W., assignor.)
Union Special Machine Company. (See Hanson, Nathan E., assignor.)
United American Bosch Corporation. (See Martin, John F., assignor.)
United Piece Dye Works, The. (See Megros, Georges, assignor.)
United Shoe Machinery Corporation. (See Ashworth, Fred, assignor.)
United Shoe Machinery Corporation. (See Gookin, Sylvester L., assignor.)
United Shoe Machinery Corporation. (See Jeavons, Charles F. R., assignor.)
United Shoe Machinery Corporation. (See Johnson, Arthur S., assignor.)
United Shoe Machinery Corporation. (See Nutt, William H., assignor.)
United Shoe Machinery Corporation. (See Prensel, Adam H., assignor.)
United Shoe Machinery Corporation. (See Stacey, Ernest W., assignor.)
United States Air Compressor Company, The. (See Bacher, E. L., and Schultz, assignors.)
United States Cigar Company. (See Reichard, John F., assignor.)
United States Register Co. (See Truax, William T., assignor.)
Universal Oil Products Company. (See Egloff, Gustav, assignor.)
Universal Oil Products Company. (See Egloff, G., and Mekler, assignors.)
Universal Oil Products Company. (See Morrell, Jacque C., assignor.)
Universal Oil Products Company. (See Morrell, J. C., and Alther, assignors.)
Vacher, John, assignor to The American Mills Company, Waterbury, Conn. Automatic tension mechanism for strands, etc. 1,904,894; Apr. 18.
Vallen, Earl J., Akron, Ohio. Mask for moving picture screens. 1,904,963; Apr. 18.
Van Buren, John, Brooklyn, N. Y. Machine for making cartons. 1,903,844; Apr. 18.
Vanderhoof, Frank E., Greenwich, Conn. Attachment for telephones. 1,904,578; Apr. 18.
Vandevelde, Paul V., New York, N. Y. Continuous alarm clock. 1,904,579; Apr. 18.

Van Geel, William C. (See De Boer, J. H., Van Geel, and Emmens.)
Vanhorn, Constant, Sentinel Butte, N. Dak. Adjustable folding scaffold. 1,904,803; Apr. 18.
Van Kannel Revolving Door Company. (See Munson, Harry, assignor.)
Van Liempt, Johannes A. M., and W. Geins, Eindhoven, Netherlands, assignors to General Electric Company. Nonsag helical tungsten filament and making it. 1,904,105; Apr. 18.
Van Nordstrand, Robert D., Scotia, N. Y., assignor to General Electric Company. Protective circuit for enameling furnaces. 1,904,580; Apr. 18.
Van Wijk, Aart. (See Reerink, E. H., and Van Wijk.)
Vath, Vera, Minneapolis, Minn. Slicer. 1,904,840; Apr. 18.
Vaughan, Arthur H. (See Cope, F. T., Vaughan, and Bowling.)
Vaughn, Frank O., Poughkeepsie, N. Y. Brake device. 1,904,178; Apr. 18.
Vaughn Machinery Company, The. (See Yungman, Alfred T., assignor.)
Vaughn, S. T., et al. (See Clark, Carl W., assignor.)
Vawter, John T., Los Angeles, Calif. Cement gun nozzle. 1,904,990; Apr. 18.
Vereinigte Stahlwerke Aktiengesellschaft, the Firm. (See Alberts, Walter, assignor.)
Verpeaux, Paul E., assignor to Union Chimique Belge, Societe Anonyme, Brussels, Belgium. Coke oven. 1,904,018; Apr. 18.
Victor, John H., Evanston, assignor to Victor Manufacturing & Gasket Company, Chicago, Ill. Gasket. 1,904,651; Apr. 18.
Victor Manufacturing & Gasket Company. (See Victor, John H., assignor.)
Viehweger, August F. W., et al. (See Prior, Walter, jr., assignor.)
Vignos, Paul, assignor to Berger Manufacturing Company, Canton, Ohio. Metal bottle carrier. 1,904,019; Apr. 18.
Vion, Camille J., Jersey City, N. J. Printer's quoin. 1,904,581; Apr. 18.
Virgile, Gabriel, Long Beach, assignor to William Willhelm Co., Inc., New York, N. Y. Textile fabric or similar article. Des. 89,671; Apr. 18.
Vogan, Frank M., Canton, assignor to The Reeves Manufacturing Company, Dover, Ohio. Washtub. Des. 89,664; Apr. 18.
Voigt, Carl A. W., Portland, Oreg. Hot water heating furnace. 1,904,179; Apr. 18.
Vollmer, Hermann. (See Eisner, H., and Vollmer.)
Vondicakis, George. (See Cavano, J. P., and Vondicakis.)
Von Hofe, Christian, Vienna, Austria, and J. Boykow, Berlin-Lichterfelde, Germany, assignors to Czechoslovak Company: Actiengesellschaft C. P. Goerz Optische Anstalt Actiova Spolecnost K. P. Goerz Opticky Ustav, Pressburg, Czechoslovakia. Apparatus for determining the speed of flight of aircraft. 1,903,886; Apr. 18.
Von Nessen, Walter, New York, N. Y., assignor to Efcolite Corporation, Trenton, N. J. Electric lighting fixture. 1,904,703; Apr. 18.
Von Pein, Edward J., assignor, by mesne assignments, to The National Cash Register Company, Dayton, Ohio. Cash register. 1,904,964; Apr. 18.
Von Wedel, Carl J. R. H., Newark, N. J., assignor, by mesne assignments, to Electrons, Inc. Discharge tube. Re18,798; Apr. 18.
Von Zeerleder, Alfred, assignor to Aluminium Industrie Aktiengesellschaft, Neuhausen, Switzerland. Electroplating with aluminum. 1,904,107; Apr. 18.
Voorhees, Vanderveer, Hammond, Ind., assignor to Standard Oil Company, Chicago, Ill. Hydrogen preparation. 1,904,908; Apr. 18.
Wachter, Lester. (See Anthony, W. C., and Wachter.)
Wagenbach, Anton, Elberfeld, Germany. Bending machine. 1,903,799; Apr. 18.
Wagner, Charles L. (See Wagner, Henry H., and C. L.)
Wagner, Henry H. and C. L., assignors of one-third to Omer Wray, Pickering, Mo. Fowl nest. 1,904,809; Apr. 18.
Wagner, Richard P., Berlin, Germany. Connecting rod connection. 1,904,180; Apr. 18.
Wagner, Richard P., Berlin-Lichterfelde, Germany. Booster. 1,904,181; Apr. 18.
Waldron, John, Corporation. (See Dickhaut, Charles A., assignor.)
Walker, Noah, et al. (See Davis, E. H., and Johnston, assignors.)
Wallace, Jeffrey J., assignor to Gullett Gin Company, Amite, La. Breast lift. 1,904,637; Apr. 18.
Walsh, Mary, New York, N. Y. Crown for ladies' hats. 1,904,108; Apr. 18.
Walstrom, Axel M., Minneapolis, Minn. Indoor golf game device. 1,904,034; Apr. 18.
Wappler, Reinhold H., Yonkers, N. Y. Temperature controlling apparatus. 1,904,020; Apr. 18.
Wappler, Reinhold H., Yonkers, N. Y. Temperature controlling apparatus. 1,904,587; Apr. 18.
Ward Compressing Machine Company. (See Javery, Frank E., assignor.)
Wassall, Allen D. (See Richardson, L. W., and Wassall.)
Wasson, Orie E., assignor to The Bessemer Cement Corporation, Youngstown, Ohio. Mortar cement. 1,904,909; Apr. 18.
Waters, Daniel V. (See Johnson, F. V., Hanson, and Waters.)
Watson, Claude G., Pasadena, assignor of one-half to J. Byers and G. D. Gottschick, Pasadena, Calif. Salt and pepper shaker. 1,904,787; Apr. 18.
Watson, Hathaway. (See MacCaskie, Thomas M., assignor.)
Watson-Stillman Co., The. (See Davis, Frank L., jr., assignor.)
Wattle, William M., Worcester, and K. S. Whitten, Auburn, assignors to Crompton & Knowles Loom Works, Worcester, Mass. Reversing multiplier. 1,904,238; Apr. 18.
Watts, Frank E., assignor to Hupp Motor Car Corporation, Detroit, Mich. Rear end construction for vehicle bodies. 1,904,841; Apr. 18.
Watts, Rhea N., Baton Rouge, La., assignor to Standard-I. G. Company. Recovering valuable materials from spent catalysts. 1,904,582; Apr. 18.
Waugh Equipment Co. (See O'Brien, Richard J., assignor.)
Weber, Hermann, Dusseldorf, and W. Pape, Benrath-on-the-Rhine, assignors to the Firm Henkel & Cie. Gesellschaft mit beschrankter Haftung, Dusseldorf, Germany. Apparatus for producing soaps. 1,904,021; Apr. 18.
Webster, Mary E., Duncan, Okla. Fly screen. 1,904,085; Apr. 18.
Wechsberg, Anna M. C., et al, trustees. (See Coppus, Frans H. C., assignor.)
Weldrich, Orrin, Kenmore, N. Y. Surface conditioning machine. 1,904,893; Apr. 18.
Weiland, Henry J. (See Gubelmann, I., Weiland, and Stallmann.)
Weinberg, Isidor, Brooklyn, N. Y. Curtain rod. 1,904,588; Apr. 18.
Weinberger, Julius, New York, N. Y., assignor to Radio Corporation of America. Motion picture theater and apparatus. 1,903,950; Apr. 18.
Weingartner, Anthony E., Bethlehem, assignor to American Engineering Company, Philadelphia, Pa. Tubular fluid-cooled walls. 1,904,182; Apr. 18.
Weissenburger, Adolf, Evillard, assignor to the Firm, Hermann Thorens, S. A., Ste.-Croix, Switzerland. Pyrophoric lighter. 1,904,299; Apr. 18.
Wells, Alfred A., Roselle Park, N. J., assignor to Standard Oil Development Company. Treating oils. 1,904,188; Apr. 18.
Wells, Merritt R., Cleveland Heights, and F. F. Hillix, Lakewood, assignors to The Gibson Art Company, Cincinnati, Ohio. Knotting mechanism. 1,904,704; Apr. 18.
Wells, Sidney D., Port Edwards, Wis. Manufacturing distillable spirits by fermentation. 1,904,589; Apr. 18.
Wendorf, Albert E. O., Wauwatosa, Wis. Router gauge and guide. 1,904,109; Apr. 18.
Werts, Daniel L., assignor to Eclipse Machine Company, Elmira, N. Y. Automatic starting mechanisms for internal combustion engines. 1,904,184; Apr. 18.
Westad, Daniel, Bygdoy, near Oslo, Norway. Process and apparatus for the manufacture of cellulose. 1,904,894; Apr. 18.
Westcott, Ernest W., Niagara Falls, N. Y., assignor, by mesne assignments, to Sulphide Corporation. Treating iron ores. 1,904,583; Apr. 18.
Western Electric Company. (See Babbitt, Bethel J., assignor.)
Western Electric Company. (See Bartley, Charles B., assignor.)
Western Electric Company. (See Beavers, Roy J., assignor.)
Western Electric Company. (See Bedford, Leslie H., assignor.)
Western Electric Company. (See Carter, Herbert F., assignor.)
Western Electric Company. (See Dean, Reginald S., assignor.)
Western Electric Company. (See Gray, Frank, assignor.)
Western Electric Company. (See Griffin, J. T., Deane, and Cureton, assignors.)
Western Electric Company. (See Hoffman, Carl R., assignor.)
Western Electric Company. (See Johnson, F. V., Hanson, and Waters, assignors.)
Western Electric Company. (See Jongedyk, Ralph, assignor.)
Western Electric Company. (See Larsen, Elmer W., assignor.)
Western Electric Company. (See Maloc, Anthony, assignor.)
Western Electric Company. (See Markuson, Oscar S., assignor.)
Western Electric Company. (See McGuire, Lee E., assignor.)
Western Electric Company. (See McIlvried, Edwin J., assignor.)
Western Electric Company. (See Parks, Robert R., jr., assignor.)
Western Electric Company. (See Schmied, James W., assignor.)

Western Electric Company. (See Scranton, De Hart G., assignor.)
Western Electric Company. (See Seeley, George A., assignor.)
Western Electric Company. (See Shea, Parke L., assignor.)
Western Electric Company. (See Shimizu, Rinjiro, assignor.)
Western Electric Company. (See Zelenka, Joseph J., assignor.)
Western Union Telegraph Company, The. (See Blanton, William B., assignor.)
Westinghouse Lamp Company. (See Fagan, James M., assignor.)
Wexler, Meyer, Carteret, assignor to Foster Wheeler Corporation, New York, N. Y. Refrigeration. 1,904,590; Apr. 18.
Wheeler, Harold A., Great Neck, N. Y., assignor to Hazeltine Corporation, Jersey City, N. J. Low frequency amplifier. 1,904,185; Apr. 18.
Wheeler, Walter H., jr., and J. W. Ogden, assignors to Pitney-Bowes Postage Meter Co., Stamford, Conn. Preventing taking of fraudulent impressions from postage meter machines. 1,904,638; Apr. 18.
Whitehead, Alexander G., Hartford, Conn., assignor to Pratt & Whitney Company, New York, N. Y. Spindle bearing. 1,904,236; Apr. 18.
Whitehead, William. (See Dreyfus, C., and Whitehead.)
Whiteman, James L., Putney, London, England. Carburetor. 1,904,022; Apr. 18.
Whitney, Maurice P., assignor to Eclipse Machine Company, Elmira, N. Y. Brake mechanism. 1,904,186; Apr. 18.
Whitney, Maurice P., assignor to Eclipse Machine Company, Elmira, N. Y. Automatic starting mechanism for internal combustion engines. 1,904,187; Apr. 18.
Whitten, Karl S. (See Wattle, W. M., and Whitten.)
Wico Electric Company. (See Harmon, Kenneth A., assignor.)
Wideman, Louis, A. W. Anderson, and P. L. Rider, Worcester, Mass. Gasket. 1,904,910; Apr. 18.
Widener, Sterling J., Augusta, Ga. Hydraulic jack. 1,903,887; Apr. 18.
Widmer, Stefan, assignor to Aktiengesellschaft Brown Boveri & Cie., Baden, Switzerland. Electric current rectifier. 1,904,236; Apr. 18.
Wiggins, John H., Tulsa, Okla. Floating deck for liquid storage tanks. 1,904,239; Apr. 18.
Wilcox, William D., Idaho Falls, Idaho. Converting natural gas and similar gaseous hydrocarbons into a mixture of carbon monoxide and hydrogen in controlled proportions. 1,903,945; Apr. 18.
Wildhaber, Ernest, Brooklyn, assignor to Gleason Works, Rochester, N. Y. Tool for cutting gears. 1,904,584; Apr. 18.
Willard Storage Battery Company. (See Severance, Malvern W., assignor.)
Willekens, Jacobus J. C., Brussels, Belgium, assignor to The General Carbonalpha Company, Wilmington, Del. Manufacture of carbon by dissociation of carbon monoxide starting from a combustible treated in a gas producer. 1,904,585; Apr. 18.
Willheim, William, New York, N. Y. Textile fabric or similar article. Des. 89,665; Apr. 18.
Willheim, William, Co. (See Steinhols, Gertrude, assignor.)
Willheim, William, Co. (See Virgile, Gabriel, assignor.)
Williams, Edward T., Pelham Manor, N. Y. Temperature control chamber. 1,903,951; Apr. 18.
Williams, John J., assignor to Hazel-Atlas Glass Co., Wheeling, W. Va. Machine for vacuum sealing. 1,904,842; Apr. 18.
Williams, Lynn A., et al., trustee. (See Stokes, Charles L., assignor.)
Willis, Ote C., Lakewood, assignor to The Hoover Company, North Canton, Ohio. Suction cleaner. 1,904,972; Apr. 18.
Willmann, Paul, Merion, Pa. Window construction. 1,904,110; Apr. 18.
Willoughby, John A., Cambridge, Mass. Piloting system. 1,903,846; Apr. 18.
Willoughby, Robert S., Denver, Colo. Main switch and fuse cabinet. 1,904,911; Apr. 18.
Wilson, Louis, Brooklyn, assignor to B. L. Nicholes & Company, New York, N. Y. Powder distributing machine. 1,904,591; Apr. 18.
Windecker, Robert R., Painesville, Ohio. Manufacture of cement. 1,904,639; Apr. 18.
Windecker, Robert R., Painesville, Ohio. Manufacture of cement. 1,904,640; Apr. 18.
Wine, William H., Toledo, Ohio, and B. W. Kadel, Baltimore, Md. Door mechanism for railway cars. 1,904,022; Apr. 18.
Winkler, Karl. (See Pier, M., and Winkler.)
Winkler, Karl, and K. Wissel, Ludwigshafen-on-the-Rhine, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Conversion of carbonaceous solids into valuable liquid products. 1,904,536; Apr. 18.
Winthrop Chemical Company. (See Günzler, H., and Neubert, assignors.)
Winton, Ralph M. (See Falcona, P., and Winton.)
Wired Radio, Inc. (See Goddard, Louis A., assignor.)
Wired Radio, Inc. (See Gearhart, L. A., and Rudolph, assignors.)
Wired Radio, Inc. (See Hentschel, Ernest R., assignor.)
Wired Radio, Inc. (See Hyland, Lawrence A., assignor.)
Wired Radio, Inc. (See Taylor, Albert H., assignor.)
Wirén, Oscar A., Stockholm, Sweden. Arrangement in digesters adapted for manufacturing cellulose and washing with circulation effected by a centrifugal pump. 1,904,810; Apr. 18.
Wissel, Kurt. (See Winkler, K. and Wissel.)
Wissler, William A., Jackson Heights, N. Y., assignor to Haynes Stellite Company. Welding rod and making the same. 1,903,952; Apr. 18.
Wistrand, Gunnar, Berlin, Germany, assignor to Aktiebolaget Svenska Kullagerfabriken, Gothenburg, Sweden. Bearing mounting. 1,904,258; Apr. 18.
Withington, Winthrop, assignor to The American Fork & Hoe Company, Cleveland, Ohio. Rake. 1,904,843; Apr. 18.
Wolf, Fred L., assignor to The Ohio Brass Company, Mansfield, Ohio. Section insulator. 1,904,844; Apr. 18.
Wolf, Peter, Essen, assignor to Fried Krupp Aktiengesellschaft, Essen-on-the-Ruhr, Germany. Metal drum. 1,904,755; Apr. 18.
Wolters, Carl F., Marietta, Ohio, assignor to Remington Rand Inc., Buffalo, N. Y. Monolithic filing cabinet and attachments therefor. 1,904,912; Apr. 18.
Wood, John W., jr., New York, N. Y. Airport construction. 1,903,847; Apr. 18.
Wood, Vera L., et al., trustee. (See Coppus, Frans H. C., assignor.)
Wooster, Philip A., San Francisco, Calif. Dispensing device. 1,904,756; Apr. 18.
Wootton, Thomas W. (See Malcolm, J. A., and Wootton.)
Worth, Daniel B., Rochelle, Ill. Railway locomotive. Des. 89,666; Apr. 18.
Worthington Ball Company, The. (See Reichard, Willis E., assignor.)
Wray, Edwin P., White Salmon, Wash. Apple. Pl. Pt. 61; Apr. 18.
Wray, Omer. (See Wagner, Henry H. and C. L., assignors.)
Wright, Harry S., Reading, Mass. Pipe-trap cover. 1,904,840; Apr. 18.
Wright, Leonard K., Jackson Heights, assignor to Frecsidor Syndicate, New York, N. Y. Refrigeration apparatus. 1,904,024; Apr. 18.
Wright, Mary D., executrix. (See Kahrs, Henry, assignor.)
Wright, Sumner B., South Orange, and D. Mitchell, Martinsville, N. J., assignors to American Telephone and Telegraph Company. Two-way telephone system. 1,903,888; Apr. 18.
Wunsche, Wilhelm, Detroit, Mich. Buckle. 1,903,856; Apr. 18.
Wyant, Mott, Greenfield, Ind. Glass tank furnace. 1,904,111; Apr. 18.
Yale & Towne Manufacturing Company, The. (See Mosely, William P., assignor.)
Yamashita, Takehiro, Koishikawa-Ku, Tokyo, Japan. Double-color mechanical pencil or sharp pencil. 1,903,800; Apr. 18.
Yates, Sampson W. (See Cain, J. R., and Yates.)
Yobe, Perry P., North Hollywood, Calif., assignor to Koehring Company, Milwaukee, Wis. Consistency controlling mechanism for concrete mixers. 1,904,025; Apr. 18.
York Ice Machinery Corporation. (See Ruff, Alonzo W., assignor.)
York Water Corporation, Ltd. (See Alex, Max, assignor.)
Young, James H., assignor to H. H. Robertson Company, Pittsburgh, Pa. Antistick coating material. 1,904,841; Apr. 18.
Young, Philip L., New York, N. Y., and W. V. Hanks and G. H. Freyermuth, Baton Rouge, La., assignors to Standard Oil Development Company. Manufacture of hydrogen. 1,904,892; Apr. 18.
Young, Philip L., Elizabeth, N. J., and W. V. Hanks, Baton Rouge, La., assignors to Standard Oil Development Company. Manufacture of gas rich in free hydrogen. 1,904,893; Apr. 18.
Young, Thomas, Nurseries, Inc. (See Holmes, Jesse H., assignor.)
Yungman, Alfred T., Akron, assignor to The Vaughn Machinery Company, Cuyahoga Falls, Ohio. Wire drawing mechanism. 1,904,965; Apr. 18.
Zahm, Joseph D., and J. U. Lehn, Lititz, Pa. Animal trap. 1,904,188; Apr. 18.
Zahn, George H., Freedom, Pa. Hydraulic transmission mechanism. 1,904,811; Apr. 18.
Zaiger, Louis. (See Zaiger, Max and L.)
Zaiger, Max, Swampscott and L. Zaiger, Lynn, Mass. Splash flap for automobiles. 1,904,242; Apr. 18.
Zaiger, Max, Swampscott, and L. Zaiger, Lynn, Mass. Splash flap for automobiles. 1,904,243; Apr. 18.

Zanzi, Albino. (See Ferrando, A., and Zanzi.)
Zanzi, Ditta Giovanni. (See Ferrando, A., and Zanzi, assignors.)
Zeiss, Carl, the Firm. (See Henkel, W., and Meyer, assignors.)
Zeissel, Fred, et al. (See Heigl, Ludwig, assignor.)
Zelenka, Joseph J., La Grange, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Forming molded articles. 1,904,845; Apr. 18.
Zell, Lucian M., Essex County, N. J. Jewel and setting therefor. 1,904,259; Apr. 18.
Zellstoffabrik Waldhof. (See Hottenroth, V., and Faust, assignors.)
Zeratsky, August W. (See Starch, Benjamin S., assignor.)
Zeta-Bauweise G. m. b. H. (See Sander, O., and König, assignors.)
Zimmer Manufacturing Company. (See Ettinger, Joe J., assignor.)

LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 18TH DAY OF APRIL, 1933

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). Includes patents, reissues, and designs.

Abrasive coated material. H. N. Morris. 1,904,663; Apr. 18.
Acetylene and hydrogen, Production of. O. Eisenhut. 1,904,426; Apr. 18.
Acid aryllides of the benzene series and making same, Carboxylic. L. Laska and O. Haller. 1,903,899; Apr. 18.
Acid groups from dihydroxydiaminoanthraquinonedisulphonic acid, Eliminating sulphonic. P. Grossman. 1,903,862; Apr. 18.
Acid, Manufacture of acetic. S. R. Merley and O. Spring. 1,904,160; Apr. 18.
Acid of the diphenyl-methane series and preparing the same, Organic. I. Gubelmann, H. J. Welland, and O. Stallmann. 1,904,366; Apr. 18.
Acid solutions of secondary and tertiary alcohols, Producing and distilling aqueous sulphuric. B. T. Brooks. 1,904,200; Apr. 18.
Acids and preparing same, Fatty. R. T. Haslam. 1,904,452; Apr. 18.
Acids, Manufacture of low boiling tar. S. Caplan. 1,904,269; Apr. 18.
Acoustical board and the like, Method and machinery for the manufacture of. F. S. Farley. 1,904,285; Apr. 18.
Adhesive and making same. G. V. Caesar. 1,904,619; Apr. 18.
Adjustable washer. G. C. Royse. 1,904,296; Apr. 18.
Aerodynamic surface. V. Lougheed. 1,903,823; Apr. 18.
Aeroplane. T. M. MacCaskie. 1,904,923; Apr. 18.
Agitating apparatus. E. D. McCaddam. 1,904,796; Apr. 18.
Aircraft. C. D. Ellington. 1,904,281; Apr. 18.
Aircraft, Apparatus for determining the speed of flight of. C. von Hofe and J. Boykow. 1,903,886; Apr. 18.
Aircraft propeller, Rotary wing. C. E. Ohnsorg. 1,904,746; Apr. 18.
Aircraft propulsion. A. Hall-Brown. 1,904,134; Apr. 18.
Air for a furnace, Heating combustion. C. E. Lucke. 1,904,153; Apr. 18.
Air-lift trap, Siphonic. W. R. Brandau. 1,903,773; Apr. 18.
Air, Method and apparatus for conditioning. A. D. Karr and K. D. Perkins. 1,904,468; Apr. 18.
Airplane. V. Belimd. 1,903,752; Apr. 18.
Airplane and dirigible control apparatus, Automatic. N. C. Piutino. 1,904,801; Apr. 18.
Airport construction. J. W. Wood, jr. 1,903,847; Apr. 18.
Air refrigerating device. G. W. Cole. 1,903,777; Apr. 18.
Air register, Key operated warm. W. T. Truax. 1,904,636; Apr. 18.
Air washing and the like. W. A. Smith. 1,904,667; Apr. 18.
Alarm for typewriters. W. F. H. Mann. 1,904,744; Apr. 18.
Alarm system for cables, Gas pressure. T. C. Heaneberger. 1,904,227; Apr. 18.
Aldehydes, Production of aromatic. A. E. Craver. 1,904,414; Apr. 18.
Alloy, Ferrous. R. S. Dean. 1,904,859; Apr. 18.
Alloys, Nitriding ferrous. J. J. Egan. 1,904,425; Apr. 18.
Alloys, Production of. D. M. Scott. 1,904,761; Apr. 18.
Aluminum alloy. C. C. Titus. 1,903,842-3; Apr. 18.
Aluminum chloride and alumina, Production of. S. S. Svendsen. 1,904,762; Apr. 18.
Aluminum silicate refractories, Casting of. F. W. Schroeder. 1,903,944; Apr. 18.
Amino-alcohols, Manufacture of secondary aromatic. H. Legerlotz. 1,903,927; Apr. 18.
Ammonium sulphate, Producing. H. Baehr. 1,904,604; Apr. 18.
Amplifier. K. Posthumus. 1,904,524; Apr. 18.
Amplifier, Low frequency. H. A. Wheeler. 1,904,185; Apr. 18.
Amusement device. C. R. Graham. 1,903,995; Apr. 18.
Anchor, Fence post. J. F. Swenson. 1,904,177; Apr. 18.
Animal fibers fast tints, Dyeing. F. Straub and H. Schneider. 1,903,884; Apr. 18.
Animal trap. J. D. Zahm and J. U. Lehn. 1,904,188; Apr. 18.
Animated and changeable sign, Combined. R. M. Andersen. 1,904,908; Apr. 18.
Anode for water-cooled vacuum tubes. R. Shimizu. 1,903,945; Apr. 18.
Antenna system. L. A. Gebhard and R. B. Meyer. 1,903,811; Apr. 18.
Anthraquinoneacridones and making same, Halogenated. W. Bruck. 1,903,891; Apr. 18.
Antigiare device. W. L. Dysart. 1,903,917; Apr. 18.
Apple. E. P. Wray. Pl. Pt. 61; Apr. 18.
Appliance for use in hair waving. W. and H. MacDonald. 1,904,064; Apr. 18.
Arch particularly for use in metallurgical furnaces. W. Alberts. 1,904,596; Apr. 18.
Arch support, Adjustable. J. C. Howell. 1,904,789; Apr. 18.
Arch support for shoes. J. C. Howell. 1,904,790; Apr. 18.
Armature windings, Protection for. A. Oldenburg. 1,904,514; Apr. 18.
Armrest. C. R. Pittman. 1,904,800; Apr. 18.
Aromatic compounds, Halogenation of. M. A. Kunz, K. Koeberle, and E. Berthold. 1,904,145; Apr. 18.
Aromatic compounds, New colloidal mercurized hydroxy. H. Gänsler and O. Neubert. 1,903,895; Apr. 18.
Article-collecting machine. C. T. Brarea. 1,904,618; Apr. 18.
Article of manufacture, Producing an. H. L. Crowley. 1,904,273; Apr. 18.
Articles from celluloid and the like, Manufacturing. S. A. Neidich and W. Mendel. 1,904,289; Apr. 18.
Articles, Manufacture of formed. F. L. Brennen. 1,904,268; Apr. 18.
Artificial masses, Manufacture of. W. Pungs and K. Eisenmann. 1,904,529; Apr. 18.
Artillery computing system. H. C. Ford. 1,904,215; Apr. 18.
Attachment plug. J. B. Magee. 1,904,691; Apr. 18.
Automatic control switch. L. C. Irwin. 1,903,924; Apr. 18.
Automatic machine for the manufacture of soap bars. A. T. Hänten. 1,903,920; Apr. 18.
Automobile differential. C. N. McManis. 1,904,797; Apr. 18.
Automobile servicing machine. W. T. Carter. 1,903,905; Apr. 18.
Automotive tool. G. F. Fagan. 1,903,755; Apr. 18.
Auto-plate. D. J. Kelley. Des. 89,641; Apr. 18.
Axle structure. D. Parrett. 1,903,913; Apr. 18.
Bag: *See*—
Clothes bag. Ice delivery bag.
Golf bag.
Ball, Golf. W. E. Reichard. 1,904,012; Apr. 18.
Banquet table. R. C. Kuhn. 1,904,060; Apr. 18.
Bar: *See*—
Tone bar.
Base-exchange substances, Regenerating. O. R. Sweeney. 1,903,949; Apr. 18.
Basket, Shipping. J. B. Steel. 1,903,797; Apr. 18.
Batch dividing and covering means. J. M. Titcomb. 1,904,905-6; Apr. 18.
Battery handle. M. W. Severance. 1,904,887-8; Apr. 18.
Battery post clamp. B. M. Schmuhl. 1,904,954; Apr. 18.
Battery support. R. J. Kissinger. 1,904,620; Apr. 18.
Bearing: *See*—
Spindle bearing. Supporting bearing.
Bearing. C. B. Haskins. 1,904,451; Apr. 18.
Bearing and application thereof. E. C. Cope. 1,904,208; Apr. 18.
Bearing roller. P. S. Rydbeck. 1,904,253; Apr. 18.
Bearing within a pulley, Securing a. G. H. Clark and J. L. Deters. 1,903,776; Apr. 18.
Bed. W. C. Massiow. 1,903,901; Apr. 18.
Bed, Cooling. G. L. Fisk. 1,904,484; Apr. 18.
Bed, Pet's. L. Larson. Des. 89,646; Apr. 18.
Belt detector and safety device, Broken. A. A. Bianchi. 1,904,351; Apr. 18.
Belt fitter. M. E. Hill. 1,904,048; Apr. 18.
Bending machine. A. Wagenbach. 1,903,799; Apr. 18.
Binder and holder for writing implements, Loose leaf. C. D. Trussell. 1,904,572; Apr. 18.
Biscuits and the like, Icing. R. F. MacFarlane and W. H. Prescott. 1,904,742; Apr. 18.
Bit: *See*—
Tool bit.
Bloating of earthy materials, Promoting the. S. Q. Lee. 1,903,821; Apr. 18.
Block: *See*—
Cutter-chain block. Hat block.
Block for wells, Bridging. B. H. Davis. 1,904,275; Apr. 18.
Blower or pump, Reversible rotary. V. A. Kjaer. 1,904,056; Apr. 18.
Board: *See*—
Drawing board. Resistance panel board.
Boat propelling system. J. Kessler. 1,904,792; Apr. 18.

Body exercising apparatus. E. A. Bruder. 1,904,089; Apr. 18.
Boiler: *See*—
Steam boiler.
Boiler. W. Doble. 1,903,807; Apr. 18.
Book cover. M. Reiss. 1,904,532; Apr. 18.
Bookmaking machine attachment. B. Levine. 1,904,645; Apr. 18.
Book stock washer. G. G. McArthur. 1,904,066; Apr. 18.
Booster. R. P. Wagner. 1,904,181; Apr. 18.
Bore hole surveying apparatus. A. Anderson. 1,903,969; Apr. 18.
Bottle. E. H. Fabrice. Des. 89,632; Apr. 18.
Bottle capper. H. J. Lebbers. 1,903,822; Apr. 18.
Bottle capper. H. G. Rice. 1,904,828; Apr. 18.
Bottle carrier, Metal. P. Vignos. 1,904,019; Apr. 18.
Bottle, Culture. R. M. Halbach. 1,904,222; Apr. 18.
Bottle rinsing mechanism. J. R. Gruetter. 1,904,685; Apr. 18.
Box: *See*—
Newspaper box. Pasteboard box.
Paper flower box. Stuffing box.
Box. R. L. Bangs and W. A. Hermanson. 1,904,400; Apr. 18.
Box and cigarette paper holder, Combined tobacco. J. K. Brzezicki. 1,904,777; Apr. 18.
Boxes, Making metal. R. V. Burdick. 1,904,778; Apr. 18.
Brake: *See*—
Centrifugal brake. Hand brake.
Brake. V. Bendix and L. E. La Brie. 1,904,262; Apr. 18.
Brake device. F. O. Vaughn. 1,904,178; Apr. 18.
Brake equaliser. O. M. Lewis. 1,904,004; Apr. 18.
Brake for use on vehicles. E. B. Boughton. 1,903,973; Apr. 18.
Brake lock, Permanent and temporary. H. Liva. 1,904,794; Apr. 18.
Brake mechanism. M. P. Whitney. 1,904,186; Apr. 18.
Brake mechanism for automotive vehicles. C. S. Bragg and V. W. Kliesrath. 1,904,266; Apr. 18.
Brake rigging for railway cars. C. Hankins. 1,903,997; Apr. 18.
Brake rigging for railway cars. C. Hankins. 1,904,185; Apr. 18.
Brake system, Automotive. C. A. Campbell. 1,903,978; Apr. 18.
Brake system for automotive vehicles. C. S. Bragg and V. W. Kliesrath. 1,904,267; Apr. 18.
Brake tester. F. S. Belknap. 1,904,713; Apr. 18.
Breast lift. J. J. Wallace. 1,904,637; Apr. 18.
Bridge for an ophthalmic mounting. C. O. Cozzens. Des. 89,610; Apr. 18.
Broom rack. J. M. Smygel. 1,903,796; Apr. 18.
Brush. S. Aki. 1,904,260; Apr. 18.
Brush and like brush, Shaving. M. L. Bramson. 1,904,612; Apr. 18.
Brush, Cleaning. G. V. Evans. 1,904,041; Apr. 18.
Brush, Cleaning and washing. H. Beisser. 1,904,940; Apr. 18.
Brush, Floor and wall. A. E. Baker. 1,904,774; Apr. 18.
Brush, Sanitary. E. Currie. 1,904,917; Apr. 18.
Brush shaft holding and driving means for vacuum cleaners. L. W. Richardson and A. D. Wassall. 1,903,794; Apr. 18.
Bucket wheel. J. H. Doran. 1,904,421; Apr. 18.
Buckle. W. Wunsche. 1,903,856; Apr. 18.
Buckle, Belt. G. J. Fromm. Des. 89,634–6; Apr. 18.
Building column and display case, Combined. R. N. Aldrich. Des. 89,607–9; Apr. 18.
Building construction. M. F. Burk. 1,904,404; Apr. 18.
Building, Farm. F. J. Kreutzer. Des. 89,643–5; Apr. 18.
Burglarproof lock. W. Prior, jr. 1,904,882; Apr. 18.
Burner: *See*—
Gas burner. Oil burner.
Bust uplift. A. M. Le May. 1,904,644; Apr. 18.
Butter and like molding device. J. Bens. 1,904,714; Apr. 18.
Button. L. R. Carley. Des. 89,625; Apr. 18.
Cabinet and attachments therefor, Monolithic filing. C. F. Wolters. 1,904,912; Apr. 18.
Cabinet for keeping sound records. N. Crouset. 1,904,824; Apr. 18.
Cabinet, Main switch and fuse. R. S. Willoughy. 1,904,911; Apr. 18.
Cabinet, Paper. A. L. Saunders. 1,904,297; Apr. 18.
Cable. F. M. Potter. 1,904,525–7; Apr. 18.
Cable anchorage, Submarine. C. A. Chase. 1,904,271; Apr. 18.
Cable connecter. S. N. Buchanan. 1,904,617; Apr. 18.
Cable connecter. L. H. Church. 1,904,409; Apr. 18.
Cable, Electric. O. S. Markuson. 1,904,878; Apr. 18.
Cable, Electric. P. L. Shee. 1,904,887; Apr. 18.
Cable, Electrical. M. A. Kent. 1,904,472; Apr. 18.
Cable, Electrical. H. Milliken. 1,904,162; Apr. 18.
Cable maintenance apparatus. T. C. Henneberger. 1,904,226; Apr. 18.
Cable, Steel aluminium. R. Baum. 1,904,116; Apr. 18.
Cable, Submarine signaling. O. E. Buckley. 1,903,975; Apr. 18.
Cadmium-nickel alloy. C. E. Swartz and A. J. Phillips. 1,904,175–6; Apr. 18.
Calcium gluconate solution, Supersaturated. A. Stoll and E. Rothlin. 1,904,287; Apr. 18.
Calcium nitrate from dolomite while simultaneously obtaining magnesia, Producing. O. Kippe. 1,904,946; Apr. 18.
Can unloader. R. Douglass. 1,904,720; Apr. 18.
Can washing machine. H. L. Solie and N. J. Hedlund. 1,904,391; Apr. 18.
Capping table. A. S. Chandler. 1,903,980; Apr. 18.
Caps, Apparatus for forming sheet metal. J. M. Hothersall. 1,904,920; Apr. 18.
Capstan. G. A. Seeley. 1,904,885; Apr. 18.
Car construction. O. C. Duryea. 1,904,293–4; Apr. 18.
Car coupler. D. Robinson. 1,904,171; Apr. 18.
Car, Dump. E. Haugen. 1,904,453; Apr. 18.
Carbonaceous solids into valuable liquid products, Conversion of. K. Winkler and K. Wissel. 1,904,586; Apr. 18.
Carbonaceous material, Producing. A. Oberle. 1,903,634; Apr. 18.
Carbon black, Production of. T. P. Keller. 1,904,469; Apr. 18.
Carbon by dissociation of carbon monoxide starting from a combustible treated in a gas producer, Manufacture of. J. J. C. Willekens. 1,904,585; Apr. 18.
Carburetor. C. H. Kirby. 1,904,002; Apr. 18.
Carburetor. J. L. Whiteman. 1,904,022; Apr. 18.
Card, Display. J. Horwath. 1,904,659; Apr. 18.
Card holder. E. A. Rasbridge. 1,903,941; Apr. 18.
Card holder, Visible record. S. Barlow. 1,904,249; Apr. 18.
Carrier: *See*—
Bottle carrier.
Carrier case. E. B. Turner. 1,903,798; Apr. 18.
Carrier for motor vehicles, Luggage. J. B. Ambrosius. 1,904,114; Apr. 18.
Case: *See*—
Carrier case. Key case.
Casing: *See*—
Thermometer casing.
Casing, Instrument. W. D. Teague. Des. 89,620; Apr. 18.
Casing shoe, Well. J. J. Larkin. 1,904,317; Apr. 18.
Casket, Burial. S. Junkunc, jr. Des. 89,623; Apr. 18.
Casting hollow bodies in chill molds rotatable about vertical axes, Apparatus for. A. Keup. 1,904,831; Apr. 18.
Casting pots of linotype and similar machines working with soft metals, Device for feeding the. K. Bader. 1,903,751; Apr. 18.
Catalyst for oxidizing carbon monoxide in exhaust gases. M. E. Barker. 1,903,803; Apr. 18.
Catalyst used in the preparation of hydrogen, Reactivation of. G. H. Freyermuth and W. V. Hanks. 1,904,440; Apr. 18.
Catalysts, Restoring the activity of hydrogenation. J. A. Franceway. 1,904,218; Apr. 18.
Cathode, Indirectly heated. L. H. Bedford. 1,904,261; Apr. 18.
Cathodes, Manufacture of photo-electric. N. R. Campbell. 1,904,895; Apr. 18.
Cellulose or celluiosic products, Manufacture of. H. Dreyfus. 1,903,962; Apr. 18.
Cellulose, Process and apparatus for the manufacture of. D. Westad. 1,904,894; Apr. 18.
Cellulose raw material of all kinds. V. Hottenroth and O. Faust. 1,904,235; Apr. 18.
Cement, Manufacture of. R. E. Windecker. 1,904,639–40; Apr. 18.
Cement material, Fire grinding of. C. Pontoppidan. 1,904,523; Apr. 18.
Cement, Mortar. O. E. Wasson. 1,904,909; Apr. 18.
Cement, Production of. J. A. Singmaster. 1,904,699; Apr. 18.
Cementing machine. G. G. Albert. 1,904,812; Apr. 18.
Center locating device. H. F. Kieckhefer. 1,904,242; Apr. 18.
Centrifugal brake. F. H. Schwerin. 1,904,069; Apr. 18.
Centrifugal drier. R. W. Rigler. 1,903,795; Apr. 18.
Chain: *See*—
Dobby pattern chain.
Chain and making the same, Reenforced. W. B. Lashar. 1,904,479; Apr. 18.
Chain fastener. F. E. Thompson. 1,904,102; Apr. 18.
Chair: *See*—
Folding chair. Terrace chair.
Chair or settee bedstead. H. A. Fraser and P. F. Crighton. 1,903,918; Apr. 18.
Channeling machine. A. U. Croce. 1,904,415; Apr. 18.
Charge forming device. N. Straussler. 1,904,701; Apr. 18.
Charge forming device. W. H. Teeter. 1,904,624; Apr. 18.
Chart, Display grease. D. L. Conklin. 1,904,356; Apr. 18.
Chemical reactions, Method and apparatus for carrying out. M. C. Taylor and C. N. Richardson. 1,904,101; Apr. 18.
Chlorhydrins, Preparation of. L. W. Cook. 1,904,677; Apr. 18.
Chloride, Producing vinyl. F. K. Fertsch. 1,903,894; Apr. 18.
Chlorine dioxide, Manufacturing. W. Becher. 1,904,190; Apr. 18.
Chromium, Electrodepositing. C. G. Fink. 1,904,432; Apr. 18.
Chuck for tapping machines, Floating. W. D. Rigney. 1,904,883; Apr. 18.
Cigar and cigarette holder. A. Anselewitz. 1,904,814; Apr. 18.
Cigarette holder. A. G. Sweet. 1,904,903; Apr. 18.

Circuit arrangement, Electron discharge device. L. A. Hyland. 1,904,142; Apr. 18.
Circuit, Crystal rejector. W. S. Barden. 1,904,605; Apr. 18.
Circuit for electric discharge devices. J. L. Reynolds. 1,904,533; Apr. 18.
Circuit for enameling furnaces, Protective. R. D. Van Nordstrand. 1,904,580; Apr. 18.
Circuit for telegraph exchanges, Message register. A. B. Dickinson. 1,903,278; Apr. 18.
Circuit interrupter, Electric. W. B. Paul. 1,904,519; Apr. 18.
Circuit interrupter, Gas blast. W. Uebermuth. 1,904,577; Apr. 18.
Circuit interrupting apparatus. J. D. Hilliard. 1,904,463; Apr. 18.
Circuit interruption, Method of and apparatus for gas blast. S. Ruppel. 1,904,529; Apr. 18.
Circuit, Magnetic return. E. F. Northrup. 1,904,665; Apr. 18.
Circuit, Push-pull amplifier. F. Thorington. 1,904,103; Apr. 18.
Circuit, Vacuum tube amplifier. V. Cousins. 1,904,272; Apr. 18.
Clamp: *See*—
Battery post clamp. Hair waving clamp.
Cleaner: *See*—
Suction cleaner. Vacuum cleaner.
Cleaning apparatus. M. H. Bissell. 1,904,818; Apr. 18.
Clip: *See*—
Pen clip.
Clock, Continuous alarm. P. V. Vandevelde. 1,904,579; Apr. 18.
Closure and lock. A. Johnson. 1,903,765; Apr. 18.
Closure for containers. A. F. Kroen. 1,904,739; Apr. 18.
Closure-holding and return spring. W. J. Hyde. 1,903,923; Apr. 18.
Clothes bag. A. J. Lichtig. Re18,799; Apr. 18.
Clutch: *See*—
Multiple disk clutch. Positive-action clutch.
Clutch. W. F. Goehring. 1,903,963; Apr. 18.
Clutch for hoisting drums. A. C. Benson. 1,904,350; Apr. 18.
Clutch for transmission plate. I. Saks. 1,904,953; Apr. 18.
Clutching device. C. A. Rudqvist. 1,903,943; Apr. 18.
Coal cutting machine. N. D. Levin. 1,904,488; Apr. 18.
Coal mining apparatus. N. D. Levin. 1,904,489; Apr. 18.
Coal substitute, Manufacture of a. J. L. Marek. 1,904,833; Apr. 18.
Coat and trouser hanger. E. A. De Bucci. 1,903,277; Apr. 18.
Coating material, Antistick. J. H. Young. 1,904,341; Apr. 18.
Coatings, Preparation of metallic. H. Gockel. 1,903,860; Apr. 18.
Cobalt alloy, Stain resisting. F. M. Becket. 1,904,712; Apr. 18.
Coil forming device. C. H. Thordarson. 1,904,890; Apr. 18.
Collapsible receptacle. W. J. Geist. 1,904,865; Apr. 18.
Collar support. S. R. Meaden. 1,904,566; Apr. 18.
Color photography. T. T. Baker. 1,903,971; Apr. 18.
Comb. R. F. Allin. 1,904,705; Apr. 18.
Comb and accessories therefor. M. M. Shaw. 1,904,090; Apr. 18.
Combination table. E. L. McFarland. 1,904,795; Apr. 18.
Combustion-arc process and apparatus. A. E. Greene. 1,904,688; Apr. 18.
Compotier. C. E. Keating. Des. 89,617; Apr. 18.
Compound metal stock. E. Kammerer. 1,904,241; Apr. 18.
Compounds including hydrocarbons, Apparatus for making emulsified. R. H. Russell. 1,904,952; Apr. 18.
Compressor control. A. W. Ruff. 1,903,553; Apr. 18.
Compressor, Portable. W. Prellwitz. 1,904,082; Apr. 18.
Concrete, Making. R. M. Burns. 1,903,976; Apr. 18.
Concrete mixers, Consistency controlling mechanism for. P. P. Yohe. 1,904,025; Apr. 18.
Condenser: *See*—
Variable condenser.
Condensers, Making electrical. E. E. Park, jr. 1,904,876; Apr. 18.
Conduit, Threadless fitting. A. Olevia. 1,904,627; Apr. 18.
Connecter: *See*—
Cable connecter. Terminal connecter.
Plug connecter.
Connecting rod end. H. A. Hayden. 1,903,983; Apr. 18.
Connection, Connecting rod. E. P. Wagner. 1,904,180; Apr. 18.
Container: *See*—
Display container.
Ice cream or confection container.
Container for tablets and the like, Dispensing. C. E. Raymond. 1,904,836; Apr. 18.
Container for toothbrushes. S. B. Bleaden. 1,904,609; Apr. 18.
Contours of surfaces, Apparatus for reproducing. J. A. Malcolm and T. W. Wootton. 1,904,622; Apr. 18.
Control apparatus. L. A. Gebhard. 1,903,759; Apr. 18.
Control apparatus, Constant frequency. E. R. Hentschel. 1,904,771; Apr. 18.
Control mechanism for clinching machines. H. A. Flak and J. E. Schmidt. 1,903,980; Apr. 18.
Control system. O. W. Livingston. 1,904,485; Apr. 18.
Controlling device, Automatic. R. Penn. 1,904,326; Apr. 18.
Controlling means for vehicle wheel brakes. J. B. Des Rosiers. 1,904,359; Apr. 18.
Conveyer. A. Redler. 1,904,167; Apr. 18.
Conveyer, escalator, and the like. J. H. Meacock. 1,904,068; Apr. 18.
Conveyer, Switching. H. D. Posey. 1,904,637; Apr. 18.
Cooking apparatus, Automatic. H. T. Hunter. 1,904,270; Apr. 18.
Cooler: *See*—
Lubricant cooler. Water cooler.
Cooling plants, Apparatus for the ventilation of. A. L. Thomson. 1,904,570; Apr. 18.
Cooling system. H. H. Humphreys. 1,904,686; Apr. 18.
Core-breaker. N. K. Bowman. 1,903,772; Apr. 18.
Cores for cables for communication circuits. K. Schumann. 1,904,547; Apr. 18.
Cork manufacture. W. G. Bond. 1,904,197; Apr. 18.
Corn sliker. H. R. Lewis. 1,904,740; Apr. 18.
Coupling: *See*—
Hose coupling. Shaft coupling.
Hydraulic coupling. Yielding coupling.
Coupling. Le R. Rhodes. 1,904,887; Apr. 18.
Coupling for joining pipes, rods, wires, and the like. B. N. R. Lamont. 1,903,926; Apr. 18.
Cover: *See*—
Book cover. Pipe-trap cover.
Hatch cover.
Cover for hatches. J. W. and W. Isherwood. 1,904,736; Apr. 18.
Cow tail hanger. I. A. Trowbridge. 1,904,635; Apr. 18.
Crepes with threads of cellulose acetate artificial silk, Manufacturing. C. Clemencon. 1,904,123; Apr. 18.
Crown for ladies' hats. M. Walsh. 1,904,108; Apr. 18.
Cup: *See*—
Drinking cup. Shaving cup.
Current ignition device, Constant. I. E. McCabe. 1,904,878; Apr. 18.
Current rectifier, Electric. S. Widmer. 1,904,896; Apr. 18.
Curtain beading. E. P. Bixer. 1,904,194; Apr. 18.
Curtain rod. I. Weinberg. 1,904,588; Apr. 18.
Cushion, Journal. E. J. O'Brien. 1,904,007; Apr. 18.
Cutter: *See*—
Meat cutter. Rotary cutter.
Cutter-chain block. N. K. Bowman. 1,903,771; Apr. 18.
Cutter for cutting spiral bevel gears. E. L. Pickett. 1,903,968; Apr. 18.
Cutter mechanism for mowing machines. D. H. Bennett. 1,903,753; Apr. 18.
Cyclic process for the production of sulphite pulp. G. A. Richter. 1,904,170; Apr. 18.
Cylinder construction for firearms. J. W. Harrington. 1,904,790; Apr. 18.
Cylinders for internal combustion engines. W. Hefti. 1,904,459; Apr. 18.
Dam and making same. J. B. Girard. 1,903,760; Apr. 18.
Decomposition and separation apparatus. A. Sommermeyer. 1,904,556; Apr. 18.
Decorative material. D. J. Kelman. 1,904,471; Apr. 18.
Defroster. M. E. Henning. 1,904,658; Apr. 18.
Detachable fastener. G. A. King. 1,904,055; Apr. 18.
Detergent dispensing device. J. R. Martin. 1,904,157; Apr. 18.
Detonators, percussion caps, and like articles, Manufacture of electric. D. T. Jones and F. J. Moore. 1,904,240; Apr. 18.
Dial and cylinder connection for knitting machines. W. L. Smith, jr., and R. H. Lawson. 1,904,833; Apr. 18.
Die holding means. T. M. Lilleberg. 1,903,786; Apr. 18.
Dies, Making drawing. A. Simons. 1,904,696; Apr. 18.
Digesters adapted for manufacturing cellulose and working with circulation effected by a centrifugal pump, Arrangement in. O. A. Wires. 1,904,810; Apr. 18.
Discharge apparatus. W. C. Laughlin and A. B. Asch. 1,904,062; Apr. 18.
Discharge tube. C. J. R. H. von Wedel. Re18,798; Apr. 18.
Dish handling mechanism. H. R. Brand. 1,904,198; Apr. 18.
Dishwashing machine. P. De Asis. 1,903,780; Apr. 18.
Disk-like cutting tool. G. F. Tayler. 1,904,568; Apr. 18.
Dispatch system valve, Pneumatic. J. J. Stoetzel. 1,904,006; Apr. 18.
Dispenser: *See*—
Soap dispenser.
Dispenser of the twin chamber type. W. H. Haupt. 1,904,454; Apr. 18.
Dispensing device. P. A. Wooster. 1,904,756; Apr. 18.
Display container. H. Matthews. 1,904,648; Apr. 18.
Display rack. E. B. Nunnery. 1,903,926; Apr. 18.
Dobby pattern chain. E. R. Holmes and O. V. Payne. 1,904,212; Apr. 18.
Door hinge. E. Bommer. 1,904,120; Apr. 18.
Doorlatch. E. J. Cook. 1,904,970; Apr. 18.
Doorlock. W. V. Parr, C. A. Love, and J. J. Barnes. 1,904,748; Apr. 18.
Door mechanism for railway cars. W. E. Wine and B. W. Kadel. 1,904,023; Apr. 18.

Door, Pass-type elevator. R. S. Peelle. 1,904,010; Apr. 18.
Dough, Packeting. C. Lorber. 1,904,741; Apr. 18.
Draft device. A. F. Morris. 1,904,163; Apr. 18.
Drawing board. A. W. Keuffel. 1,904,899; Apr. 18.
Dress ensemble. W. A. Strass. Des. 89,656; Apr. 18.
Drier: *See*—
Centrifugal drier. Paint drier.
Drill: *See*—
Mining drill. Push drill.
Drill mounting, Mining. L. J. Fellay. 1,904,655; Apr. 18.
Drill post, Mining. L. J. Fellay. 1,904,656; Apr. 18.
Drilling machinery. W. Sheldon. 1,904,256; Apr. 18.
Drinking cup. M. H. Sidebotham. 1,904,331; Apr. 18.
Drum, Barking. J. Strindlund. 1,904,937; Apr. 18.
Drum, Metal. P. Wolf. 1,904,755; Apr. 18.
Dump body operating mechanism. T. G. Jungersen. 1,904,922; Apr. 18.
Dye, Azo. R. Brightman. 1,904,820; Apr. 18.
Dyeing apparatus. L. B. Hasbrouck. 1,904,137; Apr. 18.
Dyestuffs and preparing same, Disazo. R. Brightman. 1,904,821; Apr. 18.
Dyestuffs and preparing the same, Azo. R. Brightman. 1,904,822; Apr. 18.
Dyestuffs of the anthrapyridone and the anthrapyrimidone series, Vat. O. Bayer and F. Baumann. 1,903,857; Apr. 18.
Dynamometer. H. Ewing and R. P. Roberts. 1,904,678; Apr. 18.
Earth boring apparatus. C. L. Powell and H. R. Smith. 1,904,249; Apr. 18.
Eaves-trough hanger. W. H. and W. J. Gray. 1,903,861; Apr. 18.
Eccentric, Adjustable throw. C. W. Mueller. 1,903,932; Apr. 18.
Educational device. F. E. Fisher. 1,904,723; Apr. 18.
Ejecting mechanism. V. A. Malec. 1,904,155; Apr. 18.
Electric controller. V. G. Apple. 1,904,818; Apr. 18.
Electric cooking. M. Schwander. 1,903,883; Apr. 18.
Electric discharge tube. C. Bol. 1,904,195; Apr. 18.
Electric heater. C. C. Abbott. 1,904,594; Apr. 18.
Electric heating and cooking appliance. E. R. del Riccio. 1,904,205; Apr. 18.
Electric lighting fixture. W. von Nessen. 1,904,703; Apr. 18.
Electric power, Method and apparatus for converting. L. A. Haseltine. 1,904,455; Apr. 18.
Electric switch. C. D. Ainsworth. 1,904,397; Apr. 18.
Electric switch. M. P. Luther. 1,903,824; Apr. 18.
Electric switch. G. Scott. 1,904,935; Apr. 18.
Electric writing-computing machine, Automatic. H. A. Footorap. 1,904,127; Apr. 18.
Electrical apparatus. H. G. Dybvig. 1,904,422; Apr. 18.
Electrical apparatus. E. G. Swanson. 1,904,565; Apr. 18.
Electrical control means for brakes. R. E. Adams. 1,903,801; Apr. 18.
Electrical instrument. B. W. St. Clair. 1,904,096; Apr. 18.
Electrical interlock. R. S. Peelle. 1,904,008; Apr. 18.
Electrical lead-in. O. Selling. 1,904,805; Apr. 18.
Electrical measuring instrument. B. W. St. Clair. 1,904,095; Apr. 18.
Electrical quantities, Method and apparatus for recording. O. A. Knopp. 1,904,029; Apr. 18.
Electrical regulating system. D. W. McLenegan. 1,904,500; Apr. 18.
Electrical regulator. E. Horowitz. 1,904,465; Apr. 18.
Electrical resistor. L. Bradley. 1,904,352; Apr. 18.
Electrical terminal. C. W. Doremus. 1,903,808; Apr. 18.
Electrical treating apparatus. E. O. Frederics. 1,904,437; Apr. 18.
Electrode for discharge tubes. J. J. Madine. 1,904,154; Apr. 18.
Electromagnetic device. B. J. Babbitt. 1,904,847; Apr. 18.
Electromagnetic tool. C. A. Hargrove. 1,904,224; Apr. 18.
Electroplating with aluminum. A. von Zeerleder. 1,904,107; Apr. 18.
Elevator system. D. L. Lindquist, E. L. Dunn, and D. C. Larson. 1,904,646–7; Apr. 18.
Eliminating system, Stray and atmospherics. J. Bethenod. 1,904,607; Apr. 18.
Emulsifying and wetting-out agents, Manufacture of. A. Rheiner. 1,903,879; Apr. 18.
Engine: *See*—
Expansion engine. Internal combustion engine.
Engine. G. A. Bartholomew. 1,904,775; Apr. 18.
Engine. J. L. Kempthorne. 1,904,873–4; Apr. 18.
Engine compressor and the like, Rotary. C. E. Trube. 1,904,892; Apr. 18.
Engine control. T. Pilla. 1,903,876; Apr. 18.
Engine with preheated air, Combustion. J. D. Morgan. 1,904,070; Apr. 18.
Epidiascope. H. Plies. 1,904,695; Apr. 18.
Esters of anthrahydroquinones, Manufacture of sulphuric. D. A. W. Fairweather and J. Thomas. 1,904,721; Apr. 18.
Esters of carboxylic acids, Preparing alkyl. W. Lommel and R. Engelhardt. 1,903,868; Apr. 18.
Esters of 2.8-amino-naphthole acid and preparing them, L. Sander. 1,903,880; Apr. 18.
Etching process and composition for use therein. M. F. Conroy. 1,903,778; Apr. 18.
Ethanol amines, Production of. E. W. Reid and D. C. Lewis. 1,904,018; Apr. 18.
Expansion engine, Multiple. L. W. Lindberg. 1,904,871; Apr. 18.
Extruding machine. V. Royle. 1,904,284; Apr. 18.
Eyelash curler. W. R. Tuttle and C. W. Stichel. 1,904,575; Apr. 18.
Fabric and sheet material and the manufacture thereof. C. Dreyfus. 1,903,960; Apr. 18.
Fastener: *See*—
Chain fastener. Separable fastener.
Detachable fastener.
Flanged corrugated fastener.
Fastener for articles to be laundered, Detachable snap. L. B. Chapman. 1,904,122; Apr. 18.
Fastener for wrist watch straps. E. C. Hildebrand. 1,904,230; Apr. 18.
Fastener inserting machine. S. L. Gookin. 1,904,306; Apr. 18.
Fastening attachment for paper bags. T. M. Royal. 1,903,839; Apr. 18.
Fastening inserting machine. C. F. R. Jeavons. 1,904,813; Apr. 18.
Fastening inserting machine. A. S. Johnson. 1,904,814; Apr. 18.
Fastening the end of a coiled member to a supporting structure, Device for. J. T. Grimm, J. P. Deane, and J. G. Cureton. 1,904,863; Apr. 18.
Faucet structure. P. V. Fiorido. 1,903,757; Apr. 18.
Feed water regulator. C. H. Smoot. 1,904,553–4; Apr. 18.
Feeder: *See*—
Glass feeder.
Fibers, Treating vegetable. R. H. McKee and E. H. Morse. 1,903,828; Apr. 18.
Filaments and product thereof, Making artificial. C. Dreyfus and W. Whitehead. 1,904,209; Apr. 18.
Film and film printing apparatus, Sound record. A. C. Hardy. 1,904,449; Apr. 18.
Film for photographic purposes. A. G. Adamson. 1,904,113; Apr. 18.
Film holder for photographic cameras. O. Steiner. 1,904,097; Apr. 18.
Film, Motion picture. J. W. Coffman. 1,903,981; Apr. 18.
Films, Copying goffered. R. Berthon. 1,904,671; Apr. 18.
Films for color cinematography, Printing of. R. Berthon. 1,904,673; Apr. 18.
Films, Process and device for reproducing goffered. R. Berthon. 1,904,672; Apr. 18.
Filter for vacuum cleaners, Double. W. Leathers. 1,904,690; Apr. 18.
Finishing process. F. M. Crystler. 1,904,417; Apr. 18.
Fire hose rack. R. O. Lund. 1,904,068; Apr. 18.

Fitting for measuring elements. C. W. Bristol and A. Noble. 1,904,615; Apr. 18.
Flanged corrugated fastener. J. S. McChesney. 1,904,288; Apr. 18.
Flap for automobiles, Splash. M. and L. Zaiger. 1,904,842–3; Apr. 18.
Flash light. G. B. Pratt. 1,904,002; Apr. 18.
Flask, Molding. E. A. Anheuser and G. S. Remiker. 1,904,037; Apr. 18.
Flax, Accelerating the retting of. W. Lens and K. Jochum. 1,904,148; Apr. 18.
Flier construction. M. J. McHale. 1,904,624; Apr. 18.
Float valve. L. A. Hanson and C. F. Osner. 1,903,816; Apr. 18.
Flow indicator. C. D. Fagan and R. W. Swank. 1,904,283; Apr. 18.
Flow regulator. E. T. Turner. 1,904,837; Apr. 18.
Flowers, Display of cut. J. H. Holmes. 1,904,788; Apr. 18.
Fluid control system, Automatic. M. Alpern. 1,904,846; Apr. 18.
Fluid control valve. E. F. Delèry. 1,904,204; Apr. 18.
Fluid pressure switch. F. G. Hobart. 1,904,311; Apr. 18.
Fluid pressure tool. G. M. Nell. 1,904,694; Apr. 18.
Fluid pressures, Device for measuring and indicating. J. Okill. 1,904,747; Apr. 18.
Flush valve. A. H. Kennedy. 1,904,898; Apr. 18.
Fluting machine. C. B. Post. 1,904,080; Apr. 18.
Fly screen. M. E. Webster. 1,904,035; Apr. 18.
Folding chair. M. L. Tinsley. 1,904,891; Apr. 18.
Footwear, Making. W. H. Bresnahan. 1,904,851; Apr. 18.
Forge. W. C. Else. 1,904,427; Apr. 18.
Form, Collapsible tire building. F. L. Johnson. 1,904,945; Apr. 18.
Foundation columns, Method and apparatus for forming. C. L. Powell. 1,904,079; Apr. 18.
Fountain for poultry, Drinking. H. C. Karst. 1,903,767; Apr. 18.
Fountain structure. H. A. Brink. 1,903,974; Apr. 18.
Frame. H. H. Lehere. 1,904,818; Apr. 18.
Frame provided with easel-stand. H. Schuts. 1,904,068; Apr. 18.
Frequency control apparatus. E. R. Heutschel. 1,904,140; Apr. 18.
Fruit cutting machine. T. Tachi. 1,903,854; Apr. 18.
Fuel, Burning. J. W. Fuller. 1,904,128; Apr. 18.

Fuel supply process for internal combustion engines. F. Rochefort. 1,903,851; Apr. 18.
Fuels and products derived therefrom or other materials into valuable liquids, Conversion of solid. C. Krauch and M. Pier. 1,904,470; Apr. 18.
Furfural acetone and furan derivatives, Reduction of. F. N. Peters, jr. 1,903,850; Apr. 18.
Furnace: *See*—
Glass furnace. Hot water heating furnace.
Glass tank furnace. Reduction furnace.
Heat treating furnace.
Furnace. J. F. Crawford. 1,904,781; Apr. 18.
Furnace and boiler. W. A. Jones. 1,904,466; Apr. 18.
Furnace by freezing, Lining a. H. Neuhaus. 1,904,864; Apr. 18.
Furnace wall blocks against tubes, Retaining. E. G. Bailey and R. M. Hardgrove. 1,904,189; Apr. 18.
Gain control, Automatic. T. A. Smith. 1,904,552; Apr. 18.
Game apparatus. L. Myers. 1,903,790; Apr. 18.
Gas and similar gaseous hydrocarbons into a mixture of carbon monoxide and hydrogen in controlled proportions, Converting natural. W. D. Wilcox. 1,903,845; Apr. 18.
Gas burner. E. B. McLavy and J. E. Conner. 1,903,903; Apr. 18.
Gas ignition device. S. Perry. 1,903,792; Apr. 18.
Gas rich in free hydrogen, Manufacture of. P. L. Young and W. V. Hanks. 1,904,593; Apr. 18.
Gases, Conversion of hydrocarbon. G. Egloff. 1,904,862; Apr. 18.
Gasket. M. D. Fitzgerald. 1,903,990; Apr. 18.
Gasket. J. H. Victor. 1,904,651; Apr. 18.
Gasket. L. Wideman, A. W. Anderson, and P. L. Rider. 1,904,910; Apr. 18.
Gate: *See*—
Self-cleaning fish gate.
Gauge: *See*—
Tire gauge.
Gauge and guide, Router. A. E. O. Wendorf. 1,904,109; Apr. 18.
Gauge, Bourdon lever type of pressure. C. J. Manuel. 1,904,492; Apr. 18.
Gauge device. A. R. Koos. 1,904,143; Apr. 18.
Gauge for volatile liquids, Liquid level. N. H. Gay. 1,904,785; Apr. 18.
Gear: *See*—
Switch gear.
Gear-shifting mechanism. K. W. Gaskill. 1,903,758; Apr. 18.
Gearing, Variable speed. C. S. and R. S. Prendergast. 1,904,629; Apr. 18.
Gears, Cutting the teeth of. O. G. Simmons. 1,904,956; Apr. 18.
Generator: *See*—
Lighting generator. Tuning fork generator.
Glass, Apparatus for the manufacture of sheet. C. Cone. 1,904,978; Apr. 18.
Glass feeder. D. Stenhouse. 1,904,754; Apr. 18.
Glass furnace. L. D. Soubier. 1,904,957; Apr. 18.
Glass, Manufacture of wire. M. L. Bageman. 1,904,118; Apr. 18.
Glass or similar article, Sherbet. R. C. Diebenkorn. Des. 89,613; Apr. 18.
Glass tank furnace. M. Wyeat. 1,904,111; Apr. 18.
Glassware forming machine. J. E. McLaughlin. 1,904,962; Apr. 18.
Glassware forming machine. L. D. Soubier. 1,904,958–9; Apr. 18.
Glass working tank. L. D. Soubier. 1,904,960; Apr. 18.
Glue from glue-containing material, Process and plant for extracting. J. Kohl. 1,904,003; Apr. 18.
Goal. E. R. Peoples. 1,904,890; Apr. 18.
Golf bag. G. H. Harris. 1,904,781; Apr. 18.
Golf club assembly. F. A. Hodgman. 1,904,231; Apr. 18.
Golf game device, Indoor. A. M. Walstrom. 1,904,634; Apr. 18.
Grader, Mechanical fine. G. Maxon, jr., and W. Ord. 1,904,948; Apr. 18.
Grate. A. D. Cronin. 1,903,779; Apr. 18.
Grille or the like. L. M. Beam. Des. 89,622–4; Apr. 18.
Grinding and polishing attachment for rolling mills. H. A. Poling. 1,904,368; Apr. 18.
Grinding apparatus. H. L. Crowley. 1,904,274; Apr. 18.
Grinding apparatus. E. C. Head. 1,903,967; Apr. 18.
Grinding apparatus. J. Kotouc. 1,904,068; Apr. 18.
Grinding chasers, Method and machine for. E. E. Flanders. 1,904,304; Apr. 18.
Grinding machine. F. S. Haas. 1,904,045; Apr. 18.
Grinding machine. C. G. Hunt. 1,904,642; Apr. 18.
Guard, Brake dust. H. E. Nichols. 1,903,925; Apr. 18.
Guard, Saw. E. Mamet. 1,904,005; Apr. 18.
Gum, Grease. R. L. Bacher and P. L. Schultz. 1,903,750; Apr. 18.
Hair waver. A. Goodman. 1,904,444; Apr. 18.
Hair waver. A. O. Lewis. 1,904,150; Apr. 18.
Hair waver. T. I. Moseley. 1,904,625; Apr. 18.
Hair waving clamp. P. Falcone and E. B. Winton. 1,904,979; Apr. 18.
Hammer magnetic type, Balanced spring. F. Schouten. 1,904,905; Apr. 18.
Hand brake. H. B. Haseltine. 1,904,369; Apr. 18.
Handkerchief. T. W. Tansley. Des. 89,657–63; Apr. 18.
Handle: *See*—
Battery handle.
Hanger: *See*—
Coat and trouser hanger. Eaves-trough hanger.
Cow tail hanger. Pipe hanger.
Harvester, Corn. R. R. Perkins. 1,904,749; Apr. 18.
Hat block. G. P. Papadeposulos. 1,904,912; Apr. 18.
Hat flanging apparatus. S. J. Miller. 1,903,873; Apr. 18.
Hatch cover. J. W. and W. Isherwood. 1,904,795; Apr. 18.
Headlight, Automobile. S. W. H. Turner. 1,904,974; Apr. 18.
Headlight for automobile. L. Dobos. 1,904,896; Apr. 18.
Heat energy, Method and apparatus for utilizing radiant. G. Egloff and L. A. Mekler. 1,904,861; Apr. 18.
Heat exchange device. G. Krämsein and R. Sammeruether. 1,903,898; Apr. 18.
Heat exchanger. C. A. Crowl. 1,904,857; Apr. 18.
Heat exchanger. C. W. Metzgar. 1,904,875; Apr. 18.
Heat regenerator. W. J. Irwin. 1,904,286; Apr. 18.
Heat-treating apparatus for metal work. H. Rosenberg. 1,904,888; Apr. 18.
Heat treating furnace, Rotary. E. T. Cope, A. H. Vaughan, and W. S. Bowling. 1,903,909; Apr. 18.
Heater: *See*—
Electric heater. Liquid heater.
Heater. F. T. Powers. 1,903,878; Apr. 18.
Heater control, Gas water. F. C. Lorens. 1,903,788; Apr. 18.
Heating and ventilating apparatus. W. Ewalt. 1,904,918; Apr. 18.
Heating and ventilating apparatus. M. Payne. 1,903,889; Apr. 18.
Heating device. L. Hawkins. 1,904,786; Apr. 18.
Heating, Device for high frequency induction. J. M. Fagan. 1,904,214; Apr. 18.
Heating system, Hot air. C. S. Stout. 1,904,962; Apr. 18.
Heel breasting machine. F. Ashworth. 1,904,346; Apr. 18.
Hides and skins, Detecting metallic objects in. A. P. Giuliano. 1,904,826; Apr. 18.
Hinge: *See*—
Door hinge. Window hinge.
Hinge. R. Domadeu. 1,904,207; Apr. 18.
Hoist dumping body, Hydraulic. W. C. Anthony and L. Wachter. 1,904,345; Apr. 18.
Hoist, Self-locking boom. G. T. Roak. 1,904,930; Apr. 18.
Holder: *See*—
Card holder. Package holder.
Cigar and cigarette holder. Pipe holder.
Cigarette holder. Tool holder.
Jig-saw puzzle holder. Umbrella holder.
Necktie and collar holder.
Holder for cosmetics and the like. G. C. Fullmer. 1,904,864; Apr. 18.
Holder for reknitting fabrics. C. A. Crowley. 1,903,896; Apr. 18.
Holder for yarn packages. F. B. Javery. 1,904,787; Apr. 18.
Holding and dispensing device for collapsible tubes. H. Jaedike. 1,904,050; Apr. 18.
Honing device. J. Summen. 1,904,836; Apr. 18.
Hook: *See*—
Printer's register hook.
Horn, Fluid pressure. H. Hueber. 1,904,759; Apr. 18.
Hose coupling. S. Larson. 1,904,061; Apr. 18.
Hosiery and making same, Seamless. J. M. Allen. 1,904,036; Apr. 18.
Hot water heating furnace. C. A. W. Voight. 1,904,179; Apr. 18.
House, Bird's. J. D. Daggett. Des. 89,631; Apr. 18.
Hydraulic coupling. J. N. Klep and W. Broee. 1,904,054; Apr. 18.
Hydraulic device for opening and closing filter presses and other pressure-applying. T. E. Raymond. 1,904,531; Apr. 18.
Hydraulic jack. C. F. Bacon. 1,904,115; Apr. 18.
Hydraulic jack. S. J. Widener. 1,903,837; Apr. 18.
Hydraulic lifting mechanism. I. V. K. Hott. 1,903,763; Apr. 18.
Hydraulic pump. F. G. Hehr. 1,904,707; Apr. 18.
Hydraulic transmission system. R. Maw. 1,904,496; Apr. 18.
Hydrocarbon distillates containing mercaptans, Sweetening. J. C. Morrell. 1,904,382; Apr. 18.
Hydrocarbons, Apparatus for treating. S. E. Bolles. 1,904,196; Apr. 18.
Hydrocarbons, Stabilization of halogenated. C. R. Harris. 1,904,450; Apr. 18.
Hydrocarbons, Treating. E. J. Gohr. 1,904,133; Apr. 18.
Hydrocarbons, Treating low boiling. H. Restin. 1,904,172; Apr. 18.
Hydrogen from hydrocarbon gases, Production of. G. H. Freyermuth. 1,904,489; Apr. 18.
Hydrogen from refinery and other hydro-carbon gases, Production of. G. H. Freyermuth, J. K. Small, and W. V. Hanks. 1,904,441; Apr. 18.
Hydrogen, Manufacture of. P. L. Young, W. V. Hanks, and G. H. Freyermuth. 1,904,592; Apr. 18.
Hydrogen preparation. V. Voorhees. 1,904,908; Apr. 18.

Hydrogen sulphide from gas mixtures and for the recovery of elemental sulphur, Removal of. W. J. Edmonds and O. H. Dawson. 1,904,424; Apr. 18.
Ice cream or confection container. J. E. Hogue. 1,903,764; Apr. 18.
Ice delivery bag. R. J. Hancock and J. L. L. Garrison. 1,904,729; Apr. 18.
Illuminated display, Changeable. L. O. Glatzner. 1,904,132; Apr. 18.
Indicating and control device for material receiving apparatus. E. W. Larsen. 1,904,869; Apr. 18.
Indicating device. H. H. Parsons. 1,903,938; Apr. 18.
Indicator: *See*—
Flow indicator.
Thermostatic radiation indicator.
Indicator device. H. A. Flammer. 1,904,435; Apr. 18.
Indicator for radioreceivers. H. Matsner. Re18,796; Apr. 18.
Indicator for reservoirs for liquid filled cables. E. D. Eby. 1,904,423; Apr. 18.
Inductance. F. T. Brewer. 1,904,199; Apr. 18.
Inductance system, Variable. J. B. Dow. 1,904,208; Apr. 18.
Ink roll for printing presses. O. H. Banker. 1,904,764; Apr. 18.
Ink setter and static eliminator, Combined. J. Simons. 1,903,840; Apr. 18.
Ink transfer member and making the same. G. E. Pelton. 1,904,628; Apr. 18.
Instruction for stringed musical instrument playing, Apparatus for. L. Portnoff. 1,904,928; Apr. 18.
Insulation. C. Dantsizen. 1,904,418; Apr. 18.
Insulator finishing brushing machine. D. Bettini. 1,904,608; Apr. 18.
Insulator, Section. F. L. Wolf. 1,904,844; Apr. 18.
Integrating means. E. H. Freeman. 1,904,438; Apr. 18.
Internal combustion engine. W. C. Agereil. 1,903,802; Apr. 18.
Internal combustion engine. G. P. Beaudry. 1,904,816; Apr. 18.
Internal combustion engine. W. R. Griswold. 1,903,919; Apr. 18.
Internal combustion engine. C. McLaren. 1,904,499; Apr. 18.
Internal combustion engine, Air-cooled. G. C. Cappa. 1,903,979; Apr. 18.
Internal combustion engine, Air cooled. J. B. Powers. 1,904,880; Apr. 18.
Internal combustion engine, Double acting. C. P. Clark, and C. A. Bjornsson. 1,904,854; Apr. 18.
Internal combustion engine, Radial cam type. W. J. Ferry. 1,904,680; Apr. 18.
Iron and steel and making the same, Alloy plated. B. R. Haueisen and J. C. Patten. 1,904,732; Apr. 18.
Iron ores, Treating. E. W. Wescott. 1,904,583; Apr. 18.
Iron, Soldering. L. L. Jones. 1,904,051; Apr. 18.
Iron sulphide material and making the same. J. B. Cain and S. W. Yates. 1,904,915; Apr. 18.
Jack: *See*—
Hydraulic jack. Lifting jack.
Jack post. R. G. Hamaker. 1,904,307; Apr. 18.
Jar. I. Cordy. Des. 89,630; Apr. 18.
Jewel and setting therefor. L. M. Zell. 1,904,259; Apr. 18.
Jig-saw puzzle holder. M. J. Gartland. 1,904,724; Apr. 18.
Joint: *See*—
Pipe joint.
Joint and making same, Pipe. B. R. Barder. 1,904,967; Apr. 18.
Joint for concrete roads, Expansion. A. C. Fischer. 1,903,756; Apr. 18.
Joint for members provided in a wall separating spaces of different pressures. H. G. Stintzing and E. Huber. 1,904,392; Apr. 18.
Joint for pipes. H. Kreidel. 1,904,866; Apr. 18.
Ketones from impure volatile acids, Direct manufacture of. J. G. Mauger. 1,904,495; Apr. 18.
Key case. W. R. Buxton. 1,904,354; Apr. 18.
Key for locks. J. H. Hendrix. 1,904,225; Apr. 18.
Key for piano accordions, All metal. R. Rieschick. 1,904,768; Apr. 18.
Kier. H. D. Jefferson. 1,904,921; Apr. 18.
Kite. J. Hahn. 1,904,727–8; Apr. 18.
Knife for severing molten glass, Rotary. K. E. Peller. 1,904,325; Apr. 18.
Knitting machine. J. F. Meyer. 1,904,501; Apr. 18.
Knotting mechanism. M. R. Wells and F. F. Hillix. 1,904,704; Apr. 18.
Lacquers, films, artificial masses, and the like. W. Pungs and K. Eisenmann. 1,904,528; Apr. 18.
Ladle, Ice cream. L. Myers. 1,903,791; Apr. 18.
Laminated product and producing same, Decorated. J. D. Cochrane, jr. 1,904,718; Apr. 18.
Lamp, Bed. J. L. Stetner. 1,904,121; Apr. 18.
Lamp, Flash. K. Bobayashi. 1,904,057; Apr. 18.
Lamp mechanism, Arc. A. G. Saurwein. 1,904,541; Apr. 18.
Lamp mounting for bowling alleys. A. Solum. 1,904,016; Apr. 18.
Lamps and similar articles, Method and apparatus for testing incandescent. W. L. Kubach. 1,904,059; Apr. 18.
Lantern. J. S. Pixley and M. Bender. 1,904,248; Apr. 18.
Latch for gates and the like. V. W. and C. C. Nielson. 1,904,291; Apr. 18.
Lathe. H. W. Melling. 1,904,949; Apr. 18.
Laundry machine. N. Stramaglia and T. Schillaci. 1,904,099; Apr. 18.
Layers sensitive to light, Production and application of. W. Frankenburger and G. Roessler. 1,903,783; Apr. 18.
Lead extrusion apparatus. F. L. Davis, jr. 1,904,419; Apr. 18.
Leather, Device for shrinking. J. Hitzler and F. C. J. Merz. 1,904,787; Apr. 18.
Leer. F. T. Nesbitt. 1,904,983; Apr. 18.
Leer loader. T. and D. Stenhouse. 1,903,916; Apr. 18.
Lens cutting machine. J. R. Powell. 1,904,879; Apr. 18.
Lens for light reflector signal, Glass. H. C. Reichhardt. Des. 89,670; Apr. 18.
License plate for motor vehicles. C. B. Smith. 1,904,093; Apr. 18.
Life-saving device. T. Nakamura. 1,904,767; Apr. 18.
Lifting jack. J. F. Donnelly. 1,904,279; Apr. 18.
Light: *See*—
Flash light.
Light and similar rays, Apparatus for treating. A. O. Tate. 1,904,566; Apr. 18.
Light fixture, Electric. H. W. Lawrence. 1,904,901; Apr. 18.
Lighter, Pyrophoric. A. E. Weissenburger. 1,904,299; Apr. 18.
Lighting generator. J. F. Martin. 1,904,692; Apr. 18.
Lighting unit. R. L. Huse. 1,904,643; Apr. 18.
Linings, Apparatus for and method of attaching shoe. A. H. Prenzel. 1,904,827; Apr. 18.
Liquid delivery and measuring device. E. Hurlbrink. 1,904,829; Apr. 18.
Liquid dispensing system. W. H. De Lancey. 1,904,302; Apr. 18.
Liquid heater. M. Mutrux and R. Cailliet. 1,904,511; Apr. 18.
Liquid measuring and delivering apparatus, Automatic. H. Boutillon. 1,904,610; Apr. 18.
Liquids, Apparatus for fractionating. P. E. Kuhl. 1,904,144; Apr. 18.
Loader, Power. J. L. Clarkson. 1,904,353; Apr. 18.
Lock: *See*—
Brake lock. Safe deposit lock.
Burglarproof lock. Wheel lock.
Lock. E. J. Baumé. 1,904,763; Apr. 18.
Lock. J. V. Eichel, jr. 1,904,210; Apr. 18.
Lock. A. S. Katz. 1,904,053; Apr. 18.
Lock for dispensers, Air controlled. P. S. Shield and W. H. Haupt. 1,904,550; Apr. 18.
Lock for revolving doors, Cable. B. H. Uhrich. 1,904,106; Apr. 18.
Locomotive, Railway. D. B. Worth. Des. 89,666; Apr. 18.
Loom. J. and M. Bergman. 1,904,715; Apr. 18.
Loom for weaving tufted fabric and weaving. C. E. Barrett. 1,904,939; Apr. 18.
Loud speaker. H. J. Round and J. G. Robb. 1,904,587–8; Apr. 18.
Lubricant cooler. W. L. Clouse. 1,904,412; Apr. 18.
Lubricating device, Automatic. F. Schmied. 1,904,803; Apr. 18.
Lubricating device, Constant level. K. Aoki. 1,904,601; Apr. 18.
Lubricating system and pump. J. Reid. 1,904,168; Apr. 18.
Lubrication assembly. F. W. Edwards. 1,904,295; Apr. 18.
Lubricator for internal combustion engines, Combined primer and cylinder. C. L. Stokes. 1,904,936; Apr. 18.
Machine for applying bands, stamps or the like to packets. J. Mason. 1,903,928; Apr. 18.
Machine for ascertaining the volume of loads of granular material. A. Hanique. 1,904,228; Apr. 18.
Machine for distributing material on lawns, etc. L. A. Mills. 1,903,874; Apr. 18.
Machine for filling bottles and other vessels. H. V. Nielsen. 1,904,924; Apr. 18.
Machine for forming hollow glassware. J. F. Rule. 1,904,985; Apr. 18.
Machine for forming hollow glassware. L. D. Soubier. 1,904,961; Apr. 18.
Machine for handling strip material. A. Potdevin. 1,904,878; Apr. 18.
Machine for making and inserting wire fasteners for basket covers. W. F. Newhouse. 1,904,884; Apr. 18.
Machine for making cartons. J. Van Buren. 1,903,844; Apr. 18.
Machine for making, filling, and closing bags, Combined. P. Gangler. 1,904,181; Apr. 18.
Machine for making glass stoppers and the like. J. E. Collins. 1,904,977; Apr. 18.
Machine for operating on tennis shoes. E. W. Stacey. 1,903,849; Apr. 18.
Machine for perforating slow emulsion films while they are being shown on the screen. J. M. J. Delafon. 1,904,301; Apr. 18.
Machine for printing round cans in multiple colors. M. H. Sidebotham. 1,904,332; Apr. 18.
Machine for rolling rings. F. im Schlaa. 1,904,784; Apr. 18.

Machine for slotting hooks. W. H. Nutt. 1,904,823; Apr. 18.
Machine for vacuum sealing. J. J. Williams. 1,904,842; Apr. 18.
Machine tool slide and lubricator therefor. J. R. Johnson. 1,903,965; Apr. 18.
Magazine rack. J. W. Carpenter. Des. 89,626; Apr. 18.
Magnetic bodies, Producing. L. M. Hollingsworth. 1,904,233; Apr. 18.
Magnetic valve. W. W. McLaren. 1,903,902; Apr. 18.
Magnetic switch. W. F. Hurlburt. 1,904,141; Apr. 18.
Magneto. K. A. Harmon. 1,904,506; Apr. 18.
Manifolding material. L. M. Snyder. 1,904,650; Apr. 18.
Marcelling device. M. and J. Frank. 1,904,043; Apr. 18.
Marker, Grave. H. Johnson. 1,904,732; Apr. 18.
Mask, Drinking. R. Monro. 1,903,821; Apr. 18.
Mask for moving picture screens. H. J. Vallea. 1,904,963; Apr. 18.
Mat, Engraver's. A. B. Glean. 1,903,813; Apr. 18.
Material working apparatus. R. Jongedyk. 1,904,864; Apr. 18.
Material working machine. R. J. Beavers. 1,904,848; Apr. 18.
Materials, Apparatus for screening. B. F. Roberts. 1,904,032; Apr. 18.
Meat cutter. F. H. Michaels. 1,903,789; Apr. 18.
Mechanical movement. L. Layes. 1,904,151; Apr. 18.
Mechanism for producing curved axial surface on rolls. H. A. Good. 1,904,827; Apr. 18.
Melting. A. E. Greene. 1,904,084; Apr. 18.
Menthol, Preparing pure optically inactive. K. Schöllkopf and A. Serini. 1,904,545; Apr. 18.
Merchandising and display receptacle. A. A. Matheson. 1,904,760; Apr. 18.
Metal cutting machine and control system therefor. W. F. Babcock. 1,904,975; Apr. 18.
Metal fabricating machine. J. L. Adams, jr. 1,904,913; Apr. 18.
Metal fixture for typewriter desks. M. Fox. 1,904,217; Apr. 18.
Metal members with rubber bushings, Assembling. R. H. Rosenberg. 1,904,981; Apr. 18.
Metal, Method and apparatus for extrusion of. W. Travis. 1,904,907; Apr. 18.
Metals, Apparatus for casting. H. Harris. 1,903,897; Apr. 18.
Metals, Heat treating. A. E. Bellis. 1,904,706; Apr. 18.
Meter: *See*—
Integrating meter. Orifice meter.
Milling machine. H. Ernst and L. F. Nenninger. 1,904,971; Apr. 18.
Milling machine collet. W. D. Archea. 1,904,641; Apr. 18.
Milling machinery. L. F. Nenninger. 1,904,649; Apr. 18.
Minerals by flotation, Concentration of. R. W. Hess. 1,904,461; Apr. 18.
Minerals, Flotation of. R. W. Hess and J. M. F. Leaper. 1,904,462; Apr. 18.
Mining drill. L. J. Fellay. 1,904,657; Apr. 18.
Mixing device. G. E. Cook. 1,904,758; Apr. 18.
Molded articles, Forming. J. J. Zelenka. 1,904,845; Apr. 18.
Molding apparatus, Centrifugal. H. M. Naugle and A. J. Townsend. 1,903,906; Apr. 18.
Molding machine. F. V. Johnson, E. D. Hanson, and D. V. Waters. 1,904,220; Apr. 18.
Molding powder and method of molding. M. Landecker. 1,904,243; Apr. 18.
Molten materials, Method of and apparatus for preparing and handling. H. F. Carter. 1,904,853; Apr. 18.
Motor driving spirits, Production of. H. Kafer. 1,904,830; Apr. 18.
Mounting, Bearing. P. G. Palmgren. 1,904,247; Apr. 18.
Mounting, Bearing. G. Wistrand. 1,904,258; Apr. 18.
Mounting, Shaft. N. Skillman. 1,904,769; Apr. 18.
Mower, Gang. C. G. Kruckemeyer. 1,904,376; Apr. 18.
Mower, Lawn. T. J. Edwards. 1,904,236; Apr. 18.
Mowing machines, Seed gatherer for. C. King. 1,903,769; Apr. 18.
Multiple disk clutch. G. W. Emrick. 1,903,963; Apr. 18.
Multiplier, Reversing. W. M. Wattie and K. S. Whitten. 1,904,338; Apr. 18.
Nailing machine. H. W. Morgan. 1,904,507; Apr. 18.
Navigator, Aerial. W. A. Meador. 1,903,911; Apr. 18.
Nebuliser of liquids. A. W. Morse. 1,904,509; Apr. 18.
Necktie and collar holder. G. A. Priestnon. 1,904,063; Apr. 18.
Needle securing device for talking machines. A. M. B. Charlin. 1,904,408; Apr. 18.
Nest, Fowl. H. H. and C. L. Wagner. 1,904,809; Apr. 18.
Newspaper box. W. E. Hampden and G. W. Hagle. 1,904,448; Apr. 18.
Nipple. I. Barkan. 1,904,710; Apr. 18.
Nitrites, Production of. S. L. Handforth. 1,903,815; Apr. 18.
Nitro compound by means of a metal, Reducing a. C. C. Heritage. 1,904,047; Apr. 18.
Nomic Cement gun. J. T. Wawter. 1,904,990; Apr. 18.
Nut and manufacture, Lock. E. L. Rupf. 1,904,021–2; Apr. 18.
Nut and washer assembly. J. Berge. 1,904,263; Apr. 18.
Oil and making the same, Hydrocarbon. H. G. M. Fischer and C. B. Gustafson. 1,904,433; Apr. 18.
Oil, Apparatus for refining. C. B. Forward. 1,903,810; Apr. 18.
Oil burner. B. A. Clayton. 1,903,858; Apr. 18.
Oil burner. S. Scognamillo and D. Shlaifer. 1,904,540; Apr. 18.
Oil cooling arrangement for air-cooled internal combustion engines. G. C. Cappa. 1,904,407; Apr. 18.
Oil, Lubricating. K. G. Mackenzie. 1,904,065; Apr. 18.
Oil, Method and apparatus for distilling. C. R. Boving and T. Montgomery. 1,904,213; Apr. 18.
Oil pump. E. H. Davis and W. F. Johnston. 1,904,656; Apr. 18.
Oils, Decolorizing. I. K. Fuller. 1,904,682; Apr. 18.
Oils from solid residues, Separation of. M. Pier and K. Winkler. 1,904,521; Apr. 18.
Oils, Refining of hydrocarbon. J. C. Morrell. 1,904,381; Apr. 18.
Oils, Treating. A. A. Wells. 1,904,183; Apr. 18.
Oils, Treatment of hydrocarbon. E. R. Birkenmyr. 1,904,402; Apr. 18.
Oils shell. M. Alex. Des. 89,667; Apr. 18.
Opener, Can. O. F. Demers. 1,903,984; Apr. 18.
Operator for counterbalanced elevator doors. R. S. Poelle. 1,904,069; Apr. 18.
Operator indicator for busy lines at central offices, Automatic. W. B. Blanton. 1,904,295; Apr. 18.
Optical polygraph. E. Blum. 1,903,890; Apr. 18.
Orange juice extractor. E. S. Preston. Des. 89,652; Apr. 18.
Ores by flotation, Concentration of. F. G. Moses, R. W. Hess, and R. L. Perkins. 1,904,460; Apr. 18.
Organic products, Production of valuable. C. Krauch, M. Pier, and E. Anthes. 1,904,477; Apr. 18.
Orifice meter. E. S. Smith, jr. 1,904,333; Apr. 18.
Outlet control for liquid containers. L. Lavoie. 1,904,793; Apr. 18.
Oven, Coke. P. E. Verpeaux. 1,904,018; Apr. 18.
Oven, Cooking retort. J. Becker. 1,904,191; Apr. 18.
Oven operation, By-product coke. S. P. Miller. 1,904,161; Apr. 18.
Oven, Regenerative coke. C. Otto. 1,904,516; Apr. 18.
Package holder. C. E. Berg. 1,904,193; Apr. 18.
Packages for cigarettes. W. E. Molins and J. W. Chalmers. 1,903,873; Apr. 18.
Packing machinery. R. Clarkson. 1,903,959; Apr. 18.
Pad or similar article, Heating. W. W. De Laney. Des. 89,612; Apr. 18.
Pads, Manufacture of resilient. C. Field and C. L. Campbell. 1,904,026; Apr. 18.
Padlock, Permutation. W. Trewhella. 1,903,885; Apr. 18.
Pan, Frying. G. W. Perks. 1,904,925; Apr. 18.
Panties. M. C. Hennessy. 1,904,228; Apr. 18.
Paper and making same, Air-porous. F. Riebel, jr. Re18,797; Apr. 18.
Paper, Apparatus for developing sensitized. B. P. Smith. 1,904,551; Apr. 18.
Paper, Apparatus for edge rolling of crepe. C. A. Friberg. 1,904,825; Apr. 18.
Paper flower box. J. F. Nelson and L. Hodge. 1,904,072; Apr. 18.
Paper making process. E. C. Schacht. 1,904,087; Apr. 18.
Paper manufacture. H. E. Rafton. 1,904,251; Apr. 18.
Paper product and making same. W. C. Lodge. 1,903,767; Apr. 18.
Paraffin from nonsweated paraffin and the like substances, Process and apparatus for the manufacture of sweated. R. Meijer. 1,903,929; Apr. 18.
Pasteboard box. G. D'Annunzio. 1,904,125; Apr. 18.
Pastry confection. G. H. Crawford. Des. 89,611; Apr. 18.
Pattern control mechanism. G. C. Means. 1,904,066; Apr. 18.
Pen cap and ink guard, Fountain. S. M. Sager. 1,904,014; Apr. 18.
Pen clip, Fountain. H. Esterow. 1,904,212; Apr. 18.
Pen, Drafting. H. Frank. 1,903,965; Apr. 18.
Pen, Fountain. A. O. Dahlberg. 1,904,358; Apr. 18.
Pen, Fountain. A. Jahn. 1,904,660; Apr. 18.
Pencil display rack. F. H. McGehee. 1,904,067; Apr. 18.
Pencil or sharp pencil, Double-color mechanical. T. Yamashita. 1,903,800; Apr. 18.
Perfume or cosmetic, Procedure in the production of a. H. Eisner and H. Vollmer. 1,904,211; Apr. 18.
Photographs and cinematographic records in natural colors, Exposure and copying of. P. S. E. Anderson. 1,904,660; Apr. 18.
Picker for fly shuttle looms. A. Kullman. 1,904,816; Apr. 18.
Picture screen, Moving. F. H. Lynds. 1,904,672; Apr. 18.
Pillar or post standing in the street traffic. F. Meister and J. Maul. 1,903,869; Apr. 18.
Piloting system. J. A. Willoughby. 1,903,846; Apr. 18.
Pipe. B. S. Boyer. 1,904,675; Apr. 18.
Pipe, building tile, etc., for railway shipment, Loading of sewer. I. H. Spoor. 1,903,941; Apr. 18.
Pipe cleaning device. R. Smith. 1,903,915; Apr. 18.
Pipe facing tool. W. M. Nechermann. 1,904,050; Apr. 18.
Pipe fitting. E. H. Kocher. 1,903,819; Apr. 18.
Pipe hanger. P. N. Kenway. 1,904,315; Apr. 18.
Pipe holder. A. Burr. 1,904,779; Apr. 18.
Pipe joint. L. J. Robins. 1,903,833; Apr. 18.
Pipeline booster system. D. B. Marples. 1,904,830; Apr. 18.

Pipe line, Screener equipped. B. S. Burrell. 1,903,774; Apr. 18.
Pipe, Method and apparatus for molding concrete. C. M. Snyder. 1,904,094; Apr. 18.
Pipe-trap cover. H. S. Wright. 1,904,340; Apr. 18.
Pipes or cables, Apparatus for laying drain. H. Sack. 1,904,666; Apr. 18.
Piston. J. S. Donaldson. 1,904,126; Apr. 18.
Piston. P. M. Freer. 1,904,305; Apr. 18.
Piston ring. C. W. Clark. 1,904,410; Apr. 18.
Planter, Seed. C. T. Ray. 1,903,836; Apr. 18.
Plastering support. J. O. Oliver. 1,904,245; Apr. 18.
Plastic composition. D. M. Gray. 1,904,445; Apr. 18.
Plastic mass and making same. M. Landecker. 1,904,244; Apr. 18.
Plate, Dentist's mixing. C. J. McCann. 1,904,766; Apr. 18.
Plug: *See*—
Attachment plug.
Plug connecter, Quick break. H. L. Strongson. 1,904,889; Apr. 18.
Plunger pump. C. I. Longenecker. 1,904,486; Apr. 18.
Pocket for pot holder. M. Caplan. Des. 89,627; Apr. 18.
Pocket receptacle, Flexible. W. R. Buxton. 1,904,353; Apr. 18.
Pole with reenforcing pipes, Metal. E. W. Riemenschneider. 1,903,907; Apr. 18.
Polishing apparatus, specially for knives, forks, and spoons. Robert Ern. 1,904,282; Apr. 18.
Positive-action clutch. R. W. Strout. 1,904,563; Apr. 18.
Post: *See*—
Drill post. Jack post.
Postage meter machines, Preventing taking of fraudulent impressions from. W. H. Wheeler and J. W. Ogden. 1,904,638; Apr. 18.
Poster support. W. R. Johns. 1,903,766; Apr. 18.
Powder, Apparatus for making bleaching. E. T. Ladd. 1,904,478; Apr. 18.
Powder distributing machine. L. Wilson. 1,904,591; Apr. 18.
Power press control. A. A. Byerlein. 1,904,676; Apr. 18.
Power transmission. S. S. Rathbun. 1,904,530; Apr. 18.
Power transmission. A. G. Rayburn. 1,904,011; Apr. 18.
Power transmission mechanism, Variable speed. F. A. Hayes. 1,904,046; Apr. 18.
Power transmitter, Hydraulic. G. Bauer and J. N. Kiep. 1,904,606; Apr. 18.
Preparation of a product containing all opium alkaloids. T. B. Aagaard, B. Samdahl, and F. P. Hopstock. 1,903,770; Apr. 18.
Press: *See*—
Printing press.
Pressure and flow control device for combustion indicators. G. R. Blodgett. 1,904,819; Apr. 18.
Print drier. H. H. Sullivan. 1,904,564; Apr. 18.
Printer's quoin. C. J. Vion. 1,904,581; Apr. 18.
Printer's register hook. W. F. Brügmann. 1,903,804; Apr. 18.
Printing attachment for bag making machines. T. M. Avery and W. M. Seitzinger. 1,904,709; Apr. 18.
Printing machines, web renewing mechanism for. J. R. Tomlin. 1,904,571; Apr. 18.
Printing press, Bed and cylinder. C. B. Cottrell, 3d. 1,904,855–6; Apr. 18.
Prism carrier for projection machines. W. A. Kosken. 1,803,820; Apr. 18.
Propeller. S. Heath. 1,904,733; Apr. 18.
Propeller. J. P. Rodriques. 1,904,752; Apr. 18.
Propeller balance. N. V. Johnson. 1,903,817; Apr. 18.
Protective device. F. Gray. 1,903,996; Apr. 18.
Protective device. J. D. Tebo. 1,904,569; Apr. 18.
Protective layer on photographic films. M. Hagedorn. 1,904,221; Apr. 18.
Protector for a nursing bottle and nipple thereof. J. Schneiderman. Des. 89,654; Apr. 18.
Protector for plants. Z. Starks. 1,904,700; Apr. 18.
Pulley and mounting therefor. W. F. Richards. 1,904,535; Apr. 18.
Pump: *See*—
Hydraulic pump. Plunger pump.
Oil pump.
Pump. C. D. Fagan and R. W. Swank. 1,904,284; Apr. 18.
Pump mechanism. H. A. Palmer. 1,904,799; Apr. 18.
Pumping apparatus, Hydroturbine. H. L. Nash. 1,904,321; Apr. 18.
Punch. P. Peterson. 1,904,951; Apr. 18.
Push drill. T. J. Fegley and G. O. Leopold. 1,904,679; Apr. 18.
Quenching machine. H. B. Scott and R. E. McCoy. 1,904,986; Apr. 18.
Rack: *See*—
Broom rack. Fire hose rack.
Display rack. Pencil display rack.
Radiator. J. D. Soehner. 1,904,555; Apr. 18.
Radiator filling and draining device. W. J. Smith. 1,904,753; Apr. 18.
Radio apparatus. H. A. Anderson. 1,904,668; Apr. 18.
Radiocabinet. O. Ciccarelli. Des. 89,628; Apr. 18.
Radio circuit. E. G. Parvin. 1,904,877; Apr. 18.
Radio circuit. A. F. P. Stenzy. 1,904,839; Apr. 18.
Radio circuits of sparking in the ignition system of an internal combustion engine, Eliminating the effects on. A. A. Leonard. 1,904,149; Apr. 18.
Radio ground. C. J. Aanenson. 1,904,773; Apr. 18.
Radio signaling system. A. H. Taylor. 1,904,772; Apr. 18.
Radio station selector. H. V. Grimes. 1,904,219; Apr. 18.
Rake. C. H. Dennis. 1,904,860; Apr. 18.
Rake. W. Withington. 1,904,848; Apr. 18.
Ratchet device. A. J. Kounovsky. 1,904,621; Apr. 18.
Ratchet guide and support. H. T. Eisele. 1,903,781; Apr. 18.
Rayon, Manufacture of. G. R. Lockhart. 1,904,377; Apr. 18.
Razor blades, Device for drying. W. H. Löwenstein. 1,904,661; Apr. 18.
Receptacle: *See*—
Collapsible receptacle. Pocket receptacle.
Merchandising and display receptacle.
Record strip for sound reproducing machines. J. G. M. Herklots. 1,904,944; Apr. 18.
Recorder for traffic signal systems. E. D. Stirlen. 1,904,562; Apr. 18.
Recording apparatus. C. de Beaumarchais. 1,904,719; Apr. 18.
Recording apparatus, Electric automatic. J. G. Garrity and E. L. McCarthy. 1,904,783; Apr. 18.
Rectifier. S. S. Smith. 1,904,834; Apr. 18.
Rectifier. C. Hambuechen. 1,904,447; Apr. 18.
Rectifier, Dry. J. H. de Boer, W. C. Van Geel, and H. Emmens. 1,904,276; Apr. 18.
Reduction furnace. J. D. Morgan. 1,904,508; Apr. 18.
Reel: *See*—
Fishline reel. Wire reel.
Reel. C. Field. 1,904,027; Apr. 18.
Reel and assembling reels. L. R. McGuire. 1,904,158; Apr. 18.
Reeling device. F. A. Hoyt. 1,904,000; Apr. 18.
Reels, Device for handling. G. A. Seeley. 1,904,255; Apr. 18.
Refrigerating apparatus. E. E. Allyne. 1,904,597; Apr. 18.
Refrigerating apparatus. H. B. Hull. 1,904,960; Apr. 18.
Refrigerating apparatus. E. B. Mallory. 1,903,825–7; Apr. 18.
Refrigerating machine. C. Steenstrup. 1,904,559; Apr. 18.
Refrigerating machine. C. Steenstrup. 1,904,561; Apr. 18.
Refrigerating mechanism. A. J. Asmussen. 1,903,848; Apr. 18.
Refrigerating plant. R. and H. Bernat. 1,904,817; Apr. 18.
Refrigeration. C. G. Munters. 1,903,934; Apr. 18.
Refrigeration. M. Wexler. 1,904,590; Apr. 18.
Refrigeration apparatus. L. K. Wright. 1,904,024; Apr. 18.
Refrigerator evaporator. C. Steenstrup. 1,904,560; Apr. 18.
Regenerative chamber. W. J. Irwin. 1,904,237; Apr. 18.
Register, Cash. F. W. F. Berger. 1,904,976; Apr. 18.
Register, Cash. E. J. Von Pein. 1,904,964; Apr. 18.
Register for typewriters, Word counting. A. E. Oswald. 1,904,515; Apr. 18.
Regulating system. W. H. T. Holden and R. P. Jutson. 1,903,999; Apr. 18.
Regulator: *See*—
Electrical regulator. Flow regulator.
Feed water regulator.
Relay system. R. G. Richardson. 1,904,929; Apr. 18.
Residence panel board. C. E. Hanny. 1,904,186; Apr. 18.
Resinous composition. L. V. Adams. 1,904,595; Apr. 18.
Resins containing an earth alkaline metal base, Making phenol-formaldehyde. C. Ellis. 1,903,809; Apr. 18.
Resistance unit. C. L. Lyon and C. A. Jagger. 1,904,487; Apr. 18.
Retarder for use in rubber vulcanisation process. R. L. Sibley. 1,904,934; Apr. 18.
Ridging implement on rotary tilling machines. P. R. Hasson and E. D. Ellis. 1,904,138; Apr. 18.
Ridging implement on tilling machines. C. H. Fowler. 1,903,991; Apr. 18.
Ring: *See*—
Piston ring.
Ring or the like, Finger. H. W. Peters. 1,904,074; Apr. 18.

Roller: *See*—
Bearing roller.
Roller, particularly for use in textile machinery. H. McGhee. 1,904,496; Apr. 18.
Rolling stock. R. T. Glascoline. 1,903,859; Apr. 18.
Rolls for rolling mills and the like, Apparatus for machining. H. Schimmel. 1,904,802; Apr. 18.
Röntgenological reproduction. H. F. Kurtz. 1,904,867; Apr. 18.
Roofing. D. B. Humphrey. Des. 89,639; Apr. 18.
Roofing, partitions, and the like, Construction of. H. L. Plummer and D. L. Irwin. 1,904,080; Apr. 18.
Rosin, Producing high grade. A. R. Hitch. 1,904,464; Apr. 18.
Rotary cutter. L. Skeel. 1,904,632; Apr. 18.

Rubber to metal and other hard materials, Applying. A. J. Michelin. 1,904,502; Apr. 18.
Rubber, Vulcanization of. W. F. Tuley. 1,904,573; Apr. 18.
Rule, Slide. A. W. Keufel. 1,904,474; Apr. 18.
Runner and shoe, Reversible and quick-changing. W. J. Chapman. 1,904,201; Apr. 18.
Safe deposit lock. W. P. Mosely. 1,904,283; Apr. 18.
Safety attachment for moving picture apparatus. A. Szeliga, Inc. 1,904,807; Apr. 18.
Safety device. B. F. Singer and J. J. Ehemann. 1,904,015; Apr. 18.
Safety drawoff apparatus for hot water systems. E. H. Ruppert. 1,904,907; Apr. 18.
Safety switch, Flash light. G. B. Pratt. 1,903,940; Apr. 18.
Safety switch, Flash-light. F. G. Stimson. 1,903,947; Apr. 18.
Saline content of boiler waters, Control of the. H. Kreigsheim. 1,904,900; Apr. 18.
Salt and pepper shaker. C. G. Watson. 1,904,757; Apr. 18.
Sanitary well top. W. C. H. Peters. 1,904,926; Apr. 18.
Sash holder and window construction, Window. R. T. Axe. 1,904,602; Apr. 18.
Scaffold, Adjustable folding. C. Vanhorn. 1,904,808; Apr. 18.
Scale. H. M. Cameron. 1,903,955; Apr. 18.
Scale, Automatic weight indicating. H. C. Schaper. 1,904,542; Apr. 18.
Scale, Electric automatic recording. J. G. Garrity and E. L. McCarthy. 1,904,784; Apr. 18.
Scale, Measuring. H. M. and G. C. Hoskin. 1,904,284; Apr. 18.
Scale, Weighing. C. E. Breaden. 1,904,614; Apr. 18.
Scissors, Surgical claw. H. B. Balthaser. 1,904,399; Apr. 18.
Scraper. W. Potter. 1,903,877; Apr. 18.
Screen: *See*—
Fly screen. Picture screen.
Sealing device for closed containers. F. M. Shoop. 1,904,091; Apr. 18.
Sealing means, Automatic pressure. H. H. Purvis. 1,904,250; Apr. 18.
Seam. C. W. Mueller. 1,903,933; Apr. 18.
Seams, Method of and apparatus for sewing. L. L. Almond, R. Herrington, and F. A. Matthews. 1,904,398; Apr. 18.
See-saw and merry-go-round, Combined. F. M. Jacob. 1,904,687; Apr. 18.
Selenium cells, Making. W. Henkel and F. Meyer. 1,904,189; Apr. 18.
Self-cleaning fish gate. J. P. Doyle. 1,903,754; Apr. 18.
Separable fastener. P. E. Fenton. 1,904,722; Apr. 18.
Setting and locking mechanism for printing devices of postage meters. J. W. Ogden and B. Knauer. 1,904,626; Apr. 18.
7.7-dichloro flavanthrone and making same. I. Gubelmann. 1,904,367; Apr. 18.
Sewage and other impure liquid purification, Activated sludge process of. J. A. Coombs. 1,904,916; Apr. 18.
Sewage, Treating. G. Ornstein. 1,904,246; Apr. 18.
Sewing machines, Feeding mechanism for. N. E. Hanson. 1,903,762; Apr. 18.
Shade, Lamp. E. Schwarz. Des. 89,655; Apr. 18.
Shade supporting device, Lamp. W. N. de Sherbinin. 1,903,965; Apr. 18.
Shaft coupling. W. Craik. 1,903,982; Apr. 18.
Shaft for golf clubs, Two-piece metal. M. B. Reach. 1,904,750; Apr. 18.
Shaker or the like, Cocktail. L. W. Rice. Des. 89,653; Apr. 18.
Sharpener, Scissors. A. J. Petrich. 1,904,075; Apr. 18.
Shaving cup. H. Schnyder. 1,903,882; Apr. 18.
Sheet separator for paper feeding machines. F. L. Cross. 1,904,416; Apr. 18.
Shelving construction. A. S. Katz. 1,904,052; Apr. 18.
Shield for ignition coils. B. R. King. 1,903,784; Apr. 18.
Shield for suspended wearing apparel. M. H. Sidebotham. 1,904,062; Apr. 18.
Shirt pressing machine with laterally movable head. E. Davis. 1,904,858; Apr. 18.
Shock absorber. C. H. Chapin. 1,904,040; Apr. 18.
Shock absorber, Pneumatic. P. W. Kane. 1,904,372; Apr. 18.
Shock absorbing mechanism, Friction. W. H. Miner. 1,904,379; Apr. 18.
Shockproof mounting for a high power frequency amplifier system. L. A. Gebhard and C. F. Rudolph. 1,903,812; Apr. 18.
Shoe. F. Grubs. Des. 89,615; Apr. 18.
Shoe and making the same. S. Rinso. 1,904,085; Apr. 18.
Shoe tip and heel pressing machine. H. R. Polleys. 1,904,166; Apr. 18.
Shoe uppers in lasted position, Holding. J. Fausse. 1,904,503; Apr. 18.
Shoes, Tap plate for dancing. J. Selva. 1,904,886; Apr. 18.
Sign: *See*—
Animated and changeable sign.
Sign. R. E. Barclay. 1,904,347; Apr. 18.
Sign. M. B. Benson. 1,904,192; Apr. 18.
Sign. J. Boyce. 1,904,860; Apr. 18.
Signal and trouble-finder. H. E. Cannon. 1,904,800; Apr. 18.
Signal switch, Automatic direction. A. Thompson. 1,904,806; Apr. 18.
Signaling instrument. C. J. Henschel. Des. 89,616; Apr. 18.
Signaling system and apparatus therefor. S. Morton, H. L. Krum, and H. B. Kleinschmidt. 1,904,104; Apr. 18.
Signaling system, Carrier wave. J. W. Schmied 1,904,544; Apr. 18.
Signals, Arrangement for transmitting wireless. M. J. O. Strutt and P. R. Dikkerbuis. 1,904,174; Apr. 18.
Silk or materials containing an organic cellulose ether or ester, Printing acetate. O. Bally. 1,904,818; Apr. 18.
Silo or the like, Portable. P. Rutten. 1,904,932; Apr. 18.
Sinks, Steam deflector and guard for dairy. J. F. Malabary. 1,904,743; Apr. 18.
Skate, Ice. O. Charette. 1,904,270; Apr. 18.
Sled. C. Z. Miller. 1,903,930; Apr. 18.
Slicer. V. Vath. 1,904,840; Apr. 18.

Tools, Stock guide means for machine. C. A. Rich. 1,904,329; Apr. 18.
Torch, Welding. H. W. Tobey and H. V. May. 1,904,104; Apr. 18.
Torque control and automatic drill control. W. L. Hawk. 1,904,765; Apr. 18.
Torsion pendulum. J. L. Reutter. 1,904,169; Apr. 18.
Toy. J. P. Buckley. 1,903,905; Apr. 18.
Toy. J. Kersten. 1,904,628; Apr. 18.
Tractor. W. S. Hosmer. 1,903,968; Apr. 18.
Tractor power coupling mechanism. E. Knapp and C. G. Allgrunn. 1,904,832; Apr. 18.
Train control, Automatic. D. H. Schweyer. 1,904,804; Apr. 18.
Transfer mechanism. S. W. Mathias. 1,904,493; Apr. 18.
Transmission control. D. Mitchell. 1,903,875; Apr. 18.
Transmission mechanism, Hydraulic. G. E. Zahn. 1,904,811; Apr. 18.
Trap: *See*—
Air-lift trap. Steam trap.
Animal trap.
Traveler for kite strings. H. D. Aue. 1,904,938; Apr. 18.
Tray or the like, Ash. I. Florman. Des. 89,633; Apr. 18.
Tray, Serving and washing. J. P. Cavano and G. Vondicakis. 1,904,969; Apr. 18.
Trays for card tables, Ash. J. S. Goldman. 1,903,994; Apr. 18.
Trim panels, Securing. B. C. Place. 1,904,076–7; Apr. 18.
Trimmer, Hedge. C. Sohn. 1,904,390; Apr. 18.
Truck control, Delivery. J. H. Butler. 1,903,977; Apr. 18.
Truck, Industrial. E. H. Remde. 1,904,984; Apr. 18.
Truck, Motor driven tank. H. W. Kiser. Des. 89,642; Apr. 18.
Tube: *See*—
Discharge tube. Thermionic tube.
Electric discharge tube.
Tube furnace, Revolving. H. Schultze. 1,904,548; Apr. 18.
Tubes, Making multibore. R. E. Barclay. 1,904,348; Apr. 18.
Tubes of celluloid and the like, Manufacture of tapered. S. A. Neidich. 1,904,290; Apr. 18.
Tufting machine attachment. L. A. Smith. 1,903,946; Apr. 18.
Tumbler or similar article. R. C. Diebenkorn. Des. 89,614; Apr. 18.
Tungsten filament and making it, Nonsag helical. J. A. M. Van Liempt and W. Geiss. 1,904,105; Apr. 18.
Tuning fork generator. A. L. Matte. 1,904,494; Apr. 18.
Tunneling equipment. D. Lacaprara and K. E. Ketchum. 1,903,866; Apr. 18.
Turbine, Elastic fluid. R. G. Standerwick. 1,904,557; Apr. 18.
Turntable for phonographs. R. F. Mallina. 1,904,490; Apr. 18.
2.4-di-(nitrophenyl)-6-halogen-1.3.5-triazines and making the same. W. Hentrich and J. Hilger. 1,904,229; Apr. 18.
Type bar machine. H. J. Megley. 1,903,829; Apr. 18.
Type casting machines, Feeding device for. J. L. Ewing and R. R. Tobias. 1,903,904; Apr. 18.
Typewriter. A. Pateman. 1,904,518; Apr. 18.
Typewriters, Reproducing pneumatic operator for. S. A. Swanson. 1,904,633; Apr. 18.
Umbrella holder. H. J. Mott. 1,904,510; Apr. 18.
Unloader mechanism for elevators, Selective. S. Olson. 1,903,885; Apr. 18.
Vacuum cleaner. F. Lehmann. 1,903,867; Apr. 18.
Vacuum cleaner brush guard and adjusting roll assembly. L. W. Richardson and A. D. Wassall. 1,903,793; Apr. 18.
Vacuum cleaner, Electrical. A. Townsend. 1,903,855; Apr. 18.
Valuable materials from spent catalysts, Recovering. T. N. Watts. 1,904,582; Apr. 18.
Valve: *See*—
Dispatch system valve. Flush valve.
Float valve. Magnetic valve.
Fluid control valve.
Valve. K. Karnath. 1,904,467; Apr. 18.
Valve control mechanism. F. Kissing. 1,904,475; Apr. 18.
Valve cooling device. W. Baden. 1,904,669; Apr. 18.
Valves for explosion engines, Making. A. Ferrando and A. Zanzi. 1,904,490; Apr. 18.
Vapor fractionation, Apparatus for. J. C. Morrell and J. G. Alther. 1,904,880; Apr. 18.
Variable condenser. E. Mullner. 1,904,165; Apr. 18.
Vehicle, Automotive. W. E. Boyette. 1,904,611; Apr. 18.
Vehicle body. E. H. Reeves. 1,904,031; Apr. 18.
Vehicle bodies, Rear end construction for. F. E. Watts. 1,904,841; Apr. 18.
Vehicle control mechanism. V. G. Apple and W. H. Petit. 1,904,948; Apr. 18.
Vehicle lifting device. La F. Myers and C. S. Preston. 1,904,698; Apr. 18.
Vehicle suspension device. L. Granges. 1,903,966; Apr. 18.
Ventilating system. G. de Bothezat. 1,903,983; Apr. 18.
Ventilator. E. H. Ellison. 1,904,654; Apr. 18.
Ventilator and sash fastener, Combined window. A. G. Eyring. 1,903,782; Apr. 18.
Vise. J. S. Nurnberger. 1,904,798; Apr. 18.
Visor, Windshield. P. Miller. 1,904,069; Apr. 18.
Vitamin D, Preparing. E. H. Reerink and A. Van Wijk. 1,904,751; Apr. 18.
Wall outlet and fitting. J. N. Nielsen. 1,903,833; Apr. 18.
Wall structure and building block used therein. O. Sander and K. König. 1,903,881; Apr. 18.
Walls, Tubular fluid-cooled. A. E. Weingartner. 1,904,182; Apr. 18.
Washtub. J. L. Arit. 1,903,908; Apr. 18.
Washtub. F. M. Vogan. Des. 89,664; Apr. 18.
Washer: *See*—
Adjustable washer. Book stock washer.
Washers, Manufacturing lock. N. E. Lillig. 1,903,765; Apr. 18.
Washing machine. A. O. Engberg and E. Ahnström. 1,903,987; Apr. 18.
Waste eliminator for ice cream cabinets. J. A. Jansen. 1,903,910; Apr. 18.
Water control apparatus. T. A. Peebles. 1,904,324; Apr. 18.
Water cooler, Refrigerator. S. H. Flannagan. 1,904,782; Apr. 18.
Water heating plant, Feed. S. O. A. Fiedler. 1,904,481; Apr. 18.
Waterproofing composition. D. F. Twiss and W. G. Gorham. 1,904,576; Apr. 18.
Water, Purifying and sterilising. R. Adler. 1,903,889; Apr. 18.
Water softener. T. B. Clark. 1,903,958; Apr. 18.
Water softening system and controlling operation thereof. T. B. Clark. 1,903,957; Apr. 18.
Weather-proofing structure for doors. D. H. Haraly. 1,904,368; Apr. 18.
Weather strip. J. Manhan. 1,904,491; Apr. 18.
Web controlling mechanism. K. G. Laycock. 1,904,870; Apr. 18.
Web supplying and controlling mechanism. C. J. Richter. 1,904,636; Apr. 18.
Web tensioning means. C. A. Dickhaut. 1,904,420; Apr. 18.
Weighing and filling machine. R. N. Cundall. 1,904,652; Apr. 18.
Weights, Positioning means for poise. W. Gumprich. 1,904,446; Apr. 18.
Welding and apparatus therefor, Method of. J. L. Anderson. 1,904,599; Apr. 18.
Welding, Automatic arc. S. Sandelowsky. 1,904,086; Apr. 18.
Welding machines, Device for the control of electric arc. J. Achard. 1,904,112; Apr. 18.
Welding metal tubing, Electrically. H. F. McLoughlin. 1,904,834; Apr. 18.
Welding rod and making the same. W. A. Wissler. 1,903,952; Apr. 18.
Wells, Apparatus for drilling. H. A. Pippin. 1,904,522; Apr. 18.
Welt, Finishing. R. C. Schemmel. 1,904,543; Apr. 18.
Wheel: *See*—
Bucket wheel.
Wheel dresser. G. F. Taylor. 1,904,100; Apr. 18.
Wheel for automobiles, Auxiliary. H. D. Pratt. 1,904,061; Apr. 18.
Wheel lock, Demountable. A. C. Hynan. 1,904,371; Apr. 18.
Wheels, Making tension. J. L. Hecht. 1,904,458; Apr. 18.
Winding machine. N. Gribojedoff. 1,904,726; Apr. 18.
Winding mechanism. J. Clayton. 1,904,411; Apr. 18.
Window construction. P. Willmann. 1,904,110; Apr. 18.
Window hinge, Reversible. S. H. Brewer. 1,904,717; Apr. 18.
Window screen, Automobile. L. L. Bredin. 1,904,968; Apr. 18.
Wing lift system for aircraft. B. G. Jutting. 1,903,818; Apr. 18.
Wire drawing apparatus. C. R. Hoffman. 1,904,232; Apr. 18.

Wire drawing apparatus. E. W. Larsen. 1,904,146; Apr. 18.
Wire drawing machine. E. W. Larsen. 1,904,147; Apr. 18.
Wire drawing machine. J. T. Leech. 1,904,047; Apr. 18.
Wire drawing machine. R. J. McIlvried. 1,904,159; Apr. 18.
Wire drawing mechanism. A. T. Yungman. 1,904,965; Apr. 18.
Wire feed device. J. L. Anderson. 1,903,953; Apr. 18.
Wire reel. E. M. Harris. 1,904,286; Apr. 18.
Wire, Smoothing stock on fourdrinier. A. R. Cofrin. 1,904,780; Apr. 18.
Wood filler and related materials. P. S. Kennedy. 1,903,768; Apr. 18.
Workbench. W. A. Adams. 1,904,708; Apr. 18.
Work holding mechanism. J. E. Lovely. 1,904,152; Apr. 18.
Wreath and making same. D. J. Kelman. 1,904,470; Apr. 18.
Yielding coupling. E. B. Nowosielski. 1,904,745; Apr. 18.

CLASSIFICATION OF PATENTS

ISSUED APRIL 18, 1933

NOTE.—First number—class, second number—subclass, third number—patent number

1— 1: 1,904,807
1A: 1,904,313
1A.2: 1,904,314
2— 63: 1,904,044
132: 1,904,909
199: 1,904,103
234: 1,904,233
4— 57: 1,904,809
5— 57: 1,903,918
90: 1,903,901
6— 2: 1,903,238
5: 1,903,570
1,903,571
1,903,594
1,904,515
17: 1,904,127
18: 1,904,921
9— 17: 1,904,767
10— 88: 1,903,788
1,903,922
100: 1,903,796
135: 1,904,275
139: 1,904,883
166: 1,904,486
12— 1: 1,903,849
1,904,106
27: 1,904,415
42: 1,904,223
47: 1,904,249
107: 1,904,303
142: 1,904,085
1,904,767
1,904,861
13— 2: 1,904,833
1,904,888
26: 1,904,664
1,904,666
34: 1,904,664
15— 8: 1,903,867
8: 1,903,720
1,903,794
1,904,972
16: 1,904,973
1,904,974

Soap. Kresge Department Store Corp. 302,587; Apr. 25; Serial No. 327,060; published Feb. 14, 1933.
Soaps. Baltz & Koerper. 302,575; Apr. 25; Serial No. 329,725; published Feb. 14, 1933.
Soaps, Hand. Quality Soap Manufacturing Company. 302,576; Apr. 25; Serial No. 329,719; published Feb. 7, 1933.
Washing compounds. Fermax Products Co. 302,781; Apr. 25; Serial No. 333,285; published Feb. 14, 1933.

CLASS 5

Liquid preparation. Air-Way Electric Appliance Corporation. 302,699; Apr. 25; Serial No. 333,376; published Feb. 7, 1933.
Paste, Corn-product adhesive. American Hominy Company. 90,619; renewed Mar. 11, 1933.
Solder or cement. J. C. De Mille. 302,780; Apr. 25; Serial No. 333,028; published Feb. 7, 1933.

CLASS 6

Chemical composition. Robert J. King Company. 302,768; Apr. 25; Serial No. 333,191; published Feb. 14, 1933.
Chemical composition. Robert J. King Company. 302,766; Apr. 25; Serial No. 333,190; published Feb. 14, 1933.
Chemical or biological reagent. Farbwerke vorm. Meister Lucius & Brüning. 91,764; renewed May 27, 1933.
Chemical products. Compagnie De Béthune. 302,656; Apr. 25; Serial No. 311,261; published Feb. 7, 1933.
Chemical products. Compagnie De Béthune. 302,658; Apr. 25; Serial No. 311,262; published Feb. 7, 1933.
Compound of quinin and diethylbarbituric acid for pharmaceutical use. E. Merck. 91,490; renewed May 6, 1933.
Cosmetics. H. G. Blanchard. 302,769; Apr. 25; Serial No. 333,142; published Feb. 14, 1933.
Cough syrup. J. D. Greenstein. 302,745; Apr. 25; Serial No. 331,824; published Feb. 14, 1933.
Dyestuffs. General Dyestuff Corporation. 302,768; Apr. 25; Serial No. 333,185; published Feb. 7, 1933.
Ethyl-hexyl barbituric acid hypnotic. Parke, Davis & Co. 302,612; Apr. 25; Serial No. 331,961; published Feb. 7, 1933.
Fluxes, Soldering. Kester Solder Company. 302,757; Apr. 25; Serial No. 332,620; published Feb. 14, 1933.
Liquid and jelly preparations for nasal inhalation. Logan Laboratories, Ltd. 302,661; Apr. 25; Serial No. 332,156; published Feb. 7, 1933.
Medicated pastils and lozenges. S. A. Grau. 89,953; renewed Jan. 21, 1933.
Medicine. E. W. Johnston. 302,629; Apr. 25; Serial No. 332,774; published Feb. 14, 1933.
Medicines. F. O. Murray. 302,809; Apr. 25.
Naphthalene. Barrett Manufacturing Company. 91,452; renewed May 6, 1933.
N-monodibromopropyl-C.C-diethyl-barbituric acid. E. Merck. 91,680; renewed May 20, 1933.
Ointment, Medicinal. Ayer Company. 302,546; Apr. 25; Serial No. 333,572; published Feb. 14, 1933.
Pharmaceutical preparations. Kali-Chemie Aktiengesellschaft. 302,650; Apr. 25; Serial No. 328,791; published Feb. 14, 1933.
Photographic developing preparation. Farbwerke, vormals Meister, Lucius & Brüning. 40,259; renewed May 5, 1933.
Powder, Dental plate adhesive. S. M. Edison. 302,793; Apr. 25; Serial No. 323,436; published Feb. 14, 1933.
Preparation for the hair. R. G. Edwards. 40,808; renewed May 12, 1933.
Preparation for the relief of painful menstruation. P. H. Lemen. 302,708; Apr. 25; Serial No. 333,074; published Feb. 14, 1933.
Prophylactic, Intra-vaginal. G. A. Lasuman. 302,746; Apr. 25; Serial No. 331,559; published Feb. 7, 1933.
Purgative. Farbenfabriken of Elberfeld Company. 92,060; renewed June 17, 1933.
Remedy for furunculosis and acne. Chemische Fabrik Güstrow, Dr. Hillringhaus & Dr. Heilmann. 91,647; renewed May 20, 1933.
Serum preparations. Nitritfabrik Aktiengesellschaft. 91,685; renewed May 20, 1933.
Skin-disease remedy. Campho-Sorcin Laboratory. 90,629; renewed Mar. 11, 1933.
Solvent, Drain pipe. Kleen Chemical Company. 302,743; Apr. 25; Serial No. 330,986; published Feb. 14, 1933.
Tar distillates. Barrett Manufacturing Company. 91,409; renewed Apr. 29, 1933.
Vegetable tablets, mineral broth, soup, etc. Vegetable Products Corporation. 302,806; Apr. 25.
Vichy water, Artificial. Perfect Vichy Bottling Co. 302,744; Apr. 25; Serial No. 330,520; published Feb. 7, 1933.

CLASS 7

Cords, twines, ropes, etc. Henry C. Kelley Company. 93,184; renewed Aug. 26, 1933.
Rope, Manila. Sears, Roebuck and Co. 302,571; Apr. 25; Serial No. 333,086; published Feb. 14, 1933.
Rope, Wire. A. Leschen & Sons Rope Company. 302,552; Apr. 25; Serial No. 333,894; published Feb. 7, 1933.

CLASS 8

Cigarette papers. R. Bollord. 302,806; Apr. 25; Serial No. 322,570; published Feb. 14, 1933.
Pipes, cigarette cases, tobacco pouches, etc. John Wanamaker Philadelphia. 302,606; Apr. 25; Serial No. 331,206; published Feb. 14, 1933.

CLASS 11

Inks, Writing. Robert Keller Ink Company. 302,634; Apr. 25; Serial No. 332,706; published Feb. 7, 1933.

CLASS 12

Asphalt. Warren Chemical & Manufacturing Company. 91,401; renewed Apr. 29, 1933.
Bituminous emulsions. Pioneer Paper Company. 302,734; Apr. 25; Serial No. 332,198; published Feb. 14, 1933.
Colors for tinting plaster. Wilhoyte Decorative Plaster Co. 302,817; Apr. 25.
Doors, structural panels, moldings, etc. Farley & Loetscher Mfg. Co. 302,752; Apr. 25; Serial No. 332,294; published Feb. 7, 1933.
Roofing, Tarred felt. Barrett Manufacturing Company. 91,547; renewed May 13, 1933.
Roofings. Barrett Manufacturing Company. 93,167; renewed June 24, 1933.
Shingles, clapboards, roofing materials, and imitation masonry building units. F. E. Horne. 302,794; Apr. 25; Serial No. 295,216; published Feb. 7, 1933.

CLASS 13

Pipes, tubes and casings. National Tube Company. 91,892; renewed June 3, 1933.

CLASS 14

Welding rods and hard faced castings. Advance Welding and Alloys, Ltd. 302,609; Apr. 25; Serial No. 332,864; published Feb. 7, 1933.

CLASS 15

Oils, Coal-tar. Barrett Manufacturing Company. 91,836; renewed June 3, 1933.

CLASS 16

Black or vegetable black, Natural. Industrial Chemical Company. 92,339; renewed July 1, 1933.
Carbon black. Godfrey L. Cabot, Inc. 302,548; Apr. 25; Serial No. 333,501; published Feb. 14, 1933.
Carbon black. Godfrey L. Cabot, Inc. 302,707; Apr. 25; Serial No. 333,056; published Feb. 7, 1933.
Colors, Water and oil. Redsker & Hannis. 40,295; renewed May 12, 1933.
Paint, varnishes and paint pigments. John C. Dolph Company. 302,641; Apr. 25; Serial No. 332,447; published Feb. 7, 1933.
Polish, rubbing compound, liquid wax, etc. Charles F. Kellom Co. 302,539; Apr. 25; Serial No. 330,749; published Feb. 7, 1933.
Polishes and cleaners, Furniture. Lasex Corporation. 302,680; Apr. 25; Serial No. 332,928; published Feb. 7, 1933.
Preparations for removing paint and other coatings from surfaces. Ball Chemical Company. 91,451; renewed May 6, 1933.
Turpentine and turpentine compositions. Benzinwerke Rhenania Gesellschaft mit beschränkter Haftung. 91,540; renewed May 6, 1933.
Wax, polish, Floor. California Art Supply Company. 302,813; Apr. 25.

CLASS 17

Cigarettes. J. S. Slamey. 302,613; Apr. 25; Serial No. 331,996; published Feb. 7, 1933.

CLASS 19

Boats. Electric Launch Co. 93,085; renewed Aug. 19, 1933.
Railway equipment. American Steel Foundries. 302,811; Apr. 25.

CLASS 22

Cards, Playing. New York Consolidated Card Company. 40,749; renewed July 14, 1933.
Fish nets. Linen Thread Company. 302,561; Apr. 25; Serial No. 333,293; published Feb. 14, 1933.
Fishing Flies, Artificial. Cook, Newton & Smith, Incorporated. 302,774; Apr. 25; Serial No. 333,098; published Feb. 7, 1933.
Skates and skate outfits, Ice. Nestor Johnson Manufacturing Company. 302,569; Apr. 25; Serial No. 333,103; published Feb. 7, 1933.

CLASS 23

Cutlery, machinery, and tools. Morgan Construction Company. 91,888; renewed June 3, 1933.
Matrices. Mergenthaler Linotype Company. 92,096; renewed June 17, 1933.
Miter box or device. National Specialties Co. 302,562; Apr. 25; Serial No. 333,269; published Feb. 14, 1933.
Molds, Brick. J. B. Crowell & Sons. 302,655; Apr. 25; Serial No. 314,043; published Feb. 7, 1933.
Needles, Sewing-machine. Singer Manufacturing Company. 93,128; renewed Aug. 19, 1933.
Plow points. Farm Tools, Inc. 302,736; Apr. 25; Serial No. 331,673; published Feb. 7, 1933.
Razor blades. American Safety Razor Corporation. 302,812; Apr. 25.
Razor blades. Heppenstall Company. 302,551; Apr. 25; Serial No. 333,431; published Feb. 14, 1933.
Sewing machines and parts thereof and attachments therefor. Singer Manufacturing Company. 93,126-7; renewed Aug. 19, 1933.
Thread cutting tools. J. M. Carpenter Tap & Die Co. 302,725; Apr. 25; Serial No. 332,683; published Feb. 7, 1933.

CLASS 26

Appliances for measuring and recording the growth or production of growing human hair. Pro-Ker Laboratories, Inc. 302,543; Apr. 25; Serial No. 333,607; published Feb. 14, 1933.
Calculating and adding machines. Grimme Natalis & Co. Commanditgesellschaft auf Actien. 91,689; renewed May 20, 1933.
Crucible, Plumbago. Morgan Crucible Company Limited. 91,503; renewed May 13, 1933.
Crucibles. Morgan Crucible Company Limited. 91,105; renewed Apr. 15, 1933.
Mountings, Ophthalmic. J. D. Brock. 302,568; Apr. 25; Serial No. 333,113; published Feb. 7, 1933.
Pumps, Measuring oil. S. F. Bowser & Co. Inc. 93,160; renewed Aug. 26, 1933.
Scales, Weighing. W. R. Brearley. 302,730; Apr. 25; Serial No. 332,304; published Feb. 7, 1933.
Screens, Phosphoric photo. D. I. Cooke. 302,566; Apr. 25; Serial No. 333,150; published Feb. 7, 1933.
Sensitized photographic paper and cardboard. Kraft & Steudel Fabrik Photographischer Papiere Gesellschaft mit beschränkter Haftung. 91,584; renewed May 13, 1933.
Sound recording apparatus and equipment, etc., Photographic and electro-physical. RCA Victor Company. 302,712; Apr. 25; Serial No. 328,074; published Feb. 7, 1933.

CLASS 27

Clocks and parts thereof. Hamburg-Amerikanische Uhrenfabrik. 92,551; renewed July 15, 1933.
Clocks and watches. Western Clock Co. 91,054; renewed Apr. 8, 1933.
Clocks and watches. Western Clock Co. 91,282; renewed Apr. 22, 1933.

CLASS 29

Brooms and brushes, Household. Norea Broom Company. 302,668; Apr. 25; Serial No. 332,238; published Feb. 7, 1933.
Tooth brushes. Holton & Adams. 302,700; Apr. 25; Serial No. 333,390; published Feb. 14, 1933.
Tooth brushes. Pro-Phy-Lac-Tic Brush Company. 302,771; Apr. 25; Serial No. 333,107; published Feb. 14, 1933.

CLASS 30

China table ware. Onondaga Pottery Company. 302,666; Apr. 25; Serial No. 331,004; published Feb. 7, 1933.

CLASS 31

Refrigerators and parts thereof, and refrigerating systems. Electrolux Servel Corporation. 302,544-5; Apr. 25; Serial No. 333,581-2; published Feb. 7, 1933.
Refrigerators and parts thereof, and refrigerating systems. Electrolux Servel Corporation. 302,547; Apr. 25; Serial No. 333,579; published Feb. 14, 1933.
Refrigerators and parts thereof, and refrigerating systems. Electrolux Servel Corporation. 302,715-18; Apr. 25; Serial Nos. 333,797-800; published Feb. 14, 1933.
Refrigerators and parts thereof, and refrigerating systems. Electrolux Servel Corporation. 302,719; Apr. 25; Serial No. 333,793; published Feb. 14, 1933.
Refrigerators and parts thereof, and refrigerating systems. Electrolux Servel Corporation. 302,720; Apr. 25; Serial No. 333,796; published Feb. 14, 1933.

CLASS 32

Pillows. Chas. Emmerich & Co. 91,955; renewed June 10, 1933.
Stands and cabinets, telephone sets, book cases, etc., Smoking. Sun Glow Industries, Inc. 302,554; Apr. 25; Serial No. 333,264; published Feb. 14, 1933.
